An operator must:
(1) Construct, if provided TWH dwelling units, including common facilities, which must meet the following requirements:
   (a) Protect against the elements;
   (b) The State Building Code, chapter 19.27 RCW, or TWH construction standard, chapter 246-359 WAC; and
   (c) State and local ordinances, codes, and regulations.
(2) Prevent condensation in dwelling units and common facilities to the degree that it does not contribute to a health risk or safety issue to occupants.
(3) Prevent mold in dwelling units and common facilities.
(4) Provide a locking mechanism on the exterior door(s) of each family shelter. The mechanism must not prevent egress and must be easily opened from the inside without use of a key or special knowledge.
(5) Provide a locking mechanism on all bedroom doors, excluding doors to bedrooms housing more than fifteen occupants. The mechanism must not prevent egress and must be easily opened from the inside without use of a key or special knowledge.
(6) Provide a locking mechanism on:
   (a) Each toilet stall door, if provided; and
   (b) Each shower stall door, if provided.
(7) Identify each dwelling unit and space used for shelter by posting a number at each site.
(8) Maintain buildings in good repair and sanitary condition.
(9) Comply with all applicable state and federal laws and rules for lead based paint. For more information on lead, go to http://www.lni.wa.gov/Safety/Topics/AtoZ/Lead/Default.asp.
(10) Provide exits that are unobstructed and remain free of any material or matter where its presence would obstruct or render the exit hazardous.
(11) Provide habitable rooms with:
   (a) Windows covering a total area equal to at least one-tenth of the total floor space; and
   (b) At least one-half of each window can be opened to the outside for ventilation; or
   (c) Mechanical ventilation in accordance with applicable standards from the American Society of Heating, Refrigerating, and Air-conditioning Engineers (ASHRAE).
(12) Provide each room used for sleeping purposes with:
   (a) At least fifty square feet of floor space for each worker, not including any floor space in any portion of a room less than seven feet from the finished floor to the finished ceiling; and
   (b) Windows covering a total area equal to at least one-tenth of the floor space within the surrounding walls of the sleep room.
(13) Provide each room used for sleeping and cooking purposes:
   (a) Meet the requirements of subsection (12) of this section;
   (b) At least one hundred square feet of floor space per temporary worker; and
   (c) For a family shelter constructed or approved for construction under chapter 246-359 WAC before January 1, 2016, one hundred square feet of floor space per temporary worker is required by January 1, 2019. Upon the operator's request, the department of health may grant an extension(s) for up to three additional years. Requests must:
   (i) Include a schedule and work plan for achieving compliance;
   (ii) Be on a form provided by the department of health; and
(iii) Be submitted to the department of health prior to January 1, 2019.

(14) Ensure wooden floors are at least one foot above ground level or meet the requirements in the State Building Code, chapter 19.27 RCW or Temporary worker housing construction standard, chapter 246-359 WAC.

(15) Provide sixteen-mesh screening on all exterior openings and screen doors with self-closing devices.

(16) Provide and maintain screen doors on all exterior entrances that:

(a) Have self-closing devices; and

(b) Close without gaps that would allow entry of pests.

(17) Install all heating, cooking, and water heating equipment according to state and local ordinances, codes, and regulations and maintain in a safe condition.

(18) Provide habitable rooms with equipment capable of maintaining a temperature of at least seventy degrees Fahrenheit during cold weather.

(19) Ensure that all recreational vehicles and park trailers meet the requirements as defined in this chapter.
