**WAC 296-104-301**  Installation—What control and limit devices are required on automatically fired boilers after June 1989? In addition to those requirements listed in WAC 296-104-300, the following are also required:

1. All boilers that are automatically fired low pressure steam heating boilers, small power boilers, and power steam boilers without a constant attendant who has no other duties shall be equipped with:
   - Two high steam pressure limit controls, the highest of which shall be provided with a manual reset.
   - Two low-water fuel cutoffs, one of which shall be provided with a manual reset device and independent of the feed water controller.
   - Coil type flash steam boilers may use two high-temperature limit controls, one of which shall have a manual reset. This is instead of the low-water fuel cutoff.
   - All control and limit devices shall be independently connected and electrically wired in series.

2. All automatically fired hot water supply, low-pressure hot water heating boilers, and power hot water boilers shall be equipped with:
   - Two high-temperature limit controls, the highest of which shall be provided with a manual reset.
   - One low-water fuel cutoff with a manual reset and independent of the feed water controller.
   - For coil type hot water boilers a low-water flow limit control installed in the circulating water line may be used instead of a low-water fuel cutoff.
   - All control and limit devices shall be independently connected and electrically wired in series.

[Statutory Authority: Chapter 70.79 RCW. WSR 04-21-069, § 296-104-301, filed 10/19/04, effective 1/1/05.]
