RCW 27.53.020 Archaeological resource preservation—Designation of department of archaeology and historic preservation—Cooperation among agencies. The discovery, identification, excavation, and study of the state's archaeological resources, the providing of information on archaeological sites for their nomination to the state and national registers of historic places, the maintaining of a complete inventory of archaeological sites and collections, and the providing of information to state, federal, and private construction agencies regarding the possible impact of construction activities on the state's archaeological resources, are proper public functions; and the department of archaeology and historic preservation, created under the authority of chapter 43.334 RCW, is hereby designated as an

appropriate agency to carry out these functions. The director shall provide guidelines for the selection of depositories designated by the state for archaeological resources. The legislature directs that there shall be full cooperation amongst the department and other agencies of the state. Purpose—2002 c 211: "The purpose of this act is to give the *department of community, trade, and economic development the authority to issue civil penalties to enforce the provisions of permits issued under RCW 27.53.060 and to take into consideration prior penalties issued under chapter 27.53 RCW and under comparable federal laws when issuing permits. Additionally, this act provides guidance to state agencies and political subdivisions of the state when approving archaeological activities on public lands." [2002 c 211 § 1.]

Such right of first refusal shall exist for five years from the date of the report. A salvor shall not be entitled to further compensation from any state sources.

(c) The contract shall provide that the state will be given first choice of which objects it may wish to retain for display purposes for the people of the state from among all the objects recovered. The state may retain objects with a value of up to ten percent of the appraised value of the total objects recovered. If the state chooses not to retain recovered objects with a value of up to ten percent of the appraised value, the state shall be entitled to receive its share in cash or a combination of recovered objects and cash so long as the state's total share does not exceed ten percent of the appraised value of the objects recovered.

The department shall also have the right to publish scientific papers concerning the results of all research conducted as project mitigation.

The director has the right to refuse to issue a permit for salvaging an historic archaeological resource if that resource would be destroyed beyond mitigation by the proposed salvage operation. Any agency, institution, person, firm, or corporation which has been denied a permit because the resource would be destroyed beyond mitigation by their method of salvage shall have a right of first refusal for that permit at a future date should technology be found which would make salvage possible without destroying the resource. Such right of first refusal shall be in effect for sixty days after the director has determined that salvage can be accomplished by a subsequent applicant without destroying the resource.
