Introduction

There have been longstanding national trends—predating the passage of the Affordable Care Act and implementation of Medicaid Expansion—toward an increasing number of employers faced with rising employee health care costs choosing to (a) drop health care benefits for their employees or (b) pass on to their employees a greater share of coverage costs. Therefore, there have been trends towards more employees and their dependents applying for health care supported with public funds. In response to these trends, the 2006 State Legislature enacted Engrossed Substitute House Bill (ESHB) 3079. This legislation directed the Department of Social and Health Services (DSHS) and the Health Care Authority (HCA), in coordination with the Employment Security Department (ESD), to report annually on the employment of Medical Assistance clients.

This report provides both aggregate and employer-specific data related to clients covered by HCA's Apple Health program, and non-client individuals with dependents who have Apple Health coverage, as specified in the legislation (enacted as Chapter 264, Laws of 2006 and codified in RCW 74.09.053 and RCW 70.47.170). Governor Gregoire signed ESHB 3079 but vetoed the emergency clause included in the bill. The Governor's veto message urged caution when interpreting data provided in this report:

The employer information to be provided by the Health Care Authority (HCA) and the Department of Social and Health Services (DSHS) is not a requirement for enrollment or eligibility. Consequently, data contained in the reports will have been provided on a voluntary basis and will be unverified. The two reports—an employer specific report and an aggregated report—will originate from separate sources. Therefore, they will not be comparable. The reports will also be based on a point-in-time data collection and will therefore not reflect changes in employment status. These data limitations must be considered when interpreting the reports.

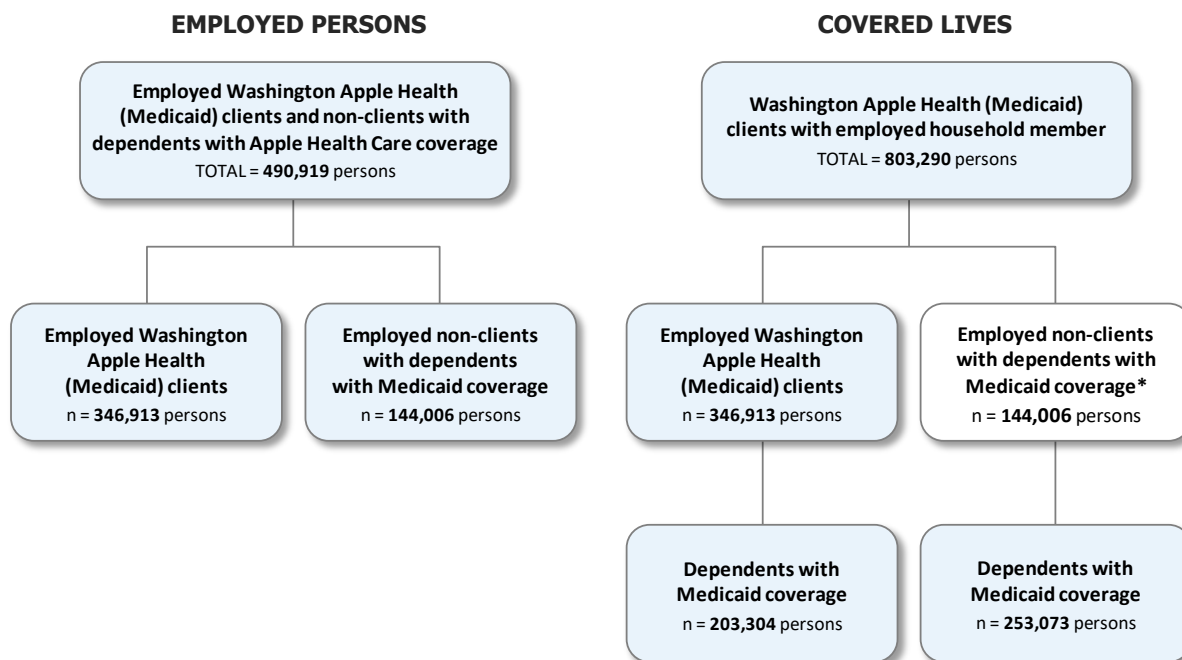

Please see the data sources and limitations section on page 6 for a discussion of additional data limitations associated with this report.

ESHB 3079 directs the provision of two separate sets of information related to Apple Health clients and non-client individuals with dependents who are Apple Health clients:

- Aggregate data for calendar year (CY) 2020 by industry, firm size, and public/private ownership type. These data are based on ESD quarterly wage data.
- By-firm data for January and June 2021 for employers associated with 50 or more persons with Apple Health coverage. The data is derived from the DSHS Automated Client Eligibility System (ACES). Due to the required reporting deadline and data availability limitations, April 2021 data are reported in place of June 2021.

Key Findings

Figure 1. Overview of Counts of employed individuals with Apple Health coverage and employed non-clients with covered dependents – Average per quarter in CY 2020

***Does not add to covered lives count.**

1. In the average quarter in CY 2020, there were 1,861,372 persons with Apple Health coverage, excluding clients who received only family planning coverage.
2. In the average quarter in CY 2020, there were 346,913 persons with Apple Health coverage and ESD-reported earnings in the quarter (see Table 2A "All Firms"). This represents about 19 percent of all persons with Apple Health coverage in the average quarter in CY 2020.
3. The 346,913 employed Apple Health clients had 203,304 dependents with Apple Health coverage, for an average quarterly total of 550,217 covered lives (see Table 2B "All Firms"). This is 30 percent of all persons with Apple Health coverage in the average quarter in CY 2020.
4. We use the term "employed non-client individuals with dependents with Apple Health coverage" to refer to employed persons who do not have Apple Health coverage, but who have dependents with Apple Health coverage. In the average quarter in CY 2020, there were 144,006 employed non-client individuals with dependents with Apple Health coverage (see Table 3A "All Firms"). There were 253,073 dependents with Apple Health coverage associated with these employed non-clients (see Table 3B "All Firms"). This represents 14 percent of all persons with Apple Health coverage in the average quarter in CY 2020.
5. Combining employed Apple Health clients and non-clients, there were 490,919 employed Apple Health clients or non-client individuals with dependents with Apple Health coverage in the average calendar quarter in CY 2020 (see Table 1A "All Firms").

Employment status of Washington Apple Health (Medicaid) clients and non-client individuals with dependents who are Medicaid clients | ABRIDGED

November 15, 2021

6. In the average quarter in CY 2020, there were 803,290 Apple Health covered lives associated with the 490,919 employed Apple Health clients and non-client individuals with dependents with Apple Health coverage (Table 1B "All Firms"). This represents 43 percent of all persons with Apple Health coverage in the average quarter in CY 2020.
7. The 490,919 employed Apple Health clients and non-client individuals with dependents with Apple Health coverage in CY 2020 represented a two percent decline relative to the 500,729 employed clients and non-clients observed in CY 2019. This slight decline may be associated with the employment effects of the COVID-19 pandemic.
8. In CY 2020, approximately 60 percent of employed Apple Health clients and non-client individuals with dependents with Apple Health coverage worked for firms with more than 50 employees (see Table 1A "By Firm Size").
9. Employed non-client individuals with dependents with Apple Health coverage worked more hours than employed Apple Health medical clients. More than half (51 percent) of non-client individuals with dependents with Apple Health coverage worked full-time (more than 455 hours) in the quarter (Table 3A "All Firms"), compared to only 21 percent of employed Apple Health clients (Table 2A "All Firms").
10. There were about 9.4 million months of HCA medical coverage in CY 2020 associated with employed Apple Health clients and non-client individuals with dependents with Apple Health coverage. About 69 percent of the months were associated with employed Apple Health clients (6.5 million coverage months), and about 31 percent were associated with employed non-client individuals with dependents with Apple Health coverage (2.9 million coverage months).
11. Estimated HCA medical and DSHS mental health expenditures for the months of coverage associated with employed Apple Health clients and non-client individuals with dependents with Apple Health coverage were \$1.529 billion in CY 2020 (all funds). Of this total, approximately \$543 million were associated with employed Apple Health clients, and \$986 million were associated with employed non-client individuals with dependents with Apple Health coverage.
12. Associated annual Apple Health coverage costs were greatest for persons employed in the following industries: Retail Trade (\$275 million); Health and Social Assistance (\$262 million); and Accommodation and Food Services (\$218 million).
13. Almost all (93.0 percent) of the annual Apple Health coverage costs were associated with private employers (\$1.421 billion), as opposed to public employers (\$108 million).
14. Detailed information for the largest employers of Apple Health clients and non-client individuals with dependents with Apple Health coverage can be found in the supplemental tables at the end of this report.

Employment trends for Apple Health Clients and Non-Clients with Covered Dependents

The table below provides an overview of the trend in the proportion of HCA medical clients associated with employment from 2005 to 2020, as identified using ESD quarterly earnings data. Some of the year-to-year variation in the table below is the result of slight changes in data processing methods over the reporting period. Since the Basic Health Plan (BHP) has been eliminated, BHP enrollees are excluded, and the data only reflects Apple Health trend information.

Table 1. Employment and Coverage Trends for Apple Health Clients and Non-Clients with Covered Dependents

	Employed Clients and Non-Clients with Covered Dependents	Average Quarterly Covered Lives Associated with Employment	Average Quarterly Total Apple Health Enrollment	Percent of Total Apple Health Enrollment Associated with Employment
CY 2005	240,062	425,765	936,860	45%
CY 2006	243,114	427,448	908,870	47%
CY 2007	231,111	404,026	915,322	44%
CY 2008	256,489	440,925	975,218	45%
CY 2009	259,628	453,695	1,054,239	43%
CY 2011	307,202	504,926	1,165,487	43%
CY 2012	308,822	515,264	1,165,942	44%
CY 2013	301,389	484,328	1,166,612	42%
CY 2014	416,521	705,696	1,622,883	43%
CY 2015	489,391	818,539	1,806,243	45%
CY 2016	523,104	859,052	1,869,927	46%
CY 2017	522,503	853,062	1,878,129	45%
CY 2018	509,300	829,837	1,837,077	45%
CY 2019	500,729	815,704	1,803,147	45%
CY 2020	490,919	803,290	1,861,372	43%

Data sources and limitations

Aggregate data by industry, firm size, and public/private ownership type are based on ESD quarterly earnings data and monthly medical eligibility data for CY 2020. ESD earnings data do not include self-employment, federal government employment, or unreported earnings.

By-firm data are based on ACES employer name data linked to medical eligibility data for January and April 2021. ACES employer name information does not permit the identification of separately owned franchises operating under the same business name. The employer's name information used in this report is self-reported, is not a required element of the application for public assistance and is not independently verified by staff. With the increased use of independent contractors, it is important to note that ACES data does not distinguish between employees and independent contractors who may self-identify as employees. Employer rankings are based on the average monthly number of employed persons associated with HCA medical clients in January and April 2021.

The creation of "households" for these analyses depends on assistance unit information in the ACES data system. From the perspective of creating household units from ACES data, limitations are likely to become more significant for measurement as more covered lives have medical eligibility determined outside of the ACES data system.

The tables report the number of employed Apple Health clients and non-clients with covered Dependents, and the associated "member months" by type of coverage. Coverage type was determined based on ProviderOne Recipient Aid Category (RAC) codes.

The Family Medical / Pregnant Women coverage group includes persons receiving TANF and related "classic" Medicaid medical coverage, as well as persons enrolled in Medicaid coverage for low-income pregnant women.

The Apple Health for Kids program provides medical coverage to children in families that do not meet Temporary Assistance for Needy Families (TANF) eligibility criteria but have household income below 200 percent of the Federal Poverty Guideline (FPL) through Medicaid funding, 300 percent of FPL through the Children's Health Insurance Program (CHIP) funding, and up to 300 percent of the FPL for non-citizen children through the Children's Health Program (CHP). This coverage group also includes a small number of children enrolled in Foster Care or Adoptions Support coverage.

The New Adult coverage group includes adults eligible for expanded Medicaid coverage under the Affordable Care Act.

The Persons with Disabilities coverage group includes persons enrolled in Medicaid Disabled or Blind coverage groups.

The "Other" coverage group includes a small number of persons receiving HCA medical coverage through programs for refugees and the elderly. Clients who received family planning coverage only were excluded from the analysis.

Employed non-client individuals with dependents with Apple Health coverage were counted if they were part of a household with at least one person who received Apple Health coverage. To be counted, the

employed person had to be identified as the head of household, spouse, or unmarried co-parent of a child in common with the head of household.

Counts of employed clients or non-client individuals with dependents with Apple Health coverage were associated with a single "primary employer" in each month. Most of employed clients or non-client individuals with dependents with Apple Health coverage had a single employer in the quarter. In cases where the person had more than one employer in the quarter, the primary employer was defined to be the employer from whom the person received the greatest earnings.

To create an unduplicated count of member months and expenditures associated with employed persons, in the cases where a dependent was associated with more than one employed person, we associated the dependent with the person who had the highest earnings. For both the aggregate and by-firm data tables, per-member per-month Apple Health expenditure estimates were based on per capita estimates for CY 2020.
