Coordinated quality improvement program. The purpose of this section is to ensure the establishment and on-going maintenance of a coordinated quality improvement program. The intent is to improve the quality of health care services provided to patients and to identify and prevent medical malpractice.

An ambulatory surgical facility must:

1. Have a facility-wide approach to process design and performance measurement, assessment, and improving patient care services according to RCW 70.230.080 including, but not limited to:
   a. A written performance improvement plan that is periodically evaluated;
   b. Performance improvement activities that are interdisciplinary and include at least one member of the governing authority;
   c. Prioritize performance improvement activities;
   d. Implement and monitor actions taken to improve performance;
   e. Education programs dealing with performance improvement, patient safety, medication errors, injury prevention; and
   f. Review serious or unanticipated patient outcomes in a timely manner.

2. Systematically collect, measure and assess data on processes and outcomes related to patient care and organization functions;

3. Collect, measure and assess data including, but not limited to:
   a. Operative, other invasive, and noninvasive procedures that place patients at risk;
   b. Infection rates, pathogen distributions and antimicrobial susceptibility profiles;
   c. Death;
   d. Medication management or administration related to wrong medication, wrong dose, wrong time, near misses and any other medication errors and incidents;
   e. Injuries, falls, restraint use, negative health outcomes and incidents injurious to patients in the ambulatory surgical facility;
   f. Adverse events according to chapter 246-302 WAC;
   g. Discrepancies or patterns between preoperative and postoperative (including pathologic) diagnosis, including pathologic review of specimens removed during surgical or invasive procedures;
   h. Adverse drug reactions (as defined by the ambulatory surgical facility);
   i. Confirmed transfusion reactions;
   j. Patient grievances, needs, expectations, and satisfaction; and
   k. Quality control and risk management activities.
