WAC 388-829C-330 Must a companion home provider regulate the water temperature at the companion home? The companion home provider must:

1. Maintain the water temperature in the home no higher than 120 degrees Fahrenheit;
2. Check the water temperature when the client moves into the home and monthly thereafter; and
3. Document compliance with this requirement under WAC 388-829C-345.
