Use red to identify:

1. Fire protection equipment;
2. Safety cans or other portable containers of flammable liquids;
3. Danger signs and tags;
4. Emergency stop bars on hazardous machines; and
5. Stop buttons or electrical switches used to stop machinery in an emergency;

Red lights must be provided at barricades and at temporary obstructions, as specified in ANSI Safety Code for Building Construction, A10.2-1944.
