WAC 296-307-30009  How must other power transmission components of farmstead equipment be guarded?  (1) All power transmission parts must be guarded according to WAC 296-307-280.

(2) Smooth shafts and shaft ends (without any projecting bolts, keys, or set screws) may be unguarded if they:
(a) Revolve at less than 10 RPM; and
(b) Are part of feed handling equipment used on the top surface of materials in bulk storage facilities.
