WAC 197-11-238  SEPA/GMA integration monitoring. Monitoring in-
formation is important to maintain the usefulness of the environmental
analysis in plans and development regulations for project-level review
and to update plans under chapter 36.70A RCW. GMA counties/cities are
encouraged to establish a process for monitoring the cumulative im-
pacts of permit decisions and conditions, and to use that data to up-
date the information about existing conditions for the built and natu-
ral environment. If a monitoring process is developed, it should be
established at the time information on existing conditions is devel-
oped. Annual or periodic reports summarizing the data and documenting
trends are encouraged.
