Background: Chapter 265, Laws of 1995 made a number of changes to the Basic Health Plan (BHP). Mental health, chemical dependency treatment, and organ transplant benefits were added. To boost enrollments in the BHP, an entitlement for health insurance agents and brokers to receive a commission for individual or group enrollments in the BHP was created. A process for financial sponsorship of enrollees was put in place. Payments made on behalf of the enrollee are prohibited from exceeding the total premium due from the enrollee.

Summary of Bill: Agents and brokers may receive commissions for enrolling persons in the Basic Health Plan if funding is specifically provided. The prohibition against financial sponsor payments exceeding premiums due from the enrollee is deleted.

Appropriation: None.

Fiscal Note: Not requested.

Effective Date: The bill contains an emergency clause and takes effect on July 1, 1997.

Testimony For: None.

Testimony Against: The language allowing the elimination of mental health benefits is inconsistent with the House budget. The elimination of chemical dependency treatment or mental health benefits will in the long run cost more. The beer and wine wholesalers provide a substantial amount of support to the Health Services Account and are supportive of chemical dependency treatment in the Basic Health Plan.
