WAC 296-806-43010  Protect employees when removing scale.  You must protect employees at every hammer and press by:

(1) Making sure they do not place a hand or arm between the dies by providing them with devices that reach the full length of the die when removing scale. Examples include:
   (a) Oil swabs.
   (b) Scale removers.
   (c) Other devices that remove scale by reaching the full length of the die.

(2) Stopping flying scale through construction and arrangement of a scale guard that is of substantial construction at the back of every hammer and press.
