WAC 296-17A-1301 Classification 1301.

1301-00 Electric light and power plants operated by cities, towns, or counties

Applies to establishments, operated by a city, town, or county, engaged in generating and distributing electricity to their residents. These may be hydroelectric, fossil fuel steam or turbo-generator plants. This classification includes the regular installation, maintenance and repair of power plant machinery and equipment, the extension and maintenance of lines (including poles, towers and underground lines), the installation and maintenance of circuit breakers and transformers on poles, pole-to-house hook-ups (service connections), meter installation and meter readers when done by employees of an employer having operations subject to this classification. Machinery and equipment may include, but not be limited to, boilers, turbines, generators, cables, transformers, switchgears, circuit breakers, control panels, substations, poles, lines, relays, computers, cranes, forklifts, vehicles and garages, warehouse equipment, meters and hand tools. Clerical office and administrative personnel are to be reported separately in classification 5305 for a city or town, or 5306 for a county.

This classification excludes contractors engaged in underground line construction maintenance or repair who are to be reported separately in classification 0107; contractors engaged in overhead line, pole and tower construction, maintenance or repair, who are to be reported separately in classification 0509; contractors engaged in wiring within buildings who are to be reported separately in classification 0601; contractors engaged in the installation of machinery or equipment who are to be reported separately in classification 0601 or 0603 as applicable; and the construction of any buildings which is to be reported separately in the applicable construction classification.

1301-01 Electric light and power cooperatives

Applies to establishments, in the form of cooperatives, engaged in generating and distributing electricity to their customers. A cooperative is formed by, and owned jointly by, those who make use of the service being provided. The power may be generated by a hydroelectric, fossil fuel steam or turbo-generator plant. This classification is appropriate whether a cooperative owns a power plant or is distributing power purchased from another utility company. Work contemplated by this classification includes the regular installation, maintenance and repair of power plant machinery and equipment, the extension and maintenance of lines (including poles, towers and underground lines), the installation and maintenance of circuit breakers and transformers on poles, pole-to-house hook-ups (service connections), meter installation and meter readers when done by employees of an employer having operations subject to this classification. Machinery and equipment may include, but not be limited to, boilers, turbines, generators, cables, transformers, switchgears, circuit breakers, control panels, substations, poles, lines, relays, computers, cranes, forklifts, vehicles and garages, warehouse equipment, meters and hand tools. Clerical office and administrative personnel are to be reported separately as appropriate for the ownership of the cooperative; 5305 for cities and towns; 5306 for counties; or 4904 and 6303 for nonmunicipal.

This classification excludes contractors engaged in underground line construction maintenance or repair who are to be reported separately in classification 0107; contractors engaged in overhead line, pole and tower construction, maintenance or repair, who are to be re-
ported separately in classification 0509; contractors engaged in wir-
ing within buildings who are to be reported separately in classifica-
tion 0601; contractors engaged in the installation of machinery or
equipment who are to be reported separately in classification 0601 or
0603 as applicable; and the construction of any buildings which is to
be reported separately in the applicable construction classification.

1301-02 Electric light and power plants operated by public utility
districts

Applies to establishments, in the form of a public utility dis-
trict (P.U.D.), engaged in generating and distributing electric power
to a part of a county. This classification applies whether a P.U.D.
owns a power plant or is distributing power purchased from another
utility. Work contemplated by this classification includes the regular
installation, maintenance and repair of power plant machinery and
equipment, the extension and maintenance of lines (including poles,
towers and underground lines), the installation and maintenance of
circuit breakers and transformers on poles, pole-to-house hook-ups
(service connections), meter installation and meter readers when done
by employees of an employer having operations subject to this classi-
fication. Machinery and equipment may include, but not be limited to,
boilers, turbines, generators, cables, transformers, switchgears, cir-
cuit breakers, control panels, substations, poles, lines, relays, com-
puters, cranes, forklifts, vehicles and garages, warehouse equipment,
meters and hand tools. Clerical office and administrative personnel
are to be reported separately in 5306.

This classification excludes contractors engaged in underground
line construction maintenance or repair who are to be reported sepa-
rately in classification 0107; contractors engaged in overhead line,
pole and tower construction, maintenance or repair, who are to be re-
ported separately in classification 0509; contractors engaged in wir-
ing within buildings who are to be reported separately in classifica-
tion 0601; contractors engaged in the installation of machinery or
equipment who are to be reported separately in classification 0601 or
0603 as applicable; and the construction of any buildings which is to
be reported separately in the applicable construction classification.

1301-05 Steam heat power plants

Applies to establishments engaged in the operation of a steam
heat power plant. These businesses use coal, oil, natural gases or
electric power to produce steam which is distributed through a network
of under or overground pipes to customers (the plant must be very near
the purchaser). The initial process of producing the steam is the same
as the process used in a steam powered electric generating plant, but
the steam is channeled out to the purchaser instead of being used to
turn turbines. The purchasers use the steam for heating buildings, op-
erating saunas, as a heat source for cooking or processing in food
processing plants, breweries or restaurants, producing the heat needed
for wood drying kilns, or to convert back to hot water. Work contem-
plated by this classification includes, but is not limited to, the
regular installation, maintenance or repair of plant machinery and
equipment, the extension and maintenance of over or underground pipes,
main-to-user hook-ups, meter installation and meter readers. Clerical
office and administrative personnel are to be reported separately as
appropriate for the ownership of the steam plant; 5305 for cities and
towns; 5306 for counties; or 4904 and 6303 for nonmunicipal.

This classification excludes contractors engaged in over or un-
derground pipeline construction, maintenance or repair, main-to-house
line extensions and hook-ups, who are to be reported separately in classification 0107; contractors engaged in the installation or contract maintenance of machinery or equipment who are to be reported separately in classification 0603; and the construction of any buildings which is to be reported separately in the applicable construction classification.
