STYLE AND FORMAT OF THE WASHINGTON STATE REGISTER

1. ARRANGEMENT OF THE REGISTER

Documents are arranged within each issue of the Register according to the order in which they are filed in the code reviser's office during the pertinent filing period. The three part number in the heading distinctively identifies each document, and the last part of the number indicates the filing sequence within an issue's material.

2. PROPOSED, ADOPTED, AND EMERGENCY RULES OF STATE AGENCIES AND INSTITUTIONS OF HIGHER EDUCATION

The three types of rule-making actions taken under the Administrative Procedure Act (chapter 34.04 RCW) or the Higher Education Administrative Procedure Act (chapter 28B.19 RCW) may be distinguished by the size and style of type in which they appear.

- (a) **Proposed rules** are those rules pending permanent adoption by an agency and set forth in eight point type.
- (b) **Adopted rules** have been permanently adopted and are set forth in ten point type.
- (c) **Emergency rules** *have been adopted on an emergency basis and are set forth in ten point oblique type.*

3. PRINTING STYLE—INDICATION OF NEW OR DELETED MATTER

RCW 34.04.058 requires the use of certain marks to indicate amendments to existing agency rules. This style quickly and graphically portrays the current changes to existing rules as follows:

- (a) In amendatory sections—
 - (i) underlined matter is new matter;
 - (ii) ~~deleted matter is ((lined out and bracketed between double parentheses))~~;
- (b) Complete new sections are prefaced by the heading NEW SECTION;
- (c) The repeal of an entire section is shown by listing its WAC section number and caption under the heading REPEALER.

4. EXECUTIVE ORDERS, COURT RULES, NOTICES OF PUBLIC MEETINGS

Material contained in the Register other than rule-making actions taken under the APA or the HEAPA does not necessarily conform to the style and format conventions described above. The headings of these other types of material have been edited for uniformity of style; otherwise the items are shown as nearly as possible in the form submitted to the code reviser's office.

5. EFFECTIVE DATE OF RULES

- (a) Permanently adopted agency rules take effect thirty days after the rules and the agency order adopting them are filed with the code reviser. This effective date may be delayed, but not advanced, and a delayed effective date will be noted in the promulgation statement preceding the text of the rule.
- (b) Emergency rules take effect upon filing with the code reviser and remain effective for a maximum of ninety days from that date.
- (c) Rules of the state Supreme Court generally contain an effective date clause in the order adopting the rules.

6. EDITORIAL CORRECTIONS

Material inserted by the code reviser for purposes of clarification or correction or to show the source or history of a document is enclosed in brackets [].

7. INDEX AND TABLES

A combined subject matter and agency index and a table of WAC sections affected may be found at the end of each issue.

~~A significant deficit is indicated by test scores showing that the student is one year or more below his or her potential at or below the first and second grade levels; two years or more below at the third and fourth grade levels, and three years or more below at or beyond the fifth grade level. PROVIDED, That a student shall be eligible for special education and related services only with respect to the area or areas in which the student functions below the minimum grade level.~~

(3) ~~The student does not qualify for placement in any other disability category set forth in this chapter.)~~ Assessment procedures and eligibility standards: All students considered for initial or continued placement in special education as specific learning disabled shall be assessed by a multidisciplinary team and shall be deemed eligible for placement in a special education program in accordance with the following procedures and criteria:

(1) A current assessment of intellectual functioning shall be obtained from a standardized individual test designed to measure intellectual functioning, individually administered and interpreted by a qualified psychologist and attested to as to validity. The measured level of intellectual functioning must be near normal or above; and

(2) A current assessment of level of academic achievement shall be measured by standardized test(s) appropriate to age level and administered individually. The student's Chronological Age/Grade (CAG) performance in one or more of the academic achievement areas provided for in the definition shall be adjusted for expectations due to variance in intellectual functioning. The expected performance adjusted for intellectual functioning shall then be compared to the results of the actual achievement measures, the results of which must yield:

(a) A functioning level of two-thirds or below of expected performance; and

(b) A functioning level below chronological age/grade. Those students unable to score within test norms on standardized academic achievement measures shall be assessed using individually administered standardized school readiness tests, professionally recognized developmental scales, and

(3) A current assessment of perceptual, perceptual-motor or language functioning shall be obtained, the results of which show a deficit of greater than or equal to 1 1/2 standard deviations below the mean or a functioning level of 2/3 or below Chronological Age/Grade Performance in one or more of the following:

- (a) Visual processing:

- (i) discrimination; or
- (ii) closure; or
- (iii) memory; or
- (iv) sequencing; or
- (v) association; or
- (vi) integration.
- (b) Auditory processing:
 - (i) discrimination; or
 - (ii) closure; or
 - (iii) memory; or
 - (iv) sequencing; or
 - (v) association; or
 - (vi) integration.
- (c) Haptic processing:
 - (i) kinesthetic; or
 - (ii) tactile.
- (d) Sensory integration/association:
 - (i) visual-motor; or
 - (ii) visual-auditory (vocal); or
 - (iii) auditory-motor; or
 - (iv) receptive language; or
 - (v) expressive language.

For students whose chronological age placement is seventh grade or above, neither the visual nor auditory deficit is required as a condition to the eligibility; and

(4) A current psychological assessment which considers and describes the student's social and emotional behaviors and which provides any implications for educational planning shall be obtained. This assessment shall be of sufficient scope to rule out severe behavioral disability, environmental, cultural background, or economic disadvantage as an explanation for educational delay; and

(5) A current vision and hearing screening report shall be obtained; and

(6) A written record of observation and measurement of the student's academic performance and classroom behavior in the regular classroom shall be made by a member of the assessment team other than the regular classroom teacher pursuant to WAC 392-171-410.

(7) The results of the intellectual, achievement and perceptual/language measures along with the psychological assessment and the vision and hearing screening and classroom observation shall be reviewed by the multidisciplinary team. The multidisciplinary team shall prepare a written report of the results of the assessment pursuant to WAC 392-171-415.

NEW SECTION

WAC 392-171-356 SPECIFIC LEARNING DISABILITY—EXCEPTIONS TO GENERAL ELIGIBILITY CRITERIA. Where the results of the intellectual, academic, or perceptual/language measures provided for in WAC 392-171-355 do not document a specific learning disability, the multidisciplinary team, when it is deemed advisable by the team, may deviate from the criteria set forth in WAC 392-171-355 within the standard error of measurement of the selected assessment instrument(s) and determine the appropriateness of placement in a special education program: PROVIDED, That once the required assessment procedures are concluded, the assessment team shall prepare a

written report which identifies the degree to which the assessment findings deviate from the criteria, describes the student's specific learning disability as evidenced by the assessment findings and any implications for educational planning. The written report shall also address all requirements stated in WAC 392-171-415, and be signed by the school district superintendent or his/her designee. Students placed under these conditions shall be reassessed annually to determine their need for special education and related services.

EMERGENCY RULES DEPARTMENT OF FISHERIES [Order 79-123—Filed November 9, 1979]

I, Gordon Sandison, director of State Department of Fisheries, do promulgate and adopt at Olympia, Washington, the annexed rules relating to commercial fishing regulations.

I, Gordon Sandison, find that an emergency exists and that the foregoing order is necessary for the preservation of the public health, safety, or general welfare and that observance of the requirements of notice and opportunity to present views on the proposed action would be contrary to public interest. A statement of the facts constituting such emergency is closures in Area 8 and the Skagit River are temporarily rescinded to allow an evaluation fishery to assess Skagit River chum salmon run size. Analyses of test fishing results indicate a harvestable surplus of chum bound for the Hoodspout Hatchery. A closed area around the hatchery is necessary to ensure the hatchery escapement goal will be met. The Puyallup and Big Quilcene Rivers are closed to protect chum salmon. The Nisqually River is closed to protect coho and chum salmon.

Such rules are therefore adopted as emergency rules to take effect upon filing with the code reviser.

This rule is promulgated pursuant to RCW 75.08.080 and is intended to administratively implement that statute.

The undersigned hereby declares that he has complied with the provisions of the Open Public Meetings Act (chapter 42.30 RCW), the Administrative Procedure Act (chapter 34.04 RCW) or the Higher Education Administrative Procedure Act (chapter 28B.19 RCW), as appropriate, and the State Register Act (chapter 34.08 RCW).

AMENDATORY SECTION (Amending Order #109, filed 9/7/77)

WAC 356-15-130 SPECIAL PAY RANGES. Classes to which a special range applies are marked with the applicable letter designation after their range number in the Compensation Plan.

Special pay ranges are used to more nearly parallel unusual prevailing pay ranges in other governmental jurisdictions and in private industry.

(1) ~~(((A, B, C, D and)))~~ E Range~~((s))~~: ~~(((These)))~~ This range~~((s))~~ ~~(((are)))~~ is used for classes having a prevailing pay range which is shorter than Washington's standard ranges. An ~~(((A, B, C, D or)))~~ E range is a standard range with the first ~~((two))~~ four steps removed. Thus, the minimum step of such a range is the same as ~~(((the third)))~~ step E of the standard range having the same range number. Periodic increases through the steps of ~~(((these)))~~ this range~~((s))~~ are made at the same time intervals as through standard ranges, i.e., a ~~(((one)))~~ two-step increase after 6 months at step E and ~~(((one)))~~ two annually thereafter up to the maximum step of the range.

(2) ~~(((K)))~~ L Range: This special ~~(((four-step)))~~ range is used only for the class of Liquor Store Clerk (0628). The ~~(((K)))~~ L range was designed to more closely parallel the prevailing pay structure for retail clerks in private industry. ~~(((For this reason, the four steps of the "K" range are patterned as shown in the example below. The example is for range 21K. (The dollar signs represent standard steps in the Salary Schedule, the numbers in the far left column represent standard range numbers, the arrows represent the periodic increases for the "K" range, and the underlined numbers represent the step numbers for the "K" range:)))~~ Periodic increases through the steps of the ~~(((K)))~~ L range are made at the same time intervals as through a standard range. Normal progression is steps A, D, G and K, which represents ten percent per periodic increase.

Chapter 204-70

Standards for Vehicle Connecting Devices and Towing Methods

NEW SECTION

WAC 204-70-010 PROMULGATION. By authority of RCW 46.37.005 and RCW 46.37.320, the State Commission on Equipment hereby adopts the following regulations pertaining to vehicle connecting devices and towing methods.

NEW SECTION

WAC 204-70-020 PURPOSE. The purpose of this regulation is to provide this state with a uniform minimum requirement for motor vehicle connecting devices and towing methods. It is designed to increase highway safety by reducing towing and hitch related accidents. This regulation is not intended to cover the fifth wheel type of connecting device or towing method. Pintle hook type devices shall also be excluded from this chapter, except that the safety chain requirements shall apply.

NEW SECTION

WAC 204-70-030 SCOPE. (1) The scope of this regulation is directed to the regulation of trailer hitches and towing devices, towing methods, testing methods, certification requirements, installation, compliance and other requirements as herein defined in these regulations.

(2) After the effective date of this regulation, no primary connecting system used for drawing a trailer or semi-trailer having a gross vehicle weight of 10,000 pounds or less upon the public highways of this state shall be sold, offered for sale, or installed for service unless it is a type approved by the commission. The safety chain requirements of this chapter shall apply to all primary coupling systems designed for towing trailers and semi-trailers having a gross vehicle weight of 10,000 pounds or less regardless of the date of installation of such primary coupling system. Accordingly, the commission establishes this regulation relating to vehicle connecting arrangements used for drawing trailers by mechanical power on the public highways. This regulation is not for those arrangements used for drawing another vehicle by means of a tow truck or wrecker unless coupled by ball and hitch, or a semi-trailer with a fifth wheel type hitch.

NEW SECTION

WAC 204-70-040 DEFINITIONS. (1) The term "commission" as hereinafter referred to within this regulation shall mean the State Commission on Equipment.

(2) "Chain Attaching Means" means the bolt, hook, pin, hole, eye, clevis, bracket, bar or any other device mounted on and used for anchoring or attaching safety chains to the towed or towing vehicle or hitch.

(3) "Coupling" means that part of the primary connecting system normally mounted on the trailer, such as a socket, by which the connection is actually made and including the supporting attachment to the trailer frame.

(4) "Family of Hitches" means a series of hitches produced by a single manufacturer which have similar traits and characteristics in common with each other. Each regulated manufacturer shall determine which hitches may be appropriately included in a particular family, subject to review by the commission. The necessary criteria which all hitches included within a family must exhibit are as follows:

- (a) similarity of design,
- (b) similar materials of construction,
- (c) similar means of attachment to the towing vehicle, and
- (d) similar strength and performance characteristics.

(5) "Gross Vehicle Weight Rating (GVWR)" means the value specified by the vehicle manufacturer as the loaded weight of a single vehicle.

(6) "Hitch," defined for specific uses under (a) and (b) below, generally means that part of the primary connecting system normally mounted on the towing vehicle, including a ball-support platform and those components which are attached to the towing vehicle.

(a) "Weight Distributing Hitch" means a mechanical device that connects the trailer to the towing vehicle, and by means of a leverage applied on both trailer and car structures or axles, when properly adjusted, distributes the imposed vertical load at the hitch and coupling connection between the structures or axles of towing vehicle and trailer. The towing vehicle thus loaded tends to retain a level position with respect to the road.

(b) "Weight Carrying Hitch" means a mechanical and/or structural device that connects the trailer to the towing vehicle, and that does not employ features designed to redistribute the load imposed at the hitch and coupling connection. Weight carrying hitches may be designed for bolting or other attachment to the towing vehicle frame, unitized body, bumper structure, or to a combination of these or other points which meet the requirements of WAC 204-70-060(3) and Table 2.

(7) "Maximum Gross Trailer Weight (MGTW)" means the weight of the trailer plus the weight of all cargo, consumables, and equipment loaded on the trailer when in an actual underway towing condition.

(8) "Maximum Vertical Load on Hitch (Tongue Weight)" means the vertical downward static force exerted on the hitch by the coupling at the point of connection of coupling and hitch, with weight distribution features or devices, if any, deactivated. Tongue weight is measured at the trailer coupling, with the trailer on a level surface (detached from the hitch), and with trailer consumables and cargo in maximum loaded conditions.

(9) "Primary Connecting System" means the combination of devices and their attaching structures that are normally utilized to maintain the connection between towing vehicle and trailer during towing operations. This includes, but is not limited to, the ball-and-socket type of connection or draft means. Note: This does not include a safety chain, which is part of a secondary system normally utilized only upon failure of the primary connection, nor does it include weight distributing or sway control features or devices whose function is accessory to the maintenance of the towing vehicle-trailer connection.

(10) "Safety Chains" means flexible tension members connected from the front portion of the towed vehicle to the rear portion of the towing vehicle for the purpose of retaining connection between towed and towing vehicle in the event of failure of the connection provided by the primary connecting system. The term "safety chains" includes not only chains, cable, or wire ropes, but also any splice, clamp, socket, snap, eye, ring, thimble, pin or other fastening device or forming method which is part of the assembly of any such flexible tension member.

NEW SECTION

WAC 204-70-050 LIGHT SERVICE DEVICES AND SYSTEMS. These are for use with trailers not exceeding 10,000 pounds gross vehicle weight rating. This includes, but is not limited to, such types as the utility, boat, camping, travel and other trailers which are normally towed by the conventional passenger car, or similarly constructed vehicle or light-duty truck. This section is intended basically for the ball-and-socket type of primary connecting system, but is not necessarily limited to this type alone.

(1) Trailer Classification

(a) Class 1—Trailers, with a gross weight (trailer weight including load) not exceeding 2,000 pounds.

(b) Class 2—Trailers, with a gross weight (trailer weight including load) over 2,000 pounds, but not exceeding 3,500 pounds.

(c) Class 3—Trailers, with a gross weight (trailer weight including load) over 3,500 pounds, but not exceeding 5,000 pounds.

(d) Class 4—Trailers, with a gross weight (trailer weight including load) over 5,000 pounds, but not exceeding 10,000 pounds.

(2) Couplings

(a) Coupling Classification. There shall be four major strength classifications, or designations of couplings. The designation shall be based on the maximum gross trailer weight (MGTW) the coupling is qualified to tow. The No. 1 couplings shall be used for towing Class 1 trailers; No. 2 couplings for Class 2 or smaller trailers; No. 3 couplings for Class 3 or smaller trailers; and No. 4 couplings for Class 4 or smaller trailers. This is not intended to limit the number or variety of couplings in a given class or designation.

(b) Coupling Ultimate Strength. Each coupling and hitch ball, when subjected to static bench tests in a rigid, nonyielding test fixture, shall withstand the test loads specified in Table 1 without incurring failure. For purposes of this regulation, failure occurs at the point at which the coupling or ball will accept no additional test load.

(c) Coupling and Hitch Ball Test Procedure. A new coupling or ball shall be used for each mode of load application. Each type of test load is to be applied individually to one component at a time, utilizing a nonyielding test fixture similar in design to the typical test fixture illustrated in Figure 1. When testing a coupling, a hardened ball shall be used; when testing a ball, a hardened coupling shall be used.

(d) Attachment of Couplings. Each coupling is to be mounted to the trailer attaching member by bolting, welding or riveting in such manner that the towing loads are safely and adequately transferred to that member.

(e) Provisions for Safety.

(i) Each coupling, regardless of classification or designation, must be equipped with a manually operated mechanism so adapted as to prevent disengagement of the unit while in operation. In addition to this positive locking mechanism, the coupling shall be so designed that the trailer can be disconnected from the towing vehicle regardless of the angle of the trailer to the towing vehicle.

(ii) Each hitch ball shall be equipped and installed with a lock washer or equivalent device, and each replacement hitch ball shall be marketed with a lock washer or equivalent device with instructions as to proper installation provided by the responsible manufacturer.

NEW SECTION

WAC 204-70-060 HITCHES. (1) Hitch Rating. Hitches shall be rated by the maximum gross trailer weight (MGTW) and the maximum vertical load on hitch (tongue weight) each is qualified to tow.

(2) Hitch Strength Requirements. Each hitch, when subjected to a static bench test, shall conform to the minimum strength requirements contained in Table 2.

(3) Attachment of Hitch. Each hitch shall be attached to the structural member or members of the towing vehicle in such a manner that the tension, compression and transverse thrust loads shown in Table 2 are transferred to the towing vehicle without residual distortion or failure of either the attachment or the vehicle structure which would affect the safe towing of trailers as defined in Table 2.

(4) Maximum Vertical Load on Hitch (Tongue Weight). The weight load carried by the hitch at its connection with the trailer coupling shall not, when on a level surface, exceed the maximum tongue weight load recommended by the manufacturer for the hitch.

NEW SECTION

WAC 204-70-070. SAFETY CHAINS AND ATTACHING MEANS REQUIRED. (1) Strength Requirements. Each safety chain and each attaching means shall meet strength requirements as shown in WAC 204-70-99004, Tables 3 and 4, and defined in WAC 204-70-040.

(2) Installation and Connections. The means of attachment of safety chains shall be located equally distant from and on opposite sides of the longitudinal centerline of the towing vehicle and of the trailer. Each means of attachment shall not be common with or utilize fasteners common with a ball or coupling. No welding operation shall be performed on a safety chain subsequent to this manufacture, including the method of attachment to the towed and towing vehicles. Safety chains shall be so connected that the slack for each length of chain between trailer and towing vehicle is the same and is not more than necessary to permit the proper turning of the vehicles. When passing

forward to the towing vehicle, safety chains must be crossed in such a manner as to prevent the tongue from dropping to the ground and to maintain connection in the event of failure of the primary connecting system. See Figure 3. WAC 204-70-99005.

(a) Every towed vehicle shall be coupled to the towing vehicle by means of two safety chains, cables, or wire ropes in addition to the regular drawbar, tongue, or other connection. Safety chains, cables, or equivalent devices may be attached to permanently installed hitch components if the components meet the strength requirements of WAC 204-70-99004, Tables 3 and 4.

(b) Safety chain connections shall not be made to the hitch ball or to a ball mount designed to be readily removable when not in use.

NEW SECTION

WAC 204-70-080 IDENTIFICATION. (1) Device and Component Marking. Each coupling and each hitch shall be legibly and permanently marked (so as to be visible to consumers and any regulatory authority viewing the coupling and hitch as installed on a vehicle) on at least one hitch component or related component marketed with the hitch, as shown below. When hitch components (except hitch balls and their hardware) are marketed separately, the following markings must also appear on at least one of the components in the package or marketing unit.

(a) Manufacturer's or distributor's name, initials, trademark, trade name or code symbol. (Code symbol shall mean one assigned and approved by appropriate regulatory authority.)

(b) Model number, part number, or style; and, for couplings only, the class.

(c) Maximum Gross Trailer Weight (MGTW) to be drawn.

(d) Maximum vertical load on hitch (tongue weight) to be imposed on the ball or other points of connection.

(e) The symbol V-5. Note: Placement of the symbol V-5 on any coupling or any hitch indicates certification of compliance of the product on which the symbol is placed with all requirements contained in WESC Regulation V-5.

(2) Hitch Ball Marking. Each hitch ball sold for use in a primary connecting system shall be permanently and legibly marked to show both the spherical diameter of the ball; e.g., 1-7/8", 2", etc., and the maximum gross trailer weight (MGTW) which it is designed to draw.

(3) Labelling. Each crate, box, or other container in which a coupling or hitch is packed shall be imprinted or labelled to display at least the same information required in WAC 204-70-080(1) for marking, except that the maximum gross trailer weight (MGTW) to be drawn must be shown for each coupling regardless of class. Further, the year, make, and model of each vehicle on which a hitch may be installed and meet the requirements of this regulation shall be shown but may be shown on an enclosed sheet, or sheets, separate from the imprintation, or labelling, or on hitch manufacturer's application tables which are kept available at the locations where the device or system is sold, either for resale or for use. However, the provision contained in the preceding sentence shall not apply to hitches adaptable to a large number of vehicles and designated to be a universal type.

NEW SECTION

WAC 204-70-090 IDENTIFICATION, INSTALLATION, MAINTENANCE AND COMPLIANCE. (1) Marking and Labelling. Each vehicle connecting device, method system shall be marked and labelled as required by WAC 204-70-080 and WAC 204-70-100(2). The marking and labelling shall show the responsible manufacturer (see (3) of this section.) A pressure sensitive label will be acceptable if of a weather-resistant type which cannot be removed without destroying or defacing it.

(2) Installation and Maintenance.

(a) Manufacturer, Packager, Seller. The responsible manufacturer or seller of a vehicle primary connecting device or system shall provide with the device, or with devices making up or used in the system, clear and complete consumer instructions for use, maintenance and repair; and, where the device or system is not actually installed by the dealer, installation instructions, in accordance with the requirements of this regulation, and proper instruction of the purchaser, or owner, in use and care.

(b) Owner, Lessor, Lessee, Borrower. Each owner or lessor shall keep his connecting devices, and systems in good condition, maintained, repaired, and rebuilt in accordance with manufacturer's instructions and recommendations. Each owner or lessor who leases or lends a connecting device or system, shall properly instruct the lessee,

or recipient, in the safe and proper use and care for the device(s), or system. Each lessee or borrower shall use and maintain the device, method or system in accordance with the instructions of the lessor or lender. For the purposes of this regulation any person who rents a trailer shall be considered to be a lessor.

(c) No person shall put into use or continue in use a device or system on which the marking required in WAC 204-70-090(1) has been removed, altered, obliterated, disfigured, or otherwise damaged so as to prevent identification of the device(s), method(s) or system(s).

(3) Compliance with Requirements. Each manufacturer shall be responsible for the performance ability of the device(s) or system which he manufactures for use by a prospective owner, lessee, or borrower. Where a manufacturer, packager, or seller assembles or packages (unites, collects, aggregates) for use by a prospective owner, lessee, or borrower a device or system from parts, subassemblies or assemblies made or assembled by others, such manufacturer, packager, or seller (person, firm, association or corporation) shall be deemed responsible for the performance of the device(s) or system which he assembles or packages. For the purpose of this section, each manufacturer, packager, or seller described in the preceding two sentences shall be known as the "responsible manufacturer".

Reviser's Note: The typographical errors in the above section occurred in the copy filed by the agency and appear herein pursuant to the requirements of RCW 34.08.040.

NEW SECTION

WAC 204-70-100 CERTIFICATION AND/OR TESTING. (1) Each responsible manufacturer shall certify to the commission or to an equipment approval program or other agency designated by the commission that each of his devices or systems, when installed in accordance with his published instructions (including instructions of manufacturers of weight distributing hitches for use by local installers who fabricate the undercar attachments means for such hitches), complies with and meets the requirements of this regulation. Such certification shall be corroborated by submission of a properly executed Product and Certification Test Report form containing test results and required certifications, accompanied by photographs of the test site and equipment and a concise description of the test methodology followed. The format for this report is incorporated herein as WAC 204-70-120. To demonstrate compliance with this regulation, the necessary tests shall be conducted by or supervised by an approved certified laboratory or an approved certified testing organization, and the officer or employee of the approved certified testing organization who personally conducted or supervised the testing shall execute the appropriate certification statement contained in the Product and Certification Test Report.

(2) Registration. No vehicle connecting device or system shall be sold within the State of Washington unless the responsible manufacturer has registered his product with the commission, has furnished the commission five copies of instructions for installation (as applicable), use, maintenance and repair, and has stated the maximum towing capacity of his product in terms of the maximum gross trailer weight (MGTW) to be drawn, as measured in accordance with the provisions of WAC 204-70-050(3) and WAC 204-70-060. There shall be imprinted on each copy of instructions provided with the device or otherwise furnished to the owner the following statement: "This product complies with Regulation V-5." The responsible manufacturer of light Service Class 1 connecting devices or systems for trailers not exceeding 2,000 pounds gross weight who produces not more than five (5) such devices or systems in one calendar year must produce a product which complies with all applicable requirements of this regulation, except the requirements of this subsection.

(3) In lieu of the registration required in WAC 204-70-100(2), vehicle connecting devices or systems shall be considered to be registered if they appear as an approved device in the American Association of Motor Vehicle Administrators' "Approved Vehicle Devices Handbook": Provided, however, that such testing conducted for the approval found the device to be in full conformance with VESC Regulation V-5.

NEW SECTION

WAC 204-70-110 APPROVED DEVICES. Devices described in this regulation shall be considered approved by the commission when they are registered as required in WAC 204-70-100(2) or WAC 204-70-100(3).

(3) Footnotes to Table 2 and Figure 2.

(a) When a hitch is to be tested:

(i) Assemble the hitch in its normal configuration as recommended by the hitch manufacturer.

(ii) Attach the hitch to a non-yielding restraining fixture. The hitch-to-fixture attaching means must be the same as the normal hitch-to-car attaching means recommended by the hitch manufacturer.

(iii) The points of hitch-to-fixture attachment must be located in the same positions as the hitch-to-car attachment point locations recommended by the hitch manufacturer.

(iv) Attach a ball to the ball support platform in the manner recommended by the hitch manufacturer.

(b) Hitch Test Force Applications. With the hitch attached to the test fixture as specified in footnote (a), apply the forces designated in Table 2, in any sequence, as follows:

(i) Apply the specified downward vertical force concurrently with the specified compressive longitudinal force or spring bar moment.

(ii) Apply the specified tensile longitudinal force concurrently with the specified downward vertical force.

(iii) Apply the specified compressive longitudinal force concurrently with the specified downward vertical.

(iv) Apply the specified leftward transverse force.

(v) Apply the specified rightward transverse force.

(vi) For hitches with weight distributing capability, apply the specified spring bar, or leveling moment, (leveling force couple) concurrently with the specified downward vertical force.

All forces in steps (i) through (iii) are to be applied along an axis which intersects the center of the ball. All forces are to be applied with an onset rate of not more than 150 pounds per second, and maintained at the maximum specified force level for at least five seconds.

(c) Each hitch, when tested as specified above, shall be capable of withstanding the forces applied in accordance with footnote (b) without causing permanent deformation of the ball platform, such that the final position of the ball axis shall not depart more than five degrees from its original, nominally vertical position.

EXECUTIVE ORDER
OFFICE OF THE GOVERNOR
[EO 79-09]

REOPENING THE HANFORD, WASHINGTON
WASTE DISPOSAL SITE

WHEREAS, on October 4, 1979, a proclamation was issued by Governor Dixy Lee Ray, pursuant to statutory authority, declaring a state of emergency and the temporary closure of the Hanford, Washington low-level nuclear waste site; and

WHEREAS, said proclamation was found necessary to protect the life, health, safety, and property of the people of the State of Washington, resulting from the serious deficiencies in the packaging and transportation of low-level nuclear waste materials destined for delivery at the Hanford Works; and

WHEREAS, since the closure of the Hanford facility, a number of important steps have been taken by the administration through personal action of the Governor, the State Energy Office and other state agencies resulting in the following assurances:

(a) Commitment by the United States Nuclear Regulatory Commission and the United States Department of Transportation for funds to train state personnel as additional inspectors. Further, that these departments will increase their respective enforcement powers over low-waste producers and shippers.

(b) A stepped up inspection and enforcement program, through the Washington State Patrol, of carriers of waste materials.

(c) A system of certification through the Department of Social and Health Services that requires more stringent and effective warranties and indemnification provisions.

(d) An inter-state agreement between the States of Washington, Nevada and South Carolina, that will provide that violations of rules and regulations in one state will result in suspension in each of the other states of the use of that state's site

(e) Congressional action in the authorization and location of additional low-level sites and the recognition that nuclear waste disposal is a federal, as well as, a state responsibility; and

WHEREAS, through the concerted actions of the Governors of the States of Washington, Nevada, and South Carolina, the nation's attention and the attention of the remaining Governors of the other states has been drawn to the need for each state to participate in the handling of low-level nuclear waste material, and for the Congress to take immediate steps for the location of additional sites; and

WHEREAS, there is an immediate need and a vital interest within the nation's medical institutions and research communities to establish storage sites for low-level radioactive residue, and there is recognition on the part of the medical fraternity that such materials must be properly packaged before disposal at such sites; and

WHEREAS, the Hanford site has been operated by Nuclear Engineering Company through a lease agreement with the State of Washington, and that said company has properly and safely operated said site but that certain provisions of the lease needed to be updated concerning increased perpetual care and maintenance payments, indemnity requirements, and other changes, and these things being now mutually agreed upon; and

WHEREAS, Nuclear Engineering Company, has agreed that upon a reopening of the site it will provide express service to it's regular Washington State customers, mainly hospitals and research institutions, upon application by the company for a Site Use Permit and provided an appropriate temporary waiver by the State of the conditions of this executive order is confirmed; and

WHEREAS, the Governor of Washington is authorized to issue orders to protect the public health and safety interests of the people and environment of the State of Washington.

NOW, THEREFORE, I, Dixy Lee Ray, Governor of the State of Washington, pursuant to the powers vested in me and in protection of the public health and safety, do hereby order that:

1. Any person who generates or packages commercial low-level radioactive waste for disposal at the Hanford, Washington facility shall be required to provide to the State of Washington a Compliance Certificate that shall be signed by an authorized representative of the generator or packager and shall warrant to the State of Washington that the waste shipment was inspected within forty-eight (48) hours prior to shipment and conforms in all respects to both Federal and State requirements for shipment, transportation and disposal. Said certification shall accompany each shipment of waste materials shipped to the Hanford, Washington facility. The generator or packager shall indemnify and hold harmless the State of Washington from any and all claims, suits, losses, damages or expenses on account of injuries to any and all persons whomsoever, and any and all property damage, arising or growing out of or in any manner for the failure of the generator/packager to comply with the warranties set forth herein.
2. Any broker, shipping and/or transporting commercial low-level radioactive waste into the State of Washington for disposal at the Hanford, Washington facility from the broker's warehouse facility, or any other independent intermediate point or facility, shall be required to conduct an external visual and dose-rate inspection of said packaged waste materials within forty-eight (48) hours prior to shipment or transport, and shall be required to certify to the State of Washington that said inspections have been conducted and revealed no items of non-compliance with all applicable laws, rules and regulations. Said certification shall accompany each shipment of waste shipped to the Hanford, Washington facility, and shall indemnify and hold harmless the State of Washington from any and all claims, suits, damages, or expenses on account of injuries to or death of any and all persons whomsoever, and any and all property damage, arising or growing out of or in any manner for the failure of the broker to comply with the warranties set forth herein. Broker shall mean, for the purpose of this section, any person, who acts as an agency or intermediary for a generator/packager or another person, provided it shall not include a carrier whose sole function is to transport low-level waste, a generator/packager of a low-level waste, or a low-level radioactive waste disposal site operator.

Any carrier, as defined by the United States Department of Transportation (DOT) Regulations, transporting commercial low-level radioactive waste into the State of Washington for disposal at the Hanford, Washington facility shall give at least four (4) hours but not more than forty-eight (48) hours advance notice in writing to the State of the intended movement of a shipment within, or the arrival from without the State, of low-level radioactive waste, and shall be required to certify to the State of Washington that the transportation vehicle is properly placarded and secured for transport and that all shipping papers are as required by the United States Department of Transportation, and all other applicable regulations and orders have been properly executed and delivered to said carrier, and said carrier certification shall accompany each load of waste transported to the Hanford, Washington facility.
4. The Department of Social and Health Services (DSHS) is hereby ordered to adopt Emergency Regulations for a Site Use Permit for the purpose of assisting in the correction of the conditions resulting in the Emergency Condition specified in the Governor's Proclamation dated October 4, 1979, said Emergency Regulations to be in accordance with the guidelines consistent with this Executive Order. EMERGENCY RULES
DEPARTMENT OF TRANSPORTATION
[Order 41—Filed November 26, 1979]

I, W. A. Bulley, Secretary of Transportation, do promulgate and adopt at Room 1D9, Highway Administration Building, Olympia, Washington, the annexed rules relating to no stopping, standing or parking is permitted along the south and west side of State Route 125 adjacent to Walla Walla Penitentiary, new section WAC 468-42-125.

I, W. A. I, Bert L. Cole, find that an emergency exists and that the foregoing order is necessary for the preservation of the public health, safety, or general welfare and that observance of the requirements of notice and opportunity to present views on the proposed action would be contrary to public interest. A statement of the facts constituting such emergency is pursuant to chapter 8, Laws of 1979 1st ex. sess., the department is to promulgate rules relating to felling of snags which represent a deterrent to effective fire control action. The department promulgated emergency rules effective September 1, 1979, to regulate the felling of snags until the promulgation of the permanent rules could occur (WSR 79-09-085). The permanent rules have been adopted, but are not yet effective (WSR 79-12-015). Therefore, these emergency rules, which are identical to the permanent rules, are promulgated so that the felling of snags will be regulated until such time as the permanent rules become effective.

Such rules are therefore adopted as emergency rules to take effect upon filing with the code reviser.

NEW SECTION

WAC 308-138-200 CONTINUING PROFESSIONAL EDUCATION REQUIRED. (1) The board

requires one hundred fifty credit hours of continuing professional education every three years. All osteopathic physicians currently licensed will be required to show evidence of one hundred fifty credit hours of continuing professional education by their license renewal date in 1983.

(2) In case licensees fail to meet the requirements because of illness or other extenuating circumstances, each case will be considered by the board on an individual basis. When circumstances justify it, the board may grant an extension of time or a change in requirements.

NEW SECTION

WAC 308-138-210 CATEGORIES OF CREDITABLE CONTINUING PROFESSIONAL EDUCATION ACTIVITIES. The following are categories of creditable continuing medical education activities approved by the board. The credits must be earned in the thirty-six month period preceding application for renewal of licensure. One clock hour shall equal one credit hour for the purpose of satisfying the one hundred fifty hour continuing professional education requirement.

(1) Category 1 – A minimum of sixty (60) credit hours of the total one hundred fifty hour requirements are mandatory under this general category.

(a) Category 1-A – Formal educational programs sponsored by nationally recognized osteopathic or medical institutions, organizations and their affiliates.

Examples of recognized sponsors include but are not limited to:

Accredited osteopathic or medical schools and hospitals.

Osteopathic or medical societies and specialty practice organizations.

Continuing medical education institutes.

Governmental health agencies and institutions.

Residencies, fellowships and preceptorships.

(b) Category 1-B – Preparation in publishable form of an original scientific paper (defined as one which reflects a search of the literature, appends a bibliography, and contains original data gathered by the author) and initial presentation before a postdoctoral audience qualified to critique the author's statements. Maximum allowable credit for the initial presentation will be ten credit hours per scientific paper. A copy of the paper in publishable form shall be submitted to the board. Publication of the above paper or another paper in a professional journal approved by the board may receive credits as approved by the board up to a maximum of fifteen credit hours per scientific paper.

(c) Category 1-C – Serving as a teacher, lecturer, preceptor or moderator-participant in any formal educational program. Such teaching would include classes in colleges of osteopathic medicine and medical colleges and lecturing to hospital interns, residents and staff. Total credits allowed under Category 1-C are forty-five per three-year period, with one hour's credit for each hour of actual instruction.

(A) Category 2-A – Home Study – The board strongly believes that participation in formal professional education programs is essential in fulfilling a physician's total education needs. The board is also concerned that

the content and educational quality of many unsolicited home study materials are not subject to impartial professional review and evaluation. It is the individual physician's responsibility to select home study materials that will be of actual benefit. For these reasons, the board has limited the number of credits which may be granted for home study, and has adopted strict guidelines in granting these credits.

Reading - Credits may be granted for reading the Journal of the AOA, and other selected journals published by recognized osteopathic organizations. One-half credit per issue is granted for reading alone. An additional one-half credit per issue is granted if the quiz found in the AOA Journal is completed and returned to the Division of Continuing Medical Education. Credit for all other reading is limited to recognized scientific journals listed in Index Medicus. One-half credit per issue is granted for reading these recognized journals.

Listening - Credits may be granted for listening to programs distributed by the AOA Audio-Educational Service. Other audio-tape programs sponsored by nationally recognized organizations and companies are eligible for credit. One-half credit per tape program may be granted. An additional one-half credit may be granted for each AOA Audio-Educational Service program if the quiz card for the tape found in the AOA Journal is completed and returned.

Other Home Study Courses - Subject-oriented and refresher home study courses and programs sponsored by recognized professional organizations are eligible for credit. The number of credit hours indicated by the sponsor will be accepted by the board.

A maximum of ninety credit hours per three-year period may be granted for all home study activities under Category 2-A.

(B) Category 2-B - Preparation and personal presentation of a scientific exhibit at a county, regional, state or national professional meeting. Total credits allowed under Category 2-B are thirty per three-year period, with ten credits granted for each new and different scientific exhibit. Appropriate documentation must be submitted with the request for credit.

(C) Category 2-C - All other programs and modalities of continuing professional education. Included under this category are informal educational activities such as observation at medical centers; programs dealing with experimental and investigative areas of medical practice, and programs conducted by non-recognized sponsors.

Total credits allowed under Category 2-C are thirty hours per three-year period.

NEW SECTION

WAC 308-138-220 CERTIFICATION OF COMPLIANCE. (1) In conjunction with the application for renewal of licensure, a licensee shall submit an affidavit of compliance with the one hundred fifty hour continuing professional education requirement on a form supplied by the board.

(2) The board reserves the right to require a licensee to submit evidence in addition to the affidavit to demonstrate compliance with the one hundred fifty hour continuing professional education requirement. Accordingly,

it is the responsibility of a licensee to maintain evidence of such compliance.

(3) Certification of compliance with the requirement for continuing medical education of the American Osteopathic Association, or receipt of the AMA physicians recognitions award or a current certification of continuing medical education from medical practice academies shall be deemed sufficient to satisfy the requirements of these regulations.

(4) Original certification or recertification within the previous six years by a specialty board will be considered as evidence of equivalent compliance with these continuing professional education requirements.

NEW SECTION

WAC 308-138-230 PRIOR APPROVAL NOT REQUIRED. (1) It will not be necessary for a physician to inquire into the prior approval of any continuing medical education. The board will accept any continuing professional education that reasonably falls within these regulations and relies upon each individual physician's integrity in complying with this requirement.

(2) Continuing professional education program sponsors need not apply for nor expect to receive prior board approval for continuing professional education programs. The continuing professional education category will depend solely upon the status of the organization or institution. The number of creditable hours may be determined by counting the contact hours of instruction and rounding to the nearest quarter hour. The board relies upon the integrity of program sponsors to present continuing professional education that constitutes a meritorious learning experience.

(1) "Participant" shall be defined as any individual who is eligible to purchase retirement annuities through the TIAA/CREF Plan and whose basic contribution to such plan is matched by the employing college district or the State Board for Community College Education pursuant to the provisions of WAC 131-16-050.

(2) "Supplemental retirement benefit" shall be defined as payments, as calculated in accordance with WAC 131-16-061, made by the community college district or the state board to an eligible retired participant or surviving spouse whose retirement benefits provided by the TIAA/CREF Plan do not attain the level of the retirement benefit goal established by WAC 131-16-015.

(3) "Year of full-time service" shall be defined as employment in an eligible position for a period of not less than five months in any fiscal year during which TIAA/CREF contributions were made by both the participant and a Washington public higher education institution; provided that not more than one year of full-time service will be credited for service in any one fiscal year.

(4) "Fiscal year" shall be defined as the period beginning on July 1 of any calendar year and ending on June 30 of the succeeding calendar year.

(5) "Average annual salary" shall be defined as the amount derived when the salary received during any two consecutive academic years of full-time service for which TIAA/CREF contributions were made by both the participant and a Washington public higher education institution is divided by two.

(6) "Academic year" shall be defined as the period beginning on September 1 of any calendar year and ending on August 31 of the next calendar year.

(7) "TIAA/CREF retirement benefit" shall be defined as the amount of annual retirement income derived

from a participant's accumulated annuities including dividends at the time of retirement; provided that, solely for the purpose of calculating a potential Supplemental Retirement Benefit, such amount shall be adjusted to meet the assumptions set forth in WAC 131-16-061, subsection (2).

(8) "Salary" shall be defined as all remuneration received by the participant from the employing community college district or the state board including summer quarter compensation, extra duty pay, leave stipends, and grants made by or through the college district or state board.

(9) "Designated beneficiary" shall be defined as the surviving spouse of the retiree or, with the consent of such spouse, if any, such other person or persons as shall have an insurable interest in the retiree's life and shall have been nominated by written designation duly executed and filed with the retiree's institution of higher education.

(2) There shall be no prior service benefits associated with participation in the TIAA/CREF Plan.

(3) The board of trustees of any college district may approve the retirement of any employee under the age of (~~sixty-five~~) seventy for reasons of health or permanent disability either upon the request of the individual employee or the district president; provided that the board of trustees shall first give reasonable consideration to the written recommendations regarding such requested retirement from the employee's personal physician and, if requested by either the employee or the district president, a review of such recommendations by another physician appointed by the board of trustees.

AMENDATORY SECTION (Amending Order 28, filed 7/1/74)

WAC 131-16-061 SUPPLEMENTAL RETIREMENT BENEFITS. (1) A participant is eligible to receive supplemental retirement benefit payments if at the time of retirement the participant is age sixty-two or over and has participated in the TIAA/CREF plan at a Washington public institution of higher education for at least ten years; provided that the amount of the supplemental retirement benefit, as calculated in accordance with the provisions of this section, is a positive amount.

(2) Subject to the provisions of subdivisions (c), (d), and (e) of this subsection, the annual amount of supplemental retirement benefit payable to a participant upon retirement is the excess, if any, when the value determined in subdivision (b) is subtracted from the value determined in subdivision (a), as follows:

(a) The lesser of fifty percent of the participant's average annual salary or two percent of the average annual salary multiplied by the number of years of full-time service; provided that if the participant did not elect to contribute ten percent of salary beginning July 1, 1974, or if later, after the first day of the calendar year following attainment of age fifty, service for such periods shall be calculated at the rate of one and one-half percent instead of two percent.

(b) The TIAA/CREF retirement benefit the participant would receive in the first month of retirement multiplied by twelve; provided that such benefit shall be calculated on the following assumptions:

(i) After July 1, 1974, fifty percent of the combined contributions were made to TIAA and fifty percent to CREF during each year of full-time service; provided that benefit calculations related to contributions made prior to July 1, 1974, shall be computed on the basis of actual allocations between TIAA and CREF; and

(ii) The full TIAA/CREF annuity accumulations, including all dividends payable by TIAA and further including the amounts, if any, paid in a single sum under the retirement transition benefit option, were fully settled on a joint and two-thirds survivorship option with a ten-year guarantee, using actual ages of retiree and spouse, but not exceeding a five-year difference; except that for unmarried participants the TIAA accumulations, including dividends, were settled on an installment refund option and the CREF accumulations were settled on a life annuity with ten-year guarantee option, all to be based on TIAA/CREF estimates at the time of retirement; and

(iii) Annuity benefits purchased by premiums paid other than as a participant in a Washington public institution of higher education TIAA/CREF retirement plan shall be excluded.

(c) The amount of supplemental retirement benefit for a participant who has not attained age sixty-five at retirement is the amount calculated in subsection (2) of this section reduced by one-half of one percent for each calendar month remaining until age sixty-five; provided that the supplemental retirement benefit for a participant retired for reason of health or permanent disability shall not be so reduced.

(d) Any portion of participant's TIAA and/or CREF annuity accumulation paid to a participant's spouse upon dissolution of a marriage shall be included in any subsequent calculation of supplemental retirement benefits just as if these funds had remained in the participant's TIAA and/or CREF annuity.

(e) The selection of a TIAA/CREF retirement option other than the joint and two-thirds survivorship with ten-year guarantee shall not alter the method of calculating the supplemental retirement benefit; however, if the participant's combined TIAA/CREF retirement benefit and calculated supplemental retirement benefit exceeds fifty percent of the participant's average annual salary, the supplemental retirement benefit shall be reduced so that the total combined benefits do not exceed fifty percent of average annual salary.

(3) The payment of supplemental retirement benefits shall be consistent with the following provisions:

(a) Supplemental retirement benefits shall be paid in equal monthly installments, except that if such monthly installments should be less than ((\$10)) ten dollars, such benefit payments may be paid at longer intervals as determined by the employer.

(b) Supplemental retirement benefit payments will continue for the lifetime of the retired participant; however, prior to retirement, a participant may choose to provide for the continuation of supplemental retirement benefit payments, on an actuarially equivalent reduced basis, to his or her spouse or designated beneficiary after the retiree's death. Notification of such choice shall be filed in writing with the appropriate college district or state board officer and shall be irrevocable after retirement. If such option is chosen, the supplemental retirement benefit payments shall be in the same proportion as the TIAA/CREF survivor annuity option elected by the participant.

(c) Prior to making any supplemental benefit payments, the employing college district or state board shall obtain a document signed by the participant and spouse, if any, or designated beneficiary acknowledging the supplemental retirement benefit option chosen by the participant.

(4) A retired participant who is reemployed shall continue to be eligible to receive retirement income benefits, except that the supplemental retirement benefit shall not continue during periods of employment for more than forty percent of full-time or seventy hours per month or five months duration. Retirement contributions shall not be made from the salary for such employment, unless the individual once again becomes eligible to participate under the provisions of WAC 131-16-020.

Such positions may be filled from the next lower level register in the class series as designated by the Director of Personnel with employees being automatically advanced after completion of one year's service in the ((training position)) lower level class.

(6) When the vacancy to be filled is identified as part of an agency's Affirmative Action goals as established by their approved Affirmative Action Plan, the Director of Personnel may, except where there are employees on the reduction-in-force register, refer up to three additional names per vacancy of individuals who are on existing registers and who are members of the protected groups under Title VII of the 1964 Civil Rights Act and chapter 49.60 RCW, State Law Against Discrimination, or for Federal Contract Compliance Purposes, veterans and disabled veterans as defined in the Vietnam Era Veteran's Readjustment Act of 1974, Title 41, CFR, Chapter 60, Part 60-250, "Affirmative Action Obligations of Contractors and Subcontractors for Disabled Veterans and Veterans of the Vietnam Era." AMENDATORY SECTION (Amending Order 136, filed 10/15/79)

(3) Appointment shall be from among those employees interested and available to accept such an appointment regardless of minimum requirements. Primary consideration should, however, be given to eligibles on the agency promotional register for the class or for a related class as determined by the Director of Personnel and the agency.

(4) An employee accepting an acting appointment shall be paid according to the rule regarding promotion,

and if competitively appointed to the position will continue the basic salary and periodic increment dates set under the acting conditions.

NEW SECTION

WAC 402-19-220 TYPES OF LICENSES. Licenses for radioactive materials are of two types: General and specific.

(1) General licenses provided in chapter 402-21 WAC are effective without the filing of applications with the department or the issuance of licensing documents to the particular persons, although the filing of a certificate with the department may be required by the particular general license. The general licensee is subject to all other applicable portions of these regulations and any limitations of the general license.

(2) Specific licenses require the submission of an application to the department and the issuance of a licensing document by the department. The licensee is subject to all applicable portions of these regulations as well as any limitations specified in the licensing document. (See chapter 402-22 WAC).

NEW SECTION

WAC 402-19-240 PRELICENSING INSPECTION. The department may verify information contained in applications and secure additional information deemed necessary to make a reasonable determination as to whether to issue a license and whether any special conditions should be attached thereto by visiting the facility or location where radioactive materials would be possessed or used, and by discussing details of the proposed possession or use of the radioactive materials with

the applicant or representatives designated by the applicant. Such visits may be made by the department or its duly authorized representatives.

NEW SECTION

WAC 402-19-250 RECIPROCAL RECOGNITION OF LICENSES. (1) Subject to these regulations, any person who holds a specific license from the United States Nuclear Regulatory Commission or any Agreement State, and issued by the agency having jurisdiction where the licensee maintains an office for directing the licensed activity and at which radiation safety records are normally maintained, is hereby granted a general license to conduct the activities authorized in such licensing document within this state for a period not in excess of one hundred eighty days in any calendar year provided that:

(a) The licensing document does not limit the activity authorized by such document to specified installations or locations;

(b) The out-of-state licensee notifies the department in writing at least three days prior to engaging in such activity. Such notification shall indicate the location, period, and type of proposed possession and use within the state, and shall be accompanied by a copy of the pertinent licensing document. If, for a specific case, the three-day period would impose an undue hardship on the out-of-state licensee, the licensee may, upon application to the department, obtain permission to proceed sooner. The department may waive the requirement for filing additional written notifications during the remainder of the calendar year following the receipt of the initial notification from a person engaging in activities under the general license provided in this subsection;

(c) The out-of-state licensee complies with all applicable regulations of the department and with all the terms and conditions of the licensing document, except any such terms and conditions which may be inconsistent with applicable regulations of the department;

(d) The out-of-state licensee supplies such other information as the department may request; and

(e) The out-of-state licensee shall not transfer or dispose of radioactive material possessed or used under the general license provided in this subsection except by transfer to a person:

(i) Specifically licensed by the department or by the United States Nuclear Regulatory Commission or an Agreement State to receive such material; or

(ii) Exempt from the requirements for a license for such material under WAC 402-19-190(2)(a).

(2) Notwithstanding the provisions of subsection (1) of this section, any person who holds a specific license issued by the United States Nuclear Regulatory Commission or an Agreement State authorizing the holder to manufacture, transfer, install, or service a device described in WAC 402-21-050(4) within the areas subject to the jurisdiction of the licensing body is hereby granted a general license to install, transfer, demonstrate or service a device in this state provided that:

(a) Such person shall file a report with the department within thirty days after the end of each calendar quarter in which any device is transferred to or installed in this

state. Each such report shall identify each general licensee to whom such device is transferred by name and address, the type of device transferred, and the quantity and type of radioactive material contained in the device;

(b) The device has been manufactured, labeled, installed, and serviced in accordance with applicable provisions of the specific license issued to such person by the United States Nuclear Regulatory Commission or an Agreement State;

(c) Such person shall assure that any labels required to be affixed to the device under regulations of the authority which licensed manufacture of the device bear a statement that "Removal of this label is prohibited"; and

(d) The holder of the specific license shall furnish to each general licensee to whom such device is transferred or on whose premises such device is installed a copy of the general license contained in WAC 402-21-050(4).

(3) The department may withdraw, limit, or qualify its acceptance of any specific license or equivalent licensing document issued by another agency, or any product distributed pursuant to such licensing document, upon determining undue hazard to public health and safety or property.

NEW SECTION

WAC 402-19-300 TERMS AND CONDITIONS OF LICENSES. (1) Each license issued pursuant to this part shall be subject to all the provisions of the act, as now or hereafter in effect, and to all rules, regulations, and orders of the department.

(2) No license issued or granted under chapters 402-21 and 402-22 WAC and no right to possess or utilize radioactive material granted by any license issued pursuant to chapters 402-21 and 402-22 WAC shall be transferred, assigned, or in manner disposed of, either voluntarily or involuntarily, directly or indirectly, through transfer of control of any license to any person unless the department shall, after securing full information find that the transfer is in accordance with the provisions of the act, and shall give its consent in writing.

(3) Each person licensed by the department pursuant to chapters 402-21 and 402-22 WAC shall confine his use and possession of the material licensed to the locations and purposes authorized in the license.

(4) Each licensee shall notify the department in writing when the licensee decides to permanently discontinue all activities involving materials authorized under the license. This notification requirement applies only to all specific licenses issued under chapter 402-22 WAC.

NEW SECTION

WAC 402-19-350 MODIFICATION, REVOCATION AND TERMINATION OF LICENSES. (1) The terms and conditions of all licenses shall be subject to amendment, revision, or modification, or the license may be suspended or revoked by reason of amendments to the act, or by reason of rules, regulations, and orders issued by the department.

(2) Any license may be revoked, suspended, or modified, in whole or in part, for any material false statement

in the application or any statement of fact required under provisions of the act, or because of conditions revealed by such application or statement of fact or any report, record, or inspection or other means which would warrant the department to refuse to grant a license on an original application, or for violation of, or failure to observe any of the terms and conditions of the act, or of the license, or of any rule, regulation, or order of the department.

(3) Except in cases of wilfulness or those in which the public health, interest, or safety requires otherwise, no license shall be modified, suspended, or revoked unless, prior to the institution of proceedings therefore, facts or conduct which may warrant such action shall have been called to the attention of the licensee in writing and the licensee shall have been accorded an opportunity to demonstrate or achieve compliance with all lawful requirements.

(4) The department may terminate a specific license upon request submitted by the licensee to the department in writing.

(e) As otherwise authorized by the department in writing.

(3) Before transferring radioactive material to a specific licensee of the department, the United States Nuclear Regulatory Commission, an Agreement State or a Licensing State, or to a general licensee who is required to register with the department, the United States Nuclear Regulatory Commission, an Agreement State or a

Licensing State prior to receipt of the radioactive material, the licensee transferring the material shall verify that the transferee's license authorizes the receipt of the type, form, and quantity of radioactive material to be transferred.

(4) The following methods for the verification required by WAC 402-19-400(3) are acceptable:

(a) The transferor may obtain for possession, and read, a current copy of the transferee's specific license or registration certificate;

(b) The transferor may obtain for possession a written certification by the transferee that the transferee is authorized by license or registration certificate to receive the type, form, and quantity of radioactive material to be transferred, specifying the license or registration certificate number, issuing agency, and expiration date;

*A licensee may transfer material to the department only after receiving prior approval from the department.

(c) For emergency shipments the transferor may accept oral certification by the transferee that the transferee is authorized by license or registration certificate to receive the type, form, and quantity of radioactive material to be transferred, specifying the license or registration certificate number, issuing agency, and expiration date: PROVIDED, That the oral certification is confirmed in writing within ten days;

(d) The transferor may obtain other sources of information compiled by a reporting service from official records of the department, the United States Nuclear Regulatory Commission, the licensing agency of an Agreement State or a Licensing State as to the identity of licensees and the scope and expiration dates of licenses and registration; or

(e) When none of the methods of verification described in subsection (4) of this section are readily available or when a transferor desires to verify that information received by one of such methods is correct or up-to-date, the transferor may obtain and record confirmation from the department, the United States Nuclear Regulatory Commission, or the licensing agency of an Agreement State or a Licensing State that the transferee is licensed to receive the radioactive material.

(5) Preparation for shipment and transport of radioactive material shall be in accordance with the provisions of WAC 402-19-500.

NEW SECTION

WAC 402-19-500 PREPARATION OF RADIOACTIVE MATERIAL FOR TRANSPORT. (1) No licensee shall deliver any radioactive material to a carrier* for transport unless:

(a) The licensee complies with the applicable requirements of the regulations, appropriate to the mode of

transport of the United States Department of Transportation insofar as such regulations relate to the packing of radioactive material, and to the monitoring, marking and labeling of those packages;

(b) The licensee has established procedures for opening and closing packages in which radioactive material is transported to provide safety and to assure that, prior to the delivery to a carrier for transport, each package is properly closed for transport;

(c) Prior to delivery of a package to a carrier for transport, the licensee shall assure that any special instructions needed to safely open the package are sent to, or have been available to the consignee;

(d) A licensee who transports his own material as a private carrier must placard his vehicle according to the United States Department of Transportation regulations; and

(e) In addition to the requirements of the United States Department of Transportation, each package of Type A or Type B quantity radioactive material prepared for shipment must have the innermost container labeled as to the isotope, chemical form, number of curies or subunits thereof, and date of determination of activity and each innermost container shall be tested to assure that the container is properly sealed and that excessive contamination is not present prior to transportation. This requirement does not apply to properly packaged shipments of radioactive waste consigned to a commercial low level waste burial facility.

(2) Subsection (1) of this section shall not apply to the transportation of licensed material, or to the delivery of licensed material to a carrier for transport, where such transportation is subject to the regulations of the United States Department of Transportation or the United States Postal Service.

NOTES:

¹Values are given in Column I only for those materials normally used as gases
² $\mu\text{Ci/gm}$ for solids

NOTE 1: Many radioisotopes disintegrate into isotopes which are also radioactive. In expressing the concentrations in Schedule C the activity stated is that of the parent isotope and takes into account the daughters.

NOTE 2: For purposes of WAC 402-19-190(2) where there is involved a combination of isotopes, the limit for the combination should be derived as follows: Determine for each isotope in the product the ratio between the concentration present in the product and the exempt concentration established in Schedule C for the specific isotope when not in combination. The sum of such ratios may not exceed "1" (i.e., unity).

EXAMPLE:

$$\frac{\text{Concentration of Isotope A in Product}}{\text{Exempt concentration of Isotope A}} + \frac{\text{Concentration of Isotope B in Product}}{\text{Exempt concentration of Isotope B}} \leq 1$$

NOTE 3: For the purpose of determining concentration in a product or device, the total quantity of radioactive material present is divided

by only that weight or volume of the discrete part or component throughout which the radioactive material is relatively uniformly distributed. If the weight or volume of this part or component cannot be determined then the product or device should be evaluated on the basis of the total quantity of radioactive material present.

This chapter establishes general licenses for the possession and use of radioactive material contained in certain items and a general license for ownership of radioactive material. Chapter 402-19 WAC also contains provisions applicable to the subject matter of this part.

NEW SECTION

WAC 402-21-030 GENERAL LICENSES—SOURCE MATERIAL. (1) A general license is hereby issued authorizing use, possession, and transfer of not more than fifteen pounds of source material at any one time by persons in the following categories:

- (a) Pharmacists using the source material solely for the compounding of medicinals;
- (b) Physicians using the source material for medicinal purposes;
- (c) Persons receiving possession of source material from pharmacists and physicians in the form of medicinals or drugs;

(d) Commercial and industrial firms, and research, educational, and medical institutions for research, development, educational, or commercial purposes;

And provided, that no such person shall, pursuant to this general license, receive more than a total of one hundred fifty pounds of source material in any one calendar year.

(2) Persons who receive, possess, use, or transfer source material pursuant to the general license issued in subsection (1) of this section are exempt from the provisions of chapters 402-24 and 402-48 WAC to the extent that such receipt, possession, use, or transfer is within the terms of such general license: PROVIDED, HOWEVER, That this exemption shall not be deemed to apply to any such person who is also in possession of source material under a specific license issued pursuant to chapter 402-22 WAC.

(3) A general license is hereby issued authorizing the receipt of title to source material without regard to quantity. This general license does not authorize any person to receive, possess, use, or transfer source material.

(4) Depleted uranium in industrial products and devices.

(a) A general license is hereby issued to receive, acquire, possess, use, or transfer, in accordance with the provisions of paragraphs (4)(b), (c), (d), and (e) of this section, depleted uranium contained in industrial products or devices for the purpose of providing a concentrated mass in a small volume of the product or device.

(b) The general license in paragraph (4)(a) of this section applies only to industrial products or devices which have been manufactured either in accordance with a specific license issued to the manufacturer of the products or devices pursuant to WAC 402-22-110(13) or in accordance with a specific license issued to the manufacturer by the United States Nuclear Regulatory Commission or an Agreement State which authorizes manufacture of the products or devices for distribution to persons generally licensed by the United States Nuclear Regulatory Commission or an Agreement State.

(c)(i) Persons who receive, acquire, possess, or use depleted uranium pursuant to the general license established by paragraph (4)(a) of this section shall file Department Form RHF-20 "Registration Certificate - Use of Depleted Uranium Under General License," with the department. The form shall be submitted within thirty days after the first receipt or acquisition of such depleted uranium. The registrant shall furnish on Department Form RHF-20 the following information and such other information as may be required by that form:

- (A) Name and address of the registrant;
- (B) A statement that the registrant has developed and will maintain procedures designed to establish physical control over the depleted uranium described in paragraph (4)(a) of this section and designed to prevent transfer of such depleted uranium in any form, including metal scrap, to persons not authorized to receive the depleted uranium; and
- (C) Name and/or title, address, and telephone number of the individual duly authorized to

act for and on behalf of the registrant in supervising the procedures identified in item (4)(c)(i)(B) of this section.

(ii) The registrant possessing or using depleted uranium under the general license established by paragraph (4)(a) of this section shall report in writing to the department any changes in information previously furnished on the "Registration Certificate - Use of Depleted Uranium Under General License." The report shall be submitted within thirty days after the effective date of such change.

(d) A person who receives, acquires, possesses, or uses depleted uranium pursuant to the general license established by paragraph (4)(a) of this section:

(iv) Shall maintain and make available to the department upon request the name and address of the person receiving the depleted uranium pursuant to such transfer.

(v) Shall not export such depleted uranium except in accordance with a license issued by the United States Nuclear Regulatory Commission pursuant to 10 CFR Part 110.

(e) Any person receiving, acquiring, possessing, using, or transferring depleted uranium pursuant to the general license established by paragraph (4)(a) of this section is exempt from the requirements of chapters 402-24 and 402-48 WAC of these regulations with respect to the depleted uranium covered by that general license.

For any uranium or thorium mill in operation on or before the effective date of this regulation for which an Environmental Impact Statement has not been prepared previously, an application for license renewal must be accompanied or preceded by a Final Environmental Impact Statement or Final Declaration of Nonsignificance completed in accordance with SEPA guidelines.

NOTE: No construction shall be commenced until the license has been issued or unless an emergency exemption from SEPA requirements is granted in accordance with WAC 197-10-180. For the purposes of subsection (6) of this section, the term "commencement of construction" means any clearing of land, excavation or other substantial action related to a proposed activity for specific licensing that would adversely affect the natural environment of a site; this term does not include changes desirable for the temporary use of the land for public recreational use, limited borings to determine site characteristics as necessary for environmental

assessment, or other preconstruction monitoring to establish background information related to suitability of a site or to the protection of environmental values. In the case where an exemption is granted, the applicant shall assume all financial risk for construction activity; waive any claim of entitlement to the issuance of a license based solely upon the grant of the exemption or the commencement of construction pursuant thereto; and furnish, if the circumstances warrant and the department so requires, a financial surety arrangement to insure the protection of the public health, safety and the environment in the event of abandonment, default, or inability of the license applicant to meet the requirements of the act or these regulations.

(b) For uranium or thorium milling operations, a bond made payable to the department of social and health services or other acceptable government agency, and in an amount specified by the department, shall be posted to ensure the protection of the public health and safety in the event of abandonment, default or other inability of the licensee to meet the requirements for reclamation and disposal of tailings and for decommissioning the site. The bond, or a copy thereof when the bond is made payable to another government agency, shall be received by the department prior to issuance of the license, or prior to license renewal for mills in operation on or before the effective date of this regulation. Other acceptable surety arrangements in addition to surety bonding include cash deposits, certificates of deposit, deposits of government securities, letters or lines of credit or combinations of the foregoing. The amount and mechanism of the surety arrangement may be reviewed by the department preceding each license renewal and adjustments may be required of the licensee prior to such renewal.

(c) The owner of the proposed uranium or thorium mill and tailings site(s) agrees to transfer or revert to the appropriate state or federal agency upon termination of the license, all lands, buildings and grounds, and any interest therein, necessary to fulfill the purposes of this subsection, except where the lands are held in trust for, or are owned by any Indian tribe. For any uranium or thorium mill in operation on or before the effective date of this regulation, such an agreement will be required prior to license renewal.

(d) For all uranium and thorium milling operations, the owner or operator shall arrange to pay to the department or its designee on a quarterly basis a charge on each pound of uranium or thorium compound which is milled out of the raw ore on or after January 1, 1980. For uranium or thorium mills in operation on or before the effective date of this regulation, the mill owner or operator shall determine the appropriate manner in which to make said payments prior to April 1, 1980.

(i) The specific charge shall be five cents per pound on each pound of uranium or thorium compound milled out of the raw ore.

(ii) The specific charge may be increased or decreased as is considered necessary to provide a special security fund for the further maintenance, surveillance or care which may be required after a licensee has ceased to operate.

(iii) The total charge shall not exceed one million dollars.

(e) The application for a license includes a description of an appropriate program for effluent monitoring, environmental monitoring and data reporting. Such description shall encompass locations, frequency, and types of sampling, analytical plans and procedures, minimum detection levels, sampling equipment and quality assurance programs.

All uranium and thorium mill tailing piles and ponds shall be controlled in the following manner:

- (1) Access to the pile area shall be controlled by the operator or owner and properly posted.
- (2) The pile shall be maintained in such a manner that hazardous erosion of, or environmental hazard from, radioactive materials does not occur.
- (3) ~~((New)) Tailing piles shall be ((a) located in areas of low population, (b) removed from wet or dry water courses unless adequate provisions are made for preventing surface run-off water from entering or eroding embankments, (c) sufficiently removed from permanent water courses to avoid contamination in event of flooding or failure of embankments, (d) sufficiently removed from water supplies to avoid seepage or contamination, and (e))~~ surrounded by a fence of sufficient size and strength to prevent range animals from gaining entry.
- (4) Tailings should be stabilized as much as practically achievable during operation to preclude off-site hazards and to minimize the extent of final stabilization.
- (5) All plans for stabilization of mill tailings shall be submitted to the department for review prior to construction. The department may, however, require further controls at a future date after approval of such plans.
- (6) The operator or owner shall cause regular monitoring of the milling site, the mill tailings, and adjacent ((ground and surface waters to be made)) areas to be made to determine environmental concentration of radioactive materials. The tailings pile or pond and associated diversion channels shall be inspected regularly to assure continued integrity of the stabilization or impoundment system and also immediately following any natural or man-made occurrence which could affect the integrity of the stabilization or effectiveness of the diversion channel. Maintenance needed to restore the system or diversion channels to their original effectiveness shall be performed as soon as possible. Records shall be maintained of all monitoring, inspection, and maintenance activities connected with this requirement.
- (7) ~~((The owner of the tailing pile site shall give the Department written notice thirty (30) days in advance of any contemplated transfer of right, title or interest in the site by deed, lease, or other conveyance. The written notice shall contain the name and address of the proposed purchaser or transferee. Prior written approval of the Department shall be obtained before the surface area of the land shall be put to use and it shall have been determined that the radiation dosage to the public resulting from the proposed use does not exceed 0.5 rem per year to the whole body.))~~ Steps should be taken to control dusting from dry surfaces of the tailings impoundment area or storage areas so as to keep releases of airborne radioactive effluents as low as is reasonably achievable below the limits specified in chapter 402-24 WAC.
- (8) With the exception of use at a mill or for reprocessing at the site or another location, prior written approval of the department must be obtained before any tailings material is removed from any active or inactive mill.
- (9) The department may waive individual requirements in regard to stabilization or utilization of tailings

Chapter 402-52 WAC
((STABILIZATION OF)) URANIUM AND/OR THORIUM MILL OPERATION AND STABILIZATION OF MILL TAILING PILES

NEW SECTION

WAC 402-52-005 RECLAMATION AND DECOMMISSIONING. A specific plan for reclamation and disposal of tailings and for decommissioning the site of uranium or thorium milling operations shall be included as part of the proposed action assessed under SEPA regulations and guidelines as required by WAC 402-22-070(6)(a) for licensing of environmentally significant operations. For any uranium or thorium mill in operation on or before the effective date of this regulation for which a plan for reclamation and disposal of tailings and decommissioning of the site has not been submitted and assessed, such a plan must be submitted to the department and a final environmental impact statement or final declaration of nonsignificance must accompany or precede the license renewal.

AMENDATORY SECTION (Amending Order 1095, filed 2/6/76)

WAC 402-52-010 URANIUM AND THORIUM MILL TAILING PILES AND PONDS—CONTROL.

material if it can be shown that they are unnecessary or impracticable in specific areas.

NEW SECTION

WAC 402-52-015 PROPOSED TAILING DISPOSAL FACILITIES. (1) New tailing piles shall be located in areas of low population. Consideration should be given to the utilization of existing large tailings piles for the disposal of waste from small operations such as in situ extraction or heap leaching.

(2) The site shall be located such that disruption and dispersion by natural forces are eliminated or reduced to the maximum extent reasonably achievable. In particular, the site should be:

(a) Removed from set or dry water courses and located in an area with minimal upstream drainage with adequate provisions made for preventing surface run-off water from entering or eroding embankments;

(b) Sufficiently removed from permanent water courses to avoid contamination in event of flooding or failure of embankments;

(c) Sufficiently removed from water supplies to avoid seepage or contamination;

(d) Provided with upstream rainfall catchment areas or diversion channels to minimize or divert the maximum possible flooding; and

(e) Located where the topography provides good wind protection.

(3) The tailing shall be disposed below grade except where it can be demonstrated that an above-grade disposal program will provide reasonably equivalent isolation of the tailings from natural erosional forces.

(4) A tailings impoundment shall not be located near a potentially active fault that could cause a maximum credible earthquake larger than that which the impoundment could reasonably be expected to withstand.

(5) The tailings impoundment should be designed to incorporate features which will promote deposition enhancing the thickness of the impoundment structure.

(6) Steps shall be taken to reduce seepage of toxic material into groundwater by:

(a) Lining the tailings impoundment area;

(b) Reducing the inventory of liquid in the impoundment by such means as dewatering and/or recycling water from the tailings impoundment to the mill;

(c) Neutralization of the tailings to promote immobilization of toxic materials; and/or

(d) Lining and/or compaction of ore storage areas.

(7) Preoperational monitoring shall be conducted for at least one full year prior to any major site construction.

(8) The requirements of WAC 402-52-010 and 402-52-020 shall also be met.

AMENDATORY SECTION (Amending Order 1095, filed 2/6/76)

WAC 402-52-020 INACTIVE MILLS—STABILIZATION PROCEDURES. All uranium mill tailing piles and ponds from inactive mills shall be stabilized

prior to termination of the license such that ongoing active maintenance is not necessary to preserve isolation in the following manner:

(1) Ponds shall be drained and covered with materials that prevent wind erosion. (~~Water~~) Liquid drained from the ponds shall be disposed of in compliance with WAC 402-24-220, Appendix A, Table II, Col. 2.

(2) Taking into consideration the types of materials at each site, piles shall be leveled and graded so that there is, insofar as possible, a gradual slope to ensure that there shall be no low places on the pile where water might collect. Side slopes shall be stabilized by riprap, dikes, reduction of grades, vegetation, or any other method or combination of methods that will ensure stabilization. Sufficient natural cover shall be placed over tailings or wastes at the end of milling operations to result in a calculated reduction in surface exhalation of radon from the tailings or waste to less than two picocuries per square meter per second above natural background levels. Direct gamma exposure from the tailings or waste should be reduced to background levels. Plastic or other synthetic caps should not be used to reduce radon exhalation from the tailings or waste. Material used for cover must be essentially the same as far as radioactivity is concerned, as that of surrounding soils.

(3) If pile edges are adjacent to a river, creek gulch or other watercourse that might reasonably be expected to erode the edges during periods of high water, the exposed slopes shall be stabilized and the edges shall be diked and riprappd sufficiently to prevent erosion of the pile.

(4) Drainage ditches shall be provided around the pile edges sufficient to prevent surface runoff water from neighboring land from reaching and eroding the pile.

(5) The pile shall be stabilized against wind and water erosion. The method of stabilization may consist of vegetation or a cover of soil, soil containing rock or stone, rock or stone, cement or concrete products, petroleum products, or any other soil stabilization material presently recognized or which may be recognized in the future, or any combination of the foregoing as may be required for proper protection from wind, or water erosion.

(6) Where vegetation is used for pile stabilization, sufficient topsoil shall be placed to prevent plant uptake of the radioactive materials contained in the pile.

(7) The requirements of WAC 402-52-010 shall also be met.

NEW SECTION

WAC 402-52-025 MILLING OPERATIONS. (1) Milling operations shall be conducted so as to avoid site contamination and so that all airborne effluent releases are reduced to as low as is reasonably achievable below the limits specified in chapter 402-24 WAC.

(2) Yellowcake drying and packaging operations should cease when effluent control devices are inoperative or not working at their reasonably expected best performance levels.

(3) The licensee shall have written operating procedures documenting steps to be taken to control dusting from the tailings pile and ore storage areas, and steps to

be taken when effluent control devices are inoperative or not working at their reasonably expected best performance levels.

NEW SECTION

WAC 402-70-030 PAYMENT OF FEES. (1) Application fees: Each application for which a fee is prescribed shall be accompanied by a remittance in the full amount of the fee. No application will be processed prior to payment of the full amount specified. Applications for which no remittance is received may be returned to the applicant. All application fees will be charged irrespective of the department's disposition of the application or of a withdrawal of the application.

(2) License fees: A fee to cover the cost of the independent environmental assessment plus any cost of an extensive program review not covered by the application fee will be payable upon notification by the department

AMENDATORY SECTION (Amending Order 1382, filed 3/28/79)

WAC 388-96-222 SETTLEMENT. (1) Following completion of the field audit of an annual report, the department will compare the prospective rates paid to the contractor during the report period, weighted according to the number of patient days during which each rate was in effect, with the contractor's audited allowable costs for the period, taking into account all authorized shifting (WAC 388-96-223) and the upper rate limits set out in WAC 388-96-760.

(2) Within sixty days after completion of the field audit, the department will send a written audit report to the contractor. In this report, the department will:

(a) Explain the application of relevant contract provisions, regulations, auditing standards, rate formulas, and department policies to the contractor's report, in sufficient detail to permit the contractor to calculate with reasonable certainty its audited allowable costs and its settlement with the department;

(b) Advise the contractor of rules and regulations justifying a settlement determination resulting in reimbursement in any cost center at less than actual allowable costs, as reported by the contractor and verified by audit;

(c) Summarize all audit disallowances; and

(d) Request the contractor to refund money, if necessary, in accordance with the following principles:

(i) In the patient care and food cost areas, the contractor shall refund all portions of payments received for recipients in excess of allowable patient care and food costs, respectively, for those recipients;

(ii) ~~((In the patient care cost area, the contractor shall also refund the percentage of the amount paid (less any recovery under subsection (i) above) equal to the percentage by which average per patient day nursing service hours provided were less than the minimum number of hours issued by the department;~~

(iii)) In the administration and operations and property cost areas, ~~((payments in excess of allowable costs will normally be retained by the contractor. Those overpayments shall be refunded only in the following circumstances:~~

~~((A) Costs totaling \$.02 per patient day or \$1,000, whichever is higher, in any cost area, were reported which cannot be documented at audit, or accumulated liabilities of at least that amount were not properly reversed in accordance with WAC 388-96-032 or 388-96-113; or~~

~~((B) All conditions and standards were not met during the entire fiscal year, as determined by the department in Title XIX certification surveys. The portion of the total overpayment attributable to thirty days plus the number of days from the date of the first survey at which a standard or condition was found unmet until the date of the survey showing all conditions and standards met will be recovered. For IMR facilities with initial certification conditioned upon meeting a plan of correction relating solely to IMR program standards, overpayments will not be recovered if the IMR program standards are met within this initial plan of correction; and)) after January 1, 1979, the contractor shall refund all portions of payments received for recipients in excess of administration and operations and property costs, respectively, for those recipients;~~

~~((iv)) (iii) In the property cost area, the contractor shall refund amounts determined under WAC 388-96-571(4) or 388-96-573.~~

(3) The contractor shall pay the refund, or shall commence repayment in accordance with a schedule determined by the department, within sixty days after receiving the audit report, unless the contractor contests settlement issues in good faith in accordance with the procedures set out in WAC 388-96-904. If the settlement determination is contested, the contractor shall pay or commence repayment in accordance with a schedule determined by the department within sixty days after such proceedings are concluded. The department will pay any amount due the contractor as the result of errors discovered at audit in billing or payment within thirty days after the audit report is received by the contractor or within thirty days after proceedings to contest the settlement are concluded.

(4) If the contractor does not refund the overpayment or any installment when due, the department may withhold payments from current billings until the overpayment is refunded. Payments will only be withheld under this subsection up to the unrefunded amount of the overpayment.

AMENDATORY SECTION (Amending Order 1353, filed 10/20/78)

WAC 388-96-719 METHOD OF RATE DETERMINATION. (1) Data used in determining rates will be taken from the most recent complete, desk-reviewed annual cost report and from certified quarterly reports submitted by each contractor. ~~((If no annual report is available, the most recent desk-reviewed semiannual report will be used. Data from reports covering a period of less than six full months will not be used in determining rates, except for such reports which are submitted in accordance with WAC 388-96-101(2). Data from these reports will be combined with data from the report period immediately preceding the abbreviated period for purposes of determining rates.))~~

(2) Data containing obvious errors, data for facilities which are out of compliance with any standard or condition at any time during the reporting period, and data for facilities with average occupancy ratios of less than

eighty-five percent for the report period, will be excluded from the determination of predicted costs and rate ranges under subsections (4) and (6) of this section.

(3) Each contractor's reported cost data except; after December 31, 1978, for depreciation, interest, and lease costs, will be adjusted for economic trends based on component indices of the consumer price index issued by the United States Department of Labor, Bureau of Labor Statistics. The national averages for the most recent twelve-month period will be applied in rate computations for the cost areas in subdivisions (a)(;) and (b) ~~(and (c))~~ of subsection (3):

(a) Patient care—~~((health and recreation))~~ medical care—other professional services index;

(b) Administration and operations—Average of the "all items less food" and "services less care services" indices; (c) ~~((Property—"shelter" index; and~~

~~(d) Beginning July 1, 1978;))~~ For the food cost area, the Seattle consumer price index for food at home over the most recent twelve-month period will be used.

(4) A predicted cost per patient day (excluding cost data and patient days relating to exceptional care recipients) in ~~((each of the four cost areas))~~ the property cost area will be determined for each facility through multiple regression analysis, ~~((which allows the assessment of the joint impact of a set of factors on cost. The formula for the linear multiple regression function is:~~

$$Y_c = A + B_1X_1 + B_2X_2 + \dots + B_kX_k$$

where:

Y_c is the predicted cost per patient day for an individual facility;

A is the base cost for a hypothetical facility where the factors all are zero;

B_1, B_2, \dots, B_k are the regression coefficients for the factors; and

X_1, X_2, \dots, X_k are the independent variables or factors measuring the relevant characteristics of a facility.

A and B_1, B_2, \dots, B_k are determined statistically by the method of least squares. In order to be included in a regression formula, factors must show statistical predictability by being significant at the twenty percent level) that does not include leased facilities. The formula, which will be developed by the department, will recognize factors which may be significant, including location, age, and type of facility.

~~((5))~~ (a) After all predicted costs per patient day have been computed, the difference between each facility's reported costs, adjusted to take into account economic trends, and the predicted cost will be computed. The standard deviation of the difference will also be calculated.

~~((6))~~ (b) To determine an individual contractor's prospective rate, its predicted cost for the ~~((patient care, food, and administration and operations cost areas is revised using the most current factor values that have been determined for the individual facility and the base cost and weights derived in the regression analysis described above. Beginning July 1, 1978 to determine an individual contractor's prospective rate in the))~~ property cost area ~~(, its predicted cost)~~ is revised using the most current factor values that have been determined for the individual facility and the base cost and weights derived

within the last twelve-month period in the regression analysis described above. A rate ~~((range))~~ ceiling, defined as this predicted cost plus ~~((and minus))~~ one standard deviation of the difference calculated, in accordance with ~~((subsection (5)))~~ subdivision (a) of this ~~((section))~~ subsection, for the ~~((food, administration and operations, and))~~ property cost area ~~((s))~~ will then be determined. ~~((Beginning July 1, 1978 the rate range for the patient care cost area will be plus 1.75 standard deviations and minus one standard deviation from the predicted cost.))~~ If the contractor's reported costs ~~((adjusted for economic trends))~~ are lower than the lower limit of the rate range, the lower limit will be the contractor's reimbursement rate. If these adjusted reported costs ~~((adjusted for economic trends))~~ are higher than the upper limit of the rate range, the upper limit will be the contractor's reimbursement rate. If these adjusted reported costs fall within the standard rate range, the contractor's reimbursement rate will equal the adjusted reported costs.

~~((7))~~ (5) Where new standards are imposed, or the department wishes to encourage additional services or otherwise change the program, a cost-related adjustment will be made to the appropriate cost area rates of each contractor affected by the program change. Adjustments will be made until reported costs used in setting rates reflect the new standards or program changes.

AMENDATORY SECTION (Amending Order 1349, filed 10/9/78)

WAC 388-96-722 PATIENT CARE COST AREA RATE. (1) The patient care cost area reimbursement rate will be computed to cover the necessary and ordinary costs of providing routine services and supplies to recipients in accordance with WAC 388-88-050 and 388-88-051.

(2) ~~((The regression equation used in the patient care cost area will contain weights for the following four factors:~~

(a) Locality of the facility. This factor adjusts the base cost to provide for local market conditions. Facility location will be considered "urban" if it is in one of the four Standard Metropolitan Statistical Areas (SMSA). It will be considered "rural" if it is not in an SMSA. SMSA areas are those established in the 1970 census for the State of Washington.

(b) Type of facility. This factor adjusts the base cost to provide for the effect institutional requirements have on patient care costs. Facilities such as hospitals and other institutions which are certified providers but not licensed as nursing homes will be distinguished from facilities whose primary mission is the delivery of nursing home care.

(c) Characteristics of patients in the facility, as determined by the department. This factor adjusts the base cost to provide for the effect patient mix has on patient care costs. Beginning July 1, 1978, this factor will be derived using a uniform patient assessment performed by the department. It will consist of the average functional status score of medical care recipients in the facility. Data will cover all recipients assessed in time to be included in the analysis. The most recent assessment data collected on each recipient will be used. The functional

~~status score will be determined using the Katz ADL Scale.~~

~~(d) Number of floors of the facility. This factor adjusts the base cost to provide for the effect of physical plant differences on patient care costs. Data will be derived from inspection records in the state fire marshal's office:)) (a) Beginning October 1, 1979, predicted patient care staffing hours per patient day in the patient care cost area will be determined for each facility through multiple regression analysis. The dependent variable will be patient care staffing data from recent cost reports or certified quarterly reports provided by the contractor. The independent variable will be the average functional status score of medical recipients in the facility as determined by the Katz ADL Scale.~~

~~(b) After the predicted patient care staffing hours per patient day have been computed, the difference between each facility's reported patient care staffing hours and the predicted hours will be computed. The standard deviation of the difference will also be calculated.~~

~~(c) A patient care staffing hours ceiling, defined as the predicted cost plus one and three-quarters standard deviations of the difference calculated in accordance with subdivision (b) of this subsection will then be determined.~~

~~(d) Beginning July 1, 1979, standard hours will be established using staffing data from recent cost reports and certified quarterly reports. For a facility, standard hours will be the facility's reported hours. Beginning October 1, 1979, a maximum patient care staffing hour ceiling will be calculated in accordance with subdivision (c) of this subsection. Standard hours may be adjusted by the department in cases where characteristics of patients in a facility have changed and staffing levels are below levels predicted by the regression equation. The wages for patient care personnel shall be the sum of the product of ninety percent of the prevailing wages for the categories of nursing assistants, licensed practical nurses, registered nurses, and noncontractual therapists and related restorative employees, expressed as an hourly rate, based upon the state-wide salary survey conducted pursuant to RCW 41.06.160. The standard hours calculated above will be multiplied by the wages calculated above to determine a rate. For the initial period hourly wages for categories of employees covered within this cost center will be averaged as follows:~~

Registered nurses	\$6.60
Licensed Practical Nurses	\$5.30
Nursing assistants	\$3.69

~~For other employees, actual reported wages plus 8 annual inflation will be used. Subsequent increases in the amount set forth in this section shall not be set forth by rule change, but will be available for inspection and examination in the Bureau of Nursing Home Affairs. Rates received by the application of the formula set forth in this section which are not devoted to meeting the wages set forth above by category are not allowable costs.~~

~~(3) In addition to its reimbursement rate, each contractor will be assigned a range of nursing service hours which represent the maximum and minimum number of~~

hours the department will purchase. For purposes of this hour range for IMR facilities, nursing services include residential living services. The range will depend on the characteristics of the patients in each facility. From January 1, 1978 through December 31, 1978, it will be computed based on the ratio of the number of SNF, ICF and IMR patients of each level, respectively, to the total number of patients in the facility, assuming a range of 1-2 hours for ICF patients, 1.75-3 hours for SNF patients, 3.1-6.1 for IMR level A patients, 2.7-5.4 for IMR level B patients, 2.1-3.6 for IMR level C patients, and 1.2-2.4 for IMR level D patients. On and after January 1, 1979, this range will be derived using a uniform patient assessment performed by the department. When the certification of a contractor is changed to add or eliminate a level of care, the range will be adjusted using the ratio of patients in each level of care at the time the new certification becomes effective. When the department requires new standards or makes program changes which require more or less nursing service, the range will be adjusted as of the effective date of the new standard or program change.

AMENDATORY SECTION (Amending Order 1264, filed 1/9/78)

WAC 388-96-727 FOOD COST AREA RATE.

(1) The food cost area rate will be computed to cover the necessary and ordinary costs of procuring food, dietary supplements, and beverages for meals and between-meal nourishment for recipients.

(2) ((The regression equation used in the food cost area will contain weights for the following four factors:

(a) Location of the facility—King County.

(b) Location of the facility—Clark County.

(c) Location of the facility—Spokane County.

These factors adjust the base cost to provide for local market conditions in these three urban counties:

(d) Type of facility. This factor adjusts the base cost to provide for the effect institutional requirements have on food costs. Facilities such as hospitals and other institutions which are certified providers but not licensed as nursing homes will be distinguished from those facilities whose primary mission is the delivery of nursing home care:)) On July 1, 1979, food reimbursement shall be one hundred fifteen percent of the statewide average or approximately the ninetieth percentile of all costs for bulk and raw foods and beverages purchased for dietary needs, expressed as a per patient day amount. Rate increases subsequent to July 1, 1979, will be based on increases in the Seattle consumer price index for food as specified in WAC 388-96-719(3)(c).

Reviser's Note: RCW 34.04.058 requires the use of underlining and deletion marks to indicate amendments to existing rules. The rule published above varies from its predecessor in certain respects not indicated by the use of these markings.

AMENDATORY SECTION (Amending Order 1264, filed 1/9/78)

WAC 388-96-735 ADMINISTRATION AND OPERATIONS COST AREA RATE. (1) The administration and operations cost area reimbursement rate will be computed to cover the necessary and ordinary costs of overall management of the facility, operation and maintenance of the physical plant, and providing dietary service (other than the cost of food and beverages), medical supplies, taxes, and insurance.

(2) ~~((The regression equation used in the administration and operations cost area will contain weights for the following six factors:~~

~~(a) Location of the facility—Clark County.~~

~~(b) Location of the facility—Spokane County.~~

~~These two factors adjust the base cost to provide for local market conditions in the two counties:~~

~~(c) Type of facility. This factor provides for the effect institutional requirements have on administration and operations costs. Facilities such as hospitals and other institutions which are certified providers but not licensed as nursing homes are distinguished from those facilities whose primary mission is the delivery of nursing-home care.~~

~~(d) Type of certification of the facility. This factor adjusts the base cost to provide for the effect differences in certification requirements have on administration and operations costs. Facilities with ICF-only certification will be distinguished from those with SNF-only and SNF/ICF (dual) certification.~~

~~(e) Number of floors of the facility.~~

~~(f) Age of the facility. Factors (e) and (f) adjust the base cost to provide for the effect of physical plant differences on administration and operations cost. Data will be derived from inspection records in the state fire marshal's office.)) The administration and operations cost area reimbursement rate will be calculated as follows:~~

~~(a) Beginning July 1, 1979, hours for support staff other than administrators and assistant administrators will be taken from recent cost reports and certified quarterly reports provided by the contractor. Hours of support staff per patient day will be calculated. Standard hours for support staff will be determined as reported support staff hours per patient day.~~

~~(b) Wages for the above employees shall be the sum of the product of ninety percent of the prevailing wages expressed in an hourly rate, based on the state-wide salary survey as conducted pursuant to RCW 41.06.160. The standard hours will be combined with the wages determined above to calculate a rate. For the initial period hourly wages for the employees covered within this cost center shall be averaged as follows: for supervisor employees, other than administrators and assistant administrators, \$5.30; for non-supervisory employees, \$3.69. Subsequent increases in the amount set forth in this section shall not be reflected by rule change, but will be available for inspection and examination in the Bureau of Nursing Home Affairs. Rates received by the application of the formula set forth in this section which are not devoted to meeting the wages set forth above by category, are not allowable costs.~~

(c) For IMR facilities, standard hours may be modified by the Survey Section, Bureau of Nursing Home Affairs in consultation with the department's Division of Developmental Disabilities.

(d) Other allowable administration and operations costs will be taken from the most recent desk-reviewed annual cost report and updated using the inflation factors specified in WAC 388-96-719(4). Reimbursement for this portion of administration and operations will be limited to the eighty-fifty percentile of all reporting facilities, except that facilities may be grouped by factors other than owners or legal organizational characteristics, which could reasonably influence cost requirements for administration and operations.

Reviser's Note: RCW 34.04.058 requires the use of underlining and deletion marks to indicate amendments to existing rules. The rule published above varies from its predecessor in certain respects not indicated by the use of these markings.

AMENDATORY SECTION (Amending Order 1264, filed 1/9/78)

WAC 388-96-743 PROPERTY COST AREA RATE. ~~((The property cost area reimbursement rate will be computed to cover the necessary and ordinary costs of depreciation, interest, taxes, insurance, and rent of real and personal property.~~

~~(2) The regression equation used in the property cost area will contain weights for the following seven factors:~~

~~(a) Location of the facility—King County.~~

~~(b) Location of the facility—Clark County.~~

~~(c) Location of the facility—Spokane County.~~

~~These three factors adjust the base cost to provide for local market conditions in the three counties:~~

~~(d) Size of the facility. This factor adjusts the base cost to provide for the effect differences in size (defined as the number of licensed bed) have on property costs.~~

~~(e) Age of the facility.~~

~~(f) Facility's fire detection protection.~~

~~(g) Construction type. Facilities with types 1 and 2 construction will be distinguished from those with types 3, 4, and 5 construction. Factors (e), (f) and (g) adjust the base cost to provide for the effect of physical plant differences on property costs. Data will be derived from inspection records in the state fire marshal's office.)) Property reimbursement shall not exceed the predicted cost plus one standard deviation of the necessary and ordinary costs of depreciation, and interest of owner-operated facilities utilizing a multiple regression formula developed by the Department of Social and Health Services, recognizing factors which may be significant, including location, age, and construction type of facility. Rental costs of leased facilities shall be reimbursed to the extent they do not exceed the upper band of the multiple regression formula for comparable owner-operated facilities.~~

AMENDATORY SECTION (Amending Order 71-6, filed 6/1/71)

WAC 296-20-045 PROCEDURES REQUIRING CONSULTATION. In the event of complication, controversy, or dispute over the medical aspects of any claim, the department will not authorize treatment until the attending physician has ~~((arranged a consultation with a qualified physician in whom he has confidence, and the department has received notification of the findings and recommendations of the consultant))~~ obtained concurring opinion from a qualified physician with experience and expertise on the subject. NEW SECTION

WAC 296-20-12501 PHYSICIAN ASSISTANT BILLING PROCEDURE. Billing for physician assistant services can be made only by the supervising physician. Payment will be made directly to the supervising physician. All physician assistant services must be identified by using physician assistant modifiers.

(1) Bills must be itemized on department or self-insurer forms, as the case may be, specifying: The date, type of service and the charges for each service.

(2) The bill form must be completed in detail to include the claim number. While the name of the physician's assistant rendering service must be included on the bill, all bills must be submitted under the supervising physician account number. Bills will be accepted when signed by other than the practitioner rendering services. When bills are prepared by someone else, the responsibility for the completeness and accuracy of the description of services and charges rests with the supervising physician.

(3) For a bill to be considered for payment, it must be received in the department or by the self-insurer within ninety days from the date each specific treatment and/or service was rendered or performed. Whenever possible, bills should be submitted monthly.

(4) Bills cannot be paid for services rendered while a claim is closed.

(5) The department or self-insurer may reject bills for services rendered in violation of medical aid rules.

NEW SECTION

WAC 296-20-12502 PHYSICIAN ASSISTANT MODIFIERS. As the scope of physician assistant treatment covers a broad area of treatment procedures, the following modifier codes are to be used after the applicable procedure code.

-01 Physician Assistant, Type A License, if performing procedure without presence of supervising physician. Bill 80% of Procedure Value.

-02 Physician Assistant, Type B License, if performing procedure without presence of supervising physician. Bill 75% of Procedure Value.

-03 Physician Assistant, Type C License, if performing procedure without presence of supervising physician. Bill 70% of Procedure Value.

-04 Physician Assistant, Type A License, if performing procedure in presence of supervising physician. Bill 80% of Procedure Value.

-05 Physician Assistant, Type B License, if performing procedure in presence of supervising physician. Bill 75% of Procedure Value.

-06 Physician Assistant, Type C License, if performing procedure in presence of supervising physician. Bill 75% of Procedure Value.

AMENDATORY SECTION (Amending Order 74-32, filed 6/21/74)

WAC 296-20-220 SPECIAL RULES FOR EVALUATION OF PERMANENT BODILY IMPAIRMENT. (1) Evaluations of permanent bodily impairment using categories require uniformity in procedure and terminology. The following rules have been enacted to produce this uniformity and shall apply to all evaluations of permanent impairment of an unspecified nature.

(a) Gradations of relative severity shall be expressed by the words "minimal", "mild", "moderate" and "marked" in an ascending scale. "Minimal" shall describe deviations from normal responses which are not medically significant. "Mild", "moderate" and "marked" shall describe ranges of medically significant deviations from normal responses. "Mild" shall describe the least severe third. "Moderate" shall describe the middle third. "Marked" shall describe the most severe third.

(b) "Permanent" describes those conditions which are fixed, lasting and stable, and from which within the limits of medical probability, further recovery is not expected.

(c) "Impairment" means a loss of physical or mental function.

(d) "Total bodily impairment", as used in these rules, is the loss of physical or mental function which is essentially complete short of death.

(e) The examining physician shall not assign a percentage figure for permanent bodily impairment described in the categories established herein.

(f) The method of evaluating impairment levels is by selection of the appropriate level of impairment. These descriptive levels are called "categories". Assessments of the level of impairment are to be made by comparing the condition of the injured workman with the conditions described in the categories and selecting the most appropriate category.

These rules and categories for various bodily areas and systems provide a comprehensive system for the measurement of disabling conditions which are not already provided for in the list of specified permanent partial disabilities in RCW 51.32.080(1). Disabilities resulting from loss of central visual acuity, loss of an eye by enucleation, loss of hearing, amputation or loss of function of the extremities will continue to be evaluated as elsewhere provided in RCW 51.32.080.

The categories have been classified in percentages in reasonable proportion to total bodily impairment for the purpose of determining the proper award. Provision has been made for correctly weighing the overall impairment due to particular injuries or occupational disease in cases in which there are preexisting impairments.

(g) The categories of the various bodily areas and systems are listed in the order of increasing impairment except as otherwise specified. Where several categories are given for the evaluation of the extent of permanent bodily impairment, the impairments in the higher numbered categories, unless otherwise specified, include the impairments in the lesser numbered categories. No category for a condition due to an injury shall be selected unless that condition is permanent as defined by these rules.

The examining physician shall select the one category which most accurately indicates the overall degree of permanent impairment unless otherwise instructed. Where there is language in more than one category which may appear applicable, the category which most accurately reflects the overall impairment shall be selected.

The categories include appropriate subjective complaints in an ascending scale in keeping with the severity of objective findings, thus a higher or lower category is not to be selected purely on the basis of unusually great or minor complaints.

(h) When the examination discloses a preexisting permanent bodily impairment in the area of the injury, the examining physician shall report the findings and any category of impairment appropriate to the workman's condition prior to his industrial injury in addition to the findings and the categories appropriate to the workman's condition after the injury.

(i) Objective physical or clinical findings are those findings on examination which are independent of voluntary action and can be seen, felt, or consistently measured by examining physicians.

(j) Subjective complaints or symptoms are those perceived only by the senses and feelings of the person being examined which cannot be independently proved or established.

(k) Muscle spasm as used in these rules is an involuntary contraction of a muscle or group of muscles of a more than momentary nature.

(l) An involuntary action is one performed independently of the will.

(m) These special rules for evaluation of permanent bodily impairment shall apply to all examinations for the evaluation of impairment, in accordance with RCW 51.32.080, for the body areas or systems covered by or enumerated in WAC 296-20-230 through 296-20-660.

(n) The rules for evaluation of each body area or system are an integral part of the categories for that body area or system.

(o) In cases of injury or occupational disease of bodily areas and/or systems which are not included in these categories or rules and which do not involve loss of hearing, loss of central visual acuity, loss of an eye by enucleation or loss of the extremities or use thereof, examining physicians shall determine the impairment of such bodily areas and/or systems in terms of percentage of total bodily impairment.

(p) The words used in the categories of impairments, in the rules for evaluation of specific impairments, the

general rules, and the special rules shall be deemed, unless the context indicates the contrary, to have their general and accepted medical meanings.

(q) The rating of impairment due to total joint replacement shall be in accordance with the limitation of motion guidelines as set forth in the "Guides to the Evaluation of Permanent Impairment" of American Medical Association, with department of labor and industries acknowledgement of responsibility for failure of prostheses beyond the seven year limitation.

Real estate agencies - all operations including clerical office and salesmen
Excludes building management and/or property development.

AMENDATORY SECTION (Amending Order 76-18, filed 5/28/76)

WAC 296-17-850 EXPERIENCE RATING PLAN—ELIGIBILITY AND EXPERIENCE PERIOD. (1) Eligibility. Each employer who has reported experience during more than one fiscal year of the "experience period" shall have his base rates multiplied by an "experience modification" calculated in accordance with the rules of this manual. The development of the "experience modification" as set forth in WAC 296-17-855 shall include losses and exposure reported in all risk classes: PROVIDED, That the "experience modification" determined in accordance with WAC 296-17-855 shall not apply to industrial insurance rates in the following classes: 5-5 (WAC 296-17-520)(; and 48-7 (WAC 296-17-648)(; ~~67-7 (WAC 296-17-738), 67-8 (WAC 296-17-739) and 68-9 (WAC 296-17-745))~~). Employer premiums in the foregoing classes shall be computed at base industrial insurance rates as set forth in WAC 296-17-895.

(2) Experience period. The "experience period" shall be the oldest three of the four fiscal years preceding the effective date of premium rates as set forth in WAC 296-17-895.

AMENDATORY SECTION (Amending Order 77-27, filed 11/30/77)

WAC 296-17-855 EXPERIENCE MODIFICATION. The basis of the experience modification shall be a comparison of the actual losses charged to an employer during the experience period with the losses which would be expected for an average employer reporting the same exposures in each classification. The comparison shall contain actuarial refinements designed to mitigate the effects of losses which may be considered catastrophic or of doubtful statistical significance, due consideration being given to the volume of the employer's experience.

Except for those employers who qualify for ~~((use of a transition adjustment factor as specified elsewhere in this Manual))~~ an adjusted experience modification as specified in WAC 296-17-860 or 296-17-865, the experience modification shall be calculated from the formula:

$$A_p + W A_e (=) \pm (1-W) E_e$$

$$\text{MODIFICATION} = \frac{((=) \pm B}{E + B}$$

The components A_p , $W A_e$, and $(1-W) E_e$ are values which shall be charged against an employer's experience record. The component, E , shall be the expected value of these charges for an average employer reporting the same exposures in each classification. The meaning and function of each symbol in the formula is specified below.

" A_p " signifies "primary actual losses". For each claim the primary actual loss is defined as that portion of the claim which is considered completely rateable for all employers and which is to enter the experience modification calculation at its full value. For each claim in excess of ~~((\\$2000))~~ \$2,690, the primary actual loss shall be determined from the formula:

$$\text{Primary loss} = \frac{((+0000)) \underline{6,726}}{\text{Total loss} + ((0000)) \underline{4,036}} \times \text{total loss}$$

Primary actual losses for selected claim values are shown in Table I. For each claim less than ~~((\\$2000))~~ \$2,690 the full value of the claim shall be considered a primary loss.

" A_e " signifies "excess actual losses". For each claim the excess actual loss is defined as that portion of the claim which is not considered completely rateable for all employers. The excess actual loss for each claim shall be determined by subtracting the primary loss from the total loss.

" W " signifies "W value". For each employer, the W value determines the portion of the actual excess losses which shall be included in the calculation of his experience modification, due consideration being given to the volume of his experience. This amount is represented by the symbol " $W A_e$ " in the experience modification formula. W values are set forth in Table II.

" E " signifies "expected losses". An employer's expected losses shall be determined by multiplying his reported exposure in each classification during the experience period by the classification expected loss rate. Expected loss rates are set forth in Table III.

" E_e " signifies "expected excess losses". Expected losses in each classification shall be multiplied by the classification " D -Ratio" to obtain "expected primary losses". Expected excess losses shall then be calculated by subtracting expected primary losses from expected total losses. Each employer shall have a statistical charge included in the calculation of his experience modification, said charge to be actuarially equivalent to the amount forgiven an average employer because of the exclusion of a portion of his excess actual losses. This charge is represented by " $(1-W) E_e$ " in the experience modification formula. D -Ratios are set forth in Table III.

"B" signifies "B value" or "ballast". In order to limit the effect of a single severe accident on the modification of a small employer, a stabilizing element (B value) shall be added to both actual and expected losses. B values are set forth in Table II.

AMENDATORY SECTION (Amending Order 74-40, filed 11/27/74)

WAC 296-17-860 TRANSITION ADJUSTMENT. In the event that an employer has no compensable accidents during the experience period and the experience modification calculated in accordance with WAC 296-17-855 is greater than ((-85)) the experience modification shown in Table IV, WAC 296-17-890 then such modification shall be reduced to ((-85)) the value shown in Table IV. For the purpose of this rule, a compensable accident is defined as one which has resulted in, or is expected to result in, time loss compensation, permanent disability or death.

If a change has occurred which the provisions of subsections (2) through (5) of this section denominate "nominal," the experience of the past shall be utilized for future modification. If, on the other hand, the change is denominated "material," the past experience shall be disregarded and the risk written at manual or otherwise applicable rates.

In application of WAC 296-17-873 through 296-17-87309, ownership changes of any entity which is neither a partnership, a joint venture, nor a corporation that has issued voting stock shall be decided in accordance with the provisions of subsections (2) through (5) of this section applicable to corporations. The provisions of subsections (2) through (5) of this section shall be applied as though the entity has issued voting stock and the stock was:

(a) Held in equal amounts by each of its members; or

(b) If the entity does not have members, held in equal amounts by each member of the board of directors or comparable governing body.

Two or more changes during a twelve-month period shall be considered as a single change.

The department shall in each case determine from the applicable provisions of subsections (2) through (5) of this section whether a change is "nominal" or "material," and if no provision of subsections (2) through (5) of this section is expressly applicable it shall be governed by a consideration of WAC 296-17-873 through 296-17-87309 as a whole and of its several parts interpreted in the light of such relevant evidence as is offered.

NOTE: If two or more different combinations are possible in accordance with the provisions of this

section, the combination producing the greatest amount of expected losses during the experience period shall be made. The experience of any entity used in such combinations may not be otherwise used in combination with any other entity. The experience used in a rating of combination shall be subject to the provisions of WAC 296-17-87305 (Change in ownership).

Exceptions:

It does not apply where concurrent operations are for a short period of time, not exceeding one year, if the operation of the original entity during the period both entities were operating, was restricted to the completion of contracts entered into prior to the new entity commencing operations.

NEW SECTION

(1) Written notice to the department has been made by the affected entity or entities advising of the change of ownership status or the common ownership of a combination of entities: **PROVIDED**, That the effective date of any such revision or withdrawal that would affect the premium covering any periods prior to the calendar quarter during which such notice in writing was furnished the department, will be at the department's discretion to assure that no entity or entities will evade an unfavorable cost;

AMENDATORY SECTION (Amending Order 68, filed 5/25/78)

WAC 251-06-070 ALLOCATION APPEAL—HIGHER EDUCATION PERSONNEL BOARD. (1)

The employee or employee representative may file a written appeal with the board under provisions of WAC 251-06-050 or 251-06-060 when:

(a) The response required in WAC 250-06-060(2) is not issued to the employee or employee representative within the required sixty calendar day period following receipt of the employee request; or

(b) The response fails to address the specific reason(s) that the request was not approved; or

(c) The employee disagrees with the results of ~~((the response))~~ a position review conducted by the personnel officer. The written appeal should include information which will assist the board in determining the proper allocation of the position.

(2) Within thirty calendar days ~~((; but prior to scheduling))~~ of receipt of the appeal ~~((hearing))~~, the director will investigate the appeal and attempt to resolve the allocation to the satisfaction of all parties. This may be extended by thirty calendar days provided the affected employee is given notice of the extension. ~~((If the allocation remains unresolved and the appeal is not withdrawn within fifteen calendar days following the director's review, the director will schedule an appeal hearing with the board or its designee.))~~ The employee will be notified of the director's recommended allocation and of the right to pursue the case to hearing if desired. If the employee wishes to pursue the case to hearing, he/she must so notify the director within twenty-one calendar days of service of the director's notice.

(3) The burden of proof in an allocation appeal shall rest with the appellant.

(4) Allocation appeal hearings will be informal and will allow sufficient time for the parties to present facts pertinent to the proper allocation of a position. The appellant may represent him/herself or may be represented by any person of his/her choosing at the hearing. In appeals heard by a hearing examiner, the hearing examiner will issue a recommended decision within thirty calendar days of the hearing. The recommended decision will be transmitted to both parties by certified mail with a statement regarding the right to file exceptions to the

recommended decision. Within thirty calendar days of service of the recommended decision, any party adversely affected may file written exception to the recommended decision. If no written exceptions are filed, the hearing examiner's recommended decision will become final forty calendar days after service of the recommended decision unless within that forty calendar day period the board issues a notice to each of the parties that a hearing will be scheduled for reconsideration of the hearing examiner's recommended decision. When exceptions are filed, such written statements must indicate in detail the specific items of the recommended decision to which exception is taken. Thereafter, a hearing on the exceptions will be scheduled before the board at which time all parties may present written and/or oral argument. Within thirty calendar days of hearing the testimony or arguments upon exceptions, the board will issue a decision which is final and binding.

AMENDATORY SECTION (Amending Order 62, filed 8/30/77)

WAC 251-09-020 WORK PERIOD DESIGNATIONS. Each position will be assigned by the personnel officer to one of the work period designations identified below, and employees will be informed of their eligibility for overtime compensation.

(1) Scheduled work periods, within which there are two work schedules:

(a) Regular work schedule. The regular work schedule for full time classified employees shall consist of five consecutive and uniformly scheduled eight hour days in a seven day period. Uniformly scheduled means a daily repetition of the same working hours and a weekly repetition of the same working days.

(b) Alternate work schedule. Operational necessity or employee convenience may require positions that are normally designated regular work schedule to work an alternate forty hour work schedule (other than five uniform and consecutive eight hour days in a seven day period), or as provided by the Washington State Minimum Wage Law in conjunction with the federal law which provides for an eighty hour workweek in a fourteen day period for hospital personnel. Alternate work schedules shall be made available upon request of the director.

(2) Nonscheduled work period. The nonscheduled work period designation applies to those positions for which the hours cannot be scheduled but which work a forty hour week and do not meet any of the other work period designations. The personnel officer shall designate positions as nonscheduled in accordance with the institution's procedure approved by the director.

(3) Excepted work period. The excepted work period designation applies to classes and positions which meet the HEPB definitions of executive, administrative, or professional employees and are assigned to salary ranges (~~forty-five~~) twenty-three and above. Qualifying classes will be approved by the director. Each personnel officer will be responsible for determining the positions designated "excepted" at his/her institution. The personnel officer will develop a procedure for verifying "excepted" positions which will be available for review by the director.

AMENDATORY SECTION (Amending Order 65, filed 1/30/78)

WAC 251-18-115 EXAMINATION—ELIGIBILITY—RIGHT OF APPEAL OR REVIEW. (1) An applicant shall have the right to appeal to the higher education personnel board as provided in subsection (2) (~~below~~) when:

- (a) His/her application has been rejected; or
- (b) He/she feels the examination/certification process or (~~grade~~) score unfair, in error, or not applied uniformly; or
- (c) His/her name has been removed from an eligible list.

(2) Such appeal must be in writing and be filed in the office of the director within thirty calendar days after the effective date of the action appealed. The director shall forward the written notice of appeal to the board which shall determine that one of the following actions be taken:

(a) The case may be handled in the same manner as appeals from demotion, suspension, layoff, reduction or dismissal, as provided in WAC 251-12-080 through 251-12-260; or

(b) The director may investigate the case and based upon that investigation issue a determination.

- (i) When the appellant is a classified employee of the institution, within thirty calendar days of the date of service either party may file written exceptions with the board detailing the specific items of the determination to which exception is taken. A hearing on the exceptions will be scheduled before the board which may limit argument to the exceptions or may rehear the case in its entirety.
- (ii) When the appellant is not a classified employee of the institution, the director's determination shall be final and binding; or
- (c) Both parties to the appeal may be requested to submit evidence upon which the board may take action without a hearing.

EMERGENCY RULES

HIGHER EDUCATION PERSONNEL BOARD

[Order 82—Filed December 3, 1979]

Be it resolved by the Higher Education Personnel Board acting at Green River Community College, Auburn, Washington, that it does promulgate and adopt the annexed rules relating to Sick leave—Reporting payment—Verification, amending WAC 251-22-111.

We, the Higher Education Personnel Board, find that an emergency exists and that the foregoing order is necessary for the preservation of the public health, safety, or general welfare and that observance of the requirements of notice and opportunity to present views on the proposed action would be contrary to public interest. A statement of the facts constituting such emergency is to accommodate the provisions of SSB 2030 which require

that administrative rules be available for use effective January 1, 1980.

Such rules are therefore adopted as emergency rules to take effect upon filing with the code reviser.

This rule is promulgated under the general rule-making authority of the Higher Education Personnel Board as authorized in RCW 28B.16.100.

The undersigned hereby declares that he has complied with the provisions of the Open Public Meetings Act (chapter 42.30 RCW), the Administrative Procedure Act (chapter 34.04 RCW) or the Higher Education Administrative Procedure Act (chapter 28B.19 RCW), as appropriate, and the State Register Act (chapter 34.08 RCW).

AMENDATORY SECTION (Amending Order No. 71-3, filed March 25, 1971)

WAC 296-04-005 APPRENTICESHIP AND TRAINING AGREEMENTS—PROPOSED STANDARDS. The Washington State Apprenticeship and Training Council is the body responsible for matters concerning apprenticeship and training in the State of Washington. The principal function of the Council is to approve and register apprenticeship and training agreements. Persons or organizations desiring to institute an apprenticeship or training program must first prepare proposed standards which conform to these rules and to RCW 49.04.050. The standards must also include the composition of and general rules for the committee which will administer the program. The supervisor, or Washington State apprenticeship coordinators, are available to give assistance in this task.

These standards, which will be either a plant program or committee program as defined herein, must then be presented to the supervisor at least 30 days before the regular meeting at which the Council will be requested to consider such proposed standards. The standards proposed will then be discussed by the Council and approved, disapproved, or approved subject to enumerated changes. Minor changes may be made at the Council meeting if authorized representatives of all concerned are present and authorized to accept changes.

The committee thus set up then begins functioning. Its duties are to run the day to day operations of the apprenticeship and training program. It is charged with operating the program in accordance with the standards as approved by the Council. It is charged with accepting or rejecting applicants for apprenticeship or training, registering accepted applicants as apprentices or trainees with the Supervisor of Apprenticeship and Training, removing apprentices or trainees from the program in accordance with the standards and informing the supervisor of any matters which affect the standing of individuals as apprentices or trainees. Persons not registered with the supervisor as apprentices or trainees cannot be recognized as apprentices or trainees by the Council.

The supervisor and his staff may be consulted on any matters concerning apprenticeship and training, and they will provide any information concerning apprenticeship training which is available to them. They are also required to investigate any discrepancies between the actual and required operation of any program and conduct systematic reviews of the operation of all programs. The supervisor may recommend cancellation of any program which is not operated in accordance with its approved standards after notice of violation is given in accordance with the provisions of WAC 296-04-270(3).

~~((Any person, firm, committee, agency, or other body, aggrieved by a decision of the supervisor or of any committee may appeal that decision to the Council in accordance with the provisions of WAC 296-04-290.))~~ The supervisor and the Council will act to assist in the resolution of any complaints against local committees, or other organizations administering apprenticeship agreements, by any apprentices who have completed their probationary period, as provided in WAC 296-04-295.

Reviser's Note: RCW 34.04.058 requires the use of underlining and deletion marks to indicate amendments to existing rules. The rule published above varies from its predecessor in certain respects not indicated by the use of these markings.

(ii) Up to one hundred eighty dollars per month may be exempted from the individual's actual income based on the verified actual cost to retain the home during six consecutive months.

(iii) The six-month period begins on the first of the month following date of admission for medicaid eligible recipients or the date of eligibility for individuals changing from private to medicaid and ceases when patient is discharged to an independent living arrangement or at the end of six months if the recipient has not been discharged.

AMENDATORY SECTION (Amending Chapter 204-990, Regulation No. 320 (Repealed))

((STATE COMMISSION ON EQUIPMENT REGULATION NO. 320

AMENDMENT TO THE RULES AND REGULATIONS OF THE STATE COMMISSION ON EQUIPMENT RELATING TO TRAILER HITCHES AND DRAWBARS

Pursuant to the authority granted by chapter 46.36 RCW, section 11.06, entitled "Trailer Hitches and Drawbars," being a part of the Vehicle Inspection Manual known as Regulation No. 18, relating to vehicle equipment and the proper adjustment thereof, adopted by the State Commission on Equipment April 15, 1948, is hereby amended to read as follows:

SECTION 11.06 TRAILER HITCHES AND DRAWBARS

11.061 Trailer Hitches shall be divided into two (2) general classifications:

- (1) Passenger-car-trailer couplings.
(2) Commercial-vehicle-trailer couplings.

PASSENGER-CAR-TRAILER-COUPLINGS

11.062 Definition - The term passenger-car trailer is intended to refer to all types of trailers which are towed by the conventional passenger car (except buses). The following recommendations apply only to passenger-car trailers that are drawn by passenger cars and on which the coupling or couplings are located at the rear of the body of the towing vehicle. This Regulation is intended primarily for ball-and-socket, ring-and-pintle, and clevis-and-pin types of coupling. It should not be construed as a limitation to these three (3) basic types alone, but will apply to any draft means designed to serve this purpose.

11.063 Coupling Nomenclature - The following have been adopted for uniformity in the terms used for the component parts of the trailer-coupling mechanism:

- (1) The HITCH is that part of the connecting mechanism, including the coupling platform, which is attached to the towing vehicle.
(2) The COUPLING is that part of the connecting mechanism by which the connection is actually made and including the supporting mechanism back to the trailer frame.

11.064 Passenger-Car-Trailer Classifications:

- Class A - All types of passenger-car-utility trailers with a gross weight not to exceed 2000 pounds.
Class B - All types of passenger-car trailers with a gross weight of 2000 pounds and not to exceed 5000 pounds.
Class C - All types of passenger-car trailers with a gross weight of 5000 pounds and not to exceed 10,000 pounds.

11.065 Coupling Classifications - There shall be three (3) sizes of couplings to cover all passenger-car trailers:

- Number 1 - Trailer coupling with a minimum ball diameter of 1-7/8 inches to be used for Class A trailers.
Number 2 - Trailer coupling with a minimum ball diameter of 2 inches to be used for Class B trailers.
Number 3 - Trailer coupling with a minimum ball diameter of 2-5/16 inches to be used for Class C trailers.

Strength ratings for the various coupling classifications shall conform to current SAE strength ratings for passenger-car couplings.

11.066 Hitch - The hitch and coupling platform shall be of such design as to conform to the minimum strength requirements of coupling classification. Where a ball-and-socket type of coupling is used, the ball must conform to the minimum load ratings of the mating coupling (SAE Specifications):

11.067 Location of Hitch - Attachment to towing-car bumpers is limited to Class A trailers unless suitable means are provided for stiffening the bumper bar and transferring stress loading to the frame through the bumper brackets or by direct connection to the frame.

11.068 Rear License Plate Not To Be Obscured - The hitch and coupling platform attached to the rear of a motor vehicle shall not obscure the rear license number plate displayed on such vehicle.

11.069 Provision for Safety - Couplings in all classes shall be equipped with a manually operated mechanism so adapted as to prevent disengagement of the unit while in operation. In addition to this positive locking mechanism, the hitch shall be so designed that it can be disconnected regardless of the angle of the trailer to the towing vehicle. In addition to the prescribed couplings there shall be a safety chain coupling used to cause the trailer to follow substantially in the course of the towing vehicle and to prevent the trailer drawbar from dropping to the ground in the event of failure of the coupling.

11.070 Single-Wheel-Utility Trailers - Single-wheel-utility-trailer hitches shall be connected directly to the bumper of the towing passenger car. Single-wheel-utility trailers shall not be required to be equipped with a safety chain. The hitch bolts or pins shall be securely fastened with lock nuts, cotter keys, or safety wire when such type of trailer is attached to the rear of a passenger-carrying vehicle.

COMMERCIAL-VEHICLE-TRAILER COUPLINGS

11.071 Commercial-Vehicle-Trailer Couplings - Commercial-vehicle-trailer coupling devices and towing methods shall be those prescribed in Sections 193.70 and 193.71 of the Interstate Commerce Commission Revised Motor Carrier Safety Regulations effective July 1, 1952, and are hereby made a part of this Regulation.

WAC 248-64-290 VENTILATION. ~~((1) Natural Ventilation Requirements—In instructional areas, assembly rooms and meeting rooms, clear opening of not less than 4 percent of floor area shall be provided by operable external windows, doors and/or other openings except in auditoriums and gymnasiums provided with mechanical ventilation or rooms provided with air conditioning, as described hereinafter. Openings must be arranged both at the bottom and the top where they are located all on one wall. To prevent objectionable drafts on occupants, the introduction of supply air into all rooms must be arranged to insure thorough mixing with room air and dissipation of velocity before entering the occupied zone.~~

(2) Mechanical Ventilation:

(a) Instructional areas, meeting and assembly rooms:

(i) All rooms normally used for instructional areas, assembly or meetings shall have a tempered mechanical ventilation system, automatically controlled. Mechanical ventilation will not be required for those rooms occupied less than six hours per week or for rooms such as gymnasiums having a volume of 700 cubic feet or more per occupant or for those schools constructed prior to April 2, 1960, except as hereinafter required.

(ii) The ventilation system air quantities shall be the same as required in WAC 248-64-290(3), Air Conditioning, for rooms provided with air conditioning. In no case shall the air supply rate in instructional areas be less than 1.3 cubic feet per minute (c.f.m.) per square foot of floor area.

(iii) The system shall be designed to automatically mix recirculated air and outside air, to provide atmospheric cooling. The air supply system shall be arranged to provide 100 percent outside air during the nonheating season.

(iv) The minimum outside air introduced after the room is up to temperature during occupancy shall be not less than 5 c.f.m. per occupant.

(v) The heating and distribution system shall provide a temperature differential in the occupied zone not to exceed plus or minus 2 percent

Fahrenheit. The terminal air velocities in occupied zone shall not exceed 50 feet per minute (f.p.m.).

(vi) Rooms with air supply systems shall be provided with exhaust equal to the rate of outside air introduction which is in excess of the minimum outside air ventilation requirements as stated in WAC 248-64-290(2)(a)(iv).

(b) Toilet Room Ventilation: All toilet rooms shall be ventilated by means of a mechanical exhaust, exhausting to the outside at the rate of not less than 2.5 c.f.m. per square foot of floor area.

(c) Shower—Drying Areas and Locker Rooms:

(i) All shower drying areas, physical education locker rooms and physical education clothing storage areas shall be ventilated by means of a mechanical exhaust, exhausting to the outside at the rate of not less than 2.5 c.f.m. per square foot of floor area.

(ii) If shower drying or locker rooms are combined into a single use area, the ventilation requirements are satisfied if design is based upon the square footage of the largest single use space, provided the air movement is essentially uniform throughout any given space.

(iii) The supply air may be introduced indirectly from other areas.

(d) Student coat and book locker rooms shall have mechanical exhaust at a minimum rate of 0.67 c.f.m. per square foot of floor area.

(e) Athletic Uniform and Equipment Drying Rooms:

(i) Athletic uniform and equipment drying rooms shall be ventilated by means of a mechanical exhaust, exhausting to the outside at the minimum rate of 2.5 c.f.m. per square foot of floor area.

(ii) The supply air may be introduced indirectly from other areas.

(f) Special Areas:

(i) At all locations where excessive odors, dust, heat fumes or moisture are generated or produced, such as laboratories, kitchens, shops, laundries, etc., whether constructed prior to or after 1960, local mechanical exhaust systems shall be provided. Hood air quantities and design shall comply with Chapter 20, 1970 edition of the American Society of Heating, Refrigeration and Air Conditioning Engineers Guide for Industrial Exhaust Systems.

(ii) Home economics food preparation rooms will not be subject to the foregoing requirements but shall be provided with mechanical supply and exhaust systems capable of exhausting at the minimum rate of 1.33 c.f.m. per square foot of floor area.

(g) Make-up air supply requirements:

(i) Every area which is exhausted shall be provided with a method of introducing tempered make-up air at a rate not less than that exhausted.

(ii) The minimum total outside air quantities introduced into a building to replace exhausted air quantities shall be equal to or in excess of that exhausted.

(iii) Means shall be provided to maintain an air balance throughout the building. Indirect methods of air make-up may be employed if definite means of air transfer between areas are provided.

(3) Air Conditioning:

(a) Air conditioning shall be provided in the following spaces and under the following conditions:

Outside design conditions shall be as set forth in Chapter 22, 1967 edition of the American Society of Heating, Refrigeration and Air Conditioning Engineers Guide and Data Book, using the one percent frequency incident temperature values, or other published U.S. Weather Bureau data for the respective area based on the same frequency incident temperature values.

(c) The air conditioning system and the heating system shall provide a temperature differential in the occupied zone not to exceed plus or minus 2 degrees Fahrenheit. The terminal air velocities in the occupied zone shall not exceed 50 feet per minute (f.p.m.). The supply air quantities shall be determined using a supply air temperature not more than 25 degrees Fahrenheit below room temperature.

(d) The introduction of 100 percent of outside air for atmospheric cooling is not required with air conditioning.

(e) Minimum outside air quantities shall be based on not less than 5 c.f.m. per occupant.

(4) Air Filtration:

(a) Where mechanical ventilation or air conditioning is provided, outside air that is introduced into the system and recirculated air shall be filtered.
