STYLE AND FORMAT OF THE WASHINGTON STATE REGISTER

1. ARRANGEMENT OF THE REGISTER

Documents are arranged within each issue of the Register according to the order in which they are filed in the code reviser's office during the pertinent filing period. The three part number in the heading distinctively identifies each document, and the last part of the number indicates the filing sequence within an issue's material.

2. PROPOSED, ADOPTED, AND EMERGENCY RULES OF STATE AGENCIES AND INSTITUTIONS OF HIGHER EDUCATION

The three types of rule-making actions taken under the Administrative Procedure Act (chapter 34.04 RCW) or the Higher Education Administrative Procedure Act (chapter 28B.19 RCW) may be distinguished by the size and style of type in which they appear.

- (a) **Proposed rules** are those rules pending permanent adoption by an agency and are set forth in eight point type.
- (b) **Adopted rules** have been permanently adopted and are set forth in ten point type.
- (c) **Emergency rules** have been adopted on an emergency basis and are set forth in ten point oblique type.

3. PRINTING STYLE—INDICATION OF NEW OR DELETED MATERIAL

RCW 34.04.058 requires the use of certain marks to indicate amendments to existing agency rules. This style quickly and graphically portrays the current changes to existing rules as follows:

- (a) In amendatory sections—
 - (i) underlined material is new material;
 - (ii) ~~deleted material is ((lined out and bracketed between double parentheses))~~;
- (b) Complete new sections are prefaced by the heading NEW SECTION;
- (c) The repeal of an entire section is shown by listing its WAC section number and caption under the heading REPEALER.

4. EXECUTIVE ORDERS, COURT RULES, NOTICES OF PUBLIC MEETINGS

Material contained in the Register other than rule-making actions taken under the APA or the HEAPA does not necessarily conform to the style and format conventions described above. The headings of these other types of material have been edited for uniformity of style; otherwise the items are shown as nearly as possible in the form submitted to the code reviser's office.

5. EFFECTIVE DATE OF RULES

- (a) Permanently adopted agency rules take effect thirty days after the rules and the agency order adopting them are filed with the code reviser's office. This effective date may be delayed, but not advanced, and a delayed effective date will be noted in the promulgation statement preceding the text of the rule.
- (b) Emergency rules take effect upon filing with the code reviser's office and remain effective for a maximum of ninety days from that date.
- (c) Rules of the state Supreme Court generally contain an effective date clause in the order adopting the rules.

6. EDITORIAL CORRECTIONS

Material inserted by the code reviser's office for purposes of clarification or correction or to show the source or history of a document is enclosed in brackets [].

7. INDEX AND TABLES

A combined subject matter and agency index and a table of WAC sections affected may be found at the end of each issue.

I, Ernest F. LaPalm, deputy commissioner of the Employment Security Department, do promulgate and adopt at Olympia, Washington, the annexed rules relating to bonding and deposit requirements, nonprofit organizations, WAC 192-12-115.

This action is taken pursuant to Notice No. WSR 87-19-144 filed with the code reviser on September 23, 1987. These rules shall take effect thirty days after they are filed with the code reviser pursuant to RCW 34.04.040(2).

This rule is promulgated under the general rule-making authority of the Employment Security Department as authorized in RCW 50.12.010 and 50.12.040.

The undersigned hereby declares that the agency has complied with the provisions of the Open Public Meetings Act (chapter 42.30 RCW), the Administrative Procedure Act (chapter 34.04 RCW) and the State Register Act (chapter 34.08 RCW) in the adoption of these rules.

AMENDATORY SECTION (Amending Order 1-78, filed 8/14/78)

WAC 192-12-115 BONDING AND DEPOSIT REQUIREMENTS, NONPROFIT ORGANIZATIONS. RCW 50.44.070 provides:

"In the discretion of the commissioner, any nonprofit organization that elects to become liable for payments in lieu of contributions shall be required . . . to execute and file with the commissioner a surety bond approved by the commissioner or it may elect instead to deposit with the commissioner money or securities. . . .

". . . The amount of the bond or deposit . . . shall be an amount deemed by the commissioner to be sufficient to cover any reimbursement payments which may be required from the employer attributable to employment during any year for which the election is in effect . . . The determination made pursuant to this subsection shall be based on payroll information, employment experience, and such other factors as the commissioner deems pertinent."

The commissioner accordingly prescribes:

(1) ((F)) For up to the first two years of employment, any newly registered nonprofit organization that elects to become liable for payments in lieu of contributions is required to execute and file a surety bond, establish an assigned savings account, or deposit money or securities. At the end of the initial period of reimbursement (maximum two years), assuming continuation of the election, a renewal of the bond, assigned savings, or deposit may be necessary if:

(a) The employer is delinquent in the payment of reimbursable charges, or

(b) The employer has failed to file a quarterly report.

(2) Any active or previously active nonprofit organization that elects to become liable for payments in lieu of contributions may be required to execute and file a surety bond, establish an assigned savings account, or deposit money or securities if:

(a) The employer is delinquent in the payment of reimbursable charges, or

(b) The employer has failed to file a quarterly report.

(3) For active employers, the amount of bond, savings, or deposit shall be determined by reviewing and computing taxable wages paid during the previous four quarters. For newly registered employers, the amount shall be determined by estimating the taxable wages for the next four quarters. Taxable wages will be determined on the basis of the coming year's taxable wage base. The net annual taxable wage so developed multiplied by the current average industry tax rate will produce the amount of bond, savings, or deposit necessary for the coming calendar year.

The amount of bond requirement may be rounded in accordance with the following scale:

Computed Bond Requirement	May Be Rounded Down To
Up to \$500	Even \$5 segment
\$501 to \$5000	Even \$25 segment
\$5001 to \$50,000	Even \$100 segment
OVER \$50,000	Even \$1000 segment

((F)) (4) In the event an organization did not pay wages during the prior four consecutive quarters, then an estimated payroll based on the best information available will be used for the computation described in subsection ((F)) (3) of this section.

((F)) (5) Bond, savings, or deposit requirements will be reviewed ((and recomputed)) annually during the ((fourth)) third quarter of each calendar year ((for adequacy)) to determine if renewal is necessary. The employer will be notified of any necessary change ((in amount of bond or deposit as prescribed in RCW 50.44-070 (2) and (3))).

((F)) (6) The following categories of nonprofit organizations are exempt from the bonding, assigned savings, and deposit requirement: Hospitals, colleges and universities.

Reviser's note: RCW 34.04.058 requires the use of underlining and deletion marks to indicate amendments to existing rules. The rule published above varies from its predecessor in certain respects not indicated by the use of these markings.

NEW SECTION

WAC 458-20-19301 MULTIPLE ACTIVITIES TAX CREDITS. (1) Introduction. Under the provisions

of RCW 82.04.440 as amended effective August 12, 1987, Washington State's business and occupation taxes imposed under chapter 82.04 RCW were adjusted to achieve constitutional equality in the tax treatment of persons engaged in intrastate commerce (within this state only) and interstate commerce (between Washington and other states). The business and occupation tax system taxes the privilege of engaging in specified business activities based upon "gross proceeds of sales" (RCW 82.04.070) and the "value of products" (RCW 82.04.450) produced in this state. In order to maintain the integrity of this taxing system, to eliminate the possibility of discrimination between taxpayers, and to provide equal and uniform treatment of persons engaged in extracting, manufacturing, and/or selling activities regardless of where performed, a statutory system of internal and external tax credits was adopted, effective August 12, 1987. This tax credits system replaces the multiple activities exemption which, formerly, assured that the gross receipts tax would be paid only once by persons engaged in more than one taxable activity in this state in connection with the same end products. Unlike the multiple activities exemption which only prevented multiple taxation from within this state, the credits of the new system apply for gross receipts taxes paid to other taxing jurisdictions outside this state as well.

(2) Definitions. For purposes of this section the following terms will apply.

(a) "Credits" means the multiple activities tax credit(s) authorized under this statutory system also referred to as MATC.

(b) "Gross receipts tax" means a tax:

(i) which is imposed on or measured by the gross volume of business, in terms of gross receipts or in other terms, and in the determination of which the deductions allowed would not constitute the tax an income tax or value added tax; and

(ii) which is not, pursuant to law or custom, separately stated from the selling price.

(c) "Extracting tax" means a gross receipts tax imposed on the act or privilege of engaging in business as an extractor, and includes the tax imposed by RCW 82.04.230 (tax on extractors) and similar gross receipts taxes paid to other states.

(d) "Manufacturing tax" means a gross receipts tax imposed on the act or privilege of engaging in business as a manufacturer, and includes:

(i) the taxes imposed in RCW 82.04.240 (tax on manufacturers) and subsections (2) through (5) and (7) of RCW 82.04.260 (tax on special manufacturing activities) and

(ii) similar gross receipts taxes paid to other states.

The term "manufacturing tax," by nature, includes a gross receipts tax upon the combination of printing and publishing activities when performed by the same person.

(e) "Selling tax" means a gross receipts tax imposed on the act or privilege of engaging in business as a wholesaler or retailer of tangible personal property in this state or any other state. The term "selling" has its

common and ordinary meaning and includes the acts of making either wholesale sales or retail sales or both.

(f) "State" means:

- (i) the State of Washington,
- (ii) a State of the United States other than Washington or any political subdivision of such other state,
- (iii) the District of Columbia,
- (iv) territories and possessions of the United States, and
- (v) any foreign country or political subdivision thereof.

(g) "Taxes paid" means taxes legally imposed and actually paid in terms of money, credits, or other emoluments to a taxing authority of any "state." The term does not include taxes for which liability for payment has accrued but for which payment has not actually been made. This term also includes business and occupation taxes being paid to Washington State together with the same combined excise tax return upon which MATC are taken.

(h) "Business," "manufacturer," "extractor," and other terms expressly defined in RCW 82.04.020 through 82.04.212 have the meanings given in those statutory sections regardless of how the terms may be used for other states' taxing purposes.

(3) Scope of credits. This integrated tax credits system is intended to assure that gross receipts from sales or the value of products determined by such gross receipts are taxed only one time, whether the activities occur entirely within this state or both within and outside this state. External tax credits arise when activities are taxed in this state and similar activities with respect to the same products produced and sold are also subject to similar taxes outside this state. There are five ways in which external tax credits may arise because of taxes paid in other states.

(a) Products or ingredients are extracted (taken from the ground) in this state and are manufactured or sold and delivered in another state which imposes a gross receipts tax on the latter activity(s). The credit created by payment of the other state's tax may be used to offset the Washington extracting tax liability.

(b) Products are manufactured, in whole or in part, in this state and sold and delivered in another state which imposes a gross receipts tax on the selling activity. Again, payment of the other state's tax may be taken as a credit against the Washington manufacturing tax liability.

(c) Conversely, products or ingredients are extracted outside this state upon which a gross receipts tax is paid in the state of extracting, and which are sold and delivered to buyers here. The other state tax payment may be taken as a credit against Washington's selling taxes.

(d) Similarly, products are manufactured, in whole or in part, outside this state and sold and delivered to buyers here. Any other state's gross receipts tax on manufacturing may be taken as a credit against Washington's selling tax.

(e) Products are partly manufactured in this state and partly in another state and are sold and delivered here or in another state. The combination of all other states'

gross receipts taxes paid may be taken as credits against Washington's manufacturing and/or selling taxes.

Thus, the external tax credits may arise in the flow of commerce, either upstream or downstream from the taxable activity in this state, or both. Products extracted in another state, manufactured in Washington State, and sold and delivered in a third state may derive credits for taxes paid on both of the out of state activities.

Internal tax credits arise from multiple business activities performed entirely within this state, all of which are now subject to tax, but with the integrated credits offsetting the liabilities so that tax is only paid once on gross receipts. Under this system Washington extractors and manufacturers who sell their products in this state at wholesale and/or retail must report the value of products or gross receipts under each applicable tax classification. Credits may then be taken in the amount of the extracting and/or manufacturing tax paid to offset the selling taxes due. There are three ways in which credits may arise because of taxes paid exclusively in this state.

(f) Products are extracted in Washington and directly sold in Washington. Extracting business and occupation tax and selling business and occupation tax must both be reported but the payment of the former is a credit against the latter.

(g) Similarly, ingredients are extracted in Washington and manufactured into new products in this state. The extracting business and occupation tax reported and paid may be taken as a credit against manufacturing tax reported.

(h) Products manufactured in Washington are sold in Washington. Again, the payment of the manufacturing tax reported may be credited against the selling tax (wholesaling and/or retailing business and occupation tax) reported.

All of the external and internal tax credits derived from any flow of commerce may be used, repeatedly if necessary, to offset other tax liabilities related to the production and sale of the same products.

(4) Eligibility for taking credits. Statutory law places the following eligibility requirements and limitations upon the MATC system.

(a) The amount of the credit(s), however derived, may not exceed the Washington tax liability against which the credit(s) may be used. Any excess of credit(s) over liability may not be carried over or used for any purpose.

(b) The person claiming the credit(s) must be the same person who is legally obligated to pay both the taxes which give rise to the credit(s) and the taxes against which the credit is claimed. The MATC is not assignable.

(c) The taxes which give rise to the credit(s) must be actually paid before credit may be claimed against any other tax liability. Tax liability merely accrued is not creditable.

(d) The business activity subject to tax, and against which credit(s) is claimed, must involve the same ingredients or product upon which the tax giving rise to the credit(s) was paid. The credits must be product-specific.

(e) The effective date for developing and claiming credit(s) for products manufactured in Washington

State and sold and delivered in other states which impose gross receipts selling taxes is June 1, 1987.

(f) The effective date for developing and claiming all credits other than those explained in subsection (e) above, is August 12, 1987.

(g) Persons who are engaged only in making wholesale or retail sales of tangible personal property which they have not extracted or manufactured are not entitled to claim MATC. Also, persons engaged in rendering services in this state are not so entitled, even if such services have been defined as "retail sales" under RCW 82.04.050. (See WAC 458-20-194 for rules governing apportionment of gross receipts from interstate services).

(5) Other states' qualifying taxes. The law defines "gross receipts tax" paid to other states to exclude income taxes, value added taxes, retail sales taxes, use taxes, or other taxes which are generally stated separately from the selling price of products sold. Only those taxes imposed by other states which include gross receipts of a business activity within their measure or base are qualified for these credit(s). The burden rests with the person claiming any MATC for other states' taxes paid to show that the other states' tax was a tax on gross receipts as defined herein. Gross receipts taxes generally include:

(a) Business and occupation privileges taxes upon extracting, manufacturing, and selling activities which are similar to those imposed in Washington State in that the tax measure or base is not reduced by any allocation, apportionment, or other formulary method resulting in a downward adjustment of the tax base. If costs of doing business may be generally or routinely deducted from the tax base, the tax is not one which is similar to Washington State's gross receipts tax.

(b) Severance taxes measured by the selling price of the ingredients or products severed (oil, logs, minerals, natural products, etc.) rather than measured by costs of production, stumpage values, the volume or number of units produced, or some other formulary tax base.

(c) Business franchise or licensing taxes measured by the gross volume of business in terms of gross receipts or other financial terms rather than units of production or the volume of units sold.

Other states' tax payments claimed for MATC must be identifiable with the same ingredients or products which incurred tax liability in Washington State, i.e., they must be product specific.

(d) The department will periodically publish an excise tax bulletin listing current taxes in other jurisdictions which are either qualified or disqualified for credit under the MATC system.

(6) Deductions in combination with MATC. Effective August 12, 1987, with the enactment of the MATC system, the liability for actual payment of tax by persons who extract, manufacture, and sell products in this state was shifted from the selling activity (wholesaling or retailing) to the production activity (extracting and/or manufacturing). As explained, the payment of the production taxes may now be credited against the liability for selling taxes on the same products. However, the deductions from tax provided by chapter 82.04 RCW (business and occupation tax deductions) may still be

taken before tax credits are computed and used, with noted exceptions. In order for the MATC system to result in the correct computation of tax liabilities and credit applications, the tax deductions which may apply for any reporting period must be taken equally against both levels of tax liability reported, i.e., at both the production and selling levels. Failure to report tax deductions in this manner will result in overreporting tax due and may result in overpayment of tax. Thus, with the exceptions noted below, tax deductions formerly reported only against selling activities should now be reported against production activities as well. All such deductions, the result of which is to reduce the measure of tax reported, should be taken against both the production taxes (extracting or manufacturing) and the selling taxes (wholesaling and/or retailing) equally.

(a) Example:

(i) A company manufactures products in Washington which it also sells at wholesale for \$5,000 and delivers to a buyer in this state. The buyer defaults on part of the payment and the seller incurs a \$2,000 credit loss which it writes off as a bad debt during the tax reporting period. The bad debt deduction provided by RCW 82.04.4284 must be shown on both the manufacturing-other line and the wholesaling-other line of the combined excise tax return. Taking the deduction on only one of those activities results in overreported tax liability on the \$2,000 loss.

(b) Exceptions. The deductions generally provided by RCW 82.04.4286, for interstate or foreign sales (where goods are sold and delivered outside this state) may not be taken against tax reported at the production level (extracting or manufacturing). This is because the MATC system itself provides for tax credits instead of tax deductions on gross receipts from transactions involving goods produced in this state and sold in interstate or foreign commerce. Thus, deductions which eliminate transactions from tax reporting may be taken only against selling taxes.

(c) Applicable deductions should be shown on the front of the combined excise tax return (column #3) on each applicable tax classification line and detailed on the back side of the return, as usual, before MATC is taken.

(d) It is not the intent of the MATC law to invalidate or nullify the business and occupation tax exemption for taxable amounts below minimum (see WAC 458-20-104). Thus any person whose gross receipts or value of products reported under any single tax classification with respect to the production and sale of any product is less than the minimum taxable amount will not incur tax liability merely because of the requirement to report those gross receipts or value of products on the same product under other tax classifications as well.

(i) Example: a person both manufactures and sells at wholesale \$2,000 worth of widgets in the first quarter of a tax year. The requirement to report the \$2,000 tax measure under both the manufacturing-other classification and the wholesaling-other classification gives the false appearance of \$4,000 in gross receipts during this quarter. However, only the amount reported under the manufacturing-other classification need be considered to

determine eligibility for the amount-below-minimum exemption.

(7) How and when to take MATC. The credits available under the MATC system are all to be taken on the combined excise tax return beginning in August, 1987 and thereafter. The return form has been modified to accommodate these credits. Each tax return upon which MATC has been taken must be accompanied by a completed Schedule C. This schedule details the business activities and credits computations. The line by line instructions insure that no more or no less credits are claimed than are authorized under the law.

(8) Consolidation of tax liabilities and credits. Under the MATC system a person's Washington tax liability for all activities involved in that person's production and sale of the same ingredients or products (extracting, and/or manufacturing, and/or selling) is to be reported only at the time of the sale of such products or at the time of that person's own use of such products for commercial or industrial consumption. All of the taxable activities are to be reported on that same periodic excise tax return. Also, all external and internal tax credits derived from the payment of any gross receipts taxes on any of these activities are to be taken at that time. Thus, the taxable activities and the tax credits are procedurally consolidated for reporting. This consolidation generally overcomes any need to track ingredients or products from their extraction to their sale. It also overcomes any need to report and pay Washington tax liability during one reporting period and to take credits against that tax liability in a different reporting period. Thus, except as noted below, there can be no credit carryovers or carrybacks under this system.

(a) Exception. Where different tax reporting periods are assigned by Washington State and another state to a company doing business both within and outside Washington State, the other state's gross receipts tax on the same products may not yet have been paid when the Washington tax is due for reporting and payment. In such cases the Washington tax due must be timely reported and paid during the period in which the sale is made. The external credit arising later, when the other state's tax is paid, may be taken as a credit against any Washington business and occupation tax reported during that later period. Thus, the limitation that the MATC must be product-specific by being limited to the amount of Washington tax paid on the same products does not mean that the credit(s) can only be used against precisely those same Washington taxes paid.

(i) In the situation described in subsection (a) above, if there is not sufficient Washington business and occupation tax due for payment in the later period, when the external tax credit arises, to allow for utilization of the entire credit, the amount of any overage may be carried forward and taken against Washington taxes reported in subsequent reporting periods until fully used.

When filing such exception returns, the full amount of any credits should be claimed, even though that credit amount will exceed the amount of tax liability reported for that period. The department of revenue itself will make the necessary adjustments and will perform the

carrying over of any excess credits into future reporting periods.

(ii) In the same situation, if the person entitled to claim such credit overage is no longer engaged in taxable business in this state or for any other reason does not incur sufficient Washington business and occupation tax liability to fully utilize the perfected credit overage, a tax refund will be issued.

(iii) No tax refunds, MATC carryovers, or MATC carrybacks will be allowed under any circumstances other than those explained above.

(b) Special circumstances may arise where it is not possible to specifically identify ingredients or products as they move from production to sale (e.g., fungible commodities from various sources stored in a common warehouse). In such cases the taxpayer should seek advance approval from the department, in writing, for tax reporting and credit taking on a test period, formulary, or volume percentage basis, subject to audit verification.

(9) Recordkeeping requirements. Persons claiming the MATC must keep and preserve such records and documents as may be necessary to prove their entitlement to any credits taken under this system (RCW 82.32.070). It is not required to submit copies of such proofs when credits are claimed or together with the Schedule C detail. Rather, such records must be kept for a period no less than five years from the date of the tax return upon which the related tax credits are claimed. Such records are fully subject to audit for confirmation of the validity and amounts of credits taken. Records which must be preserved by persons claiming external tax credits include:

(a) Copies of sales contracts, or other written or memorialized evidence of any sales agreements, including purchase and billing invoices showing the origin state and destination state of products sold.

(b) Copies of shipping or other delivery documents identifying the products sold and delivered, reconcilable with the selling documents of subsection (a) above, if appropriate.

(c) Copies of production reports, transfer orders, and similar such documents which will reflect the intercompany or interdepartmental movement of extracted ingredients or manufactured products where no sale has occurred.

(d) Copies of tax returns or reports filed with other states' taxing authorities showing the kinds and amounts of taxes paid to such other states for which MATC is claimed.

(e) Copies of cancelled checks or other proofs of actual tax payment to the other state(s) giving rise to the MATC claimed.

(f) Copies of any other state(s) taxing statutes, laws, ordinances, and other appropriate legal authorities necessary to establish the nature of the other states' tax as a gross receipts tax, as defined in this section.

(g) Failure to keep and preserve proofs of entitlement to the MATC will result in the denial of credits claimed and the assessment of all taxes offset or reduced by such credits as well as the additional assessment of interest and penalties as required by law. (See RCW 82.32.050).

(10) MATC in combination with other credits. The tax credits authorized under this system may be taken in combination with other tax credits available under Washington law. Such other credit programs, however, authorize credit carryovers from reporting period to period until the credits are fully utilized. Thus, the MATC must be computed and used to offset business and occupation tax liabilities during any tax reporting period before any other program credits to which a claimant may be entitled are claimed or applied. Failure to compute and take the MATC before applying other available credits may result in the loss of the other credit benefits.

(11) Superseding provisions. The MATC provisions of this section supersede and control the provisions of other sections of chapter 458-20 WAC (other tax rules) relating to intrastate, interstate, and foreign transactions to the extent that such provisions are or appear to be contrary or conflicting.

(12) Unique or special credit situations—appeals. The provisions of this section generally explain the nature of the MATC system and the tax credit qualifications, limitations, and claiming procedures. The complexity of the integrated tax reporting and credit taking procedures may develop situations or questions which are not addressed herein. Such matters and requests for specialized rulings should be submitted to the department of revenue for prior determination before credits are claimed. Generally, prior determinations will be provided within sixty days after the department receives the information necessary to make such a ruling. Adverse rulings, tax credit denials, or tax assessments resulting from audits or other examinations of returns upon which the MATC is claimed may be administratively appealed under the provisions of chapter 82.32 RCW and WAC 458-20-100.

Purpose: To amend rules regarding what properties are eligible for exemption from property taxes.

Statutory Authority: RCW 84.36.865 requires the department to adopt rules for the effective administration of property tax exemptions.

Summary and Reasons for the Rule: Chapter 31, Laws of 1987, granted a property tax exemption for outpatient dialysis facilities and chapter 433, Laws of 1987, provided an exemption for nonprofit student loan agencies. The rules are being amended to reflect these new exemptions.

Drafter of the Rule, Rule Implementation and Enforcement: Trevor W. Thompson, 6004 South Capitol Boulevard, Tumwater, Washington 98501, (206) 753-5503.

Proposer of the Rule: Department of Revenue, Olympia, Washington 98504.

AMENDATORY SECTION (Amending Order PT 86-2, filed 5/30/86)

WAC 458-16-210 NONPROFIT, NONSECTARIAN ORGANIZATIONS. (1) The real and personal property owned by nonsectarian organizations is exempt from taxation, provided that: (a) The organization is nonprofit and is organized and conducted primarily for nonsectarian purposes, (b) the property is, except as provided in RCW 84.36.805 and subsections (2) and (4) of this section, used for character-building, benevolent, protective ((or)), rehabilitative social services directed at persons of all ages(;) or used by a student loan agency and (c) if these organizations were not conducting these activities the government would provide this service.

These are the primary uses and the word "fraternal" is not among them, therefore, organizations whose main function is fraternal would not qualify under this section.

This exemption extends to property of nonprofit, nonsectarian organizations which are used for benevolent, protective or rehabilitative social services and those which are actually related to those purposes. If any portion of the property of the organization is used for commercial rather than nonsectarian purposes, that portion must be segregated and taxed. Thrift store operations, restricted to the sale of "donated merchandise" will not jeopardize the exemption if the claimant can verify the proceeds are directed to an exempt purpose.

Organizations claiming exemption on property used to provide short-term emergency shelter to homeless persons will upon request provide complete financial information regarding the claimed property, and will also provide the policy used in screening clients, the maximum term of stay, the fee schedule and the number of persons housed.

(2) The loan or rental of the property does not subject the property to tax if (a) the rents and donations received for the use of the portion

of the property are reasonable and do not exceed the maintenance and operation expenses attributable to the portion of the property loaned or rented, and (b) the property would be exempt from tax if owned by the organization to which it is loaned or rented. (RCW 84.36.805): PROVIDED, HOWEVER, That the loan or rental of property to other nonprofit organizations, for periods of less than fifteen days shall not be subject to the restrictions of (a) of this subsection so long as all income received therefrom is devoted exclusively to exempt purposes. Maintenance and operating expenses means those items of rental expense as allowed and defined in generally accepted accounting principles. Property rented or leased for the purpose of deriving revenue from it, shall not be exempt and must be segregated and taxed whether or not such revenue is devoted to exempt purposes. For purposes of this subsection the term "revenue" means income received from the loan, lease or rental of property when such income exceeds the amount of the maintenance and operation expenses attributable to the term and portion of the property loaned or rented.

(3) Programs provided under a personal service contract will not jeopardize the exemption if the following conditions are met:

(a) The contract is written to clearly reflect all receipts and expenses are to be administered by the exempt organization.

(b) The financial records of the exempt organization will identify all receipts and expenses of the programs.

(c) The program is compatible and consistent with the purposes of the exempt organization.

(d) A summary of all receipts and expenses of the program will be provided to the department upon request.

Programs provided under a personal service contract, whereby the contractor will reimburse the organization for expenses pertaining to the program will be viewed as a rental agreement between the exempt organization and an individual or for profit user and will subject that portion of property to tax.

(4) The use of the property for fund-raising activities sponsored by the exempt organization does not subject the property to tax if the fund-raising activities are consistent with the purposes for which exemption is granted. The term "fund raising" means any revenue-raising activity limited to less than five days in length including but not limited to art auctions, use of the property by professional organizations for conferences, seminars, or other activities which enhance the reputation of the organization.

AMENDATORY SECTION (Amending Order PT 85-1, filed 2/15/85)

WAC 458-16-260 DAY CARE CENTERS, LIBRARIES, ORPHANAGES, HOMES FOR THE AGED, HOMES FOR SICK OR INFIRM, HOSPITALS. Buildings, grounds, and other real and personal property to the extent used, except as provided for in RCW 84.36.805 and subsections ((+)) (9) and ((+)) (11) of this section, by the following institutions are exempt from taxation:

- (1) Day care centers, as defined by RCW 74.15.020;
- (2) Preschools;
- (3) Free public libraries;
- (4) Orphanages and orphan asylums;
- (5) Homes for the aged;
- (6) Homes for the sick or infirm;
- (7) Hospitals for the sick including any portion of the hospital building or other buildings used as a nurse's home or residence for hospital employees, or operated as a portion of the hospital unit;
- (8) Outpatient dialysis facilities.

Any portion of property owned by an organization which is used in a manner not furthering the purposes of the institution, (for example, hospital property used by a physician for private practice) must be segregated and taxed. (AGO 7-3-1935)

Property owned by an organization exempt under this rule which is irrevocably dedicated to the purposes of the organization is included in this exemption: PROVIDED, That the organization can evidence irrevocable intent to put the property to a qualifying use. The forms of proof set forth in WAC 458-16-200 may be utilized for this purpose. To be exempted, the property must be in use or under construction which is designed for use.

The superintendent or manager of the organization claiming exemption under this statute shall allow the department of revenue access to the books and records of the organization and shall make, under oath, a report to the department showing that the income and receipts thereof, including donations to it, have been applied to the actual expenses of operating and maintaining it, or for its capital expenses and

to no other purposes, also including a statement of the receipts and the disbursements of said organization.

An exemption may be granted to the real or personal property leased or rented by any organization, corporation, or association exempted under the provisions of RCW 84.36.040 and used exclusively by it: PROVIDED, That the benefit of the exemption inures to the user. Such property must be specifically identified as leased in filing for exemption.

For the purposes of this rule a "hospital" is an organization primarily engaged in providing medical, surgical, nursing and/or related health care services in the prevention, diagnosis or treatment of human disease, pain, injury, disability, deformity or physical condition, or mental illness or retardation, and the equipment and facilities used by such organization to deliver such services on an inpatient basis. This definition shall include any portion of a hospital building, or other buildings used in connection therewith, and the equipment therein, operated as a portion of the hospital unit, or used as a residence for persons engaged or employed in the operation of a hospital.

((+)) (9) The loan or rental of this property does not subject the property to tax if (a) the rents and donations received for the use of the portion of the property are reasonable and do not exceed the maintenance and operation expenses attributable to the portion of the property loaned or rented; and (b) the property would be exempt from tax if owned by the organization to which it is loaned or rented. (RCW 84.36.805) Maintenance and operating expenses means those items of rental expense as allowed and defined in generally accepted accounting principles.

((+)) (10) Programs provided under a personal service contract will not jeopardize the exemption if the following conditions are met:

(a) The contract is written to clearly reflect all receipts and expenses are to be administered by the exempt organization.

(b) The financial records of the exempt organization will identify all receipts and expenses of the programs.

(c) The program is compatible and consistent with the purposes of the exempt organization.

(d) A summary of all receipts and expenses of the program will be provided to the department upon request.

Programs provided under a personal service contract, whereby the contractor will reimburse the organization for expenses pertaining to the program will be viewed as a rental agreement between the exempt organization and an individual or for profit user and will subject that portion of property to tax.

((+)) (11) The use of the property for fund-raising activities sponsored by the exempt organization does not subject the property to tax if the fund-raising activities are consistent with the purposes for which exemption is granted. The term "fund raising" means any revenue-raising activity limited to less than five days in length including but not limited to art auctions, use of the property by professional organizations for conferences, seminars, or other activities which enhance the reputation of the organization.

WAC 458-50-100 APPORTIONMENT OF OPERATING PROPERTY TO THE VARIOUS COUNTIES AND TAXING DISTRICTS. ((+)) In general. The department shall apportion the value of all public utility companies to the various counties in such a manner as will reasonably reflect the true cash value of the operating property located within each county and taxing district. Since it is impossible to determine with mathematical precision the precise value of each item of property located within each county and taxing district, the department shall apportion the value of operating property on the following basis:

((+)) (1) Railroad companies - The ratio that mileage of track, as classified by the department, situated within each county and taxing district bears to the total mileage of track within the state as of January 1 of the assessment year. In the event there exists operating property of railroad companies in counties or taxing districts not having track mileage, the department shall situs such property and apportion value directly on the basis of cost as determined in accordance with the cost approach set forth in WAC 458-50-080(A).

((+)) (2) Pipeline companies - The ratio that inch-equivalent of miles of pipeline situated within each county or taxing district bears to the total inch-equivalent of miles of pipeline within the state as of January 1 of the assessment year. In the event there exists operating property of pipeline companies in counties or taxing districts not having pipeline mileage, the department shall situs such property and apportion value to such county or taxing district directly on the basis of cost as determined in accordance with the cost approach set forth in WAC 458-50-080(A).

((+)) (3) Telegraph companies - The ratio that the cost (historical or original) of operating property situated within each county and taxing district bears to the cost (historical or original) of all operating property within the state as of January 1 of the assessment year.

~~((D)) Motor vehicle transportation companies - The ratio that the cost (historical or original) of tangible operating property situated within each county or taxing district bears to the total cost (historical or original) of all tangible operating property within the state as of January 1 of the assessment year. PROVIDED, that intangible property shall be apportioned on the basis of the ratio that mileage operated over franchised route within a county or taxing district bears to the total mileage operated over such franchised route within the state during the previous calendar year.~~

~~((E)) (4) Telephone companies - The ratio that the cost (historical or original) of operating property situated within each county or taxing district bears to the total cost (historical or original) of all operating property within the state as of January 1 of the assessment year.~~

~~((F)) (5) Electric light and power companies - The ratio that cost (historical or original) of operating property situated within each county and taxing district bears to the total cost (historical or original) of all operating property within the state as of January 1 of the assessment year.~~

~~((G)) (6) Gas companies - The ratio that cost (historical or original) of operating property situated within each county and taxing district bears to the total cost (historical or original) of all operating property within the state as of January 1 of the assessment year. PROVIDED, The value of pipeline shall be allocated on the basis of the ratio that inch-equivalent of miles of pipeline situated within each county or taxing district bears to the total inch-equivalent of miles of pipeline within the state as of January 1 of the assessment year.~~

~~((H)) (7) Airplane companies - The ratio that cost (historical or original) of operating property situated within each county and taxing district bears to the total cost (historical or original) of operating property within the state as of January 1 of the assessment year. PROVIDED, That the value of aircraft shall be apportioned on the basis of the ratio that landings and take-offs of such aircraft within each county and taxing district bears to the total landings and take-offs within the state during the previous calendar year.~~

~~((I)) (8) Steamboat companies - The ratio that cost (historical or original) of operating property situated within each county and taxing district bears to the total cost (historical or original) of operating property within the state as of January 1 of the assessment year. LIMITATIONS FOR DOMESTIC WASTEWATER
FACILITIES**

WAC

- 173-221-010 Purpose and scope.
- 173-221-020 Policy.
- 173-221-030 Definitions.
- 173-221-040 Domestic wastewater facility discharge standards.
- 173-221-050 Alternative domestic wastewater facility discharge standards and effluent limitations.
- 173-221-100 Severability.

NEW SECTION

WAC 173-221-010 PURPOSE AND SCOPE. (1) The purpose of this chapter is to implement RCW 43-.21A.010, 90.48.010, and 90.52.040 by setting discharge standards which represent "all known, available, and reasonable methods" of prevention, control, and treatment for domestic wastewater facilities which discharge to waters of the state. This chapter supplements WAC 173-220-130. Guidelines or policies of the department not included in this chapter are not affected by this chapter, except that if such guidelines or policies are in

conflict, the requirements of this chapter shall take precedence.

(2) This chapter also supplements 40 CFR Part 133; Secondary Treatment Regulation. Wherever this chapter is more stringent than the federal regulation, the requirements of this chapter shall take precedence.

NEW SECTION

WAC 173-221-020 POLICY. Waters of the state shall be of the highest possible quality. Regardless of the quality of the waters of the state, all wastes and other materials and substances proposed for discharge into said waters shall be provided with all known, available, and reasonable methods of treatment prior to discharge. Even though standards of quality established for the waters of the state would not be violated, wastes and other materials and substances shall not be allowed to enter such waters which will reduce the existing quality thereof, except (1) in those situations where it is clear that overriding considerations of the public interest will be served, and (2) they receive all known, available, and reasonable methods of treatment prior to discharge.

NEW SECTION

WAC 173-221-030 DEFINITIONS. As used in this chapter, unless the context indicates otherwise:

(1) "Seven-day average" means the arithmetic mean of pollutant parameter values for samples collected in a period of seven consecutive days. The department may use pollutant parameter values for samples collected in a calendar week for determining compliance with permit conditions.

(2) "Thirty-day average" means the arithmetic mean of pollutant parameter values for samples collected in a period of thirty consecutive days. The department may use pollutant parameter values for samples collected in a calendar month for determining compliance with permit conditions.

(3) "BOD" means five-day Biochemical Oxygen Demand.

(4) "CBOD" means five-day Carbonaceous Biochemical Oxygen Demand.

(5) "Combined sewer" means a sewer which has been designed to serve as a sanitary sewer and a storm sewer, and into which inflow is allowed by local ordinance.

(6) "Department" means the Washington department of ecology.

(7) "Director" means the director of the Washington department of ecology.

(8) "Discharge standard" means a minimum performance requirement established in regulation by the department. Effluent limitations for a pollutant parameter shall not be less stringent than the applicable discharge standard.

(9) "Domestic wastewater" means water carrying human wastes, including kitchen, bath, and laundry wastes from residences, buildings, industrial establishments, or other places, together with such ground water infiltration or surface waters as may be present.

(10) "Domestic wastewater facility" means all structures, equipment, or processes required to collect, carry

away, treat, reclaim, or dispose of domestic wastewater together with such industrial waste as may be present. In the case of subsurface sewage treatment and disposal, the term is restricted to mean those facilities treating and disposing of domestic wastewater only from:

(a) A septic tank system with subsurface sewage treatment and disposal and an ultimate design capacity exceeding fourteen thousand five hundred gallons per day at any common point; or

(b) A mechanical treatment system or lagoon followed by subsurface disposal with an ultimate design capacity exceeding three thousand five hundred gallons per day at any common point.

Where the proposed system utilizing subsurface disposal has received a state construction grant or a federal construction grant under the Federal Water Pollution Control Act as amended, such system is a "domestic wastewater facility" regardless of size.

(11) "Effluent concentrations consistently achievable through proper operation and maintenance" means:

(a) For a given pollutant parameter, the 95th percentile value for the thirty-day average effluent quality achieved by a wastewater facility in a period of at least twenty-four consecutive months, excluding values attributable to equipment failures, operational errors, overloading, and other unusual conditions; and

(b) A seven-day average value equal to 1.5 times the value derived under (a) of this subsection.

(12) "Effluent limitation" means any restriction, prohibition, or specification established by the department in a permit or administrative order on:

(a) Quantities, rates, percent removals, and/or concentrations of physical, chemical, or biological characteristics of wastes which are discharged into waters of the state; and

(b) Management practices relevant to the prevention or control of such waste discharges.

Effluent limitations shall be derived from discharge standards and other relevant factors identified in chapter 173-220 WAC.

(13) "Expansion" means the construction of additional treatment units to accommodate hydraulic flow and/or pollutant load for the purpose of increasing the existing design capacity of the wastewater facility.

(14) "Fecal coliform" means the group of coliform bacteria which originate in the intestinal tract of warm-blooded animals.

(15) "Industrial wastewater" means the water or liquid carried wastes from industrial or commercial processes as distinct from domestic wastewater. These wastes may result from any process or activity of industry, manufacture, trade, or business, from the development of any natural resource, or from animal operations such as feedlots, poultry houses, or dairies. The term includes contaminated stormwater and also leachate from solid waste facilities.

(16) "Infiltration" means the addition of ground water into a sewer through joints, the sewer pipe material, cracks, and other defects.

(17) "Inflow" means the addition of rainfall-caused surface water drainage from roof drains, yard drains, basement drains, street catch basins, etc., into a sewer.

(18) "Interfere with" means a discharge by an industrial user which, alone or in conjunction with discharges by other sources, inhibits or disrupts the domestic wastewater facility, its treatment processes or operations, or its sludge processes, use or disposal and which is a cause of a violation of any requirement of the domestic wastewater facility's permit (including an increase in the magnitude or duration of a violation) or of the prevention of sewage sludge use or disposal by the domestic wastewater facility in accordance with the following statutory provisions and regulations or permits issued thereunder (or more stringent state or local regulations): Section 405 of the Federal Water Pollution Control Act, the Solid Waste Disposal Act (SWDA) (including Title II, more commonly referred to as the Resource Conservation and Recovery Act (RCRA)), and including state regulations contained in any state sludge management plan prepared pursuant to Subtitle D or the SWDA, the Clean Air Act, the Toxic Substances Control Act, and the Marine Protection Research and Sanctuaries Act.

(19) "Permittee" means the entity to which the department issues a permit.

(20) "pH" means the negative logarithm of the hydrogen ion concentration.

(21) "Sanitary sewer" means a sewer which is designed to convey domestic wastewater and infiltration.

(22) "State" means the state of Washington.

(23) "Trickling filter" means a fixed growth biological treatment system in which wastewater is sprayed over the top surface of a column of rock or synthetic media. This definition does not include fixed growth biological systems which have a supplemental biological treatment system, other than a waste stabilization pond(s), for the principal wastewater stream.

(24) "TSS" means total suspended solids.

(25) "TSS concentrations achievable with waste stabilization ponds" means a TSS value, determined by the department, which is equal to the effluent concentrations achieved ninety percent of the time within the state or appropriate contiguous geographical area by waste stabilization ponds that are achieving the levels of effluent quality for BOD specified in WAC 173-221-050 (2)(a).

(26) "Waste stabilization pond" means basins built by excavating the ground and by diking for the purpose of treating wastewater under conditions that favor natural biological treatment and accompanying bacterial reduction. This includes domestic wastewater facilities which are classified as stabilization ponds, or aerated lagoons per the department's Criteria for Sewage Works Design.

(27) "Wastewater facility" means all structures and equipment required to collect, transport, treat, reclaim, or dispose of domestic, industrial, or combined domestic/industrial wastewaters.

(28) "Waters of the state" means all lakes, rivers, ponds, streams, inland waters, ground waters, salt waters, and all other waters and watercourses within the jurisdiction of the state of Washington.

(29) "Water quality standards" means the standards set forth in chapter 173-201 WAC.

(30) "Wet weather" means the time during and immediately following rainfall events which cause large quantities of inflow.

NEW SECTION

WAC 173-221-040 DOMESTIC WASTEWATER FACILITY DISCHARGE STANDARDS. (1) Except as allowed under WAC 173-221-050, domestic wastewater facilities which discharge to surface waters shall not exceed a thirty-day average of 30 milligrams per liter (mg/L) BOD, 30 mg/L TSS. Seven-day averages shall not exceed 45 mg/L BOD, 45 mg/L TSS. Additionally, the thirty-day average percent removals of BOD and TSS shall not be less than eight-five percent of influent concentrations.

(2) Fecal coliform limits shall not exceed a monthly geometric mean of 200 organisms/100 milliliters (mL), and a weekly geometric mean of 400 organisms per 100 mL.

(3) The effluent pH value shall be between 6.0 and 9.0 standard units unless the permittee demonstrates that:

(a) Inorganic chemicals are not added to the waste stream as part of the treatment process; and

(b) Contributions from industrial sources do not cause the pH of the effluent to be less than 6.0 or greater than 9.0; and

(c) The discharge does not cause water quality violations outside of an approved dilution zone.

NEW SECTION

WAC 173-221-050 ALTERNATIVE DOMESTIC WASTEWATER FACILITY DISCHARGE STANDARDS AND EFFLUENT LIMITATIONS. (1) Alternative discharge standards for trickling filters which were constructed and/or expanded prior to November 1984 are:

(a) Up to a thirty-day average of 45 mg/L BOD, 45 mg/L TSS. Seven-day averages shall not exceed 65 mg/L BOD, 65 mg/L TSS. In addition, the thirty-day average percent removals of BOD and TSS shall not be less than sixty-five percent of influent concentrations;

(b) Notwithstanding (a) of this subsection, not any less stringent than "effluent concentrations consistently achievable through proper operation and maintenance" of the wastewater facility based on an analysis of the past performance, the design, and the design capacity of the wastewater facility;

(c) Fecal coliform and pH discharge standards are as established in WAC 173-221-040.

(2) Alternative discharge standards for waste stabilization ponds which are the principal treatment process and which either have less than a two million gallon per day design capacity or have received, prior to the effective date of this regulation, the department's approval under chapter 173-240 WAC, for a greater design capacity, are:

(a) Up to a thirty-day average of 45 mg/L BOD, 45 mg/L TSS. Seven-day averages shall not exceed 65 mg/L BOD, 65 mg/L TSS. Additionally, the thirty-day average percent BOD removal shall not be less than sixty-five percent of influent concentrations.

(b) The discharge standards for TSS in (a) of this subsection may be adjusted by the department to conform to the "TSS concentrations achievable with waste

stabilization ponds," provided that operation and maintenance data indicate that the TSS values specified in (a) of this subsection cannot be achieved.

(c) Notwithstanding (a) and (b) of this subsection, not any less stringent than "effluent concentrations consistently achievable through proper operation and maintenance" of the wastewater facility based upon an analysis of the past performance.

(d) Fecal coliform and pH discharge standards shall be as established in WAC 173-221-040.

(3) For domestic wastewater facilities which receive flows from combined sewers, the department shall decide on a case-by-case basis whether any attainable percent removal can be defined during wet weather. If it can be defined, the department will set an alternative percent removal effluent limitation for the wet weather period. A permittee who requests such alternative limits shall submit supporting documentation to the department.

(4)(a) For domestic wastewater facilities which receive less concentrated influent wastewater, permittees can request and submit supporting documentation for:

(i) A lower percent removal effluent limitation than the discharge standards set forth in WAC 173-221-040, or subsections (1) and (2) of this section; or

(ii) A mass loading limit based upon the lower percent removal.

(b) To qualify for alternative effluent limitations because of less concentrated influent wastewater, the permittee must demonstrate:

(i) The wastewater facility is consistently achieving, and/or will consistently achieve, the effluent concentration limits and mass limits based upon the effluent concentrations in its permit; and

(ii) That to meet the percentage removal requirements set forth in WAC 173-221-040 or subsections (1) and (2) of this section, the wastewater facility would have to achieve an effluent concentration at least 5 mg/L below the effluent concentration which is otherwise required; and

(iii) The less concentrated influent is not the result of excessive infiltration and/or inflow. The department will use federal regulations and guidance in defining excessive infiltration and inflow; and

(iv) The development and implementation of a program, subject to the department's approval, for ongoing wastewater facility maintenance, repair, and replacement, including infiltration and inflow control. EMERGENCY RULES
DEPARTMENT OF NATURAL RESOURCES
 [Order 534—Filed November 12, 1987]

I, Brian J. Boyle, Commissioner of Public Lands, do promulgate and adopt at Olympia, Washington, the annexed rules relating to the repeal of an emergency rule designating the dates of the closed season, as defined by chapter 76.04 RCW.

I, Brian J. Boyle, find that an emergency exists and that this order is necessary for the preservation of the public health, safety, or general welfare and that observance of the requirements of notice and opportunity to present views on the proposed action would be contrary to public interest. A statement of the facts constituting the emergency is weather conditions have improved to the point where the designated ending date for the closed season can be changed. Cool temperatures, shorter days, higher relative humidity and precipitation have lessened the fire danger to the forest lands protected by the Department of Natural Resources. Therefore, it is necessary to terminate the closed season.

These rules are therefore adopted as emergency rules to take effect upon filing with the code reviser.

This rule is promulgated pursuant to RCW 76.04.005 and 76.04.015 and is intended to administratively implement that statute.

The undersigned hereby declares that the agency has complied with the provisions of the Open Public Meetings Act (chapter 42.30 RCW), the Administrative Procedure Act (chapter 34.04 RCW) and the State Register Act (chapter 34.08 RCW) in the adoption of these rules.

APPROVED AND ADOPTED November 12, 1987.

By Brian J. Boyle
 Commissioner of Public Lands

REPEALER

The following section of the Washington Administrative Code is repealed:

- 1) WAC 332-26-105a Closed Season.

(b) Prior service with a utility of the same type as that of which service is sought with a satisfactory payment record as demonstrated in (a) above, provided that the reference may be quickly and easily checked, and the necessary information is provided.

(c) Full-time consecutive employment during the entire 12 months next previous to the application for service, with no more than two employers, and the applicant is currently employed or has a regular source of income.

(d) Ownership of a significant legal interest in the premises to be served.

(3) Deposit requirements. A deposit may be required under the following circumstances:

(a) Where the applicant has failed to establish a satisfactory credit history as outlined above.

(b) In any event, a deposit may be required when, within the 12 months prior to the application, the applicant's service of a similar type has been disconnected for failure to pay amounts owing, when due; where there is an unpaid, overdue balance owing for similar service from the utility to which application is being made or from any other gas or electric company; or where two or more delinquency notices have been served upon the applicant by any other gas or electric company during the 12 months previous to the application for service; provided, that during the winter period no deposit may be required of a customer who in accordance with WAC 480-90-072 (4)(a), has notified the utility of inability to pay a security deposit and has satisfied the remaining requirements to qualify for a payment plan.

(c) Initiation or continuation of service to a residence where a prior customer still resides and where any balance for such service to that prior customer is past due or owing.

Interest shall be computed from the time of the deposit to the time of refund or total application of the deposit and shall be compounded annually.

(7) Extended payment of deposits. Where a customer or applicant for service of whom a deposit is required is unable to pay the entire amount of the deposit in advance of connection or continuation of service, the customer or applicant shall be allowed to pay 50 percent of the deposit amount prior to service, with the remaining amount payable in equal amounts on the utility's ordinary billing cycle during the first two months of service. A customer or applicant who is unable to meet this deposit requirement shall have the opportunity to receive service under subsection (8), alternative to deposit, next below.

(8) Alternative to deposit. A customer or applicant for service of whom a deposit is required, but who is unable to make a deposit, shall be allowed, as an alternative to the making of a deposit, to prepay any installation charges and reasonably estimated regular service charges or budget billings at periods corresponding to the utility's regular billing period for the length of time during which a deposit would ordinarily have been required. The customer shall then be billed in a normal fashion.

(9) When payment is made by cash, a receipt shall be furnished to each applicant or customer for the amount deposited.

(10) Refund of deposits. Deposits plus accrued interest shall be refunded under the following circumstances and in the following form:

(c) Refunds - how made. Any deposit, plus accrued interest, shall be refunded to the customer either in the form of a check issued and mailed to the customer no longer than 15 days following completion of 12 months' satisfactory payment as described above, or applied to the customer's bill for service in the 13th and, if appropriate, subsequent months, in accordance with the preference as to form of refund indicated by the customer at the time of deposit or as thereafter modified.

(11) Nothing in this rule shall prevent the requirement of a larger deposit or a new deposit when conditions warrant. Should a larger or new deposit be required, the reasons therefor shall be specified in writing to the customer. Any requirement for a new or larger deposit shall be in conformity with the standards set forth in this rule.

AMENDATORY SECTION (Amending Order R-220, Cause No. U-84-63, filed 11/15/84)

WAC 480-90-071 DISCONTINUANCE OF SERVICE. By customer - a customer shall be required to give notice to the utility of his or her intention to discontinue service.

By utility - (1) service may be discontinued by the utility for any of the following reasons:

(a) For the nonpayment of bills. The utility shall require that bills for service be paid within a specified time after issuance. The minimum specified time shall be fifteen days. Upon the expiration of said specified time without payment, payment arrangement, or a payment plan, the bill may be considered delinquent.

(b) For the use of gas for purposes or properties other than that specified in the application.

(c) Under flat rate service, for increased use of gas without approval of the utility.

(d) For wilful waste of gas through improper or imperfect pipes, fixtures, or otherwise.

(e) For failure of the customer to eliminate any hazardous condition found to exist in his facilities (i.e., piping, venting, appliances, etc.).

(f) For tampering with the utility's property.

(g) In case of vacation of the premises by customer.

(h) For nonpayment of any proper charges, including deposit, as provided in the tariff of the utility, unless the

customer has notified the utility of inability to pay a deposit in accordance with WAC 480-90-072 (4)(a) and has satisfied the remaining requirements to qualify for a payment plan.

(i) For refusal to comply with provisions of WAC 480-90-091, access to premises.

(j) For violation of rules, service agreements, or filed tariff(s).

(k) For use of equipment which adversely affects the utility's service to its other customers.

(l) For fraudulent obtaining or use of service. Whenever a fraudulent obtaining or use of the service is detected the utility may discontinue service without notice: **PROVIDED, HOWEVER,** That if the customer shall make immediate payment for such estimated amount of service as had been fraudulently taken and all costs resulting from such fraudulent use, the utility shall continue such service, subject to any applicable deposit requirements. If a second offense as to fraudulent obtaining or use is detected the utility may refuse to reestablish service subject to appeal to the commission. The burden of proof of such fraudulent obtaining or use will be upon the utility in case of an appeal to the commission. This rule shall not be interpreted as relieving the customer or other person of civil or criminal responsibility.

(m) For failure to keep any agreed upon payment plan.

(2) Except in case of danger to life or property, fraudulent use, impairment of service, or violation of law, no utility shall discontinue service unless the following conditions are met:

(a) Each utility shall provide written notice of disconnection served on the customer either by mail or, at its option, by personal delivery of the notice to the customer's address. If such written notice of disconnection is for nonpayment during the winter period, the utility shall advise the customer of the payment plan which is available pursuant to WAC 480-90-072(3), payment arrangements and responsibilities. If a mailed notice is elected, service shall not be disconnected prior to the eighth business day following mailing of the notice. If personal delivery is elected, disconnection shall not be permitted prior to 5 p.m. of the first business day following delivery. Delivered notice shall be deemed effective if handed to a person of apparent competence in the residence or, if a business account, a person employed at the place of business of the service customer. If no person is available to receive notice, notice shall be deemed served if attached to the primary door of the residence unit or business office at which service is provided. If service is not discontinued within ten working days of the first day on which disconnection may be effected, a new notice shall be required before the service can be discontinued.

(b)(i) Before effecting disconnection of service, a utility shall make a good faith, bona fide effort to reach the customer in person or by telephone to advise the customer of the pending disconnection and the reasons therefor. Where telephone contact is elected, at least two attempts to reach a customer by telephone shall be made during the utility's regular business hours. If a business

or message telephone number is provided by the customer, the utility shall endeavor by that means to reach the customer if unable to make contact through the customer's home telephone. A log or record of the attempts shall be maintained by the utility showing the telephone number called and the time of call. Telephone or personal contact shall not be a substitute for written notice of disconnection as specified above.

(ii) Where the service address is different from the billing address, the utility shall in all instances prior to effecting discontinuance of service upon its own initiative provide notice to the service address except as provided in subsection (2)(e) of this section regarding master meters. If personal service is effected upon the billing address, then personal service must be effected upon the service address; if service by mail is effected to the billing address, then service by mail must also be effected to the service address.

(iii) When a customer of record orders termination of service at a service address, and the utility through its representative discovers that the actual service user at the service address has no prior notice of such termination, the utility shall delay termination for at least one complete business day following provision of actual notice to the service user.

(iv) All notices of delinquency or pending disconnection shall detail procedures pertinent to the situation and provide notice of means by which the customer can make contact with the utility to resolve any differences or avail himself or herself of rights and remedies as set forth in WAC 480-90-096 (complaints and disputes) herein.

(c) Except in case of danger to life or property, no disconnection shall be accomplished on Saturdays, Sundays, legal holidays, or on any other day on which the utility cannot reestablish service on the same or following day.

(d) When a utility employee is dispatched to disconnect service, that person shall be required to accept payment of a delinquent account at the service address if tendered in cash, but shall not be required to dispense change for cash tendered in excess of the amount due and owing. Any excess payment shall be credited to the customer's account. The utility shall be permitted to assess a reasonable fee as provided for in the tariff of the utility for the disconnection visit to the service address. Notice of the amount of such fee, if any, shall be provided within the notice of disconnection.

(e) Where service is provided through a master meter, or where the utility has reasonable grounds to believe service is to other than the customer of record, the utility shall undertake all reasonable efforts to inform occupants of the service address of the impending disconnection. Upon request of one or more service users, where service is to other than the subscriber of record, a minimum period of five days shall be allowed to permit the service users to arrange for continued service.

(f) Where service is provided to a hospital, medical clinic with resident patients, or nursing home, notice of pending disconnection shall be provided to the director, Washington state department of social and health services, as well as to the customer. Upon request from the

director or his designee, a delay in disconnection of no less than five business days from the date of notice shall be allowed so that the department may take whatever steps are necessary in its view to protect the interests of patients resident therein who are responsibilities of the department.

(g) Service may not be disconnected while a customer is pursuing any remedy or appeal provided for by these rules, provided any amounts not in dispute are paid when due. The customer shall be so informed by the utility upon referral of a complaint to a utility supervisor or the commission.

(h) (i) The utility shall postpone termination of utility service or will reinstate service to a residential customer for thirty days from the date of receipt of a certificate by a licensed physician which states that termination of gas service will aggravate an existing medical condition or create a medical emergency for the customer, a member of the customer's family, or other permanent resident of the premises where service is rendered. Where service is reinstated, payment of a reconnection charge and/or a deposit shall not be required prior to such reinstatement of service.

(ii) This certificate of medical emergency must be in writing and show clearly the name of the person whose medical emergency would be adversely affected by termination, the nature of the medical emergency, and the name, title, and signature of the person certifying the medical emergency.

(iii) Any customer may designate a third party to receive notice of termination or other matters affecting the provision of service. The utility shall offer all customers the opportunity to make such designation. When the utility discovers that a customer appears to be unable to comprehend the impact of a termination of service, it shall consider an appropriate social agency to be third party. In either case, it shall not effect termination until five business days after provision of notice to the third party. Utilities shall discover which social agencies are appropriate for and willing to receive such notice, and the name and/or title of the person able to deal with the termination situation, and shall inform the commission on a current basis which agencies and position titles receive such notifications.

(3) Payment of any delinquent amounts to a designated payment agency of the utility shall constitute payment to the utility, if the customer informs the utility of such payment and the utility verifies such payment.

(4) Service shall be restored when the causes of discontinuance have been removed and when payment of all proper charges due from the customer, including any proper deposit, has been made as provided for in the tariff of the utility; or as the commission may order pending resolution of any bona fide dispute between the utility and customer over the propriety of disconnection.

(5) A utility may make a charge for restoring service when service has been discontinued for nonpayment of bills. The amount of such charge is to be specified in the utility's tariff.

Upon the expiration of said specified time without payment, payment arrangement, or a payment plan, the bill may be considered delinquent.

Whenever a fraudulent obtaining or use of the service is detected the utility may discontinue service without notice: **PROVIDED, HOWEVER,** That if the customer shall make immediate payment for such estimated amount of service as had been fraudulently taken and all costs resulting from such fraudulent use, the utility shall continue such service, subject to any applicable deposit requirements. If a second offense as to fraudulent obtaining or use is detected the utility may refuse to reestablish service subject to appeal to the commission. The burden of proof of such fraudulent obtaining or use will be upon the utility in case of an appeal to the commission. This rule shall not be interpreted as relieving the customer or other person of civil or criminal responsibility.

(m) For failure to keep any agreed upon payment plan.

(2) Except in case of danger to life or property, fraudulent use, impairment of service, or violation of law, no utility shall discontinue service unless the following conditions are met:

(a) Each utility shall provide written notice of disconnection served on the customer either by mail or, at its option, by personal delivery of the notice to the customer's address. If such written notice of disconnection is for nonpayment during the winter period the utility shall advise the customer of the payment plan which is available pursuant to WAC 480-100-072(3), payment arrangements and responsibilities. If a mailed notice is elected, service shall not be disconnected prior to the eighth business day following mailing of the notice. If personal delivery is elected, disconnection shall not be permitted prior to 5 p.m. of the first business day following delivery. Delivered notice shall be deemed effective if handed to a person of apparent competence in the residence or, if a business account, a person employed at the place of business of the service customer. If no person is available to receive notice, notice shall be deemed served if attached to the primary door of the residence unit or business office at which service is provided. If service is not discontinued within ten working days of the first day on which disconnection may be effected, a new notice shall be required before the service can be discontinued.

(b)(i) Before effecting disconnection of service, a utility shall make a good faith, bona fide effort to reach the customer in person or by telephone to advise the customer of the pending disconnection and the reasons therefor. Where telephone contact is elected, at least two attempts to reach a customer by telephone shall be made during the utility's regular business hours. If a business or message telephone number is provided by the customer, the utility shall endeavor by that means to reach the customer if unable to make contact through the customer's home telephone. A log or record of the attempts shall be maintained by the utility showing the telephone number called and the time of call. Telephone or personal contact shall not be a substitute for written notice of disconnection as specified above.

(ii) When the service address is different from the billing address, the utility shall in all instances prior to effecting discontinuance of service upon its own initiative provide notice to the service address unless the utility has verified that the customer of record and the service user are the same party. If personal service is effected upon the billing address, then personal service must be effected upon the service address; if service by mail is effected to the billing address, then either personal service or service by mail must be effected to the service address. Discontinuance of service shall not occur earlier than five business days after provision of notice to the service address.

(iii) When a customer of record orders termination of service at a service address, and the utility through its representative discovers that the actual service user at the service address has no prior notice of such termination, the utility shall delay termination for at least one complete business day following provision of actual notice to the service user.

(iv) All notices of delinquency or pending disconnection shall detail procedures pertinent to the situation and provide notice of means by which the customer can make contact with the utility to resolve any differences or avail himself or herself of rights and remedies as set forth in WAC 480-100-096 (complaints and disputes) herein.

(c) Except in case of danger to life or property, no disconnection shall be accomplished on Saturdays, Sundays, legal holidays, or on any other day on which the utility cannot reestablish service on the same or following day.

(d) When a utility employee is dispatched to disconnect service, that person shall be required to accept payment of a delinquent account at the service address if tendered in cash, but shall not be required to dispense change for cash tendered in excess of the amount due and owing. Any excess payment shall be credited to the customer's account. The utility shall be permitted to assess a reasonable fee as provided for in the tariff of the utility for the disconnection visit to the service address. Notice of the amount of such fee, if any, shall be provided within the notice of disconnection.

(e) Where service is provided through a master meter, or where the utility has reasonable grounds to believe

service is to other than the customer of record, the utility shall undertake all reasonable efforts to inform occupants of the service address of the impending disconnection. Upon request of one or more service users, where service is to other than the subscriber of record, a minimum period of five days shall be allowed to permit the service users to arrange for continued service.

(f) Where service is provided to a hospital, medical clinic with resident patients, or nursing home, notice of pending disconnection shall be provided to the director, Washington state department of social and health services, as well as to the customer. Upon request from the director or his or her designee, a delay in disconnection of no less than five business days from the date of notice shall be allowed so that the department may take whatever steps are necessary in its view to protect the interests of patients resident therein who are responsibilities of the department.

(g) Service may not be disconnected while a customer is pursuing any remedy or appeal provided for by these rules, provided any amounts not in dispute are paid when due. The customer shall be so informed by the utility upon referral of a complaint to a utility supervisor or the commission.

(h)(i) When a utility has, or has had, cause to disconnect utility service, the utility shall postpone termination of service or will reinstate service to a residential customer for thirty days from the date of receipt of a certificate by a licensed physician which states that termination of electric service will aggravate an existing medical condition or create a medical emergency for the customer, a member of the customer's family, or other permanent resident of the premises where service is rendered. When service is reinstated, payment of a reconnection charge and/or a deposit shall not be required prior to such reinstatement of service.

(ii) This certificate of medical emergency must be in writing and show clearly the name of the person whose medical emergency would be adversely affected by termination, the nature of the medical emergency, and the name, title, and signature of the person certifying the medical emergency. If a notice of disconnection has been issued and the customer notifies the utility that a medical emergency exists, the customer shall be allowed five business days from when the utility is so notified to provide the utility with a certificate of medical emergency. If this five day period extends beyond the time set for discontinuance of service, the utility shall extend the time of discontinuance until the end of the five day period. If service has been discontinued and the customer requests reconnection of service due to a medical emergency, the utility shall reconnect service and the customer shall be allowed five business days to provide the utility with a certificate of medical emergency. If the utility does not receive a certificate of medical emergency within the time limits set herein, the utility may discontinue service following an additional twenty-four hour notice to the premises.

(iii) Any customer may designate a third party to receive notice of termination or other matters affecting the provision of service. The utility shall offer all customers the opportunity to make such designation. When the

utility discovers that a customer appears to be unable to comprehend the impact of a termination of service, the utility shall consider an appropriate social agency to be the third party. In either case, the utility shall not effect termination until five business days after provision of notice to the third party. Utilities shall discover which social agencies are appropriate and willing to receive such notice, and the name and/or title of the person able to deal with the termination situation, and shall inform the commission on a current basis which agencies and position titles receive such notifications.

(3) Payment of any delinquent amounts to a designated payment agency of the utility shall constitute payment to the utility, if the customer informs the utility of such payment and the utility verifies such payment.

(4) Service shall be restored when the causes of discontinuance have been removed and when payment of all proper charges due from the customer, including any proper deposit, has been made as provided for in the tariff of the utility; or as the commission may order pending resolution of any bona fide dispute between the utility and customer over the propriety of disconnection.

(5) A utility may make a charge for restoring service when service has been discontinued for nonpayment of bills. The amount of such charge is to be specified in the utility's tariff.

BOARD OF PILOTAGE COMMISSIONERS
 [Order 87-2, Resolution No. 87-2—Filed November 13, 1987]

Be it resolved by the Board of Pilotage Commissioners, acting at the Henry M. Jackson Federal Building, Seattle, Washington, that it does adopt the annexed rules relating to limitations on new pilots, WAC 296-116-082.

We, the Board of Pilotage Commissioners, find that an emergency exists and that this order is necessary for the preservation of the public health, safety, or general welfare and that observance of the requirements of notice and opportunity to present views on the proposed

action would be contrary to public interest. A statement of the facts constituting the emergency is four new pilots are joining the Port Angeles Pilots Association and the administrative regulation needed to be amended to reflect changes made to the Pilotage Act by the 1987 legislature.

These rules are therefore adopted as emergency rules to take effect upon filing with the code reviser.

This rule is promulgated pursuant to RCW 88.16.105 and is intended to administratively implement that statute.

The undersigned hereby declares that the agency has complied with the provisions of the Open Public Meetings Act (chapter 42.30 RCW), the Administrative Procedure Act (chapter 34.04 RCW), and the State Register Act (chapter 34.08 RCW) in the adoption of these rules.

The department in cooperation with the departments of fisheries, ~~((game))~~ wildlife and ecology, and in consultation with affected Indian tribes shall classify streams, lakes and ponds and prepare stream classification maps showing the location of Type 1, 2, 3 and 4 Waters within the various forested areas of the state. Such maps shall be available for public inspection at area offices of the department. The waters will be classified using the following criteria, except that these agencies may approve classifications of water segments which do not follow the criteria when substantiated evidence demonstrates that use of the criteria would result in incorrect classification of such water according to the definitions contained in WAC 222-16-020. When so requested by any affected landowners, applicant or aggrieved person, the department shall make available informal conferences, which shall include the departments of fisheries, ~~((game))~~ wildlife and ecology, and affected Indian tribes and those contesting the adopted water types. These conferences shall be established under procedures established in WAC 222-46-020.

(1) "Type 1 Water" means all waters, within their ordinary high-water mark, as inventoried as "shorelines of the state" under chapter 90.58 RCW, but not including those waters' associated wetlands.

(2) "Type 2 Water" classification shall be applied to segments of natural waters which:

(a) Are diverted for domestic use by more than 100 residential or camping units or by a public accommodation facility licensed to serve more than 100 persons, where such diversion is determined by the department to be a valid appropriation of water and the only practical water source for such users. Such waters shall be considered to be Type 2 Water upstream from the point of such diversion for 1,500 feet or until the drainage area is reduced by 50 percent, whichever is less;

(b) Are within a federal, state, local, or private campground having more than 30 camping units: PROVIDED, That the water shall not be considered to enter a campground until it reaches the boundary of the park lands available for public use and comes within 100 feet of a camping unit, trail or other park improvement;

(a) Are diverted for domestic use by more than 10 residential or camping units or by a public accommodation facility licensed to serve more than 10 persons, where such diversion is determined by the department to be a valid appropriation of water and the only practical water source for such users. Such waters shall be considered to be Type 3 Water upstream from the point of such diversion for 1,500 feet or until the drainage area is reduced by 50 percent, whichever is less;

All forest practices (including those in Classes I and II) must be conducted in accordance with the forest practices regulations.

(1) "Class IV - special." Application to conduct forest practices involving the following circumstances requires an environmental checklist in compliance with the state environmental policy act (SEPA), and SEPA guidelines, as they have been determined to have potential for a substantial impact on the environment. It may be determined that additional information or a detailed environmental statement is required before these forest practices may be conducted.

*(a) Aerial application of pesticides to an "area of water supply interest" as determined according to WAC 222-38-020 ((4)(h)) (5)(i).

(b) Harvesting, road construction, site preparation or aerial application of pesticides:

(i) On lands known to contain a breeding pair or the nest or breeding grounds of any threatened or endangered species; or

(ii) Within the critical habitat designated for such species by the United States Fish and Wildlife Service.

(c) Widespread use of DDT or a similar persistent insecticide.

(d) Harvesting, road construction, aerial application of pesticides and site preparation on all lands within the boundaries of any national park, state park, or any park of a local governmental entity, except park managed salvage of merchantable forest products.

*(e) Construction of roads, landings, rock quarries, gravel pits, borrow pits, and spoil disposal areas ((when conducted)) on ((excessively steep slopes or)) slide prone areas as defined in WAC 222-24-020(6) when such ((slopes or)) slide prone areas occur on an uninterrupted slope ((within 1,000 feet)) above a Type 1, 2, 3 or 4 Water where there is potential for a substantial debris flow or ((debris torrent) mass failure to cause significant impact to ((fisheries habitat or)) public ((capital improvements)) resources.

~~((f) Utilization of an alternate plan except those involving field evaluation of a new forest practice technology or any reforestation practice.))~~

(2) "Class IV - general." Applications involving the following circumstances are "Class IV - general" forest practices unless they are listed in "Class IV - special." Upon receipt of an application, the department will determine the lead agency for purposes of compliance with the State Environmental Policy Act pursuant to WAC 197-11-924 and 197-11-938(4) and RCW 43.21C.037(2). Such applications ((will not require an environmental evaluation but)) are subject to a 30-day period for approval unless the lead agency determines a detailed statement under RCW 43.21C.030 (2)(c) is required. Upon receipt, if the department determines the application is for a proposal that will require a license from a county/city acting under the powers enumerated in RCW 76.09.240, the department shall notify the applicable county/city under WAC 197-11-924 that the department has determined according to WAC 197-11-938(4) that the county/city is the lead agency for purposes of compliance with State Environmental Policy Act.

(a) Forest practices (other than those in Class I) on lands platted after January 1, 1960, or on lands being converted to another use.

(a) Culture and harvest of Christmas trees and seedlings.

(b) Road maintenance except: (i) Replacement of bridges and culverts across Type 1, 2, 3 or flowing Type 4 Waters; or (ii) movement of material that has a direct potential for entering Type 1, 2, 3 or flowing Type 4 Waters.

(E) Any harvest on less than 40 acres.

(F) Construction of 600 or more feet of road, provided that the department shall be renotified at least 2 business days before commencement of the construction.

(5) "Class III" forest practices not listed under Classes IV, I or II above are "Class III" forest practices. Among Class III forest practices are the following:

(a) Those requiring hydraulic project approval (RCW 75.20.100).

(b) Those within the shorelines of the state other than those in a Class I forest practice.

(c) Aerial application of insecticides, except where classified as a Class IV forest practice.

(d) Aerial application of chemicals (except insecticides), except where classified as Class I or IV forest practices.

(e) Harvest or salvage of timber except where classed as Class I, II or IV forest practices.

(f) All road construction and reconstruction except as listed in Classes I, II and IV forest practices.

(g) Opening of new pits or extensions of existing pits over 1 acre.

(h) Road maintenance involving:

(i) Replacement of bridges or culverts across Type 1, 2, 3, or flowing Type 4 Waters; or

(ii) Movement of material that has a direct potential for entering Type 1, 2, 3 or flowing Type 4 Waters.

(i) Operations involving an applicant's bond in lieu of a landowner's signature.

(j) Site preparation or slash abatement not listed in Classes I or IV forest practices.

(k) Harvesting, road construction, site preparation or aerial application of pesticides on lands which contain cultural, historic or ((archeological)) archaeological resources which, at the time the application or notification is filed, are:

(i) On or are eligible for listing on the National Register of Historic Places; or

(ii) Have been identified to the department as being of interest to an affected Indian tribe.

(l) Harvesting exceeding 19 acres in a designated difficult regeneration area.

~~((6)) Continuing review of forest practices classification:~~

~~(a) RCW 76.09.050 directs the forest practices board to establish by rule which forest practices shall be included in each of the 4 classes, and directs that these rules:~~

~~(i) Not include in Class I any categories of forest practice which the board finds to have a direct potential for damage to a public resource;~~

~~(ii) Exclude from Class II all categories of forest practice which the board finds to have an ordinary or greater than ordinary potential for damage to a public resource; and~~

~~(iii) Include in "Class IV - special" all categories of forest practice which the board finds to have potential for a substantial impact on the environment of the type justifying an evaluation as to whether or not a detailed statement must be prepared pursuant to chapter 43.21C RCW (SEPA).~~

~~(b) The board finds that the regulations contained in subsections (1) through (5) of this section meet those criteria to the maximum extent feasible in light of the limited information now available, but that further refinement of these subsections may be necessary as additional experience develops under the Forest Practices Act. Therefore, the department is requested to report to the forest practices advisory committee and the board at least annually on any categories of forest practice which, in the opinion of the department, should be reclassified:~~

~~(i) To make the classifications better conform to these criteria; and~~

~~(ii) To provide greater clarity and certainty for potential applicants and others as to which forest practice activities are in Classes I, II, III or IV forest practices.))~~

~~(m) Utilization of an alternate plan. See WAC 222-12-040.~~

REPEALER

The following section of the Washington Administrative Code is repealed:

WAC 222-16-040 TEMPERATURE SENSITIVE WATERS.

AMENDATORY SECTION (Amending Resolution No. 82-2, filed 8/31/82)

WAC 222-20-010 APPLICATIONS AND NOTIFICATIONS—POLICY. (1) No Class II, III or IV forest practices shall be commenced or continued unless

the department has received a notification for Class II forest practices, or approved an application for Class III or IV forest practices pursuant to the act. Where the time limit for the department to act on the application has expired, and none of the conditions in WAC 222-20-020(1) exist, the operation may commence. (NOTE: OTHER LAWS AND REGULATIONS AND/OR PERMIT REQUIREMENTS MAY APPLY. SEE CHAPTER 222-50 WAC.)

~~(2) ((At the option of the applicant, applications or notifications may be submitted to cover a single forest practice or any number of forest practices within reasonable geographic or political boundaries as specified by the department. Long range plans may be submitted to the department for review and consultation.~~

~~(3))~~ The department shall prescribe the form and contents of the notification and application, which shall specify what information is needed for a notification, and the information required for the department to approve or disapprove the application.

~~((4))~~ (3) Applications and notifications for operations not converting to another use shall be signed by the landowner, the timber owner and the operator, or the operator and accompanied by a consent form signed by the timber owner and the landowner. A consent form may be another document if it is signed by the landowner(s) and it contains a statement acknowledging that he is familiar with the Forest Practices Act, including the provisions dealing with conversion to another use (RCW 76.09.060(3)). Where the application is not signed by the landowner, the department shall, provided all the other requirements contained in chapter 222-20 WAC are met, approve the application without the signature of the landowner if:

(a) The operator or timber owner provides legal evidence of timber rights, ownership, or other legal rights;

(b) The timber owner or operator posts a bond, in an amount determined by and a form acceptable to the department, securing compliance with the requirements of the forest practices regulations; and

(c) The operator or timber owner provides evidence of reasonably advance notification to the landowner of the proposed forest practice and that the landowner has been requested to sign the application, a copy of which has been made available to the landowner: PROVIDED, That in lieu of such evidence the applicant may submit a sworn statement indicating inability to locate the landowner after a reasonable good faith attempt to locate and notify the landowner of the proposed forest practice.

~~((5))~~ (4) Where an application for a conversion is not signed by the landowner or accompanied by a consent form, as outlined in subsection ~~((4))~~ (3) of this section, the department shall not approve the application. Applications and notifications for the development or maintenance of utility rights of way shall not be considered to be conversions.

~~((6))~~ (5) Transfer of the approved application or notification to a new landowner, timber owner or operator requires written notice by the original landowner or applicant to the department and should include the original application or notification number. This written notice shall be in a form acceptable to the department and

shall contain an affirmation signed by the new landowner, timber owner, or operator, as applicable, that he agrees to be bound by all conditions on the approved application or notification. In the case of a transfer of an application previously approved without the landowner's signature the new timber owner or operator must submit a bond securing compliance with the requirements of the forest practices regulations as determined necessary by the department. If an application or notification indicates that the landowner or timber owner is also the operator, or an operator signed the application, no notice need be given regarding any change in subcontractors or similar independent contractors working under the supervision of the operator of record.

~~((7))~~ (6) Applications and notifications must be delivered to the department at the appropriate ~~((area))~~ region office. Delivery should be in person or by registered or certified mail.

~~((8))~~ (7) Applications and notifications shall be considered received on the date and time shown on any registered or certified mail receipt, or the written receipt given at the time of personal delivery, or at the time of receipt by general mail delivery. Applications or notifications that are not complete, or are inaccurate will not be considered officially received until the applicant furnishes the necessary information to complete the application. An environmental checklist (WAC 197-11-315) is necessary information for all Class IV applications. If a notification or application is delivered in person to the department by the operator or his authorized agent, the department shall immediately provide a dated receipt. In all other cases, the department shall immediately mail a dated receipt to the applicant.

AMENDATORY SECTION (Amending Resolution No. 82-1, filed 8/3/82, effective 10/1/82)

WAC 222-20-020 APPLICATION TIME LIMITS. (1) A properly completed application shall be approved, conditioned or disapproved within ~~((14))~~ 30 calendar days for Class III and ~~((30 calendar days for))~~ Class IV forest practices, except:

(a) To the extent the department is prohibited from approving the application by the act.

(b) For "Class IV ~~((special))~~" applications when the department or the lead agency has ~~((within 10 days of the receipt of an acceptable application and environmental checklist (WAC 197-10-310)))~~ determined that a detailed environmental statement must be made, the application must be approved, conditioned or disapproved within 60 days, unless the commissioner of public lands promulgates a formal order specifying a later date for completion of the detailed environmental statement and final action on the application. At least 10 days before promulgation of such an order extending the time, the applicant shall be given written notice that the department is requesting such extension; giving the reasons the process cannot be completed within such period; and stating that the applicant may comment in writing to the commissioner of public lands or obtain an informal conference with the department regarding the proposed extension.

(c) When they involve lands platted after January 1, 1960, or lands to be converted, the applicable time limit shall be no less than 14 business days from transmittal to the county unless the county has waived its right to object or has consented to approval of the application.

(2) Unless the county has waived its rights under the act or consents to approval, the department shall not approve ~~((portions of))~~ an application involving lands platted after January 1, 1960, in the process of being platted or proposed to be converted to another use until at least 14 business days from the date of transmittal to the county.

~~(3) ((Where an application covers both Class III and Class IV forest practices, the department shall have 30 calendar days to respond, except more time may be required as in subsection (1) of this section.~~

~~(4) If the application indicates that it covers only Class III forest practices, and the department determines it involves some Class IV forest practices, within 14 calendar days the department shall either so indicate or approve or disapprove the application.~~

~~(5))~~ Where a notification is submitted for operations which the department determines involve Class III or IV forest practices, the department shall issue a stop work order or take other appropriate action. If the operations were otherwise in compliance with the act and forest practices regulations, no penalty should be imposed for those operations which occurred prior to the enforcement action: PROVIDED, That no damage to a public resource resulted from such operations, and the operations commenced more than 5 days from receipt by the department of the notification.

~~((6))~~ (4) If the department fails to approve or disapprove an application or any portion thereof within the applicable time limit, the application shall be deemed approved and the operation may commence: PROVIDED, That this provision shall not apply where:

(a) The county objects and the application involves lands platted after January 1, 1960, or lands to be converted where the county's right of objection is 14 business days which may be longer than the approval time limit.

(b) The department is prohibited from approving the application by the act.

(c) Compliance with the State Environmental Policy Act requires additional time.

~~((7))~~ (5) If seasonal field conditions prevent the department from being able to properly evaluate the application, the department may ~~((issue an approval conditional upon further review within 60 days))~~ disapprove the application until field conditions allow for an on-site review.

AMENDATORY SECTION (Amending Order 263, filed 6/16/76)

WAC 222-20-040 APPROVAL ~~((AND DISAPPROVAL POLICY))~~ CONDITIONS. (1) ~~((Applications shall be approved except to the extent the department finds:~~

~~(a) The application is incomplete, improperly filed, or inaccurate.~~

~~(b) The applicable county has filed timely objections to the approval, and the application indicates that it involves lands either:~~

- ~~(i) Platted after January 1, 1960, or
(ii) Being converted to another use:~~

~~(c) The operator has been enjoined from conducting forest practices by a superior court action under the act.~~

~~(d) Conducting the operation(s) in accordance with the application would be inconsistent with applicable regulations and no acceptable alternate plan is provided.~~

~~(2) If an application is properly filed but portions of it must be disapproved, any portions of the proposed operations which can be separately conducted in compliance with these regulations without reasonable risk to the public resources shall be approved.~~

~~(3) The department shall specify the particular operations or parts thereof disapproved and the reasons for all disapprovals, citing the provision(s) of these regulations with which the proposed operation(s) do not comply.~~

~~(4) Approvals shall be effective for 12 months from the date issued.~~

~~(5)) Whenever an approved application authorizes a forest practice which, because of soil condition, proximity to a water course or other unusual factor, has a potential for causing material damage to a public resource, as determined by the department, the applicant shall, when requested on the approved application, notify the department 2 business days before the commencement of actual operations.~~

~~((6)) (2) All approvals are subject to any conditions stipulated on the approved application and to any subsequent additional requirements set forth in a stop work order or a notice to comply.~~

AMENDATORY SECTION (Amending Order 263, filed 6/16/76)

WAC 222-20-060 DEVIATION FROM PRIOR APPLICATION OR NOTIFICATION. Substantial deviation from a notification or an approved application requires a revised notification or application. Other deviations may be authorized by a supplemental directive, notice to comply or stop work order. The department shall notify the departments of fisheries, ~~((game))~~ wildlife and ecology and affected Indian tribes and the appropriate county of any supplemental directive, notice to comply or stop work order involving a deviation from a prior notification or approved application, except where such notice has been waived.

AMENDATORY SECTION (Amending Order 263, filed 6/16/76)

WAC 222-20-090 ~~((VOLUNTARY PREFILING))~~ OPTIONS FOR FILING APPLICATIONS. ~~((1) An application may indicate that the applicant requests approval as of a specified date more than 30 days and less than 90 days from its submittal to the department. Approval of such applications shall be effective for 12 months from the requested date or the date of actual approval, whichever is later.~~

~~(2) When a deferred effective date has been requested, operations may commence on or after the requested effective date without approval of the application if:~~

~~(a) The department has not disapproved the application; and~~

~~(b) The timber owner or operator has given the department not less than 5 nor more than 10 days' written notice of intent to commence operations if the application is not disapproved within 10 days after filing of such notice of intent.)~~ Applicants may schedule an early review of a proposed application with the department prior to official filing, or submit an application with a delayed effective date. Such early review or submission will allow the department to review multiple applications and bring other forest practices concerns to the attention of the applicant so that such concerns can be addressed prior to official filing and processing of an application. When submitting an application with a delayed effective date, the applicant shall indicate the date when approval is desired.

AMENDATORY SECTION (Amending Resolution No. 82-1, filed 8/3/82, effective 10/1/82)

WAC 222-20-100 NOTICE TO PARKS AND OAHP. (1) Notice to parks. The department shall send to the affected agency, within 2 business days of receipt, a copy of any notification or application for forest practices within 500 feet of the boundary of any park entity registered according to ~~((WAC 222-20-100))~~ subsection (2) of this section.

(2) Parks register. The department shall establish and update every 5 years a parks register listing all publicly owned parks where the affected owner has filed a written request with the department for inclusion on such register. The department shall notify owners of all public parks inventoried on the state comprehensive outdoor recreation plan (SCORP) of the opportunity to register.

(3) DNR to provide information to OAHP. The department shall provide the office of ~~((archeology))~~ archaeology and historic preservation (OAHP) with copies of all applications and notifications for forest practices to be conducted on lands known to contain historic or ~~((archeological))~~ archaeological resources as identified by OAHP.

NEW SECTION

WAC 222-20-120 NOTICE OF FOREST PRACTICES TO AFFECTED INDIAN TRIBES. (1) The department shall notify affected Indian tribes of all applications of concern to such tribes, including those involving cultural resources, identified by the tribes.

(2) Where an application involves cultural resources the landowner shall meet with the affected tribe(s) with the objective of agreeing on a plan for protecting the archaeological or cultural value. The department may condition the application in accordance with the plan.

(3) Affected Indian tribes shall determine whether plans for protection of cultural resources will be forwarded to the office of archaeological and historic preservation (OAHP).

AMENDATORY SECTION (Amending Resolution No. 82-1, filed 8/3/82, effective 10/1/82)

WAC 222-24-010 POLICY. *A well designed, located, constructed, and maintained system of forest roads is essential to forest management and protection of the public resources. Riparian areas contain some of the more productive conditions for growing timber, are heavily used by wildlife and provide essential habitat for fish and wildlife and essential functions in the protection of water quality. Extra protection is required during road construction and maintenance to protect this habitat and timber growing potential. Landowners and fisheries and wildlife managers are encouraged to cooperate to develop road management and abandonment plans. Landowners are further encouraged to cooperate in sharing roads to minimize road mileage and avoid duplicative road construction. This section covers the location, design, construction, maintenance and abandonment of forest roads, bridges((:)), stream crossings, quarries, borrow pits, and disposal sites used for forest road construction and is intended to assist landowners in proper road planning, construction and maintenance so as to protect public resources. (NOTE: OTHER LAWS AND REGULATIONS AND/OR PERMIT REQUIREMENTS MAY APPLY. SEE CHAPTER 222-50 WAC.)

AMENDATORY SECTION (Amending Resolution No. 82-1, filed 8/3/82, effective 10/1/82)

WAC 222-24-020 ROAD LOCATION. (1) Fit the road to the topography so that a minimum of alterations to the natural features will occur.

* (2) Minimize roads ((locations in)) along or within narrow canyons((, marshes, wet meadows, natural drainage channels, in streamside management zones and nesting sites of key wildlife habitats)) and along riparian management zones, wet meadows and marshes.

(a) Except where crossings are necessary, roads shall not be located within natural drainage channels and riparian management zones when there would be substantial loss or damage to wildlife habitat unless adequate mitigation of damage to public resources is provided and the department has determined that alternatives will cause greater damage to public resources.

(b) Roads shall not be located in marshes or wet meadows when there would be substantial loss or damage to wildlife habitat unless adequate mitigation of damage to public resources is provided and the department has determined that alternatives will cause greater damage to public resources.

* (3) Minimize the number of stream crossings.

* (4) Whenever practical, cross streams at right angles to the main channel.

(5) Avoid duplicative roads by keeping the total amount of construction to a minimum. Use existing roads whenever practical and avoid isolating patches of timber which, when removed, may require unnecessary road construction.

(6) Where feasible, do not locate roads on excessively steep or unstable slopes or known slide prone areas as determined by the department. The department shall determine whether slopes are unstable using available

soils information, or from evidence of geologically recent slumps or slides, or where the natural slope exceeds the angle of repose for the particular soil types present, or where springs or seeps may indicate unstable conditions are present in or above the construction site.

Essential road construction will be accomplished by end hauling, over hauling, or other special road construction techniques unless the department determines there is potential for damage to public resources under WAC 222-16-050 (1)(e).

AMENDATORY SECTION (Amending Resolution No. 82-1, filed 8/3/82, effective 10/1/82)

WAC 222-24-025 ROAD DESIGN. (1) Use the minimum design standard that produces a road sufficient to carry the anticipated traffic load with reasonable safety.

(2) Subgrade width should average not more than 32 feet for double lane roads and 20 feet for single lane roads, exclusive of ditches, plus any additional width necessary for safe operations on curves and turnouts.

(3) Balance excavation and embankments so that as much of the excavated material as is practical will be deposited in the roadway fill sections. Where full bench construction is necessary, design suitable embankments so that the excavated material may be end hauled to appropriate deposit areas.

(4) Design or construct cut and fill slopes to the normal angle of repose for the materials involved, or at a lesser angle whenever practical.

* (5) All roads should be outslopped or ditched on the uphill side and appropriate surface drainage ((~~should~~)) shall be provided by the use of adequate cross drains, ditches, drivable dips, relief culverts, water bars, ((~~or~~)) diversion ditches, or other such structures demonstrated to be equally effective.

* (6) Cross drains, relief culverts, and diversion ditches ((~~should~~)) shall not discharge onto erodible soils, or over fill slopes unless adequate outfall protection is provided.

* (7) Install cross drains, culverts, water bars, drivable dips, or diversion ditches on all forest roads to minimize erosion of the road bed, cut bank, and fill slope, or to reduce sedimentation of Type 1, 2, 3 or 4 Water. These drainage structures shall be installed at all natural drainages, all low points in the road gradient and spaced no wider than as follows:

Grade	Distance Westside	Distance Eastside
0 to 7%	1,000 ft.	1,500 ft.
8% to 15%	800 ft.	1,000 ft.
over 15%	600 ft.	800 ft.

((~~The department may require~~)) More frequent culvert spacing or other drainage improvements are required where site specific evidence of peak flows or soil instability makes additional culverts necessary to minimize erosion of the road bed, ditches, cut bank, and fill slope to reduce sedimentation of Type 1, 2, 3 or 4 Waters, or to avoid unreasonable risk to public resources. See Part 5, Table 2 in the forest practices board manual for "Additional culvert spacing recommendations." On

request of the applicant, the department may approve less frequent drainage spacing where parent material (e.g. rock, gravel) or topography justify.

* (8) Relief culverts installed on forest roads shall meet the following minimum specifications:

(a) Be at least 12 inches in diameter or equivalent.

(b) Be installed sloping toward the outside edge of the road at a minimum gradient of 3 percent.

* (9) Ditch diversion. Where roadside ditches slope toward a Type 1, 2, or 3 Water for more than 300 feet and otherwise would discharge into the stream, divert the ditchwater onto the forest floor by relief culvert or other means at the first practical point (~~((more than 50 feet from the stream))~~).

AMENDATORY SECTION (Amending Resolution No. 82-1, filed 8/3/82, effective 10/1/82)

WAC 222-24-030 ROAD CONSTRUCTION. (1) Right of way timber. Merchantable right of way timber shall be removed or decked in suitable locations where the decks will not be covered by fill material or act as support for the fill or embankment.

* (2) Debris burial.

(a) In permanent road construction, do not bury:

(i) Loose stumps, logs or chunks containing more than 5 cubic feet in the load-bearing portion of the road, except as puncheon across swampy ground or for culvert protection.

(ii) Any significant amount of organic debris within the top 2 feet of the load-bearing portion of the road, except as puncheon across swampy ground or for culvert protection.

(iii) Excessive accumulation of debris or slash in any part of the load-bearing portion of the road fill, except as puncheon across swampy ground or for culvert protection.

(b) In the cases where temporary roads are being constructed across known areas of unstable soils and where possible construction failure would directly impact waters, the requirements in (a), (i), (ii) and (iii) of this subsection shall apply. A temporary road is a roadway which has been opened for the purpose of the forest practice operation in question, and thereafter will be an inactive or abandoned road.

(3) Compact fills. During road construction, fills or embankments shall be built up by layering. Each layer shall be compacted by operating the tractor or other construction equipment over the entire surface of the layer. Chemical compacting agents may be used in accordance with WAC 222-38-020.

* (4) Stabilize soils. When soil, exposed by road construction, appears to be unstable or erodible and is so located that slides, slips, slumps, or ~~((washing))~~ sediment may reasonably be expected to enter Type 1, 2, 3 or 4 Water and thereby cause damage to a public resource, then such exposed soil areas shall be seeded with grass, clover, or other ground cover, or be treated by ~~((other means))~~ erosion control measures acceptable to the department.

* (5) Channel clearance. Clear stream channel of all debris and slash generated during operations prior to the

removal of equipment from the vicinity, or the winter season, whichever is first.

* (6) Drainage.

(a) All required ditches, culverts, cross drains, drainage dips, water bars, and diversion ditches shall be installed concurrently with the construction of the roadway.

(b) Uncompleted road construction to be left over the winter season or other extended periods of time shall be drained by outloping or cross draining. Water bars and/or dispersion ditches may also be used to minimize eroding of the construction area and stream siltation.

* (7) Moisture conditions. Construction ~~((should))~~ shall be accomplished when moisture and soil conditions are ~~((least))~~ not likely to result in excessive erosion and/or soil movement, so as to avoid damage to public resources.

* (8) End haul/sidecasts. End haul or overhaul construction is required where significant amounts of side-cast material would rest below the ~~((25))~~ 50-year flood level of a Type 1, 2 ~~((or))~~ 3, or 4 Water ~~((below the ordinary high-water mark of Type 4 water;))~~ or where the department determines there is a potential for ~~((massive))~~ mass soil failure from overloading on unstable slopes or ~~((for))~~ from erosion of side cast material causing damage to the public resources ~~((as determined by the department))~~.

* (9) Waste disposal. When spoil, waste and/or other debris is generated during construction, this material ~~((may))~~ shall be deposited or wasted in suitable areas or locations and be governed by the following:

~~((a))~~ Spoil or other debris shall be deposited above the ~~((25))~~ 50-year flood level of Type 1, 2 ~~((or))~~ 3, or 4 Waters or in other locations so as to prevent damage to public resources. The material shall be stabilized by erosion control measures as necessary to prevent the material from entering the waters.

~~((b))~~ Spoil or other debris shall be deposited above the ordinary high-water channel of Type 4 waters and not in a location from which it will reasonably be expected to enter those waters.

~~((c))~~ When the spoil or other debris is deposited in appropriate location, embankments so formed shall be compacted by layering as in subsection (3) of this section, or so stabilized that the risk of its later entering streams is minimal.

AMENDATORY SECTION (Amending Resolution No. 82-1, filed 8/3/82, effective 10/1/82)

WAC 222-24-035 LANDING LOCATION AND CONSTRUCTION. * (1) Landing location:

~~((a))~~ Locate landings ((on firm ground above the ordinary high-water mark of any stream)) to prevent damage to public resources. Avoid excessive excavation and filling.

~~((b))~~ Landings involving sidecast or fill shall be located where the toe of the sidecast or fill does not lie below the 50-year flood level of a Type 1, 2 or 3 water or below the ordinary high-water mark of a Type 4 water.

(2) Landing construction.

(a) Landings requiring sidecast or fill shall be no larger than reasonably necessary for safe operation of the equipment expected to be used.

(b) Where the average general slopes exceed 65 percent, fill material used in construction of landings shall be free from loose stumps and excessive accumulations of slash and shall be mechanically compacted where necessary and practical in layers by tractor to prevent soil erosion and mass soil movement. Chemical compacting agents may be used in accordance with WAC 222-38-020.

AMENDATORY SECTION (Amending Resolution No. 82-1, filed 8/3/82, effective 10/1/82)

WAC 222-24-040 WATER CROSSING STRUCTURES. *(1) Bridge construction.

(a) Bridges are required for new crossings of any Type 1 or 2 Waters regularly used for recreational boating.

(b) Permanent bridges shall not constrict clearly defined channels and shall be designed to pass the 50-year flood level or the road shall be constructed to provide erosion protection from the 50-year flood waters which exceed the water-carrying capacity of the drainage structure.

(c) One end of each new permanent log or wood bridge shall be tied or firmly anchored if any of the bridge structure is within 10 vertical feet of the 50-year flood level.

(d) Excavation for bridges, placement of sills or abutments, and the placement of stringers or girders shall be accomplished from outside the ordinary high-water mark of all waters, except when such operations are authorized by a hydraulic(~~s permit or hydraulics agreement~~) project approval.

(e) Earth embankments constructed for use as bridge approaches shall be protected from erosion by high water. Some examples of protection are: Planted or seeded ground cover, bulkheads, rock riprap, or retaining walls.

(f) When earthen materials are used for bridge surfacing, curbs of sufficient size shall be installed to be above the surface material and prevent such surface material from falling into the stream bed.

***(2) Culvert installation:** All permanent culverts installed in forest roads shall be of a size that is adequate to carry the 50-year flood or the road shall be constructed to provide erosion protection from the 50-year flood waters which exceed the water-carrying capacity of the drainage structure. Refer to Part 5 "Recommended culvert sizes" in the forest practices board manual for the size of permanent culverts recommended for use in forest roads. If the department determines that because of unstable slopes the culvert size shown on that table is inadequate to protect public resources, it may require culvert sizes in accordance with the nomograph (chart) contained in Part 5 of the forest practices board manual or with other generally accepted engineering principles.

(a) No permanent culverts shall be installed that are smaller than:

(i) 24 inches in diameter or the equivalent for anadromous fish streams.

(ii) 18 inches or the equivalent for the resident game fish streams.

(iii) 12 inches or the equivalent for all other water crossings.

(b) The alignment and slope of the culvert shall parallel the natural flow of the stream whenever possible.

(c) When fish life is present, construct the bottom of the culvert at or below the natural stream bed at the inlet and outlet.

(d) Terminate culverts on materials that will not readily erode, such as riprap, the original stream bed (if stable), or other suitable materials.

(e) If water is diverted from its natural channel, return this water to its natural stream bed via culvert, flume, spillway, or the equivalent.

(f) When flumes, downspouts, downfall culverts, etc., are used to protect fill slopes or to return water to its natural courses, the discharge point (~~(must)~~) shall be protected from erosion by: (i) Reducing the velocity of the water, (ii) use of rock spillways, (iii) riprap, (iv) splash plates, or (v) other methods or structures demonstrated to be equally effective.

(g) Stream beds shall be cleared for a distance of 50 feet upstream from the culvert inlet of such slash or debris that reasonably may be expected to plug the culvert.

(h) The entrance of all culverts should have adequate catch basins and headwalls to minimize the possibility of erosion or fill failure.

***(3) Culverts in anadromous fish streams.** In addition to the requirements of subsection (2) of this section, in streams used by anadromous fish:

(a) Culverts shall be either open bottomed or have the bottom covered with gravel and installed at least 6 inches below the natural stream bed at the inlet and outlet.

(b) Closed bottom culverts shall not slope more than 1/2 percent; except as provided in (e) of this subsection; open bottom culverts shall not slope more than the natural slope of the stream bed.

(c) Where multiple culverts are used, one culvert shall be at least 6 inches lower than the other(s).

(d) Culverts shall be set to retain normal stream water depth throughout the culvert length. A downstream control may be required to create pooled water back into the culvert and to insure downstream stream bed stability.

(e) Closed bottom culverts, set at existing stream gradients between 1/2 percent and 3 percent slope shall be designed with baffles for water velocity control, or have an approved designed fishway.

(f) The department, after consultation with the departments of fisheries and (~~(game))~~ wildlife, shall impose any necessary limitations on the time of year in which such culverts may be installed to prevent interference with migration or spawning of anadromous fish.

(g) Any of the requirements in (a) through (f) of this subsection may be superseded by a hydraulic(~~s~~) project approval.

***(4) Temporary water crossings.**

(a) Temporary bridges and culverts, adequate to carry the highest anticipated flow in lieu of carrying the 50-year flood, may be used:

(i) In the westside region if installed after June 1 and removed by September 30 of the same year.

(ii) In the eastside region if installed after the spring runoff and removed prior to the snow buildup which could feed a heavy runoff.

(iii) At other times, when the department and applicant can agree to specific dates of installation and removal.

(b) Temporary bridges and culverts shall be promptly removed upon completion of use, and the approaches to the crossing shall be water barred and stabilized at the time of the crossing removal.

(5) Properly prepared and maintained fords may be used during periods of low water providing a hydraulic(s) permit is acquired.

AMENDATORY SECTION (Amending Resolution No. 82-1, filed 8/3/82, effective 10/1/82)

WAC 222-24-050 ROAD MAINTENANCE. *(1) Road maintenance and abandonment plan.

(a) The landowner when notified by the department shall submit a plan for road maintenance and abandonment for those drainages or road systems the department determines based on physical evidence to have a potential to damage public resources. The plan is subject to annual review and shall include:

(i) Ownership maps showing the road or road system;
(ii) Road status, whether active, inactive, abandoned or planned for abandonment;
(iii) Maintenance schedule and priorities for the year;
and

(iv) Plan for further maintenance and reconstruction beyond the current year for repair of extensive damage.

(b) The plan shall be submitted to the department region office on or before June 30, 1988, and each June 30th thereafter unless the department agrees that no further plans are necessary.

(c) The department will review the plan annually with the landowner to determine whether it will be effective and is being implemented.

(d) Such plans shall also be reviewed with departments of ecology, fisheries and wildlife and affected Indian tribes, any of whom may request an informal conference with the landowner.

*(2) Active roads. An active road is a forest road being actively used for hauling of logs, pulpwood, chips, or other major forest products or rock and other road building materials. To the extent necessary to prevent damage to public resources, the following maintenance shall be conducted on such roads:

(a) Culverts and ditches shall be kept functional.

(b) Road surface shall be maintained as necessary to minimize erosion of the surface and the subgrade.

(c) During and on completion of operations, road surface shall be crowned, outsloped, or water barred and berms removed from the outside edge except those intentionally constructed for protection of fills.

*((2)) (3) Inactive roads. An inactive road is a forest road ((the use of which for)) on which commercial hauling is discontinued for 1 or more logging seasons,

and the forest landowner desires continuation of access for fire control, forest management activities, Christmas tree growing operations, occasional or incidental use for minor forest products harvesting or similar activities on such inactive roads:

(a) Before the first winter rainy season following termination of active use, nonfunctional ditches and culverts shall be cleared and the road surface shall be crowned, outsloped, water barred or otherwise left in a condition not conducive to accelerated erosion; and

(b) Thereafter, except as provided in (c) of this subsection, the landowner shall clear or repair ditches or culverts which he knows or should know to be nonfunctional and causing or likely to cause material damage to a public resource.

(c) The landowner shall not be liable for penalties or monetary damages, under the act, for damage occurring from a condition brought about by public use, unless he fails to make repairs as directed by a notice to comply.

*((3)) (4) Additional culverts/maintenance. If the department determines based on physical evidence that the above maintenance has been or will be inadequate to protect public resources and that additional measures will provide adequate protection it shall require the landowner or operator to either elect to:

(a) Install additional or larger culverts or other drainage improvements as deemed necessary by the department; or

(b) Agree to an additional road maintenance program. Such improvements in drainage or maintenance may be required only after a field inspection and opportunity for an informal conference.

*((4)) (5) Abandoned roads. An abandoned road is a forest road which the forest landowner ((does not intend to be used again for commercial hauling of forest products)) has abandoned in accordance with procedures of (a) through (e) of this subsection. ((No subsequent)) Roads are exempt from maintenance ((of an abandoned road is required)) only after ((the following procedures are)) (e) of this subsection is completed:

(a) Roads are outsloped, water barred, or otherwise left in a condition suitable to control erosion; and

(b) Ditches are ((cleaned)) left in a suitable condition to reduce erosion; and

(c) The road is blocked ((to vehicular traffic or is posted "closed.)) so that four wheel highway vehicles can not pass the point of closure at the time of abandonment; and

(d) ((The department may request the removal of)) Bridges ((and)), culverts, and fills on ((Type 1, 2, 3 and 4)) all waters(, except where the owner elects to maintain the drainage structures) are removed, except where the department determines other measures would provide adequate protection to public resources.

(e) The department shall determine whether the road has been abandoned according to procedures of this subsection. If the department determines the road is properly abandoned, it shall within thirty days notify the landowner in writing that the road is officially abandoned.

*~~((5))~~ (6) Brush control. Chemical control of roadside brush shall not be done where chemicals will directly enter any Type 1, 2, or 3 or flowing Type 4 or 5 Water. Refer to WAC 222-38-020 for additional information.

*~~((6))~~ (7) Road surface treatment.

(a) Apply oil to the road surface only when the temperature is above 55 degrees F and during the season when there is a minimal chance of rain for the next 48 hours.

(b) Water the road surface prior to application of oil to assist in penetration.

(c) Construct a temporary berm along the road shoulder wherever needed to control runoff of the applied chemical.

(d) Take extreme care to avoid excess application of road chemicals. Shut off the flow at all bridges.

(e) When cleaning out chemical storage tanks or the application equipment tanks used for storage and application of road treatment materials, dispose of the rinse water fluids on the road surface or in a place safe from potential contamination of water.

(f) The use of dry road chemicals shall be in compliance with WAC 222-38-020.

AMENDATORY SECTION (Amending Order 263, filed 6/16/76)

WAC 222-24-060 ROCK QUARRIES, GRAVEL PITS, BORROW PITS, AND SPOIL DISPOSAL AREAS. Not covered by the Surface Mine Reclamation Act of 1971 (chapter 78.44 RCW).

* (1) Location of pits. Except as approved by the department, rock quarries and gravel pits opened after January 1, 1975 shall be located above the ~~((25))~~ 50-year flood level.

* (2) Location of spoil disposal areas. Except as approved by the department, spoil disposal areas shall be located:

(a) Above the ~~((25))~~ 50-year flood level.

(b) Where the final slope after disposal will be no steeper than 1 1/2:1.

(c) Where practical, on areas having low potential timber productivity.

(d) Where the risk of soil erosion and mass soil movement is minimal.

(e) All spoils shall be placed to allow drainage without additional water ponding.

* (3) Pit drainage. During construction and use of rock quarries, gravel pits, or borrow pits, runoff water shall be either diverted onto the forest floor or be passed through one or more settling basins as approved by the department.

(4) Rehabilitation required. All rock quarries, gravel pits, spoil disposal areas and borrow pits used after January 1, 1975 shall be reclaimed within 2 years from the time the rock or gravel source is either exhausted or abandoned.

(5) Rehabilitation standards. Where rehabilitation is required:

(a) Remove all deleterious material that has potential for damaging the public resource, the soil productivity,

or that would prevent reforestation of an otherwise plantable area.

(b) Grade slopes to less than the angle of repose unless otherwise approved.

(c) Reforest in accordance with chapter 222-34 WAC to the extent practical.

(d) Seed unreforested exposed erodible soils with grass, clover or other ground cover.

* (6) Major spoil disposal operations. Where a spoil disposal operation involves more than 1,000 cubic yards of spoils:

(a) The spoils shall be placed to provide drainage onto the forest floor without water ponding within the disposal area;

(b) The site shall be reforested in accordance with chapter 222-34 WAC to the extent practical; and

(c) If significant erosion of the spoils develops, the eroding areas shall be water barred and any unreforested areas shall be matted, mulched, or seeded with grass or ground cover.

AMENDATORY SECTION (Amending Order 263, filed 6/16/76)

WAC 222-30-020 HARVEST UNIT PLANNING AND DESIGN. (1) Logging system. The logging system should be appropriate for the terrain, soils, and timber type so yarding or skidding can be economically accomplished in compliance with these regulations.

* (2) Landing locations.

~~((a))~~ Locate landings ~~((on firm ground above the ordinary high-water mark of any stream))~~ to prevent damage to public resources. Avoid excessive excavation and filling.

~~((b))~~ Landings involving sidecast or fill shall be located where the toe of the sidecast or fill does not lie below the 50-year flood level of a Type 1, 2 or 3 water or below the ordinary high-water mark of a Type 4 water.)

(3) Landing construction.

(a) Landings requiring sidecast or fill shall be no larger than reasonably necessary for safe operation of the equipment expected to be used.

(b) Where the average general slopes exceed 65 percent, fill material used in construction of landings shall be free of loose stumps and excessive accumulations of slash and shall be mechanically compacted where necessary and practical in layers by tractor to prevent soil erosion and mass soil movement. Chemical compacting agents may be used in accordance with WAC 222-38-020.

* (c) Truck roads, skid or fire trails shall be outloped or cross drained uphill of landings and the water diverted onto the forest floor away from the toe of any landing fill.

(d) Landings shall be sloped to minimize accumulation of water on the landing.

* (e) Excavation material shall not be sidecast where there is high potential for material to enter below the ordinary high-water mark of any stream or the 50-year flood level of Type 1, 2 ~~((or))~~, 3 or 4 Water.

* (4) ~~((Streamside))~~ Riparian management zone. These zones shall be measured from the ordinary high-water mark of Type 1, 2 or 3 Water and extend to the

line where vegetation changes from wetland to upland plant community, but shall not be less than 25 feet in width nor more than the maximum widths described in (c) of this subsection, provided that the riparian management zone width shall be expanded as necessary to include swamps, bogs, marshes or ponds adjacent to the stream.

(a) Harvest units shall be designed so that felling, bucking, yarding or skidding, and reforestation can be accomplished in accordance with these regulations, including those regulations relating to stream bank integrity and temperature control. Where the need for additional actions or restrictions adjacent to waters not covered by the following become evident, WAC 222-12-050 and 222-12-060 may apply.

(b) When requested in writing by the applicant, the department shall assist in preparation of an alternate plan for the riparian management zone.

(c) Within the riparian management zone, there shall be trees left for wildlife and fisheries habitat as provided for in the chart below. Fifty percent or more of the trees shall be live and undamaged on completion of the harvest. The leave trees shall be randomly distributed where feasible; some clumping is allowed to accommodate operational considerations. The number, size, species and ratio of leave trees, deciduous to conifer, is specified by the bed material and average width of the water type within the harvest unit. Trees left according to (d) of this subsection may be included in the number of required leave trees in this subsection.

WATER TYPE/ AVERAGE WIDTH	RMZ MAXIMUM WIDTH	RATIO OF		# TREES/1000 FT. EACH SIDE
		CONIFER TO DECIDUOUS/ SIZE OF LEAVE TREES	GRAVEL/BOULDER/ COBBLE BEDROCK <10" DIAMETER	
1 & 2 Water 75' & over	100'	representative of stand		50 trees 25 trees
1 & 2 Water under 75'	75'	representative of stand		100 trees 50 trees except N.E. Wash. 75 trees 50 trees
3 Water 5' & over	50'	2 to 1/ 12" or next largest available except N.E. Wash. 8" or next largest available		75 trees 25 trees except N.E. Wash. 60 trees 25 trees
3 Water less than 5'	25'	1 to 1/ 6" or next largest available		25 trees 25 trees

The leave tree requirement for northeastern Washington applies only to Stevens, Pend Oreille, Spokane, and Ferry Counties and that portion of Okanogan County lying east of the Okanogan River. "Or next largest available" requires that the next largest trees to those specified in the rule be left standing when those available are smaller than the sizes specified.

(d) For wildlife habitat within the riparian management zone, leave an average of 5 undisturbed and uncut wildlife trees per acre at the ratio of 1 deciduous tree to 1 conifer tree equal in size to the largest existing trees of those species within the zone. Where the 1 to 1 ratio is

not possible, then substitute either species present. Forty percent or more of the leave trees shall be live and undamaged on completion of harvest. Wildlife trees shall be left in clumps whenever possible.

(e) When 10 percent or more of the harvest unit lies within the riparian management zone of Type 1, 2 or 3 Waters and either the harvest unit is a clearcutting of 30 acres or less or in eastern Washington, the harvest unit is a partial cutting of 80 acres or less, leave not less than 50 percent of the trees required in (c) of this subsection. (See WAC 222-16-010(33) partial cutting.)

(5) Type 4 Water riparian leave tree areas. The department will require trees to be left along Type 4 Water where such practices are necessary to protect public resources. Where such practices are necessary leave at least 25 conifer or deciduous trees, 6 inches in diameter or larger, on each side of every 1000 feet of stream length within 25 feet of the stream. The leave trees may be arranged to accommodate the operation.

((5)) (6) Future productivity. Harvesting shall leave the land in a condition conducive to future timber production except:

(a) To the degree required for ((streamside)) riparian management zones; or

(b) Where the lands are being converted to another use or classified urban lands as specified in WAC 222-34-050.

((6)) (7) Wildlife habitat. This ((section)) subsection is designed to encourage timber harvest practices that would protect wildlife habitats, provided, that such action shall not unreasonably restrict landowners action without compensation.

(a) The applicant should make every reasonable effort to cooperate with the department of ((game)) wildlife to identify ((key)) critical wildlife habitats as defined by the board. Where these habitats are known to the applicant, they shall be identified in the application or notification.

(b) Where a ((key)) critical wildlife habitat has been identified the applicant shall consider reasonable means of protection thereof as part of the proposed harvesting operation.

(c) Harvesting methods and patterns in established big game winter ranges should be designed to insure adequate access routes and escape cover where practical.

(i) Where practical, cutting units should be designed to conform with topographical features.

(ii) Where practical on established big game winter ranges, cutting units should be dispersed over the area to provide cover, access for wildlife, and to increase edge effect.

(d) In areas where this will not create a significant fire or safety hazard nor conflict with achieving conformance with the limitation of or performance with the provisions of chapter 76.04 RCW (snag falling law) and chapter 49.17 RCW (safety), a reasonable number of snags will be left to protect habitat for cavity nesting wildlife.

AMENDATORY SECTION (Amending Order 263, filed 6/16/76)

WAC 222-30-030 STREAM BANK INTEGRITY. *In the ((streamside)) riparian management zone

along all Type 1, 2 and 3 Waters, ~~((use reasonable care to))~~ the operator shall:

(1) Avoid disturbing brush and similar understory vegetation;

(2) Avoid disturbing stumps and root systems and any logs embedded in the bank;

(3) Leave high stumps where necessary to prevent felled and bucked timber from entering the water~~(-);~~;

~~((The streamside management zone is measured from the ordinary high water on both sides of the water and is 50 feet in width for Type 1 and 2 waters and 25 feet for Type 3 water.))~~ (4) Leave trees which display large root systems embedded in the bank.

AMENDATORY SECTION (Amending Resolution No. 82-1, filed 8/3/82, effective 10/1/82)

WAC 222-30-040 TEMPERATURE CONTROL.

* (1) Determination of temperature sensitivity for Type 1, 2 and 3 Waters shall be based upon field data ~~((or upon criteria set forth in WAC 222-16-040))~~ or records, from a verified water temperature model or method acceptable to the department, that demonstrate significant adverse water temperature impacts following the proposed timber harvest and shade removal. Any designation as to whether or not waters are temperature sensitive shall be made by the department prior to the deadline for approval or disapproval of the application for harvest.

* (2) Shade requirements. Within the ~~((streamside))~~ riparian management zone along those Type 1, 2 and 3 Waters designated as temperature sensitive, unless a waiver is granted by the department under subsection (3) of this section, the operator shall:

(a) Leave all nonmerchantable vegetation which provides mid-summer and mid-day shade of the water surface; and

(b) Leave sufficient merchantable timber, if any, necessary to retain 50 percent of the summer mid-day shade of the water surface, provided that the department shall require leaving 75 percent of the shade where it determines that the mean of the maximum summer daily ambient water temperatures, for a 7-day period, exceeds 60 degrees before logging. (See the forest practices board manual part 2 for methods of shade determination.)

* (3) Waivers. The department may waive or modify the shade requirements where the applicant:

(a) Shows a high probability of windthrow and agrees to replant the ~~((streamside))~~ riparian management zone within the first planting season after harvest; or

(b) Agrees to a staggered setting program producing equal or greater temperature control; or

(c) Provides alternative means of stream temperature control satisfactory to the department.

AMENDATORY SECTION (Amending Resolution No. 82-1, filed 8/3/82, effective 10/1/82)

WAC 222-30-050 FELLING AND BUCKING.

* (1) ~~((Felling into stream))~~ Falling along water.

(a) No trees will be felled into Type 1, 2 and 3 Waters, except trees which cannot practically and safely be

felled outside the stream, lake or pond using techniques in general use and these trees must then be removed promptly.

Such felling and removing in Type 1, 2 or 3 Waters shall comply with the hydraulic project approval of the departments of fisheries or wildlife.

(b) Within the riparian management zone fall trees favorable to the lead consistent with safety standards to yard or skid away from the waters. The use of directional falling, lining, jacking and staged falling techniques are encouraged.

~~((b))~~ (c) Trees may be felled into Type 4 Water if logs are removed as soon thereafter as practical. See forest practices board manual guidelines for clearing slash and debris from Type 4 and 5 Water.

* (2) Bucking in ((streams)) water.

(a) No bucking or limbing shall be done on trees or portions thereof lying between the banks of Type 1, 2 or 3 Waters, except as necessary to remove the timber from the ~~((stream, lake or pond))~~ water.

(b) Where bucking or limbing is done between the banks of a Type 4 Water, care shall be taken to minimize accumulation of slash in the ~~((stream, lake or pond))~~ water.

* (3) ~~((Felling in streamside management zones.~~

(a) ~~Individual trees within a streamside management zone otherwise restricted from cutting may be harvested if reasonably expected to fall into the stream, lake or pond from natural causes.~~

(b) ~~Care shall be taken to fall any trees cut within the streamside management zone in a manner to prevent damage to the stream, lake or pond and streamside management zone.~~

* ~~((4) Felling))~~ Falling near ((streamside)) riparian management zone and setting boundaries. Reasonable care shall be taken to avoid felling trees into ((streamside)) riparian management zones and areas outside the harvest unit.

~~((5) Felling))~~ (4) Falling in selective and partial cuts. Reasonable care shall be taken to fall trees in directions that minimize damage to residual trees.

AMENDATORY SECTION (Amending Resolution No. 82-1, filed 8/3/82, effective 10/1/82)

WAC 222-30-060 CABLE YARDING. * (1) Type 1, 2 and 3 Waters. No timber shall be cable yarded in or across a Type 1, 2 or 3 Waters except where~~(:~~

~~(a))~~ the logs will not materially damage the ~~((stream))~~ bed of waters, banks or ~~((streamside))~~ riparian management zones~~((-or~~

~~(b) Necessary to remove trees from the stream; or~~

~~(c) Part of a stream clearance and improvement project approved by the departments of fisheries or game; or~~

~~(d) Approved by the department))~~ and removals from Type 1, 2 or 3 Water have hydraulic project approval of the departments of fisheries or wildlife.

* (2) Deadfalls. Any logs which are firmly embedded in the bed of a Type 1, 2 ~~((or)),~~ 3 and 4 Waters shall not be removed or unnecessarily disturbed without approval of the departments of fisheries ~~((and game))~~ or wildlife.

*~~(3)~~ Yarding in ~~((streamside))~~ riparian management zone. Where timber is yarded from or across a ~~((streamside))~~ riparian management zone, reasonable care shall be taken to minimize damage to the vegetation providing shade to the stream and to minimize disturbance to understory vegetation, stumps and root systems. Where practical and consistent with good safety practices, logs shall be yarded in the direction in which they lie and away from Type 1, 2 and 3 Waters until clear of the ~~((streamside))~~ riparian management zone.

(4) Direction of yarding.

(a) Uphill yarding is preferred.

(b) Where downhill yarding is used, reasonable care shall be taken to lift the leading end of the log to minimize downhill movement of slash and soils.

*~~(c)~~ When yarding parallel to a Type 1, 2 or 3 Water channel below the ~~((25))~~ 50-year flood level or within the riparian management zone, reasonable care shall be taken to minimize ~~((rutting))~~ soil disturbance and to prevent logs from rolling into the stream, lake ~~((or)),~~ pond, or ((streamside)) riparian management zone.

AMENDATORY SECTION (Amending Resolution No. 82-1, filed 8/3/82, effective 10/1/82)

WAC 222-30-070 TRACTOR AND WHEELED SKIDDING SYSTEMS. *~~(1)~~ ~~((Streams))~~ Type 1, 2, 3 and 4 Waters.

(a) Tractor and wheeled skidders shall not be used in Type 1, 2 or 3 Water, except with ~~((the))~~ approval by the department and with a hydraulic project approval of the departments of fisheries or wildlife.

(b) Skidding across any flowing Type 4 Water shall be minimized and when done, temporary stream crossings shall be used, if necessary, to maintain stream bed integrity.

(c) Whenever skidding in or across any type water, the direction of log movement between stream banks shall be as close to right angles to the stream channel as is practical.

*~~(2)~~ ~~((Streamside))~~ Riparian management zone.

(a) Logging will be permitted within the zone ~~((pro-vided that)).~~ However, any use of tractors ~~((and)),~~ wheeled skidders ~~((may not be used)),~~ or other yarding machines within the zone ~~((unless))~~ must be as described in an approved forest practices application or otherwise approved in writing by the department.

(b) Where skidding in or through the ~~((streamside))~~ riparian management zone is necessary, the number of skidding routes through the ~~((management))~~ zone shall be minimized.

(c) Logs shall be skidded ~~((in the direction in which they lie until clear of the streamside))~~ so as to minimize damage to leave trees and vegetation in the riparian management zone, to the extent practical and consistent with good safety practices.

(3) Deadfalls. ~~((Any))~~ Logs ~~((which are))~~ firmly embedded in the bed or bank of ~~((a))~~ Type 1, 2 ~~((or)),~~ 3 or 4 Waters shall not be removed or unnecessarily disturbed without hydraulic project approval of the departments of fisheries ~~((and game))~~ or wildlife.

*~~(4)~~ Moisture conditions. Tractor and wheeled skidders shall not be used on exposed erodible soils when soil moisture content is so high that unreasonable ~~((rutting))~~ soil disturbance, or stream, lake or pond siltation would result.

(5) Protection of residual timber. Reasonable care shall be taken to minimize damage from skidding to the stems and root systems of residual timber and to young reproduction.

*~~(6)~~ Skid trail construction.

(a) Skid trails shall be kept to the minimum feasible width.

(b) Reasonable care shall be taken to minimize the amount of sidecast required and shall only be permitted above the 50-year flood level.

(c) Skid trails shall be outsloped where practical, but be insloped where necessary to prevent logs from sliding or rolling downhill off the skid trail.

*~~(7)~~ Skid trail maintenance. Upon completion of use and termination of seasonal use, skid trails on slopes in exposed soils shall be water barred where necessary to prevent soil erosion.

*~~(8)~~ Slope restrictions. Tractor and wheeled skidders shall not be used on slopes where in the opinion of the department this method of operation would cause unnecessary or material damage to a public resource.

AMENDATORY SECTION (Amending Resolution No. 82-1, filed 8/3/82, effective 10/1/82)

WAC 222-30-090 POSTHARVEST SITE PREPARATION. Unless the application or notification indicates that the landowner or forest landowner specifically agrees to assume responsibility for compliance with this section, the operator shall leave the site in a condition suitable for reforestation following any clear cutting, or any partial cutting west of the summit of the Cascades where 80 percent or more of the cubic volume is removed within any 5 consecutive years unless the department determines that the live trees remaining will reasonably utilize the timber growing capacity of the soils. Lands being converted to another use or classified as urban development lands under WAC 222-34-050 are exempt.

~~((+))~~ The following site preparation is required when necessary to establish a condition suitable for reforestation:

~~((a))~~ (1) Cutting, slashing, or other treatment of all noncommercial tree species, other competing vegetation, and nonmerchantable size trees commonly known as "whips" which will not reasonably utilize the growing capacity of the soil except in the ~~((streamside))~~ riparian management zone; or

~~((b))~~ (2) Pile or windrow slash; or

~~((c))~~ (3) Mechanically scatter slash; or

~~((d))~~ (4) Leave the cutover area in a condition for controlled broadcast burning, and subsequently burn.

~~((2) Streamside management zones may require special treatment to establish conditions suitable for reforestation.)~~

AMENDATORY SECTION (Amending Resolution No. 82-1, filed 8/3/82, effective 10/1/82)

WAC 222-30-100 SLASH DISPOSAL. (1) Slash disposal techniques:

(a) Except in riparian management zones and on sites where the department determines that a particular method would cause unreasonable risk to public resources or unreasonably damage site productivity, any conventional method of slash disposal may be used, such as: Controlled broadcast burning; pile or windrow and burn; pile or windrow without burning; mechanical scatter and compaction; scarification; chip, mulch or lop and scatter; burying; and physical removal from the forest lands: PROVIDED, That on land shown to have low productivity potential the landowner or operator shall obtain the department's approval of its regeneration plan prior to utilizing controlled broadcast burning as a slash disposal technique. In riparian management zones, slash disposal shall be by hand, unless approved by the department.

(b) All slash burning requires a burning permit from the department which provides for compliance with the smoke management plan and reasonable care to prevent damage to ~~((streamside))~~ riparian management zones, soil, residual timber, public resources, and other property.

*(c) Location of slash piles. Except where burning will be completed before the next ordinary high-water season, slash shall not be piled or windrowed below the ((25)) 50-year flood level of any Type 1 ((σ)), 2, 3 or 4 Water((, or below the ordinary high-water mark of any Type 3 or 4 water;)) or in locations from which it could be expected to enter any stream, lake or pond.

(2) Slash ((disposal)) isolation, reduction, or abatement is required when ((abatement of)) the department determines there is an extreme fire hazard ((is required by)) according to law (see WAC 332-24-360).

(3) Slash disposal is required where the forest landowner has applied for and been granted an extension of time for reforestation on the grounds that slash disposal is necessary or desirable before reforestation.

*(4) Removing slash and debris from streams.

~~((a)) "Slash" or "debris" which can reasonably be expected to cause significant damage to the public resource shall be removed from Type 1, 2 ((σ)), 3 or 4 Waters, to above the ((25)) 50-year flood level and left in a location or manner minimizing risk of re-entry into the stream, lake or pond and if substantial accumulations of slash exist below the ((25)) 50-year flood level of Type 1 ((σ)), 2, 3 or 4 Waters, slash disposal is required. See the forest practices board manual for "Guidelines for clearing slash and debris from Type 4 and 5 Waters."~~

~~((b)) "Slash" and "debris" shall be removed from below the ordinary high-water mark of Type 4 waters, when the department issues written notice for removal of the slash or debris because of potential damage to public resources. See part 6 of the forest practices board manual for "Guidelines for clearing slash and debris from Type 4 waters."~~

*(5) Fire trails.

(a) Construct dips, water bars, cross drainage and ditches as needed to control erosion.

(b) Reasonable care shall be taken to minimize excavation during fire trail construction and sidecast shall only be permitted above the 50-year flood level.

AMENDATORY SECTION (Amending Resolution No. 86-2, filed 10/10/86, effective 12/1/86)

WAC 222-34-010 REQUIRED REFORESTATION—WEST OF CASCADES SUMMIT. (1) Reforestation – where required.

(a) Unless the harvest application indicates that the land will be converted to another use, or the lands are identified in WAC 222-34-050 as having a likelihood of conversion to urban uses, reforestation is required for forest lands harvested after January 1, 1975 in the following instances:

(i) Clearcutting; or

(ii) Partial cutting where 50 percent or more of the timber volume is removed within any 5-year period, unless the department determines that the live trees remaining will reasonably utilize the timber growing capacity of the soils.

(b) Reforestation is not required where:

(i) Individual dead, dying, down or windthrown trees are salvaged; or

(ii) A tree or trees not constituting a merchantable stand are removed from lands in actual use for other purposes; for example, removal of individual trees from lands used for farming or grazing; or

(iii) Trees are removed under a thinning program reasonably expected to maximize the long-term production of commercial timber; or

(iv) A minimum of 190 vigorous, undamaged, well-distributed seedlings per acre of a commercial tree species are established on the area harvested and not more than 20 percent of the harvested area has from 150 to 190 seedlings per acre; or

(v) A minimum of 100 vigorous, undamaged, well-distributed saplings or merchantable trees per acre of a commercial species or combinations thereof, remain on the area harvested.

(2) Acceptable stocking. Stocking levels are acceptable if a minimum of 190 well-distributed, vigorous, undamaged seedlings per acre of commercial tree species or such lesser number as the department determines will reasonably utilize the timber growing capacity of the site, have survived on the site at least 1 growing season. "Well-distributed" means that not more than 20 percent of the harvested area contains less than a minimum of 150 seedlings per acre as determined by the department.

(3) Competing vegetation. Competing vegetation shall be controlled to the extent necessary to allow establishment, survival, and growth by commercial species.

(4) Artificial regeneration standards.

(a) Satisfactory reforestation – clearcuts. Satisfactory reforestation of a clearcut harvest occurs if within 3 years of completion of harvest, or a period of from 1 to ((5)) 10 years as determined by the department in the case of a natural regeneration plan, the site is restocked to at least the acceptable stocking levels described in

subsection (2) of this section: PROVIDED, That regeneration failures from causes beyond the applicant's control will not result in violation of this section, but supplemental planting or reforestation may be required except in riparian management zones (see WAC 222-34-030(4)).

The department may grant an extension of time for planting or seeding if suitable seedlings or seeds are unavailable, or if weather conditions or other circumstances beyond the forest land owner's control require delay in planting or seeding.

(i) Reforestation species. Where the species proposed for reforestation after timber harvesting differs from the removed stand, the department may approve use of the proposed species where the reforestation plan reveals that the proposed species is preferable from any of the following standpoints:

(A) Site data indicates better potential production for the proposed species than the existing species.

(B) Control of forest insects or diseases.

(C) Greater economic return.

(ii) Seedling or seeding standards. Except as approved by the department to qualify as acceptable reforestation, the seedlings or seeds must be from an appropriate seed source zone. The department shall establish seed zones and guidelines for their use.

(b) Satisfactory reforestation – partial cuts. Where reforestation is required in connection with a partial cut, the harvest application shall include a plan for stocking improvement. The plan shall be approved unless the department determines that it will not reasonably utilize the timber growing capacity of the site.

(5) Natural regeneration standards. A natural regeneration plan may be approved as acceptable reforestation if:

(a) A seed source of well formed trees of commercial tree species, capable of seed production is available.

(b) The owner of the seed source agrees in writing not to harvest the seed source for the time period specified in the plan, or until issuance of a satisfactory reforestation inspection report.

(c) The seed source must consist of:

(i) Seed blocks of sizes and locations shown on the plan and satisfactory to the department; or

(ii) An average of at least 8 individually marked, well-distributed, undamaged, vigorous, windfirm seed trees per acre of plantable area and no inadequately stocked area is more than 400 feet from the nearest seed tree; and

(iii) Competing vegetation shall be controlled to the extent necessary to allow establishment, survival, and growth by commercial species.

(6) Any alternate plan for natural reforestation may be approved if it provides a practical method of achieving acceptable stocking levels as described in subsection (2) of this section within a period of 1 to ((5)) 10 years.

AMENDATORY SECTION (Amending Resolution No. 86-2, filed 10/10/86, effective 12/1/86)

WAC 222-34-020 REQUIRED REFORESTATION—EAST OF CASCADES SUMMIT. (1) Reforestation – where required.

(a) Unless the harvest application indicates that the land will be converted to another use, or the lands are identified in WAC 222-34-050 as having a likelihood of conversion to urban use, reforestation is required for forest lands harvested after January 1, 1975 in the following instances:

(i) Clearcutting; or

(ii) Partial cutting where 50 percent or more of the timber volume is removed within any 5-year period, unless the department determines that the live trees remaining will reasonably utilize the timber growing capacity of the soils.

(b) Reforestation is not required where:

(i) Individual dead, dying, down or windthrown trees are salvaged; or

(ii) A tree or trees not constituting a merchantable stand are removed from lands in actual use for other purposes, for example, removal of individual trees from lands used exclusively for farming or cultivated pasture; or

(iii) Trees are removed under a thinning program reasonably expected to maximize the long-term production of commercial timber; or

(iv) A minimum of 150 vigorous, undamaged, well-distributed seedlings per acre of a commercial tree species are established on the area harvested and not more than 20 percent of the harvested area has from 120 to 150 seedlings per acre; or

(v) A minimum of 100 vigorous, undamaged, well-distributed advanced regeneration, saplings or merchantable trees per acre of a commercial tree species or combinations thereof, remain on the area harvested.

(2) Acceptable stocking. Stocking levels are acceptable if a minimum of 150 well-distributed, vigorous, undamaged seedlings per acre of commercial tree species or such lesser number as the department determines will reasonably utilize the timber growing capacity of the site have survived on the site at least 1 growing season. "Well-distributed" means that not more than 20 percent of the harvested area contains less than a minimum of 120 trees per acre as determined by the department.

(3) Competing vegetation. Competing vegetation shall be controlled to the extent necessary to allow establishment survival and growth by commercial species.

(4) Artificial regeneration standards.

(a) Satisfactory reforestation – clearcuts. Satisfactory reforestation of a clearcut harvest occurs if within 3 years of completion of harvest or a period of from 1 to ((5)) 10 years as determined by the department in the case of a natural regeneration plan, the site is restocked to at least the acceptable stocking levels described in subsection (2) of this section: PROVIDED, That regeneration failures from causes beyond the applicant's control will not result in a violation of this section, but supplemental planting may be required except in riparian management zones (see WAC 222-34-030(4)).

The department may grant an extension of time for planting or seeding if suitable seedlings or seeds are unavailable, or if weather conditions or other circumstances beyond the forest landowner's control require delay in planting or seeding.

(i) Reforestation species. Where the species proposed for reforestation after timber harvesting differs from the removed stand, the department may approve use of the proposed species where the reforestation plan reveals that the proposed species is preferable from any of the following standpoints:

(A) Site data indicates better potential production for the proposed species than the existing species.

(B) Control of forest insects or diseases.

(C) Greater economic return.

(ii) Seedling and seed standards. Except as approved by the department to qualify as acceptable reforestation, the seedlings and seed must be from an appropriate seed source zone. The department shall establish seed zones and guidelines for their use.

(b) Satisfactory reforestation – partial cuts. Partial cuts not meeting the specifications of subsection (1)(b)(iv) or (v) of this section shall have a seed source as required in subsection (5)(c)(ii) of this section.

(5) Natural regeneration standards. A natural regeneration plan may be approved by the department as acceptable reforestation if:

(a) A seed source of well-formed, vigorous trees of commercial tree species capable of seed production is available.

(b) The owner of the seed source agrees in writing not to harvest the seed source for the time period specified in the plan or until issuance of a satisfactory reforestation inspection report.

(c) The seed source consists of one of the following, or combinations thereof:

(i) Seed blocks which total a minimum of 5 percent of the area of each 40 acre subdivision or portion thereof harvested: PROVIDED, That the seed block should be reasonably windfirm, at least 1/2 acre in size, and reserved in locations shown on the plan and approved by the department; or

(ii) A minimum of 4 undamaged seed trees per acre, well distributed over each 40 acre subdivision or portion thereof harvested: PROVIDED, That the distance from seed trees of harvested areas that are not adequately stocked should not be more than 200 feet. Seed trees shall be of commercial tree species, vigorous and of seed-bearing age and size.

(6) Any alternate plan for natural reforestation may be approved if it provides a practical method of achieving acceptable stocking levels as described in subsection (2) of this section within a period of 1 to ((5)) 10 years.

AMENDATORY SECTION (Amending Resolution No. 86-2, filed 10/10/86, effective 12/1/86)

WAC 222-34-030 REFORESTATION—PLANS—REPORTS—INSPECTIONS. (1) Reforestation plans. Reforestation plans must be submitted with the application or notification except where no reforestation is required. The department shall designate difficult regeneration areas utilizing silvicultural information. When a forest practice is proposed for such an area, the department may require additional information regarding harvest systems and post harvest site preparation, as well as regeneration. The department shall approve ((a)) the reforestation plan for difficult regeneration areas if it

determines that such a plan will achieve acceptable stocking according to WAC 222-34-010 and 222-34-020.

(2) Reforestation reports. The landowner, forest landowner, or his designee shall file a report with the department either at the time of completion of planting or reforestation or at the end of the normal planting season. When artificial seeding is used the report shall be filed 2 growing seasons after seeding.

(3) The reports in subsection (2) of this section must contain at least the following:

(a) The original forest practice application or notification number.

(b) Species reforested, planted, or seeded.

(c) Age of stock planted or seed source zone.

(d) Description of actual area reforested, planted, or seeded.

(4) Inspection; supplemental planting or reforestation directives.

(a) Within 12 months after a reforestation report is received, the department shall inspect the reforested lands. The department shall issue written notice to the landowner, forest landowner, or his designee stating whether supplemental planting or reforestation or further inspection is required within 30 days after the deadline for inspection or the reforestation shall be deemed satisfactory.

(b) If the inspection shows that acceptable stocking levels have not been achieved, the department shall direct the forest landowner to perform supplemental planting in accordance with the planting standards of WAC 222-34-010 (3) and (4)(a)(ii), 222-34-020 (3) and (4)(a)(ii): PROVIDED, That:

(i) In lieu of such supplemental planting, the department and the forest landowner may agree on a supplemental reforestation plan.

(ii) Supplemental planting or reforestation shall not be required where in the opinion of the department planting or reforestation is not feasible due to rocky ground, dry conditions, excessively high water table or other adverse site factors and the department determines that there is little probability of significantly increasing the stocking level.

(iii) Where supplemental planting or reforestation has been required by the department, the landowner, forest landowner, or his designee shall file a report of supplemental planting or reforestation upon completion.

(iv) Except where stocking improvement is necessary to protect public resources and is feasible, further supplementary planting shall not be required where acceptable stocking levels have not been achieved after two properly performed supplemental plantings.

(c) Within 12 months after a supplemental planting or reforestation report is received, the department shall inspect the reforested lands.

(d) Evidence of compliance. The department shall within 30 days after the deadline for inspection or reinspection and when requested by the forest landowner confirm in writing whether acceptable stocking levels have been achieved, provided field conditions do not prevent the department from properly evaluating the reforestation.

(e) Where a natural regeneration plan has been approved by the department, the department may allow up to ((5)) 10 years to achieve acceptable stocking levels.

AMENDATORY SECTION (Amending Resolution No. 82-1, filed 8/3/82, effective 10/1/82)

Each individual, upon entering the practice of nursing, assumes a measure of responsibility and public trust and the corresponding obligation to adhere to the standards of nursing practice. (b) The nurse shall plan and implement nursing care which will assist the client to maintain or return to a state of health or will support a dignified death.

The following will serve as a guideline for the nurse as to the acts, practices, or omissions that are inconsistent with generally accepted standards of nursing conduct or practice. Such conduct or practice may be grounds for action with regard to the license to practice nursing pursuant to chapter 18.88 RCW and the Uniform Disciplinary Act, chapter 18.130 RCW. Such conduct or practice includes, but is not limited to the following:

This section should not be construed as prohibiting delegation to family members and other care givers exempted by RCW 18.88.030 or 18.88.280.

(b) Failure to supervise those to whom nursing activities have been delegated. Such supervision shall be adequate to prevent an unreasonable risk of harm to clients.

NEW SECTION

WAC 308-120-730 MANDATORY REPORTING DEFINED. (a) The past history of the nurse's performance.

(b) A demonstrated pattern of unsafe practice or conduct in violation of the standards of nursing.

(c) The magnitude of any single occurrence for actual or potential harm to the public health and safety.

(3) The following shall always be reported to the board of nursing:

(b) A person who is practicing nursing when the license has become void due to nonpayment of fees.

(c) A person who is practicing nursing as defined in chapter 18.88 RCW unless licensed as a registered nurse, or a person who is practicing as a nurse practitioner as defined in WAC 308-120-300 while not licensed as an advanced registered nurse practitioner.

(d) A nurse who has been convicted of a crime which relates to the practice of nursing.

(e) A nurse who has been dismissed from employment due to unsafe practice or conduct in violation of the standards of nursing.

(f) Client abuse by a nurse.

(g) A demonstrated pattern of conduct in violation of the standards of nursing as defined by the rules of the board or a single occurrence that creates serious harm or risk to the client.

(h) Any violation of a disciplinary sanction imposed on a nurse's license by the board.

(i) Substance abuse as defined in RCW 18.130.180 (6) and (23). Nursing professionals counseling impaired nurses for substance abuse are exempt from the reporting requirements except as provided in chapter 5.62 RCW.

NEW SECTION

Notice is hereby given in accordance with the provisions of RCW 34.04.025, that the Department of Labor and Industries intends to adopt, amend, or repeal rules concerning piece rate rule, amending WAC 296-17-350(6), requiring employers to report actual hours worked by their employees when they are subject to any federal or other state law or rule which requires the recordkeeping of actual hours worked and provides for a penalty for noncompliance of this rule by computing worker hours using the state minimum wage divided into gross wages if records of hours worked are not maintained and reported for industrial insurance purposes; that the agency will at 10:00 a.m., Wednesday, December 23, 1987, in the General Administration Building, First Floor, Large Conference Room, Olympia, Washington, conduct a public hearing on the proposed rules.

STATEMENT OF PURPOSE

Title and Number of Rule Section(s) or Chapter(s):
WAC 296-17-350.

Statutory Authority: RCW 51.04.020(1).

Specific Statute that Rule is Intended to Implement:
RCW 51.16.035.

Summary of the Rule(s): This proposed revision to WAC 296-17-350(6), piece rate rule, requires all employers to report actual hours worked by their employees for workers' compensation if the employer is subject to a federal or other state law or rule requiring the employer to maintain records showing actual hours worked.

Reasons Supporting the Rule(s): Some employers are using the average hourly wage method in place of reporting actual hours worked for determining workers' compensation premiums. This method allows an employer who pays his/her employees less than the average hourly wage for a particular risk classification to under report hours worked and pay lower premiums. In turn the employers who report actual hours worked are in effect subsidizing the other employers who take advantage of this rule. This proposed amendment to the rule will only affect employers already required to keep records of actual hours worked by another agency. By establishing a method of using the state minimum wage to determine hours to be reported a strong financial incentive is provided for employers to maintain and report actual hours worked.

Agency Personnel Responsible for Drafting: Joseph A. Dear, Director, 753-6307, Alan D. Spadoni, Assistant Director for Employer Services, 753-5371, Frank Romero and Gary Brown, Classification Development, 753-1434, General Administration Building, HC-281, Olympia, Washington 98504; Implementation and Enforcement: Joseph A. Dear, Director, 753-6307 and Alan D. Spadoni, Assistant Director for Employer Services, 753-5371, General Administration Building, HC-281, Olympia, Washington 98504.

Name of Person or Organization, Whether Private, Public, or Governmental, that is Proposing the Rule(s): State of Washington, Department of Labor and Industries.

Agency Comments or Recommendations, if any, Regarding Statutory Language, Implementation, Enforcement, and Fiscal Matters Pertaining to the Rule(s): None.

These rules are not proposed to comply with federal law or a federal or state court decision.

Any Other Information that may be of Assistance in Identifying the Rule or its Purpose: None.

Small Business Economic Impact Statement: This statement pertains to revisions in chapter 296-17 WAC, proposed by the Department of Labor and Industries to become effective April 1, 1988, and is prepared to conform with section 3(2) and section 4 of the Regulatory Fairness Act (chapter 6, Laws of 1982).

Existing Rules: Employers are allowed to divide gross wages by an average hourly wage as calculated by the department to compute worker hours for employees who are compensated on a piece work basis (paid for the accomplishment of a certain number of individual tasks, rather than by the hour) when records of hours worked are not kept. The current rule also requires employers who maintain records of actual hours worked to report the actual hours for calculating workers' compensation premiums even though employees may be paid on a piece basis.

Treatment of Small Business Under Existing Rules: This proposal generally is independent of the size of the business as it only applies to those employers who are already required to maintain records of hours worked by separate federal or state law or rule. Those employers, typically the smaller businesses, who are not required by any rule or law to maintain records of hours worked will not be impacted.

Effect of Proposed Revisions: This proposal establishes a method for computing hours worked for the purpose of workers' compensation premium calculation in the event an employer fails to report actual hours worked by their employees to the department when such records are required to be maintained by separate federal or state law or rule. Hours for noncomplying employers would be computed by dividing the employees' gross wages by the state minimum wage (\$2.30 at this time).

AMENDATORY SECTION (Amending Order 85-7, filed 2/28/85, effective 4/1/85)

WAC 296-17-350 MINIMUM PREMIUMS—ASSUMED WORKER HOURS. A minimum premium is the lowest amount of premium to be paid by an employer and is also the basis for determining premium computation for workers for whom an assumed number of worker hours must be, and hereby, is established:

(1) Minimum premium. Except as otherwise provided in this chapter, every employer shall be liable for a premium not less than ten dollars for any calendar quarter regardless of number of worker hours reported.

(2) Minimum premium for elective adoption. Any employer having in their employ any person exempt from mandatory coverage whose application for coverage under the elective adoption provisions of RCW 51.12.110 is accepted by the director, shall have a minimum premium rate for such employer's applicable class based upon not less than 40 worker hours for each month, until such time as elective adoption coverage is cancelled: PROVIDED, That the minimum premium rate as specified above shall not apply to sole proprietors, partnerships, or executive officers obtaining coverage subject to other provisions of this chapter.

(3) Resident managers, caretakers, or similar employments that are employed for irregular periods and whose compensation is for a stipulated sum in money or a substitute for money shall be reported for the purpose of premium calculation as provided in subsection (6) of this section.

(4) Commission personnel. Commission personnel are persons whose compensation is based upon a percentage of the amount charged for the commodity or service rendered. Commission personnel are to be reported for premium purposes at a minimum of assumed worker hours of not less than eight worker hours a day for part-time employment, or not less than 40 worker hours per week for full-time employment: PROVIDED, That the assumed eight worker hours daily for part-time employment will apply only if the employer's books and records are maintained so as to show separately such person's actual record of employment.

(5) Salaried personnel. Salaried personnel for the purposes of this chapter means persons whose compensation is not governed by the number of hours devoted to employment for their employer. Employers

having salaried personnel in their employ shall for the purpose of premium calculation report assumed worker hours based upon one hundred sixty worker hours for each month in which the employee is on salary: PROVIDED, That if the employer maintains complete and accurate records, supported by original time cards or timebook entries, the employer may report and pay premium on the actual hours worked by salaried personnel. All salaried personnel must be reported in the same manner: PROVIDED FURTHER, That the department may, at its discretion, authorize some other method in assuming workers hours for premium calculating purposes in the case of contract personnel employed by schools and/or school districts.

(6) Piece workers. For employees whose compensation is based upon the accomplishment of a number of individual tasks whether computed on the number of pounds, items, pieces, or otherwise who are not subject to any federal or state law or rule which requires the reporting of actual hours worked, the employer shall for the purpose of premium calculation assume each two dollars of earnings of each employee as representing one worker hour: PROVIDED, That if the average rate of compensation for the applicable classification is at least \$3.00 but less than \$3.50 per worker hour the assumed amount shall be \$3.00 of earnings as representing one worker hour, and on a progressive basis, if the average compensation is at least \$3.50 but less than \$4.00 the assumed amount shall be \$3.50 of earnings as representing one worker hour, and so forth. The records of the department as compiled for the preceding fiscal year ending June 30, shall be the basis for determining the average rate of compensation for each classification: PROVIDED FURTHER, That ((if the)) an employer who maintains ((books and)) records ((to show separately the hours employed for each worker in their employ engaged in piece work then such actual worker hours shall be reported)) but is not required to do so shall report the actual hours worked for the purpose of premium calculation. In the event an employer who is otherwise required by federal or state laws or rules to maintain records of actual hours worked by each employee fails to do so, the worker hours of such employees will be determined by dividing the gross wages of each employee by the state minimum hourly wage to determine the hours reported for the purpose of premium calculation. Notwithstanding any other provisions of this section, workers employed in a work activity center pursuant to WAC 296-17-779 shall be reported on the basis of the piece worker rule.

(7) Noncontact sports teams. All employers having personnel in their employ as defined under WAC 296-17-745 shall for the purpose of premium calculations, report assumed worker hours based upon 40 worker hours for each week in which any duties are performed.

(8) All employers having personnel in their employ as defined under WAC 296-17-739 shall, for the purpose of premium calculations, report assumed worker hours based upon ten hours for each mount in each horse race; professional drivers shall report worker hours based upon ten hours for each heat or race of any racing event: PROVIDED, That any day such personnel do not ride or drive in a race, the premium calculation shall be made by assuming ten worker hours for any day in which duties are performed.

(9) Pilots and flight crew members having flight duties during a work shift including preflight time shall have premium calculated by utilizing daily readings logged per federal requirements of the aircraft tachometer time: PROVIDED, That if the total tachometer time for any day includes a fraction of an hour, the reportable time will be increased to the next full hour: PROVIDED FURTHER, That pilots and flight crew members who assume nonflying duties during a work shift will have premium calculated in accordance with the appropriate rules and classifications applicable to nonflight duties.

STATEMENT OF PURPOSE

Title: WAC 458-20-252 Hazardous substance tax.

Description of Purpose: To implement the provisions of chapter 2, Laws of 1987 3rd ex. sess. (SB 6085), which established new chapter 82.22 RCW of the Revenue Act imposing a hazardous substance excise tax and providing exemptions and credits. To explain the provisions of the law and the tax reporting and procedural requirements for its administration.

Statutory Authority: RCW 82.32.300.

Specific Statute(s) Rule is Intended to Implement: All of chapter 82.22 RCW consisting of five separate sections, RCW 82.22.010 through 82.22.050.

Reasons Supporting Proposed Action: Effective January 1, 1988, a new and separate excise tax is imposed in this state upon the privilege of possessing hazardous substances. The Department of Revenue is legislatively mandated to promulgate rules covering the proper procedures for reporting tax liability, claiming exemptions, and applying for credits under the law. Emergency adoption of the rule is necessary for the preservation of the general welfare of taxpayers effected by the new tax and who must begin paying the tax on January 1, 1988. Adoption will occur only after a public hearing under the APA and full opportunity for all interested persons to be heard.

Agency Personnel Responsible for Drafting: Edward L. Faker, 415 General Administration Building, Olympia, WA 98504, phone 753-5579; Implementation: Garry G. Fujita, 415 General Administration Building, Olympia, WA 98504, phone 753-5544; and Enforcement: Department of Revenue, 415 General Administration Building, Olympia, WA 98504, phone 753-5540.

NEW SECTION

WAC 458-20-252 HAZARDOUS SUBSTANCE TAX. (1) Introduction. Under the provisions of chapter 82.22 RCW a hazardous substance tax is imposed, effective January 1, 1988, upon the wholesale value of certain substances and products, with specific credits and exemptions provided. This tax is an excise tax upon the privilege of possessing hazardous substances or products in this state. It is imposed in addition to all other taxes of an excise or property tax nature and is not in lieu of any other such taxes.

(a) RCW 82.22.020 defines certain specific substances as being hazardous and includes other substances by reference to Federal legislation governing such things. It also provides authority to the director of the State Department of Ecology to designate any substances or products as hazardous which could present a threat to human health or the environment. The Department of Ecology, by duly published rule, defines and enumerates hazardous substances and products and otherwise administers the provisions of the law relating to hazardous and toxic or dangerous materials, waste, disposal, cleanup, remedial actions, and monitoring. (See WAC _____).

(b) Chapter 82.22 RCW consists of the tax provisions relating to hazardous substances and products which are administered exclusively under this section. The tax provisions relate exclusively to the possession of hazardous substances and products. The tax provisions do not relate to waste, releases or spills of any materials, cleanup, compensation, or liability for such things, nor does tax liability under the law depend upon such factors. The incidence or privilege which incurs tax liability is simply the possession of the hazardous substance or product, whether or not such possession actually causes any hazardous or dangerous circumstance.

(c) The hazardous substance tax is imposed upon any possession of a hazardous substance or product in this state by any person who is not expressly exempt of the tax. However, it is the intent of the law that the economic burden of the tax should fall upon the first such possession in this state. Therefore, the law provides that if the tax has not been paid upon any hazardous substance or product the department may collect the tax from any person who has had possession. The amount of tax paid then constitutes a debt owed by the first person having had taxable possession to the person who pays the tax. The provisions of parts (10) and (11) of this section reduce the tax payment obligations of successive possessors of hazardous substances and products to the greatest extent allowable under the law.

(2) Definitions. For purposes of this section the following terms will apply.

(a) "Tax" means the hazardous substance tax imposed by RCW 82.22.030.

(b) "Hazardous substance" means anything designated as such by the provisions of WAC _____, administered by the State Department of Ecology, as adopted and thereafter amended. The law defines this term to include:

(i) any substance that, on January 1, 1988, is a hazardous substance under section 101(14) of the Federal Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended by Public Law 99-499;

(ii) petroleum products (further defined below);

(iii) pesticide products required to be registered under the Federal Insecticide, Fungicide and Rodenticide Act; and

(iv) anything else enumerated as a hazardous substance in WAC _____ by the Department of Ecology.

(v) Until April 1, 1988, "hazardous substance" does not include substances or products packaged as a household product and distributed for domestic use.

(c) "Product(s)" means any item(s) containing a combination of ingredients, some of which are hazardous substances and some of which are not hazardous substances.

(d) "Petroleum product" means any plant condensate, lubricating oil, gasoline, aviation fuel, kerosene, diesel motor fuel, benzol, fuel oil, liquefied or liquefiable gases, such as butane, ethane and propane, and every other product derived from the refining of crude oil, but the term does not include crude oil.

(i) The term "derived from the refining of crude oil" as used herein, means produced because of and during the oil refining process as a direct oil byproduct. It does not mean petroleum products which are manufactured from refined oil derivatives, such as petroleum jellies, cleaning solvents, asphalt, paraffin wax, etc. Such further manufactured products become hazardous substances only when expressly so designated by the Director of Ecology.

(e) "Possession" means control of a hazardous substance located within this state and includes both actual and constructive possession.

(i) "Control" means the power to sell or use a hazardous substance or to authorize the sale or use by another.

(ii) "Actual possession" occurs when the person with control has physical possession.

(iii) "Constructive possession" occurs when the person with control does not have physical possession.

(f) "Previously taxed hazardous substance" means a hazardous substance upon which the tax has been paid and which has not been remanufactured or reprocessed in any manner.

(i) remanufacturing or reprocessing does not include the mere repackaging or recycling for beneficial reuse. Rather, these terms embrace activities of a commercial or industrial nature involving the application of skill or labor by hand or machinery so that as a result, a new or different substance or product is produced.

(ii) "Recycling for beneficial reuse" means the recapturing of any used substance or product, for the sole purpose of extending the useful life of the original substance or product in its previously taxed form, without adding any new, different, or additional ingredient or component.

(iii) Example: Used motor oil drained from a crankcase, filtered, and containerized for reuse is not remanufactured or reprocessed. If the tax was paid on possession of the oil before use, the used oil is a previously taxed substance.

(g) "Wholesale value" is the tax measure or base. It means:

(i) the price paid by a wholesaler or retailer to a manufacturer, or

(ii) the price paid by a retailer to a wholesaler when the price represents the value at the time of first possession in this state.

(iii) In cases where no sale has occurred, wholesale value means the fair market wholesale value, determined as nearly as possible according to the wholesale selling price at the place of use of similar substances of like quality and character. In such cases the wholesale value shall be the "value of the products" as determined under the alternate methods set forth in WAC 458-20-112.

(iv) It is the intent of the law that the "wholesale value," which is the tax measure, should be as uniform and constant as possible throughout the chain of distribution from manufacture to retail sale. For special tax reporting formulas for retailers, see Part (11) of this section.

(h) "Selling price" means consideration of any kind expressed in terms of money paid or delivered by a buyer to a seller, without any deductions for any costs whatsoever.

(i) "State," for purposes of the credit provisions of the hazardous substance tax, means:

(i) the state of Washington,

(ii) states of the United States or any political subdivisions of such other states,

(iii) the District of Columbia,

(iv) territories and possessions of the United States,

(v) any foreign country or political subdivision thereof.

(j) "Person" means any natural or artificial person, including a business organization of any kind, and has the further meaning defined in RCW 82.04.030.

(i) The term "natural person," for purposes of the tax exemption provided by RCW 82.22.040(2) regarding substances used for personal or domestic purposes, means human beings in a private, as opposed to a business sense.

(k) Except as otherwise expressly defined in this section, the definitions of terms provided in chapters 82.04, 82.08, and 82.12 RCW apply equally for this section. Other terms not expressly defined in these chapters or this section are to be given their common and ordinary meanings.

(3) Tax rate and measure. The tax is imposed upon the privilege of possessing hazardous substances in this state. The tax rate is eight tenths of one percent (.008). The tax measure or base is the wholesale value of the substance, as defined herein.

(4) Exemptions. The following are expressly exempt from the tax:

(a) Any successive possessions of any previously taxed hazardous substances are tax exempt.

(i) Any person who possesses a hazardous substance which has been acquired from any other person who is registered with the department of revenue and doing business in this state may take a written statement certifying that the tax has been previously paid. Such certifications must be taken in good faith and must be in the form provided in the last part of this section. Blanket certifications may be taken, as appropriate, which must be renewed at intervals not to exceed four years.

(ii) In the absence of taking such certifications, the person who possesses any hazardous substance must prove that it purchased or otherwise acquired the substance from a previous possessor in this state and that the tax has been paid.

(iii) This exemption for taxes previously paid is available for any person in successive possession of a taxed hazardous substance even though the previous payment may have been satisfied by the use of credits or offsets available to the previous person in possession.

(iv) Example. Company A brings a substance into this state upon which it has paid a similar hazardous substance tax in another state. Company A takes a credit against its Washington tax liability in the amount of the other state's tax paid. It then sells the substance to Company B. Company B's possession is tax exempt even though Company A has not directly paid Washington's tax but has used a credit against its Washington liability.

(b) Any possession of a hazardous substance by a natural person for use of a personal or domestic nature rather than a business nature is tax exempt.

(i) This exemption extends to relatives, as well as other natural persons who reside with the person possessing the substance, and also to regular employees of that person who use the substance for the benefit of that person.

(ii) This exemption does not extend to possessions by any independent contractors hired by natural persons, which contractors themselves provide the hazardous substance.

(iii) Examples: Possessions of spray materials by an employee-gardener or soaps and cleaning solvents by an employee-domestic servant, when such substances are provided by the natural person for whose domestic benefit such things are used, are tax exempt.

(c) Any possession of alumina, natural gas, petroleum, coke, liquid fuel or fuel gas used in processing petroleum, or any possession of petroleum products that are exported for use or sale outside this state as fuel, are tax exempt.

(i) The exemption for export fuel products is available only for the person in possession who causes the products to be exported. As proof of such export persons must comply with the record keeping requirements of WAC 458-20-193, Parts A and C.

(d) Persons or activities which the state is prohibited from taxing under the United States Constitution are tax exempt.

(i) This exemption extends to the U.S. Government, its agencies and instrumentalities, and to any possession the taxation of which has been expressly reserved or preempted under the laws of the United States.

(e) Any possession of any hazardous substances which were already possessed before January 1, 1988 are tax exempt. This exemption extends to current inventories and stocks of hazardous substances on hand on January 1, 1988 when the tax first takes effect. The intent is that the hazardous substance tax has no retroactive application.

(i) This exemption does not follow the hazardous substances after the effective tax date, January 1, 1988. Thus, succeeding possessions of such originally exempt substances, because of sales or transfers after that date, are taxable possessions unless otherwise expressly exempt.

(5) Credits. There are three distinct kinds of tax credits against liability which are available under the law.

(a) A credit may be taken by any manufacturer or processor of a hazardous substance or product produced from ingredients or components which are themselves hazardous substances, and upon which the hazardous substance tax has been paid by the same person or is due for payment by the same person.

(i) Example. A manufacturer possesses hazardous chemicals which it combines to produce an acid which is also designated as a hazardous substance or product. When it reports the tax upon the wholesale value of the acid it may use a credit to offset the tax by the amount of tax it has already paid upon the hazardous chemical ingredients or components. In this manner the intent of the law to tax hazardous substances only once is fulfilled.

(ii) Under circumstances where the hazardous ingredient and the hazardous end product are both possessed by the same person during the same tax reporting period, the tax on the respective substances must be computed and the former must be offset against the latter so that the tax return reflects the tax liability after the credit adjustment.

(iii) This credit may be taken only by manufacturers who have the first possession in this state of both the hazardous ingredients and the hazardous end product.

(b) A credit may be taken in the amount of the hazardous substance tax paid upon the value of fuel which is carried from this state in the fuel tank of any airplane, ship, truck, or other vehicle.

(i) The purpose of this credit is to extend the same tax exclusion which exists for exported fuel (part (4)(c) above) to fuel which is possessed and partly used in this state before crossing the boundaries of this state in any fuel tank attached to any transportation vehicle powered by such fuel.

(ii) The credit may be claimed only for the amount of tax actually paid on the fuel, not the amount representing the value of the fuel.

(iii) The nature of this credit is such that it generally has application only for interstate carriers whose fuel tanks contain fuel which was not

first possessed by some other person in this state who paid the tax. The credit is limited to the person who carries the fuel from this state and cannot be claimed by any person who previously possessed the fuel in this state and paid the tax.

(iv) Example. An airline company enters this state with its fuel tanks partially full of fuel which has not been possessed and taxed earlier in this state. The fuel in the tanks is, therefore, first possessed in this state by the airline company, has not been previously taxed, and the possession is not expressly tax exempt. Only the amount of fuel actually used in this state is subject to the tax because this credit may be taken for the tax paid on the portion of fuel allocated to use after the airplane exits this state.

(c) A credit may be taken against the tax owed in this state in the amount of any other state's hazardous substance tax which has been paid by the same person measured by the wholesale value of the same hazardous substance.

(i) In order for this credit to apply, the other state's tax must be significantly similar to Washington's tax in all its various respects. The taxable incident must be possessing the substance; the tax purpose must be that the substance is hazardous; and the tax measure must be stated in terms of the wholesale value of the substance, without deductions for costs of doing business, such that the other state's tax does not constitute an income tax or added value tax.

(ii) This credit may be taken for the amount of any other state's qualifying tax which has actually been paid either before or after Washington State's tax is paid.

(iii) The amount of credit is limited to the amount of tax paid in this state upon possession of the same hazardous substance in this state. Also, the credit may not be applied against any tax paid or owed in this state other than the hazardous substance tax imposed by RCW 82.22.030.

(iv) Exchange agreements under which hazardous substances or products possessed in this state are exchanged through any accounts crediting system with like substances possessed in other states do not qualify for this credit. The substance taxed in another state, and for which this credit is sought, must be actually, physically possessed in this state.

(v) Persons claiming this credit must maintain records necessary to verify that the credit taking qualifications have been met. See WAC 458-20-19301, part (9) for recordkeeping requirements.

(6) Newly defined hazardous substances. The Director of Ecology may identify and designate things as being hazardous substances after January 1, 1988. Also, things designated as hazardous substances may be deleted from this definition. Such actions are done by the adoption and subsequent periodic amendments to rules of the Department of Ecology under the Washington Administrative Code.

(a) The law allows the addition or deletion of substances as hazardous by rule amendments, no more often than twice in any calendar year.

(b) When such definitions are changed, they do not take effect for tax purposes until the first day of the following month which is at least thirty days after the effective date of rule action by the Department of Ecology.

(i) Example. The Department of Ecology adopts or amends the rule by adding a new substance and the effective date of the amendment is January 15. Possession of the substance does not become taxable until March 1.

(ii) The exemption for current inventories and stocks on hand explained at part (5)(e) of this section does not apply to possessions of hazardous substances newly added by rule. The tax is owed by any person who has possession of the newly designated hazardous substance upon the tax effective date as explained herein. It is immaterial that the person in possession on that date was not the first person in possession of the substance in this state before it was designated as hazardous.

(7) Recurrent tax liability. It is the intent of the law that all hazardous substances possessed in this state should incur this tax liability only once unless they are expressly exempt. This is true of hazardous ingredients of products as well as the manufactured end product itself, if designated as a hazardous substance. The exemption for previously taxed hazardous substances does not apply to "products" which have been manufactured or remanufactured simply because an ingredient or ingredients of that product may have already been taxed when possessed by the manufacturer. Instead of an exemption, manufacturers in possession of both the hazardous ingredients(s) and end product(s) should use the credit provision explained at Part (5)(a) of this section.

(a) However, the term "product" is defined to mean only an item or items which contain a combination of both hazardous substance(s) and non-hazardous substance(s). The term does not include combinations of only hazardous substances. Thus, possessions of substances produced by combining other hazardous substances upon all of which the tax has previously been paid will not again be taxable.

(8) How and when to pay tax. The tax must be reported on a special line of the combined excise tax return designated "hazardous substances." It is due for payment together with the timely filing of the return upon which it is reported, covering the tax reporting period during which the hazardous substance(s) is first possessed within this state. Any person who is not expressly exempt of the tax and who possesses any hazardous substance in this state, without having proof that the tax has previously been paid on that substance, must report and pay the tax.

(a) It may be that the person who purchases a hazardous substance will not have billing information from which to determine the wholesale value of the substance when the tax return for the period of possession is due. In such cases the tax is due for payment no later than the next regular reporting due date.

(b) The taxable incident is the possession of the substance. Tax is due for payment by the purchaser of any hazardous substance whether or not the purchase price has been paid in part or in full.

(9) How and when to claim credits. Credits should be claimed and offset against tax liability reported on the same excise tax return when possible. The tax return form provides a line for reporting tax on hazardous substances and a line for taking credits as an offset against the tax reported. It is not required that any documents or other evidences of entitlement to credits be submitted with the report. Such proofs must be retained in permanent records for the purpose of verification of credits taken.

(10) Successive possessions of the same hazardous substance. The law provides that the department of revenue may collect the tax from any person who has had possession of a hazardous substance in this state, if the tax has not already been paid by any person. The law also provides that the tax measure, wholesale value, should be as uniform as possible throughout the chain of possession. Wholesale value is determined by the wholesale selling price.

(a) When tax is collected by the department from any person having successive possession of a substance, because no tax was previously paid on that same substance, the wholesale selling price means the price paid to any manufacturer or wholesaler who first had possession in this state.

(b) In determining this wholesale selling price, the charges for shipping, delivery, warehousing, or any other such charges representing cost increments accrued after the first wholesale sale in this state are not included. Thus, the tax collected from any person having successive possession should be no greater than what the tax would have been if collected from the person who had first possession of the substance in this state.

(11) Formulary or percentage tax reporting. The law provides that when the burden of the tax falls upon retailers, when they are the first persons in possession in this state, the tax burden should be equal to the same burden when it falls upon manufacturers or wholesalers earlier in the distribution chain. Because the tax measure is the wholesale value of the substance when first possessed in this state, that measure should remain constant regardless of who is the first person in possession. This is true even when the first person in possession is a retailer.

(a) It may be that the retailer first in possession will not know what the wholesale value of a substance would have been had the substance been first possessed by a manufacturer or wholesaler in this state earlier in the distribution chain. RCW 82.22.030 provides that in such cases the tax may be imposed upon a "percentage of sales" for any class of retailer so as to equalize the tax burden for all persons in possession of hazardous substances. Therefore, retailers who are the first persons in possession of hazardous substances may report and pay the tax under one of the following methods:

(i) measured by wholesale value as shown upon actual accounting records available; or,

(ii) measured by sixty percent (60%) of gross receipts from sales of hazardous substances which have not been previously taxed; or,

(iii) measured by the retailer's cost, less twenty percent (20%), of all such substances not previously taxed; or,

(iv) under circumstances where none of the above methods fairly reflects what the wholesale value would have been at the time and place of first possession by a manufacturer in this state, then the retailer may

submit a percentage of sales formula for prior approval by the department of revenue.

(12) Hazardous substances or products on consignment. Consignees who possess hazardous substances or products in this state with the power to sell such things, in their own name or on behalf of a disclosed or undisclosed consignor are liable for payment of the tax. The exemption for previously taxed substances is available for such consignees only if the consignors have paid the tax and the consignee has retained the certification or other proof of previous tax payment referred to in part (4)(i) and (ii) of this section. Possession of consigned hazardous substances by a consignee does not constitute constructive possession by the consignor.

(13) Hazardous substances untraceable to source. Various circumstances may arise whereby a person will possess hazardous substances in this state, some of which have been previously taxed in this or other states and some of which may not. In such cases the formulary tax reporting of part (11) of this section may be used, including the request for a special ruling by the department of revenue.

(a) Example. Fungible petroleum products from sources both within and outside this state are commingled in common storage facilities. Formulary reporting is appropriate based upon volume percentages reflecting the ratio of in-state production to out-of-state production or other form of acquisition.

(14) Administrative provisions. The provisions of chapter 82.32 RCW regarding due dates, reporting periods, tax return requirements, interest and penalties, tax audits and limitations, disputes and appeals, and all such general administrative provisions apply equally to the hazardous substance tax. Special requested rulings covering unique circumstances generally will be issued within sixty days from the date upon which complete information is provided to the department of revenue.

(15) Certification of previously taxed hazardous substance. Certification that the hazardous substance tax has already been paid by a person previously in possession of the substance(s) may be taken in substantially the following form:

I hereby certify that this purchase – all purchases of _____
(omit one)
_____ by _____,
(identify substance purchased) (name of purchaser)
who possesses registration no. _____,
(buyer's number,
if registered)

consists of the

purchase of hazardous substance(s) or product(s) upon which the tax imposed by RCW 82.22.030 has been paid in full by a person previously in possession of the substance(s) or product(s) in this state. This certificate is given with full knowledge of, and subject to the legally prescribed penalties for fraud and tax evasion, and with the full knowledge and agreement that the undersigned hereby assumes any liability for hazardous substance tax which has not been previously paid because of possession of the hazardous substance(s) or product(s) identified herein.

THE WASHINGTON STATE REGISTER, published pursuant to RCW 34.08.020, is distributed on the first and third Wednesdays of each month. The Register contains the full text of proposed, emergency, and permanently adopted rules of state agencies, executive orders of the governor, notices of public meetings of state agencies, rules of the state supreme court, summaries of attorney general opinions, and juvenile disposition standards which have been filed in the code reviser's office prior to the pertinent closing date for that issue of the Register. A cumulative table of existing sections of the Washington Administrative Code (WAC) affected by a particular agency action guides the user to the proper volume of the Register.

The code reviser's office has established an annual subscription price of \$150 for the Register, and single copies will cost \$7. Sales tax of 7.8% now applies to all sales other than to state agencies. State law requires payment in advance. To subscribe to the Register, please complete the order form above and forward it to the address indicated, accompanied by your check or money order in the amount of \$161.70 (\$150 for state agencies) payable to the code reviser's office.
