WAC 296-307-40039  What requirements apply to electrical equip-
ment and wiring?  (1) Electrical equipment and wiring for use in ammo-
nia installations must be general purpose or weather resistant as ap-
propriate.

(2) Where concentrations of ammonia in the air in excess of 16% by volume are likely to be encountered, electrical equipment and wir-
ing must be specified by and installed according to chapter 296-307 WAC Part T, for Class I, Group D locations.
