EXECUTIVE SUMMARY

For the years 2013-2022, 12 Safe Routes to School projects have been completed, 48 are currently under way, and 21 have been awarded funding and are awaiting initiation. For the years 2011-2022, 9 Pedestrian/Bicyclist Program projects have been completed, 60 are currently under way, and 9 have been awarded funding and are awaiting initiation.” With this paragraph/text, “Since their beginning in 2005, the programs’ recipients have completed 349 projects, 74 percent of awarded projects. An additional 107 projects are underway, including some of the 67 projects selected for the 2021-2023 cycle. In the history of the programs, only seven projects have been cancelled.

Criteria for project evaluation emphasize safety (40 percent) and equity (20 percent) along with deliverability (12 percent), value (10 percent), and quality (18 percent).

In the 2023-2025 funding cycle currently under evaluation, the Safe Routes to School program received 144 applications and the Pedestrian/Bicyclist Programs received 165 applications. Funding requests in these 309 applications total \$483.42 million, the most funding requested to date.

Based on projected state and federal funding from all sources WSDOT is recommending 38 projects for Safe Routes to School and 28 projects for the Pedestrian/Bicyclist Program for a total of \$103.35 million.

WSDOT proposes a capacity-building initiative in the 2023-2025 biennium as a project under each program. WSDOT is designing the initiative to identify and address the needs of vulnerable populations in overburdened communities by developing plans that prioritize projects to improve safety and connectivity. This should result in a higher number and proportion of projects that prioritize these needs over the next 16 years and beyond and produce more successful applications to these two programs and other state and federal sources.

For the years 2013-2022, 12 Safe Routes to School projects have been completed, 48 are currently under way, and 21 have been awarded funding and are awaiting initiation. For the years 2011-2022, 9 Pedestrian/Bicyclist Program projects have been completed, 60 are currently under way, and 9 have been awarded funding and are awaiting initiation.

The 2023-25 call for projects launched in March 2022 before final legislative action on Move Ahead Washington. Under MAW, new revenue sources added specific requirements concerning program benefits to overburdened communities and vulnerable populations. WSDOT analyzed projects recommended for funding in terms of its originally announced criteria for high equity need and for project locations relative to the Environmental Health Disparities Map and tribal lands (details in Appendix B). Projects recommended for funding across the two programs exceed the goals of 10 percent tribal benefits and 35 percent benefits to overburdened communities.

WSDOT is reporting actions and results from recommendations included in the 2021 legislative report as directed under a budget proviso (Appendix C).

ABOUT THIS REPORT

Each year, WSDOT submits a report to the Legislature about the Safe Routes to School and Pedestrian/Bicyclist programs. This year's report includes:

- An overview of the programs, including the application and selection processes.
- Prioritized lists of projects for inclusion in the 2023-2025 transportation budget ([ESSB 5689](#), Sec. 310(3)).
- A status report on previously funded projects.
- The results of changes to the application and selection processes meant to increase the diversity of participating jurisdictions ([SSB 5165](#), Sec. 311(3)).
- WSDOT's approach to implementation of requirements for funds to be appropriated from the Climate Active Transportation Account ([ESSB 5974](#), Sec. 102(1)).

THE PEDESTRIAN/BICYCLIST AND SAFE ROUTES TO SCHOOL PROGRAMS: A HISTORY OF INNOVATION AND PERFORMANCE

For 17 years, the Safe Routes to School and Pedestrian/Bicyclist Programs have helped make Washington a national leader in pedestrian and bicyclist safety and mobility.

The primary objectives of the programs are to improve pedestrian and bicyclist safety and mobility and increase active transportation trips. Projects funded by the two programs include:

- Bicycle facilities such as buffered bike lanes.
- Pedestrian facilities such as sidewalks.
- Crossing improvements for people who walk and bike.
- Speed management.
- Education and encouragement under Safe Routes to School.

All Washingtonians are pedestrians at one time or another – to get to work and school, reach transit, shop along Main Street, or just get some fresh air and greet their neighbors. Pedestrians include those who walk or use a variety of tools such as wheelchairs, scooters, and other rolling devices.

Some people are pedestrians by necessity. Others told WSDOT during development of the statewide [Active Transportation Plan](#) (published in 2021) that they would make more active trips if they felt the infrastructure were safer and more inviting. Helping to make more pedestrian/bicycle trips possible can improve personal health, wellbeing, and community connection; reduce traffic congestion; and protect the environment.

Since 2009, walking and bicycling trips have been growing faster than the state's population. A large percentage of Washingtonians use active transportation. Washington ranks ninth in the nation for the percent of commuters walking or biking to work. In 2017, around 85 percent of public transportation users in the state reported walking or bicycling to access transit ([2017 National Household Travel Survey](#)).

As practices in design for safety, mobility, and accessibility have evolved for pedestrians and bicyclists, WSDOT has kept pace by updating trainings and providing direct technical assistance to jurisdictions to encourage submission of high-quality and effective Pedestrian/Bicyclist and Safe Routes to School projects.

WSDOT reviews the performance of these two programs and gathers data to identify needed improvements.

Among the findings:

- In the 2019 Washington State Student Travel Survey based on phone interviews with over 9,000 parents and guardians of students from more about 200 schools across Washington state, parents indicated that for children old enough to be able to walk or bike to school, the top reasons they do not permit their children to use active transportation are lack of sidewalks or pathways, amount or speed of traffic, and unsafe road crossings.
- A 2020 review of 94 Safe Routes to School projects found that most projects showed increases in students walking to/from school and 40 projects showed increases in the number of students biking.
- On average, schools with Safe Routes to School projects had a 33 percent increase in the number of students walking and a 104 percent increase in the number of students biking.
- A 2019 analysis of all projects found a 36-44 percent decrease in bicyclist and pedestrian crashes at project sites

CURRENT APPLICATION PROCESSES AND EQUITY ANALYSIS

Application and selection cycle

Safe Routes to School and the Pedestrian/Bicyclist Program application and selection cycle involves the following steps:

1. Data analysis to identify patterns in locations associated with crashes or potential crash exposure and locations with demographics that indicate high equity needs. (In future years this process will incorporate more information to expressly identify vulnerable populations and overburdened communities.)
2. Open call for projects.
3. Distribution of information about the programs to potential recipients.
4. Rigorous technical evaluation.
5. Delivering funding awards to successful applicants so they can begin their projects.

Following each cycle WSDOT staff review the process outcomes and recommendations from an external review committee and apply other lessons learned to update and improve the process for the next cycle. (In future years, this phase will address recommendations received from the Environmental Justice Council.)

The following are more specific application and selection processes for even- and odd-numbered years:

Even-numbered years

1. **January-February** – Call for projects launches with specific evaluation criteria identified.
1. **March-April** – Webinar explaining process for potential applicants.
1. **May-June** – Deadlines for applications from public agencies and tribes.

1. **June-August** – WSDOT staff and external committee members review/rank applications based on evaluation criteria communicated during the call for projects.
1. **September-October** – Site visits to top-tier projects and others identified for additional review. Legislative report/ranking list of projects drafted.
2. **Dec. 1** – WSDOT submits ranked list of projects to Legislature, indicating how many fall within the projected funding level.

Odd-numbered years

1. **Spring** – Legislature sets funding level.
2. **June** – WSDOT confirms project details and awards projects.
3. **Fall** – Collision and equity data analysis for next application and outreach cycle.
4. **Fall** – Outreach to cities, counties, and tribes prioritized based on data analysis. Technical assistance available from WSDOT staff up until call for projects is released the following spring.
5. **Dec. 1** – WSDOT submits report to the Legislature on project activities with information on whether projects are completed, under way, or not yet started.

Review criteria

The following are review criteria for applications to the two programs, including the percentage of consideration the individual criteria represent. WSDOT publicizes this information to the call-for-projects webpage, webinars, and other communication channels.

Safety (40 percent)

- Local Roads Safety Plan project.
- Level of traffic stress at project location.
- Speed management need.
- Crash history.

Equity (20 percent)

Projects in census tract(s) or serving school(s) based on data as follows:

- For Pedestrian/Bicyclist Program projects using the Washington Tracking Network:
 - Socioeconomic factor (using the compiled ranking).
 - Disability factor.
- For Safe Routes to School projects using Office of Superintendent of Public Instruction (OSPI) Report Card data:
 - Students of color.
 - Students with a Hispanic heritage.
 - Low income.
 - Students with disabilities.

Deliverability/other (12 percent)

- Matching funds. (For the 2023-2025 cycle, WSDOT only considered availability of matching funds for projects requesting \$800,000 or more.)
- Project in local or regional transportation plan.
- Applicant has an ADA transition plan or ADA compliance planning for public right-of-way.
- Applicant has an adopted greenhouse gas emissions policy.
- Applicant previously received project award(s) from WSDOT which required a scope change(s) or that have made exceptionally slow progress.

Value (10 percent)

- Cost of the project compared to the population and destination density at the project location.

Project quality (18 percent)

- Treatment(s) effectiveness based on crash modification factors and other research findings.
- Quality of proposed budget. Will consider percentage of budget item costs specific to active transportation treatments.
- Proposed project content.

Equity analysis and site reviews

Process changes

In preparing the [2021 report to the Legislature](#) that addressed ways to increase the diversity of jurisdictions that apply and succeed, WSDOT staff conducted an analysis of applications to the two programs for the 2021-2023 cycle. As part of the analysis, staff identified factors that affected the outcomes for locations that rank high on equity factors.

Projects that ranked high on equity, but not on other criteria, ranked lower for a variety of reasons including project quality, safety effectiveness of proposed designs, deliverability, or value. This analysis established the basis for the recommendations in the 2021 report, changes implemented in the 2022 call for projects, and the new capacity-building assistance initiative proposed for 2023-2025.

Outreach

In preparation for the 2022 call for projects, WSDOT staff prioritized outreach and technical assistance to jurisdictions and tribal governments identified as having any of the following characteristics:

- Pedestrian/bicyclist crash history.
- Equity criteria for race, poverty, or disability above the statewide average.
- No history of successful application.

Application review

When WSDOT receives project applications, staff analyze demographic data for all projects as follows:

- For Safe Routes to School projects using OSPI Report Card data, consideration for the percentage of the population in the school(s) that the project will serve who are:
 - Students of color.
 - Students with a Hispanic heritage.
 - Low Income.
 - Students with disabilities.
- For Pedestrian/Bicyclist Program projects using the Washington Tracking Network:
 - Socioeconomic factor ranking (using the compilation ranking).
 - Disability factor ranking.

For the 2023-2025 cycle WSDOT increased the weighting for equity criteria to 20 percent. Safety and equity together make up 60 percent of the total 100 percent consideration.

In the end, the decision of which projects within a given jurisdiction to submit rests with the applicant. Most applications received for the 2023-2025 cycle were not at locations that ranked high on the equity criteria identified in the call for projects.

Once WSDOT identified the top-tier projects based on safety and equity under the criteria identified at the beginning of the call for projects process, WSDOT developed the analysis reported in [Progress on equity requirements](#). That analysis summarizes results for overburdened communities ranked at 9 or 10 for environmental health burden or socioeconomic factors on Department of Health's Environmental Health Disparities Map and tribal areas identified in the Geographic Information System data WSDOT maintains based on data from the US Census modified with direct input from tribal governments.

Site reviews

In 2022, WSDOT staff conducted site reviews for the highest scoring projects. The site reviews provided an opportunity to get clarification about the projects and for WSDOT staff to provide suggestions intended to improve application quality and deliverability.

Most applicants adopted this [Practical Solutions](#) approach and adjusted their proposals at this stage; others chose not to. These adjustments resulted in changes to the total project cost and amount requested as applicants adjusted design and associated budget to improve the project quality/deliverability. This ultimately resulted in an increase in total amounts requested, which has been the norm in previous cycles at this stage of the process.

In each cycle WSDOT identifies more shovel-worthy projects than can fit within estimated funding levels. In this report several projects "below the line" have been highlighted to indicate that they received site reviews and arrived at a final proposal that merits funding if additional revenues become available. If funding beyond that additional level were to become available, WSDOT staff would need to conduct additional site reviews and work with the applicants to recommend additional projects with updated cost estimates.

RESULTS FROM THE 2022 CALL FOR PROJECTS

Applications received and recommendations

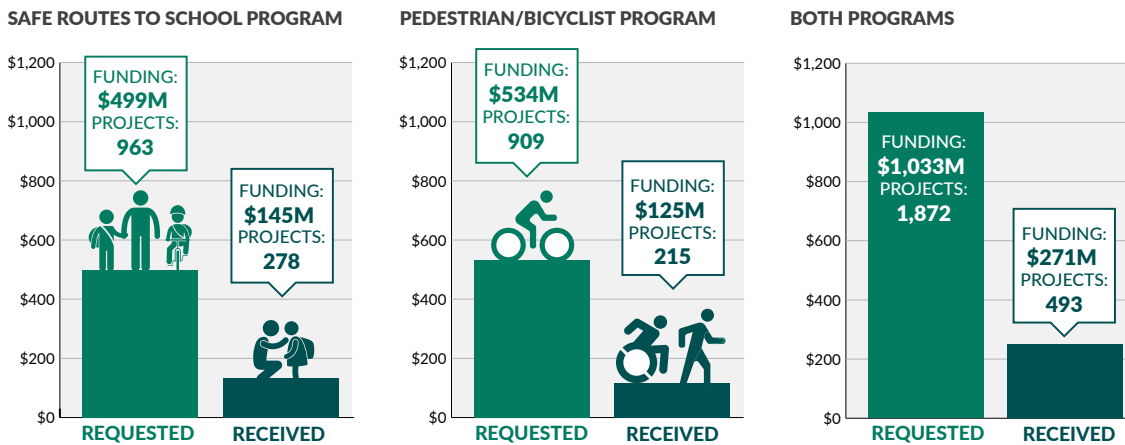

In the 2023-2025 funding cycle currently under evaluation, the Safe Routes to School program received 165 applications; the Pedestrian/Bicyclist Program received 144 applications. Funding requests in these 309 applications total \$483.42 million, the most funding requested to date.

The infographic below shows requested and received funding for Safe Routes to School and the Pedestrian/Bicyclist Program since the programs' creation in 2005.

Safe Routes to School Program & Pedestrian/Bicyclist Program

2005-2007 to 2021-2023 biennium

DOLLARS IN MILLIONS

Based on projected state and federal funding from all sources, WSDOT is recommending 28 projects for the Pedestrian/Bicyclist Program and 38 projects for Safe Routes to School for a total of \$103.35 million.

Progress on equity requirements

These programs were established with safety as a top priority, which goes hand in hand with equity consideration. The state Active Transportation Plan analyzed a decade's worth of data examining patterns of serious injury and fatal crashes across the state.

These serious and deadly crashes occur disproportionately in census tracts with higher rates of poverty relative to the state average, as well as disproportionate rates in census tracts with higher proportions of people who are Black, Indigenous, or people of color. Context such as the presence of a wide, fast, busy road increases the need for active transportation safety improvements. Such roads are more common in places affected by practices such

as redlining, and in places with higher poverty rates where more people rely on active transportation and transit access. In essence, a safety priority approach is also an equity priority approach. These two criteria together make up 60 percent of the total ranking possible for a given project.

Of those projects recommended for funding, 36 projects (nearly 55 percent) rank high for equity even though less than half of applications scored high on those criteria (46 percent). The Pedestrian/Bicyclist Program received more applications that ranked high for equity criteria (more than 56 percent) than Safe Routes to School (more than 37 percent).

The table below shows prioritized projects' progress toward meeting requirements for targeted investments under Move Ahead Washington and a funding goal established in the Active Transportation Plan. All figures in millions.

THE PEDESTRIAN/ BICYCLIST AND SAFE ROUTES TO SCHOOL PROGRAMS
2023-2025 PRIORITIZED PROJECT LIST AND PROGRAM UPDATE

Program	Move Ahead WA funding	Tribal benefits 10%	High equity need: 35%	Overburdened community benefits: 35%	Multimodal Account	Federal Safe Routes to School funds	Total all sources	Active Transportation Plan 40% equity funding goal
Safe Routes to School	\$34.92	Goal: \$3.49 Actual: \$5.47	Goal: \$12.22 Actual: \$20.46	Goal: \$12.22 Actual: \$17.9	\$7.75	\$11.4	\$54.07	Goal: \$21.63 Actual: \$24.148
Pedestrian/ Bicyclist Program	\$33.56	Goal: \$3.35 Actual: \$1.82	Goal: \$11.74 Actual: \$28.31	Goal: \$11.74 Actual: \$29.6	\$18.38	N/A	\$51.94	Goal: \$20.78 Actual: \$30.13
Combined total	\$68.48	Goal: \$6.84 Actual: \$7.29	Goal: \$23.96 Actual: \$48.77	Goal: \$23.96 Actual: \$47.5	\$26.13	\$11.4	\$106.01	Goal: \$42.40 Actual: \$54.27

Table notes

- Because several projects may be eligible for funding under either program WSDOT is reporting results for each program separately and for the two programs combined.
- Projects identified for the Overburdened Community Benefits column are located completely or partially in census tracts that have a ranking of 9 or 10 on the Environmental Health Disparities Map.
- With respect to projects benefiting tribal communities, most applications are submitted by the agency with jurisdiction over the roadway (i.e., city, county, WSDOT region). In these instances, applicants typically include a letter of support from the tribes affected by the project. In the past WSDOT has not required applicants to include a formal tribal resolution in support of a project. Projects in this report identified as providing a tribal benefit either were submitted directly by a tribal government or had a letter of support or other expression of tribal support included with the application. Future funding cycles will incorporate the appropriate requirement for formal expressions of tribal support for a project to be counted as fulfilling this requirement ([ESSB 5974, Sec. 426 \(1\)\(b\)](#)).

2023-2025 SAFE ROUTES TO SCHOOL PRIORITIZED PROJECTS

The purpose of the Safe Routes to School Program as established in [RCW 47.04.300](#) is to:

- Enable/encourage children to walk, roll and bicycle to school.
- Make bicycling and walking safer.
- Facilitate the planning, development, and implementation of projects and activities that improve safety and reduce traffic in the vicinity of schools.

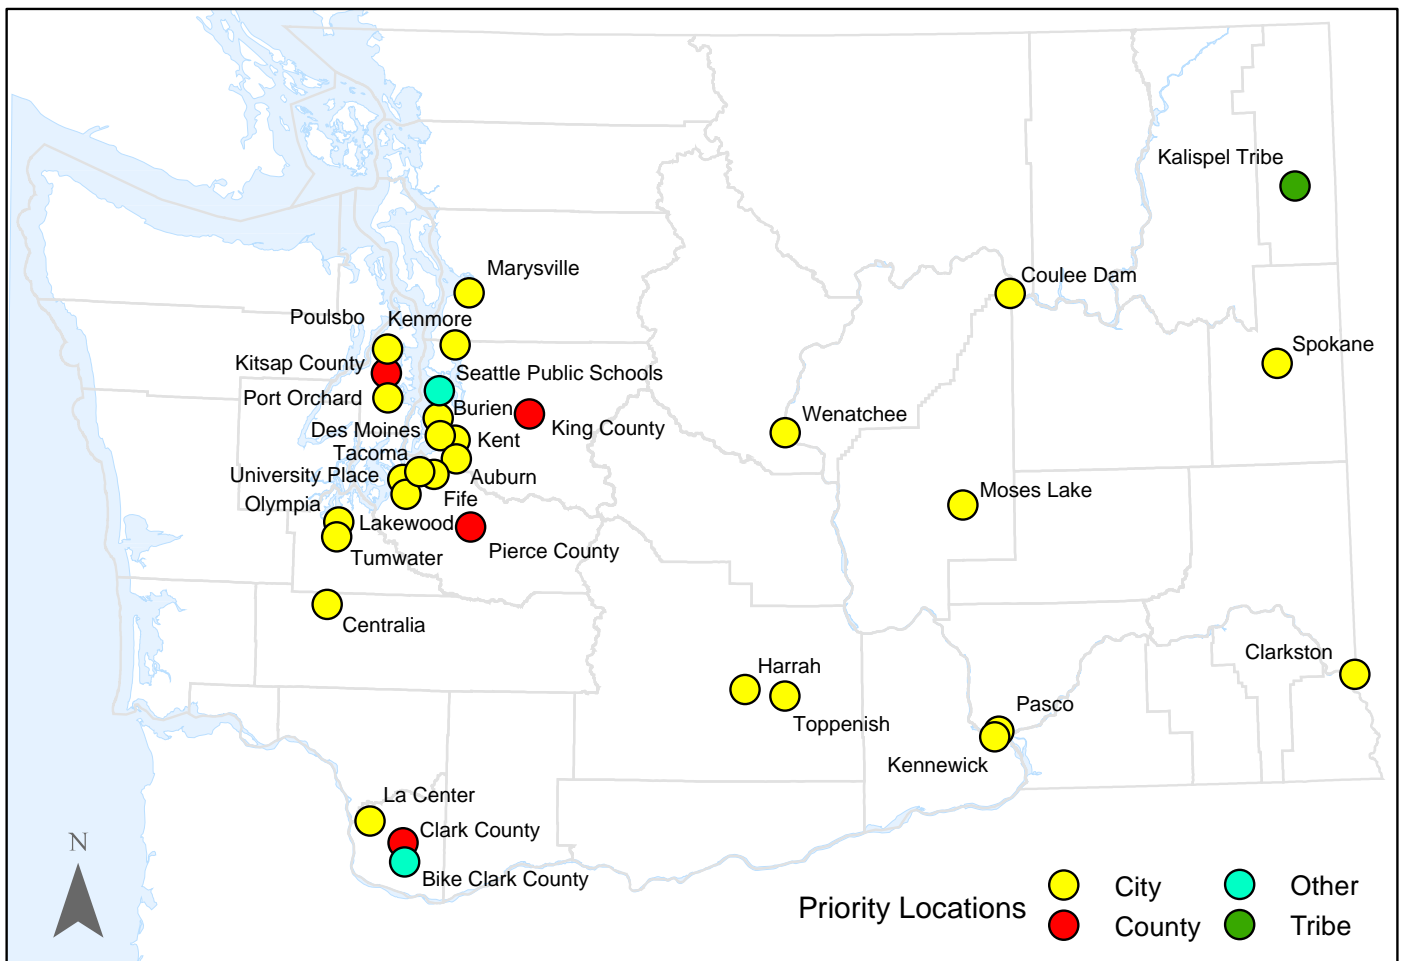

The program provides funding for infrastructure projects within two miles of a school serving children kindergarten-12th grade. It can fund design-only projects that allow agencies the opportunity to engage with communities and stakeholder groups. The purpose of this phase is to develop and design projects that are

well-received and appeal to a wider range of users and stakeholders. Education and encouragement activities are also eligible for funding.

Of the 165 applications in the prioritized list, 38 are above the projected funding level of \$54.07 million. Approximately 50 percent of those projects would serve high equity need schools. Another 8 applications are recommended if additional funds are available; those are indicated with a lighter shading.

2023-2025 Safe Routes to School Program proposed priority project locations

The map below shows the location of the 38 Safe Routes to School Program proposed projects above the projected funding level.

2023-2025 Safe Routes to School proposed priority list

The table below shows the 165 applications to Safe Routes to School. The shaded rows show the 38 projects above the projected estimated funding level.

Applicant name	Leg. District	Title of project	Total project cost	Request	Cumulative total
WSDOT	All	Local/Tribal Agency Active Transportation Capacity Building for Project Development (See WSDOT capacity building initiative section below)	\$2,950,000	\$2,950,000	\$2,950,000

2023-2025 PEDESTRIAN/BICYCLIST PRIORITIZED PROJECTS

The purpose of the Pedestrian/Bicyclist Program is to:

- Eliminate pedestrian and bicyclist fatal and serious injury traffic crashes.
- Build connected low stress walk and bike networks.
- Increase walking and biking.

The program includes two types of eligible projects:

- Construction projects that may include preliminary engineering.
- Design-only projects that allow agencies the opportunity to engage with communities and stakeholder groups to develop and design projects

that are well-received and appeal to a wider range of users and stakeholders.

Of the 144 applications in the prioritized list, 28 are above the projected funding level of \$51.94 million.

2023-2025 Pedestrian/Bicyclist Program proposed priority project locations

The map below shows the location of the 28 Pedestrian/Bicyclist Program proposed projects that are above the projected funding level.

2023-2025 Pedestrian/Bicyclist Program proposed priority list

The table below shows the 144 applications to the Pedestrian/Bicyclist Program. The shaded rows show the 28 projects above the projected estimated funding level. Another 4 applications are recommended if additional funds are available; those are indicated with a lighter shading

WSDOT CAPACITY-BUILDING INITIATIVE: REACHING MORE PEOPLE IN MORE PLACES

WSDOT conducted outreach in 2021 to encourage new applicants to these two programs, prioritizing contacts with communities that score high on equity criteria WSDOT uses in the application scoring process. This effort produced results, with 69 new city or county applicants and one new tribe applying to the two programs. Additionally, the list of projects recommended for funding includes 11 cities and a tribe that are new to the programs.

Staff review of projects submitted in the last cycle found that projects that ranked high on equity but not on other criteria ranked lower for a variety of reasons. As noted in the [2021 report to the Legislature](#), factors that decreased the competitiveness of these projects relative to others included project quality, safety effectiveness of proposed designs, deliverability, or value. That analysis established the basis for the recommendations in the 2021 report, changes implemented in the 2022 call for projects, and the new Local/Tribal Agency Active Transportation Capacity Building for Project Development assistance initiative proposed for 2023-2025, a line item in the programs' prioritized lists.

Overburdened communities in particular may not have the capacity to develop community plans or projects that incorporate a [Safe System Approach](#) to reduce serious and fatal crashes and provide accessible active transportation for all. As a result, they may not be able to compete effectively for state or federal funds. The programs can do even more to increase benefits to vulnerable populations and increase community ability to compete effectively for funding.

In the 2023-2025 biennium, WSDOT intends to provide responsive capacity building and technical assistance through the Safe Routes to School and Pedestrian/Bicyclist programs to enhance active transportation safety and connectivity. This capacity-building initiative will prioritize the needs of vulnerable populations in overburdened communities, tribes, and public agencies that have not

been successful in previous funding cycles, including those encouraged to apply through targeted outreach in 2021. This work is intended to increase utilization of the program by a greater diversity of jurisdictions. WSDOT will tailor capacity building to the community's context and needs. Potential activities include:

- Developing active transportation plans built on community engagement that identify specific needs, particularly for vulnerable populations and those addressing safety concerns.
- Connecting active transportation planning to updates of other relevant plans (e.g., incorporating findings from the community's ADA transition plan in support of accessible active transportation).
- Developing a prioritized list of fundable projects.
- Developing/designing specific projects.
- Deploying regional collaboration along a corridor that crosses jurisdictional boundaries to identify shared needs and priorities and propose projects for state and/or federal funding.

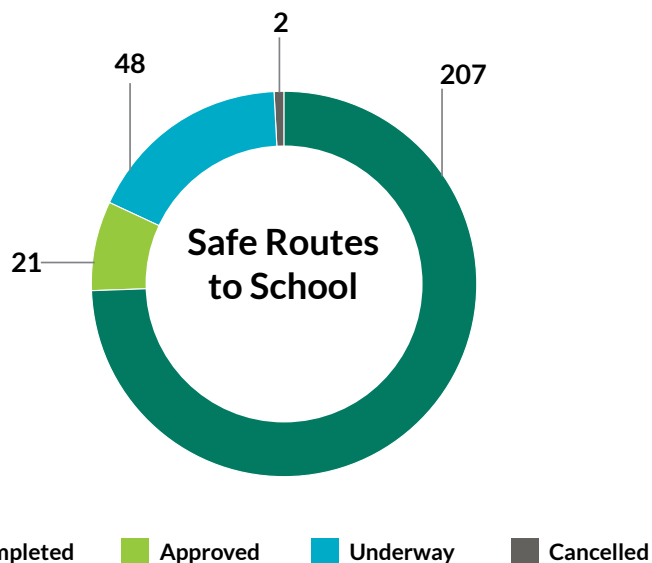

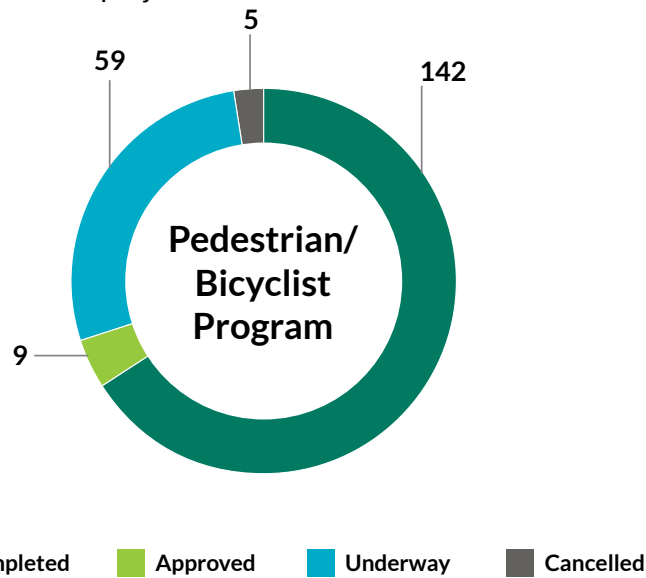

These activities and other capacity building efforts will increase the opportunity for local agencies and tribes to receive funds not only through the Safe Routes to School and Pedestrian/Bicyclist programs, but from other WSDOT grant programs and funding opportunities, other state agencies, and federal competitive grants. This effort will also enhance the quality and value of changes funded through local sources, contributing to overall active transportation network connectivity and safety.

APPENDIX A: PROJECT STATUS

Since 2005 the Safe Routes to School and Pedestrian/Bicyclist Program have funded projects across Washington state.

Since their beginning in 2005, the programs' recipients have completed 349 projects, 74 percent of awarded projects. An additional 107 projects are underway, including some of the 67 projects selected for the 2021-2023 cycle. In the history of the programs, only seven projects have been cancelled.

The charts below show the status of projects from 2005-2022.

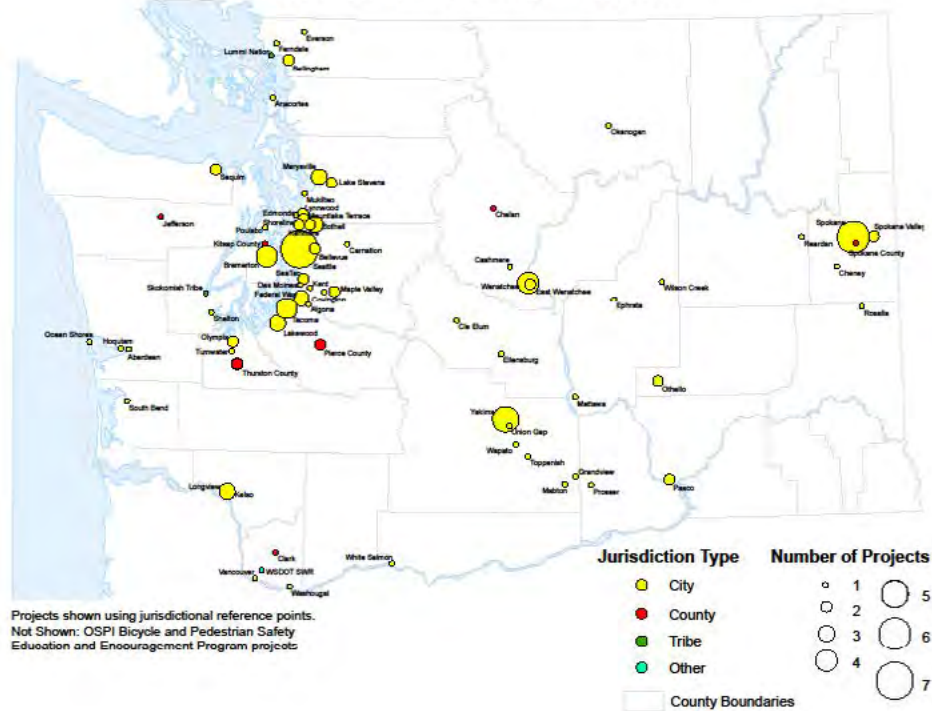

THE PEDESTRIAN/ BICYCLIST AND SAFE ROUTES TO SCHOOL PROGRAMS
2023-2025 PRIORITIZED PROJECT LIST AND PROGRAM UPDATE

The maps below show project locations from 2015-2022.

Pedestrian/Bicyclist Program Projects: 2015-2022

Safe Routes To School Program Projects: 2015-2022

Safe Routes to School project status 2013-2022

The table below shows the status of Safe Routes to School projects. Projects documented as complete in prior reports are not included here.

Agency	Status	Title of project	Selection year	Selection amount
Aberdeen	Complete	Stevens Elementary Pedestrian Improvements	2019	\$411,200
Bellevue	Complete	Sherwood Elementary and Interlake High School Non-motorized Safety Improvements	2017	\$778,559
Bellevue	Approved	NE 18th and NE 21st Streets SRTS	2021	\$790,000
Bellingham	Underway	Cordata Safe Routes to School Program	2015	\$778,127
Bellingham	Approved	Parkview Elementary SRTS	2021	\$1,620,000
Bothell	Underway	188th St Non-motorized Improvements	2017	\$672,600
Bremerton	Underway	Kitsap Lake Elementary SRTS	2017	\$1,754,348
Bremerton	Underway	Bremerton School Zone Safety Improvements - Safe Routes to Schools	2019	\$244,000
Bremerton	Approved	View Ridge Elementary - Almira Drive Safe Routes to School Project	2022	\$4,155,000
Cashmere	Underway	2018 Safe Route to School Grant	2019	\$180,268
Chelan County	Underway	South Wenatchee Pedestrian Safety Improvements, Phase II	2015	\$131,600
Clark County	Approved	Hockinson Elementary School Flashers and Crosswalk Project	2022	\$389,000
Cle Elum	Complete	SR 903 and Stafford Street Sidewalk Improvements	2019	\$356,250
Covington	Underway	Timberlane Way Active Transportation	2021	\$555,085
East Wenatchee	Underway	Kenroy Elementary Safe Routes to School	2019	\$1,998,675
East Wenatchee	Underway	Sterling Intermediate Safe Routes to School	2019	\$1,937,791
Edmonds	Underway	Citywide Ped Crossing Enhancements	2017	\$1,490,000

THE PEDESTRIAN/ BICYCLIST AND SAFE ROUTES TO SCHOOL PROGRAMS
2023-2025 PRIORITIZED PROJECT LIST AND PROGRAM UPDATE

Agency	Status	Title of project	Selection year	Selection amount
Ephrata	Complete	Flashing beacons, crosswalks, and driver feedback displays	2017	\$50,000
Everson	Underway	SR544 S Everson Sidewalk Improvements	2017	\$497,025
Federal Way	Underway	Lakota Middle School - SW Dash Point Road - Safe Routes to School	2019	\$1,350,000
Federal Way	Approved	16th Ave Non-Motorized Trail	2021	\$1,835,000
Hoquiam	Underway	SR 109/US 101 Bike Lanes and Sidewalks	2021	\$1,440,000
Jefferson County	Underway	SR116 and Cedar Avenue Pedestrian Bike Improvements	2019	\$880,300
Kelso	Approved	Huntington Middle School Safety	2021	\$658,000
Kelso	Approved	Ped and Bicycle Safety Improvements Allen St 225 ft west of N.Kelso Dr to Crescent Dr	2022	\$935,000
Kent	Approved	Safe Routes to School – School Zone Flashers	2022	\$397,800
Kitsap County	Underway	Central Valley Road	2019	\$2,044,637
Lakewood	Underway	Steilacoom Blvd. SW: Weller to Phillips	2015	\$450,000
Lakewood	Underway	Farwest Dr. SW	2021	\$1,336,000
Lakewood	Underway	112th St. SW – Clover Park High School Sidewalk	2021	\$656,000
Longview	Complete	Washington Way / 28th Avenue Pedestrian Hybrid Beacon and illumination	2019	\$180,000
Lummi Indian Nation	Approved	Mackenzie Road Sidewalk	2021	\$200,000
Lynnwood	Underway	College Place Elementary Pedestrian Safety	2021	\$672,300
Lynnwood	Underway	College Place Middle School Crosswalk	2021	\$238,000
Maple Valley	Approved	SR 516 Pedestrian Crossing Enhancement, east of SE Bear Blvd	2022	\$326,250
Marysville	Approved	Shoultes Elementary SRTS	2021	\$394,073

Walla Walla	Underway	Isaacs Avenue Improvements – Division St to Link St	2017	\$865,720

APPENDIX B: PROGRAM COMMITMENTS TO EQUITY

Existing equity application criteria

The statewide Active Transportation Plan identified equity analysis as essential for prioritizing safety investments. The analysis found disproportionately high rates of serious and fatal crashes involving people walking, rolling, or bicycling in neighborhoods with higher proportions of low-income households and those with higher proportions of people who are Black, Indigenous, or people of color.

Equity and safety go hand in hand when communities make active transportation improvements. A 2019 analysis of all Pedestrian/Bicyclist and Safe Routes projects found a 36-44 percent decrease in bicyclist and pedestrian crashes at project sites.

Because of this, the plan set a goal of awarding 40 percent Pedestrian/Bicyclist and Safe Routes to School funds to communities with a high equity need.

Additionally, WSDOT has long incorporated equity criteria in its evaluation of Pedestrian/Bicyclist and Safe Routes project applications. By using equity and safety for 60 percent of a project's score, WSDOT addresses both current population characteristics and traffic-safety outcomes. Specifics are in [Current application processes and equity analysis](#).

Broadly, of the 281 incorporated cities and towns in Washington, 125 have applied and received funding as of 2021. Of the 39 counties, 20 have applied and received funding. Of the 29 federally recognized tribes, 5 have applied and received funding. Communities that have not applied are those with higher proportions of people who have disabilities or low incomes—the very people who may be most reliant on active transportation and safe access to transit.

Meeting new equity requirements under Move Ahead Washington

The Legislature passed the [Move Ahead Washington](#) transportation package during its 2022 session. Governor Inslee signed Move Ahead Washington into law March 25, 2022. With Move Ahead Washington, the Legislature invested \$5.41 billion of [Climate Commitment Act](#) revenues over 16 years in a variety of transportation projects and programs. This includes \$1.29 billion for walking and biking projects and programs over the next 16 years from the newly created Climate Active Transportation Account.

Move Ahead Washington sets goals of directing a minimum of 35 percent of funding from the Climate Active Transportation Account to address the needs of vulnerable populations in overburdened communities, with 10 percent providing a benefit to tribal communities ([ESSB 5974, Sec. 104\(1\)](#)).

WSDOT's outreach and technical assistance for the Safe Routes to School and Pedestrian/Bicycle programs is ongoing. Staff intensified efforts beginning in January 2022, following through on changes identified in a [report to the Legislature](#) in December 2021. To align with funding cycles, WSDOT developed criteria for project evaluation well before passage of Move Ahead Washington in March 2022. As a result, the application process in this cycle could not completely incorporate requirements for Climate Active Transportation Account funding. Despite this, projects recommended for funding between the two programs exceed the target percentages.

WSDOT evaluated projects for equity scoring consistent with what WSDOT had communicated to agencies during the outreach phase and while the call for projects was open. WSDOT's equity scoring approach discussed above and later in this report incorporates census data

for poverty, race, and disability. This is consistent with several definitions of vulnerable populations under Move Ahead Washington and the [Healthy Environment for All \(HEAL\) Act](#).

In preparing the analysis under [Progress on equity requirements](#), WSDOT evaluated the list of projects recommended for funding in the two programs separately and combined to identify whether they met Move Ahead Washington goals. To do this, WSDOT identified overburdened communities as those in a location with a score of 9 or 10 on the Department of Health Environmental Health Disparities Map or in tribal areas identified in the Geographic Information System data WSDOT maintains based on data from the US Census modified with direct input from tribal governments.

Results for the 2023-25 project cycle

Safe Routes to School

- Out of 165 applications, 64 total ranked in the top half of points for equity (15 or 20 percent consideration), more than 37 percent of all applications.
- Of these, 23 applications make up 62.1 percent of the 37 projects recommended for funding.
- 42 of the 165 applications received the top ranking in the Safe Routes to School equity review where the percentage of students reported in the equity categories were in the top quintile of applicant schools or the project involved tribal lands. Of the 37 projects recommended for funding, 19 (51.3 percent) are in this top quintile.

Pedestrian/Bicyclist Program

- Out of 144 applications, 81 ranked in the top half of points for equity (15 or 20 percent consideration), more than 56 percent of all applications.
- Of these, 23 applications make up almost 85 percent of the 27 projects recommended for funding.
- 53 of the 144 applications ranked a 9 or 10 on the socioeconomic and disability rankings in the Washington Tracking Network Environmental

Health Disparities Map or involve tribal lands. Of the 27 projects recommended for funding, 16 (59 percent.) are in this category

Combined

- Out of 309 applications 145 total ranked in the top half of points for equity, more than 46 percent of all applications.
- Of these, 46 applications make up 71.8 percent of the 64 projects recommended for funding.

95 of the 309 applications were in the highest equity ranking for the programs; 35 of these make up 54.68 percent of the projects recommended for funding.

APPENDIX C: UPDATES ON PROGRAM IMPROVEMENT RECOMMENDATIONS

This section provides an update on implementation of recommendations from the [2021 report to the legislature](#).

Increase funding levels to encourage a diversity of applicants and expand capacity for technical assistance

- **Increased funding** – Move Ahead Washington significantly increased funding levels for years to come. The number of applications and level of funding requested increased in step, leaving the programs still able to fund around 23 percent of the total amount requested.
- **Capacity-building needs** – Will expand technical assistance through the capacity-building initiative.

Improve information sharing and training for jurisdictions

- **Information sharing** – Increased communication about the programs. Held introductory and in-depth webinars to walk jurisdictions through the application process.
- **Training and support** – Provided a high-level workshop on best practices in project design.
- **Capacity-building needs** – Will provide additional training and support in the capacity-building initiative.

Assist with jurisdictions' project planning and prioritization

- **Improve project planning and prioritization** – Added a development/design-only phase with state funding as an option in the Safe Routes to School program to fill the pipeline with projects that can apply for construction funding in future. Coordinated with the WSDOT Local Programs' City and County Safety Plans and Local Technical Assistance programs to offer data, training, and examples for plans that

address active transportation needs within a Safe System Approach.

- **Capacity-building needs** – Will develop new data analysis that will assist jurisdictions with overburdened communities and vulnerable populations in identifying locations with high levels of need. Planning/prioritization will be included in the capacity-building initiative.

Improve jurisdictions' project management capacity

- **Continue fact-finding** – Will continue to engage with organizations representing jurisdictions to identify specific and actionable recommendations to improve project management capacity.
- **Capacity-building needs** – Identified concepts through outreach in 2021 that will contribute to the capacity-building initiative.

Expand access to data, analysis, training, and technical assistance

- **Identify equity data sources** – Encouraged applicants to use the Department of Health Washington Tracking Network to identify and consider projects in locations that will score high on equity. Provided equity analysis with the safety and crash data analysis provided to agencies.
- **Capacity-building needs** – Will provide targeted technical assistance and develop toolkits and templates for design selection, cost estimating, and scheduling.

Adjust selection criteria

- **Equity weighting** – Increased weighting of equity consideration.
- **Comparing apples to apples** – Grouped applicants of similar size/type and score them relative to each other for project cost, population, and other characteristics.

- **No match for low-cost projects** – Eliminated availability of matching funds as an element of consideration for those applying for projects below \$800,000.
- **Capacity-building needs** – As part of the capacity-building initiative, will work with partners to develop coordinated plans, priorities, and proposed timelines for improvements on state routes in particular. This will support Safe Routes to School and Pedestrian/ Bicyclist Program applications and complement the Connecting Communities Pilot Program and implementation of the Complete Streets directive.

APPENDIX D: PROGRAM BENEFITS TO OVERBURDENED COMMUNITIES AND VULNERABLE POPULATIONS NOW AND IN THE FUTURE

Move Ahead Washington lists requirements for Climate Active Transportation Account-funded projects to provide direct and meaningful benefits to vulnerable populations within the boundaries of overburdened communities.

Active transportation projects and safety education programs directly provide the following benefits listed in Move Ahead Washington (ESSB 5974, Sec. 104(1) and (2)) by supporting safe walk/bike facilities and mode shift that contributes to reductions in vehicle miles traveled:

- Direct reduction of environmental burdens in overburdened communities.
- Reduction of disproportionate, cumulative risk from environmental burdens, including those associated with climate change.
- Focus on creating environmental benefits, including eliminating health burdens, creating community and population resilience, and raising the quality of life of those in the community.

The Safe Routes to School and Pedestrian and Bicyclist programs application process asks questions to establish that projects meet the following requirements:

- Support of community led project development, planning, and participation costs.
- Meeting a community need identified by the community that is consistent with the intent of this chapter or RCW 70A.02.010.

Scoring process and equity criteria for the programs incorporate information to address the following requirements:

- Direct benefits and programs to target vulnerable populations and overburdened communities to reduce statewide disparities.
- Make investments and benefits roughly proportional to the health disparities that a specific community experiences, with a goal of eliminating the disparities.
- Make an effort to balance investments and benefits across the state and within counties, local jurisdictions, and unincorporated areas as appropriate to reduce disparities by location and to ensure efforts contribute to a reduction in disparities that exist based on race or ethnicity, socioeconomic status, or other factors.

WSDOT proposes capacity-building work as an initiative in 2023-2025 to deepen local agency and WSDOT understanding of the transportation needs of vulnerable populations in overburdened communities and to develop fundable projects to address those needs. This should result in a higher number and proportion of projects that prioritize these needs over the next 16 years and beyond. For more information about the initiative, refer to “Capacity-building initiative.”

ENGLISH

Title VI Notice to Public

It is the Washington State Department of Transportation's (WSDOT) policy to assure that no person shall, on the grounds of race, color, national origin, as provided by Title VI of the Civil Rights Act of 1964, be excluded from participation in, be denied the benefits of, or be otherwise discriminated against under any of its programs and activities. Any person who believes his/her Title VI protection has been violated, may file a complaint with WSDOT's Office of Equity and Civil Rights (OECR). For additional information regarding Title VI complaint procedures and/or information regarding our non-discrimination obligations, please contact OECR's Title VI Coordinator at (360) 705-7090.

Americans with Disabilities Act (ADA) Information

This material can be made available in an alternate format by emailing the Office of Equity and Civil Rights at wsdotada@wsdot.wa.gov or by calling toll free, 855-362-4ADA(4232). Persons who are deaf or hard of hearing may make a request by calling the Washington State Relay at 711.

ESPAÑOL

Notificación de Título VI al Público

La política del Departamento de Transporte del Estado de Washington (Washington State Department of Transportation, WSDOT) es garantizar que ninguna persona, por motivos de raza, color u origen nacional, según lo dispuesto en el Título VI de la Ley de Derechos Civiles de 1964, sea excluida de la participación, se le nieguen los beneficios o se le discrimine de otro modo en cualquiera de sus programas y actividades. Cualquier persona que considere que se ha violado su protección del Título VI puede presentar una queja ante la Oficina de Equidad y Derechos Civiles (Office of Equity and Civil Rights, OECR) del WSDOT. Para obtener más información sobre los procedimientos de queja del Título VI o información sobre nuestras obligaciones contra la discriminación, comuníquese con el coordinador del Título VI de la OECR al (360) 705-7090.

Información de la Ley sobre Estadounidenses con Discapacidades (ADA, por sus siglas en inglés)

Este material puede estar disponible en un formato alternativo al enviar un correo electrónico a la Oficina de Equidad y Derechos Civiles a wsdotada@wsdot.wa.gov o llamando a la línea sin cargo 855-362-4ADA(4232). Personas sordas o con discapacidad auditiva pueden solicitar la misma información llamando al Washington State Relay al 711.

Раздел VI Общественное заявление

Политика Департамента транспорта штата Вашингтон (WSDOT) заключается в том, чтобы исключить любые случаи дискриминации по признаку расы, цвета кожи или национального происхождения, как это предусмотрено Разделом VI Закона о гражданских правах 1964 года, а также случаи недопущения участия, лишения льгот или другие формы дискриминации в рамках любой из своих программ и мероприятий. Любое лицо, которое считает, что его средства защиты в рамках раздела VI были нарушены, может подать жалобу в Ведомство по вопросам равенства и гражданских прав WSDOT (OECR). Для дополнительной информации о процедуре подачи жалобы на несоблюдение требований раздела VI, а также получения информации о наших обязательствах по борьбе с дискриминацией, пожалуйста, свяжитесь с координатором OECR по разделу VI по телефону (360) 705-7090.

Закон США о защите прав граждан с ограниченными возможностями (ADA)

Эту информацию можно получить в альтернативном формате, отправив электронное письмо в Ведомство по вопросам равенства и гражданских прав по адресу wsdotada@wsdot.wa.gov или позвонив по бесплатному телефону 855-362-4ADA(4232). Глухие и слабослышащие лица могут сделать запрос, позвонив в специальную диспетчерскую службу штата Вашингтон по номеру 711.(4232). Глухие и слабослышащие лица могут сделать запрос, позвонив в специальную диспетчерскую службу штата Вашингтон по номеру 711.

Thông báo Khoản VI dành cho công chúng

Chính sách của Sở Giao Thông Vận Tải Tiểu Bang Washington (WSDOT) là bảo đảm không để cho ai bị loại khỏi sự tham gia, bị từ khước quyền lợi, hoặc bị kỳ thị trong bất cứ chương trình hay hoạt động nào vì lý do chủng tộc, màu da, hoặc nguồn gốc quốc gia, theo như quy định trong Mục VI của Đạo Luật Dân Quyền năm 1964. Bất cứ ai tin rằng quyền bảo vệ trong Mục VI của họ bị vi phạm, đều có thể nộp đơn khiếu nại cho Văn Phòng Bảo Vệ Dân Quyền và Bình Đẳng (OECR) của WSDOT. Muốn biết thêm chi tiết liên quan đến thủ tục khiếu nại Mục VI và/hoặc chi tiết liên quan đến trách nhiệm không kỳ thị của chúng tôi, xin liên lạc với Phó Trí Viên Mục VI của OECR số (360) 705-7090.

Thông tin về Đạo luật Người Mỹ tàn tật (Americans with Disabilities Act, ADA)
