Mailing Address: P.O. Box 43200, Olympia, WA 98504-3200 • (360) 902-2200 • TDD (360) 902-2207
Main Office Location: Natural Resources Building, 1111 Washington Street SE, Olympia, WA

To: The Office of Financial Management, the Transportation Committees of the Washington State Legislature, and the Association of Washington Cities

From: Kaylee Kautz, (acting) WDFW Fish Passage Inventory & Assessment Section Manager

Date: June 21, 2023

Subject: End of Biennium Report of the Inventory and Assessment of City-Owned Fish Passage Barriers

Introduction

For the 2021-2023 biennium, the Washington Department of Fish & Wildlife (WDFW) was appropriated \$400,000 to contract with the Association of Washington Cities, per Engrossed Substitute Senate Bill 5165 2021-22, Section 112. The dictated scope of work was to inventory and assess fish passage barriers associated with city roads located in the U.S. v. Washington case area, also known as Water Resource Inventory Areas (WRIAs) 1 to 23.

Method

WDFW focused on the primary goal of the study, which is to complete the inventory of all city-owned fish passage barriers within the case area. We conducted mapping exercises to identify potential undocumented sites where city roads crossed streams. Then a team of two scientific technicians conducted field verifications of each location and assessed all potential fish passage water crossing features. In addition to locating new crossings, WDFW crews re-assessed multiple crossings, either by request of specific cities, to address data gaps, or to re-evaluate decades old assessments. All barrier assessment data is compiled in the Fish Passage & Diversion Screening Inventory (FPDSI) database and publicly accessible through the [WDFW Fish Passage Map application](#).

Summary of Results

The full findings from our inventory and assessment efforts in the 2021-2023 biennium are described in the below tables. Highlights include:

- ***Inventory and assessment has been completed for all cities in WRIAs 1 – 23.***
- Inventory and assessment was completed in 26 cities (see Table 1).
- 909 fish passage sites were assessed in the 2021-2023 biennia (see Table 2).
 - 765 of these city-owned sites were assessed under the AWC contract
 - 144 site assessments were performed outside of the scope of this contract.

- 282 of the sites assessed were revisits of sites where Level B wasn't performed in earlier biennia or where information was limited due to Covid-related social distancing protocols.
- All city-owned sites are included in FPDSI and assessments will be delivered to cities in reporting.
- Across all cities assessed in the 2021-2023 biennia, 55.2% of sites were barriers (passability of 0, 33 or 67%); 30.6% are fully passable (100% passability); and 14.2% are of unknown passability. Note: Unknown passability is assigned to sites where complex conditions exist, and standard fish passage protocols could not determine barrier status, or where access limitations prevented a complete assessment.
- We have reported findings from the 2019 – 2021 and 2021 – 2023 biennia to cities. To date, we have shared results with 20 cities. Findings will continue to be reported to cities whose inventory and assessment efforts have been completed.

Table 1. Summary of fish passage features inventoried by city as of June 20, 2023. *Note:* Barriers may have unknown passability due to complex site features that require analysis by an engineer or limited access due to land ownership on a portion of the feature.

| City | Total # of Sites | 0% Passable | 33% Passable | 67% Passable | Unknown Passability | 100% Passable |
|---------------------------|------------------|-------------|--------------|--------------|---------------------|---------------|
| City of Aberdeen | 133 | 23 | 30 | 19 | 46 | 15 |
| City of Algona | 16 | 0 | 3 | 0 | 11 | 2 |

*City of Seattle numbers include Seattle City Light owned sites

**City of Tacoma numbers include Tacoma Power owned sites

Table 2. Summary of fish passage features inventoried in the 2021 – 2023 biennium by city. Results of barrier assessments are indicated. *Note:* Barriers may have unknown passability due to complex site features that require analysis by an engineer or limited access due to land ownership on a portion of the feature. Totals reflect all city site assessments added to the fish passage database in the 2021-2023 biennium, some of which were performed outside the scope of this contract.
