WAC 246-226-020  Equipment requirements. The CT X-ray system must:

(1) Meet the requirements of 21 C.F.R. Sec. 1020.33 (last amended June 10, 2005) at the time of installation and while the CT X-ray system is registered with the department under chapter 246-224 WAC; and

(2) Be equipped:
   (a) With a visible signal that indicates when the X-ray exposure is occurring;
   (b) So that the operator can immediately terminate an X-ray exposure of greater than one-half second duration at any time during the X-ray exposure;
   (c) So that the parameters used during a CT procedure are:
      (i) Displayed prior to beginning a scan; and
      (ii) Visible by the operator from any location scanning can be initiated.
   (d) So that radiation leakage from the tube port does not exceed limits established in WAC 246-225-040 (3) and (4) when data are not being collected for image production;
   (e) So that the accuracy of the laser or optical positioning system is within five millimeters maximum deviation on the axial position (z-axis);
   (f) With an X-ray production indicator of at least one-half second at or near the gantry that is visible from any point outside the gantry opening;
   (g) So that premature termination of the X-ray exposure by the operator requires resetting of the parameters prior to initiating another scan.
