

(Effective August 1, 2024)

WAC 246-366A-140 Water quality monitoring—Other drinking water contaminants. The local health officer may require:

- (1) Sampling of drinking water when public health concerns exist about drinking water contaminants other than lead or copper;
- (2) Corrective actions in response to sampling results for other contaminants; and
- (3) School officials to notify school facility staff, students and parents, and the local health officer about test results.
