Brief Description: Expanding the child profile system for immunization tracking and reminders.

HB 2547 - DIGEST

Encourages the development of a state-wide child profile system for tracking data and reminders for immunizations, thus enabling the state to reach the ninety percent immunization rate set forth in the public health improvement plan.

Calls for an analysis of the four current child profile counties for potential expansion of the project to other counties.

Make an appropriation of three hundred sixty thousand dollars to carry out the purposes of the act.
