WAC 204-24-030 Standards for studded tires. Studded tires must meet the following specifications:

1. Studs must be metal, tipped with tungsten carbide.
2. Metal studs must be inserted only in a new tire or a newly-recapped tire which has molded in the tread the "pin-holes" into which metal studs are to be inserted. Studs must not be inserted in any new tire or newly-recapped tire after it has been driven on a vehicle.
3. Metal studs may be installed only by the tire manufacturer, or by a tire dealer or tire jobber who shall install the metal studs in conformance with the manufacturer's specifications.
4. When a tire is sold or offered for sale as a studded tire or when studs are installed in a new tire or a newly recapped tire, there must be a minimum of seventy metal studs evenly spaced around the tread of the tire.
5. A tire must contain a minimum of fifty-six metal studs at all times in order to qualify as a "studded tire" or as an approved traction device.
6. Metal studs must not be installed in any tire of a vehicle which has a gross vehicle weight of ten thousand pounds or over.
7. School buses and fire department equipment tires are exempt from subsection (6) of this section.
