

WAC 173-186-330 Planning standards for crude oils. (1) Rail plan holders carrying, handling, storing, or transporting crude oils shall have a letter of intent with a primary response contractor that maintains the resources and/or capabilities necessary to respond to a spill of oil that may weather, and sink or submerge. Such equipment shall include, but is not limited to, the following:

(a) Sonar, sampling equipment or other methods to locate the oil on the bottom or suspended in the water column;

(b) Containment boom, sorbent boom, silt curtains, or other methods for containing the oil that may remain floating on the surface or to reduce spreading on the bottom;

(c) Dredges, pumps, or other equipment necessary to recover oil from the bottom and shoreline;

(d) Equipment necessary to assess the impact of such discharges; and

(e) Other appropriate equipment necessary to respond to a discharge involving the type of oil handled, stored, or transported.

(2) The equipment shall be capable of being on scene within twelve hours of spill notification.
