

# Interstate 405 Express Toll Lanes/State Route 167 HOT Lanes

## Executive summary

Both facilities continue to meet WSDOT’s goals of allowing drivers a choice for a faster, more reliable trip while covering the costs of toll operation. Despite the decline in traffic from the pandemic, there was still sufficient revenue to cover operating costs between October and December.

### GOAL 1 Provide a choice to people

- Due to the pandemic, there was a decline in traffic. On average 33,000 vehicles a day used the I-405 express toll lanes (ETL) this quarter with 21,000 choosing to pay a toll to use the lanes, while 12,000 drove toll-free with a Flex Pass. During the same quarter last year 56,000 vehicles used the lanes each day, 37,000 paid a toll and 19,000 drove toll-free. Drivers paid an average toll rate of \$1.38 for peak period, peak direction trips this quarter, compared to \$4.80 last year.
- This quarter an average of 5,000 drivers paid a toll to use the SR 167 HOT lanes each day. During the same time period in 2019 6,000 drivers paid a toll to use the lanes. The average peak period, peak direction toll was \$2.94 this quarter, during the same quarter in 2019 drivers paid \$4.54.

### GOAL 2 Provide a faster, more predictable trip

- Drivers saved an average of half a minute using the express toll lanes compared to the general purpose lanes on trips between Bellevue and Lynnwood during peak periods.
- On SR 167 drivers saved an average of 4 minutes using the HOT lanes during peak periods. Drivers in the southbound HOT lanes saw the greatest difference, saving an average of 6 minutes.
- Both the I-405 express toll lanes and SR 167 HOT lanes continue to maintain speeds greater than their general purpose counter parts in all sections, and have maintained average speeds greater than 45 mph for more than 90 percent of the time during peak periods this quarter.
- Though traffic is returning, it is not yet back to pre-COVID levels. Drivers have less frequently needed to rely on the tolled lanes for a faster, more predictable trip.

### GOAL 3 Generate revenue to reinvest in the corridor

- I-405 and SR 167 continue to generate revenue meeting the facilities’ maintenance and operation needs.
- Due to the decline in traffic from the pandemic, revenue has dropped significantly below previously forecasted levels. It is too early to determine the effect this drop in revenue will have on new investments in the corridor.
- Financial data is posted quarterly on WSDOT’s financial and performance reports webpage:  
<https://www.wsdot.wa.gov/Tolling/405/library.htm>.

## NOTES

In late February 2020 a state of emergency was declared due to COVID-19. During the pandemic, large employers in the Puget Sound area encouraged employees to work from home, which has diminished traffic volumes. Though traffic is returning it is not yet back to pre-COVID levels in the Express Toll Lanes or HOT Lanes.

- Transit ridership volumes have similarly declined with increasing numbers of people teleworking, and avoiding mass transit options.
- Toll revenue has decreased due to the reduced volume of traffic using toll roads. For specific revenue information please see the FY 2021 Q2 financial statements at <https://www.wsdot.wa.gov/Tolling/405/library.htm>
- The data for local arterial trips (section F) would have been sampled in August 2020 by a WSDOT data collection team. Due to the reduction in traffic volumes caused by the pandemic and related stay-at-home orders, WSDOT did not collect this data for the reporting period.
- Beginning in March 2020, WSDOT asked the Washington State Patrol to decrease enforcement efforts due to less traffic using the express toll lanes and to help decrease costs, and that shift is reflected in the zero WSP hours spent on the tolled lanes.

Average peak period toll lane speeds compared to average general purpose lane speeds from October to December 2020.

## Legal reporting requirements

In its 2011 authorization of the I-405 express toll lanes (RCW 47.56.880), the Legislature directed WSDOT to monitor and report on certain performance metrics on an annual basis. ESHB 2322 209 (2, 8), from the 2020 budget, required quarterly reporting on the previously required metrics, and included additional performance measures.

The following chart notes the monitoring requirements and where to locate the data in this report.

LEGISLATIVE MONITORING REQUIREMENT		REPORT SECTION REFERENCE
<b>A</b>	Whether the express toll lanes maintain speeds of forty-five miles per hour at least ninety percent of the time during peak periods.	<b>I-405</b> Page 3A, 12A Includes total percentage, and percentage split by section. <b>SR 167</b> Page 3A, 12A. Includes total percentage.
<b>B</b>	Whether the average traffic speed changed in the general purpose lanes.	<b>I-405</b> Page 3B <b>SR 167</b> Page 3B
<b>C</b>	Whether transit ridership changed.	<b>I-405</b> Page 3C. No remarkable changes or trends when compared to the previous quarter. <b>SR 167</b> Previously this was required annually. No remarkable changes or trends when compared to the previous quarter.
<b>D</b>	Whether the actual use of the express toll lanes is consistent with the projected use.	We have exceeded original forecasts for both facilities.
<b>E</b>	Whether the express toll lanes generated sufficient revenue to pay for all I-405 express toll lane operating costs.	The revenue continues to cover operating costs.
<b>F</b>	Whether travel times and volumes have increased or decreased on adjacent local streets and state highways	<b>I-405</b> Page 3F <b>SR 167</b> This is not a requirement for SR 167.
<b>G</b>	Whether the actual gross revenues are consistent with projected gross revenues as identified in the fiscal note for EHB 1382 distributed by the Office of Financial Management on March 15, 2011	The fiscal note only forecasted to FY 2020 and relied on different operational assumptions than were put into effect. This makes it difficult to compare the financial realities of FY 2021 Q2 to the fiscal note. The forecasted gross toll revenue for FY 2021 is below the range listed in the fiscal note, but the note assumes a higher minimum toll rate adjusted over time for inflation, no toll cap, and tolling through the weekends, all of which further effect the comparison. The forecasted gross toll revenues for FY 2022 are anticipated to bring the finances back in line with the fiscal note.
<b>H</b>	Travel times and travel time reliability maintained in the system	Compares minimum, average and 95th percent travel times at peak and non-peak periods, compares express toll lanes to general purpose lanes, in both the entire corridor and commonly made trips within the corridor. <b>I-405</b> Page 4H-11H <b>SR 167</b> Not required
<b>I</b>	Travel times and travel time reliability compared to pre-tolling.	A month-to-month comparison of times and reliability for the entire corridor and commonly made trips within the corridor. <b>I-405</b> Page 4I-11I <b>SR 167</b> Not required
<b>J</b>	Comparison of traffic volumes by lane type and month-to-month	Total express toll lane and total general purpose lane traffic volumes, comparisons of each type of lane, and to pre-tolling volumes, and a month-to-month comparison. <b>I-405</b> Page 8J-11J <b>SR 167</b> Not required
<b>K</b>	Washington State Patrol enforcement hours	A monthly total of enforcement hours spent on each facility. <b>I-405</b> Page 12K <b>SR 167:</b> Page 12K
