# Introduction

Per RCW 43.31.980, the Department of Commerce must annually report on the impact fee deferral process as follows:

(1) Beginning December 1, 2018, and each year thereafter, the department of commerce must prepare an annual report on the impact fee deferral process established in RCW 82.02.050(3). The report must include: (a) The number of deferrals requested of and issued by counties, cities, and towns; (b) the number of deferrals that were not fully and timely paid; and (c) other information as deemed appropriate.

(2) The report required by this section must, in accordance with RCW 43.01.036, be submitted to the appropriate committees of the house of representatives and the senate.

Commerce published its initial report in 2018. This is the second report.

## Background

During the 2015 session, the Washington State Legislature passed Engrossed Senate Bill 5923 to promote economic recovery in the construction industry. The mechanism established to achieve this is an impact fee deferral program and is codified in RCW 82.02.050(3).

Counties and cities required or choosing to plan under the Growth Management Act (RCW 36.70A.040) are authorized to collect impact fees by RCW 82.02.050 et.seq. If the local government has imposed an impact fee, it must have established an impact fee deferral program by Sept. 1, 2016.

The impact fee deferral program applies to small contractors or other builders. Deferrals may be issued for only the first 20 single-family residences built in a year by the builder. The deferral can last no longer than 18 months. At a minimum, a deferral must offer one of these three options: deferring collection of the impact fee payment until the final inspection of the property, deferring collection of the impact fee payment until the issuance of a certificate of occupancy or similar certificate or deferring collection for the impact fee payment until the time of the closing of the first sale of the property occurring after the issuance of the applicable building permit.

## Impact Fees

Impact fees are an optional fiscal tool that certain local governments use for capital facilities financing. Fees are collected on initial constructions of buildings. Local governments may charge different rates for different classes of construction, such as residential, commerce and retail. Local governments may also collect impact fees on only a single type of construction.

Impact fees are authorized for fire protection facilities, parks, schools, and transportation facilities. For school impact fees, local governments collect the fees for the school districts. Impact fees are retained in accounts specific to the type of impact fee.

Impact fees can be expended only for improvements identified in the capital facilities element of the local government's comprehensive plan. If the fees are not expended or dedicated to serve as bond repayment within 10 years of their collection, they must be refunded to the entity associated with the payment of the impact fee. The fee can be retained longer if the local government finds, in writing, that extraordinary or compelling reasons exist.

# Impact Fee Deferral Reporting

## Methodology

### Data Collection

The Joint Legislative Audit and Review Committee (JLARC) collected the data for this report.

### Process

- Data were collected via Survey Monkey between Aug. 19 and Oct. 11, 2019.
- Emails were sent to planning directors, permitting departments, and/or city administrators.
  - Where JLARC did not have contact information for a jurisdiction, they filled out the "contact us" page on their website or called.
  - In the few cases multiple people filled out the survey from the same jurisdiction and responses did not match; data were sent back to the jurisdiction for review.
- A reminder email was sent through Survey Monkey to all non-respondents on Aug. 28.
- Two sets of targeted emails were sent to non-respondents on Sept. 12:
  - For jurisdictions that do not have impact fees in their municipal code or ordinances, an email was sent asking them to confirm that they do not collect impact fees.
  - For non-respondents that do have impact fees in their municipal code/ordinances, JLARC sent an email reminding them to fill out the survey.
- All jurisdictions were sent a final email on Oct. 7 that contained a link to the dataset and requested they review their data for accuracy.
- Jurisdictions that had not yet responded were given a final opportunity to respond.

### Response Rate

Surveys were sent to 237 cities, towns, and counties. Surveys were received from 163 jurisdictions for an overall response rate of 69%. Not all jurisdictions collect impact fees, and Commerce was especially interested in hearing from those that do. Of the 103 jurisdictions that collect impact fees, 92 filled out the survey (89%). Of the 134 jurisdictions that do not collect impact fees (not authorized or haven't chosen to), 71 filled out the survey (53%).

# Summary Data

Table 1 summarizes the status of local governments in implementing impact fees. The appendices show the specific information for each jurisdiction. Of the 103 jurisdictions imposing impact fees, 92 provided data summarized in this report.

**Table 1**

Fee Imposition Status	No. of Local Governments
Ineligible to Impose Impact Fees	74
Opting Not to Impose Impact Fees	60
Imposing Impact Fees, No Data Provided	11
Imposing Impact Fees, Data Provided	92
No Data Available	93

Table 2 summarizes the data responsive to the report requirements. The number of impact fee deferrals issued for both fire protection facilities and parks exceeds the number of deferrals requested. The cause of this is the city of Lynden's automatically deferring impact fees without having to be requested.

**Table 2**

Type of Impact Fee	Number of Deferrals Requested	Number of Deferrals Issued	Number of Deferrals Not Fully and Timely Paid
Fire Protection Facilities Impact Fees	197	264	0
Parks Impact Fees	535	605	64
Schools Impact Fees	470	470	1
Transportation Facilities Impact Fees	532	532	1
Total	1,734	1,871	66

## Appendix C: Fire Protection Facilities Impact Fees

Table 3 includes all the local governments that reported to JLARC they collect fire protection facilities impact fees.

The first column indicates whether the local government collects fire protection facilities impact fees. Blanks in the data reflect how the surveys were submitted and indicate the local government did not enter any information in that field.

**Table 3**

Local Government	Collects impact fees for fire protection	Number of deferrals requested	Number of deferrals issued	Number of deferrals not fully and timely paid
