# 2008 Annual Report on Students in Foster Care 

## Executive Summary

HB2679 required the Office of Superintendent of Public Instruction (OSPI) to provide an annual report on the educational experiences and outcomes of students in foster care. The Student Information office (Robin Munson and Joe Willhoft) collaborated with the Department of Student Support (Ron Hertel and Martin Mueller) to prepare a report based upon students identified by the Department of Social and Health Services (DSHS) as having been in foster care during the 2006-2007 school year and for whom OSPI had a student record. The match of DSHS and OSPI records was completed in January, 2008.

The analysis used individual student records but in this report data are aggregated at the state and district level. HB2679 acknowledges that results will be suppressed where the aggregation involves fewer than 10 students. Of the 295 school districts in Washington, 143 districts (48\%) had at least 10 students involved in foster care in May 2007. Only fifteen districts had more than 100 students in foster care during 2006-2007.

For each analysis, the report compares students identified as being in foster care during 2006-2007 to students not in foster care that year. These comparisons only scratch the surface to understanding the foster care population since OSPI has no data to indicate the duration of foster care, the date of initial placement, nor the student outcomes prior to or subsequent to foster care.

## Findings:

- Less than one percent (.7\%) of the students enrolled in May 2007 was in foster care in 2006-2007.
- While the proportion of each gender is balanced with the percent of all students in foster care, (both are $.7 \%$ of the total population), other demographic variables show disproportionality for students in foster care.
- Students in foster care are disproportionally Native American, African American, or Multiracial, and there is less representation of Asian, Native Hawaiian/Pacific Islander, Caucasian, and Hispanic students among students in foster care.
- Special Education participation was higher among students in foster care. Students in foster care were more than twice as likely to participate in special education programs as their peers.
- Unlike their increased participation in Special Education programs, students who were in foster care were three times less likely to participate in the Transitional Bilingual program as their peers.
- Alternative school enrollment was slightly higher for students in foster care than their peers. Similarly, students in foster care are over represented in juvenile detention centers, institutions, and special education schools but are underrepresented in vocational and skill center programs, and in college/university high school completion programs.
- Perhaps unexpectedly, students in foster care in May 2007 were just as likely to still be enrolled in a Washington public school in May 2008 as their peers. Nearly 86\% of these students were enrolled in both May 2007 and May 2008. Of those enrolled both years, however, only $50 \%$ of students in foster care were enrolled in the same school as the previous year. This compares to nearly $71 \%$ of students not in foster care.
- School mobility is of particular concern among students in foster care. The percent of students who attended three or more schools in the 2006-2007 school year is just over $12 \%$ for students in foster care compared to just over one percent for students not in foster care. Furthermore, only $61.2 \%$ of students in foster care stayed in the same school during this school year, compared to $89.7 \%$ of their peers.
- Overall, the WASL results for students in foster care are consistently disheartening. All content areas show similar results, with a substantially lower proportion of foster care students meeting standard on the WASL than non-foster care students, at every grade level.
- End-of-year outcomes for the $200712^{\text {th }}$ graders who had been in foster care in 2006-2007 are alarmingly worse than the outcomes for their peers. Only $52 \%$ of the students in foster care graduated, compared to nearly $85 \%$ of the students not in foster care that year. Three times as many students in foster care either transferred schools or continued into the next year, presumably because they had not yet fulfilled the graduation requirements, (note that this analysis was for June 2007 when the graduating class did not have the new Class of 2008 graduation requirements). Furthermore, $12^{\text {th }}$ graders who had been in foster care in 2006-2007 were four times more likely to have left school in this state with an unknown status or as a confirmed dropout. Nearly $14 \%$ of students in foster care are considered dropouts, compared to $3.4 \%$ of their peers.

## 2008 Annual Report on Foster Care Students

## Background

HB2679 requires OSPI to provide an annual report on the educational experiences and outcomes of students in foster care. Within OSPI, the Student Information office (Robin Munson and Joe Willhoft) collaborated with the Department of Student Support (Ron Hertel and Martin Mueller) to prepare this report, which is based on students identified by Children's Administration in the Department of Social and Health Services (DSHS) as having been in foster care during the 2006-2007 school year.

Students included in the report are students who were identified as being in the DSHS foster care system in 2006-2007 and for whom OSPI had a student record. Children's Administration in DSHS provided OSPI a data file of 9388 records for children ages 5-18 that were served in Foster Care during the 2006-2007 school year. These records were matched by student names and birthdates to the Core Student Record System (CSRS) enrollment records reported to OSPI by school districts each month. CSRS records from September 2004 to November 2007 were used to match records. The match of DSHS and OSPI records was completed in January 2008, with 9180 of the 9388 records matched (97.8\%).

## Student Population

To compare the demographics of students in foster care to their peers, CSRS records from May 2007 and May 2008 were used to identify demographic information for as many of these students as possible. Table 1, on the next page, shows the number and percentage of students enrolled in May 2007 but not May 2008 ( $\mathrm{n}=1031$ in foster care), both May 2007 and May 2008 ( $\mathrm{n}=6238$ in foster care), May 2008 but not May 2007 ( $\mathrm{n}=277$ in foster care), and children who were not enrolled in May of either year ( $\mathrm{n}=1609$ in foster care). The pink bottom row shows that the 9180 students who were matched to a CSRS record comprise less than $1 \%$ (.8\%) of the students enrolled in Grades K-12 in May 2007 or May 2008.

Table 1. 2006-2007 Foster Care Children Who Were Matched to CSRS Enrollment Records

|  |  | \% of Row <br> in Foster |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: |
| Enrolled | Not Foster | Foster | Care | Total |
| May 07 only | 155199 | 1031 | $0.7 \%$ | 156230 |
| \% of column | 12.8 | 11.2 |  | 12.8 |
| Both 07 \& 08 | 900739 | 6263 | $0.7 \%$ | 907002 |
| \% of column | 74.2 | 68.2 |  | 74.2 |
| May 08 only | 157420 | 277 | $0.2 \%$ | 157697 |
| \% of column | 13.0 | 3.0 |  | 12.9 |
| Neither May 07 nor |  |  |  |  |
| O8 | 0 | 1609 | $100.0 \%$ | 1609 |
| $\quad$ \% of column | 0.0 | 17.5 |  | 0.1 |
| All Students |  |  |  |  |
| Matched with DSHS | $\mathbf{1 2 1 3 3 5 8}$ | $\mathbf{9 1 8 0}$ | $\mathbf{0 . 8 \%}$ | $\mathbf{1 2 2 2 5 3 8}$ |

Table 2 shows the 7571 remaining students in foster care after those matched students who were not enrolled in either May were removed. These data show that 82.7\% of the students enrolled in either May were enrolled both years (2006-2007 and 2007-2008). The table shows "NA" for 'Not applicable' for the percentage of all students enrolled only in 2007-2008 because we did not have access to the DSHS records for that year. A calculation made only with the available data would have underestimated this proportion.

Table 2. 2006-2007 Foster Care Children Who Were Enrolled in May 2007 and/or May 2008

|  |  | \% of Row <br> in Foster |  |  |
| :---: | ---: | ---: | ---: | ---: |
| Enrolled | Not Foster | Foster | Care | Total |
| May 07 only | 155199 | 1031 | $0.7 \%$ | 156230 |
| \% of column | 12.8 | 13.6 |  | 12.8 |
| Both 07 \& 08 | 900739 | 6263 | $0.7 \%$ | 907002 |
| \% of column | 74.2 | 82.7 |  | 74.2 |
| May 08 only | 157420 | 277 | NA | 157697 |
| \% of column | 13.0 | 3.7 |  | 12.9 |
| Total Enrolled |  |  |  |  |
| 2006-07 or 2007-08 | $\mathbf{1 2 1 3 3 5 8}$ | $\mathbf{7 5 7 1}$ | NA | $\mathbf{1 2 2 0 9 2 9}$ |

The demographic comparisons of students in foster care and their peers presented in Tables 5-7 are based on 1,063,232 students enrolled in May 2007. Table 3
shows that $.7 \%$ of the students enrolled in May 2007 were in foster care in 20062007. Table 3 also shows that $86 \%$ of students in foster care in 2006-2007, and $85 \%$ of their peers who were enrolled in May of 2007 were also enrolled in May 2008. An analysis presented later in the report will examine whether students enrolled both years were enrolled in the same school.

Table 3. Foster Care Children Who Were Enrolled in May 2007

| Enrolled | Not Foster | Foster | \% of Row in Foster Care | Total |
| :---: | :---: | :---: | :---: | :---: |
| May 07 only | 155199 | 1031 | 0.7\% | 156230 |
| \% of column | 14.6 | 14.1 |  |  |
| Both May 07 \& May 08 | 900739 | 6263 | 0.7\% | 907002 |
| \% of column | 85.3 | 85.9 |  |  |
| Total Enrolled in May 2007 | 1055938 | 7294 | 0.7\% | 1063232 |

The grade levels of students in foster care in 2006-2007 and their peers are presented in Table 4. For most grades, the foster care population makes up about $.7 \%$ of the grade level. Students in foster care make up a slightly higher proportion of kindergarten and first grade ( $1.1 \%$ and $1.0 \%$ respectively), and are a lower proportion of Grades 11 and 12 (.5\% and .3\% respectively).

Table 4. Foster Care Children Who Were Enrolled in May 2007 by Grade Level

| Grade in 2006-07 | Not Foster | Foster | \% of Grade <br> Level in FC | Total |
| :---: | ---: | ---: | ---: | ---: |
| Pre-K | 22910 | 13 | $0.1 \%$ | 22923 |
| K | 74537 | 825 | $1.1 \%$ | 75362 |
| 1 | 77693 | 743 | $1.0 \%$ | 78436 |
| 2 | 77170 | 627 | $0.8 \%$ | 77797 |
| 3 | 77067 | 570 | $0.7 \%$ | 77637 |
| 4 | 76768 | 565 | $0.7 \%$ | 77333 |
| 5 | 76296 | 520 | $0.7 \%$ | 76816 |
| 6 | 77792 | 507 | $0.7 \%$ | 78299 |
| 7 | 78635 | 502 | $0.6 \%$ | 79137 |
| 8 | 81861 | 539 | $0.7 \%$ | 82400 |
| 9 | 91393 | 689 | $0.8 \%$ | 92082 |
| 10 | 83996 | 553 | $0.7 \%$ | 84549 |
| 11 | 81345 | 395 | $0.5 \%$ | 81740 |
| 12 | 78475 | 246 | $0.3 \%$ | 78721 |
| Total of Enrolled |  |  |  |  |
| in May 2007 | $\mathbf{1 0 5 5 9 3 8}$ | $\mathbf{7 2 9 4}$ | $\mathbf{0 . 7 \%}$ | $\mathbf{1 0 6 3 2 3 2}$ |

The analyses OSPI completed used individual student records, but in this report data are aggregated at the state and district level. HB2679 acknowledges that results will be suppressed where the aggregation involves fewer than ten students. Of the 295 school districts in Washington, 143 districts (48\%) had at least ten students involved in foster care in May 2007. Only fifteen districts had more than 100 students in foster care during 2006-2007. The districts with the greatest number of students in foster care were Seattle, Spokane, Tacoma, and Vancouver. Districts with the highest percent of students in foster care, given their size, were Waitsburg, Lyle, Wahkiakum, Concrete and the Northwest Educational Service District, each with three to five percent of their enrollment being involved in foster care. Of the 2308 schools in Washington, 1709 schools have at least one student who had been in foster care in 2006-2007. However, only six percent of the schools (140 schools) had ten or more students who had been in foster care that year. Eleven schools had twenty or more students in foster care.

For each analysis presented below, the report compares students identified as being in foster care during 2006-2007 to students not in foster care that year. These comparisons only scratch the surface to understanding the foster care population. OSPI has no data to indicate the duration of foster care, the date of initial placement, nor the student outcomes prior to or subsequent to foster care. The Children's Administration, in the Department of Social and Health Services, is the only agency with an understanding of and access to these data. To really understand the educational circumstances and outcomes of students in foster care, Children's Administration and OSPI will need to share data on a frequent basis and help each other, or a third party, understand the data and the appropriate analyses. Additional resources and time will be needed for more complete reporting on students in foster care.

## Findings

## Demographic Characteristics

Tables 5-7 present basic demographic information about students enrolled in May 2007, both for students in foster care that school year and their peers. The tables provide two percentages for each characteristic. The percent of each column shows, for example, that $42.2 \%$ of students in foster care were female that year and $43.6 \%$ were male. These proportions are quite comparable to their peers not in foster care. The "\% of Gender in FC" column shows that . $7 \%$ of all females were in foster care. While the proportion of each gender is balanced with the percent of all students in foster care (all are .7\% of the total population), other demographic variables show disproportionality for students in foster care.

Table 5. Gender of Foster Care Children and Their Peers

| Gender | Not Foster | \% of Gender |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  | Foster | in FC | Total |
| Female | 435983 | 3081 | 0.7\% | 439064 |
| \% of column | 41.3\% | 42.2\% |  |  |
| Male | 464756 | 3182 | 0.7\% | 467936 |
| \% of column | 44.0\% | 43.6\% |  |  |
| Not reported | 155199 | 1031 | 0.7\% | 156230 |
| \% of column | 14.7\% | 14.1\% |  |  |
| Total of Enrolled in May 2007 | 1055938 | 7294 | 0.7\% | 1063232 |

Table 6, for instance, shows students in foster care are disproportionally Native American, African American, or Multiracial, and there is less representation of Asian, Native Hawaiian/Pacific Islander, Caucasian and Hispanic students among students in foster care. If each ethnicity were proportionally represented there would be about $.7 \%$ of each group in foster care, corresponding to the fact that $.7 \%$ of the entire group were in foster care.

The data in Table 6 also indicates that 58.9\% of the students in foster care are Caucasian and that the next most prevalent ethnicities are African American (14\%) and Hispanic (11.3\%).

Table 6. Ethnicity of Foster Care Children and Their Peers

|  |  | $\begin{array}{r} \% \text { of } \\ \text { Ethnicity } \end{array}$ |  |  |
| :---: | :---: | :---: | :---: | :---: |

| \% of column | 0.5\% | 0.4\% |  |  |
| Multiracial | 17576 | 240 | 1.3\% | 17816 |
| \% of column | 1.7\% | 3.3\% |  |  |
| Not provided | 4672 | 60 | 1.3\% | 4732 |
| \% of column | 0.4\% | 0.8\% |  |  |
| Total of Enrolled in May 2007 | 1055938 | 7294 | 0.7\% | 1063232 |

OPSI data, presented in Table 7, shows that $82.8 \%$ of the students in foster care were eligible for free and/or reduced meals. In fact, all students in foster care are eligible for free and/or reduced meals, but since school districts do not always know which students are in foster care this eligibility does not always get reported for the student (which may mean that the student does not receive free/reduce meals or may indicate poor data quality at the district level).

Table 7. Free and/or Reduced Meal Eligibility of Foster Care Children and Their Peers

| Free/Reduced |  |  | \% of FRM |  |
| :--- | ---: | ---: | ---: | ---: |

| \% of column | $36.5 \%$ | $82.8 \%$ |  |  |
| Not eligible | 670190 | 1254 | $0.2 \%$ | 671444 |
| \% of column | $63.5 \%$ | $17.2 \%$ |  |  |
| Total of Enrolled <br> in May 2007 | 1055938 | 7294 | $0.7 \%$ | 1063232 |

## Educational Experiences

The legislation that requested this report asked for data on the educational experiences of students in foster care. The data OSPI has available related to educational experiences relate to students' participation in a Special Education program, participation in the Transitional Bilingual program, enrollment in alternative schools, and school stability.

Students in foster care were more than twice as likely to participate in special education programs as their peers. Nearly $31 \%$ of foster care students were in special education, compared to just over $12 \%$ of students not in foster care.

Table 8. Participation in Special Education by Foster Care Children and Their Peers

|  |  |  | \% of Sp Ed |  |
| :---: | ---: | ---: | ---: | ---: |
| Special Education | Not Foster | Foster | in FC | Total |
| Served in Special Ed | 128674 | 2242 | $1.7 \%$ | 130916 |
| \% of column | $12.2 \%$ | $30.7 \%$ |  |  |
| Not Served | 927264 | 5052 | $0.5 \%$ | 932316 |
| \% of column | $87.8 \%$ | $69.3 \%$ |  |  |
| Total of Enrolled in <br> May 2007 | 1055938 | 7294 | $0.7 \%$ | 1063232 |

Students in foster care were three times less likely to participate in transitional bilingual programs as their peers. Only $2.5 \%$ of foster care students were in the transitional bilingual program, compared to $7.4 \%$ of students not in foster care.

Table 9. Participation in Transitional Bilingual Program (ELL) by Foster Care Children and Their Peers

| ELL |  |  | \% of ELL |  |
| :--- | ---: | ---: | ---: | ---: |
| Served in ELL | Not Foster | Foster | in FC | Total |
| \% of column | 77899 | 181 | $0.2 \%$ | 78080 |
| Not Served | $7.4 \%$ | $2.5 \%$ |  |  |
| \% of column |  | 978039 | 7113 | $0.7 \%$ |
| Total of Enrolled <br> in May 2007 | 1055938 | $97.5 \%$ |  |  |

Students in foster care attended alternative schools at a slightly higher rate than their peers. Table 10 shows that $5.2 \%$ of students in foster care were enrolled in an alternative school (compared to $4 \%$ of their peers), and nearly $10 \%$ of foster care students were enrolled in school settings other than a traditional public school, compared to $5 \%$ of the students not in foster care. These other settings include alternative schools, institutions and special education schools, juvenile detention centers, vocational/technical skills centers, and college/ university high school completion programs.

Table 10. Type of Schools Attended by Foster Care Children and Their Peers

| School Type | Not Foster | Foster | \% of Row <br> in FC | Total |
| :--- | ---: | ---: | ---: | ---: |
| Public School | 1003804 | 6616 | $0.7 \%$ | 1010420 |
|  | $95.1 \%$ | $90.7 \%$ |  | $95.0 \%$ |
| Alternative School | 42136 | 376 | $0.9 \%$ | 42512 |
|  | $4.0 \%$ | $5.2 \%$ |  | $4.0 \%$ |

| Juvenile Detention Center | 3349 | 109 | $3.2 \%$ | 3458 |
|  | $0.3 \%$ | $1.5 \%$ |  | $0.3 \%$ |
| Vocational/Technical Skills Center | 2179 | 7 | $0.3 \%$ | 2186 |
|  | $0.2 \%$ | $0.1 \%$ |  | $0.2 \%$ |
| College/University | 897 | 8 | $0.9 \%$ | 905 |
|  | $0.1 \%$ | $0.1 \%$ |  | $0.1 \%$ |
| Total of Enrolled in May 2007 | 1055938 | 7294 | $0.7 \%$ | 1063232 |

The stability of school placement is certainly an important issue for students in foster care. Tables 11 and 12 present two different analyses related to school stability. Table 11 provides information on whether the 1,063,232 students enrolled in May of 2007 were still enrolled in May of 2008 and, if they were enrolled at the same or a different school. Perhaps unexpectedly, students in foster care were just as likely to still be enrolled in a Washington public school as their peers. Nearly $86 \%$ of these students were enrolled in both May 2007 and May 2008. Of those enrolled both years, only $50 \%$ of the students in foster care were enrolled in the same school as the previous year. This compares to nearly $71 \%$ of students not in foster care.

Table 11. School Stability of Foster Care Children and Their Peers

| Still Enrolled May 2008? | Not Foster | Foster | Total All <br> Students |
| :--- | ---: | ---: | ---: |
| Not enrolled | 155199 | 1031 | 156230 |
|  | $14.7 \%$ | $14.1 \%$ |  |
| Still enrolled | 900739 | 6263 | 907002 |
|  | $85.3 \%$ | $85.9 \%$ |  |
|  |  |  |  |
| Same School in 2008? | 638991 | 3129 | 642120 |
| \% of those still enrolled | $70.9 \%$ | $50.0 \%$ |  |
| $\quad$ \% of all 2007 | $60.5 \%$ | $42.9 \%$ |  |
| Different School in 2008 | 261748 | 3134 | 264882 |
|  |  |  |  |
| Total of Enrolled <br> in May 2007 |  | 1055938 | 7294 |

In Table 12, another examination of school stability (for all students enrolled during the 2006-07 school year) shows that 85 students in foster care attended five or more schools within the 2006-2007 school year, as did 281 students who were not in foster care. Adding the bottom three rows in this table together shows that the percentage of students who attended three or more schools is just over twelve percent for students in foster care compared to just over one percent for students not in foster care. Similarly, Table 12 shows that only $61.2 \%$ of students in foster care stayed in the same school during this entire school year, compared to $89.7 \%$ of their peers.

Table 12. Multiple School Enrollments for Foster Care Children and Their Peers

| \# of 2006-07 <br> Enrollment <br> Records | Not Foster | Foster | \% of Row in FC | Total |
| :---: | :---: | :---: | :---: | :---: |

## State Assessment Outcomes

Washington Assessment of Student Learning (WASL) outcomes are presented in the next series of tables for the same group of students described above, students in foster care in 2006-2007 and their peers. The results presented are for the spring administration of the WASL in 2007, with some additional information for the spring 2008 administration. Results are provided for students assessed in Grades 3-8 and 10 , the grade levels legislatively required to take the state assessments.

For each content area (Reading, Writing, Mathematics, and Science), a chart comparing the percent of foster care students meeting standard with their peers is followed by a data table. The data table presents the charted 2007 data and 2008 results for the subsequent grade level (i.e., $20084^{\text {th }}$ grade results are in the same row as the $20073^{\text {rd }}$ grade results, since presumably these are corresponding cohorts of students).

More detailed statewide results for each grade level are presented in Appendix C. Additionally, the district level results (aggregated across levels) are presented in Appendix D. Appendix D WASL results only include districts that had ten or more students in foster care assessed.

Overall, the WASL results for students in foster care are consistently disheartening. All content areas show similar results, with a substantially lower proportion of foster care students meeting standard on the WASL than non-foster care students, at every grade level.

## Graduation and Dropout Outcomes

The end-of-year outcomes for students who were $12^{\text {th }}$ graders in May 2007 are presented in Table 21, both for students in foster care and their peers. The possible end-of-year outcomes, reported by districts for the subsequent November, are: "Graduated", "Transferred" (to another school), "Continued" (returned to school the next year), and "Dropped Out/Unknown" (either confirmed dropout or unknown status, which is counted as a dropout).

End-of-year outcomes for the May $200712^{\text {th }}$ graders who had been in foster care are alarmingly worse than the outcomes for their peers. Table 21 shows that only $52 \%$ of the students in foster care graduated compared to nearly $85 \%$ of the students not in foster care that year. Three times as many students in foster care either transferred to other schools or continued into the next year, presumably because they had not yet fulfilled the graduation requirements. Note that this analysis was for June 2007, when the graduating class did not have the new Class of 2008 graduation requirements.

Furthermore, $12^{\text {th }}$ graders who had been in foster care in 2006-2007 were four times more likely to have left school in this state with an unknown status or as a confirmed dropout. Nearly $14 \%$ of students in foster care are considered dropouts, compared to $3.4 \%$ of their peers.

## Appendices

Appendix A: Procedures for Matching DSHS Records to OSPI Data
Appendix B: District Enrollment Data
Appendix C: WASL Results
Appendix D: WASL Results by District

## Appendix A: Procedures for Matching DSHS Records to OSPI Data

Matching:

- Took several "passes" to match data records in tables provided by DSHS and provide Research IDs. Elements used in matching include student first name, last name, gender, ethnicity, SSN and date of birth.
- Records that were not able to be matched using these data elements were individually looked up in OSPI's CSRS system. Decisions were made based on names with similar spelling, birth dates that were similar, etc. Most of the decisions were made by a single person.
- 208 records were not able to be matched. These records are still included in the original tables that DSHS provided, but the ResearchID field is left blank.

Original tables:

- OSPI_tbl1: replaced the Person ID with ResearchID and removed all other student identifiers, SSN, last name and first name. The day of the birthdate was removed.
- OSPI_tbI2: replaced the Placement ID with a random number and removed the Placement ID.
- OSPI_tbl3: replaced the Placement ID and Business ID with random numbers. The Placement ID random numbers in this table was generated based on linking tables 2 and 3 by the Placement ID and merging the corresponding random number from table 2 into table 3.

CSRS tables:

- The data elements for the CSRS files were provided per the Datashare Agreement.
- CSRS monthly submissions provided are as follows: October, December, February and May for the 2004-2005, 2005-2006 and 2006-2007 school years.
- District names and school names where there were less than 10 matching records were suppressed.
- Records for students in the original table (OSPI_tbl1) that don't have a match in any given CSRS table are included in every CSRS table. All CSRS data elements will be blank.
- There may be some duplicate records in the CSRS tables due to students attending more than one school in the state in any given CSRS month.

WASL tables:

- The data elements for the WASL files were provided per the Datashare Agreement.
- Additionally, Grade (administration grade) and Standard (Met/Not Met) were provided.
- Records for students in the original table (OSPI_tbl1) that don't have a match in any given WASL table are included in every WASL table. All WASL data elements will be blank.
- There may be some duplicate records in the WASL tables due to some students having duplicate test records within any given WASL table. No "merging" of records was attempted.
