How new plates are distributed

When a new special license plate series becomes available, the Department of Licensing provides the first 25 license plates in sequential order (1-25) to the sponsoring organization. The sponsoring organization is responsible for selecting the individuals who are to receive these license plates and provide DOL the name, information and payment for the vehicle registration attached to the plate. Some organizations use this as an additional fundraising opportunity in the form of an auction or as a way to provide special recognition to individuals. Beyond that, non-personalized special plates are distributed in the order that they are purchased.

Personalized plate combinations that exist in another special plate series or on standard license plates are not available to be used on a new plate series.
