Executive Summary

This report is submitted by the Health Care Authority to the Legislature as a requirement per the Engrossed Substitute Senate Bill 6052 (ESSB 6052), Section 213(1)(dd):

Within amounts appropriated in this section, the health care authority shall conduct a review of its federally qualified health center encounter rates and rural health center encounter rates in comparison to current uniform medical plan rates for the same or similar services. The authority shall consult with the centers for medicare and medicaid services to determine whether federally qualified encounter rates may be adjusted to uniform medical plan rates as a reasonable proxy to cost. The authority must submit a report to the governor and the appropriate committees of the legislature that includes which encounter rates exceed uniform medical rates, the amount by which the rates are exceeded, and the annual cost of paying above uniform medical rates. The report shall also include the steps the authority has taken with the centers for medicare and medicaid services to ensure that rates bear a reasonable relationship to costs incurred by efficiently and economically operated facilities, including whether uniform medical plan or commercial rates may be considered a reasonable proxy to cost. The report must be submitted by January 1, 2016.

This report, including appendices, is a review of Federally Qualified Health Centers (FQHC) and Rural Health Clinics (RHC) encounter rates in comparison to current Uniform Medical Plan (UMP) rates for the same or similar services. The report provides basic information about FQHCs and RHCs, including history of reimbursement and a review of pertinent state and federal rules.

This report provides an overview of major differences between the FQHC/RHC and UMP payment methodologies. The report also explains how the rates comparison was conducted and how the annual cost of paying above UMP rates was determined. Finally, it summarizes consultations with CMS regarding the feasibility of changing the FQHC/RHC methodology from a cost-based approach to one mirroring commercial payers.

Overview of FQHCs and RHCs

The following is an overview of FQHC and RHC provider types including definitions, purpose, and types of services provided at these settings. This section also addresses the reimbursement for FQHCs and RHCs, including history and current reimbursement method development. Lastly, the section includes a definition of an FQHC and RHC encounter and encounter rates.

FQHC Definition

FQHCs are Federally Qualified Health Centers. FQHCs are “safety net” providers such as community health centers, public housing centers, outpatient health programs funded by the Indian Health Service, and programs serving migrants and the homeless. An FQHC is a facility that is:

- Receiving grants under Title 42, Chapter 6A, Subchapter II, Part D, subpart I, section 254b of the U.S. Code (formerly known as Section 330 of the Public Health Services Act);
- Receiving such grants based on the recommendations of the Health Resources and Services Administration within the Public Health Service, as determined by the Secretary, to meet the requirements for receiving such a grant; or
- A tribe or tribal organization operating outpatient health programs or facilities under the Indian Self-Determination Act (PL93-638) that elects to be designated as an FQHC.

There are currently 31 FQHCs participating in Washington State’s Medicaid program.

FQHCs were established in 1990 by section 4161 of the Omnibus Budget Reconciliation Act of 1990 and were effective beginning on October 1, 1991. The purpose of the FQHC program is to enhance the provision of primary care services in underserved urban and rural communities.

RHC Definition

RHCs are Rural Health Clinics. An RHC is a clinic, as defined in 42 C.F.R. 405.2401(b), that is primarily engaged in providing RHC services and is:

- Located in a rural area designated as a shortage area as defined under 42 C.F.R. 491.2;
- Certified by Medicare as an RHC in accordance with applicable federal requirements; and
- Not a rehabilitation agency or a facility primarily for the care and treatment of mental diseases.

There are currently 115 RHCs participating in Washington State’s Medicaid program.

The Rural Health Clinic Services Act of 1977 (Public Law 95-210) was enacted to address an inadequate supply of physicians serving Medicare patients in rural areas and to increase the use

of non-physician practitioners such as nurse practitioners (NPs) and physician assistants (PAs) in rural areas.

Types of Services Provided by FQHCs and RHCs

There are basic requirements for services provided in an FQHC or RHC. FQHCs and RHCs must furnish all services according to applicable federal, state and local laws. Unless otherwise specified, FQHC/RHC services provided are subject to the limitations and coverage requirements detailed in the Physician-Related Services/Healthcare Professional Services Provider Guide and other applicable provider guides of HCA. The agency does not extend additional coverage to clients in an FQHC/RHC beyond what is covered in other agency programs and state law. The FQHC/RHC must be primarily engaged in providing outpatient health services. FQHCs/RHCs must provide medical emergency procedures as a first response to common life-threatening injuries and acute illness.

FQHC Services

FQHC services include core services covered for Medicaid patients, and other ambulatory services. Other ambulatory services may include blood draws, laboratory tests, x-rays, pharmacy, dental, diabetes self-management services and medical nutrition therapy, mental health, and preventive services. The following providers may provide services in an FQHC: physicians, physician assistants, nurse practitioners, nurse midwives or other specialized nurse practitioners, certified nurse midwives, registered nurses or licensed practical nurses, mental health professionals, and naturopathic physicians.

RHC Services

As compared to the FQHC scope of service, RHCs provide medical services only. An RHC must be primarily engaged in providing outpatient health services. Clinic staff must provide diagnostic and therapeutic services and supplies commonly furnished in a physician's office or the entry point into the health care delivery system. Services include: medical history, physical examination, assessment of health status, treatment for a variety of medical conditions, and surgical procedures provided in an office setting. An RHC must also provide medical emergency procedures as a first response to common life-threatening injuries and acute illness. An RHC is required to provide basic laboratory services and have commonly used drugs and biologicals available.

FQHC and RHC Reimbursement Methodology

History

Prior to 2001 the Federal law required State Medicaid programs to reimburse FQHCs and RHCs based on annual reasonable costs. States used Medicare regulations and cost reports to identify the types of allowable costs that would be reimbursed.

Prospective Payment System (PPS)

For services provided during the period beginning January 1, 2001, and ending December 31, 2008, the Medicaid agency's payment methodology for FQHCs and RHCs was a prospective payment system (PPS) as authorized by 42 U.S.C. 1396a (bb)(2) and (3). Medicaid programs made payments for FQHC/RHC services in an amount calculated on a per-visit (encounter) basis that is equal to the reasonable cost of such services documented for a baseline period, with certain adjustments.

The State averaged the 1999 and 2000 cost report rates to establish a base encounter rate for each center starting January 1, 2001. The base encounter rate for FQHCs certified after 2000 is determined using the first available cost report. The base rates have been inflated annually by the Medicare Economic Index or MEI.

Alternative Payment Methodology (APM)

Under the Benefits Improvement and Protection Act of 2000 (BIPA) laws, the State has the option of developing an alternative payment methodology for FQHCs and RHCs. As an alternative to PPS, the agency worked with members from the FQHC and RHC associations, the Governor's Office, the actuarial firm Milliman USA, and other stakeholders to develop an Alternative Payment Methodology (APM). Pursuant to BIPA, payments made under an APM must at least equal the PPS rates.

For FQHCs and RHCs choosing the APM, revised encounter rates were calculated by starting with the base rate and trending forward to 2009 using the annual APM index. Scope changes approved since the base rate was established were reflected in the APM rate. APM rates are higher than PPS rates.

Encounter rates for centers that selected the APM would be periodically rebased using cost reports and other relevant data to reflect changes in underlying costs and service delivery systems. However, because BIPA requires the APM pay the amount at least equal to the PPS, rebased rates will never fall below the PPS rate. As requested by the FQHC and RHC associations, each center choosing the APM had the option to rebase their encounter rates effective January 1, 2010. The State established a subcommittee comprised of FQHC and RHC representatives who discussed the format and calculations required of the cost reports to be used for rebasing.

At this time, most FQHCs and all RHCs are reimbursed under the APM methodology. For these clinics, HCA staff must ensure that both the APM and the PPS rate are increased by annual MEI and the APM rate does not fall below the PPS rate.

FQHC/RHC Encounter Rates

FQHC and RHC reimbursement is cost-based. Encounter rates for FQHCs and RHCs are specific to each center and are based on each center's costs and visits as required by the Prospective Payment System outlined in the federal Benefits Improvement and Protection Act of 2000. FQHCs and RHCs receive an enhanced reimbursement in return for serving medically underserved areas and/or populations. The basic premise behind FQHC and RHC encounter rates can be captured by the following formula:

$$\text{Allowable Costs} \div \text{Visits} = \text{Encounter Rate}$$

Allowable costs must be reasonable and necessary and may include practitioner compensation, overhead, equipment, space, supplies, personnel, and other costs incident to the delivery of RHC and FQHC services.

Per FQHC WAC 182-548-1400 and RHC WAC 182-549-1400, FQHC/RHC encounters are limited to one per client per day. Exceptions are when two encounters are billed for services performed by different doctors with different specialties or when two encounters are billed for separate visits with unrelated diagnoses. Encounters are paid only to clients in federally-matched programs (i.e., not State-only clients). Payments for State-only clients are paid at Medicaid fee schedule amounts.

FQHCs may choose to have an all-inclusive rate, which covers all encounter services or individual rates for each of the permitted cost centers. The cost centers are:

- Medical/Maternity/Mental Health other than services meeting the access to care standards for Regional Support Networks (RSNs)
- Dental
- Maternity Support Services
- Substance Abuse
- Mental Health - RSN Services
- Mental Health – Psychiatrist/psychologist other than access to care standards for RSN.

If an FQHC chooses the individual rate option, the rates will be weighted and applied according to the appropriate cost centers. In other words, each separate rate is calculated using only the costs and visits associated with that particular service type and that rate is paid only for encounters of that type.

Unlike FQHCs, RHCs have one rate for all services they provide.

Payment for services eligible for an encounter

HCA pays FQHCs and RHCs for services eligible for an encounter on an encounter rate basis rather than a fee-for-service basis. In addition to the actual procedure code, providers are instructed to bill the T1015 (the code for the FQHC/RHC differential payment) on a separate line of the claim.

T1015 represents a clinic encounter (not a specific service) and serves as a mechanism to calculate the difference between the value of the actual service provided and the clinic's encounter rate. At least one procedure code reported on the claim must be encounter-eligible in order for the T1015 line to calculate the differential payment.

Example: if a clinic's all-inclusive encounter rate is \$250 per visit, the following are a few examples of how this clinic's claims will pay for an encounter eligible service:

Claim	CPT Codes	CPT Description	Amount Paid
Claim 1	99213	Office Visit	\$ 38.71
	T1015	FQHC/RHC Differential	\$ 211.29
	Total Claim:		\$ 250.00
Claim 2	99382	Well Child Visit	\$ 95.36
	90714/SL	Vaccine Administration	\$ 5.96
	T1015		\$ 148.68
	Total Claim:		\$ 250.00
Claim 3	90791	Psych. Evaluation	\$ 79.08
	T1015	FQHC/RHC Differential	\$ 170.92
	Total Claim:		\$ 250.00

It is important to note that if the value of the CPT code exceeds the encounter rate, the T1015 differential will result in a negative amount, ensuring the final claim pays the encounter rate:

Claim	CPT Code	CPT Description	Amount Paid
Claim 1	59409	OB Delivery	\$ 817.01
	T1015	FQHC/RHC Differential	\$ (567.01)
	Total Claim:		\$ 250.00

Payment for services not eligible for an encounter

Many services provided in FQHC or RHC settings do not qualify for an encounter payment if these were the only services provided that day. In this case, a clinic will receive a fee-for-service payment, per the HCA's published fee schedule.

Example:

CPT Codes	CPT Description	Amount Paid
90714/SL	Vaccine Administration	\$ 5.96
Total Claim:		\$ 5.96

Legislative Report Requirements

As stated in the ESSB 6052, Section 213 (1)(dd):

“...The health care authority shall conduct a review of its federally qualified health center encounter rates and rural health center encounter rates in comparison to current uniform medical plan rates for the same or similar services...The authority must submit a report to the governor and the appropriate committees of the legislature that includes which encounter rates exceed uniform medical rates, the amount by which the rates are exceeded, and the annual cost of paying above uniform medical rates.”

When comparing the FQHC and RHC encounter rates to UMP rates for same or similar services, it is important to underline the major differences between the two payment methodologies.

- FQHC/RHC encounter rates are clinic specific. These rates were established using each clinic’s audited cost report. Individual FQHC/RHC encounters are paid the same amount regardless of a procedure code. In contrast, UMP rates are paid on a fee-for-service basis and the rates are specific to procedure or CPT codes (Current Procedural Terminology).
- FQHC/RHC encounter rates pay the same amount regardless of a servicing provider (e.g. MD, ARNP, Mental Health Counselor). UMP rates differ depending on provider type and depending on where the service was provided (e.g., office vs. hospital setting).
- An FQHC/RHC encounter rate is a bundled or an all-inclusive payment for services provided on the same day. All related services performed on the same day by the same clinician or by the same provider specialty must be billed on the same claim. This includes any services performed during an encounter-eligible visit that are not encounter-eligible (such as a vaccine immunization performed at the same time as an office visit). This also includes services or supplies that are considered incidental to the professional service and are bundled within the encounter rate. Wrap around services are also included in the FQHC/RHC encounter rate.
- The Uniform Medical Plan (UMP) payment methodology is different from the methodology used to pay for FQHC/RHC services. Specifically, the UMP reimburses providers based on a fee schedule amount for each service provided.
- FQHC pharmacy costs are also included in the cost report. These costs are then included in the calculation of the FQHC encounter rate. For any pharmacy payments made to an FQHC, HCA later recoups these payments because the FQHC encounter rate ultimately contains a pharmacy cost component. A UMP provider receives a separate payment for pharmacy claims. Thus, the pharmacy costs are included in the FQHC rates but not in the UMP rates.

In summary, FQHC/RHC encounter rates and UMP fee-for-service rates are established using different payment methodologies. Therefore, a procedure by procedure comparison will yield results that are not truly comparable.

To comply with the requirement for this Legislative report, HCA:

- **Compared FQHC/RHC encounter rates to UMP rates for same or similar services;**
- **Determined which encounter rates exceed UMP rates;**
- **Determined annual cost of paying above UMP rates;**
- **Consulted with CMS.**

Below is a detailed account of each task associated with the report requirements.

Comparison of FQHC/RHC and UMP rates for same or similar services:

The UMP fee schedule contains over 10,000 Current Procedural Terminology, or CPT, codes.¹ However, not all of these codes can be performed in an FQHC or RHC setting (e.g. heart or brain surgery). Therefore, in order to compare the rates for same or similar services, HCA first identified which CPT codes are performed in FQHC/RHC setting. The encounter rates for these codes only were compared to the UMP rates for the same services. The final comparison lists 3,975 CPT codes across all FQHCs and RHCs.

The following assumptions were used in the comparison.

1. Many FQHCs have multiple cost center encounter rates. CPT codes listed in the UMP fee schedule fall under the Medical/Maternity/Mental Health (not RSN mental health) FQHC cost center category. Therefore, for these FQHCs only the encounter rate for the Medical/Maternity/MH services was used.
2. UMP rates vary based on provider type and place of service. The majority of FQHC and RHC medical services are provided by MDs in a non-facility or an office setting. Therefore, the UMP MD non-facility rates were used in the comparison.
3. Per federal regulation, FQHC/RHC APM encounter rate cannot fall below their PPS rate. However, as required by the Legislation, the comparison includes UMP rates that are below PPS rates. The comparison also includes the UMP rates that are higher than FQHC/RHC APM rates.

¹ These five digit numeric codes are used to describe physician level procedures and services, such as office visits, surgical, radiology, and laboratory.

4. Services provided by FQHCs and RHCs that are reimbursed on a fee-for-service basis (not at encounter rates) are outside the scope of this report and are excluded from the analysis.

This comparison looks at all CPT codes that are common between FQHCs/RHCs and the UMP fee schedule, including CPT codes where the UMP values are higher than FQHC/RHC encounter rates. As a result of this comparison, the average FQHC/RHC encounter rate was determined to be \$182.40. The average UMP rate for the same codes was determined to be \$203.12. This indicates that on average, UMP rates are \$20.72 higher than FQHC/RHC rates. This is mainly attributable to a number of maternity and minor surgery codes where the UMP rate is significantly higher than the FQHC/RHC rate.

Average FQHC/RHC Rate	Average UMP Rate	Difference
\$182.40	\$203.12	(\$20.72)

Determine which FQHC/RHC encounter rates exceed UMP rates

To determine which FQHC/RHC encounter rates exceed UMP rates for same or similar services, the list of CPT codes was limited to those procedures where the FQHC/RHC rates were higher than UMP rates. This resulted in 2,605 CPT codes across all FQHCs and RHCs. Appendix 1 includes a complete list of codes.

As a result of this comparison, the average FQHC/RHC encounter rate was determined to be \$194.74. The average UMP rate for the same services was determined to be \$109.51. This indicates that on average, UMP rates are lower than FQHC/RHC rates by \$85.28.

Average FQHC/RHC Rate	Average UMP Rate	Difference
\$194.79	\$109.51	\$85.28

Estimate the annual cost of paying above UMP rates for codes where FQHC/RHC rates exceed UMP rates

As explained earlier in this report, payments to FQHCs and RHCs are made as a bundled payment regardless of how many services are provided to a client on a given day. In many instances, FQHCs and RHCs are paid a single encounter rate for multiple services provided on the same day, whereas a UMP provider would receive a separate payment for each service provided. When

estimating the annual cost, this important distinction must be addressed to keep the estimate in line with reality.

To perform the estimate, the data pull and analysis were done following these steps:

- Using the list of CPT codes identified in the previous step (listed in Appendix 1 of this report), HCA pulled paid claims data for FQHCs and RHCs for SFY 2014. The data included the line level detail including the CPT codes and the FQHC/RHC enhancement or differential amount (T1015). The T1015 amount indicated the difference between the value of the CPT code and the FQHC or RHC unique encounter rate. FQHC/RHC values including T1015 were totaled. This value indicated the total encounter payment to FQHCs and RHCs for the identified CPT codes.
- Next, FQHC/RHC CPT rates in the data were re-priced using the current UMP rates for the same CPT codes. UMP values were totaled. The T1015 differential was not included in this total as it was an enhancement portion of the FQHC/RHC encounter rate. The total UMP values (minus T1015) indicated what the FQHCs and RHCs would be paid with UMP rates.
- The difference between these totals is the annual cost of paying FQHCs and RHCs above UMP rates.

Sample calculation: Using the same billing examples from page 7, total paid to the FQHC is \$750. When UMP values are brought in, the total drops to \$533.55. This indicates that \$216.45 is the cost of paying above UMP rates.

Claim	CPT Codes	CPT Description	Amount Paid with FQHC rate	Amount Paid with UMP rate	Paid Above UMP rates
Claim 1	99213	Office Visit	\$ 38.71	\$ 99.88	
	T1015	FQHC/RHC Differential	\$ 211.29	N/A	
	Total Claim:		\$ 250.00	\$ 99.88	\$ 150.12
Claim 2	99382	Well Child Visit	\$ 95.36	\$ 159.71	
	90714/SL	Vaccine Administration	\$ 5.96	\$ 34.74	
	T1015	FQHC/RHC Differential	\$ 148.68	N/A	
	Total Claim:		\$ 250.00	\$ 194.45	\$ 55.55
Claim 3	90791	Psych. Evaluation	\$ 79.08	\$ 239.22	
	T1015	FQHC/RHC Differential	\$ 170.92	N/A	
	Total Claim:		\$ 250.00	\$ 239.22	\$ 10.78
Total:			\$ 750.00	\$ 533.55	\$ 216.45

Based on SFY 2014 paid claims data, total annual cost of paying for FQHC and RHC services above UMP rates is **\$15,973,609**. The state portion of this amount is **\$5,837,082**. This cost impact is calculated using the codes where FQHC/RHC rates exceed UMP rates only.

Annual cost of CPT codes where FQHC/RHC encounter rates exceed UMP rates	State Share	Federal Share	Total
FQHC/RHC Data	\$ 13,493,702	\$ 23,312,876	\$ 36,806,578
FQHC/RHC Data with UMP Values	\$ 7,656,620	\$ 13,176,350	\$ 20,832,969
Annual cost of paying above UMP values	\$ 5,837,082	\$ 10,136,526	\$ 15,973,609

Consultation with CMS

HCA attempted to schedule a conference call with CMS regional and Central Office staff. However, due to scheduling conflicts, a conference call was not feasible during the timeframe specified in the report work plan. Instead, HCA submitted the questions to CMS staff in an email and received the responses listed below. HCA also submitted to CMS for review a side-by-side comparison of a range FQHC/RHC encounter rates to UMP fee-for-service rates for office visits, some of the most commonly billed CPT codes (see Appendix 2).

Question 1:

Do FQHC and RHC rates bear a reasonable relationship to costs incurred by efficiently and economically operated facilities? A file containing WA State FQHC and RHC encounter rates and UMP fee-for-service rates for the same CPT codes is attached.

CMS Response: “As stated in state health official (SHO) 10-004 issued February 4, 2010, section 702 of BIPA (“New Prospective Payment System For Federally-Qualified Health Centers and Rural Health Clinics”) created a new section 1902(bb) in the Act. This section requires Medicaid programs to make payments for FQHC/RHC services in an amount calculated on a per-visit basis that is equal to the reasonable cost of such services documented for a baseline period, with certain adjustments, or to use an alternative payment methodology that pays at least PPS for FQHC and RHC services. Please see responses below that address cost and payment.”

Question 2:

Can UMP or commercial rates be considered a reasonable proxy to cost?

CMS Response: “We do not have data that indicate the relationship of UMP or commercial rates to cost.”

Question 3:

Can FQHC/RHC rates be adjusted to UMP rates as a reasonable proxy to cost?

CMS Response: “As indicated in the Social Security Act at section 1902(bb)(3)(B) - Fiscal Year 2002 and Succeeding Fiscal Years and further explained at #22 of the BIPA Questions and Answers, the state must adjust the rate annually for inflation using the Medicare Economic Index (MEI) and can rebase it only when there has been a change of scope in services. As a result, the state may not adjust the FQHC/RHC rates to UMP rates as a reasonable proxy to cost.”

Question 4:

Please provide additional information as you see fit.

CMS Response: “Please be aware that the UMP payment methodology is different from the methodology used to pay for FQHC services. Specifically, the UMP results in payment of a fee schedule amount for each service provided, while FQHCs are paid using an encounter rate that is unique to these providers. The encounter rate reimburses on the average for a bundle of services recognized as FQHC services and is not linked to the individual services provided. This may result in higher payment to the FQHC on a per visit basis when compared to payment made to private physicians.”

Conclusion

HCA is required to conduct a review of its encounter rates for FQHCs and RHCs, compare the encounter rates to UMP Rates for same or similar services and determine which FQHC/RHC encounter rates exceed UMP rates. HCA is also required to calculate the annual cost of paying at FQHC/RHC rates above UMP rates. Additionally, HCA is required to consult with CMS regarding the reasonableness of the FQHC/RHC rates and whether UMP rates can be used as a proxy to FQHC/RHC rates.

The report provides an overview and basic information regarding FQHC/RHC reimbursements. The report also highlights the major differences in payment methodologies between FQHC/RHC and UMP providers. These differences were discussed in the report and considered when estimating the annual cost impact.

HCA establishes encounter rates for FQHCs and RHCs as required by 42 U.S.C 1396a (bb). HCA cannot change the methodology without CMS approval. In their written response to HCA’s questions, CMS confirmed that the two methodologies are different and UMP rates cannot be used as a proxy for FQHC/RHC encounter rates. CMS acknowledges that reimbursement to FQHCs and RHCs results in higher payments than those made to private physicians because encounter rates are required to be equal to the reasonable cost of services provided in an FQHC/RHC setting. Furthermore, the encounter rate reimburses on the average for a bundle of

services recognized as FQHC/RHC services and is not linked to the individual services provided. Payment includes support services known as wrap around services which are critical for assuring access to preventive primary care for low income populations.

While some FQHC/RHC encounter rates exceed UMP commercial rates, CMS explicitly stated that HCA cannot use UMP rates as a proxy for FQHC/RHC encounter rates. Prior legislatures have attempted to reduce FQHC/RHC rates below the minimums mandated by federal law, and subsequent litigation was settled with an acknowledgement by the state that it may not cut FQHC/RHC reimbursement below the minimums required by federal law.

Glossary of Terms

APM – Alternative Payment Methodology

Base year – The year that is used as the benchmark in measuring an FQHC’s total reasonable costs for establishing base encounter rates.

BIPA – Benefit Improvement and Protection Act of 2000.

CMS – Centers for Medicare and Medicaid Services.

Cost Report – A statement of costs and provider usage that occurred during the time period covered by the cost report. FQHCs must complete a cost report when there is a change in scope, rebasing of the encounter rate, or when the agency sets a base rate.

CPT – Current Procedural Terminology, is a listing of descriptive terms and identifying codes of reporting medical services and procedures performed by physicians (include citation).

CPT code – Five digit numeric code that is used to describe physician level procedure, such as an office visit, surgical, radiology, laboratory and other types of physician procedures and services.

Encounter – A face-to-face visit between a client and a qualified FQHC and RHC provider (e.g., a physician, physician assistant, or advanced registered nurse practitioner) who exercises independent judgment when providing services that qualify for an encounter rate.

Encounter rate – A cost-based, facility-specific rate for covered FQHC and RHC services, paid to an FQHC or RHC for each valid encounter it bills.

Fee-for-service – A payment method the agency uses to pay providers for covered medical services provided to medical assistance clients, except those services provided under the agency’s prepaid managed care organizations, or those services that qualify for an encounter rate.

FQHC – Federally Qualified Health Center. An entity that has entered into an agreement with the Centers for Medicare and Medicaid Services (CMS) to meet Medicare program requirements under 42 C.F.R. 405.2434 and:

- Is receiving a grant under section 329, 330, or 340 of the Public Health Service (PHS) Act, or is receiving funding from such a grant under a contract with the recipient of such a grant and meets the requirements to receive a grant under section 330 of the Public Health Service Act;
- Based on the recommendation of the PHS, is determined by CMS to meet the requirements for receiving such a grant;
- Was treated by CMS, for purposes of part B, as a comprehensive federally funded health center (FFHC) as of January 1, 1990; or
- Is an outpatient health program or facility operated by a tribe or tribal organization under the Indian Self-Determination Act or by an Urban Indian organization receiving funding under Title V of the Indian Health Care Improvement Act.

MEI – Medicare Economic Index

PPS – Prospective Payment System

RHC – Rural Health Clinic. A clinic, as defined in 42 C.F.R. 405.2401(b), that is primarily engaged in providing RHC services and is:

- Located in a rural area designated as a shortage area as defined under 42 C.F.R. 491.2;
- Certified by Medicare as an RHC in accordance with applicable federal requirements; and
- Not a rehabilitation agency or a facility primarily for the care and treatment of mental diseases.

Rural health clinic (RHC) services – Outpatient or ambulatory care of the nature typically provided in a physician's office or outpatient clinic or similar setting, including specified types of diagnostic examination, laboratory services, and emergency treatments. The specific list of services which must be made available by the clinic can be found under 42 C.F.R. Part 491.9.

UMP – Uniform Medical Plan.

FQHC/RHC and UMP Comparison

Code	Description	Uniform Medical Plan (2013)*	FQHC Encounter Rate (2013)**	RHC Encounter Rate (2013)**
99201	Office or other outpatient visit for the evaluation and management of a new patient...(10 minutes)	\$23.10 - \$60.31	\$135.60 - \$305.71 per encounter	\$85.63 - \$339.73 per encounter
99202	Office or other outpatient visit for the evaluation and management of a new patient...(20 minutes)	\$43.77 - \$102.77	\$135.60 - \$305.71 per encounter	\$85.63 - \$339.73 per encounter
99203	Office or other outpatient visit for the evaluation and management of a new patient...(30 minutes)	\$66.87 - \$149.09	\$135.60 - \$305.71 per encounter	\$85.63 - \$339.73 per encounter
99204	Office or other outpatient visit for the evaluation and management of a new patient...(45 minutes)	\$113.38 - \$227.74	\$135.60 - \$305.71 per encounter	\$85.63 - \$339.73 per encounter
99205	Office or other outpatient visit for the evaluation and management of a new patient...(60 minutes)	\$145.30 - \$282.75	\$135.60 - \$305.71 per encounter	\$85.63 - \$339.73 per encounter
99211	Office or other outpatient visit for the evaluation and management of an established patient...(5 minutes)	\$8.21 - \$27.99	\$135.60 - \$305.71 per encounter	\$85.63 - \$339.73 per encounter
99212	Office or other outpatient visit for the evaluation and management of an established patient...(10 minutes)	\$22.50 - \$60.31	\$135.60 - \$305.71 per encounter	\$85.63 - \$339.73 per encounter
99213	Office or other outpatient visit for the evaluation and management of an established patient...(15 minutes)	\$44.38 - \$99.88	\$135.60 - \$305.71 per encounter	\$85.63 - \$339.73 per encounter
99214	Office or other outpatient visit for the evaluation and management of an established patient...(25 minutes)	\$68.09 - \$147.65	\$135.60 - \$305.71 per encounter	\$85.63 - \$339.73 per encounter
99215	Office or other outpatient visit for the evaluation and management of an established patient...(40 minutes)	\$95.75 - \$198.31	\$135.60 - \$305.71 per encounter	\$85.63 - \$339.73 per encounter

* UMP rates vary depending on provider type and the facility/non-facility place of service.

** Encounter rates vary by clinic. The individual clinic's encounter rate is the same regardless of provider type.

**FQHC/RHC Encounter rates include several clinics located in Oregon. These clinics are enrolled with WA HCA and serve Washington Medicaid clients

Note: Some FQHCs' encounter rates vary depending on type of service (e.g. Medical, Dental). This comparison includes Medical FQHC encounter rates.
