(d) The owner or operator must design, construct, operate, and maintain a run-off management system to collect and control at least the water volume resulting from a twenty-four-hour, twenty-five-year storm.

(e) Collection and holding facilities (e.g., tanks or basins) associated with run-on and run-off control systems must be emptied or otherwise managed expeditiously and in accordance with this chapter after storms to maintain the design capacity of the system.

(f) If the treatment zone contains particulate matter which may be subject to wind dispersal, the owner or operator must control wind dispersal.

(g) The owner or operator must inspect the unit weekly and after storms to detect evidence of:

(i) Deterioration, malfunctions, or improper operation of run-on and run-off control systems; and

(ii) Improper functioning of wind dispersal control measures.

(5) Food chain crops. The department may allow the growth of food chain crops in or on the treatment zone only if the owner or operator satisfies the conditions of this subsection. The department will specify in the facility permit the specific food chain crops which may be grown.

(a)(i) The owner or operator must demonstrate that there is no substantial risk to human health caused by the growth of such crops in or on the treatment zone by demonstrating, prior to the planting of such crops, that dangerous constituents other than cadmium:

(A) Will not be transferred to the food or feed portions of the crop by plant uptake or direct contact, and will not otherwise be ingested by food chain animals (e.g., by grazing); or

(B) Will not occur in greater concentrations in or on the food or feed portions of crops grown on the treatment zone than in or on identical portions of the same crops grown on untreated soils under similar conditions in the same region.

(ii) The owner or operator must make the demonstration required under (a)(i) of this subsection prior to the planting of crops at the facility for all dangerous constituents that are reasonably expected to be in, or derived from, waste placed in or on the treatment zone.

(iii) In making such a demonstration, the owner or operator may use field tests, greenhouse studies, available

data, or, in the case of existing units, operating data, and must:

(A) Base the demonstration on conditions similar to those present in the treatment zone, including soil characteristics (e.g., pH, cation exchange capacity), specific wastes, application rates, application methods, and crops to be grown; and

(B) Describe the procedures used in conducting any tests, including the sample selection criteria, sample size, analytical methods, and statistical procedures.

(iv) If the owner or operator intends to conduct field tests or greenhouse studies in order to make the demonstration he must obtain a permit for conducting such activities.

(b) The owner or operator must comply with the following conditions if cadmium is contained in wastes applied to the treatment zone;

(i)(A) The pH of the waste and soil mixture must be 6.5 or greater at the time of each waste application, except for waste containing cadmium at concentrations of 2 mg/kg (dry weight) or less;

(B) The annual application of cadmium from waste must not exceed 0.5 kilograms per hectare (kg/ha) on land used for production of tobacco, leafy vegetables, or root crops grown for human consumption. For other food chain crops, the annual cadmium application rate must not exceed:

| Time period | Annual Cd application rate (kilograms per hectare) |
|---|--|
| Present to June 30, 1984 | 2.0 |
| July 1, 1984 to Dec. 31, 1986 | 1.25 |
| Beginning Jan. 1, 1987 | 0.5 |

(C) The cumulative application of cadmium from waste must not exceed 5kg/ha if the waste and soil mixture has a pH of less than 6.5; and

(D) If the waste and soil mixture has a pH of 6.5 or greater or is maintained at a pH of 6.5 or greater during crop growth, the cumulative application of cadmium from waste must not exceed: 5 kg/ha if soil cation exchange capacity (CEC) is less than 5 meq/100g; 10 kg/ha if soil CEC is 5-15 meq/100g; and 20 kg/ha if soil CEC is greater than 15 meq/100g; or

(ii)(A) Animal feed must be the only food chain crop produced;

(B) The pH of the waste and soil mixture must be 6.5 or greater at the time of waste application or at the time the crop is planted, whichever occurs later, and this pH level must be maintained whenever food chain crops are grown;

(C) There must be an operating plan which demonstrates how the animal feed will be distributed to preclude ingestion by humans. The operating plan must describe the measures to be taken to safeguard against possible health hazards from cadmium entering the food chain, which may result from alternative land uses; and

(D) Future property owners must be notified by a stipulation in the land record or property deed which states that the property has received waste at high cadmium application rates and that food chain crops must not be grown except in compliance with (b)(ii) of this subsection.

(6) Unsaturated zone monitoring. An owner or operator subject to this section must establish an unsaturated zone monitoring program to discharge the responsibilities described in this subsection.

(a) The owner or operator must monitor the soil and soil-pore liquid to determine whether dangerous constituents migrate out of the treatment zone.

(i) The department will specify the dangerous constituents to be monitored in the facility permit. The dangerous constituents to be monitored are those specified under subsection (2)(b) of this section.

(ii) The department may require monitoring for principal dangerous constituents (PDCs) in lieu of the constituents specified under subsection (2)(b) of this section. PDCs are dangerous constituents contained in the wastes to be applied at the unit that are the most difficult to treat, considering the combined effects of degradation, transformation, and immobilization. The department will establish PDCs if it finds, based on waste analyses, treatment demonstrations, or other data, that effective degradation, transformation, or immobilization of the PDCs will assure treatment at (⌘) least equivalent levels for the other dangerous constituents in the wastes.

(b) The owner or operator must install an unsaturated zone monitoring system that includes soil monitoring using soil cores and soil-pore liquid monitoring using devices such as lysimeters. The unsaturated zone monitoring system must consist of a sufficient number of sampling points at appropriate locations and depths to yield samples that:

(i) Represent the quality of background soil-pore liquid quality and the chemical make-up of soil that has not been affected by leakage from the treatment zone; and

(ii) Indicate the quality of soil-pore liquid and the chemical make-up of the soil below the treatment zone.

(c) The owner or operator must establish a background value for each dangerous constituent to be monitored under (a) of this subsection. The permit will specify the background values for each constituent or specify the procedures to be used to calculate the background values.

(i) Background soil values may be based on a one-time sampling at a background plot having characteristics similar to those of the treatment zone.

(ii) Background soil-pore liquid values must be based on at least quarterly sampling for one year at a background plot having characteristics similar to those of the treatment zone.

(iii) The owner or operator must express all background values in a form necessary for the determination of statistically significant increases under (f) of this subsection.

(iv) In taking samples used in the determination of all background values, the owner or operator must use an unsaturated zone monitoring system that complies with (b)(i) of this subsection.

(d) The owner or operator must conduct soil monitoring and soil-pore liquid monitoring immediately below the treatment zone. The department will specify the frequency and timing of soil and soil-pore liquid monitoring in the facility permit after considering the frequency, timing, and rate of waste application, and the soil permeability. The owner or operator must express the results of soil and soil-pore liquid monitoring in a form necessary for the determination of statistically significant increases under (f) of this subsection.

PERMANENT

(e) The owner or operator must use consistent sampling and analysis procedures that are designed to ensure sampling results that provide a reliable indication of soil-pore liquid quality and the chemical make-up of the soil below the treatment zone. At a minimum, the owner or operator must implement procedures and techniques for:

- (i) Sample collection;
- (ii) Sample preservation and shipment;
- (iii) Analytical procedures; and
- (iv) Chain of custody control.

(f) The owner or operator must determine whether there is a statistically significant change over background values for any dangerous constituent to be monitored under (a) of this subsection, below the treatment zone each time he conducts soil monitoring and soil-pore liquid monitoring under (d) of this subsection.

(i) In determining whether a statistically significant increase has occurred, the owner or operator must compare the value of each constituent, as determined under (d) of this subsection, to the background value for that constituent according to the statistical procedure specified in the facility permit under this subsection.

(ii) The owner or operator must determine whether there has been a statistically significant increase below the treatment zone within a reasonable time period after completion of sampling. The department will specify that time period in the facility permit after considering the complexity of the statistical test and the availability of laboratory facilities to perform the analysis of soil and soil-pore liquid samples.

(iii) The owner or operator must determine whether there is a statistically significant increase below the treatment zone using a statistical procedure that provides reasonable confidence that migration from the treatment zone will be identified. The department will specify a statistical procedure in the facility permit that it finds:

(A) Is appropriate for the distribution of the data used to establish background values; and

(B) Provides a reasonable balance between the probability of falsely identifying migration from the treatment zone and the probability of failing to identify real migration from the treatment zone.

(g) If the owner or operator determines, pursuant to (f) of this subsection, that there is a statistically significant increase of dangerous constituents below the treatment zone, he must:

(i) Notify the department of his finding in writing within seven days. The notification must indicate what constituents have shown statistically significant increases;

(ii) Within forty-five days, submit to the department an application for a permit modification to amend the operating practices at the facility in order to maximize the success of degradation, transformation, or immobilization processes in the treatment zone; and

(iii) Continue to monitor in accordance with the unsaturated zone monitoring program established under this subsection.

(h) If the owner or operator determines, pursuant to (f) of this subsection, that there is a statistically significant increase of dangerous constituents below the treatment zone, he may demonstrate that a source other than regulated units caused the increase or that the increase resulted from an

error in sampling, analysis, or evaluation. While the owner or operator may make a demonstration under this subsection, he is not relieved of the requirement to submit concurrently a permit modification application within the forty-five-day period, unless the demonstration made under this subsection successfully shows that a source other than regulated units caused the increase or that the increase resulted from an error in sampling, analysis, or evaluation. In making a demonstration under this subsection, the owner or operator must:

(i) Notify the department in writing within seven days of determining a statistically significant increase below the treatment zone that he intends to make a demonstration under this subsection;

(ii) Within forty-five days, submit a report to the department demonstrating that a source other than the regulated units caused the increase or that the increase resulted from error in sampling, analysis, or evaluation;

(iii) Within forty-five days, submit to the department an application for a permit modification to make any appropriate changes to the unsaturated zone monitoring program at the facility; and

(iv) Continue to monitor in accordance with the unsaturated zone monitoring program established under this subsection.

(7) Recordkeeping. The owner or operator must include dangerous waste application dates and rates in the operating record required under WAC 173-303-380.

(8) Closure and postclosure care.

(a) During the closure period the owner or operator must:

(i) Continue all operations (including pH control) necessary to maximize degradation, transformation, or immobilization of dangerous constituents within the treatment zone as required under subsection (4)(a) of this section, except to the extent such measures are inconsistent with (a)(viii) of this subsection;

(ii) Continue all operations in the treatment zone to minimize run-off of dangerous constituents as required under subsection (4)(b) of this section;

(iii) Maintain the run-on control system required under subsection (4)(c) of this section;

(iv) Maintain the run-off management system required under subsection (4)(d) of this section;

(v) Control wind dispersal of dangerous waste if required under subsection (4)(f) of this section;

(vi) Continue to comply with any prohibitions or conditions concerning growth of food chain crops under subsection (5) of this section;

(vii) Continue unsaturated zone monitoring in compliance with subsection (6) of this section, except that soil-pore liquid monitoring may be terminated ninety days after the last application of waste to the treatment zone; and

(viii) Establish a vegetative cover on the portion of the facility being closed at such time that the cover will not substantially impede degradation, transformation, or immobilization of dangerous constituents in the treatment zone. The vegetative cover must be capable of maintaining growth without extensive maintenance.

(b) For the purpose of complying with WAC 173-303-610(6) when closure is completed, the owner or operator may submit to the department a certification by an indepen-

dent qualified soil scientist, in lieu of ~~((a-licensed))~~ an independent, qualified registered professional engineer, that the facility has been closed in accordance with the specifications in the approved closure plan.

(c) During the postclosure care period the owner or operator must:

(i) Continue all operations (including pH control) necessary to enhance degradation and transformation and sustain immobilization of dangerous constituents in the treatment zone to the extent that such measures are consistent with other postclosure care activities;

(ii) Maintain a vegetative cover over closed portions of the facility;

(iii) Maintain the run-on control system required under subsection (4)(c) of this section;

(iv) Maintain the run-off management system required under subsection (4)(d) of this section;

(v) Control wind dispersal of dangerous waste, if required under subsection (4)(f) of this section;

(vi) Continue to comply with any prohibitions or conditions concerning growth of food chain crops under subsection (5) of this section; and

(vii) Continue unsaturated zone monitoring in compliance with subsection (6) of this section, except that soil-pore liquid monitoring may be terminated one hundred eighty days after the last application of waste to the treatment zone.

(d) The owner or operator is not subject to regulation under (a)(viii) and (c) of this subsection, if the department finds that the level of dangerous constituents in the treatment zone soil does not exceed the background value of those constituents by an amount that is statistically significant when using the test specified in (d)(iii) of this subsection. The owner or operator may submit such a demonstration to the department at any time during the closure or postclosure care periods. For the purposes of this subsection:

(i) The owner or operator must establish background soil values and determine whether there is a statistically significant increase over those values for all dangerous constituents specified in the facility permit under subsection (2)(b) of this section;

(A) Background soil values may be based on a one-time sampling of a background plot having characteristics similar to those of the treatment zone;

(B) The owner or operator must express background values and values for dangerous constituents in the treatment zone in a form necessary for the determination of statistically significant increases under (d)(iii) of this subsection;

(ii) In taking samples used in the determination of background and treatment zone values, the owner or operator must take samples at a sufficient number of sampling points and at appropriate locations and depths to yield samples that represent the chemical make-up of soil that has not been affected by leakage from the treatment zone and the soil within the treatment zone, respectively;

(iii) In determining whether a statistically significant increase has occurred, the owner or operator must compare the value of each constituent in the treatment zone to the background value for that constituent using a statistical procedure that provides reasonable confidence that constituent presence in the treatment zone will be identified. The owner or operator must use a statistical procedure that:

(A) Is appropriate for the distribution of the data used to establish background values; and

(B) Provides a reasonable balance between the probability of falsely identifying dangerous constituent presence in the treatment zone and the probability of failing to identify real presence in the treatment zone.

(e) The owner or operator is not subject to regulation under WAC 173-303-645 if the department finds that the owner or operator satisfies (d) of this subsection, and if unsaturated zone monitoring under subsection (6) of this section, indicates that dangerous constituents have not migrated beyond the treatment zone during the active life of the land treatment unit.

(9) Special requirements for ignitable or reactive waste. The owner or operator must not apply ignitable or reactive waste to the treatment zone unless:

(a) The waste is immediately incorporated into the soil so that:

(i) The resulting waste, mixture, or dissolution of material no longer meets the definition of ignitable or reactive waste under WAC 173-303-090 (5) and (7); and

(ii) WAC 173-303-395 is complied with; or

(b) The waste is managed in such a way that it is protected from any material or conditions which may cause it to ignite or react.

(10) Special requirements for incompatible wastes. The owner or operator must not place incompatible wastes, or incompatible wastes and materials, in or on the same treatment zone, unless WAC 173-303-395 (1)(b) is complied with.

(11) Special requirements for extremely hazardous waste. Under no circumstances will EHW be allowed to remain in a closed land treatment unit after concluding the postclosure care period. If EHW remains at the end of the scheduled postclosure care period specified in the permit, then the department will either extend the postclosure care period, or require that all EHW be disposed of off-site or that it be treated. In deciding whether to extend postclosure care or require disposal or treatment, the department will take into account the likelihood that the waste will or will not continue to degrade in the land treatment unit to the extent that it is no longer EHW. For the purposes of this subsection, EHW will be considered to remain in a land treatment unit if representative samples of the treatment zone are designated as EHW. Procedures for representative sampling and testing will be specified in the permit.

(12) Special requirements for dangerous wastes F020, F021, F022, F023, F026, and F027.

(a) Dangerous wastes F020, F021, F022, F023, F026, or F027 must not be placed in a land treatment unit unless the owner or operator operates the facility in accordance with a management plan for these wastes that is approved by the department pursuant to the standards set out in this subsection and in accord with all other applicable requirements of this chapter. The factors to be considered are:

(i) The volume, physical, and chemical characteristics of the wastes including their potential to migrate through soil or to volatilize or escape into the atmosphere;

(ii) The attenuative properties of underlying and surrounding soils or other materials;

(iii) The mobilizing properties of other materials co-disposed with these wastes; and

(iv) The effectiveness of additional treatment, design, or monitoring techniques.

(b) The department may determine that additional design, operating, and monitoring requirements are necessary for land treatment facilities managing dangerous wastes F020, F021, F022, F023, F026, or F027 in order to reduce the possibility of migration of these wastes to ground water, surface water, or air so as to protect human health and the environment.

Reviser's note: The spelling errors in the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending Order DE-87-4, filed 6/26/87)

WAC 173-303-660 Waste piles. (1) Applicability.

(a) The regulations in this section apply to owners and operators of facilities that store or treat dangerous waste in piles.

(b) The regulations in this section do not apply to owners or operators of waste piles that will be closed with wastes left in place. Such waste piles are subject to regulation under WAC 173-303-665 (Landfills).

(c) The owner or operator of any waste pile that is inside or under a structure that provides protection from precipitation so that neither run-off nor leachate is generated is not subject to regulation under subsection (2) of this section, or under WAC 173-303-645, provided that:

(i) Liquids or materials containing free liquids are not placed in the pile;

(ii) The pile is protected from surface water run-on by the structure or in some other manner;

(iii) The pile is designed and operated to control dispersal of the waste by wind, by means other than wetting; and

(iv) The pile will not generate leachate through decomposition or other reactions.

(d) All EHW and respiratory carcinogens stored in waste piles must be protected from dispersal by precipitation or wind (e.g., covered, stored inside a building, etc.).

(2) Design and operating requirements.

(a) A waste pile (except for an existing portion of a waste pile) must have:

(i) A liner that is designed, constructed, installed and maintained to prevent any migration of wastes out of the pile into the adjacent subsurface soil or ground water or surface water at any time during the active life (including the closure period) of the waste pile. The liner may be constructed of materials that may allow waste to migrate into the liner itself (but not into the adjacent subsurface soil or ground water or surface water) during the active life of the facility. The liner must be:

(A) Constructed of materials that have appropriate chemical properties and sufficient strength and thickness to prevent failure due to pressure gradients (including static head and external hydrogeologic forces), physical contact with the waste or leachate to which they are exposed, climatic conditions, the stress of installation, and the stress of daily operation;

(B) Placed upon a foundation or base capable of providing support to the liner and resistance to pressure

gradients above and below the liner to prevent failure of the liner due to settlement, compression, or uplift; and

(C) Installed to cover all surrounding earth likely to be in contact with the waste or leachate; and

(ii) A leachate collection and removal system immediately above the liner that is designed, constructed, maintained, and operated to collect and remove leachate from the pile. The department will specify design and operating conditions in the permit to ensure that the leachate depth over the liner does not exceed 30 cm (one foot). The leachate collection and removal system must be:

(A) Constructed of materials that are:

(I) Chemically resistant to the waste managed in the pile and to the leachate expected to be generated; and

(II) Of sufficient strength and thickness to prevent collapse under the pressures exerted by overlaying wastes, waste cover materials, and by any equipment used at the pile; and

(B) Designed and operated to function without clogging through the scheduled closure of the waste pile.

(b) A liner and leachate collection and removal system must be protected from plant growth which could adversely affect any component of the system.

(c) For EHW management, the owner or operator shall submit an engineering report with his permit application stating the basis for selecting the liner required in subsection (2)(a)(i) of this section. The statement shall be certified by ~~(a licensed)~~ an independent, qualified registered professional engineer.

(d) The owner or operator will be exempted from the requirements of (a), (b), and (c) of this subsection, if the department finds, based on a demonstration by the owner or operator, that alternate design and operating practices, together with location characteristics, will prevent the migration of any dangerous constituents identified under WAC 173-303-645(4) into the ground water or surface water at any future time. In deciding whether to grant an exemption, the department will consider:

(i) The nature and quantity of the wastes;

(ii) The proposed alternate design and operation;

(iii) The hydrogeologic setting of the facility, including attenuative capacity and thickness of the liners and soils present between the pile and ground water or surface water; and

(iv) All other factors which would influence the quality and mobility of the leachate produced and the potential for it to migrate to ground water or surface water.

(e) The owner or operator must design, construct, operate, and maintain a run-on control system capable of preventing flow onto any portion of the pile during peak discharge from at least a twenty-five-year storm.

(f) The owner or operator must design, construct, operate, and maintain a run-off management system to collect and control at least the water volume resulting from a twenty-four-hour, twenty-five-year storm.

(g) Collection and holding facilities (e.g., tanks or basins) associated with run-on and run-off control systems must be emptied or otherwise managed expeditiously and in accordance with this chapter after storms to maintain design capacity of the system.

(h) If the pile contains any particulate matter which may be subject to wind dispersal, the owner or operator must cover or otherwise manage the pile to control wind dispersal.

(i) The department will specify in the permit all design and operating practices that are necessary to ensure that the requirements of this subsection are satisfied.

(3) Double-lined piles; exemption from WAC 173-303-645, ground water protection requirements.

(a) The owner or operator of a double-lined waste pile is not subject to regulation under WAC 173-303-645 if the following conditions are met:

(i) The pile (including its underlying liners) must be located entirely above the seasonal high water table;

(ii) The pile must be underlain by two liners which are designed and constructed in a manner that prevents the migration of liquids into or out of the space between the liners. Both liners must meet all the specifications of subsection (2)(a)(i) and (c) of this section;

(iii) A leak detection system must be designed, constructed, maintained, and operated between the liners to detect any migration of liquids into the space between the liners; and

(iv) The pile must have a leachate collection and removal system above the top liner that is designed, constructed, maintained, and operated in accordance with subsection (2)(a)(ii) of this section.

(b) If liquid leaks into the leak detection system, the owner or operator must:

(i) Notify the department of the leak in writing within seven days after detecting the leak; and

(ii)(A) Within the period of time specified in the permit, remove accumulated liquid, repair or replace the liner which is leaking to prevent the migration of liquids through the liner, and obtain a certification from a qualified engineer that, to the best of his knowledge and opinion, the leak has been stopped; or

(B) If a detection monitoring program pursuant to WAC 173-303-645(9) has already been defined in the permit (to be complied with only if a leak occurs), begin to comply with that program and any other applicable requirements of WAC 173-303-645 within the period of time specified in the permit.

(c) The department will specify in the permit all design and operating practices that are necessary to ensure that the requirements of this subsection are satisfied.

(4) Inspection of liners; exemption from WAC 173-303-645, ground water protection requirements.

(a) The owner or operator of a pile is not subject to regulation under WAC 173-303-645 if the following conditions are met:

(i) The pile (including its underlying liner) must be located entirely above the seasonal high water table;

(ii) The pile must be underlain by a liner (base) that meets all the specifications of subsection (2)(a)(i) of this section;

(iii) The wastes in the pile must be removed periodically, and the liner must be inspected for deterioration, cracks, or other conditions that may result in leaks. The frequency of inspection will be specified in the inspection plan required in WAC 173-303-320 and must be based on the potential for the liner (base) to crack or otherwise deteriorate under the conditions of operation;

(iv) The liner must be of sufficient strength and thickness to prevent failure due to puncture, cracking, tearing, or other physical damage from equipment used to place waste in or on the pile or to clean and expose the liner surface for inspection; and

(v) The pile must have a leachate collection and removal system above the liner that is designed, constructed, maintained, and operated in accordance with subsection (2)(a)(ii) of this section.

(b) If deterioration, cracking, or other condition is identified that is causing or could cause a leak, the owner or operator must:

(i) Notify the department of the condition in writing within seven days after detecting the condition; and

(ii)(A) Repair or replace the liner (base) and obtain a certification from a qualified engineer that, to the best of his knowledge and opinion, the liner (base) has been repaired and leakage will not occur; or

(B) If a detection monitoring program pursuant to WAC 173-303-645(9) has already been defined in the permit (to be complied with only if a leak occurs), begin to comply with that program and any other applicable requirements of WAC 173-303-645 within the period of time specified in the permit.

(c) The department will specify in the permit all design and operating practices that are necessary to ensure that the requirements of this subsection are satisfied.

(5) Monitoring and inspection.

(a) During construction or installation, liners (except in the case of existing portions of piles exempt from subsection (2)(a) of this section), and cover systems (e.g., membranes, sheets, coatings) must be inspected for uniformity, damage, and imperfections (e.g., holes, cracks, thin spots, foreign materials). Immediately after construction or installation:

(i) Synthetic liners and covers must be inspected to ensure tight seams and joints and the absence of tears, punctures, or blisters; and

(ii) Soil-based and admixed liners and covers must be inspected for imperfections including lenses, cracks, channels, root holes, or other structural nonuniformities that may cause an increase in the permeability of the liner or cover.

(b) While a waste pile is in operation, it must be inspected weekly and after storms to detect evidence of any of the following:

(i) Deterioration, malfunctions, or improper operation of run-on and run-off control systems;

(ii) The presence of liquids in leak detection systems, where installed to comply with subsection (3) of this section;

(iii) Proper functioning of wind dispersal control systems; and

(iv) The presence of leachate in and proper functioning of leachate collection and removal systems.

(6) Containment system repairs—Contingency plans.

(a) Whenever there is any indication of a possible failure of the containment system, that system must be inspected in accordance with the provisions of the containment system evaluation and repair plan required by (d) of this subsection. Indications of possible failure of the containment system include liquid detected in the leachate detection system, evidence of leakage or the potential for leakage in the base, erosion of the base, or apparent or

potential deterioration of the liner(s) based on observation or test samples of the liner materials.

(b) Whenever there is a positive indication of a failure of the containment system, the waste pile must be removed from service. Indications of positive failure of the containment system include waste detected in the leachate detection system, or a breach (e.g., a hole, tear, crack, or separation) in the base.

(c) If the waste pile must be removed from service as required by (b) of this subsection, the owner or operator must:

- (i) Immediately stop adding wastes to the pile;
- (ii) Immediately contain any leakage which has occurred or is occurring;
- (iii) Immediately cause the leak to be stopped; and
- (iv) If the leak cannot be stopped by any other means, remove the waste from the base.

(d) As part of the contingency plan required in WAC 173-303-350, the owner or operator must specify:

(i) A procedure for complying with the requirements of (c) of this subsection; and

(ii) A containment system evaluation and repair plan describing: Testing and monitoring techniques; procedures to be followed to evaluate the integrity of the containment system in the event of a possible failure; a schedule of actions to be taken in the event of a possible failure; and a description of the repair techniques and materials (and their availability) to be used in the event of leakage due to containment system failure or deterioration which does not require the waste pile to be removed from service. For EHW piles, the owner or operator must submit with his permit application a statement signed by ~~(a licensed)~~ an independent, qualified registered professional engineer of the basis on which the evaluation and repair plan has been established.

(e) No waste pile that has been removed from service pursuant to (b) of this subsection, may be restored to service unless:

- (i) The containment system has been repaired; and
- (ii) The containment system has been certified by a qualified engineer as meeting the design specifications approved in the permit.

(f) A waste pile that has been removed from service pursuant to (b) of this subsection, and will not be repaired, must be closed in accordance with subsection (9) of this section.

(7) Special requirements for ignitable or reactive waste. Ignitable or reactive waste must not be placed in a pile, unless:

(a) Addition of the waste to an existing pile results in the waste or mixture no longer meeting the definition of ignitable or reactive waste under WAC 173-303-090, and complies with WAC 173-303-395 (1)(b); or

(b)(i) The waste is managed in such a way that it is protected from any material or conditions which may cause it to ignite or react; and

(ii) The generator complies with WAC 173-303-395 (1)(d).

(8) Special requirements for incompatible wastes.

(a) Incompatible wastes, or incompatible wastes and materials must not be placed in the same pile, unless WAC 173-303-395 (1)(b) is complied with.

(b) A pile of dangerous waste that is incompatible with any waste or other material stored nearby in other containers, piles, open tanks, or surface impoundments must be separated from the other materials, or protected from them by means of a dike, berm, wall, or other device. Piles of incompatible wastes must not be served by the same containment system.

(c) Dangerous waste must not be piled on the same base where incompatible wastes or materials were previously piled, unless the base has been decontaminated sufficiently to ensure compliance with WAC 173-303-395 (1)(b).

(9) Closure and postclosure care.

(a) At closure, the owner or operator must remove or decontaminate all dangerous waste, waste residues, contaminated containment system components (liners, etc.), contaminated subsoils, and structures and equipment contaminated with waste and leachate, and manage them in accordance with this chapter.

(b) If, after removing or decontaminating all residues and making all reasonable efforts regarding removal or decontamination of contaminated components, subsoils, structures, and equipment as required in (a) of this subsection, the owner or operator finds that not all contaminated subsoils can be practicably removed or decontaminated (except that no EHW may ever be left in place), he must close the facility and perform postclosure care in accordance with the closure and postclosure care requirements that apply to landfills, WAC 173-303-665(6).

(c)(i) The owner or operator of a waste pile that does not comply with the liner requirements of subsection (2)(a)(i) of this section, and is not exempt from them in accordance with subsection (1)(c) or (2)(d) of this section, must:

(A) Include in the closure plan for the pile under WAC 173-303-610(3) both a plan for complying with (a) of this subsection, and a contingent plan for complying with (b) of this subsection, in case not all contaminated subsoils can be practicably removed at closure; and

(B) Prepare a contingent postclosure plan under WAC 173-303-610(8) for complying with (b) of this subsection, in case not all contaminated subsoils can be practicably removed at closure.

(ii) The cost estimates calculated under WAC 173-303-620 (3) and (5) for closure and postclosure care of a pile must include the cost of complying with the contingent closure plan and the contingent postclosure plan but are not required to include the cost of expected closure under (a) of this subsection.

(10) Special requirements for dangerous wastes F020, F021, F022, F023, F026, and F027.

(a) Dangerous wastes F020, F021, F022, F023, F026, and F027 must not be placed in waste piles that are not enclosed (as defined in subsection (1)(c) of this section) unless the owner or operator operates the waste pile in accordance with a management plan for these wastes that is approved by the department pursuant to the standards set out in this subsection, and in accord with all other applicable requirements of this chapter. The factors to be considered are:

(i) The volume, physical, and chemical characteristics of the wastes, including their potential to migrate through soil or to volatilize or escape into the atmosphere;

(ii) The attenuative properties of underlying and surrounding soils or other materials;

(iii) The mobilizing properties of other materials co-disposed with these wastes; and

(iv) The effectiveness of additional treatment, design, or monitoring techniques.

(b) The department may determine that additional design, operating, and monitoring requirements are necessary in order to reduce the possibility of migration of these wastes to ground water, to surface water, or air so as to protect human health and the environment.

AMENDATORY SECTION (Amending Order DE-85-10, filed 6/3/86)

WAC 173-303-670 Incinerators. (1) Applicability.

(a) Except as WAC 173-303-600 provides otherwise, the regulations in this section apply to owners and operators of facilities that incinerate dangerous waste and to owners and operators who burn dangerous waste in boilers or industrial furnaces in order to destroy them, or who burn dangerous waste in boilers or in industrial furnaces for any recycling purpose and elect to be regulated under this section.

(b) The department may, in establishing permit conditions, exempt the facility from all requirements of this section except subsection (2) of this section, waste analysis, and subsection (8) of this section, closure, if the department finds, after an examination of the waste analysis included with Part B of the owner/operator's permit application, that the waste to be burned:

(i)(A) Is either listed as a dangerous waste in WAC 173-303-080 only because it is ignitable or, that the waste is designated only as an ignitable dangerous waste under WAC 173-303-090; or

(B) Is either listed in WAC 173-303-080 or is designated under WAC 173-303-090 solely because it is reactive for the characteristics described in WAC 173-303-090 (7)(a)(i), (ii), (iii), (vi), (vii) and (viii), and will not be burned when other dangerous wastes are present in the combustion zone; and

(ii) Contains none of the dangerous constituents listed in WAC 173-303-9905 above significant concentration limits; and

(iii) Is not designated by the dangerous waste criteria of WAC (~~173-303-101, Toxic dangerous wastes, nor of WAC 173-303-102, Persistent dangerous wastes, nor of WAC 173-303-103, Carcinogenic dangerous wastes~~) 173-303-100.

(c) The owner or operator of an incinerator may conduct trial burns, subject only to the requirements of WAC 173-303-807, trial burn permits.

(2) Waste analysis.

(a) As a portion of a trial burn plan required by WAC 173-303-807, or with Part B of his permit application, the owner or operator must have included an analysis of his waste feed sufficient to provide all information required by WAC 173-303-807 or 173-303-806 (3) and (4).

(b) Throughout normal operation the owner or operator must conduct sufficient waste analysis to verify that waste feed to the incinerator is within the physical and chemical composition limits specified in his permit (under subsection (6)(b) of this section).

(3) Designation of principal organic dangerous constituents and dangerous combustion byproducts. Principal organic dangerous constituents (PODCs) and dangerous combustion byproducts must be treated to the extent required by the performance standards specified in subsection (4) of this section. For each waste feed to be burned, one or more PODCs and dangerous combustion byproducts will be specified in the facility's permit from among those constituents listed in WAC 173-303-9905 and, to the extent practical, from among those constituents which contribute to the toxicity, persistence, or carcinogenicity of wastes designated under WAC (~~173-303-084 or 173-303-101 through 173-303-103~~) 173-303-100. This specification will be based on the degree of difficulty of incineration of the organic constituents of the waste feed and its combustion byproducts and their concentration or mass, considering the results of waste analyses and trial burns or alternative data submitted with Part B of the facility's permit application. Organic constituents or byproducts which represent the greatest degree of difficulty of incineration will be those most likely to be designated as PODCs and dangerous combustion byproducts. Constituents are more likely to be designated as PODCs or dangerous combustion byproducts if they are present in large quantities or concentrations. Trial PODCs will be designated for performance of trial burns in accordance with the procedure specified in WAC 173-303-807 for obtaining trial burn permits. Trial dangerous combustion byproducts may be designated under the same procedures.

(4) Performance standards. An incinerator burning dangerous waste must be designed, constructed, and maintained so that, when operated in accordance with operating requirements specified under subsection (6) of this section, it will meet the following performance standards:

(a)(i) Except as provided in (a)(ii) of this subsection, an incinerator burning dangerous waste must achieve a destruction and removal efficiency (DRE) of 99.99 percent for each PODC designated (under subsection (3) of this section) in its permit for each waste feed. DRE is determined for each PODC from the following equation:

$$DRE = \frac{(w_{in} - w_{out}) \times 100\%}{w_{in}}$$

Where:

w_{in} = Mass feed rate of one PODC in the waste stream feeding the incinerator, and

w_{out} = Mass emission rate of the same PODC present in exhaust emissions prior to release to the atmosphere.

(ii) An incinerator burning dangerous wastes F020, F021, F022, F023, F026, or F027 must achieve a destruction and removal efficiency (DRE) of 99.9999% for each principal organic dangerous constituent (PODCs) designated (under subsection (3) of this section) in its permit. This performance must be demonstrated on PODCs that are more difficult to incinerate than tetra-, penta-, and hexachlorodibenzo-p-dioxins and dibenzofurans. DRE is determined for each PODCs from the equation in subsection (4)(a)(i) of this section. In addition, the owner or operator of the incinerator must notify the department of his intent to

incinerate dangerous wastes F020, F021, F022, F023, F026, or F027.

(b) Incinerators burning dangerous waste must destroy dangerous combustion byproducts designated under subsection (3) of this section so that the total mass emission rate of these byproducts emitted from the stack is no more than .01 percent of the total mass feed rate of PODCs fed into the incinerator.

(c)(i) An incinerator burning dangerous waste and producing stack emissions of more than 1.8 kilograms per hour (4 pounds per hour) of hydrogen chloride (HCl) must control HCl emissions such that the rate of emission is no greater than the larger of either 1.8 kilograms per hour or one percent of the HCl in the stack gas prior to entering any pollution control equipment.

(ii) An incinerator burning dangerous waste must not emit particulate matter in excess of 180 milligrams per dry standard cubic meter (0.08 grains per dry standard cubic foot) when corrected for the amount of oxygen in the stack gas according to the formula:

$$P_c = \frac{P_m \times 14}{21 - Y}$$

Where P_c is the corrected concentration of particulate matter, P_m is the measured concentration of particulate matter, and Y is the measured concentration of oxygen in the stack gas, using the Orsat method for oxygen analysis of dry flue gas, presented in 40 CFR Part 60, Appendix A (Method 3). This correction procedure is to be used by all dangerous waste incinerators except those operating under conditions of oxygen enrichment. For these facilities, the department will select an appropriate correction procedure to be specified in the facility permit.

(d) The emission standards specified in (c) of this subsection shall be met when no other more stringent standards exist. Where a state or local air pollution control authority has jurisdiction and has more stringent emission standards, an incinerator burning dangerous wastes shall comply with the applicable air pollution control authority's emission standards (including limits based on best available control technology).

(e) For purposes of permit enforcement, compliance with the operating requirements specified in the permit (under subsection (6) of this section), will be regarded as compliance with subsection (4) of this section. However, evidence that compliance with those permit conditions is insufficient to ensure compliance with the performance requirements of subsection (4) of this section, may be evidence justifying modification, revocation, or reissuance of a permit under WAC 173-303-830.

(5) Trial burns and permit modifications.

(a) The owner or operator of a dangerous waste incinerator may burn only wastes specified in his permit and only under operating conditions specified for those wastes under subsection (6) of this section, except:

(i) In approved trial burns under WAC 173-303-807; or

(ii) Under exemptions created by WAC 173-303-670(1).

(b) New dangerous wastes may be burned only after operating conditions have been specified in a trial burn permit or a permit modification has been issued, as applicable. Operating requirements for new wastes may be based

on either trial burn results or alternative data included with Part B of a permit application under WAC 173-303-806(4).

(c) The permit for a new dangerous waste incinerator must establish appropriate conditions for each of the applicable requirements of this section, including but not limited to allowable waste feeds and operating conditions necessary to meet the requirements of subsection (6) of this section, sufficient to comply with the following standards:

(i) For the period beginning with initial introduction of dangerous waste to the incinerator and ending with initiation of the trial burn, and only for the minimum time required to establish operating conditions required in (c)(ii) of this subsection, not to exceed a duration of seven hundred twenty hours operating time for treatment of dangerous waste. The operating requirements must be those most likely to ensure compliance with the performance standards of subsection (4) of this section, based on the department's engineering judgment. The department may extend the duration of this period once for up to seven hundred twenty additional hours when good cause for the extension is demonstrated by the applicant;

(ii) For the duration of the trial burn, the operating requirements must be sufficient to demonstrate compliance with the performance standards of subsection (4) of this section, and must be in accordance with the approved trial burn plan;

(iii) For the period immediately following completion of the trial burn, and only for the minimum period sufficient to allow sample analysis, data computation, and submission of the trial burn results by the applicant, and review of the trial burn results and modification of the facility permit by the department, the operating requirements must be those most likely to ensure compliance with the performance standards of subsection (4) of this section, based on the department's engineering judgment;

(iv) For the remaining duration of the permit, the operating requirements must be those demonstrated, in a trial burn or by alternative data specified in WAC 173-303-806(4)(f)(iii)(G), as sufficient to ensure compliance with the performance standards of subsection (4) of this section.

(6) Operating requirements.

(a) An incinerator must be operated in accordance with operating requirements specified in the permit. These will be specified on a case-by-case basis as those demonstrated (in a trial burn or in alternative data as specified in subsection (5)(b) of this section and included with Part B of a facility's permit application) to be sufficient to comply with the performance standards of subsection (4) of this section.

(b) Each set of operating requirements will specify the composition of the waste feed (including acceptable variations in the physical or chemical properties of the waste feed which will not affect compliance with the performance requirement of subsection (4) of this section) to which the operating requirements apply. For each such waste feed, the permit will specify acceptable operating limits including the following conditions:

(i) Carbon monoxide (CO) level in the stack exhaust gas;

(ii) Waste feed rate;

(iii) Combustion temperature;

(iv) An appropriate indicator of combustion gas velocity;

(v) Allowable variations in incinerator system design or operating procedures; and

(vi) Such other operating requirements as are necessary to ensure that the performance standards of subsection (4) of this section are met.

(c) During startup and shutdown of an incinerator, dangerous waste (except waste exempted in accordance with subsection (1)(b) of this section) must not be fed into the incinerator unless the incinerator is operating within the conditions of operation (temperature, air feed rate, etc.) specified in the permit.

(d) Fugitive emissions from the combustion zone must be controlled by:

(i) Keeping the combustion zone totally sealed against fugitive emissions;

(ii) Maintaining a combustion zone pressure lower than atmospheric pressure; or

(iii) An alternate means of control demonstrated (with Part B of the permit application) to provide fugitive emissions control equivalent to maintenance of combustion zone pressure lower than atmospheric pressure.

(e) An incinerator must be operated with a functioning system to automatically cut off waste feed to the incinerator when operating conditions deviate from limits established under (a) of this subsection.

(f) An incinerator must cease operation when changes in waste feed, incinerator design, or operating conditions exceed limits designated in its permit.

(7) Monitoring and inspections.

(a) The owner or operator must conduct, as a minimum, the following monitoring while incinerating dangerous waste:

(i) Combustion temperature, waste feed rate, and the indicator of combustion gas velocity specified in the facility permit must be monitored on a continuous basis;

(ii) Carbon monoxide (CO) must be monitored on a continuous basis at a point in the incinerator downstream of the combustion zone and prior to release to the atmosphere; and

(iii) As required by the department, sampling and analysis of the waste and exhaust emissions must be conducted to verify that the operating requirements established in the permit achieve the performance standards of subsection (4) of this section.

(b) The incinerator and associated equipment (pumps, valves, conveyors, pipes, etc.) must be completely inspected at least daily for leaks, spills, fugitive emissions, and signs of tampering. All emergency waste feed cutoff controls and system alarms must be tested at least weekly to verify proper operation, unless the owner or operator demonstrates to the department that weekly inspections will unduly restrict or upset operations and that less frequent inspection will be adequate. At a minimum, emergency cutoff and alarm systems must be tested at least monthly.

(c) This monitoring and inspection data must be recorded and the records must be placed in the operating log required by WAC 173-303-380(1).

(8) Closure. At closure the owner or operator must remove all dangerous waste and dangerous waste residues (including, but not limited to, ash, scrubber waters, and scrubber sludges) from the incinerator site. Remaining equipment, bases, liners, soil, and debris containing or

contaminated with dangerous waste or waste residues must be decontaminated or removed.

Reviser's note: The spelling error in the above section occurred in the copy filed by the agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending Order 90-42, filed 3/7/91, effective 4/7/91)

WAC 173-303-680 Miscellaneous units. (1) Applicability. The requirements of this section apply to owners and operators of facilities that treat, store, or dispose of dangerous waste in miscellaneous units, except as WAC 173-303-600 provides otherwise.

(2) Environmental performance standards. A miscellaneous unit must be located, designed, constructed, operated, maintained, and closed in a manner that will ensure protection of human health and the environment. Permits for miscellaneous units are to contain such terms and provisions as necessary to protect human health and the environment, including, but not limited to, as appropriate, design and operating requirements, detection and monitoring requirements, and requirements for responses to releases of dangerous waste or dangerous constituents from the unit. Permit terms and provisions shall include those requirements in WAC 173-303-630 through 173-303-670, 173-303-806, and 40 CFR Part 146 that are appropriate for the miscellaneous units being permitted. Protection of human health and the environment includes, but is not limited to:

(a) Prevention of any releases that may have adverse effects on human health or the environment due to migration of wastes constituents in the ground water or subsurface environment, considering:

(i) The volume and physical and chemical characteristics of the waste in the unit, including its potential for migration through soil, liners, or other containing structures;

(ii) The hydrologic and geologic characteristics of the unit and the surrounding area;

(iii) The existing quality of ground water, including other sources of contamination and their cumulative impact on the ground water;

(iv) The quantity and direction of ground water flow;

(v) The proximity to and withdrawal rates of current and potential ground water users;

(vi) The patterns of land use in the region;

(vii) The potential for deposition or migration of waste constituents into subsurface physical structures, and into the root zone of food-chain crops and other vegetation;

(viii) The potential for health risks caused by human exposure to waste constituents; and

(ix) The potential for damage to domestic animals, wildlife, crops, vegetation, and physical structures caused by exposure to waste constituents.

(b) Prevention of any release that may have adverse effects on human health or the environment due to migration of waste constituents in surface water, or wetlands or on the soil surface considering:

(i) The volume and physical and chemical characteristics of the waste in the unit;

(ii) The effectiveness and reliability of containing, confining, and collecting systems and structures in preventing migration;

(iii) The hydrologic characteristics of the unit and the surrounding area, including the topography of the land around the unit;

(iv) The patterns of precipitation in the region;

(v) The quantity, quality, and direction of ground water flow;

(vi) The proximity of the unit to surface waters;

(vii) The current and potential uses of nearby surface waters and any water quality standards established for those surface waters;

(viii) The existing quality of surface waters and surface soils, including other sources of contamination and their cumulative impact on surface waters and surface soils;

(ix) The patterns of land use in the region;

(x) The potential for health risks caused by human exposure to waste constituents; and

(xi) The potential for damage to domestic animals, wildlife, crops, vegetation, and physical structures caused by exposure to waste constituents.

(c) Prevention of any release that may have adverse effects on human health or the environment due to migration of waste constituents in the air, considering:

(i) The volume and physical and chemical characteristics of the waste in the unit, including its potential for the emission and dispersal of gases, aerosols and particulates;

(ii) The effectiveness and reliability of systems and structures to reduce or prevent emissions of dangerous constituents to the air;

(iii) The operating characteristics of the unit;

(iv) The atmospheric, meteorologic, and topographic characteristics of the unit and the surrounding area;

(v) The existing quality of the air, including other sources of contamination and their cumulative impact on the air;

(vi) The potential for health risks caused by human exposure to waste constituents; and

(vii) The potential for damage to domestic animals, wildlife, crops, vegetation, and physical structures caused by exposure to waste constituents.

(3) Monitoring, analysis, inspection, response, reporting, and corrective action. Monitoring, testing, analytical data, inspections, response, and reporting procedures and frequencies must ensure compliance with subsection (2) of this section, WAC 173-303-320, 173-303-340(1), 173-303-380(3), 173-303-390 (1) and (3), and ~~((173-303-645(12)))~~ 173-303-646(2) as well as meet any additional requirements needed to protect human health and the environment as specified in the permit.

(4) Postclosure care. A miscellaneous unit that is a disposal unit must be maintained in a manner that complied with subsection (2) of this section during the postclosure care period. In addition, if a treatment or storage unit has contaminated soils or ground water that cannot be completely removed or decontaminated during closure, then that unit must also meet the requirements of subsection (2) of this section during postclosure care. The postclosure plan under WAC 173-303-610(8) must specify the procedures that will be used to satisfy this requirement.

Reviser's note: The spelling error in the above section occurred in the copy filed by the agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending Order 90-42, filed 3/7/91, effective 4/7/91)

WAC 173-303-800 Permit requirements for dangerous waste management facilities. (1) The purpose of WAC 173-303-800 through 173-303-840 is to establish the requirements for permits which will allow a dangerous waste facility to operate without endangering the public health and the environment.

(2) The owner/operator of a dangerous waste facility that transfers, treats, stores, or disposes (TSD) or recycles dangerous waste shall, when required by this chapter, obtain a permit in accordance with WAC 173-303-800 through 173-303-840 covering the active life, closure period, ground water protection compliance period, and for any regulated unit (as defined in WAC 173-303-040)~~((and))~~ or for any facility which at closure does not meet the removal or decontamination limits of WAC 173-303-610 (2)(b), post-closure care period ~~((in accordance with WAC 173-303-800 through 173-303-840))~~, unless they demonstrate closure by removal or decontamination as provided under WAC 173-303-800 (9) and (10). The denial of a permit for the active life of a dangerous waste management facility or unit does not affect the requirement to obtain a post-closure permit under this section.

(3) TSD facility permits will be granted only if the objectives of the siting and performance standards set forth in WAC ~~((173-303-420))~~ 173-303-282 and 173-303-283 are met.

(4) Permits shall be issued according to the requirements of all applicable TSD facility standards.

(5) The owner/operator of a TSD facility is responsible for obtaining all other applicable federal, state, and local permits authorizing the development and operation of the TSD facility.

(6) The terms used in regard to permits which are not defined in WAC 173-303-040 shall have the same meanings as set forth in 40 CFR 270.2.

(7) Exemptions.

(a) A permit for an on-site cleanup action may be exempted as provided in a consent decree or order signed by the department and issued pursuant to chapter 70.105D RCW.

(b) A permit is not required for an on-site cleanup action performed by the department pursuant to chapter 70.105D RCW.

(8) Each permit issued under this chapter shall contain terms and conditions as the department determines necessary to protect human health and the environment.

(9) Closure by removal. Owners/operators of surface impoundments, land treatment units, and waste piles closing by removal or decontamination under 40 CFR Part 265 standards as referenced by WAC 173-303-400 must obtain a post-closure permit unless they can demonstrate to the department that the closure met the standards for closure by removal or decontamination in WAC 173-303-650(6), 173-303-655(8), or 173-303-660(9), as appropriate, and such removal or decontamination must assure that the levels of dangerous waste or dangerous waste constituents or residues do not exceed standards for closure at 40 CFR Part 264.111, as appropriate. The demonstration may be made in the following ways:

(a) If the owner/operator has submitted a Part B application for a post-closure permit, the owner/operator may request a determination, based on information contained in the application, that 40 CFR Part 264.111 standards for closure by removal were met. If the department believes that 40 CFR Part 264.111 standards were met, the department will notify the public of this proposed decision, allow for public comment, and reach a final determination according to the procedures in subsection (10) of this section.

(b) If the owner/operator has not submitted a Part B application for a post-closure permit, the owner/operator may petition the department for a determination that a post-closure permit is not required because the closure met the applicable 40 CFR Part 264.111 closure standards.

(i) The petition must include data demonstrating that standards for closure by removal or decontamination were met, or it must demonstrate that the unit closed under chapter 173-303 WAC requirements that met or exceeded the applicable 40 CFR Part 264.111 closure-by-removal standard.

(ii) The department shall approve or deny the petition according to the procedures outline in subsection (10) of this section.

(10) Procedures for closure equivalency determination.

(a) If a facility owner/operator seeks an equivalency demonstration under subsection (9) of this section, the department will provide the public, through a newspaper notice, the opportunity to submit written comments on the information submitted by the owner/operator within thirty days from the date of the notice. The department will also, in response to a request or at the discretion of the department, hold a public hearing whenever such a hearing might clarify one or more issues concerning the equivalence of the 40 CFR Part 265 closure, as referenced by WAC 173-303-400, to a 40 CFR Part 264.111 closure. The department will give public notice of the hearing at least thirty days before it occurs. (Public notice of the hearing may be given at the same time as notice of the opportunity for the public to submit written comments, and the two notices may be combined.)

(b) The department will determine whether the 40 CFR Part 265 closure met 40 CFR Part 264.111 closure by removal or decontamination requirements within ninety days of its receipt. If the department finds that the closure did not meet the applicable 40 CFR Part 264.111 standards, the department will provide the owner/operator with a written statement of the reasons why the closure failed to meet 40 CFR Part 264.111 standards. The owner/operator may submit additional information in support of an equivalency demonstration within thirty days after receiving such written statement. The department will review any additional information submitted and make a final determination within sixty days.

(c) If the department determines that the facility did not close in accordance with 40 CFR Part 264.111 standards for closure by removal, the facility is subject to post-closure permitting requirements.

(11) The department may require a permittee or an applicant to submit information in order to establish permit conditions under subsection (8) of this section and WAC 173-303-806 (11)(d).

AMENDATORY SECTION (Amending Order 90-42, filed 3/7/91, effective 4/7/91)

WAC 173-303-802 Permits by rule. (1) Purpose and applicability. This section provides for permit by rule for particular facilities and activities managing dangerous wastes, provided that certain conditions are met. These facilities, activities, and conditions are listed in this section. Owners and operators of facilities with permits by rule are not required to submit an application for a dangerous waste facility permit.

(2) Ocean disposal barges or vessels. The owner or operator of a barge or other vessel which accepts dangerous waste for ocean disposal, shall have a permit by rule if the owner or operator:

(a) Has a permit for ocean dumping issued under 40 CFR Part 220 (Ocean Dumping, authorized by the Marine Protection, Research, and Sanctuaries Act, as amended, 33 U.S.C. § 1420 et seq.);

(b) Complies with the conditions of that permit; and

(c) Complies with the following dangerous waste regulations:

(i) WAC 173-303-060, notification and identification numbers;

(ii) WAC 173-303-170 through 173-303-230 when initiating shipments of dangerous waste;

(iii) WAC 173-303-370, manifest system;

(iv) WAC 173-303-380 (1)(a), operating record;

(v) WAC 173-303-390(2), annual report; and

(vi) WAC 173-303-390(1), unmanifested waste report.

(3) Underground injection wells. Underground injection wells with an underground injection control (UIC) permit for underground injection shall have a permit by rule if the owner or operator has a UIC permit issued by the department under a federally approved program for underground injection control, and complies with the conditions of the permit and requirements of 40 CFR 144.14 and applicable state waste discharge rules. For UIC permits issued after November 8, 1984, the owner or operator must comply with WAC 173-303-646(2), corrective action for solid waste management units; and where the UIC well is the only unit at a facility which requires a RCRA permit, complies with WAC 173-303-806 (4)(a)(xxiii). All underground injection wells must comply with WAC 173-303-060, notification and identification numbers. However, underground injection wells disposing of EHW are prohibited.

(4) Publicly owned treatment works (POTW). The owner or operator of a POTW which accepts dangerous waste for treatment, shall have a permit by rule if the owner or operator:

(a) Has a National Pollutant Discharge Elimination System (NPDES) permit;

(b) Complies with the conditions of that permit;

(c) Complies with the following regulations:

(i) WAC 173-303-060, notification and identification numbers;

(ii) WAC 173-303-170 through 173-303-230 when initiating shipments of dangerous waste;

(iii) WAC 173-303-283, performance standards;

(iv) WAC 173-303-370, manifest system;

(v) WAC 173-303-380 (1)(a), operating record;

(vi) WAC 173-303-390(2), annual report; ~~((and))~~

(vii) WAC 173-303-390(1), unmanifested waste reports; and

(viii) For NPDES permits issued after November 8, 1984, WAC 173-303-646(2), corrective action for solid waste management units:

(d) Accepts the waste only if it meets all federal, state, and local pretreatment requirements which would be applicable to the waste if it were being discharged into the POTW through a sewer, pipe, or similar conveyance; and

(e) Accepts no EHW for disposal at the POTW.

(5) Totally enclosed treatment facilities or elementary neutralization or wastewater treatment units.

(a) The owner or operator of a totally enclosed treatment facility or an elementary neutralization or wastewater treatment unit that treats dangerous wastes shall have a permit by rule, except as provided in (b) of this subsection, if he:

(i) Has ~~((a))~~ an NPDES permit, state waste discharge permit, pretreatment permit (or written discharge authorization from the local sewerage authority) ((and the permit or authorization provides effluent limits for the hazardous constituents, and provides for the use of all known, available, and reasonable methods of prevention, control, and treatment of pollution pursuant to chapter 90.48 RCW, prior to discharge)) issued by the department, or pretreatment permit (or written discharge authorization) from a local sewage utility delegated pretreatment program responsibilities pursuant to RCW 90.48.165, and the permit or authorization covers the waste stream and constituents being discharged;

(ii) Complies with the conditions of that permit;

(iii) Complies with the following regulations:

(A) WAC 173-303-060, notification and identification numbers;

(B) WAC 173-303-070, designation of dangerous waste;

(C) WAC 173-303-283, performance standards;

(D) WAC 173-303-300, general waste analysis;

(E) WAC 173-303-310, security;

~~((E))~~ (F) WAC 173-303-350, contingency plan and emergency procedures;

~~((F))~~ (G) WAC 173-303-360, emergencies;

~~((G))~~ (H) WAC 173-303-370, manifest system;

~~((H))~~ (I) WAC 173-303-380 (1)(d), operating record;

~~((I))~~ (J) WAC 173-303-390, facility reporting.

(b) The department may require the owner or operator of a totally enclosed treatment facility or an elementary neutralization or wastewater treatment unit subject to ~~((either))~~ (a) of this subsection to apply for and obtain a final facility permit in accordance with WAC 173-303-800 through 173-303-840, if:

(i) The owner or operator violates the general facility or performance requirements specified in (a) of this subsection;

(ii) The owner or operator is conducting other activities which require him to obtain a final facility permit;

(iii) The department determines that the general facility or performance requirements specified in (a) of this subsection, are not sufficient to protect public health or the environment and that additional requirements under this chapter are necessary to provide such protection; or

(iv) The owner or operator does not comply with applicable local, state or federal requirements established pursuant to sections 402 or 307(b) of the Federal Clean Water Act, or chapter 90.48 RCW.

AMENDATORY SECTION (Amending Order 90-42, filed 3/7/91, effective 4/7/91)

WAC 173-303-805 Interim status permits. (1) Applicability. This section applies to all facilities eligible for an interim status permit. When a facility is owned by one person but is operated by another person, it is the operator's duty to qualify for interim status, except that the owner must also sign an interim status application. Prior to submittal of an interim status permit application the requirements of WAC 173-303-281 must be met.

(2) Failure to qualify for interim status. If the department has reason to believe upon examination of a Part A application that it fails to provide the required information, it shall notify the owner or operator in writing of the apparent deficiency. Such notice shall specify the grounds for the department's belief that the application is deficient. The owner or operator shall have thirty days from receipt to respond to such a notification and to explain or cure the alleged deficiency in his Part A application. If, after such notification and opportunity for response, the department determines that the application is deficient it may take appropriate enforcement action.

(3) Interim status for facilities under RCRA interim status. Any existing facility operating under interim status gained under section 3005 of RCRA shall be deemed to have an interim status permit under this chapter provided that the owner/operator complies with the applicable requirements of WAC 173-303-400 and this section.

(4) Interim status for facilities managing state-designated (non-RCRA) dangerous wastes. Any existing facility which does not satisfy subsection (3) of this section, but which is only managing dangerous wastes that are not hazardous wastes under 40 CFR Part 261, shall be deemed to have an interim status permit provided that the owner/operator of the facility has complied with the notification requirements of WAC 173-303-060 by May 11, 1982 and has submitted Part A of his permit application by August 9, 1982. If an existing facility becomes subject to this chapter due to amendments to this chapter and the facility was not previously subject to this chapter, then the owner/operator of an existing facility may qualify for an interim status permit by complying with the notification requirements of WAC 173-303-060 within three months, and submitting Part A of his permit application within six months, after the adoption date of the amendments which cause the facility to be subject to the requirements of this chapter. Facilities qualifying for interim status under this subsection shall not be deemed to have interim status under section 3005 of RCRA, and may only manage non-RCRA wastes until they either qualify separately for interim status under section 3005 of RCRA or receive a final status facility permit allowing them to manage RCRA wastes.

(5) Maintaining the interim status permit.

(a) Timely notification and submission of a Part A application qualifies the owner/operator of the existing TSD facility for the interim status permit, until the department terminates interim status pursuant to subsection (8) of this section.

(b) Interim status for the existing TSD facility shall be maintained while the department makes final administrative

PERMANENT

disposition of a final facility permit pursuant to WAC 173-303-806 if:

(i) The owner/operator has submitted his final facility permit application (as described in WAC 173-303-806) within six months of the written request by the department to submit such application; and

(ii) Grounds for terminating interim status (as described in subsection (8) of this section) do not exist.

(c) The owner/operator of an interim status facility must update his Part A whenever he is managing wastes that are newly regulated under this chapter, and as necessary to comply with subsection (7) of this section. Failure to comply with this updating requirement is a violation of interim status.

(6) Prohibitions for interim status permits. Facilities with an interim status permit shall not:

(a) Treat, store, or dispose of dangerous waste not specified in Part A of the permit application;

(b) Employ processes not specified in Part A of the permit application; or

(c) Exceed the design capacities specified in Part A of the permit application.

(7) Changes during interim status.

(a) Except as provided in (b) of this subsection, the owner or operator of an interim status facility may make the following changes at the facility:

(i) Treatment, storage, or disposal of new dangerous wastes not previously identified in Part A of the permit application (and, in the case of newly listed or identified wastes, addition of the units being used to treat, store, or dispose of the dangerous wastes on the effective date of the listing or identification) if the owner or operator submits a revised Part A permit application prior to such treatment, storage, or disposal (along with a justification detailing the equipment and process or processes that the owner or operator will use to treat, store, or dispose of the new dangerous wastes) and if the department does not explicitly deny the changes within sixty days of receipt of the revised application;

(ii) Increases in the design capacity of processes used at the facility if the owner or operator submits a revised Part A permit application prior to such a change (along with a justification explaining the need for the change), the requirements of WAC 173-303-281 are met, and the department approves the changes because:

(A) There is a lack of available treatment, storage, or disposal capacity at other dangerous waste management facilities; or

(B) The change is necessary to comply with a federal, state, or local requirement.

(iii) Changes in the processes for the treatment, storage, or disposal of dangerous waste or addition of processes if the owner or operator submits a revised Part A permit application prior to such change (along with a justification explaining the need for the change) and the department approves the change because:

(A) The change is necessary to prevent a threat to human health and the environment because of an emergency situation; or

(B) The change is necessary to comply with a federal, state, or local requirement.

(iv) Changes in the ownership or operational control of a facility if the new owner or operator submits a revised Part A permit application no later than ninety days prior to the scheduled change. When a transfer of operational control of a facility occurs, the old owner or operator shall comply with the interim status financial requirements of 40 CFR Part 265, Subpart H (as referenced in WAC 173-303-400), until the new owner or operator has demonstrated to the department that he is complying with the financial requirements. Upon demonstration to the department by the new owner or operator of compliance with the interim status financial requirements, the department shall notify the old owner or operator in writing that he no longer needs to comply with the interim status financial requirements as of the date of demonstration. The new owner or operator must demonstrate compliance with the financial requirements within six months of the date of the change in ownership or operational control of the facility. All other interim status duties are transferred effective immediately upon the date of the change in ownership or operational control of the facility.

(v) Changes made in accordance with an interim status corrective action order issued by EPA under section 3008(h) of RCRA or other federal authority, including an order or consent decree issued pursuant to WAC 173-303-646 (2) or (3), by the department under chapter 70.105 RCW or other state authority, or by a court in a judicial action brought by EPA or by the department. Changes under this subsection (7)(a)(v) are limited to the treatment, storage, or disposal of solid waste from releases that originate within the boundary of the facility.

(b) Except as specifically allowed under this subsection (7)(b), changes listed under (a) of this subsection may not be made if they amount to reconstruction of the dangerous waste management facility. Reconstruction occurs when the capital investment in the changes to the facility exceeds fifty percent of the capital cost of a comparable entirely new dangerous waste management facility. If all other requirements are met, the following changes may be made even if they amount to a reconstruction:

(i) Changes made solely for the purposes of complying with the requirements of WAC 173-303-640(4) for tanks and ancillary equipment.

(ii) If necessary to comply with federal, state, or local requirements, changes to an existing unit, changes solely involving tanks or containers, or addition of replacement surface impoundments that satisfy the standards of section 3004(o) of RCRA.

(iii) Changes that are necessary to allow owners or operators to continue handling newly listed or identified dangerous wastes that have been treated, stored, or disposed of at the facility prior to the effective date of the rule establishing the new listing or identification.

(iv) Changes during closure of a facility or of a unit within a facility made in accordance with an approved closure plan.

(v) Changes necessary to comply with an interim status corrective action order issued by EPA under section 3008(h) or other federal authority, by an authorized state under comparable state authority, or by a court in a judicial proceeding brought by EPA or an authorized state, provided that such changes are limited to the treatment, storage, or

disposal of solid waste from releases that originate within the boundary of the facility.

(vi) Changes to treat or store, in tanks or containers, hazardous wastes subject to land disposal restrictions imposed by 40 CFR Part 268 or RCRA section 3004, provided that such changes are made solely for the purpose of complying with 40 CFR Part 268 or RCRA section 3004.

(8) Termination of interim status permit. The following are causes for terminating an interim status permit, or for denying a revised permit application:

(a) Final administrative disposition of a final facility permit application is made pursuant to WAC 173-303-806;

(b) When the department on examination or reexamination of a Part A application determines that it fails to meet the applicable standards of this chapter, it may notify the owner or operator that the application is deficient and that the interim status permit has been revoked. The owner or operator will then be subject to enforcement for operating without a permit;

(c) Failure to submit a requested Part B application on time, or to provide in full the information required in the Part B application;

(d) Violation of applicable interim status standards; or

(e) A determination that the permit applicant has failed to satisfy the performance standards of WAC 173-303-283.

(9) Special waste facilities. If the department determines, pursuant to WAC 173-303-550 through 173-303-560, that interim status standards can be reduced, the department will issue a notice of interim status modification stating what standards will be applied. Failure to comply with the conditions and standards as stated in the notice of modification or with the requirements of this section shall form a basis for revoking the notice. Upon revocation of the notice of interim status modification by the department, the owner or operator shall be subject to all of the requirements applicable to interim status dangerous waste management facilities. Before issuing the notice of modification, the department shall provide public notice of its intent, shall allow thirty days for public comment, and shall hold a public hearing if there is a significant degree of public interest or there is written notice of opposition and the department receives a request for a hearing during the comment period. Notice of a public hearing shall be provided at least fifteen days in advance, and the public comment period shall be extended to include the date of the hearing if it will occur after the initial thirty-day comment period. Within fifteen days of the end of the public comment period the department shall, based on comments received, issue, modify and issue, or deny the notice of interim status modification.

AMENDATORY SECTION (Amending Order 90-42, filed 3/7/91, effective 4/7/91)

WAC 173-303-806 Final facility permits. (1) Applicability. This section applies to all dangerous waste facilities required to have a final facility permit. The final facility permit requirements are applicable to:

(a) Final status TSD facilities;

(b) Special waste management facilities; and

(c) Certain recycling facilities that are not exempt from the permit requirements.

(2) Application. Any person subject to the permit requirements of this section who intends to operate a new TSD facility must comply with WAC 173-303-281 and apply for a final facility permit. The department may, at any time, require the owner or operator of an existing TSD facility to apply for a final facility permit. Such owner or operator will be allowed one hundred eighty days to submit his application; the department may extend the length of the application period if it finds that there are good reasons to do so. The owner or operator of an existing TSD facility may voluntarily apply for a final facility permit at any time. Any person seeking a final facility permit shall complete, sign, and submit an application to the department. An application shall consist of a Part A permit form (which can be obtained from the department), and the contents of Part B as specified in subsection (4) of this section.

(3) Effective regulations. A final facility permit will include all applicable requirements of this chapter which are in effect on the date that the permit is issued by the department. WAC 173-303-840(7) provides a means for reopening permit proceedings at the discretion of the department where new requirements become effective during the permitting process and are of sufficient magnitude to make additional proceedings desirable. Any other changes to the final facility permit will be in accordance with the permit modification requirements of WAC 173-303-830.

(4) Contents of Part B. Part B of a permit application shall consist of the information required in (a) through (i) of this subsection.

(a) General requirements. Part B of the permit application consists of the general information requirements of this subsection, and the specific information requirements in (b) through (h) of this subsection as applicable to the facility. The Part B information requirements presented in (a) through (h) of this subsection, reflect the standards promulgated in WAC 173-303-600. These information requirements are necessary in order for the department to determine compliance with WAC 173-303-600 through 173-303-670. If owners and operators of TSD facilities can demonstrate that the information prescribed in Part B cannot be provided to the extent required, the department may make allowance for submission of such information on a case-by-case basis. Information required in Part B shall be submitted to the department and signed in accordance with requirements in WAC 173-303-810(12). Certain technical data, such as design drawings and specifications, and engineering studies shall be certified by a registered professional engineer. The following information is required for all TSD facilities, except as WAC 173-303-600(3) provides otherwise.

(i) A general description of the facility.

(ii) Chemical, biological, and physical analyses of the dangerous waste to be handled at the facility. At a minimum, these analyses shall contain all the information which must be known to treat, store, or dispose of the wastes properly in accordance with WAC 173-303-600.

(iii) A copy of the waste analysis plan required by WAC 173-303-300(5) and, if applicable WAC 173-303-300(5)(g).

(iv) A description of the security procedures and equipment required by WAC 173-303-310, or a justification demonstrating the reasons for requesting a waiver of this requirement.

(v) A copy of the general inspection schedule required by WAC 173-303-320(2): Include where applicable, as part of the inspection schedule, specific requirements in WAC 173-303-395 (1)(d), 173-303-630(6), 173-303-640 (4)(a)(i) and (6), 173-303-650(4), 173-303-655(4), 173-303-660 (4) and (5), 173-303-665(4), 173-303-670(7), and 173-303-680(3).

(vi) A justification of any request for a waiver(s) of the preparedness and prevention requirements of WAC 173-303-340, or a description of the procedures used to comply with these requirements.

(vii) A copy of the contingency plan required by WAC 173-303-350: Include, where applicable, as part of the contingency plan, specific requirements in WAC 173-303-640(~~(8)~~) (7), 173-303-650(5) and 173-303-660(6).

(viii) A description of procedures, structures, or equipment used at the facility to:

(A) Prevent hazards and contain spills in unloading/loading operations (for example, ramps, berms, pavement, special forklifts);

(B) Prevent run-off from dangerous waste handling areas to other areas of the facility or environment, or to prevent flooding (for example, berms, dikes, trenches);

(C) Prevent contamination of water supplies;

(D) Mitigate effects of equipment failure and power outages; and

(E) Prevent undue exposure of personnel to dangerous waste (for example, protective clothing).

(ix) A description of precautions to prevent accidental ignition or reaction of ignitable, reactive, or incompatible wastes as required to demonstrate compliance with WAC 173-303-395 including documentation demonstrating compliance with WAC 173-303-395 (1)(c).

(x) Traffic pattern, estimated volume (number, types of vehicles) and control (for example, show turns across traffic lanes, and stacking lanes (if appropriate); describe access road surfacing and load bearing capacity; show traffic control signals).

(xi) Seismic risk consideration. The owner/operator of a proposed facility or expansion of an existing facility shall identify the seismic risk zone in which the facility is intended to be located. Where state or local maps are not available, United States Geological Survey Open File Report number 82-1033 may be used to identify seismic risk zones. The owner/operator shall demonstrate that the facility can and will be designed to resist seismic ground motion and that the design is sufficient to withstand the maximum horizontal acceleration of a design earthquake specified in the demonstration.

(xii) An outline of both the introductory and continuing training programs by owners or operators to prepare persons to operate or maintain the TSD facility in a safe manner as required to demonstrate compliance with WAC 173-303-330. A brief description of how training will be designed to meet actual job tasks in accordance with requirements in WAC 173-303-330 (1)(d).

(xiii) A copy of the closure plan and, where applicable, the post-closure plan required by WAC 173-303-610 (3) and (8). Include, where applicable, as part of the plans, specific requirements in WAC 173-303-630(10), 173-303-640(~~(5)~~) (8), 173-303-650(6), 173-303-655(8), 173-303-660(9), 173-303-665(6), 173-303-670(8), and 173-303-680 (2) and (4).

(xiv) For dangerous waste disposal units that have been closed, documentation that notices required under WAC 173-303-610(10) have been filed.

(xv) The most recent closure cost estimate for the facility prepared in accordance with WAC 173-303-620(3) and a copy of the documentation required to demonstrate financial assurance under WAC 173-303-620(4). For a new facility, a copy of the required documentation may be submitted sixty days prior to the initial receipt of dangerous wastes, if that is later than the submission of the Part B.

(xvi) Where applicable, the most recent post-closure cost estimate for the facility prepared in accordance with WAC 173-303-620(5) plus a copy of the documentation required to demonstrate financial assurance under WAC 173-303-620(6). For a new facility, a copy of the required documentation may be submitted sixty days prior to the initial receipt of dangerous wastes, if that is later than the submission of the Part B.

(xvii) Where applicable, a copy of the insurance policy or other documentation which comprises compliance with the requirements of WAC 173-303-620(8). For a new facility, documentation showing the amount of insurance meeting the specification of WAC 173-303-620 (8)(a) and, if applicable, WAC 173-303-620 (8)(b), that the owner or operator plans to have in effect before initial receipt of dangerous waste for treatment, storage, or disposal. A request for a variance in the amount of required coverage, for a new or existing facility, may be submitted as specified in WAC 173-303-620 (8)(c).

(xviii) A topographic map showing a distance of one thousand feet around the facility at a scale of 2.5 centimeters (1 inch) equal to not more than 61.0 meters (200 feet). Contours must be shown on the map. The contour interval must be sufficient to clearly show the pattern of surface water flow in the vicinity of and from each operational unit of the facility. For example, contours with an interval of 1.5 meters (5 feet), if relief is greater than 6.1 meters (20 feet), or an interval of 0.6 meters (2 feet), if relief is less than 6.1 meters (20 feet). Owners and operators of TSD facilities located in mountainous areas should use large contour intervals to adequately show topographic profiles of facilities. The map shall clearly show the following:

(A) Map scale and date;

(B) One hundred-year floodplain area;

(C) Surface waters including intermittent streams;

(D) Surrounding land uses (residential, commercial, agricultural, recreational);

(E) A wind rose (i.e., prevailing windspeed and direction);

(F) Orientation of the map (north arrow);

(G) Legal boundaries of the TSD facility site;

(H) Access control (fences, gates);

(I) Injection and withdrawal wells both on-site and off-site;

(J) Buildings; treatment, storage, or disposal operations; or other structure (recreation areas, run-off control systems, access and internal roads, storm, sanitary, and process sewerage systems, loading and unloading areas, fire control facilities, etc.);

(K) Barriers for drainage or flood control; and

(L) Location of operational units within the TSD facility site, where dangerous waste is (or will be) treated, stored, or disposed (include equipment clean-up areas).

(Note - For large TSD facilities the department will allow the use of other scales on a case-by-case basis.)

(xix) Applicants may be required to submit such information as may be necessary to enable the department to carry out its duties under other state or federal laws as required.

(xx) Additional information requirements. The following additional information regarding protection of ground water is required from owners or operators of dangerous waste (~~surface impoundments, waste piles, land treatment units, and landfills~~) facilities containing a regulated unit except as otherwise provided in WAC 173-303-645 (1)(b):

(A) A summary of the ground water monitoring data obtained during the interim status period under 40 CFR 265.90 through 265.94, where applicable;

(B) Identification of the uppermost aquifer and aquifers hydraulically interconnected beneath the facility property, including ground water flow direction and rate, and the basis for such identification (i.e., the information obtained from hydrogeologic investigations of the facility area);

(C) On the topographic map required under (a)(xviii) of this subsection, a delineation of the waste management area, the property boundary, the proposed "point of compliance" as defined under WAC 173-303-645(6), the proposed location of ground water monitoring wells as required under WAC 173-303-645(8), and, to the extent possible, the information required in (a)(xx)(B) of this subsection;

(D) A description of any plume of contamination that has entered the ground water from a regulated unit at the time that the application was submitted that:

(I) Delineates the extent of the plume on the topographic map required under (a)(xviii) of this subsection;

(II) Identifies the concentration of each constituent throughout the plume or identifies the maximum concentrations of each constituent in the plume. (Constituents are those listed in (~~WAC 173-303-9905~~) Appendix IX of 40 CFR Part 264, and any other constituents not listed there which have caused a managed waste to be regulated under this chapter.);

(E) Detailed plans and an engineering report describing the proposed ground water monitoring program to be implemented to meet the requirements of WAC 173-303-645(8);

(F) If the presence of dangerous constituents has not been detected in the ground water at the time of permit application, the owner or operator must submit sufficient information, supporting data, and analyses to establish a detection monitoring program which meets the requirements of WAC 173-303-645(9). This submission must address the following items specified under WAC 173-303-645(9):

(I) A proposed list of indicator parameters, waste constituents, or reaction products that can provide a reliable indication of the presence of dangerous constituents in the ground water;

(II) A proposed ground water monitoring system;

(III) Background values for each proposed monitoring parameter or constituent, or procedures to calculate such values; and

(IV) A description of proposed sampling, analysis and statistical comparison procedures to be utilized in evaluating ground water monitoring data;

(G) If the presence of dangerous constituents has been detected in the ground water at the point of compliance at the time of permit application, the owner or operator must submit sufficient information, supporting data, and analyses to establish a compliance monitoring program which meets the requirements of WAC 173-303-645(10). The owner or operator must also submit an engineering feasibility plan for a corrective action program necessary to meet the requirements of WAC 173-303-645(11) except as provided in WAC 173-303-645 (9)(h)(v). Alternatively, the owner or operator can obtain written authorization in advance from the department to submit a proposed permit schedule for development and submittal of such information. To demonstrate compliance with WAC 173-303-645(10), the owner or operator must address the following items:

(I) A description of the wastes previously handled at the facility;

(II) A characterization of the contaminated ground water, including concentrations of dangerous constituents and parameters;

(III) A list of constituents and parameters for which compliance monitoring will be undertaken in accordance with WAC 173-303-645 (8) and (10);

(IV) Proposed concentration limits for each dangerous constituent and parameter, based on the criteria set forth in WAC 173-303-645 (5)(a), including a justification for establishing any alternate concentration limits;

(V) Detailed plans and an engineering report describing the proposed ground water monitoring system, in accordance with the requirements of WAC 173-303-645(8); and

(VI) A description of proposed sampling, analysis and statistical comparison procedures to be utilized in evaluating ground water monitoring data; and

(H) If dangerous constituents or parameters have been measured in the ground water which exceed the concentration limits established under WAC 173-303-645(5), Table 1, or if ground water monitoring conducted at the time of permit application under 40 CFR 265.90 through 265.94 at the waste boundary indicates the presence of dangerous constituents from the facility in ground water over background concentrations, the owner or operator must submit sufficient information, supporting data, and analyses to establish a corrective action program which meets the requirements of WAC 173-303-645(11). However, an owner or operator is not required to submit information to establish a corrective action program if he demonstrates to the department that alternate concentration limits will protect human health and the environment after considering the criteria listed in WAC 173-303-645(5). An owner or operator who is not required to establish a corrective action program for this reason must instead submit sufficient information to establish a compliance monitoring program which meets the requirements of WAC 173-303-645 (10) and (a)(xx)(F) of this subsection. To demonstrate compliance with WAC 173-303-645(11), the owner or operator must address, at a minimum, the following items:

(I) A characterization of the contaminated ground water, including concentrations of dangerous constituents and parameters;

(II) The concentration limit for each dangerous constituent and parameter found in the ground water as set forth in WAC 173-303-645(5);

(III) Detailed plans and an engineering report describing the corrective action to be taken;

(IV) A description of how the ground water monitoring program will demonstrate the adequacy of the corrective action; and

(V) The permit may contain a schedule for submittal of the information required in (a)(xx)(H)(III) and (IV) of this subsection, provided the owner or operator obtains written authorization from the department prior to submittal of the complete permit application.

(xxi) Contingent ground water protection program. The following actions are required for owners or operators of proposed land-based facilities and may be required for owners/operators of existing land-based facilities, except as provided in WAC 173-303-645 (1)(b).

(A) Contingent ground water protection program. The owner or operator shall develop a contingent ground water protection program. The purpose of this program will be to prevent the migration of dangerous waste or dangerous waste constituents from waste management units to the nearest hydraulically downgradient receptor at any time during the life of the facility. For the purposes of this subsection, the downgradient receptor shall be the facility property line, perennial surface water or domestic well, whichever is nearest to the dangerous waste management unit. The contingent ground water protection program shall at a minimum:

(I) Define the local and regional hydrogeologic characteristics. The contingent ground water protection program shall be based on a sufficient understanding of site geology, hydrology, and other factors to allow evaluation of its adequacy by the department. Site characterization shall be performed in sufficient detail to provide, at a minimum, the following information: Site geostratigraphy; site hydrostratigraphy; identification of aquifers, aquitards, and aquicludes; flow models for each stratum (i.e., porous media or fracture flow); the distribution of vertical and horizontal hydraulic conductivity; effective porosity; horizontal and vertical hydraulic gradients; ground water travel time to receptors; and heterogeneity for each stratigraphic unit. Site interpretative models shall include ranges of tested values: The provisions of WAC 173-303-806 (4)(a)(xx) and 173-303-645, shall be used as guidance in the development of the contingent ground water protection program.

(II) Identify the range of potential release scenarios that could occur during facility operation and the postclosure care period. The scenarios shall incorporate the intended design(s) of the dangerous waste management unit(s), wastes to be placed in the dangerous waste management unit(s), waste and leachate chemistry, waste, and soil and rock geochemical interactions, and the results of site characterization pursuant to WAC 173-303-806 (4)(a)(xx) and (xxi);

(III) Include specific physical action to be taken if dangerous waste or dangerous waste constituents are detected in one or more of the monitoring wells. The physical actions shall be based upon engineering feasibility studies describing remedial actions established from site specific conditions and waste features. Such actions may include installation of a pump and treat system between the monitor-

ing well and the receptor or installation of a section of slurry wall to decrease ground water travel times. The description of the systems shall also provide how the remediation system will achieve cleanup, its efficiency, and the timeframes involved;

(IV) Incorporate the design, construction, and sampling methods outlined in WAC 173-303-645 (8)(c), (d), (e), (f), and (g);

(V) Demonstrate to the satisfaction of the department that the owner/operator of the dangerous waste management facility has the financial capability to implement the proposed ground water protection plan; and

(VI) Include reporting procedures to the department.

(B) The response actions identified in WAC 173-303-806 (4)(a)(xxi)(A)(III) shall be activated if the presence of dangerous waste or dangerous waste constituents have been detected at the point of compliance in accordance with WAC 173-303-645 (9)(g), and shall continue until the concentration of dangerous waste or dangerous waste constituents under WAC 173-303-645(4) are reduced to levels below their respective concentration limits specified in WAC 173-303-645(5).

(C) If the owner/operator does not demonstrate that the ground water protection program will prevent the migration of dangerous waste or its constituents to the nearest receptor, the department will require corrections to be made in the protection program, increase setbacks from the nearest receptor, or deny the permit.

(xxii) Additional requirements for incineration facilities. The following actions regarding the protection of human health and the environment must be taken by owners/operators of proposed hazardous waste incineration facilities and may be required for owners or operators of existing incineration facilities.

(A) Ambient monitoring program. The owner/operator shall be required to develop an ambient monitoring program. The purpose of this ambient monitoring program will be to: Gather baseline environmental information characterizing on-site and off-site environmental conditions prior to facility operation; and, to identify and measure changes in the environment which may be linked to the construction and operation of the facility. The ambient monitoring program shall, at a minimum:

(I) Include a characterization of facility emission sources and pathways of contaminant transport.

(II) Characterize local and regional ecosystems, including agricultural, and their sensitivity to the potential contaminants from the facility.

(III) Incorporate the findings of the environmental impact statement's health risk assessment and/or other assessments specific to the proposal or available to the scientific community regarding emissions from dangerous waste management facilities and their potential human health and environmental effects.

(IV) Identify sensitive indicator plants and animals for biomonitoring, identify specific chemical constituents of concern, sampling locations, sampling frequency, sampling and analytical methods, chain of custody procedures, quality assurance/quality control procedures, reporting times, recordkeeping procedures, and data evaluation procedures.

(B) Environmental review procedures. The owner/operator shall establish procedures to allow for public review

of facility operation and all monitoring data required by the facility's permit. In developing this process, the owner/operator shall, at a minimum:

(I) Coordinate this effort with the public and interested local organizations;

(II) Identify the informational needs of the community and develop a public information process which meets these needs; and

(III) Develop procedures allowing full access by the public to all monitoring data required by the permit.

(C) Impact mitigation plan. Prior to the department issuing a permit, the owner/operator shall submit an impact mitigation plan which demonstrates to the satisfaction of the department that the owner/operator will mitigate all probable significant adverse impacts, including economic, due to facility location and operations. The owner/operator shall use as a basis for identifying probable significant adverse economic impacts those probable economic impacts identified during a public review process, such as the environmental impact statement scoping process, if applicable.

The plan must include, but is not limited to, a description of what the owner/operator will do to reduce or prevent any probable significant impacts before they occur, to mitigate such impacts should they occur, and to ensure the owner/operator has and will have the financial capability to implement such preventative and mitigative measures. Mitigation measures may include, as an element, financial compensation to adversely affected parties.

This plan may be submitted with environmental reports the department requires for compliance with the State Environmental Policy Act, with the written citizen proponent negotiation report and agreements, or with the Part B permit application. If the plan does not demonstrate that the owner/operator is capable of adequately mitigating the identified probable significant adverse economic impacts, the department will require modification of the plan or of the proposed facility location, or will deny the permit application. The department must be satisfied with the plan prior to the issuance of the permit.

(xxiii) Information requirements for solid waste management units.

(A) The following information is required for each solid waste management unit:

(I) The location of the unit on the topographic map required under (a)(xviii) of this subsection.

(II) Designation of type of unit.

(III) General dimensions and structural description (supply any available drawings).

(IV) Time frame over which the unit was operated.

(V) Specification of all wastes that have been managed in the unit, to the extent available.

(B) The owner/operator of any facility containing one or more solid waste management units must submit all available information pertaining to any release of dangerous wastes or dangerous constituents from such unit or units.

(C) The owner/operator must conduct and provide the results of sampling and analysis of ground water, landsurface, and subsurface strata, surface water, or air, which may include the installation of wells, where the department determines it is necessary to complete a RCRA Facility Assessment that will determine if a more complete investigation is necessary.

WAC 173-303-806 (4)(a)(xxiv):

(xxiv) Information requirements for known releases.

(A) The following information is required for any and all known releases of dangerous waste and dangerous constituents (as defined by WAC 173-303-646 (2)(c)) at the facility.

(I) The location of the release on the topographic map required under (a)(xviii) of this subsection.

(II) General dimensions of the release and any relevant structural description. For example, if the release is from a storage tank, provide a structural description of the tank. Supply any available drawings.

(III) Time frame over which the release occurred.

(IV) Specification of all dangerous waste or dangerous constituents (as defined by WAC 173-303-646 (2)(c)) present in the release, to the extent available.

(b) Specific Part B information requirements for containers. Except as otherwise provided in WAC 173-303-600(3), owners or operators of facilities that store containers of dangerous waste must provide the following additional information:

(i) A description of the containment system to demonstrate compliance with WAC 173-303-630(7). Show at least the following:

(A) Basic design parameters, dimensions, and materials of construction including allowance for a twenty-five-year, twenty-four-hour storm;

(B) How the design promotes positive drainage control or how containers are kept from contact with standing liquids in the containment system;

(C) Capacity of the containment system relative to the volume of the largest container to be stored;

(D) Provisions for preventing or managing run-on;

(E) How accumulated liquids can be analyzed and removed to prevent overflow; and

(F) A description of the building or other protective covering for EHW containers;

(ii) For storage areas that store containers holding wastes that do not contain free liquids, a demonstration of compliance with WAC 173-303-630 (7)(c), including:

(A) Test procedures and results or other documentation or information to show that the wastes do not contain free liquids; and

(B) A description of how the storage area is designed or operated to drain and remove liquids or how containers are kept from contact with standing liquids;

(iii) A description of the procedures for labeling containers;

(iv) Sketches, drawings, or data demonstrating compliance with WAC 173-303-630(8) (location of buffer zone and containers holding ignitable or reactive wastes) and WAC 173-303-630 (9)(c) (location of incompatible wastes), where applicable; and

(v) Where incompatible wastes are stored or otherwise managed in containers, a description of the procedures used to ensure compliance with WAC 173-303-630 (9)(a) and (b), and 173-303-395 (1)(b) and (c).

(c) Specific Part B information requirements for tanks. Except as otherwise provided in WAC 173-303-600(3), owners and operators of facilities that use tanks to store or treat dangerous waste must provide the following information:

(i) A written assessment that is reviewed and certified by an independent, qualified, registered professional engineer as to the structural integrity and suitability for handling dangerous waste of each tank system, as required under WAC 173-303-640 (2) and (3);

(ii) Dimensions and capacity of each tank;

(iii) Description of feed systems, safety cutoff, bypass systems, and pressure controls (e.g., vents);

(iv) A diagram of piping, instrumentation, and process flow for each tank system;

(v) A description of materials and equipment used to provide external corrosion protection, as required under WAC 173-303-640 (3)(a)(iii)(B);

(vi) For new tank systems, a detailed description of how the tank system(s) will be installed in compliance with WAC 173-303-640 (3)(b), (c), (d), and (e);

(vii) Detailed plans and a description of how the secondary containment system for each tank system is or will be designed, constructed, and operated to meet the requirements of WAC 173-303-640 (4)(a), (b), (c), (d), (e), and (f);

(viii) For tank systems for which a variance from the requirements of WAC 173-303-640(4) is sought (as provided by WAC 173-303-640 (4)(g)):

(A) Detailed plans and engineering and hydrogeologic reports, as appropriate, describing alternate design and operating practices that will, in conjunction with location aspects, prevent the migration of any dangerous waste or dangerous constituents into the ground water or surface water during the life of the facility; or

(B) A detailed assessment of the substantial present or potential hazards posed to human health or the environment should a release enter the environment.

(ix) Description of controls and practices to prevent spills and overflows, as required under WAC 173-303-640 (5)(b);

(x) For tank systems in which ignitable, reactive, or incompatible wastes are to be stored or treated, a description of how operating procedures and tank system and facility design will achieve compliance with the requirements of WAC 173-303-640 (9) and (10);

(xi) A description of the marking and/or labeling of tanks; and

(xii) Tank design to prevent escape of vapors and emissions of acutely or chronically toxic (upon inhalation) EHW.

(d) Specific Part B information requirements for surface impoundments. Except as otherwise provided in WAC 173-303-600(3), owners and operators of facilities that store, treat, or dispose of dangerous waste in surface impoundments must provide the following additional information:

(i) A list of the dangerous wastes placed or to be placed in each surface impoundment;

(ii) Detailed plans and an engineering report describing how the surface impoundment is or will be designed, constructed, operated and maintained to meet the requirements of WAC 173-303-650(2). This submission must address the following items as specified in WAC 173-303-650(2):

(A) The liner system (except for an existing portion of a surface impoundment), including the certification required by WAC 173-303-650 (2)(a)(i)(D) for EHW management.

If an exemption from the requirement for a liner is sought as provided by WAC 173-303-650 (2)(b), submit detailed plans and engineering and hydrogeologic reports, as appropriate, describing alternate design and operating practices that will, in conjunction with location aspects, prevent the migration of any dangerous constituents into the ground water or surface water at any future time;

(B) Prevention of overtopping; and

(C) Structural integrity of dikes;

(iii) If any exemption from WAC 173-303-645 is sought, as provided by WAC 173-303-650(3), detailed plans and an engineering report explaining the location of the saturated zone in relation to the surface impoundment, and the design of a double-liner system that incorporates a leak detection system between the liners;

(iv) A description of how each surface impoundment, including the liner and cover systems and appurtenances for control of overtopping, will be inspected in order to meet the requirements of WAC 173-303-650 (4)(a) and (b). This information should be included in the inspection plan submitted under (a)(v) of this subsection;

(v) A certification by a qualified engineer which attests to the structural integrity of each dike, as required under WAC 173-303-650 (4)(c). For new units, the owner or operator must submit a statement by a qualified engineer that he will provide such a certification upon completion of construction in accordance with the plans and specifications;

(vi) A description of the procedure to be used for removing a surface impoundment from service, as required under WAC 173-303-650 (5)(b) and (c). This information should be included in the contingency plan submitted under (a)(vii) of this subsection;

(vii) A description of how dangerous waste residues and contaminated materials will be removed from the unit at closure, as required under WAC 173-303-650 (6)(a)(i). For any wastes not to be removed from the unit upon closure, the owner or operator must submit detailed plans and an engineering report describing how WAC 173-303-650 (6)(a)(ii) and (b) will be complied with. This information should be included in the closure plan and, where applicable, the post-closure plan submitted under (a)(xiii) of this subsection;

(viii) If ignitable or reactive wastes are to be placed in a surface impoundment, an explanation of how WAC 173-303-650(7) will be complied with;

(ix) If incompatible wastes, or incompatible wastes and materials will be placed in a surface impoundment, an explanation of how WAC 173-303-650(8) will be complied with; and

(x) Where applicable, a waste management plan for Dangerous Waste Nos. F020, F021, F022, F023, F026, or F027 describing how the surface impoundment is or will be designed to meet the requirements of WAC 173-303-650(9).

(e) Specific Part B information requirements for waste piles. Except as otherwise provided in WAC 173-303-600(3), owners and operators of facilities that store or treat dangerous waste in waste piles must provide the following additional information:

(i) A list of dangerous wastes placed or to be placed in each waste pile;

(ii) If an exemption is sought to WAC 173-303-660(2), and 173-303-645 as provided by WAC 173-303-660 (1)(c),

an explanation of how the standards of WAC 173-303-660 (1)(c) will be complied with;

(iii) Detailed plans and an engineering report describing how the pile is or will be designed, constructed, operated, and maintained to meet the requirements of WAC 173-303-660(2). This submission must address the following items as specified in WAC 173-303-660(2):

(A) The liner system (except for an existing portion of a pile), including the licensed engineer's certification when required by WAC 173-303-660 (2)(c). If an exemption from the requirement for a liner is sought, as provided by WAC 173-303-660 (2)(d), the owner or operator must submit detailed plans and engineering and hydrogeologic reports, as applicable, describing alternate design and operating practices that will, in conjunction with location aspects, prevent the migration of any hazardous constituents into the ground water or surface water at any future time;

(B) Control of run-on;

(C) Control of run-off;

(D) Management of collection and holding units associated with run-on and run-off control systems; and

(E) Control of wind dispersal of particulate matter, where applicable;

(iv) If an exemption from WAC 173-303-645 is sought as provided by WAC 173-303-660 (3) or (4), submit detailed plans and an engineering report describing how the requirements of WAC 173-303-660 (3)(a) or (4)(a) will be complied with;

(v) A description of how each waste pile, including the liner and appurtenances for control of run-on and run-off, will be inspected in order to meet the requirements of WAC 173-303-660(5). This information should be included in the inspection plan submitted under (a)(v) of this subsection. If an exemption is sought to WAC 173-303-645 pursuant to WAC 173-303-660(4), describe in the inspection plan how the inspection requirements of WAC 173-303-660 (4)(a)(iii) will be complied with;

(vi) If treatment is carried out on or in the pile, details of the process and equipment used, and the nature and quality of the residuals;

(vii) If ignitable or reactive wastes are to be placed in a waste pile, an explanation of how the requirements of WAC 173-303-660(7) will be complied with;

(viii) If incompatible wastes, or incompatible wastes and materials will be placed in a waste pile, an explanation of how WAC 173-303-660(8) will be complied with;

(ix) A description of how dangerous waste, waste residues and contaminated materials will be removed from the waste pile at closure, as required under WAC 173-303-660 (9)(a). For any waste not to be removed from the waste pile upon closure, the owner or operator must submit detailed plans and an engineering report describing how WAC 173-303-665 (6)(a) and (b) will be complied with. This information should be included in the closure plan and, where applicable, the post-closure plan submitted under (a)(xiii) of this subsection;

(x) Where applicable, a waste management plan for Dangerous Waste Nos. F020, F021, F022, F023, F026, or F027 describing how a waste pile that is not enclosed (as defined in WAC 173-303-660 (1)(c)) is or will be designed, constructed, operated, and maintained to meet the requirements of WAC 173-303-660(10).

(f) Specific Part B information requirements for incinerators. Except as WAC 173-303-670(1) provides otherwise, owners and operators of facilities that incinerate dangerous waste must fulfill the informational requirements of (f) of this subsection.

(i) When seeking an exemption under WAC 173-303-670 (1)(b) (ignitable or reactive wastes only):

(A) Documentation that the waste is listed as a dangerous waste in WAC 173-303-080, solely because it is ignitable; or

(B) Documentation that the waste is listed as a dangerous waste in WAC 173-303-080, solely because it is reactive for characteristics other than those listed in WAC 173-303-090 (7)(a)(iv) and (v), and will not be burned when other dangerous wastes are present in the combustion zone; or

(C) Documentation that the waste is a dangerous waste solely because it possesses the characteristic of ignitability, as determined by the tests for characteristics of dangerous waste under WAC 173-303-090; or

(D) Documentation that the waste is a dangerous waste solely because it possesses the reactivity characteristics listed in WAC 173-303-090 (7)(a)(i), (ii), (iii), (vi), (vii), and (viii), and that it will not be burned when other dangerous wastes are present in the combustion zone.

(ii) Submit a trial burn plan or the results of a trial burn, including all required determinations, in accordance with WAC 173-303-807.

(iii) In lieu of a trial burn, the applicant may submit the following information;

(A) An analysis of each waste or mixture of wastes to be burned including:

(I) Heating value of the waste in the form and composition in which it will be burned;

(II) Viscosity (if applicable), or description of physical form of the waste, and specific gravity of the waste;

(III) An identification of any dangerous organic constituents listed in WAC 173-303-9905 or, if not listed, which cause the waste(s) to be regulated, which are present in the waste to be burned, except that the applicant need not analyze for constituents which would reasonably not be expected to be found in the waste. The constituents excluded from analysis must be identified and the basis for their exclusion stated. The waste analysis must rely on analytical techniques specified in WAC 173-303-110(3), or their equivalent;

(IV) An approximate quantification of the dangerous constituents identified in the waste, within the precision produced by the analytical methods specified in WAC 173-303-110(3); and

(V) A quantification of those dangerous constituents in the waste which may be designated as principal organic dangerous constituents (PODC's) based on data submitted from other trial or operational burns which demonstrate compliance with the performance standards in WAC 173-303-670(4);

(B) A detailed engineering description of the incinerator, including:

(I) Manufacturer's name and model number of incinerator;

(II) Type of incinerator;

(III) Linear dimension of incinerator unit including cross sectional area of combustion chamber;

(IV) Description of auxiliary fuel system (type/feed);
 (V) Capacity of prime mover;
 (VI) Description of automatic waste feed cutoff system(s);

(VII) Stack gas monitoring and pollution control monitoring system;

(VIII) Nozzle and burner design;

(IX) Construction materials; and

(X) Location and description of temperature, pressure, and flow indicating devices and control devices;

(C) A description and analysis of the waste to be burned compared with the waste for which data from operational or trial burns are provided to support the contention that a trial burn is not needed. The data should include those items listed in (f)(iii)(A) of this subsection. This analysis should specify the principal organic dangerous constituents (PODC's) which the applicant has identified in the waste for which a permit is sought, and any differences from the PODC's in the waste for which burn data are provided;

(D) The design and operating conditions of the incinerator unit to be used, compared with that for which comparative burn data are available;

(E) A description of the results submitted from any previously conducted trial burn(s) including:

(I) Sampling and analysis techniques used to calculate performance standards in WAC 173-303-670(4); and

(II) Methods and results of monitoring temperatures, waste feed rates, carbon monoxide, and an appropriate indicator of combustion gas velocity (including a statement concerning the precision and accuracy of this measurement);

(F) The expected incinerator operation information to demonstrate compliance with WAC 173-303-670 (4) and (6), including:

(I) Expected carbon monoxide (CO) level in the stack exhaust gas;

(II) Waste feed rate;

(III) Combustion zone temperature;

(IV) Indication of combustion gas velocity;

(V) Expected stack gas volume, flow rate, and temperature;

(VI) Computed residence time for waste in the combustion zone;

(VII) Expected hydrochloric acid removal efficiency;

(VIII) Expected fugitive emissions and their control procedures; and

(IX) Proposed waste feed cutoff limits based on the identified significant operating parameters;

(G) Such supplemental information as the department finds necessary to achieve the purposes of this subsection;

(H) Waste analysis data, including that submitted in (f)(iii)(A) of this subsection, sufficient to allow the department to specify as permit principal organic dangerous constituents (permit PODC's) those constituents for which destruction and removal efficiencies will be required; and

(I) Test protocols and sampling and analytical data to demonstrate the designation status under WAC 173-303-070 of:

(I) Incinerator ash residues, if any; and

(II) Residues from the air pollution control devices.

(iv) The department shall approve a permit application without a trial burn if the department finds that:

(A) The wastes are sufficiently similar; and

(B) The incinerator units are sufficiently similar, and the data from other trial burns are adequate to specify (under WAC 173-303-670(6)) operating conditions that will ensure that the performance standards in WAC 173-303-670(4) will be met by the incinerator.

(g) Specific Part B information requirements for land treatment facilities. Except as otherwise provided in WAC 173-303-600(3), owners and operators of facilities that use land treatment to dispose of dangerous waste must provide the following additional information:

(i) A description of plans to conduct a treatment demonstration as required under WAC 173-303-655(3). The description must include the following information:

(A) The wastes for which the demonstration will be made and the potential dangerous constituents in the waste;

(B) The data sources to be used to make the demonstration (e.g., literature, laboratory data, field data, or operating data);

(C) Any specific laboratory or field test that will be conducted, including:

(I) The type of test (e.g., column leaching, degradation);

(II) Materials and methods, including analytical procedures;

(III) Expected time for completion; and

(IV) Characteristics of the unit that will be simulated in the demonstration, including treatment zone characteristics, climatic conditions, and operating practices;

(ii) A description of a land treatment program, as required under WAC 173-303-655(2). This information must be submitted with the plans for the treatment demonstration, and updated following the treatment demonstration. The land treatment program must address the following items:

(A) The wastes to be land treated;

(B) Design measures and operating practices necessary to maximize treatment in accordance with WAC 173-303-655 (4)(a) including:

(I) Waste application method and rate;

(II) Measures to control soil pH;

(III) Enhancement of microbial or chemical reactions; and

(IV) Control of moisture content;

(C) Provisions for unsaturated zone monitoring, including:

(I) Sampling equipment, procedures, and frequency;

(II) Procedures for selecting sampling locations;

(III) Analytical procedures;

(IV) Chain of custody control;

(V) Procedures for establishing background values;

(VI) Statistical methods for interpreting results; and

(VII) The justification for any dangerous constituents recommended for selection as principal dangerous constituents, in accordance with the criteria for such selection in WAC 173-303-655 (6)(a);

(D) A list of dangerous constituents reasonably expected to be in, or derived from, the wastes to be land treated based on waste analysis performed pursuant to WAC 173-303-300;

(E) The proposed dimensions of the treatment zone;

(iii) A description of how the unit is or will be designed, constructed, operated, and maintained in order to meet the requirements of WAC 173-303-655(4). This submission must address the following items:

- (A) Control of run-on;
 - (B) Collection and control of run-off;
 - (C) Minimization of run-off of dangerous constituents from the treatment zone;
 - (D) Management of collection and holding facilities associated with run-on and run-off control systems;
 - (E) Periodic inspection of the unit. This information should be included in the inspection plan submitted under (a)(v) of this subsection; and
 - (F) Control of wind dispersal of particulate matter, if applicable;
- (iv) If food-chain crops are to be grown in or on the treatment zone of the land treatment unit, a description of how the demonstration required under WAC 173-303-655(5) will be conducted including:
 - (A) Characteristics of the food-chain crop for which the demonstration will be made;
 - (B) Characteristics of the waste, treatment zone, and waste application method and rate to be used in the demonstration;
 - (C) Procedures for crop growth, sample collection, sample analysis, and data evaluation;
 - (D) Characteristics of the comparison crop including the location and conditions under which it was or will be grown; and
 - (E) If cadmium is present in the land treated waste, a description of how the requirements of WAC 173-303-655(5)(b) will be complied with;
 - (v) A description of the vegetative cover to be applied to closed portions of the facility, and a plan for maintaining such cover during the post-closure care period, as required under WAC 173-303-655(8)(a)(viii) and (c)(ii). This information should be included in the closure plan and, where applicable, the post-closure care plan submitted under (a)(xiii) of this subsection;
 - (vi) If ignitable or reactive wastes will be placed in or on the treatment zone, an explanation of how the requirements of WAC 173-303-655(9) will be complied with; and
 - (vii) If incompatible wastes, or incompatible wastes and materials, will be placed in or on the same treatment zone, an explanation of how WAC 173-303-655(10) will be complied with.
 - (viii) Where applicable, a waste management plan for Dangerous Waste Nos. F020, F021, F022, F023, F026, or F027 describing how a land treatment facility is or will be designed, constructed, operated, and maintained to meet the requirements of WAC 173-303-655(12).
 - (h) Specific Part B information requirements for landfills. Except as otherwise provided in WAC 173-303-600(3), owners and operators of facilities that dispose of dangerous waste in landfills must provide the following additional information:
 - (i) A list of the dangerous wastes placed or to be placed in each landfill or landfill cell;
 - (ii) Detailed plans and an engineering report describing how the landfill is or will be designed, constructed, operated and maintained to comply with the requirements of WAC 173-303-665(2). This submission must address the following items as specified in WAC 173-303-665(2):
 - (A) The liner system and leachate collection and removal system (except for an existing portion of a landfill), including the licensed engineer's certification required by

WAC 173-303-665(2)(a)(i). If an exemption from the requirements for a liner and a leachate collection and removal system is sought, as provided by WAC 173-303-665(2)(b), submit detailed plans and engineering and hydrogeologic reports, as appropriate, describing alternate design and operating practices that will, in conjunction with location aspects, prevent the migration of any dangerous constituent into the ground water or surface water at any future time;

- (B) Control of run-on;
 - (C) Control of run-off;
 - (D) Management of collection and holding facilities associated with run-on and run-off control systems; and
 - (E) Control of wind dispersal of particulate matter, where applicable;
- (iii) If an exemption from WAC 173-303-645 is sought, as provided by WAC 173-303-665(3), the owner or operator must submit detailed plans and an engineering report explaining the location of the saturated zone in relation to the landfill, the design of a double-liner system that incorporates a leak detection system between the liners, and a leachate collection and removal system above the liners;
 - (iv) A description of how each landfill, including the liner and cover systems, will be inspected in order to meet the requirements of WAC 173-303-665(4). This information should be included in the inspection plan submitted under (a)(v) of this subsection;
 - (v) Detailed plans and an engineering report describing the final cover which will be applied to each landfill or landfill cell at closure in accordance with WAC 173-303-665(6)(a), and a description of how each landfill will be maintained and monitored after closure in accordance with WAC 173-303-665(6)(b) and (c). This information should be included in the closure and post-closure plans submitted under (a)(xiii) of this subsection;
 - (vi) If incompatible wastes, or incompatible wastes and materials will be landfilled, an explanation of how WAC 173-303-665(7) will be complied with;
 - (vii) A description of how each landfill will be designed and operated in order to comply with WAC 173-303-140.
 - (i) Specific Part B information requirements for miscellaneous units. Except as otherwise provided in WAC 173-303-680(1), owners and operators of facilities that treat, store, or dispose of dangerous waste in miscellaneous units must provide the following additional information:
 - (i) A detailed description of the unit being used or proposed for use, including the following:
 - (A) Physical characteristics, materials of construction, and dimensions of the unit;
 - (B) Detailed plans and engineering reports describing how the unit will be located, designed, constructed, operated, maintained, monitored, inspected, and closed to comply with the requirements of WAC 173-303-680(2) and (3); and
 - (C) For disposal units, a detailed description of the plans to comply with the postclosure requirements of WAC 173-303-680(4).
 - (ii) Detailed hydrologic, geologic, and meteorologic assessments and land-use maps for the region surrounding the site that address and ensure compliance of the unit with each factor in the environmental performance standards of WAC 173-303-680(2). If the applicant can demonstrate that he does not violate the environmental performance standards

of WAC 173-303-680(2) and the department agrees with such demonstration, preliminary hydrologic, geologic, and meteorologic assessments will suffice.

(iii) Information on the potential pathways of exposure of humans or environmental receptors to dangerous waste or dangerous constituents and on the potential magnitude and nature of such exposures.

(iv) For any treatment unit, a report on a demonstration of the effectiveness of the treatment based on laboratory or field data.

(v) Any additional information determined by the department to be necessary for evaluation of compliance of the unit with the environmental performance standards of WAC 173-303-680(2).

(5) Construction. A person may begin physical construction of a new facility, or of new portions of an existing facility if the new portions would amount to reconstruction under interim status (WAC 173-303-805(7)), only after complying with WAC 173-303-281, submitting Part A and Part B of the permit application and receiving a final facility permit. All permit applications must be submitted at least one hundred eighty days before physical construction is expected to begin.

(6) Reapplications. Any dangerous waste facility with an effective final facility permit shall submit a new application one hundred eighty days prior to the expiration date of the effective permit, unless the department grants a later date provided that such date will never be later than the expiration date of the effective permit.

(7) Continuation of expiring permits.

(a) When the owner/operator submits a timely application for a final facility permit and the application is determined by the department to be complete pursuant to subsection (8) of this section, the facility is allowed to continue operating under the expiring or expired permit until the effective date of the new permit.

(b) When the facility is not in compliance with the conditions of the expiring or expired permit, the department may choose to do any of the following:

(i) Initiate enforcement action based upon the permit which has been continued;

(ii) Issue a notice of intent to deny the new permit. If the permit is denied, the owner or operator would then be required to cease the activities authorized by the continued permit or be subject to enforcement action for operating without a permit;

(iii) Issue a new permit with appropriate conditions; and/or

(iv) Take other actions authorized by this chapter.

(8) Completeness. The department shall not issue a final facility permit before receiving a complete application, except for permits by rule or emergency permits. An application for a permit is complete when the application form and any supplemental information has been submitted to the department's satisfaction. The completeness of any application for a permit shall be judged independently of the status of any other permit application or permit for the same facility or activity. The department may deny a permit for the active life of a dangerous waste management facility or unit before receiving a complete application for a permit.

(9) Recordkeeping. Applicants shall keep records of all data used to complete the permit applications, and any

supplemental information submitted to the department for a period of at least three years from the date the application is signed.

(10) General permit conditions. All final facility permits shall contain general permit conditions described in WAC 173-303-810.

(11) Permit duration.

(a) Final facility permits shall be effective for a fixed term not to exceed ten years.

(b) The department may issue any final facility permit for a duration that is less than the full allowable term.

(c) The term of a final facility permit shall not be extended beyond ten years, unless otherwise authorized under subsection (7) of this section.

(d) Each permit for a land disposal facility may be reviewed by the department five years after the date of permit issuance or reissuance and shall be modified as necessary, as provided in WAC 173-303-830.

(12) Grounds for termination. The following are causes for terminating a final facility permit during its term:

(a) Noncompliance by the permittee with any condition of the permit;

(b) The permittee's failure in the application or during the permit issuance process to disclose fully all relevant facts, or the permittee's misrepresentation of any relevant facts at any time; or

(c) A determination that the permitted activity endangers public health or the environment and the hazard can only be controlled by permit modification or termination.

(13) Grounds for denial. A permit application shall be denied if it is determined that the proposed location and/or activity endangers public health and the environment as demonstrated by the permit applicant's failure to satisfy the performance standards of WAC 173-303-283.

(14) Permit changes. All final facility permits shall be subject to the requirements of permit changes, WAC 173-303-830.

(15) Procedures for decision making. Issuance of final facility permits will be subject to the procedures for decision making described in WAC 173-303-840.

(16) Other requirements for final special waste and recycling facility permits. In lieu of issuing a final special waste or recycling facility permit, the department may, after providing opportunity for public comment in accordance with WAC 173-303-840, defer to a permit already issued under other statutory authority administered by the department (such as the State Water Pollution Control Act, chapter 90.48 RCW, the State Clean Air Act, chapter 70.94 RCW, etc.) which incorporates the requirements of this section, and WAC 173-303-500 through 173-303-525 for recycling facilities or WAC 173-303-550 through 173-303-560 for special waste facilities.

Reviser's note: The spelling error in the above section occurred in the copy filed by the agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending Order 90-42, filed 3/7/91, effective 4/7/91)

WAC 173-303-807 Trial burns for dangerous waste incinerator final facility permits. (1) Purpose and applicability. For purposes of determining operational readiness

and establishing conditions in final facility permits for dangerous waste incinerators, the department may approve trial burns. Trial burns shall not exceed seven hundred twenty hours operating time, except that the department may extend the duration of this operational period once, up to seven hundred twenty additional hours, at the request of the owner/operator of the incinerator when good cause is shown. The permit may be modified to reflect the extension according to WAC 173-303-830(4). The procedures for requesting and approving trial burns are described in:

(a) Subsection (10) of this section for existing incinerators with interim status permits; and

(b) Subsection (11) of this section for new incinerators and for incinerators with final facility permits in which the owner/operator wishes to burn new wastes not currently included in the permit.

(2) Trial burn plan. The trial burn must be conducted in accordance with a trial burn plan prepared by the applicant and approved by the department. The trial burn plan will then become a condition of the permit and will include the following information:

(a) An analysis of each waste or mixture of waste to be burned which includes:

(i) Heating value of the waste in the form and composition in which it will be burned;

(ii) Viscosity (if applicable), or description of physical form of the waste, and specific gravity of the waste;

(iii) An analysis identifying any dangerous organic constituents listed in WAC 173-303-9905, and any other dangerous constituents which, although not listed, caused the waste to be regulated as a dangerous waste, which are reasonably expected to be present in the waste to be burned. The constituents excluded from analysis must be identified and the basis for their exclusion stated. The waste analysis must rely on analytical techniques specified or referenced in WAC 173-303-110, or their equivalent;

(iv) An approximate quantification of the dangerous constituents identified in the waste, within the precision produced by the analytical methods specified or referenced in WAC 173-303-110; and

(v) A quantification of those dangerous constituents in the waste which may be designated as principal organic dangerous constituents (PODC) based on data submitted from other trial or operational burns which demonstrate compliance with the performance standard in WAC 173-303-670(4);

(b) A detailed engineering description of the incinerator for which the trial burn permit is sought including:

(i) Manufacturer's name and model number of incinerator (if available);

(ii) Type of incinerator;

(iii) Linear dimensions of the incinerator unit including the cross sectional area of the combustion chamber;

(iv) Description of the auxiliary fuel system (type/feed);

(v) Capacity of the prime air mover;

(vi) Description of automatic waste feed cutoff system(s);

(vii) Stack gas monitoring and pollution control equipment;

(viii) Nozzle and burner design;

(ix) Construction materials; and

(x) Location and description of temperature, pressure, and flow indicating and control devices;

(c) A detailed description of sampling and monitoring procedures, including sampling and monitoring locations in the system, the equipment to be used, sampling and monitoring frequency, and planned analytical procedures for sample analysis;

(d) A detailed test schedule for each waste for which the trial burn is planned including date(s), duration, quantity of waste to be burned, and other factors relevant to the department's decision under subsection (5) of this section;

(e) A detailed test protocol, including, for each waste identified, the ranges of temperature, waste feed rate, air feed rate, use of auxiliary fuel, and other relevant parameters that will be varied to affect the destruction and removal efficiency of the incinerator;

(f) A description of, and planned operating conditions for, any emission control equipment which will be used;

(g) Procedures for rapidly stopping waste feed, shutting down the incinerator, and controlling emissions in the event of an equipment malfunction;

(h) A detailed test protocol to sample and analyze the following for designation under WAC 173-303-070:

(i) Any incinerator ash residue collected in the incinerator; and

(ii) Any residues collected in the air pollution control devices; and

(i) Such other information as the department reasonably finds necessary to determine whether to approve the trial burn plan in light of the purposes of this section.

(3) Additional information required. The department, in reviewing the trial burn plan, shall evaluate the adequacy of the information provided and may require the applicant to supplement this information, if necessary, to achieve the purposes of this section.

(4) Trial PODCs. Based on the waste analysis data in the trial burn plan, the department will specify as trial principal organic dangerous constituents (trial PODCs) those constituents for which destruction and removal efficiencies must be calculated during the trial burn. These trial PODCs will be specified by the department based on its estimate of the difficulty of incineration of the constituents identified in the waste analysis, the concentration or mass in the waste feed, and the dangerous waste constituent or constituents identified in WAC 173-303-9905, or identified as causing the waste to be regulated as a dangerous waste.

(5) Approval of the plan. The department shall approve a trial burn plan if it finds that:

(a) The trial burn is likely to determine whether the incinerator performance standard required by WAC 173-303-670(4) can be met;

(b) The trial burn itself will not present an imminent hazard to public health or the environment;

(c) The trial burn will help the department to determine operating requirements to be specified under WAC 173-303-670(6); and

(d) The information sought in (a), (b), and (c) of this subsection cannot reasonably be developed through other means.

(6) Trial burns. During each approved trial burn (or as soon after the burn as is practicable), the applicant must make the following determinations:

(a) A quantitative analysis of the trial PODCs in the waste feed to the incinerator;

(b) A quantitative analysis of the exhaust gas for the concentration and mass emissions of the trial PODCs, O₂, hydrogen chloride (HCl), carbon monoxide (CO) and dangerous combustion byproducts, including the total mass emission rate of byproducts as a percent of the total mass feed rate of PODCs fed to the incinerator;

(c) A quantitative analysis of the scrubber water (if any), ash residues, and other residues, for the purpose of estimating the fate of the trial PODCs and whether they are designated according to WAC 173-303-070;

(d) A total mass balance of the trial PODCs in the waste;

(e) A computation of destruction and removal efficiency (DRE), in accordance with the DRE formula specified in WAC 173-303-670 (4)(a);

(f) If the HCl emission rate exceeds 1.8 kilograms of HCl [HCl] per hour (4 pounds per hour), a computation of HCl [HCl] removal efficiency in accordance with WAC 173-303-670 (4)(c)(i);

(g) A computation of particulate emissions, in accordance with WAC 173-303-670 (4)(c)(ii);

(h) An identification of sources of fugitive emissions and their means of control;

(i) A measurement of average, maximum, and minimum temperatures, and combustion gas velocity;

(j) A continuous measurement of carbon monoxide in the exhaust gas;

(k) An identification of any existing air emission standards where a state or local air pollution control authority has established emission standards and such standards are applicable to the incinerator; and

(l) Such other information as the department may specify as necessary to ensure that the trial burn will determine compliance with the performance standard of WAC 173-303-670(4), and to establish the operating conditions required by WAC 173-303-670(6).

(7) Certification. The applicant shall submit to the department a certification that the trial burn has been carried out in accordance with the approved trial burn plan, and must submit the results of all determinations required by subsection (6) of this section. This submission shall be made within thirty days of the completion of the trial burn, or later if approved by the department.

(8) Submission of data. All data collected during any trial burn must be submitted to the department following the completion of the trial burn.

(9) Signatures required. All submissions required under this section shall be certified on behalf of the applicant by the signature of a person authorized to sign a permit application under WAC 173-303-810(12).

(10) Existing incinerators with interim status permits.

(a) The owner/operator of an existing incinerator currently operating under an interim status permit may, when required by the department (or when he chooses) to apply for a final facility permit, request the department to approve of a trial burn. The trial burn may be requested for the purposes of determining feasibility of compliance with the performance standards of WAC 173-303-670(4) and the operating conditions of WAC 173-303-670(6). If a trial burn is requested, the owner/operator shall prepare and submit a

trial burn plan and, upon approval by the department, perform a trial burn in accordance with subsections (2) through (9) of this section.

(b) If the department approves the trial burn, it shall issue a notice of interim status modification granting such approval and specifying the conditions applicable to the trial burn. The notice of modification shall be a condition of the interim status permit. Note: The national emission standards for hazardous air pollutants may require review for a notice of construction. Owners and operators should consult chapter 173-400 WAC or local air pollution control agency regulations for applicability.

(c) If the trial burn is approved before submitting a final facility permit application, the owner/operator shall complete the trial burn and submit the information described in subsection (6) of this section, with Part B of the permit application. If completion of this process conflicts with the date set for submission of Part B of the final facility permit application, the owner/operator must contact the department to extend the date for submitting the Part B or the trial burn results. If the applicant submits a trial burn plan with Part B of the final facility permit application, the department will specify in the notice of interim status modification issued under (b) of this subsection, a time period for conducting the trial burn and submitting the results. Trial burn results must be submitted prior to the issuance of the permit.

(11) New incinerators and new wastes.

(a)(i) The owner/operator of a new incinerator may submit with Part B of a final facility permit application a request for approval of a trial burn. This request shall include a statement of why the trial burn is desirable, and a trial burn plan prepared in accordance with subsection (2) of this section.

(ii) The department shall proceed to issue a final facility permit in accordance with WAC 173-303-806. The permit shall include the trial burn plan, and shall establish operating conditions for the trial burn including but not limited to those described in WAC 173-303-670(6). The time period for conducting the trial burn and submitting the results shall also be specified in the permit.

(iii) After the trial burn has been completed and the results submitted to the department, the final facility permit shall be modified in accordance with WAC 173-303-830(4) to establish the final operating requirements and performance standards for the incinerator.

(b) The owner/operator of an incinerator with a final facility permit who wishes to burn new wastes not currently included in his permit may request approval of a trial burn for the new wastes. The request and approval shall be handled in the same way as described in (a) of this subsection, except that in lieu of issuing an entirely new final facility permit the department will modify the existing final facility permit in accordance with WAC 173-303-830.

AMENDATORY SECTION (Amending Order 90-42, filed 3/7/91, effective 4/7/91)

WAC 173-303-810 General permit conditions. (1) Purpose and applicability. This section sets forth the general permit conditions that are applicable to all permits, except interim status permits and permits by rule, to assure compliance with this chapter. If the conditions of this section are

incorporated in a permit by reference, a specific citation to this section must be given in the permit.

(2) Duty to comply. The permittee must comply with all conditions of his permit. Any permit noncompliance constitutes a violation and is grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or for denial of a permit renewal application. The permittee need not comply with the conditions of his permit to the extent and for the duration such noncompliance is authorized in an emergency permit.

(3) Duty to reapply. If the permittee wishes to continue an activity regulated by the permit after its expiration date, the permittee must apply for and obtain a new permit.

(4) Duty to halt or reduce activity. A permittee who has not complied with his permit, and who subsequently is subject to enforcement actions, may not argue that it would have been necessary to halt or reduce the permitted activities in order to maintain compliance with the conditions of the permit.

(5) Duty to mitigate. The permittee shall take all steps required by the department to minimize or correct any adverse impact on the environment resulting from noncompliance with the permit.

(6) Proper operation and maintenance. The permittee shall at all times properly operate and maintain all facilities and systems of treatment and control which are installed or used by the permittee to achieve compliance with the conditions of the permit. Proper operation and maintenance includes effective performance, adequate funding, adequate operator staffing and training, and adequate laboratory and process controls, including appropriate quality assurance procedures. This provision requires the operation of back-up or auxiliary facilities or similar systems only when necessary to achieve compliance with the conditions of the permit.

(7) Permit actions. The permit may be modified, revoked and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, termination, notification of planned changes, or anticipated noncompliance, does not stay any permit condition.

(8) Effect of a permit. Compliance with a final facility permit during its term constitutes compliance for the purpose of enforcement with chapter 173-303 WAC except for permit modifications and those requirements not included in the permit which become effective by statute, or which are promulgated under 40 CFR Part 268 restricting the placement of dangerous waste in or on the land. The issuance of a permit does not convey any property rights of any sort, or any exclusive privilege. The issuance of a permit does not authorize any injury to persons or property or invasion of other private rights, or any infringement of state or local laws or regulations.

(9) Duty to provide information. The permittee shall furnish to the department, within a reasonable time, any information which it may request to determine whether cause exists for modifying, revoking and reissuing, or terminating a permit, or to determine compliance with a permit. The permittee shall also furnish to the department, upon request, copies of records required to be kept by the permit.

(10) Inspection and entry. The permittee shall allow representatives of the department, upon the presentation of proper credentials, to:

(a) Enter upon the permittee's premises where a regulated facility or activity is located or conducted, or where records must be kept under the conditions of the permit;

(b) Have access to and copy, at reasonable times, any records that must be kept under the conditions of the permit;

(c) Inspect at reasonable times any facilities, equipment (including monitoring and control equipment), practices, or operations regulated or required under the permit; and

(d) Sample or monitor at reasonable times, for the purposes of assuring permit compliance or as otherwise authorized by chapter 173-303 WAC, any substances or parameters at any location.

(11) Monitoring and monitoring records.

(a) All permits shall specify:

(i) Requirements concerning the proper use, maintenance, and installation, when appropriate, of monitoring equipment or methods; and

(ii) Required monitoring including type, intervals, and frequency sufficient to yield data which are representative of the monitored activity including, when appropriate, continuous monitoring.

(b) Samples and measurements taken for the purpose of monitoring shall be representative of the monitored activity.

(c) The permittee shall retain records of all monitoring information, including all calibration and maintenance records and all original strip chart recordings for continuous monitoring instrumentation, copies of all reports required by this permit, and records of all data used to complete the application for this permit, for a period of at least three years from the date of the sample, measurement, report, or application. This period may be extended by request of the department at any time.

(d) Records of monitoring information shall include:

(i) The date, exact place, and time of sampling or measurements;

(ii) The individual(s) who performed the sampling or measurements;

(iii) The date(s) analyses were performed;

(iv) The individual(s) who performed the analyses;

(v) The analytical techniques or methods used; and

(vi) The results of such analyses.

(e) The permittee shall maintain all records of ground water quality and ground water surface elevations for the active life of the facility, and for the post-closure period as well.

(12) Signatory requirement. All applications, reports, or information submitted to the department shall be signed in accordance with this subsection and shall be certified according to subsection (13) of this section.

(a) Applications. When a dangerous waste facility is owned by one person, but is operated by another person, then the operator shall be the permit applicant and responsible for developing the permit application and all accompanying materials, except that the owner must also sign and certify the permit application. Permit applications shall be signed as follows:

(i) For a corporation: By a responsible corporate officer. For the purposes of this subsection, a responsible corporate officer means:

(A) A president, secretary, treasurer, or vice president of the corporation in charge of a principal business function,

or any other person who performs similar policy or decision-making functions for the corporation; or

(B) The manager of one or more manufacturing, production or operating facilities employing more than two hundred fifty persons or having gross annual sales or expenditures exceeding twenty-five million dollars (in second-quarter 1980 dollars), if authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures;

(ii) For a partnership or sole proprietorship: By a general partner or the proprietor, respectively; or

(iii) For a municipality, state, federal, or other public agency: By either a principal executive officer or ranking elected official. For purposes of this subsection, a principal executive officer of a federal agency includes:

(A) The chief executive officer of the agency; or

(B) A senior executive officer having responsibility for the overall operations of a principal geographic unit of the agency.

(b) Reports. All reports required by permits and other information requested by the department shall be signed by a person described in (a) of this subsection, or by a duly authorized representative of that person. A person is a duly authorized representative only if:

(i) The authorization is made in writing by a person described in (a) of this subsection;

(ii) The authorization specifies either an individual or a position having responsibility for overall operation of the regulated facility or activity such as the position of plant manager, operator of a well or a well field, superintendent, or position of equivalent responsibility. (A duly authorized representative may thus be either a named individual or any individual occupying a named position); and

(iii) The written authorization is submitted to the department.

(c) Changes to authorization. If an authorization under (b) of this subsection is no longer accurate because a different individual or position has responsibility for the overall operation of the facility, a new authorization satisfying the requirements of (b) of this subsection must be submitted to the department prior to or together with any reports, information, or applications to be signed by an authorized representative.

(13) Certification.

(a) Except as provided in (b) of this subsection, any person signing the documents required under (a) or (b) of subsection (12) of this section shall make the following certification:

"I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

(b) When a dangerous waste facility is owned by one person, but is operated by another person, then the permit application must be certified as follows:

(i) The operator must make the certification described under (a) of this subsection; and

(ii) The owner must make the following certification:

"I certify under penalty of law that I own the real property described in, and am aware of the contents of, this permit application, and that I have received a copy of this application. As owner of the real property, I understand that I am responsible for complying with any requirements of chapter 173-303 WAC with which only I am able to comply, and that there are significant penalties for failure to comply with such requirements."

(14) Reporting. The following reports shall be provided:

(a) Planned changes. The permittee shall give notice to the department as soon as possible of any planned physical alterations or additions to the permitted facility. For a new TSD facility and for a facility being modified, the permittee may not treat, store, or dispose of dangerous waste in the new or modified portion of the facility until:

(i) The permittee has submitted to the department by certified mail or hand delivery a letter signed by the permittee and a registered professional engineer stating that the facility has been constructed or modified in compliance with the permit;

(Note: In certifying construction or modification, the independent qualified registered professional engineer is responsible only for certifying those portions of the facility which are identified in chapter 173-303 WAC as specifically requiring certification by an independent registered professional engineer.) and either

(ii) The department has inspected the modified or newly constructed facility and finds it is in compliance with the conditions of the permit; or

(iii) Within fifteen days of the date of submission of the letter, the permittee has not received notice from the department of its intent to inspect, prior inspection is waived and the permittee may commence treatment, storage, or disposal of dangerous waste.

(b) Anticipated noncompliance. The permittee shall give advance notice to the department of any planned changes in the permitted facility or activity which may result in noncompliance with permit requirements. For a new facility, the permittee may not treat, store, or dispose of dangerous waste; and for a facility being modified, the permittee may not treat, store, or dispose of dangerous waste in the modified portion of the facility except as provided in WAC 173-303-830(4).

(c) Transfers. The permit is not transferable to any person except after notice to the department. The department may require modification or revocation and reissuance of the permit to change the name of the permittee and incorporate such other requirements as may be necessary.

(d) Monitoring reports. Monitoring results (including monitoring of the facility's impacts as required by the applicable sections of this chapter) shall be reported at the intervals specified elsewhere in the permit.

(e) Compliance schedules. Reports of permit compliance or noncompliance or any progress reports on interim and final permit requirements contained in any compliance schedule shall be submitted no later than fourteen days following each scheduled date.

(f) Immediate reporting. The permittee shall immediately report any noncompliance which may endanger health or

the environment. Information shall be provided orally to the department as soon as the permittee becomes aware of the circumstances. A written submission shall also be provided within five days of the time the permittee becomes aware of the circumstances provided that the department may waive the written submission requirement in favor of a written report, to be submitted within fifteen days. The written submission shall contain a description of the noncompliance and its cause; the period of noncompliance, including exact dates and times, and if the noncompliance has not been corrected, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent reoccurrence of the noncompliance.

Information which must be reported immediately shall include:

(i) Release of dangerous waste that may cause an endangerment to drinking water supplies or ground or surface waters;

(ii) Any information of a release or discharge of dangerous waste, fire, or explosion from the permitted facility which could threaten the environment or human health outside the facility;

(iii) The following description of any such occurrence:

(A) Name, address, and telephone number of the owner or operator;

(B) Name, address, and telephone number of the facility;

(C) Date, time, and type of incident;

(D) Name and quantity of material(s) involved;

(E) The extent of injuries, if any;

(F) An assessment of actual or potential hazards to the environment and human health outside the facility, where this is applicable; and

(G) Estimated quantity and disposition of recovered material that resulted from the incident.

(g) Other noncompliance. The permittee shall report all instances of noncompliance not reported under (d), (e), and (f) of this subsection, at the time monitoring reports are submitted. The reports shall contain the information listed in (f) of this subsection.

(h) Other information. Where the permittee becomes aware that he failed to submit any relevant facts in a permit application, or submitted incorrect information in a permit application or in any report to the department, he shall promptly submit this information.

(i) Other reports. In addition, the following reports are required when appropriate:

(i) Manifest discrepancy report as required by WAC 173-303-370(~~(5)~~) (4);

(ii) Unmanifested waste report as required by WAC 173-303-390(1); and

(iii) Annual report as required by WAC 173-303-390(2).

(15) Confidentiality.

(a) Information submitted by the owner/operator of a facility identified as confidential will be treated in accordance with chapter 42.17 RCW and RCW 43.21A.160.

(b) Proprietary information can be held confidential if the owner/operator indicates to the department the degree of harm if the information is made to the public.

(c) Claims of confidentiality for permit application information must be substantiated at the time the application is submitted and in the manner prescribed in the application

instructions. Claims of confidentiality for the name and address of any permit applicant will be denied.

(d) If a submitter does not provide substantiation, the department will notify the owner/operator by certified mail of the requirement to do so. If the department does not receive the substantiation within ten days after the submitter receives the notice, the department shall place the unsubstantiated information in the public file.

(e) The department will determine if the owner/operator's request meets the confidential information criteria.

AMENDATORY SECTION (Amending Order 90-42, filed 3/7/91, effective 4/7/91)

WAC 173-303-830 Permit changes. (1) Purpose and applicability. This section describes the types of permit changes that may be made to all permits issued by the department. This section does not apply to permits by rule or interim status permits.

(2) Transfer of permits.

(a) A permit may be transferred by the permittee to a new owner or operator only if the permit has been modified or revoked and reissued (under (b) of this subsection or subsection (3) of this section) to identify the new permittee and incorporate such other requirements as may be necessary under the appropriate act.

(b) Changes in the ownership or operational control of a facility may be made as a Class 1 modification with prior written approval of the department in accordance with subsection (4) of this section. The new owner or operator must submit a revised permit application no later than ninety days prior to the scheduled change. A written agreement containing a specific date for transfer of permit responsibility between the current and new permittees must also be submitted to the department. When a transfer of ownership or operational control occurs, the old owner or operator shall comply with the requirements of WAC 173-303-620 (Financial requirements) until the new owner or operator has demonstrated that he or she is complying with the financial requirements. The new owner or operator must demonstrate compliance with the financial requirements within six months of the date of the change of ownership or operational control of the facility. Upon demonstration to the department by the new owner or operator of compliance with the financial requirements, the department shall notify the old owner or operator that he or she no longer needs to comply with the financial requirements as of the date of demonstration.

(3) Modification or revocation and reissuance of permits. When the department receives any information (for example, inspects the facility, receives information submitted by the permittee as required in the permit, receives a request for revocation and reissuance, or conducts a review of the permit file), the department may determine whether or not one or more of the causes listed in (a) and (b) of this subsection for modification or revocation and reissuance or both exist. If cause exists, the department may modify or revoke and reissue the permit accordingly, subject to the limitations of (c) of this subsection, and may request an updated application if necessary. When a permit is modified, only the conditions subject to modification are reopened. If a permit is revoked and reissued, the entire

permit is reopened and subject to revision and the permit is reissued for a new term. If cause does not exist under this subsection, the department shall not modify or revoke and reissue the permit, except on request of the permittee. If a permit modification is requested by the permittee, the department shall approve or deny the request according to the procedures of subsection (4) of this section. Otherwise, a draft permit must be prepared and public review provided in accordance with WAC 173-303-840.

(a) Causes for modification. The following are causes for modification but not revocation and reissuance of permits, unless agreed to or requested by the permittee:

(i) Alterations. There are material and substantial alterations or additions to the permitted facility or activity which occurred after permit issuance which justify the application of permit conditions that are different or absent in the existing permit;

(ii) Information. Permits may be modified during their terms if the department receives information that was not available at the time of permit issuance and which would have justified the application of different permit conditions at the time of issuance;

(iii) New statutory requirements or regulations. The standards or regulations on which the permit was based have been changed by statute, through promulgation of new or amended standards or regulations or by judicial decision after the permit was issued. Permits may be modified during their terms for this cause (~~only when~~) as follows:

(A) The department may modify the permit when the standards or regulations on which the permit was based have been changed by statute or amended standards or regulations.

(B) Permittee may request modification when:

(I) The permit condition requested to be modified was based on an effective regulation; and

~~((B))~~ (II) The department has revised, withdrawn, or modified that portion of the regulation on which the permit condition was based; and either

~~((A))~~ a. The department decides to modify the permit because there would be a potential threat to public health or the environment if the permit does not incorporate the requirements of the amended regulation; or

~~((H))~~ b. A permittee requests modification within ninety days after the date the regulation amendments are adopted;

(iv) Compliance schedules. The department determines good cause exists for modification of a compliance schedule, such as an act of God, strike, flood, or materials shortage, or other events over which the permittee has little or no control and for which there is no reasonably available remedy;

(v) Closure plans or postclosure. When modification of a closure or postclosure plan is required under WAC 173-303-610 (3) or (8);

(vi) Revocation of changes approved prior to notice of closure. After the department receives the notification of expected closure under WAC 173-303-610(3), the department may determine that previously approved changes are no longer warranted. These include:

(A) Extension of the ninety or one hundred eighty day periods under WAC 173-303-610(4);

(B) Modification of the thirty year postclosure period under WAC 173-303-610(7);

(C) Continuation of security requirements under WAC 173-303-610(7); or

(D) Permission to disturb the integrity of the containment system under WAC 173-303-610(7);

(vii) When the permittee has filed a request under WAC 173-303-620 for a variance to the level of financial responsibility or when the department demonstrates under WAC 173-303-620 that an upward adjustment of the level of financial responsibility is required;

(viii) When the corrective action program specified in the permit under WAC 173-303-645 has not brought the regulated unit into compliance with the ground water protection standard within a reasonable period of time;

(ix) To include a detection monitoring program meeting the requirements of WAC 173-303-645, when the owner or operator has been conducting a compliance monitoring program under WAC 173-303-645 or a corrective action program under WAC 173-303-645 and compliance period ends before the end of the postclosure care period for the unit;

(x) When a permit requires a compliance monitoring program under WAC 173-303-645, but monitoring data collected prior to permit issuance indicate that the facility is exceeding the ground water protection standard;

(xi) To include conditions applicable to units at a facility that were not previously included in the facility's permit; or

(xii) When a land treatment unit is not achieving complete treatment of dangerous constituents under its current permit conditions.

(b) Causes for modification or revocation and reissuance. The following are causes to modify, or alternatively, revoke and reissue a permit:

(i) Cause exists for termination under WAC 173-303-806(12) for final facility permits, and the department determines that modification or revocation and reissuance is appropriate; or

(ii) The department has received notification of a proposed transfer of the permit.

(c) Facility siting. Suitability of the facility location will not be considered at the time of permit modification or revocation and reissuance unless new information or standards indicate that a threat to human health or the environment exists which was unknown at the time of permit issuance.

(4) Permit modification at the request of the permittee.

(a) Class 1 modifications.

(i) Except as provided in (a)(ii) of this subsection, the permittee may put into effect Class 1 modifications listed in Appendix I of this section under the following conditions:

(A) The permittee must notify the department concerning the modification by certified mail or other means that establish proof of delivery within seven calendar days after the change is put into effect. This notice must specify the changes being made to permit conditions or supporting documents referenced by the permit and must explain why they are necessary. Along with the notice, the permittee must provide the applicable information required by WAC 173-303-806(~~((4))~~), 173-303-807, and 173-303-808.

(B) The permittee must send a notice of the modification to all persons on the facility mailing list, maintained by the department in accordance with WAC 173-303-840

(3)(e)(i)(D), and the appropriate units of state and local government, as specified in WAC 173-303-840 (3)(e)(i)(E). This notification must be made within ninety calendar days after the change is put into effect. For the Class 1 modifications that require prior department approval, the notification must be made within ninety calendar days after the department approves the request.

(C) Any person may request the department to review, and the department may for cause reject, any Class 1 modification. The department must inform the permittee by certified mail that a Class 1 modification has been rejected, explaining the reasons for the rejection. If a Class 1 modification has been rejected, the permittee must comply with the original permit conditions.

(ii) Class 1 permit modifications identified in Appendix I by an asterisk may be made only with the prior written approval of the department.

(iii) For a Class 1 permit modification, the permittee may elect to follow the procedures in (b) of this subsection for Class 2 modifications instead of the Class 1 procedures. The permittee must inform the department of this decision in the notice required in (b)(i) of this subsection.

(b) Class 2 modifications.

(i) For Class 2 modifications, listed in Appendix I of this section, the permittee must submit a modification request to the department that:

(A) Describes the exact change to be made to the permit conditions and supporting documents referenced by the permit;

(B) Identifies that the modification is a Class 2 modification;

(C) Explains why the modification is needed; and

(D) Provides the applicable information required by WAC 173-303-806((4)), 173-303-807, and 173-303-808.

(ii) The permittee must send a notice of the modification request to all persons on the facility mailing list maintained by the department and to the appropriate units of state and local government as specified in WAC 173-303-840 (3)(e)(i)((E)) (D) and must publish this notice in a major local newspaper of general circulation. This notice must be mailed and published within seven days before or after the date of submission of the modification request, and the permittee must provide to the department evidence of the mailing and publication. The notice must include:

(A) Announcement of a sixty-day comment period, in accordance with (b)(v) of this subsection, and the name and address of a departmental contact to whom comments must be sent;

(B) Announcement of the date, time, and place for a public meeting held in accordance with (b)(iv) of this subsection;

(C) Name and telephone number of the permittee's contact person;

(D) Name and telephone number of a departmental contact person;

(E) Location where copies of the modification request and any supporting documents can be viewed and copied; and

(F) The following statement: "The permittee's compliance history during the life of the permit being modified is available from the department of ecology contact person."

(iii) The permittee must place a copy of the permit modification request and supporting documents in a location accessible to the public in the vicinity of the permitted facility.

(iv) The permittee must hold a public meeting no earlier than fifteen days after the publication of the notice required in (b)(ii) of this subsection and no later than fifteen days before the close of the sixty-day comment period. The meeting must be held to the extent practicable in the vicinity of the permitted facility.

(v) The public shall be provided sixty days to comment on the modification request. The comment period will begin on the date the permittee publishes the notice in the local newspaper. Comments should be submitted to the department of ecology contact identified in the public notice.

(vi)(A) No later than ninety days after receipt of the notification request, the department must:

(I) Approve the modification request, with or without changes, and modify the permit accordingly;

(II) Deny the request;

(III) Determine that the modification request must follow the procedures in (c) of this subsection for Class 3 modifications for the following reasons:

(AA) There is significant public concern about the proposed modification; or

(BB) The complex nature of the change requires the more extensive procedures of Class 3;

(IV) Approve the request, with or without changes, as a temporary authorization having a term of up to one hundred eighty days; or

(V) Notify the permittee that he or she will decide on the request within the next thirty days.

(B) If the department notifies the permittee of a thirty-day extension for a decision, the department must, no later than one hundred twenty days after receipt of the modification request:

(I) Approve the modification request, with or without changes, and modify the permit accordingly;

(II) Deny the request; or

(III) Determine that the modification request must follow the procedures in (c) of this subsection for Class 3 modifications for the following reasons:

(AA) There is significant public concern about the proposed modification; or

(BB) The complex nature of the change requires the more extensive procedures of Class 3.

(IV) Approve the request, with or without changes, as a temporary authorization having a term of up to one hundred eighty days.

(C) If the department fails to make one of the decisions specified in (b)(vi)(B) of this subsection by the one hundred twentieth day after receipt of the modification request, the permittee is automatically authorized to conduct the activities described in the modification request for up to one hundred eighty days, without formal departmental action. The authorized activities must be conducted as described in the permit modification request and must be in compliance with all appropriate standards of 40 CFR Part 265 (as referenced by WAC 173-303-400). If the department approves, with or without changes, or denies the modification request during the term of the temporary or automatic authorization provid-

ed for in (b)(vi)(A), (B); or (C) of this subsection, such action cancels the temporary or automatic authorization.

(D)(I) In the case of an automatic authorization under (b)(vi)(C) of this subsection, or a temporary authorization under (b)(vi)(A)(IV) or (B)(IV) of this subsection, if the department has not made a final approval or denial of the modification request by the date fifty days prior to the end of the temporary or automatic authorization, the permittee must within seven days of that time send a notification to persons on the facility mailing list, and make a reasonable effort to notify other persons who submitted written comments on the modification request, that:

(AA) The permittee has been authorized temporarily to conduct the activities described in the permit modification request; and

(BB) Unless the department acts to give final approval or denial of the request by the end of the authorization period, the permittee will receive authorization to conduct such activities for the life of the permit.

(II) If the owner/operator fails to notify the public by the date specified in (b)(vi)(D)(I) of this subsection, the effective date of the permanent authorization will be deferred until fifty days after the owner/operator notifies the public.

(E) Except as provided in (b)(vi)(G) of this subsection, if the department does not finally approve or deny a modification request before the end of the automatic or temporary authorization period or reclassify the modification as a Class 3, the permittee is authorized to conduct the activities described in the permit modification request for the life of the permit unless modified later under subsection (3) or (4) of this section. The activities authorized under this subsection (b)(vi)(E) must be conducted as described in the permit modification request and must be in compliance with all appropriate standards of 40 CFR Part 265 (as referenced by WAC 173-303-400).

(F) In making a decision to approve or deny a modification request, including a decision to issue a temporary authorization or to reclassify a modification as a Class 3, the department must consider all written comments submitted during the public comment period and must respond in writing to all significant comments in his or her decision.

(G) With the written consent of the permittee, the department may extend indefinitely or for a specified period the time periods for final approval or denial of a modification request or for reclassifying a modification as a Class 3.

(vii) The department may deny or change the terms of a Class 2 permit modification request under (b)(6)(i) through (iii) of this subsection for the following reasons:

(A) The modification request is incomplete;

(B) The requested modification does not comply with the appropriate requirements of WAC (~~173-303-283~~) 173-303-280 through 173-303-395 and 173-303-600 through 173-303-680 or other applicable requirements; or

(C) The conditions of the modification fail to protect human health and the environment.

(viii) The permittee may perform any construction associated with a Class 2 permit modification request beginning sixty days after the submission of the request unless the department establishes a later date for commencing construction and informs the permittee in writing before day sixty.

(c) Class 3 modifications.

(i) For Class 3 modifications listed in Appendix I of this section, the permittee must submit a modification request to the department that:

(A) Describes the exact change to be made to the permit conditions and supporting documents referenced by the permit;

(B) Identifies that the modification is a Class 3 modification;

(C) Explains why the modification is needed; and

(D) Provides the applicable information required by WAC 173-303-806(~~((4))~~), 173-303-807, and 173-303-808.

(ii) The permittee must send a notice of the modification request to all persons on the facility mailing list maintained by the department and to the appropriate units of state and local government as specified in WAC 173-303-840 (3)(e)(i)(~~((E))~~) (D) and must publish this notice in a major local newspaper of general circulation. This notice must be mailed and published within seven days before or after the date of submission of the modification request, and the permittee must provide to the department evidence of the mailing and publication. The notice must include:

(A) Announcement of a sixty-day comment period, and a name and address of an agency contact to whom comments must be sent;

(B) Announcement of the date, time, and place for a public meeting on the modification request, in accordance with (c)(4) of this subsection;

(C) Name and telephone number of the permittee's contact person;

(D) Name and telephone number of a departmental contact person;

(E) Location where copies of the modification request and any supporting documents can be viewed and copied; and

(F) The following statement: "The permittee's compliance history during the life of the permit being modified is available from the department of ecology contact person."

(iii) The permittee must place a copy of the permit modification request and supporting documents in a location accessible to the public in the vicinity of the permitted facility.

(iv) The permittee must hold a public meeting no earlier than fifteen days after the publication of the notice required in (c)(ii) of this subsection and no later than fifteen days before the close of the sixty-day comment period. The meeting must be held to the extent practicable in the vicinity of the permitted facility.

(v) The public shall be provided at least sixty days to comment on the modification request. The comment period will begin on the date the permittee publishes the notice in the local newspaper. Comments should be submitted to the department of ecology contact identified in the notice.

(vi) After the conclusion of the sixty-day comment period, the department must grant or deny the permit modification request according to the permit modification procedures of WAC 173-303-840. In addition, the department must consider and respond to all significant written comments received during the sixty-day comment period.

(d) Other modifications.

(i) In the case of modifications not explicitly listed in Appendix I of this section, the permittee may submit a Class 3 modification request to the department, or he or she may

request a determination by the department that the modification should be reviewed and approved as a Class 1 or Class 2 modification. If the permittee requests that the modification be classified as a Class 1 or 2 modification, he or she must provide the department with the necessary information to support the requested classification.

(ii) The department shall make the determination described in (d)(i) of this subsection as promptly as practicable. In determining the appropriate class for a specific modification, the department shall consider the similarity of the modification to other modifications codified in Appendix I and the following criteria:

(A) Class 1 modifications apply to minor changes that keep the permit current with routine changes to the facility or its operation. These changes do not substantially alter the permit conditions or reduce the capacity of the facility to protect human health or the environment. In the case of Class 1 modifications, the department may require prior approval.

(B) Class 2 modifications apply to changes that are necessary to enable a permittee to respond, in a timely manner, to:

(I) Common variations in the types and quantities of the wastes managed under the facility permit;

(II) Technological advancements; and

(III) Changes necessary to comply with new regulations, where these changes can be implemented without substantially changing design specifications or management practices in the permit.

(C) Class 3 modifications substantially alter the facility or its operation.

(e) Temporary authorizations.

(i) Upon request of the permittee, the department may, without prior public notice and comment, grant the permittee a temporary authorization in accordance with this subsection. Temporary authorizations must have a term of not more than one hundred eighty days.

(ii)(A) The permittee may request a temporary authorization for:

(I) Any Class 2 modification meeting the criteria in (e)(iii)(B) of this subsection; and

(II) Any Class 3 modification that meets the criteria in (e)(iii)(B)(I) or (II) of this subsection; or that meets the criteria in (e)(iii)(B)(III) through (V) of this subsection and provides improved management or treatment of a dangerous waste already listed in the facility permit.

(B) The temporary authorization request must include:

(I) A description of the activities to be conducted under the temporary authorization;

(II) An explanation of why the temporary authorization is necessary; and

(III) Sufficient information to ensure compliance with the standards in WAC 173-303-280 through 173-303-395 and 173-303-600 through 173-303-680.

(C) The permittee must send a notice about the temporary authorization request to all persons on the facility mailing list maintained by the department and to appropriate units of state and local governments as specified in WAC 173-303-840 (3)(e)(i)(~~(B)~~) (D). This notification must be made within seven days of submission of the authorization request.

(iii) The department shall approve or deny the temporary authorization as quickly as practical. To issue a temporary authorization, the department must find:

(A) The authorized activities are in compliance with the standards of WAC 173-303-280 through 173-303-395 and 173-303-600 through 173-303-680.

(B) The temporary authorization is necessary to achieve one of the following objectives before action is likely to be taken on a modification request:

(I) To facilitate timely implementation of closure or corrective action activities;

(II) To allow treatment or storage in tanks or containers of restricted wastes in accordance with 40 CFR Part 268;

(III) To prevent disruption of ongoing waste management activities;

(IV) To enable the permittee to respond to sudden changes in the types or quantities of the wastes managed under the facility permit; or

(V) To facilitate other changes to protect human health and the environment.

(iv) A temporary authorization may be reissued for one additional term of up to one hundred eighty days provided that the permittee has requested a Class 2 or 3 permit modification for the activity covered in the temporary authorization, and:

(A) The reissued temporary authorization constitutes the department's decision on a Class 2 permit modification in accordance with (b)(vi)(A)(IV) or (B)(IV) of this subsection; or

(B) The department determines that the reissued temporary authorization involving a Class 3 permit modification request is warranted to allow the authorized activities to continue while the modification procedures of (c) of this subsection are conducted.

(f) Public notice and appeals of permit modification decisions.

(i) The department shall notify persons on the facility mailing list and appropriate units of state and local government within ten days of any decision under this section to grant or deny a Class 2 or 3 permit modification request. The department shall also notify such persons within ten days after an automatic authorization for a Class 2 modification goes into effect under (b)(vi)(C) or (E) of this subsection.

(ii) The department's decision to grant or deny a Class 2 or 3 permit modification request under this section may be appealed under the permit appeal procedures of WAC 173-303-845.

(iii) An automatic authorization that goes into effect under (b)(vi)(C) or (E) of this subsection may be appealed under the permit appeal procedures of WAC 173-303-845; however, the permittee may continue to conduct the activities pursuant to the automatic authorization until the appeal has been granted pursuant to WAC 173-303-845, notwithstanding the provisions of WAC 173-303-840 (8)(b).

(g) Newly listed or identified wastes.

(i) The permittee is authorized to continue to manage wastes listed or identified as dangerous under WAC 173-303-070 if he or she:

(A) Was in existence as a dangerous waste facility with respect to the newly listed or identified waste on the effective date of the final rule listing or identifying the waste;

PERMANENT

(B) Submits a Class 1 modification request on or before the date on which the waste becomes subject to the new requirements;

(C) Is in compliance with the standards of 40 CFR Part 265 (as referenced in WAC 173-303-400);

(D) In the case of Classes 2 and 3 modifications, also submits a complete permit modification request within one hundred eighty days after the effective date of the rule listing or identifying the waste; and

(E) In the case of land disposal units, certifies that such unit is in compliance with all applicable Part 265 ground water monitoring and financial responsibility requirements (as referenced in WAC 173-303-400) on the date twelve months after the effective date of the rule identifying or listing the waste as dangerous. If the owner or operator fails to clarify compliance with these requirements, he or she shall lose authority to operate under this section.

(ii) New wastes or units added to a facility's permit under this subsection do not constitute expansions for the purpose of the twenty-five percent capacity expansion limit for Class 2 modifications.

(h) Permit modification list. The department must maintain a list of all approved permit modifications and must publish a notice once a year in a state-wide newspaper that an updated list is available for review.

APPENDIX I

Modifications Class

A. General Permit Provisions

- 1. Administrative and informational changes 1
- 2. Correction of typographical errors 1
- 3. Equipment replacement or upgrading with functionally equivalent components (e.g., pipes, valves, pumps, conveyors, controls) 1
- 4. Changes in the frequency of or procedures for monitoring, reporting, sampling, or maintenance activities by the permittee:
 - a. To provide for more frequent monitoring, reporting, sampling, or maintenance 1
 - b. Other changes 2
- 5. Schedule of compliance:
 - a. Changes in interim compliance dates, with prior approval of the Director 1
 - b. Extension of final compliance date 3
- 6. Changes in expiration date of permit to allow earlier permit termination, with prior approval of the Director 1

7. Changes in ownership or operational control of a facility, provided the procedures of subsection (2)(b) of this section are followed 1

B. General Facility Standards

- 1. Changes to waste sampling or analysis methods:
 - a. To conform with agency guidance or regulations 1
 - b. Other changes 2
- 2. Changes to analytical quality assurance/control plan:
 - a. To conform with agency guidance or regulations 1
 - b. Other changes 2
- 3. Changes in procedures for maintaining the operating record 1

- 4. Changes in frequency or content of inspection schedules 2
- 5. Changes in the training plan:
 - a. That affect the type or decrease the amount of training given to employees 2
 - b. Other changes 1
- 6. Contingency plan:
 - a. Changes in emergency procedures (i.e., spill or release response procedures) 2
 - b. Replacement with functionally equivalent equipment, upgrade, or relocate emergency equipment listed 1
 - c. Removal of equipment from emergency equipment list 2
 - d. Changes in name, address, or phone number of coordinators or other persons or agencies identified in the plan 1

Note: When a permit modification (such as introduction of a new unit) requires a change in facility plans or other general facility standards, that change shall be reviewed under the same procedures as the permit modification.

C. Ground Water Protection

- 1. Changes to wells:
 - a. Changes in the number, location, depth, or design of upgradient or downgradient wells of permitted ground water monitoring system 2
 - b. Replacement of an existing well that has been damaged or rendered inoperable, without change to location, design, or depth of the well 1
- 2. Changes in ground water sampling or analysis procedures or monitoring schedule, with prior approval of the Director 1
- 3. Changes in statistical procedure for determining whether a statistically significant change in ground water quality between upgradient and downgradient wells has occurred, with prior approval of the Director 1
- 4. Changes in point of compliance 2
- 5. Changes in indicator parameters, hazardous constituents, or concentration limits (including ACLs):
 - a. As specified in the ground water protection standard 3
 - b. As specified in the detection monitoring program 2
- 6. Changes to a detection monitoring program as required by WAC 173-303-645 (9)(j), unless otherwise specified in this appendix 2
- 7. Compliance monitoring program:
 - a. Addition of compliance monitoring program as required by WAC 173-303-645 (9)(h)(iv) and (10) 3
 - b. Changes to a compliance monitoring program as required by WAC 173-303-645 (10)(k), unless otherwise specified in this appendix 2
- 8. Corrective action program:
 - a. Addition of a corrective action program as required by WAC 173-303-645 (10)(i)(ii) and (11) 3
 - b. Changes to a corrective action program as required by WAC 173-303-645 (11)(h), unless otherwise specified in this appendix 2

D. Closure

1. Changes to the closure plan:

- a. Changes in estimate of maximum extent of operations or maximum inventory of waste on-site at any time during the active life of the facility, with prior approval of the Director 11
 - b. Changes in the closure schedule for any unit, changes in the final closure schedule for the facility, or extension of the closure period, with prior approval of the Director 11
 - c. Changes in the expected year of final closure, where other permit conditions are not changed, with prior approval of the Director 11
 - d. Changes in procedures for decontamination of facility equipment or structures, with prior approval of the Director 11
 - e. Changes in approved closure plan resulting from unexpected events occurring during partial or final closure, unless otherwise specified in this appendix 2
 - f. Extension of the closure period to allow a landfill, surface impoundment, or land treatment unit to receive nondangerous wastes after final receipt of dangerous wastes under WAC 173-303-610 (4)(d) and (e) 2
2. Creation of a new landfill unit as part of closure 3
3. Addition of the following new units to be used temporarily for closure activities:
- a. Surface impoundments 3
 - b. Incinerators 3
 - c. Waste piles that do not comply with WAC 173-303-660 (1)(c) 3
 - d. Waste piles that comply with WAC 173-303-660 (1)(c) 2
 - e. Tanks or containers (other than specified below) 2
 - f. Tanks used for neutralization, dewatering, phase separation, or component separation, with prior approval of the Director 11

E. Post-Closure

- 1. Changes in name, address, or phone number of contact in post-closure plan 1
- 2. Extension of post-closure care period 2
- 3. Reduction in the post-closure care period 3
- 4. Changes to the expected year of final closure, where other permit conditions are not changed 1
- 5. Changes in post-closure plan necessitated by events occurring during the active life of the facility, including partial and final closure 2

F. Containers

- 1. Modification or addition of container units:
 - a. Resulting in greater than 25% increase in the facility's container storage capacity, except as provided in F (1)(c) and F (4)(a) below 3
 - b. Resulting in up to 25% increase in the facility's container storage capacity, except as provided in F (1)(c) and F (4)(a) below 2
 - c. Or treatment processes necessary to treat wastes that are restricted from land disposal to meet some or all of the applicable treatment standards or to treat wastes to satisfy (in whole or in part) the standard of "use of practically available technology that yields the greatest environmental benefit" contained in 40 CFR 268.8 (a)(2)(ii), with prior approval of

the department. This modification may also involve addition of new waste codes or narrative descriptions of wastes. It is not applicable to dioxin-containing wastes (F020, 021, 022, 023, 026, 027, and 028) 11

2:

- a. Modification of a container unit without increasing the capacity of the unit 2
 - b. Addition of a roof to a container unit without alteration of the containment system 1
3. Storage of different wastes in containers:
 - a. That require additional or different management practices from those authorized in the permit, except as provided in F(4) below 3
 - b. That do not require additional or different management practices from those authorized in the permit 2

Note: See (g) of this subsection for modification procedures to be used for the management of newly listed or identified wastes.

4. Storage of treatment of different wastes in containers:

- a. That require addition of units or change in treatment process or management standards, provided that the wastes are restricted from land disposal and are to be treated to meet some or all of the applicable treatment standards, or that are to be treated to satisfy (in whole or in part) the standard of "use of practically available technology that yields the greatest environmental benefit" contained in 40 CFR 268.8 (a)(2)(ii). This modification is not applicable to dioxin-containing wastes (F020, 021, 022, 023, 026, 027, and 028) 1
- b. That do not require the addition of units or a change in the treatment process or management standards, and provided that the units have previously received wastes of the same type (e.g., incinerator scrubber water). This modification is not applicable to dioxin-containing wastes (F020, 021, 022, 023, 026, 027, and 028) 11

G. Tanks

1:

- a. Modification or addition of tank units resulting in greater than 25% increase in the facility's tank capacity, except as provided in G (1)(c), G (1)(d), and G (1)(e) below 3
- b. Modification or addition of tank units resulting in up to 25% increase in the facility's tank capacity, except as provided in G (1)(d) and G (1)(e) below 2
- c. Addition of a new tank that will operate for more than 90 days using any of the following physical or chemical treatment technologies: neutralization, dewatering, phase separation, or component separation 2
- d. After prior approval of the department, addition of a new tank that will operate for up to 90 days using any of the following physical or chemical treatment technologies: neutralization, dewatering, phase separation, or component separation 11
- e. Modification or addition of tank units or treatment processes necessary to treat wastes that are restricted from land disposal to meet some or all of the applicable treatment standards or to treat wastes to satisfy (in whole or in part) the standard of "use of practically available technology that yields the greatest environmental benefit" contained in 40 CFR 268.8 (a)(2)(ii), with prior approval of the department. This modification may also involve addition of new waste

PERMANENT

PERMANENT

codes. It is not applicable to dioxin-containing wastes (F020, 021, 022, 023, 026, 027, and 028) 1

2. Modification of a tank unit or secondary containment system without increasing the capacity of the unit 2

3. Replacement of a tank with a tank that meets the same design standards and has a capacity within +/- 10% of the replaced tank provided 1

- The capacity difference is no more than 1500 gallons,
- The facility's permitted tank capacity is not increased,

and
-The replacement tank meets the same conditions in the permit.

4. Modification of a tank management practice 2

5. Management of different wastes in tanks:

a. That require additional or different management practices, tank design, different fire protection specifications, or significantly different tank treatment process from that authorized in the permit, except as provided in G (5)(c) below 3

b. That do not require additional or different management practices, tank design, different fire protection specifications, or significantly different tank treatment process than authorized in the permit, except as provided in G (5)(d) 2

c. That require addition of units or change in treatment processes or management standards, provided that the wastes are restricted from land disposal and are to be treated to meet some or all of the applicable treatment standards or that are to be treated to satisfy (in whole or in part) the standard of "use of practically available technology that yields the greatest environmental benefit" contained in 40 CFR 268.8 (a)(2)(ii). The modification is not applicable to dioxin-containing wastes (F020, 021, 022, 023, 026, 027, and 028) 1

(d) That do not require the addition of units or a change in the treatment process or management standards, and provided that the units have previously received waste of the same type (e.g., incinerator scrubber water). This modification is not applicable to dioxin-containing wastes (F020, 021, 022, 023, 026, 027, and 028) 1

Note: See (g) of this subsection for modification procedures to be used for the management of newly listed or identified wastes.

H. Surface Impoundments

1. Modification or addition of surface impoundment units that result in increasing the facility's surface impoundment storage or treatment capacity 3

2. Replacement of a surface impoundment unit 3

3. Modification of a surface impoundment unit without increasing the facility's surface impoundment storage or treatment capacity and without modifying the unit's liner, leak detection system, or leachate collection system 2

4. Modification of a surface impoundment management practice 2

5. Treatment, storage, or disposal of different wastes in surface impoundments:

a. That require additional or different management practices or different design of the liner or leak detection system than authorized in the permit 3

b. That do not require additional or different management practices or different design of the liner or leak detection system than authorized in the permit 2

c. That are wastes restricted from land disposal that meet the applicable treatment standards or that are treated to satisfy the standard of "use of practically available technology that yields the greatest environmental benefit" contained in 40 CFR 268.8 (a)(2)(ii), and provided that the unit meets the minimum technological requirements stated in 40 CFR 268.5 (h)(2). This modification is not applicable to dioxin-containing wastes (F020, 021, 022, 023, 026, 027, and 028) 1

d. That are residues from wastewater treatment or incineration, provided that disposal occurs in a unit that meets the minimum technological requirements stated in 40 CFR 268.5 (h)(2), and provided further that the surface impoundment has previously received wastes of the same type (for example, incinerator scrubber water). This modification is not applicable to dioxin-containing wastes (F020, 021, 022, 023, 026, 027, and 028) 1

Note: See (g) of this subsection for modification procedures to be used for the management of newly listed or identified wastes.

I. Enclosed Waste Piles. For all waste piles except those complying with WAC 173-303-660 (1)(c), modifications are treated the same as for a landfill. The following modifications are applicable only to waste piles complying with WAC 173-303-660 (1)(c).

1. Modification or addition of waste pile units:

a. Resulting in greater than 25% increase in the facility's waste pile storage or treatment capacity 3

b. Resulting in up to 25% increase in the facility's waste pile storage or treatment capacity 2

2. Modification of waste pile unit without increasing the capacity of the unit 2

3. Replacement of a waste pile unit with another waste pile unit of the same design and capacity and meeting all waste pile conditions in the permit 1

4. Modification of a waste pile management practice 2

5. Storage or treatment of different wastes in waste piles:

a. That require additional or different management practices or different design of the unit 3

b. That do not require additional or different management practices or different design of the unit 2

Note: See (g) of this subsection for modification procedures to be used for the management of newly listed or identified wastes.

J. Landfills and Unenclosed Waste Piles

1. Modification or addition of landfill units that result in increasing the facility's disposal capacity 3

2. Replacement of a landfill 3

3. Addition or modification of a liner, leachate collection system, leachate detection system, run-off control, or final cover system 3

4. Modification of a landfill unit without changing a liner, leachate collection system, leachate detection system, run-off control, or final cover system 2

5. Modification of a landfill management practice 2

6. Landfill different wastes:

a. That require additional or different management practices, different design of the liner, leachate collection system, or leachate detection system 3

b. That do not require additional or different management practices, different design of the liner, leachate collection system, or leachate detection system 2

c. That are wastes restricted from land disposal that meet the applicable treatment standards or that are treated to satisfy the standard of "use of practically available technology that yields the greatest environmental benefit" contained in 40 CFR 268.8 (a)(2)(ii), and provided that the landfill unit meets the minimum technological requirements stated in 40 CFR 268.5 (h)(2). This modification is not applicable to dioxin-containing wastes (F020, 021, 022, 023, 026, 027, and 028) 1

d. That are residues from wastewater treatment or incineration, provided that disposal occurs in a landfill unit that meets the minimum technological requirements stated in 40 CFR 268.5 (h)(2), and provided further that the landfill has previously received wastes of the same type (for example, incinerator ash). This modification is not applicable to dioxin-containing wastes (F020, 021, 022, 023, 026, 027, and 028) 1

Note: See (g) of this subsection for modification procedures to be used for the management of newly listed or identified wastes.

K. Land Treatment

1. Lateral expansion of or other modification of a land treatment unit to increase areal extent 3

2. Modification of run-on control system 2

3. Modify run-off control system 3

4. Other modifications of land treatment unit component specifications or standards required in permit 2

5. Management of different wastes in land treatment units:

a. That require a change in permit operating conditions or unit design specifications 3

b. That do not require a change in permit operating conditions or unit design specifications 2

Note: See (g) of this subsection for modification procedures to be used for the management of newly listed or identified wastes.

6. Modification of a land treatment unit management practice to:

a. Increase rate or change method of waste application

b. Decrease rate of waste application 2

7. Modification of a land treatment unit management practice to change measures of pH or moisture content, or to enhance microbial or chemical reactions 2

8. Modification of a land treatment unit management practice to grow food chain crops, to add to or replace existing permitted crops with different food chain crops, or to modify operating plans for distribution of animal feeds resulting from such crops 3

9. Modification of operating practice due to detection of releases from the land treatment unit pursuant to WAC 173-303-655 (6)(g)(ii) 3

10. Changes in the unsaturated zone monitoring system, resulting in a change to the location, depth, number of sampling points, or replace unsaturated zone monitoring devices or components of devices with devices or components that have specifications different from permit requirements 3

11. Changes in the unsaturated zone monitoring system that do not result in a change to the location, depth, number of sampling points, or that replace unsaturated zone monitor-

ing devices or components of devices with devices or components having specifications different from permit requirements 2

12. Changes in background values for hazardous constituents in soil and soil-pore liquid 2

13. Changes in sampling, analysis, or statistical procedure 2

14. Changes in land treatment demonstration program prior to or during the demonstration 2

15. Changes in any condition specified in the permit for a land treatment unit to reflect results of the land treatment demonstration, provided performance standards are met, and the Director's prior approval has been received 2

16. Changes to allow a second land treatment demonstration to be conducted when the results of the first demonstration have not shown the conditions under which the wastes can be treated completely, provided the conditions for the second demonstration are substantially the same as the conditions for the first demonstration and have received the prior approval of the Director 2

17. Changes to allow a second land treatment demonstration to be conducted when the results of the first demonstration have not shown the conditions under which the wastes can be treated completely, where the conditions for the second demonstration are not substantially the same as the conditions for the first demonstration 3

18. Changes in vegetative cover requirements for closure 2

L. Incinerators

1. Changes to increase by more than 25% any of the following limits authorized in the permit: A thermal feed rate limit, a waste feed rate limit, or an organic chlorine feed rate limit. The Director will require a new trial burn to substantiate compliance with the regulatory performance standards unless this demonstration can be made through other means 3

2. Changes to increase by up to 25% any of the following limits authorized in the permit: A thermal feed rate limit, a waste feed limit, or an organic chlorine feed rate limit. The Director will require a new trial burn to substantiate compliance with the regulatory performance standards unless this demonstration can be made through other means 2

3. Modification of an incinerator unit by changing the internal size or geometry of the primary or secondary combustion units, by adding a primary or secondary combustion unit, by substantially changing the design of any component used to remove HCl or particulate from the combustion gases, or by changing other features of the incinerator that could affect its capability to meet the regulatory performance standards. The Director will require a new trial burn to substantiate compliance with the regulatory performance standards unless this demonstration can be made through other means 3

4. Modification of an incinerator unit in a manner that would not likely affect the capability of the unit to meet the regulatory performance standards but which would change the operating conditions or monitoring requirements specified in the permit. The Director may require a new trial burn to demonstrate compliance with the regulatory performance standards 2

PERMANENT

PERMANENT

5. Operating requirements:

a. Modification of the limits specified in the permit for minimum combustion gas temperature, minimum combustion gas residence time, or oxygen concentration in the secondary combustion chamber. The Director will require a new trial burn to substantiate compliance with the regulatory performance standards unless this demonstration can be made through other means 3

b. Modification of any stack gas emission limits specified in the permit, or modification of any conditions in the permit concerning emergency shutdown or automatic waste feed cutoff procedures or controls 3

c. Modification of any other operating condition or any inspection or recordkeeping requirement specified in the permit 2

6. Incineration of different wastes:

a. If the waste contains a POHC that is more difficult to incinerate than authorized by the permit or if incineration of the waste requires compliance with different regulatory performance standards than specified in the permit. The Director will require a new trial burn to substantiate compliance with the regulatory performance standards unless this demonstration can be made through other means 3

b. If the waste does not contain a POHC that is more difficult to incinerate than authorized by the permit and if incineration of the waste does not require compliance with different regulatory performance standards than specified in the permit 2

Note: See (g) of this subsection for modification procedures to be used for the management of newly listed or identified wastes.

7. Shakedown and trial burn:

a. Modification of the trial burn plan or any of the permit conditions applicable during the shakedown period for determining operational readiness after construction, the trial burn period, or the period immediately following the trial burn 2

b. Authorization of up to an additional 720 hours of waste incineration during the shakedown period for determining operational readiness after construction, with the prior approval of the Director 11

c. Changes in the operating requirements set in the permit for conducting a trial burn, provided the change is minor and has received the prior approval of the Director 11

d. Changes in the ranges of the operating requirements set in the permit to reflect the results of the trial burn, provided the change is minor and has received the prior approval of the Director 11

8. Substitution of an alternate type of fuel that is not specified in the permit 1

¹ Class 1 modifications requiring prior Agency approval.

(5) Permit termination. The department shall follow the applicable procedures in WAC 173-303-840, procedures for decision making, in terminating any permit. The following are causes for terminating a permit during its term or for denying a permit renewal application:

(a) Noncompliance by the permittee with any condition of the permit;

(b) The permittee's failure in the application or during the permit issuance process to disclose fully all relevant facts, or the permittee's misrepresentation of any relevant facts at any time; or

(c) A determination that the permitted activity endangers public health or the environment and can only be regulated to acceptable levels by permit modification or termination.

(6) Schedules of compliance.

(a) General. The permit may, when appropriate, specify a schedule of compliance leading to compliance with chapter 173-303 WAC.

(b) Time for compliance. Any schedules of compliance under this section shall require compliance as soon as possible.

(c) Interim dates. If a permit establishes a schedule of compliance which exceeds one year from the date of permit issuance, the schedule shall set forth interim requirements and the dates for their achievement as follows;

(i) The time between interim dates shall not exceed one year; or

(ii) If the time necessary for completion of any interim requirement (such as the construction of a control facility) is more than one year and is not readily divisible into stages for completion, the permit shall specify interim dates for the submission of reports of progress toward completion of the interim requirements and indicate a projected completion date.

(d) Reporting. The permit shall be written to require that no later than fourteen days following each interim date and the final date of compliance, the permittee shall notify the department in writing of its compliance or noncompliance with the interim or final requirements.

M. Corrective Action

1. Approval of a corrective action management unit pursuant to WAC 173-303-646 (4), (5), and (6) . . class 1.

2. Approval of a temporary unit or time extension for a temporary unit pursuant to WAC 173-303-646(7) class 2.

AMENDATORY SECTION (Amending Order DE 84-22, filed 6/27/84)

WAC 173-303-840 Procedures for decision making.

(1) Application and completeness.

(a) The department will not begin the processing of a permit until the applicant has fully complied with the application requirements for the permit. Permit applications must comply with the signature and certification requirements of WAC 173-303-810 (12) and (13).

(b) The department shall review for completeness each application for a permit under this chapter. Each application for a permit should be reviewed for completeness within sixty days of its receipt. Upon completing the review, the department shall notify the applicant in writing whether or not the application is complete. If the application is incomplete, the department shall list the information necessary to make the application complete, and shall specify in the notice of deficiency a date for submitting the necessary information. After the application is completed, the department may request additional information from an applicant but only when necessary to clarify, modify, or supplement previously submitted material. Requests for such additional information will not render an application incomplete.

(c) If an applicant fails or refuses to correct deficiencies in the application, the permit may be denied and appropriate enforcement actions may be taken under chapter 70.105 RCW.

(d) If the department decides that a site visit is necessary for any reason in conjunction with the processing of an application, then the department shall notify the applicant and a date shall be scheduled.

(e) The effective date of an application is the date on which the department notifies the applicant that the application is complete as provided in (b) of this subsection.

(2) Draft permits.

(a) A draft permit is a document prepared by the department indicating the tentative decision to issue, deny, modify, revoke and reissue, or terminate a permit.

(b) When an application is ~~((completed))~~ complete, the department shall tentatively decide whether to prepare a draft permit, or to deny the application.

(c) If the department tentatively decides to deny the permit application, then the department shall issue a notice of intent to deny. A notice of intent to deny the permit application is a type of draft permit which follows the same procedures as any draft permit prepared under this subsection. If the department's final decision is that the tentative decision to deny was incorrect, then the department shall withdraw the notice of intent to deny and proceed to prepare a draft permit under this subsection.

(d) If the department decides to prepare a draft permit, it shall contain the following information:

(i) All conditions applicable to permits under WAC 173-303-810;

(ii) Applicable conditions under WAC 173-303-830; and

(iii) All applicable standards for storage, treatment and disposal, and other permit conditions.

(e) All draft permits must be accompanied by a fact sheet that is supported by administrative record and made available for public comment.

(f) Fact sheet; statement of basis.

(i) A fact sheet shall be prepared for every draft permit for a major dangerous waste management facility, and for every draft permit which the department finds is the subject of wide-spread public interest or raises major issues.

(ii) The fact sheet shall briefly set forth the principal facts and the significant factual, legal, methodological, and policy questions considered in preparing the draft permit. The department shall send this fact sheet to the applicant and, on request, to any other person.

(iii) The fact sheet shall include, when applicable:

(A) A brief description of the type of facility or activity which is the subject of the draft permit;

(B) The type and quantity of wastes, fluids, or pollutants which are proposed to be or are being treated, stored, disposed, injected, emitted, or discharged;

(C) A brief summary of the basis for the draft permit conditions including supporting references;

(D) Reasons why any requested variances or alternatives to required standards do or do not appear justified; and

(E) A description of the procedures for reaching a final decision on the draft permit including:

(I) The beginning and ending dates of the comment period and the address where comments will be received;

(II) Procedures for requesting a hearing and the nature of that hearing;

(III) Any other procedures by which the public may participate in the final decision; and

(IV) Name and telephone number of a person to contact for additional information.

(iv) The department shall prepare a statement of basis for every draft permit for which a fact sheet is not prepared. The statement of basis shall briefly describe the derivation of the conditions of the draft permit and the reasons for them or, in the case of notices of intent to deny or terminate, reasons supporting the tentative decision. The statement of basis shall be sent to the applicant and, on request, to any other person.

(3) Public notice and involvement.

(a) The department shall give public notice that the following actions have occurred:

(i) A draft permit has been prepared or an application is tentatively being denied;

(ii) A hearing on a permit has been scheduled; or

(iii) An appeal on a permit has been filed with the pollution control hearings board.

(b) No public notice is required when a request for permit modification, revocation and reissuance, or termination is denied. A written notice of the denial shall be given to the person who requested the permit change and to the permittee.

(c) The public notice may describe more than one permit or permit action.

(d) Public notice of the preparation of a draft permit, including a notice of intent to deny a permit application shall allow at least forty-five days for public comment. Public notice of a public hearing shall be given at least thirty days before the hearing.

(e) Public notice of activities described in this subsection shall be given by the following methods:

(i) By mailing a copy of a notice to the following persons (any person otherwise entitled to receive notice under this paragraph may waive his or her rights to receive notice for any classes and categories of permits):

(A) The applicant;

(B) Any other agency which the department knows has issued or is required to issue a permit for the same activity or facility;

(C) Federal and state agencies with jurisdiction over fish, shellfish, and wildlife resources and over coastal zone management plans, the advisory council on historic preservation, state historic preservation officers, and other appropriate government authorities, including any affected states;

(D) Persons on the mailing list developed by:

(I) Including those who request in writing to be on the list;

(II) Soliciting persons for an area list from participants in past permit proceedings in that area; and

(III) Notifying the public of the opportunity to be put on the mailing list through periodic publications in the public press and in appropriate publications of the department;

(E) Any unit of local government having jurisdiction over the area where the facility is proposed to be located, and each state agency having any authority under state law with respect to construction or operation of such facility;

(ii) For major permits, by publication of a notice in a daily or weekly newspaper within the area affected by the facility;

(iii) For all permits, by publication of notice in a daily or weekly major local newspaper of general circulation, and local radio broadcast of the public notice; and

(iv) By any other method reasonably calculated to give notice of the action in question to the persons potentially affected by it, including press releases or any other forum or medium to elicit public participation.

(4) Contents of the public notice.

(a) All public notices issued shall contain the following minimum information:

(i) Name and address of the office processing the permit action for which notice is being given;

(ii) Name and address of the permittee or permit applicant and, if different, of the facility or activity regulated by the permit;

(iii) A brief description of the business conducted at the facility or activity described in the permit application or the draft permit;

(iv) Name, address, and telephone number of a person from whom interested persons may obtain further information, including copies of the draft permit, fact sheet or statement of basis, and the application;

(v) A brief description of the comment procedures and the time and place of any hearing that will be held, including a statement of procedures to request a hearing (unless a hearing has already been scheduled) and other procedures by which the public may participate in the final permit decision;

(vi) And any additional information considered necessary or proper.

(b) In addition to the general public notice described in (a) of this subsection, public notice of a hearing under subsection (5) of this section shall contain the following information:

(i) Date, time, and place of the hearing;

(ii) Reference to the date of the previous public notice relating to the permit; and

(iii) A brief description of the nature and purpose of the hearing including the applicable rules and procedures.

(c) In addition to the general public notice all persons identified in WAC 173-303-840 (3)(e)(i)(A), (B), and (C) shall be mailed a copy of the fact sheet, the permit application (if any), and the draft permit (if any).

(d) Public comments and request for public hearings. During the public comment period any interested person may submit written comments on the draft permit and may request a public hearing, if no hearing has already been scheduled. A request for a public hearing shall be in writing and shall state the nature of the issues proposed to be raised in the hearing. All comments shall be considered in making the final decision and shall be answered according to WAC 173-303-840(9).

(5) Public hearings.

(a) The department shall hold a public hearing whenever, on the basis of requests, there is a significant degree of public interest in a draft permit or there is written notice of opposition and the director receives a request for a hearing during the forty-five day comment period. The department also may hold a public hearing at its discretion, whenever, for instance, such a hearing might clarify one or more issues

involved in the permit decision. Public notice of the hearing shall be given as specified in WAC 173-303-840(3). Whenever possible, the department shall schedule a public hearing under this subsection at a location convenient to the nearest population center to the proposed facility.

(b) Any person may submit oral or written statements and data concerning the draft permit. Reasonable limits may be set upon the time allowed for oral statements, and the submission of statements in writing may be required. The public comment period under WAC 173-303-840(3) shall automatically be extended to the close of any public hearing under this subsection. The hearing officer may also extend the comment period by so stating at the hearing.

(c) A tape recording or written transcript of the hearing shall be made available to the public.

(6) Obligation to raise issues and provide information during the public comment period.

(a) All persons, including applicants, who believe any condition of a draft permit is inappropriate, or that the department's tentative decision to deny an application, terminate a permit, or prepare a draft permit is inappropriate, must raise all reasonably ascertainable issues and submit all reasonably available arguments and factual grounds supporting their position, including all supporting material, by the close of the public comment period (including any public hearing) under WAC 173-303-840(3).

(b) All supporting materials shall be included in full and may not be incorporated by reference, unless they are already part of the administrative record in the same proceeding, or consist of state or federal statutes and regulations, documents of general applicability, or other generally available reference materials. Commenters shall make supporting material not already included in the administrative record available to the department. A comment period longer than thirty days will often be necessary in complicated proceedings to give commenters a reasonable opportunity to comply with the requirements of this subsection. Commenters may request a longer comment period.

(7) Reopening of the public comment period. If any data, information, or arguments submitted during the public comment period, including information or arguments required under subsection (6) of this section, appear to raise substantial new questions concerning a permit, the department may take one or more of the following actions:

(a) Prepare a new draft permit, appropriately modified;

(b) Prepare a revised statement of basis, a fact sheet or revised fact sheet, and reopen the comment period; or

(c) Reopen or extend the comment period to give interested persons an opportunity to comment on the information or arguments submitted.

Comments filed during the reopened comment period shall be limited to the substantial new questions that caused its reopening. The public notice shall define the scope of the reopening.

(8) Issuance and effective date of permit.

(a) After the close of the public comment period under WAC 173-303-840(5) on a draft permit, the department shall issue a final permit decision (or a decision to deny a permit for the active life of a RCRA dangerous waste facility or unit under WAC 173-303-840). The department shall notify the applicant and each person who has submitted written comments or requested notice of the final permit decision.

For purposes of this section, a final permit means a final decision to issue, deny, modify, revoke and reissue, or terminate a permit.

(b) A final permit decision shall become effective thirty days after the service of notice of the decision, unless:

(i) A later effective date is specified in the decision; or

(ii) No comments requested a change in the draft permit, in which case the permit shall become effective immediately upon issuance.

(9) Response to comments. At the time that any final permit is issued, the department shall issue a response to comments. This response shall specify which provisions, if any, of the draft permit have been changed in the final permit decision and the reason for the change, and briefly describe and respond to all significant comments of the draft permit raised during the public comment period or during any hearing. The response to comments shall be available to the public.

(10) Decision-making procedure for modification, revocation and reissuance, or termination of permits.

(a) Permits may be modified, revoked and reissued, or terminated either at the request of any interested person (including the permittee) or upon the department's initiative. However, permits may only be modified or revoked and reissued for the reasons specified in WAC 173-303-830 (3) and (4), or terminated for the reasons specified in WAC 173-303-805 or 173-303-806. All requests shall be in writing and shall contain facts or reasons supporting the request.

(b) If the department tentatively decides to modify or revoke and reissue a permit under WAC 173-303-830(3), it shall prepare the draft permit under WAC 173-303-840(2), incorporating the proposed changes. The department may request additional information and, in the case of a modified permit, may require the submission of an updated permit application. In the case of revoked and reissued permits, the department shall require the submission of a new application.

(c) In a permit modification under this section, only those conditions to be modified shall be reopened when a new draft permit is prepared. All other aspects of the existing permit shall remain in effect for the duration of the unmodified permit. When a permit is revoked and reissued under this section, the entire permit is reopened just as if the permit had expired and was being reissued. During any revocation and reissuance proceeding the permittee shall comply with all conditions of the existing permit until a new final permit is reissued.

(d) "Minor modifications" as defined in WAC 173-303-830(4) are not subject to the requirements of this section.

(e) If the department tentatively decides to terminate an interim status permit under WAC 173-303-805 or a final permit under WAC 173-303-806, it shall issue a notice of intent to terminate. A notice of intent to terminate is a type of draft permit which follows the same procedures as any draft permit prepared under WAC 173-303-840(2).

AMENDATORY SECTION (Amending Order DE 81-33, filed 2/10/82)

WAC 173-303-900 Public involvement and participation. (1) Intent. Public involvement and participation plays a significant role in the decision making process. The department intends to foster public awareness, information

and consultation, and to respond actively to public concerns. The department will inform the public of major issues, proposed projects, and regulatory changes, and will consult interested and affected segments of the public before making important decisions. The overall goal of the department is to provide knowledge to the public about dangerous waste issues that vitally affect the state, to encourage broader understanding of the public role in dangerous wastes and their proper management, and to promote an open dialogue between the public, industry, and government.

(2) Applicable requirements. In fulfilling the intent of public involvement and participation in the decision making process, the department will refer to and, where applicable, follow the requirements and guidance set forth in the following:

(a) Chapter 34.04 RCW, Administrative Procedure Act;

(b) Chapter 34.08 RCW, Washington State Register Act of 1977;

(c) Chapter 42.17 RCW, Public Records Act;

(d) Chapter ((197-10)) 197-11 WAC, Guidelines Interpreting and Implementing the State Environmental Policy Act;

(e) 40 CFR Part 25, Public Participation in Programs Under the Resource Conservation and Recovery Act, the Safe Drinking Water Act, and the Clean Water Act; and

(f) The Washington state solid waste management plan, December 1980.

AMENDATORY SECTION (Amending Order DE 83-36, filed 1/5/88, effective 2/5/88)

WAC 173-303-910 Petitions. (1) General petitions.

(a) Any person may petition the department to modify or revoke any provision in this chapter. This subsection sets forth general requirements which apply to all such petitions. The remaining subsections of this section describe additional requirements for specific types of petitions.

(b) Each petition must be submitted to the department by certified mail and must include:

(i) The petitioner's name and address;

(ii) A statement of the petitioner's interest in the proposed action;

(iii) A description of the proposed action, including (where appropriate) suggested regulatory language; and

(iv) A statement of the need and justification for the proposed action, including any supporting tests, studies, or other information.

(c) The department will make a tentative decision to grant or deny the petition and give public notice of the tentative decision in writing. The notice shall be distributed to interested persons on a mailing list developed specifically for petitions and persons expressing interest in amendments to this chapter. The public comment period shall be a minimum of forty-five days.

(d) Upon the written request of any interested person, the director may, at his discretion, hold a conference to consider oral comments on the action proposed in the petition. A person requesting a conference must state the issues to be raised and explain why written comments would not suffice to communicate the person's views. The director may in any case decide on his own motion to hold a conference.

(e) After evaluating all public comments the department will make a final decision in accordance with RCW ((34.04.060)) 34.05.330 or ((34.04.080)) 34.05.240. The department will either deny the petition in writing (stating its reasons for denial); or grant the petition and, when appropriate, initiate rule-making proceedings in accordance with RCW ((34.04.025)) 34.05.330.

(2) Petitions for equivalent testing or analytical methods.

(a) Any person seeking to add a testing or analytical method to WAC 173-303-110 may petition for a regulatory amendment under this section. To be successful, the person must demonstrate to the satisfaction of the department that the proposed method is equal to or superior to the corresponding method prescribed in WAC 173-303-110, in terms of its sensitivity, accuracy, and precision (i.e., reproducibility).

(b) Each petition must include, in addition to the information required by subsection (1) of this section:

(i) A full description of the proposed method, including all procedural steps and equipment used in the method;

(ii) A description of the types of wastes or waste matrices for which the proposed method may be used;

(iii) Comparative results obtained from using the proposed method with those obtained from using the relevant or corresponding methods prescribed in WAC 173-303-110;

(iv) An assessment of any factors which may interfere with, or limit the use of, the proposed method; and

(v) A description of the quality control procedures necessary to ensure the sensitivity, accuracy and precision of the proposed method.

(c) After receiving a petition for an equivalent testing or analytical method, the department may request any additional information on the proposed method which it may reasonably require to evaluate the proposal.

(d) If the department amends the regulations to permit use of a new testing method, the method will be incorporated in a document which will be available from the department.

(3) Petitions for exempting dangerous wastes from a particular generator.

(a) Any generator seeking to exempt his dangerous waste may petition the department for exemption from the requirements of WAC 173-303-070 through ((473-303-103)) 173-303-100.

(b) To be successful, the generator must make the demonstrations required in WAC 173-303-072(3) and, where applicable, (4) and (5).

(c) Each petition must include, in addition to the information required by subsection (1) of this section:

(i) The name and address of the laboratory facility performing the sampling or tests of the waste;

(ii) The names and qualifications of the persons sampling and testing the waste;

(iii) The dates of sampling and testing;

(iv) The location of the generating facility;

(v) A description of the manufacturing processes or other operations and feed materials producing the waste and an assessment of whether such processes, operations, or feed materials can or might produce a waste that is not covered by the demonstration;

(vi) A description of the waste and an estimate of the average and maximum monthly and annual quantities of waste covered by the demonstration;

(vii) Pertinent data on and discussion of the factors delineated in WAC 173-303-072(3) and, where applicable, (4) and (5);

(viii) A description of the methodologies and equipment used to obtain the representative samples;

(ix) A description of the sample handling and preparation techniques, including techniques used for extraction, containerization and preservation of the samples;

(x) A description of the tests performed (including results);

(xi) The names and model numbers of the instruments used in performing the tests and the date of the last calibration for instruments which must be calibrated according to manufacturer's instructions; and

(xii) The following statement signed by the generator of the waste or his authorized representative:

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this demonstration and all attached documents, and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

(d) After receiving a petition for a dangerous waste exemption, the department may request any additional information which it may reasonably require to evaluate the petition.

(e) An exemption will only apply to the waste generated by the particular generator covered by the demonstration and will not apply to waste from any other generator.

(f) The department may exempt only part of the waste for which the demonstration is submitted where there is reason to believe that variability of the waste justifies a partial exemption.

(g) The department may (but shall not be required to) grant a temporary exemption before making a final decision under subsection (1) of this section, whenever it finds that there is a substantial likelihood that an exemption will be finally granted.

(h) Any waste for which an exemption is sought will remain designated and be subject to the applicable requirements of this chapter until the generator of the waste is notified by the department that his waste is exempt.

(4) Petition for exclusion.

(a) Any generators seeking exclusion of a class of similar or identical wastes under WAC 173-303-071, excluded categories of waste, may petition the department for exclusion. To be successful, the generator(s) must make the demonstrations required in WAC 173-303-072(6) for all those wastes generated in the state which might be excluded pursuant to granting a petition submitted under this subsection. No class of wastes will be excluded if any of the wastes are regulated as hazardous waste under 40 CFR Part 261.

(b) Each petition for exclusion must include the information required by subsections (1) and (3)(c) of this section and any other information required by the department.

(c) After receiving a petition for exclusion, the department may request any additional information it deems necessary to evaluate the petition.

(5) Petition for designation change. The provisions of (a)(i) of this subsection do not apply to any dangerous waste which is also designated as a hazardous waste under 40 CFR Part 261 Subpart D.

(a) A generator may petition the department to change the designation of his waste as follows:

(i) A waste which is designated only for toxicity pursuant to WAC ((473-303-084 or 173-303-101)) 173-303-100 but which is toxic solely because it is highly acidic or basic (i.e., due to high or low pH) may be subject only to the requirements for corrosive dangerous wastes, provided that the generator can demonstrate this fact to the department's satisfaction through information provided under (b) of this subsection; and

(ii) A waste which is designated EHW may be redesignated DW, provided that the generator can demonstrate that such redesignation is appropriate through information provided under (b) of this subsection.

(b) A petition under this subsection must include:

(i) The information required by subsections (1) and (3)(c) of this section; and

(ii) Such other information as required by the department.

(c) A designation change under this subsection will become effective only after the department has approved the change and notified the generator of such approval.

(6) Petitions to allow land disposal of a waste restricted under WAC 173-303-140.

(a) Any person seeking a land disposal restriction exemption allowed under WAC 173-303-140(6) must submit a petition to the department. The petition must include the following general information:

(i) The petitioner's name and address;

(ii) A statement of the petitioner's interest in the proposed action;

(iii) A description of the proposed action;

(iv) A statement of the need and justification for the proposed action;

(v) An identification of the specific waste and the specific land disposal unit for which the exemption is desired;

(vi) A waste analysis to describe fully the chemical and physical characteristics of the subject waste. All waste and environmental sampling, test, and analysis data must be accurate and reproducible to ((~~the~~)) the extent that state-of-the-art techniques allow; and

(vii) A quality assurance and quality control plan that addresses all sampling and testing aspects of the information provided in the petition.

(b) In addition to the general information requirements in subsection (a) of this section, the following specific information must be provided in the petition for individual case-by-case exemptions.

(i) Petition for land disposal exemption for treatment residuals. Petitions for exemption of treatment residuals, as allowed under WAC 173-303-140 (6)(a), must:

(A) Provide the type of waste management or treatment method applied to the waste and the rationale for selecting this method as the best achievable management method; and

(B) Document that the land disposal of the treatment residual would not pose a greater risk to public health and the environment than land disposal of the original wastes, including an analysis of the treatment residuals to fully describe their chemical and physical characteristics; and

(C) Provide the management alternatives for the treatment residuals and the factors which, if an exemption is not granted, would prevent the utilization of the best achievable management method for the original dangerous waste.

(ii) Petition for economic hardship exemption. Petitions for exemption on the basis of economic hardship, as allowed under WAC 173-303-140 (6)(b), must:

(A) Supply the current management costs and the projected management costs to comply with the requirements of WAC 173-303-140; and

(B) Provide the source of information utilized in determining the economic estimates; and

(C) Provide a discussion of how the projected compliance costs would impose an unreasonable economic burden.

(iii) Petition for leachable inorganic waste exemption. Petitions for exemption of leachable inorganic wastes, as allowed under WAC 173-303-140 (6)(c), must:

(A) Provide information demonstrating that the stabilization of the dangerous waste is less protective of public health and the environment than landfilling; or

(B) Provide a list of stabilization facilities that could accept the dangerous waste and information demonstrating that they do not have available capacity to stabilize the waste; or

(C) Provide information describing the types of stabilization utilized which did not reduce the solubility and mobility of the dangerous waste constituents and describe any other stabilization methods that have been considered but not utilized.

(iv) Petition for organic/carbonaceous waste exemption. Petitions for exemption of organic/carbonaceous wastes, as allowed under WAC 173-303-140 (6)(d), must:

(A) Provide information demonstrating that recycling, treatment and incineration facilities are unavailable for the waste, including a map marked both with the point of waste generation and the point(s) of the nearest treatment, recycling and incineration facility(s) that could manage the dangerous waste; or

(B) Provide information demonstrating that the alternative management methods for organic/carbonaceous waste are less protective of public health and the environment than stabilization and landfilling; or

(C) Provide information demonstrating that:

(I) Recycling and treatment facilities are unavailable for the waste, including a map marked both with the point of waste generation and the point(s) of the nearest treatment, recycling and incineration facility(s) that could manage the dangerous waste; and

(II) The organic/carbonaceous waste has a heat content less than 3,000 BTU/LB or a moisture content greater than sixty-five percent.

(c) Each petition must include the following statement signed by the petitioner or an authorized representative:

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this petition and all attached docu-

ments, and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe the submitted information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

(d) Each petition must be submitted to:

Department of Ecology
Hazardous Waste Land
Disposal Exemption
Mailstop PV-11
Olympia, WA 98504-8711

(e) After receiving a petition, the department may request any additional information that reasonably may be required to evaluate the petition and accompanying demonstration, such as a comprehensive characterization of the disposal unit site including an analysis of background air, soil, and water quality. Simulation models must be calibrated for the specific waste and site conditions, and verified for accuracy by comparison with actual measurements.

(f)(i) The department will make a tentative decision to grant or deny the petition and give public notice of the tentative decision in writing. The notice shall be distributed to interested persons on a mailing list developed specifically for petitions and persons expressing interest in amendments to this chapter. The public comment period shall be a minimum of forty-five days.

(ii) Upon the written request of any interested person, the department may, at its discretion, hold a conference to consider oral comments on the action proposed in the petition. A person requesting a conference must state the issues to be raised and explain why written comments would not suffice to communicate the person's views. The department may in any case decide on its own motion to hold a conference.

(iii) After evaluating all public comments the department will make a final decision in accordance with RCW 34.04.060 or 34.04.080. The department will either deny the petition in writing (stating its reasons for denial), or grant the petition.

(g) Prior to the department's decision, the applicant is required to comply with all restrictions on land disposal under WAC 173-303-140. The department should respond to a petition within ninety days.

(h) If an exemption is granted, the department may include specific conditions as deemed necessary by the department to protect public health and the environment.

(i) If granted, the exemption will apply to land disposal of the specific restricted waste at the individual disposal unit described in the petition and accompanying demonstration. The exemption will not apply to any other restricted waste at that disposal unit, nor will it apply to that specific restricted waste at any other disposal unit.

(j) If an exemption is granted, the department may withdraw the exemption on the following bases:

(i) If there is a threat to public health and the environment; or

(ii) If there is migration of dangerous waste constituents from the land disposal unit or site for as long as the waste remains dangerous; or

(iii) If the department finds reason to believe that the information submitted in a petition is inaccurate or has been falsified such that the petition should have been denied.

(k) The term of an exemption granted under this subsection will be established by the department at the time of issuance.

(l) Any exemption granted by the department does not relieve the petitioner of his responsibilities in the management of dangerous waste under chapter 173-303 WAC.

(m) The department may (but shall not be required to) grant a temporary exemption before making a final decision, whenever it finds that there is a substantial likelihood that an exemption will be finally granted. Temporary exemptions shall not be subject to the procedures of (f) of this subsection. Temporary exemptions shall not be a cause of delaying final decision making on the petition request.

Reviser's note: The spelling error in the above section occurred in the copy filed by the agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending Order 90-42, filed 3/7/91, effective 4/7/91)

WAC 173-303-9903 Discarded chemical products list.

DISCARDED CHEMICAL PRODUCTS LIST

| Dangerous Waste No. | CAS No. | Substance | WDOE Hazard Designation | Reason for Designation* |
|--|-------------------|---|-------------------------|-------------------------|
| ACUTELY DANGEROUS CHEMICAL PRODUCTS | | | | |
| P023 | <u>107-20-0</u> | Acetaldehyde, chloro- | EHW | B H |
| U001 | <u>75-07-0</u> | Acetaldehyde | EHW | C |
| U034 | <u>75-87-6</u> | Acetaldehyde, trichloro- | EHW | H |

AMENDATORY SECTION (Amending Order 90-42, filed 3/7/91, effective 4/7/91)

WAC 173-303-9904 Dangerous waste sources list.

DANGEROUS WASTE SOURCES LIST

| Dangerous Waste No. | Sources |
|---------------------|---------|
|---------------------|---------|

Nonspecific Sources

Generic:

- F001 The following spent halogenated solvents used in degreasing: Tetrachloroethylene, trichloroethylene, methylene chloride, 1,1,1-trichloroethane, carbon tetrachloride, and chlorinated fluorocarbons; and sludges from the recovery of these solvents in degreasing operations. (See footnote 1, below.)
- F002 The following spent halogenated solvents: Tetrachloroethylene, methylene chloride, trichloroethylene, 1,1,1-trichloroethane, chlorobenzene, 1,1,2-trichloro- 1,2,2-trifluoroethane, ortho-dichlorobenzene, trichlorofluoromethane and 1,1,2 trichloroethane; and the still bottoms from the recovery of these solvents. (See footnote 1, below.)
- F003 The following spent nonhalogenated solvents: Xylene, acetone, ethyl acetate, ethyl benzene, ethyl ether, methyl isobutyl ketone, n-butyl alcohol,

- cyclohexanone, and methanol; and the still bottoms from the recovery of these solvents.
- F004 The following spent nonhalogenated solvents: Cresols and cresylic acid, nitrobenzene; and the still bottoms from the recovery of these solvents.
- F005 The following spent nonhalogenated solvents: Toluene, methyl ethyl ketone, carbon disulfide, isobutanol, pyridine, benzene, 2-ethoxyethanol, 2-nitropropane; and the still bottoms from the recovery of these solvents.
- F006 Wastewater treatment sludges from electroplating operations except from the following processes: (1) Sulfuric acid anodizing of aluminum; (2) tin plating on carbon steel; (3) zinc plating (segregated basis) on carbon steel; (4) aluminum or zinc-aluminum plating on carbon steel; (5) cleaning/stripping associated with tin, zinc, and aluminum plating on carbon steel; and (6) chemical etching and milling of aluminum.
- ~~((F019 Wastewater treatment sludges from the chemical conversion coating of aluminum.))~~
- F007 Spent cyanide plating bath solutions from electroplating operations.
- F008 Plating bath residues from the bottom of plating baths from electroplating operations where cyanides are used in the process.
- F009 Spent stripping and cleaning bath solutions from electroplating operations where cyanides are used in the process.
- F010 Quenching bath residues from oil baths from metal heat treating operations where cyanides are used in the process.
- F011 Spent cyanide solutions from salt bath pot cleaning from metal heat treating operations.
- F012 Quenching wastewater treatment sludges from metal heat-treating operations where cyanides are used in the process.
- F019 Wastewater treatment sludges from the chemical conversion coating of aluminum except from zirconium phosphating in aluminum can washing when such phosphating is an exclusive conversion coating process.

PERMANENT

- F020 Wastes (except wastewater and spent carbon from hydrogen chloride purification) from the production or manufacturing use (as a reactant, chemical intermediate, or component in a formulating process) of tri- or tetrachlorophenol, or of intermediates used to produce their pesticide derivatives. (This listing does not include wastes from the production of hexachlorophene from highly purified 2,4,5-trichlorophenol.) (See footnote 2, below.)
- F021 Wastes (except wastewater and spent carbon from hydrogen chloride purification) from the production or manufacturing use (as a reactant, chemical intermediate, or component in a formulating process) of pentachlorophenol, or of intermediates used to produce its derivatives. (See footnote 2, below.)
- F022 Wastes (except wastewater and spent carbon from hydrogen chloride purification) from the manufacturing use (as a reactant, chemical intermediate, or component in a formulating process) of tetra-, penta-, or hexachlorobenzenes under alkaline conditions. (See footnote 2, below.)
- F023 Wastes (except wastewater and spent carbon from hydrogen chloride purification) from the production of materials on equipment previously used for the production or manufacturing use (as a reactant, chemical intermediate, or component in a formulating process) of tri- and tetrachlorophenols. (See footnote 2, below.) (This listing does not include wastes from equipment used only for the production or use of hexachlorophene from highly purified 2,4,5-trichlorophenol.)
- F024 Process wastes, including but not limited to, distillation residues, heavy ends, tars, and reactor cleanout wastes from the production of certain chlorinated aliphatic hydrocarbons by radical catalyzed processes. These chlorinated aliphatic hydrocarbons are those having carbon chain lengths ranging from one to and including five, with varying amounts and positions of chlorine substitution. (See footnote 1, below.) (This listing does not include wastewaters, wastewater treatment sludges, spent catalysts, and wastes listed under specific sources, below.)
- F025 Condensed light ends, spent filters and filter aids, and spent desiccant wastes from the production of certain chlorinated aliphatic hydrocarbons, by free radical catalyzed processes. These chlorinated aliphatic hydrocarbons are those having carbon chain lengths ranging from one to and including five, with varying amounts and positions of chlorine substitution.
- F026 Wastes (except wastewater and spent carbon from hydrogen chloride purification) from the production of materials on equipment previously used for the manufacturing use (as a reactant, chemical intermediate, or component in a formulating process) of tetra-, penta-, or hexachlorobenzene under alkaline conditions. (See footnote 2, below.)

- F027 Discarded unused formulations containing tri-, tetra-, or pentachlorophenol or discarded unused formulations containing compounds derived from these chlorophenols. (See footnote 2, below.) (This listing does not include formulations containing hexachlorophene synthesized from prepurified 2,4,5-trichlorophenol as the sole component.)
- F028 Residues resulting from the incineration or thermal treatment of soil contaminated with nonspecific sources wastes F020, F021, F022, F023, F026 and F027.
- ~~((F024 Wastes, including but not limited to, distillation residues, heavy ends, tars, and reactor cleanout wastes from the production of chlorinated aliphatic hydrocarbons, having carbon content from one to five, utilizing free radical catalyzed processes. (See footnote 1, below.) (This listing does not include light ends, spent filters and filter aids, spent desiccants, wastewater, wastewater treatment sludges, spent catalysts, and wastes listed under specific sources, below.)))~~

Specific Sources

Wood Preservation:

- K001 Bottom sediment sludge from the treatment of wastewaters from wood preserving processes that use creosote and/or pentachlorophenol. (See footnote 1, below.)

Inorganic Pigments:

- K002 Wastewater treatment sludge from the production of chrome yellow and orange pigments.
- K003 Wastewater treatment sludge from the production of molybdate orange pigments.
- K004 Wastewater treatment sludge from the production of zinc yellow pigments.
- K005 Wastewater treatment sludge from the production of chrome green pigments.
- K006 Wastewater treatment sludge from the production of chrome oxide green pigments (anhydrous and hydrated).
- K007 Wastewater treatment sludge from the production of iron blue pigments.
- K008 Oven residue from the production of chrome oxide green pigments.

Organic Chemicals:

- K009 Distillation bottoms from the production of acetaldehyde from ethylene.
- K010 Distillation side cuts from the production of acetaldehyde from ethylene.
- K011 Bottom stream from the wastewater stripper in the production of acrylonitrile.
- K013 Bottom stream from the acetonitrile column in the production of acrylonitrile.

- K014 Bottoms from the acetonitrile purification column in the production of acrylonitrile.
- K015 Still bottoms from the distillation of benzyl chloride. (See footnote 1, below.)
- K016 Heavy ends or distillation residues from the production of carbon tetrachloride. (See footnote 1, below.)
- K017 Heavy ends (still bottoms) from the purification column in the production of epichlorohydrin. (See footnote 1, below.)
- K018 Heavy ends from the fractionation column in ethyl chloride production. (See footnote 1, below.)
- K019 Heavy ends from the distillation of ethylene dichloride in ethylene dichloride production. (See footnote 1, below.)
- K020 Heavy ends from the distillation of vinyl chloride in vinyl chloride monomer production. (See footnote 1, below.)
- K021 Aqueous spent antimony catalyst waste from fluoromethanes production. (See footnote 1, below.)
- K022 Distillation bottom tars from the production of phenol/acetone from cumene.
- K023 Distillation light ends from the production of phthalic anhydride from naphthalene.
- K024 Distillation bottoms from the production of phthalic anhydride from naphthalene.
- K093 Distillation light ends from the production of phthalic anhydride from ortho-xylene.
- K094 Distillation bottoms from the production of phthalic anhydride from ortho-xylene.
- K025 Distillation bottoms from the production of nitrobenzene by the nitration of benzene.
- K026 Stripping still tails from the production of methyl ethyl pyridines.
- K027 Centrifuge and distillation residues from toluene diisocyanate production.
- K028 Spent catalyst from the hydrochlorinator reactor in the production of 1,1,1-trichloroethane. (See footnote 1, below.)
- K029 Waste from the product steam stripper in the production of 1,1,1-trichloroethane. (See footnote 1, below.)
- K095 Distillation bottoms from the production of 1,1,1-trichloroethane. (See footnote 1, below.)
- K096 Heavy ends from the heavy ends column from the production of 1,1,1-trichloroethane. (See footnote 1, below.)
- K030 Column bottoms or heavy ends from the combined production of trichloroethylene and perchloroethylene. (See footnote 1, below.)
- K083 Distillation bottoms from aniline production.
- K103 Process residues from aniline extraction from the production of aniline.
- K104 Combined wastewater streams generated from nitrobenzene/aniline production.
- K085 Distillation of fractionation column bottoms from the production of chlorobenzenes. (See footnote 1, below.)
- K105 Separated aqueous stream from the reactor product washing step in the production of chlorobenzenes. (See footnote 1, below.)
- K111 Product washwaters from the production of dinitrotoluene via nitration of toluene.
- K112 Reaction by-product water from the drying column in the production of toluenediamine via hydrogenation of dinitrotoluene.
- K113 Condensed liquid light ends from the purification of toluenediamine in the production of toluenediamine via hydrogenation of dinitrotoluene.
- K114 Vicinals from the purification of toluenediamine in the production of toluenediamine via hydrogenation of dinitrotoluene.
- K115 Heavy ends from the purification of toluenediamine in the production of toluenediamine via hydrogenation of dinitrotoluene.
- K116 Organic condensate from the solvent recovery column in the production of toluene diisocyanate via phosgenation of toluenediamine. (See footnote 1, below.)
- K117 Wastewater from the reactor vent gas scrubber in the production of ethylene dibromide via bromination of ethene.
- K118 Spent adsorbent solids from purification of ethylene dibromide in the production of ethylene dibromide via bromination of ethene.
- K136 Still bottoms from the purification of ethylene dibromide in the production of ethylene dibromide via bromination of ethene.
- Explosives:**
- K044 Wastewater treatment sludges from the manufacturing and processing of explosives.
- K045 Spent carbon from the treatment of wastewater containing explosives.
- K046 Wastewater treatment sludges from the manufacturing, formulation and loading of lead-based initiating compounds.
- K047 Pink/red water from TNT operations.
- Inorganic Chemicals:**
- K071 Brine purification muds from the mercury cell process in chlorine production, where separately prepurified brine is not used.
- K073 Chlorinated hydrocarbon waste from the purification step of the diaphragm cell process using

graphite anodes in chlorine production. (See footnote 1, below.)

K106 Wastewater treatment sludge from the mercury cell process in chlorine production.

Petroleum Refining:

K048 Dissolved air flotation (DAF) float from the petroleum refining industry.

K049 Slop oil emulsion solids from the petroleum refining industry.

K050 Heat exchanger bundle cleaning sludge from the petroleum refining industry.

K051 API separator sludge from the petroleum refining industry.

K052 Tank bottoms (leaded) from the petroleum refining industry.

Iron and Steel:

K061 Emission control dust/sludge from the primary production of steel in electric furnaces.

K062 Spent pickle liquor generated by steel finishing operations of facilities within the iron and steel industry (SIC Codes 331 and 332).

Pesticides:

K031 Byproduct salts generated in the production of MSMA and cacodylic acid.

K032 Wastewater treatment sludge from the production of chlordane. (See footnote 3, below.)

K033 Wastewater and scrub water from the chlorination of cyclopentadiene in the production of chlordane. (See footnote 3, below.)

K034 Filter solids from the filtration of hexachlorocyclopentadiene in the production of chlordane. (See footnote 3, below.)

K097 Vacuum stripper discharge from the chlordane chlorinator in the production of chlordane. (See footnote 3, below.)

K035 Wastewater treatment sludges generated in the production of creosote.

K036 Still bottoms from toluene reclamation distillation in the production of disulfoton.

K037 Wastewater treatment sludges from the production of disulfoton.

K038 Wastewater from the washing and stripping of phorate production. (See footnote 3, below.)

K039 Filter cake from the filtration of diethylphosphorodithioic acid in the production of phorate. (See footnote 3, below.)

K040 Wastewater treatment sludge from the production of phorate. (See footnote 3, below.)

K041 Wastewater treatment sludge from the production of toxaphene. (See footnote 3, below.)

K098 Untreated process wastewater from the production of toxaphene. (See footnote 3, below.)

K042 Heavy ends or distillation residues from the distillation of tetrachlorobenzene in the production of 2,4,5-T. (See footnote 1, below.)

K043 2,6-Dichlorophenol waste from the production of 2,4-D. (See footnote 1, below.)

K099 Untreated wastewater from the production of 2,4-D. (See footnote 1, below.)

K123 Process wastewater (including supernates, filtrates, and wastewaters) from the production of ethylenebisdithiocarbamic acid and its salts.

K124 Reactor vent scrubber water from the production of ethylenebisdithiocarbamic acid and its salts.

K125 Filtration, evaporation, and centrifugation solids from the production of ethylenebisdithiocarbamic acid and its salts.

K126 Baghouse dust and floor sweepings in milling and packaging operations from the production or formulation of ethylenebisdithiocarbamic acid and its salts.

K131 Wastewater from the reactor and spent sulfuric acid from the acid dryer from the production of methyl bromide.

K132 Spent absorbent and wastewater separator solids from the production of methyl bromide.

Primary Copper:

K064 Acid plant blowdown slurry/sludge resulting from the thickening of blowdown slurry from primary copper production.

Primary Lead:

K065 Surface impoundment solids contained in and dredged from surface impoundments at primary lead smelting facilities.

Primary Zinc:

K066 Sludge from treatment of process wastewater and/or acid plant blowdown from primary zinc production.

Primary Aluminum:

K088 Spent potliners from primary aluminum reduction.

Ferroalloys:

K090 Emission control dust or sludge from ferrochromium-silicon production.

K091 Emission control dust or sludge from ferrochromium production.

Secondary Lead:

K069 Emission control dust/sludge from secondary lead smelting.

K100 Waste leaching solution from acid leaching of emission control dust/sludge from secondary lead smelting.

Veterinary Pharmaceuticals:

- K084 Wastewater treatment sludges generated during the production of veterinary pharmaceuticals from arsenic or organo-arsenic compounds.
- K101 Distillation tar residues from the distillation of aniline-based compounds in the production of veterinary pharmaceuticals from arsenic or organo-arsenic compounds.
- K102 Residue from the use of activated carbon for decolorization in the production of veterinary pharmaceuticals from arsenic or organo-arsenic compounds.

Ink Formulation:

- K086 Solvent washes and sludges, caustic washes and sludges, or water washes and sludges from cleaning tubs and equipment used in the formulation of ink from pigments, driers, soaps, and stabilizers containing chromium and lead.

Coking:

- K060 Ammonia still-lime sludge from coking operations.
- K087 Decanter tank tar sludge from coking operations.

Footnotes

- 1 These wastes contain or may contain halogenated hydrocarbons. Although WAC 173-303-082 states that these wastes are DW, WAC 173-303-070(5), special knowledge, requires generators who know that their waste contains greater than one percent of these listed halogenated hydrocarbons to designate their waste EHW.
- 2 For wastes listed with the dangerous waste numbers F020, F021, F022, F023, F026, or F027 the quantity exclusion limit is 2.2 lbs. (1 kg) per month or per batch.
- 3 These wastes contain or may contain X Category toxic constituents. Although WAC 173-303-082 states that these wastes are DW, WAC 173-303-070(5), special knowledge, requires generators who know that their waste contains greater than 0.1 percent of these listed toxic constituents to designate their waste EHW.

State Sources

- W001 The following wastes generated from the salvaging, rebuilding, or discarding of transformers, bushing, or capacitors which contain polychlorinated biphenyls (PCB): Cooling and insulating fluids; cores, including core papers, from unrinsed transformers and capacitors; transformers and capacitors which will no longer be used for their intended use, except for those transformers or capacitors which have been rinsed; and, rinsate from the rinsing of transformers and capacitors. For the purposes of this listing, the rinsing of PCB containing items shall be conducted as follows: First, the item is drained of all free flowing liquid; second, the item is filled with solvent and allowed to stand for at least eighteen hours; last, the item is drained thoroughly and the solvent is collected. Solvents

may include kerosene, xylene, toluene and other solvents in which PCB are readily soluble. (Note—Certain PCB wastes are excluded from this listing under WAC 173-303-071 (3)(k). The generator should check that section to determine if his PCB waste is excluded from the requirements of chapter 173-303 WAC.)

AMENDATORY SECTION (Amending Order 88-24, filed 1/4/89)**WAC 173-303-9905 Dangerous waste constituents list.**

Acetic Acid,2,4,5-trichlorophenoxy-, salts and esters (2,4,5-T, salts and esters)
 Acetonitrile [Ethanenitrile]
 Acetophenone (Ethanone, 1-phenyl)
 -(alpha-Acetylbenzyl)-4-hydroxycoumarin and salts (Warfarin)
 2-Acetylaminofluorene (Acetamide,N-9H- fluoren-2-yl-)
 Acetyl chloride (Ethanoyl chloride)
 1-Acetyl-2-thiourea (Acetamide, N-(aminothioxomethyl)-)
 Acrolein (2-Propenal)
 Acrylamide (2-Propenamamide)
 Acrylonitrile (2-Propenenitrile)
 Aflatoxins
 Aldrin (1,2,3,4,10,10-Hexachloro- 1,4,4a,5,8,8a,-hexahydro-endo,exo- 1,4:5,8-Dimethanonaphthalene)
 Allyl alcohol (2-Propen-1-ol)
Allyl chloride (1-Propane, 3-chloro)
 Aluminum phosphide
 4-Aminobiphenyl ([1,1'-Biphenyl]-4-amine)
 6-Amino-1,1a,2,8,8a,8b-hexahydro-8-(hydroxymethyl)-8a-methoxy-5-methyl- carbamate azirino[2',3':3,4]pyrrolo[1,2-a]indole-4,7-dione, (ester) (Mitomycin C)
 (Azirino[2'3':3,4]pyrrolo(1,2-a)indole-4,7- dione, 6-amino-8[
 4-Aminopyridine(4-Pyridinamine)
 Arsenic and compounds, N.O.S.*
 Barium and compounds, N.O.S.*
 Barium cyanide
 Benz[c]acridine (3,4-Benzacridine)
 Benz[a]anthracene (1,2-Benzanthracene)
 Benzene (Cyclohexatriene)
 Benzenearsonic acid (Arsonic acid, phenyl-)
 Benzene, 2-amino-1-methyl (o-Toluidine)
 Benzene, 4-amino-1-methyl (p-Toluidine)
 Benzene, dichloromethyl- (Benzal chloride)
 Benzenethiol (Thiophenol)
 Benzidine ([1,1'-Biphenyl]-4,4' diamine)
 Benzo[b]fluoranthene (2,3-Benzofluoranthene)
 Benzo[j]fluoranthene (7,8-Benzofluoranthene)
 Benzo[a]pyrene (3,4-Benzopyrene)
 p Benzoquinone (1,4-Cyclohexadienedione)
 Benzotrichloride (Benzene, trichloromethyl-)
 Benzyl chloride (Benzene, (chloromethyl)-)
 Beryllium and compounds, N.O.S.*

- Bis(2-chloroethoxy)methane (Ethane, 1,1'-[methylenebis(oxy)]bis[2-chloro-])
- Bis(2-chloroethyl) ether (Ethane, 1,1'-oxybis[2-chloro-])
- N,N-Bis(2-chloroethyl)-2-naphthylamine (Chlornaphazine)
- Bis(2-chloroisopropyl) ether (Propane, 2,2'-oxybis[2-chloro-])
- Bis(chloromethyl) ether (Methane, oxybis[chloro-])
- Bis(2-ethylhexyl) phthalate (1,2-Benzenedicarboxylic acid, bis(2-ethylhexyl) ester)
- Bromoacetone (2-Propanone, 1-bromo-)
- Bromomethane (Methyl bromide)
- 4-Bromophenyl phenyl ether (Benzene, 1-bromo-4-phenoxy-)
- Brucine (Strychnidin-10-one, 2,3-dimethoxy-)
- 2-Butanone peroxide (Methyl ethyl ketone, peroxide)
- Butyl benzyl phthalate (1,2-Benzenedicarboxylic acid, butyl phenylmethyl ester)
- 2-sec-Butyl-4,6-dinitrophenol (DNBP) (Phenol, 2,4-dinitro-6-(1-methylpropyl)-)
- Cadmium and compounds, N.O.S.*
- Calcium chromate (Chromic acid, calcium salt)
- Calcium cyanide
- Carbamic Acid, ethyl ester
- Carbon disulfide (Carbon bisulfide)
- Carbon oxyfluoride (Carbonyl fluoride)
- Chloral (Acetaldehyde, trichloro-)
- Chlorambucil (Butanoic acid, 4-[bis(2-chloroethyl)amino]benzene-)
- Chlordane (alpha and gamma isomers) (4,7-Methanoindan, 1,2,4,5,6,7,8,8-octachloro-3,4,7,7a-tetrahydro-) (alpha and gamma isomers)
- Chlorinated benzenes, N.O.S.*
- Chlorinated ethane, N.O.S.*
- Chlorinated fluorocarbons, N.O.S.*
- Chlorinated naphthalene, N.O.S.*
- Chlorinated phenol, N.O.S.*
- Chloroacetaldehyde (Acetaldehyde, chloro-)
- Chloroalkyl ethers, N.O.S.*
- p-Chloroaniline (Benzenamine, 4-chloro-)
- Chlorobenzene (Benzene, chloro-)
- Chlorobenzilate (Benzenoacetic acid, 4-chloro-alpha-(4-chlorophenyl)-alpha-hydroxy-,ethyl ester)
- 2-Chloro-1,3-butadiene
- p-Chloro-m-cresol (Phenol, 4-Chloro-3-methyl)
- 1-Chloro-2,3-epoxypropane (Oxirane, 2-(chloromethyl)-)
- 2-Chloroethyl vinyl ether (Ethene, (2-chloroethoxy)-)
- Chloroform (Methane, trichloro-)
- Chloromethane (Methyl chloride)
- Chloromethyl methyl ether (Methane, chloromethoxy-)
- 2-Chloronaphthalene (Naphthalene, beta-chloro-)
- 2-Chlorophenol (Phenol, o-chloro-)
- 1-(o-Chlorophenyl)thiourea (Thiourea, (2-chlorophenyl)-)
- 3-Chloropropene
- 3-Chloropropionitrile (Propanenitrile, 3-chloro-)
- Chromium and compounds, N.O.S.*
- Chrysene (1,2-Benzphenanthrene)
- Citrus red No. 2 (2-Naphthol, 1-[(2,5-dimethoxyphenyl)azo]-)
- Coal tars
- Copper cyanide
- Creosote (Creosote, wood)
- Cresols (Cresylic acid) (Phenol, methyl-)
- Crotonaldehyde (2-Butenal)
- Cyanides (soluble salts and complexes), N.O.S.*
- Cyanogen (Ethanedinitrile)
- Cyanogen bromide (Bromine cyanide)
- Cyanogen chloride (Chlorine cyanide)
- Cycasin (beta-D-Glucopyranoside, (methyl-ONN-azoxy)methyl-)
- 2-Cyclohexyl-4,6-dinitrophenol (Phenol, 2-cyclohexyl-4,6-dinitro-)
- Cyclophosphamide (2H-1,3,2-Oxazaphosphorine, [bis(2-chloroethyl)amino]-tetrahydro-, 2-oxide)
- Daunomycin (5,12-Naphthacenedione, (8S-cis)-8-acetyl-10-[(3-amino-2,3,6-trideoxy)-alpha-L-lyxohexopyranosyl]oxy]-7,8,9,10-tetrahydro-6,8,11-trihydroxy-1-methoxy-)
- DDD (Dichlorodiphenyldichloroethane) (Ethane, 1,1-dichloro-2,2-bis(p chlorophenyl)-)
- DDE (Ethylene, 1,1-dichloro-2,2-bis(4-chlorophenyl)-)
- DDT (Dichlorodiphenyltrichloroethane) (Ethane, 1,1,1-trichloro-2,2-bis(p-chlorophenyl)-)
- Diallate (S-(2,3-dichloroallyl) diisopropylthiocarbamate)
- Dibenz[a,h]acridine (1,2,5,6-Dibenzacridine)
- Dibenz[a,j]acridine (1,2,7,8-Dibenzacridine)
- Dibenz[a,h]anthracene (1,2,5,6-Dibenzanthracene)
- 7H-Dibenzo[c,g]carbazole (3,4,5,6-Dibenzcarbazole)
- Dibenzo[a,e]pyrene (1,2,4,5-Dibenzpyrene)
- Dibenzo[a,h]pyrene (1,2,5,6-Dibenzpyrene)
- Dibenzo[a,i]pyrene (1,2,7,8-Dibenzpyrene)
- 1,2-Dibromo-3-chloropropane (Propane, 1,2-dibromo-3-chloro-)
- 1,2-Dibromoethane (Ethylene dibromide)
- Dibromomethane (Methylene bromide)
- Di-n-butyl phthalate (1,2-Benzenedicarboxylic acid, dibutyl ester)
- o-Dichlorobenzene (Benzene, 1,2-dichloro-)
- m-Dichlorobenzene (Benzene, 1,3-dichloro-)
- p-Dichlorobenzene (Benzene, 1,4-dichloro-)
- Dichlorobenzene, N.O.S.* (Benzene, dichloro-, N.O.S.*)
- 3,3'-Dichlorobenzidine ([1,1'-Biphenyl]-4,4'-diamine, 3,3'-dichloro-)
- 1,4-Dichloro-2-butene (2-Butene, 1,4-Butene, 1,4-dichloro-)
- Dichlorodifluoromethane (Methane, dichlorodifluoro-)
- 1,1-Dichloroethane (Ethylidene dichloride)
- 1,2-Dichloroethane (Ethylene dichloride)
- trans-1,2-Dichloroethene (1,2-Dichloroethylene)
- Dichloroethylene, N.O.S.* (Ethene, dichloro-, N.O.S.*)
- 1,1-Dichloroethylene (Ethene, 1,1-dichloro-)
- Dichloromethane (Methylene chloride)
- 2,4-Dichlorophenol (Phenol, 2,4-dichloro-)
- 2,6-Dichlorophenol (Phenol, 2,6-dichloro-)

- 2,4-Dichlorophenoxyacetic acid (2,4-D), salts and esters (Acetic acid, 2,4-dichlorophenoxy-, salts and esters)
- Dichlorophenylarsine (Phenyl dichloroarsine)
- Dichloropropane, N.O.S.* (Propane, dichloro-, N.O.S.*)
- 1,2-Dichloropropane (Propylene dichloride)
- Dichloropropanol, N.O.S.* (Propanol, dichloro-, N.O.S.*)
- Dichloropropene, N.O.S.* (Propene, dichloro-, N.O.S.*)
- 1,3-Dichloropropene (1-Propene, 1,3-dichloro-)
- Dieldrin (1,2,3,4,10,10-hexachloro-6,7-epoxy-1,4,4a,5,6,7,8,8a-octa-hydro-endo, exo-1,4:5,8-Dimethanonaphthalene)
- 1,2:3,4-Diepoxybutane (2,2'-Bioxirane)
- Diethylarsine (Arsine, diethyl-)
- N,N'-Diethylhydrazine (Hydrazine, 1,2-diethyl)
- O,O-Diethyl S-methyl ester of phosphorodithioic acid (Phosphorodithioic acid, O,O-diethyl S-methyl ester)
- O,O-Diethylphosphoric acid, O-p-nitrophenyl ester (Phosphoric acid, diethyl p-nitrophenyl ester)
- Diethyl phthalate (1,2-Benzenedicarboxylic acid, diethyl ester)
- O,O-Diethyl O-2-pyrazinyl phosphorothioate (Phosphorothioic acid, O,O-diethyl O-pyrazinyl ester)
- Diethylstilbesterol (4,4'-Stilbenediol, alpha,alpha-diethyl, bis(dihydrogen phosphate, (E)-)
- Dihydrosafrole (Benzene, 1,2-methylenedioxy-4-propyl-)
- 3,4-Dihydroxy-alpha-(methylamino)methyl benzyl alcohol (1,2-Benzenediol, 4-[1-hydroxy-2-(methylamino)ethyl]-)
- Diisopropylfluorophosphate (DFP) (Phosphorofluoridic acid, bis(1-methylethyl) ester)
- Dimethoate (Phosphorodithioic acid, O,O-dimethyl S-[2-(methylamino)-2-oxoethyl] ester)
- 3,3'-Dimethoxybenzidine ([1,1'-Biphenyl]-4,4'-diamine, 3-3'-dimethoxy-)
- p-Dimethylaminoazobenzene (Benzenamine, N,N-dimethyl-4-(phenylazo)-)
- 7,12-Dimethylbenz[a]anthracene (1,2-Benzanthracene, 7,12-dimethyl-)
- 3,3'-Dimethylbenzidine ([1,1'-Biphenyl]-4,4'-diamine, 3,3'-dimethyl-)
- Dimethylcarbamoyl chloride (Carbamoyl chloride, dimethyl-)
- 1,1-Dimethylhydrazine (Hydrazine, 1,1-dimethyl-)
- 1,2-Dimethylhydrazine (Hydrazine, 1,2-dimethyl-)
- 3,3-Dimethyl-1-(methylthio)-2-butanone, O-[(methylamino) carbonyl]oxime (Thiofanox)
- alpha,alpha-Dimethylphenethylamine (Ethanamine, 1,1-dimethyl-2-phenyl)
- 2,4-Dimethylphenol (Phenol, 2,4-dimethyl-)
- Dimethyl phthalate (1,2-Benzenedicarboxylic acid, dimethyl ester)
- Dimethyl sulfate (Sulfuric acid, dimethyl ester)
- Dinitrobenzene, N.O.S.* (Benzene, dinitro-, N.O.S.*)
- 4,6-Dinitro-o-cresol and salts (Phenol, 2,4-dinitro-6-methyl-, and salts)
- 2,4-Dinitrophenol (Phenol, 2,4-dinitro-)
- 2,4-Dinitrotoluene (Benzene, 1-methyl-2,4-dinitro-)
- 2,6-Dinitrotoluene (Benzene, 1-methyl-2,6-dinitro-)
- Di-n-octyl phthalate (1,2-Benzenedicarboxylic acid, dioctyl ester)
- 1,4-Dioxane (1,4-Diethylene oxide)
- Diphenylamine (Benzenamine, N-Phenyl-)
- 1,2-Diphenylhydrazine (Hydrazine, 1,2-diphenyl-)
- Di-n-propylmitrosamine (N-Nitroso-di-n-propylamine)
- Disulfoton (O,O-diethyl S-[2-(ethylthio)ethyl] phosphorodithioate)
- 2,4-Dithiobiuret (Thioimidodicarbonic diamide)
- Endosulfan (5-Norbornene, 2,3-dimethanol, 1,4,5,6,7,7-hexachloro-, cyclic sulfite)
- Endrin and metabolites (1,2,3,4,10,10-hexachloro-6,7-epoxy-1,4,4a,5,6,7,8,8a-octahydro-endo,endo-1,4:5,8-dimethanonaphthalene, and metabolites)
- Ethyl carbamate (Urethan) (Carbamic acid, ethyl ester)
- Ethyl cyanide (propanenitrile)
- Ethylenebisdithiocarbamic acid, salts and esters (1,2-Ethanediylobiscarbamodithioic acid, salts and esters.
- Ethylene glycol monoethyl ether (2-Ethoxyethanol)
- Ethyleneimine (Aziridine)
- Ethylene oxide (Oxirane)
- Ethylenethiourea (2-Imidazolidinethione)
- Ethylmethacrylate (2-Propenoic acid, 2-methyl-, ethyl ester)
- Ethyl methanesulfonate (Methanesulfonic acid, ethyl ester)
- Fluoranthene (Benzo[j,k]fluorene)
- Fluorine
- 2-Fluoroacetamide (Acetamide, 2-fluoro-)
- Fluoroacetic acid, sodium salt (Acetic acid, fluoro-, sodium salt)
- Formaldehyde (Methylene, oxide)
- Formic acid (Methanoic acid)
- Glycidylaldehyde (1-Propanol-2,3-epoxy)
- Halomethane, N.O.S.*
- Heptachlor (4,7-Methano-1H-indene, 1,4,5,6,7,8,8-heptachloro-3a,4,7,7a-tetrahydro-)
- Heptachlor epoxide (alpha, beta, and gamma isomers) (4,7-Methano-1H-indene, 1,4,5,6,7,8,8-heptachloro-2,3-epoxy-3a,4,7,7-tetrahydro-, alpha, beta and gamma isomers)
- Hexachlorobenzene (Benzene, hexachloro-)
- Hexachlorobutadiene (1,3-Butadiene, hexachloro-)
- Hexachlorocyclohexane (all isomers) (Lindane and isomers)
- Hexachlorocyclopentadiene (1,3-Cyclopentadiene, 1,2,3,4,5,5-hexachloro-)
- Hexachlorodibenzo-p-dioxins
- Hexachlorodibenzofurans
- Hexachloroethane (Ethane, hexachloro-)
- 1,2,3,4,10,10-Hexachloro-1,4,4a,5,8,8a-hexahydro-1,4:5,8-endo,endo-dimethanonphthalene (Hexachlorohexahydro-endo,endo-dimethanonaphthalene)

- Hexachlorophene (2,2'-Methylenebis(3,4,6-trichlorophenol))
- Hexachloropropene (Propene, hexachloro-)
- Hexaethyl tetraphosphate (Tetraphosphoric acid, hexaethyl ester)
- Hydrazine (Diamine)
- Hydrocyanic acid (Hydrogen cyanide)
- Hydrofluoric acid (Hydrogen fluoride)
- Hydrogen sulfide (Sulfur hydride)
- Hydroxydimethylarsine oxide (Cacodylic acid)
- Indeno(1,2,3-cd)pyrene (1,10-(1,2-phenylene)pyrene)
- Iodomethane (Methyl iodide)
- Iron Dextran (Ferric dextran)
- Isocyanic acid, methyl ester (Methyl isocyanate)
- Isobutyl alcohol (1-Propanol, 2-methyl-)
- Isosafrole (Benzene, 1,2-methylenedioxy-4-allyl-)
- Kepone (Decachlorooctahydro-1,3,4-Methano-2H-cyclobuta[cd]pentalene-2-one)
- Lasiocarpine (2-Butanoic acid, 2-methyl-,7-[(2,3-dihydroxy-2-(1-methoxyethyl)-3-methyl-1-oxobutoxy)methyl]-2,3,5,7a-tetrahydro-1H-pyrrolizin-1-yl ester)
- Lead and compounds, N.O.S.*
- Lead acetate (Acetic acid, lead salt)
- Lead phosphate (Phosphoric acid, lead salt)
- Lead subacetate (Lead, bis(acetato-O)tetrahydroxytri-)
- Maleic anhydride (2,5-Furandione)
- Maleic hydrazide (1,2-Dihydro-3,6-pyridazinedione)
- Malononitrile (Propanedinitrile)
- Melphalan (Alanine, 3-[p-bis(2-chloroethyl)amino]phenyl-,L-)
- Mercury Fulminate (Fulminic acid, mercury salt)
- Mercury and compounds, N.O.S.*
- Methacrylonitrile (2-Propenenitrile, 2-methyl-)
- Methanethiol (Thiomethanol)
- Methapyrilene (Pyridine, 2-[(2-dimethylamino)ethyl]-2-thenylamino-)
- Metholonyl (Acetimidic acid, N-[(methylcarbamoyl)oxy]thio-,methyl ester)
- Methoxychlor (Ethane, 1,1,1-trichloro-2,2'-bis(p-methoxyphenyl)-)
- 2-Methylaziridine (1,2-Propylenimine)
- 3-Methylcholanthrene (Benz[j]aceanthrylene, 1,2-dihydro-3-methyl-)
- Methyl chlorocarbonate (Carbonochloridic acid, methyl ester)
- 4,4'-Methylenebis(2-chloroaniline) (Benzenamine, 4,4'-methylenebis-(2-chloro-)
- Methyl ethyl ketone (MEK) (2-Butanone)
- Methyl hydrazine (Hydrazine, methyl-)
- 2-Methylactonitrile (Propanenitrile, 2-hydroxy-2-methyl-)
- Methyl methacrylate (2-Propenoic acid, 2-methyl-, methyl ester)
- Methyl methanesulfonate (Methanesulfonic acid, methyl ester)
- 2-Methyl-2-(methylthio)propionaldehyde-o-(methylcarbonyl) oxime
- N-Methyl-N'-nitro-N-nitrosoguanidine (Guanidine, N-nitros-N-methyl-N' nitro-)
- Methyl parathion (O,O-dimethyl O-(4-nitrophenyl) phosphorothioate)
- Methylthiouracil (4-1H-Pyrimidinone, 2,3-dihydro-6-methyl-2-thioxo-)
- Mustard gas (Sulfide, bis(2-chloroethyl)-)
- Naphthalene
- 1,4-Naphthoquinone (1,4-Naphthalenedione)
- 1-Naphthylamine (alpha-Naphthylamine)
- 2-Naphthylamine (beta-Naphthylamine)
- 1-Naphthyl-2-thiourea (Thiourea, 1-naphthalenyl-)
- Nickel and compounds, N.O.S.*
- Nickel carbonyl (Nickel tetracarbonyl)
- Nickel cyanide (nickel (II) cyanide)
- Nicotine and salts, Pyridine, (S)-3-(1-methyl-2-pyrrolidinyl)-, and salts)
- Nitric oxide (Nitrogen (II) oxide)
- p-Nitroaniline (Benzenamine, 4-nitro-)
- Nitrobenzene (Benzene, nitro-) Nitrobenzene
- Nitrogen dioxide (Nitrogen (IV) oxide)
- Nitrogen mustard and hydrochloride salt (Ethanamine, 2-chloro-, N-(2-chloroethyl)-N-methyl-, and hydrochloride salt)
- Nitrogen mustard N-Oxide and hydrochloride salt (Ethanamine, 2-chloro-, N-(2-chloroethyl)-N-methyl-, N-oxide, and hydro-chloride salt)
- Nitroglycerine (1,2,3-Propanetriol, trinitrate)
- 4-Nitrophenol (Phenol, 4-nitro-)
- 2-Nitropropane (Propane 2-nitro)
- 4-Nitroquinoline-1-oxide (Quinoline, 4-nitro-1-oxide-)
- Nitrosamine, N.O.S.*
- N-Nitrosodi-n-butylamine (1-Butanamine, N-butyl-N-nitroso-)
- N-Nitrosodiethanolamine (Ethanol, 2,2'-(nitrosoimino)bis-)
- N-Nitrosodiethylamine (Ethanamine, N-Ethyl-N-nitroso-)
- N-Nitrosodimethylamine (Dimethylnitrosamine)
- N-Nitroso-N-ethylurea (Carbamide, N-ethyl-N-nitroso-)
- N-Nitrosomethylethylamine (Ethanamine, N-methyl-N-nitroso-)
- N-Nitroso-N-methylurea (Carbamide, N-methyl-N-nitroso-)
- N-Nitroso-N-methylurethane (Carbamic acid, methylnitroso-, ethyl ester)
- N-Nitrosomethylvinylamine (Ethenamine, N-methyl-N-nitroso-)
- N-Nitrosomorpholine (Morpholine, N-nitroso-)
- N-Nitrosornicotine (Nornicotine, N-nitroso-)
- N-Nitrosopiperidine (Pyridine, hexahydro-, N-nitroso-)
- N-Nitrosopyrrolidine (pyrrole, tetrahydro-, N-nitroso-)
- N-Nitrososarcosine (Sarcosine, N-nitroso-)
- 5-Nitro-o-toluidine (Benzenamine, 2-methyl-5-nitro-)
- Octamethylpyrophosphoramidate (Diphosphoramidate, octamethyl-)
- Osmium tetroxide (Osmium (VIII) oxide)
- 7-OCabicyclo[2.2.1]heptane-2,3-dicarbonylic acid (Endothal)
- Paraldehyde (1,3,5-Trioxane, 2,4,6-trinethyl-)
- Parathion (Phosphorothioic acid, O,O-diethyl O-(p-nitrophenyl) ester)
- Pentachlorobenzene (Benzene, pentachloro-)
- Pentachlorodibenzo-p-dioxins
- Pentachlorodibenzofurans

- Pentachloroethane (Ethane, pentachloro-)
 Pentachloronitrobenzene (PCNB) (Benzene, pentachloronitro-)
 Pentachlorophenol (Phenol, pentachloro-)
 Perchloromethyl mercaptan (Methanesulferryl chloride, trichloro-)
 Phenacetin (Acetamide, N-(4-ethoxyphenyl)-)
 Phenol (Benzene, hydroxy-)
 Phenylenediamine (Benzenediamine)
 Phenylmercury acetate (Mercury, acetatophenyl-)
 N-Phenylthiourea (Thiourea, phenyl-)
 Phosgene (Carbonyl chloride)
 Phosphine (Hydrogen phosphide)
 Phosphorodithioic acid, O,O-diethyl S-[(ethylthio)methyl] ester (Phorate)
 Phosphorothioic acid, O,O-dimethyl O-[p-((dimethylamino)sulfonyl)phenyl] ester (Famphur)
 Phthalic acid esters, N.O.S.* (Benzene, 1,2-dicarboxylic acid, esters, N.O.S.*
 Phthalic anhydride (1,2-Benzenedicarboxylic acid anhydride)
 2-Picoline (Pyridine, 2-methyl-)
 Polychlorinated biphenyl, N.O.S.*
 Potassium cyanide
 Potassium silver cyanide (Argentate(1-), dicyano-, potassium)
 Pronamide (3,5-Dichloro-N-(1,1-dimethyl-2-propynyl)benzamide)
 1,3-Propanesultone (1,2-Oxathiolane, 2,2-dioxide)
 Propionic acid, 2-(2,4,5-trichlorophenoxy), salts and esters (2,4,5-TP, Silvex, salts and esters)
 n-Propylamine (1-Propane)
 Propylthiouracil (2,3 dihydro-6-propyl-2 thioxo-4(1H)-pyrimidinone)
 2-Propyn-1-ol (Propargyl alcohol)
 Pyridine
 Reserpine (Yohimban-16-carboxylic acid, 11,17-dimethoxy-18-[(3,4,5-trimethoxybenzoyl)oxy]-, methyl ester)
 Resorcinol (1,3-Benzenediol)
 Saccharin and salts (1,2-Benzoisothiazolin-3-one, 1,1-dioxide, and salts)
 Safrol (Benzene, 1,2-methylenedioxy-4-allyl-)
 Selenious acid (Selenium dioxide)
 Selenium and compounds, N.O.S.*
 Selenium sulfide (Sulfur selenide)
 Selenourea (Carbamimidoseleonic acid)
 Silver and compounds, N.O.S.*
 Silver cyanide
 Sodium cyanide
 Streptozotocin (D-Glucopyranose, 2-deoxy-2-(3-methyl-3-nitrosoureido)-)
 Strontium sulfide
 Strychnine and salts (Strychnidin-10-one, and salts)
 1,2,4,5-Tetrachlorobenzene (Benzene, 1,2,4,5-tetrachloro-)
 Tetrachlorodibenzo-p-dioxins
 Tetrachlorodibenzofurans
 2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) Dibenzo-p-dioxin, 2,3,7,8-tetrachloro-)
 Tetrachloroethane, N.O.S.* (Ethane, tetrachloro-, N.O.S.*)
 1,1,1,2-Tetrachlorethane (Ethane, 1,1,1,2-tetrachloro-)
 1,1,2,2-Tetrachlorethane (Ethane, 1,1,2,2-tetrachloro-)
 Tetrachlorethylene (Ethene, 1,1,2,2-tetrachloro-)¹
 Tetrachloromethane (Carbon tetrachloride)
 2,3,4,6-Tetrachlorophenol (Phenol, 2,3,4,6-tetrachloro-)
 Tetraethyldithiopyrophosphate (Dithiopyrophosphoric acid, tetraethyl-ester)
 Tetraethyl lead (Plumbane, tetraethyl-)
 Tetraethylpyrophosphate (Pyrophosphoric acid, tetraethyl ester)
 Tetranitromethane (Methane, tetranitro-)
 Thallium and compounds, N.O.S.*
 Thallic oxide (Thallium (III) oxide)
 Thallium (I) acetate (Acetic acid, thallium (I) salt)
 Thallium (I) carbonate (Carbonic acid, dithallium (I) salt)
 Thallium (I) chloride
 Thallium (I) nitrate (Nitric acid, thallium (I) salt)
 Thallium selenite
 Thallium (I) sulfate (Sulfuric acid, thallium (I) salt)
 Thioacetamide (Ethanethioamide)
 Thiosemicarbazide (Hydrazinecarbothioamide)
 Thiourea (Carbamide thio-)
 Thiuram (Bis(dimethylthioucarbonyl) disulfide)
 Toluene (Benzene, methyl-)
 Toluenediamine, N.O.S. (Toluene, 2,5-diamine-)
 2,4-Toluenediamine
 2,6-Toluenediamine
 3,4-Toluenediamine
 o-Toluidine hydrochloride (Benzenamine, 2-methyl-, hydrochloride)
 Tolyene diisocyanate (Benzene, 2,4- and 2,6-diisocyanato-methyl-)
 Toxaphene (Camphene, octachloro-)
 Tribromomethane (Bromoform)
 1,2,4-Trichlorobenzene (Benzene, 1,2,4-trichloro-)
 1,1,1-Trichloroethane (Methyl chloroform)
 1,1,2-Trichloroethane (Ethane, 1,1,2-trichloro-)
 Trichloroethene (Trichloroethylene)
 Trichloromonofluoromethane (Methane, trichlorofluoro-)
 2,4,5-Trichlorophenol (Phenol, 2,4,5-trichloro-)
 2,4,6-Trichlorophenol (Phenol, 2,4,6-trichloro-)
 2,4,5-Trichlorophenoxyacetic acid (2,4,5-T, salts and esters) (Acetic acid, 2,4,5-trichlorophenoxy-, salts and esters)
 2,4,5-Trichlorophenoxypropionic acid (Propionic acid, 2-(2,4,5-trichlorophenoxy), salts and esters) (2,4,5-TP, Silvex, salts and esters)
 Trichloropropane, N.O.S.* (Propane, trichloro-, N.O.S.*)
 1,2,3-Trichloropropane (Propane, 1,2,3-trichloro-)
 O,O,O-Triethyl phosphorothioate (Phosphorothioic acid, O,O,O-triethyl ester)
 sym-Trinitrobenzene (Benzene, 1,3,5-trinitro-)
 Tris(1-aziridinyl) phosphine sulfide (Phosphine sulfide, tris(1-aziridinyl-))
 Tris(2,3-dibromopropyl) phosphate (1-Propanol, 2,3-dibromo-, phosphate)
 Trypan blue (2,7-Naphthalenedisulfonic acid, 3,3'-[(3,3'-dimethyl(1,1'-biphenyl)-4,4'-

diyl)bis(azo)]bis(5-amino-4-hydroxy-, tetrasodium salt)
 Undecamethylenediamine, N,N'-bis-(2-chloro-benzyl)-,dihydrochloride N,N'-Undecamethyl-enebis(2-chlorobenzylamine, dihydrochloride)
 Uracil mustard (Uracil 5-[bis(2-chlorethyl)amino]-)
 Vanadic acid, ammonium salt (ammonium vanadate)
 Vanadium pentoxide (Vanadium (V) oxide)

Vinyl chloride (Ethane, chloro-)
 Zinc cyanide
 Zinc phosphide

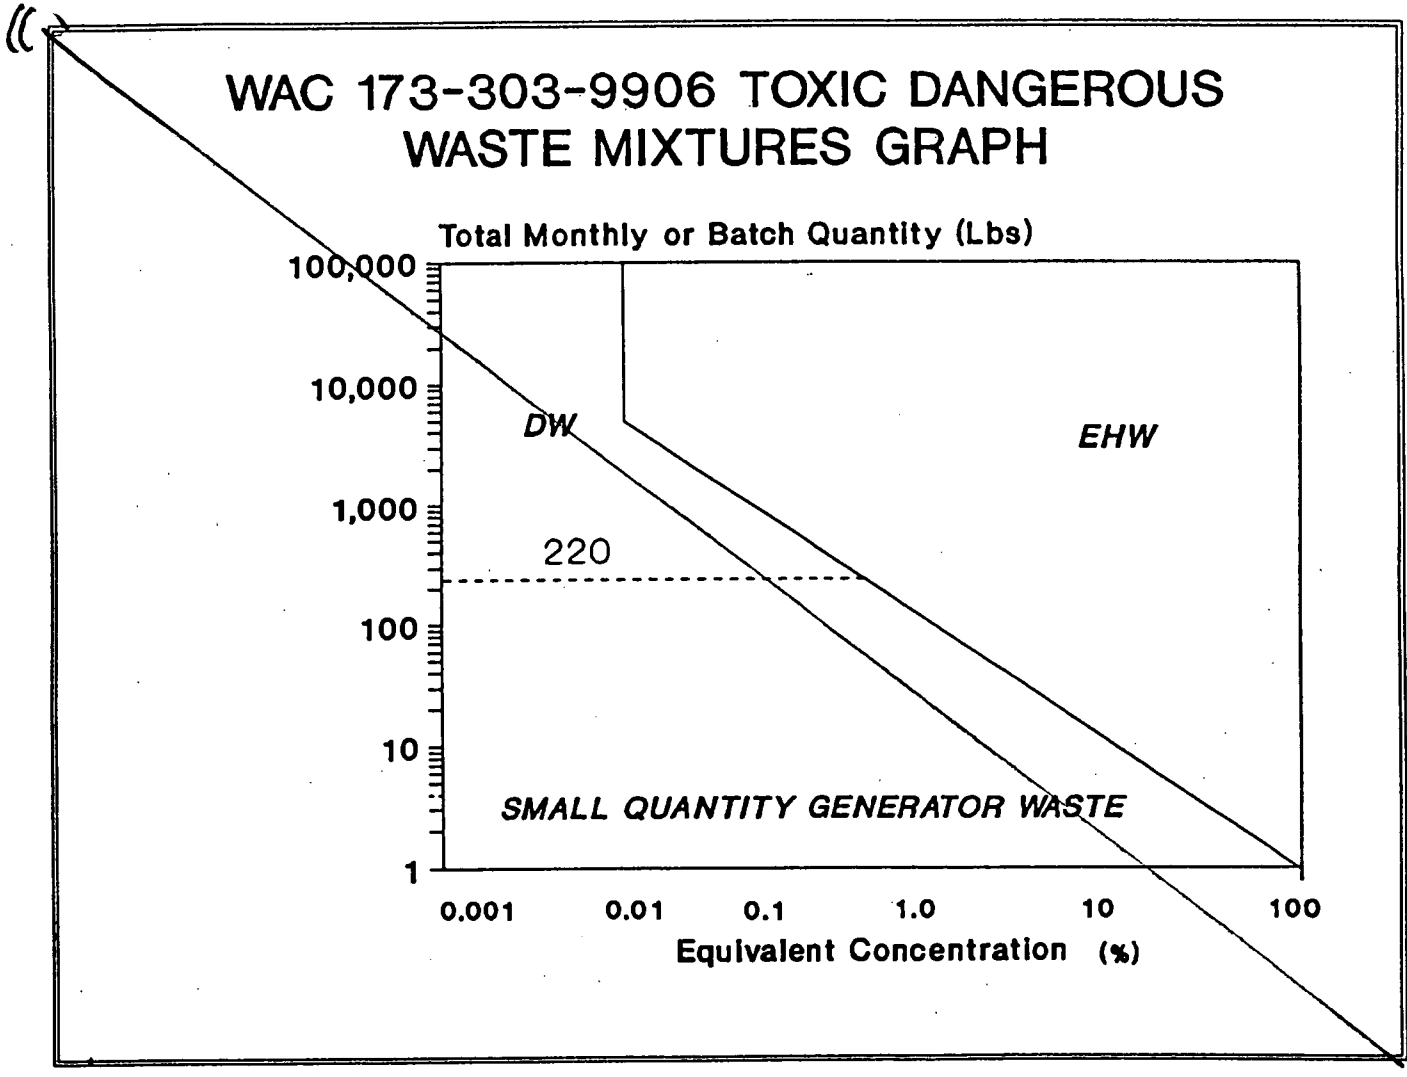

* The abbreviation N.O.S. signifies those members of the general class "not otherwise specified" by name in this listing.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

WSR 94-01-065
PERMANENT RULES
DEPARTMENT OF
SOCIAL AND HEALTH SERVICES
 (Public Assistance)
 [Order 3679—Filed December 8, 1993, 3:26 p.m.]

Date of Adoption: December 8, 1993.

Purpose: Sets limits on speech, occupational, and physical therapy and deletes the need for approval up to these limits. Establishes limits on the number of therapy sessions that a client may receive without the need for prior approval.

Citation of Existing Rules Affected by this Order: Amending WAC 388-86-073 Occupational therapy, 388-86-090 Physical therapy, and 388-86-098 Speech therapy services.

Statutory Authority for Adoption: RCW 74.08.090.

Pursuant to notice filed as WSR 93-22-048 on October 28, 1993.

Effective Date of Rule: Thirty-one days after filing.
 December 8, 1993
 Dewey Brock, Chief
 Office of Vendor Services

AMENDATORY SECTION (Amending Orders 3053 and 3053A, filed 8/21/90 and 8/27/90, effective 9/21/90 and 9/1/90)

WAC 388-86-073 Occupational therapy. (1) The department shall pay for occupational therapy when the ((following conditions are met)) occupational therapy is provided:

- (a) By a licensed occupational therapist((,-or));
- (b) By a licensed occupational therapy assistant supervised by a licensed occupational therapist((,-provides the service));

~~((b)) Approval is obtained before services are performed as required for each program as designated in the division of medical assistance billing instructions; and)) or~~

(c) In schools, by an occupational therapy aide trained and supervised by a licensed occupational therapist.

(2) The department shall pay for occupational therapy ((is provided)):

((i)) (a) Effective September 1, 1993, as part of an outpatient treatment program ((when identified in the early and periodic screening, diagnosis, and treatment program of a recipient twenty years of age and younger)) for adults and children;

((ii)) (b) By a home health agency as described under WAC 388-86-045;

((iii)) (c) As part of the physical medicine and rehabilitation program as described under WAC 388-86-112; ((or

(iv)) (d) In a neuromuscular center; or

(e) By a school district or educational service district as part of an individual education program or individualized family service plan as described under WAC 388-86-022.

((2)) (3) The department shall not pay for occupational therapy when payment for occupational therapy is included ((in)) as part of the reimbursement ((of)) for other treatment programs including, but not limited to, hospital inpatient diagnosis related group services or nursing facility services.

((3)) (4) The department shall pay for the following occupational therapy services in a calendar year when the attending health professional determines the services are medically appropriate:

(a) One occupational therapy assessment;

(b) Two durable medical equipment needs assessments;

(c) Twelve occupational therapy sessions; and

(d) A maximum of twenty-four additional outpatient occupational therapy sessions if services are specifically identified in the medical assistance administration billing instructions and the diagnosis is associated with:

(i) A medically necessary condition for developmentally delayed clients;

(ii) Surgeries involving extremities:

(A) Fractures; or

(B) Open wounds with tendon involvement; or

(C) Dorsal rhizotomy.

(iii) Intracranial injuries;

(iv) Burns;

(v) Traumatic injuries;

(vi) Cerebral palsy;

(vii) Downs syndrome;

(viii) Meningomyelocele;

(ix) Severe oral/motor problems:

(A) Dyspraxia;

(B) Cleft palate and/or cleft lip; or

(C) That interfere with adequate nutrition.

(x) Symptoms involving nervous and musculoskeletal systems:

(A) Abnormality of gait; or

(B) Lack of coordination; or

(xi) Post-completed/approved inpatient physical medicine and rehabilitation program when the client no longer needs nursing services but continues to require specialized outpatient therapy.

(e) Additional sessions when requested and approved through department of health's children with special health care needs program.

(5) For the purposes of this section, a "session" means not less than fifteen minutes and up to one hour of therapy in one day.

(6) The department shall pay for occupational therapy provided to ((recipients)) a client eligible under the:

(a) Categorically needy, children's health, general assistance unemployable and ADATSA programs;

(b) Medically needy program only when the ((recipient)) client is:

(i) Twenty years of age ((and)) or younger and referred by a screening provider under the early and periodic screening, diagnosis and treatment program/healthy kids program as described under WAC 388-86-027; or

(ii) Receiving home health care services as described under WAC 388-86-045.

(c) Medically indigent program as part of the treatment program under home health care services as described under WAC 388-86-045

(7) The department shall pay for occupational therapy provided to a client receiving services from a school district or educational service district as part of an individual education program or individualized family service plan as described under WAC 388-86-022.

AMENDATORY SECTION (Amending Orders 3053 and 3053A, filed 8/21/90 and 8/27/90, effective 9/21/90 and 9/1/90)

WAC 388-86-090 Physical therapy. (1) The department shall pay for physical therapy as an outpatient service when:

(a) The attending physician prescribes physical therapy;

(b) A licensed physical therapist or physiatrist ((or)), a physical therapist assistant supervised by a licensed physical therapist, or, in schools, a physical therapy aide trained and supervised by a licensed physical therapist provides the treatment; and

(c) The therapy assists the ((recipient)) client:

(i) In avoiding hospitalization or nursing ((home)) facility care; or

(ii) In becoming employable; or

(iii) Who suffers from severe motor disabilities to obtain a greater degree of self-care or independence; or

(iv) As part of a treatment program intended to restore normal function of a body part following injury, surgery, or prolonged immobilization.

(2) The department shall ((require approval before services are performed for outpatient physical therapy sessions exceeding ten sessions per patient in a calendar year pay for the following physical therapy services in a calendar year when the attending health professional determines the services are medically appropriate:

(a) One medical diagnostic evaluation;

(b) Twelve physical therapy sessions; and

(c) A maximum of twenty-four additional outpatient sessions, when the services are specifically identified in the medical assistance administration billing instructions and are for:

(i) Post-completed/approved inpatient physical medicine and rehabilitation program when the client no longer needs nursing services but continues to require specialized outpatient therapy; or

(ii) Medically necessary conditions for developmentally delayed clients;

(iii) Surgeries involving extremities:

(A) Fractures;

(B) Open wounds with tendon involvement; or

(C) Dorsal rhizotomy.

(iv) Intracranial injuries;

(v) Burns;

(vi) Cerebral palsy;

(vii) Downs Syndrome;

(viii) Meningomyelocele;

(ix) Traumatic injuries; or

(x) Symptoms involving nervous and musculoskeletal systems:

(A) Abnormality of gait; and

(B) Lack of coordination.

(d) Additional sessions when requested and approved through department of health's children with special health care needs program.

~~(3) ((The medical director of the division of medical assistance (DMA) may waive the prior approval requirement for physical therapy provided:~~

~~(a) In facilities having contracts with DMA as neuro-muscular centers; and~~

~~(b) By school districts as part of an individual education program or individualized family service plan)) For the purposes of this section, "session" means not less than fifteen minutes and up to one hour of therapy in one day.~~

~~(4) The department shall not pay for physical therapy when payment for physical therapy is included ((~~it~~)) as part of the reimbursement ((~~as part of~~)) for other treatment programs including, but not limited to, hospital inpatient ((~~diagnostic~~)) diagnosis related group services and nursing ((~~home~~)) facility services.~~

~~(5) The department shall pay for outpatient physical therapy for ((~~recipients~~)) a client eligible under the:~~

~~(a) Categorically needy, children's health, general assistance unemployable and ADATSA programs;~~

~~(b) Medically needy program only when the ((~~recipient~~)) client is:~~

~~(i) Twenty years of age ((~~and~~)) or under and referred by a screening provider under the early and periodic screening, diagnosis, and treatment program/healthy kids program as described under WAC 388-86-027; or~~

~~(ii) Receiving home health care services as described under WAC 388-86-045.~~

~~(c) Medically indigent program when receiving home health care services as described under WAC 388-86-045.~~

(6) The department shall pay for outpatient physical therapy for a client receiving services provided by a school district or educational service district as part of an individual education program or individualized family service plan as described under WAC 388-86-022.

Reviser's note: The typographical error in the above section occurred in the copy filed by the agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending Orders 3053 and 3053A, filed 8/21/90 and 8/27/90, effective 9/21/90 and 9/1/90)

WAC 388-86-098 Speech therapy services. (1) The department shall pay for speech therapy for conditions which are the result of medically recognized diseases and defects.

(2) The department shall pay for speech therapy when the ~~((following conditions are met))~~ services are provided:

(a) By a speech pathologist ((~~is~~)) or audiologist who has been granted a certificate of clinical competence by the American Speech, Hearing and Language Association((~~-or~~));

(b) By a person who completed the equivalent educational and work experience necessary for such a certificate ((~~provides the service~~); and

~~(b) Approval is obtained before the service is performed for:~~

~~(i) All speech therapy for recipients three years of age through twenty years of age; and~~

~~(ii) Speech therapy sessions after the evaluation and twelve sessions in a calendar year for recipients three years of age or younger or twenty one years of age and over); or~~

(c) In schools as described under WAC 388-86-022, by a person trained and supervised by a speech pathologist or audiologist who has been granted a certificate of clinical competence by the American speech, hearing and language association or a person who has completed the equivalent educational and work experience necessary for such a certificate.

~~(3) The ((medical director of the division of medical assistance (DMA) may waive the prior approval requirement for speech therapy provided:~~

~~(a) In facilities having contracts with DMA as neuro-muscular centers; and~~

~~(b) By school districts as part of an individualized education program or individualized family service plan)) department shall pay for the following speech therapy services in a calendar year:~~

~~(a) One medical diagnostic evaluation;~~

~~(b) Twelve speech therapy sessions; and~~

(c) A maximum of twenty-four additional speech therapy sessions if the speech therapy service is for:

(i) Medically necessary conditions for developmentally delayed clients;

(ii) Cerebral Palsy;

(iii) Severe oral/motor problems:

(A) Dyspraxia;

(B) Cleft palate and/or cleft lip; or

(C) That interfere with adequate nutrition.

(iv) Meningomyelocele;

(v) Neurofibromatosis; or

(vi) Downs syndrome.

~~(4) The department shall not pay for speech therapy when the speech therapy payment is ((~~it~~)) part of the reimbursement ((~~as part of other~~)) for another treatment ((~~programs~~)) program including, but not limited to:~~

~~(a) Hospital inpatient diagnosis related group services; and~~

~~(b) Nursing ((~~home~~)) facility services.~~

~~(5) The department shall pay for speech therapy provided to ((~~recipients~~)) a client eligible under the:~~

- (a) ~~((The))~~ Categorically needy, children's health, general assistance unemployable and ADATSA programs;
- (b) ~~((The))~~ Medically needy program only when the ~~((recipient))~~ client is:
 - (i) Twenty years of age and under and referred by a screening provider under the early and periodic screening, diagnosis, and treatment program/healthy kids program; or
 - (ii) Receiving home health care services as described under WAC 388-86-045.
- (c) ~~((The))~~ Medically indigent program when receiving home health care services as described under WAC 388-86-045.
- (6) The department shall pay for speech therapy provided to a client receiving medical services from a school district or educational service district as part of an individual education program or individualized family service plan as described under WAC 388-86-022.

- (4) ~~((If waived, the department shall conduct an interview:~~
 - ~~(a) Through a scheduled home visit, or~~
 - ~~(b) Over the telephone.~~
- ~~(5))~~ The department shall waive ~~((an))~~ the required office interview if the household:
 - (a) ~~((Has no))~~ Does not have a responsible member able to visit the office because of hardships; and
 - (b) Is unable to appoint an authorized representative; and
 - (c) Requests a waiver; or
 - (d) Consists solely of recipients of aid to families with dependent children or general assistance grant assistance and:
 - (i) The food stamp recertification date is the same as the redetermination date for the assistance grant; and
 - (ii) The redetermination for the assistance grant does not require a face-to-face interview; and
 - (iii) The department conducts a face-to-face interview at least once every twelve months.
- (5) If the department waives the required office interview, the department shall conduct the interview:
 - (a) Through a scheduled home visit; or
 - (b) Over the telephone.

WSR 94-01-066
PERMANENT RULES
DEPARTMENT OF
SOCIAL AND HEALTH SERVICES
 (Public Assistance)
 [Order 3680—Filed December 8, 1993, 3:28 p.m.]

Date of Adoption: December 8, 1993.

Purpose: Streamlines and saves workload in the food stamp application process and brings the food stamp interview requirements into conformity with the AFDC program which requires a face-to-face interview only yearly. Allows a waiver of the face-to-face interview requirement for food stamp certifications at alternating six-month reviews for combined public assistance food stamp households. Requires a telephone interview in place of the face-to-face interview.

Citation of Existing Rules Affected by this Order: Amending WAC 388-49-060 Interview process.

Statutory Authority for Adoption: RCW 74.04.050 (7 CFR 273.2 (e)(i)).

Pursuant to notice filed as WSR 93-22-025 on October 27, 1993.

Effective Date of Rule: Thirty-one days after filing.
 December 8, 1993
 Dewey Brock, Chief
 Office of Vendor Services

AMENDATORY SECTION (Amending Order 2575, filed 12/31/87)

WAC 388-49-060 Interview process. (1) The department shall conduct a face-to-face interview ~~((prior to))~~ before certification and recertification. The person ~~((interviewed))~~ the department interviews shall be:

- (a) Any responsible household member~~((s))~~;
- (b) An authorized representative.

(2) The person ~~((being interviewed))~~ the department interviews may bring any person to the interview.

(3) Unless waived, the department shall conduct ~~((an))~~ the interview at the:

- (a) ~~((At the))~~ CSO~~((s))~~; or
- (b) ~~((At the))~~ Social Security Administration district office for SSI households.

WSR 94-01-073
PERMANENT RULES
DEPARTMENT OF HEALTH
 [Filed December 9, 1993, 2:25 p.m.]

Date of Adoption: November 30, 1993.

Purpose: The rules and regulations for radiation protection have been changed to comply with updated nationally-recognized radiation protection standards, to remain compatible with United States Nuclear Regulatory Commission, to improve readability, and to clarify existing regulations.

Citation of Existing Rules Affected by this Order: Amending chapters 246-220, 246-221, 246-222, 246-224, 246-225, 246-235, 246-243, 246-250, and 246-252 WAC.

Statutory Authority for Adoption: RCW 70.98.050.
 Pursuant to notice filed as WSR 93-19-048 on September 9, 1993.

Changes Other than Editing from Proposed to Adopted Version: Metric and SI units were inserted throughout chapter 246-225 WAC. In chapters 246-220, 246-221, 246-222, 246-225, 246-227, and 246-235 WAC, changes were made to clarify regulations and in response to comments made at public information sessions, public hearings, and by the United States Nuclear Regulatory Commission.

Effective Date of Rule: Thirty-one days after filing.
 December 7, 1993
 Bruce Miyahara
 Secretary

AMENDATORY SECTION (Amending Order 121, filed 12/27/90, effective 1/31/91)

WAC 246-220-002 Purpose. It is the purpose of these regulations to state such requirements as shall be applied to the use of all ionizing radiation, radiation machines, and radioactive materials to ensure the maximum protection of

PERMANENT

the public health and the maximum safety to all persons at, or in the vicinity of, the place of use, storage, or disposal thereof. These regulations are intended to be consistent with the best use of radiation machines and radioactive materials.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-220-007 Statement of philosophy. In accordance with the recommendations of the Environmental Protection Agency, formerly the Federal Radiation Council, approved by the president of the United States of America, persons engaged in activities under licenses issued by the Washington state department of health pursuant to the Atomic Energy Act of 1954, as amended, shall, in addition to complying with the requirements set forth in chapter 246-221 WAC, make every reasonable effort to maintain radiation exposures, and releases of radioactive materials in effluents to unrestricted areas, as low as is reasonably achievable. Such persons should make particular efforts to keep the radiation exposure of an embryo or fetus as low as is reasonably achievable during the entire gestation period as recommended by the National Council on Radiation Protection and Measurements. The term "as low as is reasonably achievable" means ((as low as is readily achievable)) making every reasonable effort to maintain exposures to radiation as far below the dose limits in these regulations as is practical, consistent with the purpose for which the licensed or registered activity is undertaken, taking into account the state of technology, ((and)) the economics of improvements in relation to the state of technology, the economics of improvements in relation to benefits to the public health and safety, and other socioeconomic considerations, and in relation to the utilization of nuclear energy, ionizing radiation, and radioactive materials in the public interest.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-220-010 Definitions. As used in these regulations, these terms have the definitions set forth below. Additional definitions used only in a certain part will be found in that part.

(1) " A_1 " means the maximum activity of special form radioactive material permitted to be transported in a Type A package. " A_2 " means the maximum activity of normal form radioactive material permitted to be transported in a Type A package. A_1 and A_2 values are assigned to individual radionuclides and are tabulated in Appendix A of WAC 246-220-110. Methods of calculating values are also given.

(2) "Absorbed dose" means the energy imparted by ionizing radiation per unit mass of irradiated material. The units of absorbed dose are the gray (Gy) and the rad.

(3) "Accelerator produced material" means any material made radioactive by exposing it in a particle accelerator.

~~((3))~~ (4) "Act" means Nuclear energy and radiation, chapter 70.98 RCW.

~~((4))~~ (5) "Activity" means the rate of disintegration or transformation or decay of radioactive material. The units of activity are the becquerel (Bq) and the curie (Ci).

(6) "Adult" means an individual eighteen or more years of age.

(7) "Agreement state" means any state with which the United States Nuclear Regulatory Commission has entered into an effective agreement under section 274 b. of the Atomic Energy Act of 1954, as amended (73 Stat. 689).

~~((5))~~ (8) "Airborne radioactive material" means any radioactive material dispersed in the air in the form of particulates, dusts, fumes, mists, vapors, or gases.

~~((6))~~ (9) "Airborne radioactivity area" means ~~((a))~~ a room, enclosure, or operating area in which airborne radioactive material exists in concentrations (a) in excess of the ((amounts specified in Appendix A, Table I, Column 1 of chapter 246-221 WAC; or (b) any room, enclosure, or operating area in which airborne radioactive material exists in concentrations which, averaged over the number of hours in any week during which individuals are in the area, exceed twenty-five percent of the amounts)) derived air concentration (DAC) specified in WAC 246-221-290, Appendix A, ((Table I, Column 1)) or (b) to such a degree that an individual present in the area without respiratory protective equipment could exceed, during the hours an individual is present in a week, an intake of 0.6 percent of the annual limit on intake (ALI) or twelve DAC-hours.

(10) "Annual limit on intake" (ALI) means the derived limit for the amount of radioactive material taken into the body of an adult worker by inhalation or ingestion in a year. ALI is the smaller value of intake of a given radionuclide in a year by the reference man that would result in a committed effective dose equivalent of 0.05 Sv (5 rem) or a committed dose equivalent of 0.5 Sv (50 rem) to any individual organ or tissue. ALI values for intake by ingestion and by inhalation of selected radionuclides are given in WAC 246-221-290.

(11) "Background radiation" means radiation from cosmic sources; naturally occurring radioactive materials, including radon, except as a decay product of source or special nuclear material, and including global fallout as it exists in the environment from the testing of nuclear explosive devices. "Background radiation" does not include sources of radiation from radioactive materials regulated by the department.

(12) "Becquerel" (Bq) means the SI unit of activity. One becquerel is equal to 1 disintegration or transformation per second (s^{-1}).

(13) "Bioassay" means the determination of kinds, quantities or concentrations, and, in some cases, the locations of radioactive material in the human body, whether by direct measurement, in vivo counting, or by analysis and evaluation of materials excreted or removed from the human body. For purposes of these regulations, "radiobioassay" is an equivalent term.

~~((7))~~ (14) "Brachytherapy" means a method of radiation therapy in which sealed sources are utilized to deliver a radiation dose at a distance of up to a few centimeters, by surface, intracavitary, or interstitial application.

~~((8))~~ (15) "Byproduct material" means: (a) Any radioactive material (except special nuclear material) yielded in or made radioactive by exposure to the radiation incident to the process of producing or utilizing special nuclear material, and (b) the tailings or wastes produced by the extraction or concentration of uranium or thorium from any ore processed primarily for its source material content, including discrete surface wastes resulting from uranium or

thorium solution extraction processes. Underground ore bodies depleted by these solution extraction operations do not constitute "byproduct material" within this definition.

~~((9))~~ (16) "Calendar quarter" means not less than twelve consecutive weeks nor more than fourteen consecutive weeks. The first calendar quarter of each year shall begin in January and subsequent calendar quarters shall be so arranged such that no day is included in more than one calendar quarter and no day in any one year is omitted from inclusion within a calendar quarter. No licensee or registrant shall change the method of determining calendar quarters for purposes of these regulations except at the beginning of a calendar year.

~~((10))~~ (17) "Calibration" means the determination of (a) the response or reading of an instrument relative to a series of known radiation values over the range of the instrument, or (b) the strength of a source of radiation relative to a standard.

~~((11))~~ (18) "CFR" means Code of Federal Regulations.

~~((12))~~ (19) "Class" means a classification scheme for inhaled material according to its rate of clearance from the pulmonary region of the lung. Materials are classified as D, W, or Y, which applies to a range of clearance half-times: For Class D, Days, of less than ten days, for Class W, Weeks, from ten to one hundred days, and for Class Y, Years, of greater than one hundred days. For purposes of these regulations, "lung class" and "inhalation class" are equivalent terms. For "class of waste" see WAC 246-249-040.

(20) "Collective dose" means the sum of the individual doses received in a given period of time by a specified population from exposure to a specified source of radiation.

(21) "Committed dose equivalent" ($H_{T,50}$) means the dose equivalent to organs or tissues of reference (T) that will be received from an intake of radioactive material by an individual during the fifty-year period following the intake.

(22) "Committed effective dose equivalent" ($H_{E,50}$) is the sum of the products of the weighting factors applicable to each of the body organs or tissues that are irradiated and the committed dose equivalent to each of these organs or tissues ($H_{E,50} = \sum w_T H_{T,50}$).

(23) "Controlled area." See "Restricted area."

~~((13))~~ (24) "Curie" means a unit of (~~measurement~~) quantity of radioactivity. One curie (Ci) is that quantity of radioactive material which decays at the rate of 3.7×10^{10} transformations per second (tps). (~~Commonly used submultiples of the curie are the millicurie and the microcurie. One millicurie (mCi) = 0.001 curie = 3.7×10^7 tps. (Formerly referred to as disintegrations per seconds or dps.) One microcurie (uCi) = 0.000001 curie = 3.7×10^4 tps. One picocurie (pCi) = 10^{-12} Ci. One nanocurie (nCi) = 10^{-9} Ci. One tps = 60 dpm.~~)

(14)) (25) "Declared pregnant woman" means a woman who has voluntarily informed her employer, in writing, of her pregnancy, and her estimated date of conception.

(26) "Deep dose equivalent" (H_D), which applies to external whole body exposure, means the dose equivalent at a tissue depth of 1 centimeter (1000 mg/cm^2).

(27) "Department" means the department of health, division of radiation protection, which has been designated as the state radiation control agency.

~~((15))~~ (28) "Depleted uranium" means the source material uranium in which the isotope Uranium-235 is less than 0.711 percent by weight of the total uranium present. Depleted uranium does not include special nuclear material.

~~((16) "dpm" means disintegrations per minute. See also "curie."~~

~~(17) "Dose" as used in these regulations shall mean absorbed dose or dose equivalent as appropriate.~~

~~(a) "Absorbed dose" is the energy imparted to matter by ionizing radiation per unit mass of irradiated material at the place of interest. The special unit of absorbed dose is the rad. (See rad.)~~

~~(b) "Dose equivalent" is a quantity that expresses on a common scale for all radiation a measure of the postulated effect on a given organ. It is defined as the absorbed dose in rads times certain modifying factors. The unit of dose equivalent is the rem. (See rem.)~~

(18)) (29) "Derived air concentration" (DAC) means the concentration of a given radionuclide in air which, if breathed by the reference man for a working year of two thousand hours under conditions of light work, results in an intake of one ALI. For purposes of these regulations, the condition of light work is an inhalation rate of 1.2 cubic meters of air per hour for two thousand hours in a year. DAC values are given in WAC 246-221-290.

(30) "Derived air concentration-hour" (DAC-hour) means the product of the concentration of radioactive material in air, expressed as a fraction or multiple of the derived air concentration for each radionuclide, and the time of exposure to that radionuclide, in hours. A licensee or registrant may take two thousand DAC-hours to represent one ALI, equivalent to a committed effective dose equivalent of 0.05 Sv (5 rem).

(31) "Dose" is a generic term that means absorbed dose, dose equivalent, effective dose equivalent, committed dose equivalent, committed effective dose equivalent, total organ dose equivalent, or total effective dose equivalent. For purposes of these regulations, "radiation dose" is an equivalent term.

(32) "Dose commitment" means the total radiation dose to a part of the body that will result from retention in the body of radioactive material. For purposes of estimating the dose commitment, it is assumed that from the time of intake the period of exposure to retained material will not exceed fifty years.

~~((19) "Exposure" means the quotient of dQ by dm where "dQ" is the absolute value of the total charge of the ions of one sign produced in air when all the electrons (negatrons and positrons) liberated by photons in a volume element of air having "dm" are completely stopped in air. (The special unit of exposure is the roentgen (R).)*~~

Note: *When not underlined as above the term 'exposure' has a more general meaning in these regulations.

(20) "Exposure rate" means the exposure per unit of time, such as R/min., mR/h, etc.

~~(21))~~ (33) "Dose equivalent (H_T)" means the product of the absorbed dose in tissue, quality factor, and all other necessary modifying factors at the location of interest. The units of dose equivalent are the sievert (Sv) and rem.

(34) "Dose limits" means the permissible upper bounds of radiation doses established in accordance with these

regulations. For purposes of these regulations, "limits" is an equivalent term.

(35) "Dosimetry processor" means a person that processes and evaluates individual monitoring devices in order to determine the radiation dose delivered to the monitoring devices.

(36) "dpm" means disintegrations per minute. See also "curie."

(37) "Effective dose equivalent (H_E)" means the sum of the products of the dose equivalent to each organ or tissue (H_T) and the weighting factor (w_T) applicable to each of the body organs or tissues that are irradiated ($H_E = \sum w_T H_T$).

(38) "Embryo/fetus" means the developing human organism from conception until the time of birth.

(39) "Entrance or access point" means any opening through which an individual or extremity of an individual could gain access to radiation areas or to licensed radioactive materials. This includes entry or exit portals of sufficient size to permit human entry, without respect to their intended use.

(40) "Exposure" means (a), when used as a verb, being exposed to ionizing radiation or to radioactive material, or (b), when used as a noun, the quotient of ΔQ by Δm where " ΔQ " is the absolute value of the total charge of the ions of one sign produced in air when all the electrons (negatrons and positrons) liberated by photons in a volume element of air having mass " Δm " are completely stopped in air. The special unit of exposure is the roentgen (R) and the SI equivalent is the coulomb per kilogram. One roentgen is equal to 2.58×10^{-4} coulomb per kilogram of air.

(41) "Exposure rate" means the exposure per unit of time, such as roentgen per minute and milliroentgen per hour.

(42) "External dose" means that portion of the dose equivalent received from any source of radiation outside the body.

(43) "Extremity" means hand, elbow, arm below the elbow, foot, knee, and leg below the knee.

(44) "Eye dose equivalent" means the external dose equivalent to the lens of the eye at a tissue depth of 0.3 centimeter (300 mg/cm^2).

(45) "Former United States Atomic Energy Commission (AEC) or United States Nuclear Regulatory Commission (NRC) licensed facilities" means nuclear reactors, nuclear fuel reprocessing plants, uranium enrichment plants, or critical mass experimental facilities where AEC or NRC licenses have been terminated.

~~((22))~~ (46) "Generally applicable environmental radiation standards" means standards issued by the United States Environmental Protection Agency (EPA) under the authority of the Atomic Energy Act of 1954, as amended, that impose limits on radiation exposures or levels, or concentrations or quantities of radioactive material, in the general environment outside the boundaries of locations under the control of persons possessing or using radioactive material.

(47) "Gray" (Gy) means the SI unit of absorbed dose. One gray is equal to an absorbed dose of 1 joule/kilogram (100 rad).

(48) "Healing arts" means the disciplines of medicine, dentistry, osteopathy, chiropractic, podiatry, and veterinary medicine.

~~((23))~~ (49) "High radiation area" means any area, accessible to individuals, in which ~~((there exists))~~ radiation ~~((at such))~~ levels ~~((that a major portion of the body could receive in any one hour a dose in excess of 100 millirems))~~ could result in an individual receiving a dose equivalent in excess of 1 mSv (0.1 rem) in one hour at 30 centimeters from any source of radiation or from any surface that the radiation penetrates. For purposes of these regulations, rooms or areas in which diagnostic x-ray systems are used for healing arts purposes are not considered high radiation areas.

~~((24))~~ (50) "Highway route controlled quantity" means a quantity of radioactive material in a single package which exceeds:

- (a) 3,000 times the A_1 or A_2 quantity as appropriate; or
- (b) 30,000 curies, whichever is ~~((least))~~ less.

~~((25))~~ (51) "Human use" means the intentional internal or external administration of radiation or radioactive material to human beings.

~~((26))~~ (52) "Immediate" or "immediately" means as soon as possible but no later than four hours after the initiating condition.

(53) "IND" means investigatory new drug for which an exemption has been claimed under the United States Food, Drug and Cosmetic Act (Title 10 CFR).

~~((27))~~ (54) "Individual" means any human being.

~~((28))~~ (55) "Individual monitoring" means the assessment of:

(a) Dose equivalent (i) by the use of individual monitoring devices or (ii) by the use of survey data; or

(b) Committed effective dose equivalent (i) by bioassay or (ii) by determination of the time-weighted air concentrations to which an individual has been exposed, that is, DAC-hours.

(56) "Individual monitoring devices" means devices designed to be worn by a single individual for the assessment of dose equivalent. For purposes of these regulations, individual monitoring equipment, personnel monitoring device, personnel dosimeter, and dosimeter are equivalent terms. Examples of individual monitoring devices are film badges, thermoluminescent dosimeters (TLDs), pocket ionization chambers, and personal air sampling devices.

(57) "Inspection" means an official examination or observation by the department including but not limited to, tests, surveys, and monitoring to determine compliance with rules, regulations, orders, requirements and conditions of the department.

~~((29))~~ "Irretrievable source" means any sealed source containing licensed material which is pulled off or not connected to the wireline downhole and for which all reasonable effort at recovery, as determined by the department, has been expended.

~~((30))~~ (58) "Interlock" means a device arranged or connected such that the occurrence of an event or condition is required before a second event or condition can occur or continue to occur.

~~((31))~~ (59) "Internal dose" means that portion of the dose equivalent received from radioactive material taken into the body.

(60) "Irretrievable source" means any sealed source containing licensed material which is pulled off or not connected to the wireline downhole and for which all

reasonable effort at recovery, as determined by the department, has been expended.

(61) "License" means a license issued by the department in accordance with the regulations adopted by the department.

((32)) (62) "Licensed material" means radioactive material received, possessed, used, transferred, or disposed under a general or specific license issued by the department.

(63) "Licensee" means any person who is licensed by the department in accordance with these regulations and the act.

((33)) (64) "Licensing state" means any state with regulations equivalent to the suggested state regulations for control of radiation relating to, and an effective program for, the regulatory control of NARM and which has been granted final designation by the Conference of Radiation Control Program Directors, Inc.

((34)) (65) "Lost or missing licensed material" means licensed material whose location is unknown. This definition includes licensed material that has been shipped but has not reached its planned destination and whose location cannot be readily traced in the transportation system.

(66) "Major processor" means a user processing, handling, or manufacturing radioactive material exceeding Type A quantities as unsealed sources or material, or exceeding four times Type B quantities as sealed sources, but does not include nuclear medicine programs, universities, industrial radiographers, or small industrial programs. Type A and B quantities are defined in Section 71.4 of 10 CFR Part 71.

((35)) (67) "Member of the public" means an individual who does not meet the definition of a worker as defined in this subsection. A worker is considered a member of the public when not engaged in work for his or her employer.

(68) "Minor" means an individual less than eighteen years of age.

(69) "Monitoring" means the measurement of radiation, radioactive material concentrations, surface area activities or quantities of radioactive material and the use of the results of these measurements to evaluate potential exposures and doses. For purposes of these regulations, radiation monitoring and radiation protection monitoring are equivalent terms.

(70) "NARM" means any naturally occurring or accelerator-produced radioactive material (~~except source material~~). It does not include by-product, source, or special nuclear material. For the purpose of meeting the definition of a Licensing State by the Conference of Radiation Control Program Directors, Inc. (CRCPD), NARM refers only to discrete sources of NRAM. Diffuse sources of NARM are excluded from consideration by the CRCPD for Licensing State designation purposes.

((36)) (71) "Natural radioactivity" means radioactivity of naturally occurring nuclides.

((37)) (72) "NDA" means a new drug application which has been submitted to the United States Food and Drug Administration.

((38)) (73) "Nonstochastic effect" means a health effect, the severity of which varies with the dose and for which a threshold is believed to exist. Radiation-induced cataract formation is an example of a nonstochastic effect. For purposes of these regulations, a "deterministic effect" is an equivalent term.

(74) "Normal form radioactive material" means radioactive material which has not been demonstrated to qualify as "special form radioactive material."

((39)) (75) "Nuclear Regulatory Commission" (NRC) means the United States Nuclear Regulatory Commission or its duly authorized representatives.

(76) "Nuclear waste" as used in WAC 246-232-090(5) means any quantity of source or byproduct material, (not including radiography sources being returned to the manufacturer) required to be in Type B packaging while transported to, through, or across state boundaries to a disposal site, or to a collection point for transport to a disposal site. Nuclear waste, as used in these regulations, is a special classification of radioactive waste.

((40)) (77) "Occupational dose" means (~~exposure of an individual to radiation in a restricted area; or in the course of employment in which the individual's duties involve exposure to radiation: Provided, That occupational dose shall not be deemed to include any exposure of an individual to radiation for the purpose of diagnosis or therapy of such individual~~) the dose received by a worker in the course of employment from exposure to sources of radiation, whether in the possession of the licensee, registrant, or other person. Occupational dose does not include dose received: From background radiation, as a patient from medical practices, from voluntary participation in medical research programs, or as a member of the public.

((41)) (78) "Ore refineries" means all processors of a radioactive material ore.

((42)) (79) "Package" means the packaging together with its radioactive contents as presented for transport.

(80) "Particle accelerator" means any machine capable of accelerating electrons, protons, deuterons, or other charged particles in a vacuum and of discharging the resultant particulate or other radiation into a medium at energies usually in excess of 1 MeV.

((43)) (81) "Permittee" means a person who has applied for, and received, a valid site use permit for use of the low-level waste disposal facility at Hanford, Washington.

((44)) (82) "Person" means any individual, corporation, partnership, firm, association, trust, estate, public or private institution, group, agency, political subdivision of this state, any other state or political subdivision or agency thereof, and any legal successor, representative, agent or agency of the foregoing, but shall not include federal government agencies.

((45)) (83) "Personal supervision" means supervision such that the supervisor is physically present at the facility and in such proximity that contact can be maintained and immediate assistance given as required.

((46)) (84) "Personnel monitoring equipment" (~~means devices (e.g., film badges, pocket dosimeters, and thermoluminescent dosimeters) designed to be worn or carried by an individual for the purpose of estimating the dose received by the individual~~). See individual monitoring devices.

((47)) (85) "Pharmacist" means an individual licensed by this state to compound and dispense drugs, and poisons.

((48)) (86) "Physician" means an individual licensed by this state to prescribe and dispense drugs in the practice of medicine.

~~((49))~~ (87) "Planned special exposure" means an infrequent exposure to radiation, separate from and in addition to the annual occupational dose limits.

(88) "Practitioner" means an individual licensed by the state in the practice of a healing art (i.e., physician, dentist, podiatrist, chiropractor, etc.).

~~((50))~~ (89) "Public dose" means the dose received by a member of the public from exposure to sources of radiation under the licensee's or registrant's control. It does not include occupational dose, dose received from background radiation, dose received as a patient from medical practices, or dose from voluntary participation in medical research programs.

(90) "Qualified expert" means an individual who has demonstrated to the satisfaction of the department ~~((possession of))~~ he/she has the knowledge ~~((and))~~, training, and experience to measure ionizing radiation, to evaluate safety techniques, and to advise regarding radiation protection needs. The department reserves the right to recognize the qualifications of an individual in specific areas of radiation protection.

~~((51))~~ (91) "Quality factor" (Q) means the modifying factor, listed in Tables I and II, that is used to derive dose equivalent from absorbed dose.

| | | |
|--|----|------|
| Alpha particles, multiple-charged particles, fission fragments and heavy particles of unknown charge | 20 | 0.05 |
| Neutrons of unknown energy | 10 | 0.1 |
| High-energy protons | 10 | 0.1 |

^a Absorbed dose in rad equal to 1 rem or the absorbed dose in gray equal to 1 Sv.

If it is more convenient to measure the neutron fluence rate rather than to determine the neutron dose equivalent rate in sievert per hour or rem per hour as required for Table I, then 0.01 Sv (1 rem) of neutron radiation of unknown energies may, for purposes of these regulations, be assumed to result from a total fluence of 25 million neutrons per square centimeter incident upon the body. If sufficient information exists to estimate the approximate energy distribution of the neutrons, the licensee or registrant may use the fluence rate per unit dose equivalent or the appropriate Q value from Table II to convert a measured tissue dose in gray or rad to dose equivalent in sievert or rem.

TABLE I
QUALITY FACTORS AND ABSORBED DOSE EQUIVALENCIES

| TYPE OF RADIATION | Quality Factor (Q) | Absorbed Dose Equal to A Unit Dose Equivalent ^a |
|--|--------------------|--|
| X, gamma, or beta radiation and high-speed electrons | 1 | 1 |

TABLE II
MEAN QUALITY FACTORS, Q, AND FLUENCE PER UNIT DOSE EQUIVALENT FOR MONOENERGETIC NEUTRONS

| Neutron Energy (MeV) | Quality Factor ^a (Q) | Fluence per Unit Dose Equivalent ^b (neutrons cm ⁻² rem ⁻¹) | Fluence per Unit Dose Equivalent ^b (neutrons cm ⁻² Sv ⁻¹) |
|------------------------|---------------------------------|--|---|
| (thermal) | | | |
| 2.5 x 10 ⁻⁸ | 2 | 980 x 10 ⁶ | 980 x 10 ⁸ |
| 1 x 10 ⁻⁷ | 2 | 980 x 10 ⁶ | 980 x 10 ⁸ |
| 1 x 10 ⁻⁶ | 2 | 810 x 10 ⁶ | 810 x 10 ⁸ |
| 1 x 10 ⁻⁵ | 2 | 810 x 10 ⁶ | 810 x 10 ⁸ |
| 1 x 10 ⁻⁴ | 2 | 840 x 10 ⁶ | 840 x 10 ⁸ |
| 1 x 10 ⁻³ | 2 | 980 x 10 ⁶ | 980 x 10 ⁸ |
| 1 x 10 ⁻² | 2.5 | 1010 x 10 ⁶ | 1010 x 10 ⁸ |
| 1 x 10 ⁻¹ | 7.5 | 170 x 10 ⁶ | 170 x 10 ⁸ |
| 5 x 10 ⁻¹ | 11 | 39 x 10 ⁶ | 39 x 10 ⁸ |
| 1 | 11 | 27 x 10 ⁶ | 27 x 10 ⁸ |
| 2.5 | 9 | 29 x 10 ⁶ | 29 x 10 ⁸ |
| 5 | 8 | 23 x 10 ⁶ | 23 x 10 ⁸ |
| 7 | 7 | 24 x 10 ⁶ | 24 x 10 ⁸ |
| 10 | 6.5 | 24 x 10 ⁶ | 24 x 10 ⁸ |
| 14 | 7.5 | 17 x 10 ⁶ | 17 x 10 ⁸ |
| 20 | 8 | 16 x 10 ⁶ | 16 x 10 ⁸ |
| 40 | 7 | 14 x 10 ⁶ | 14 x 10 ⁸ |
| 60 | 5.5 | 16 x 10 ⁶ | 16 x 10 ⁸ |
| 1 x 10 ² | 4 | 20 x 10 ⁶ | 20 x 10 ⁸ |
| 2 x 10 ² | 3.5 | 19 x 10 ⁶ | 19 x 10 ⁸ |
| 3 x 10 ² | 3.5 | 16 x 10 ⁶ | 16 x 10 ⁸ |
| 4 x 10 ² | 3.5 | 14 x 10 ⁶ | 14 x 10 ⁸ |

PERMANENT

- a Value of quality factor (Q) at the point where the dose equivalent is maximum in a 30-cm diameter cylinder tissue-equivalent phantom.
- b Monoenergetic neutrons incident normally on a 30-cm diameter cylinder tissue-equivalent phantom.

(92) "Quarter" means a period of time equal to one-fourth of the year observed by the licensee, approximately thirteen consecutive weeks, providing that the beginning of the first quarter in a year coincides with the starting date of the year and that no day is omitted or duplicated in consecutive quarters.

(93) "Rad" means the special unit of absorbed dose. One rad equals one-hundredth of a joule per kilogram of material; for example, if tissue is the material of interest, then 1 rad equals 100 ergs per gram of tissue. One rad is equal to an absorbed dose of 100 erg/gram or 0.01 joule/kilogram (0.01 gray).

((52)) (94) "Radiation" means ((ionizing radiation, i.e., gamma rays and x-rays, alpha and beta particles, high speed electrons, and other nuclear particles)) alpha particles, beta particles, gamma rays, x-rays, neutrons, high-speed electrons, high-speed protons, and other particles capable of producing ions. For purposes of these regulations, ionizing radiation is an equivalent term. Radiation, as used in these regulations, does not include magnetic fields or nonionizing radiation, such as radiowaves or microwaves, visible, infrared, or ultraviolet light.

((53)) (95) "Radiation area" means any area, accessible to individuals, in which ((there exists radiation at such levels that a major portion of the body could receive in any one hour a dose in excess of 5 millirems, or in any five consecutive days a dose in excess of 100 millirems)) radiation levels could result in an individual receiving a dose equivalent in excess of 0.05 mSv (0.005 rem) in one hour at thirty centimeters from the source of radiation or from any surface that the radiation penetrates.

((54)) (96) "Radiation machine" means any device capable of producing ionizing radiation except those ((which produce radiation only from radioactive material)) devices with radioactive materials as the only source of radiation.

((55)) (97) "Radiation safety officer" means ((one)) an individual who has the knowledge((-authority-)) and responsibility to apply appropriate radiation protection regulations and ((measures)) has been assigned such responsibility by the licensee or registrant.

((56)) (98) "Radiation source." See "Source of radiation."

((57)) (99) "Radioactive material" means any material (solid, liquid, or gas) which emits radiation spontaneously.

((58)) (100) "Radioactive waste" means any radioactive material which is no longer of use and intended for disposal or treatment for the purposes of disposal.

((59)) (101) "Radioactivity" means the transformation of unstable atomic nuclei by the emission of radiation.

((60)) (102) "Reference man" means a hypothetical aggregation of human physical and physiological characteristics determined by international consensus. These characteristics may be used by researchers and public health workers to standardize results of experiments and to relate biological insult to a common base.

(103) "Registrable item" means any radiation machine except those exempted by RCW 70.98.180 or exempted by the department pursuant to the authority of RCW 70.98.080.

((61)) (104) "Registrant" means any person who is registered by the department or is legally obligated to register with the department in accordance with these regulations and the act.

((62)) (105) "Registration" means registration with the department in accordance with the regulations adopted by the department.

((63)) (106) "Regulations of the United States Department of Transportation" means the regulations in 49 CFR Parts 170-189, 14 CFR Part 103, and 46 CFR Part 146.

((64) "Rem" means a measure of the dose of any radiation to body tissue in terms of its estimated biological effect relative to a dose received from an exposure to one roentgen (R) of x-rays. (One millirem (mrem) = 0.001 rem.) For the purpose of these regulations, any of the following is considered to be equivalent to a dose of one rem:

- (a) An exposure of 1 R of x, or gamma radiation;
- (b) A dose of 1 rad due to x, gamma, or beta radiation;
- (c) A dose of 0.05 rad due to particles heavier than protons and with sufficient energy to reach the lens of the eye;
- (d) A dose of 0.1 rad due to neutrons or high energy protons.*
- (e) A dose of 0.4 rad due to thermal neutrons.

Note: *If it is more convenient to measure the neutron flux, or equivalent, than to determine the neutron absorbed dose in rads, one rem of neutron radiation may, for purposes of these regulations, be assumed to be equivalent to fourteen million neutrons per square centimeter incident upon the body; or, if there exists sufficient information to estimate with reasonable accuracy the approximate distribution in energy of the neutrons, the incident number of neutrons per square centimeter equivalent to one rem may be estimated from the following table:

Neutron Flux Dose Equivalents

| Neutron energy (MeV) | Number of neutrons per square centimeter for a dose equivalent of 1 rem (neutrons/cm ²) | Average flux density to deliver 100 |
|----------------------|---|---|
| | | millirems in 40 hours (neutrons/cm ² per second) |
| Thermal | 970 x 10 ⁶ | 670 |
| 0.0001 | 720 x 10 ⁶ | 500 |
| 0.005 | 820 x 10 ⁶ | 570 |
| 0.02 | 400 x 10 ⁶ | 280 |
| 0.1 | 120 x 10 ⁶ | 80 |
| 0.5 | 43 x 10 ⁶ | 30 |
| 1.0 | 26 x 10 ⁶ | 18 |
| 2.5 | 29 x 10 ⁶ | 20 |
| 5.0 | 26 x 10 ⁶ | 18 |
| 7.5 | 24 x 10 ⁶ | 17 |
| 10.0 | 24 x 10 ⁶ | 17 |
| 10 to 30 | 14 x 10 ⁶ | 10 |

((65)) (107) "Rem" means the special unit of any of the quantities expressed as dose equivalent. The dose equivalent in rem is equal to the absorbed dose in rad multiplied by the quality factor (1 rem = 0.01 Sv).

(108) "Research and development" means: (a) Theoretical analysis, exploration, or experimentation; or (b) the extension of investigative findings and theories of a scientific

PERMANENT

or technical nature into practical application for experimental and demonstration purposes, including the experimental production and testing of models, devices, equipment, materials, and processes. Research and development does not include the internal or external administration of radiation or radioactive material to human beings.

~~((66))~~ (109) "Respiratory protective equipment" means an apparatus, such as a respirator, used to reduce an individual's intake of airborne radioactive materials.

(110) "Restricted area" ~~((controlled area))~~ means any area ~~((the access))~~ to which ~~((is controlled))~~ access is limited by the licensee or registrant for purposes of ~~((protection of))~~ protecting individuals against undue risks from exposure to radiation and radioactive material. "Restricted area" shall not include any areas used for residential quarters, although a separate room or rooms in a residential building may be set apart as a restricted area.

~~((67))~~ (111) "Roentgen" (R) means the special unit of ~~((exposure))~~ exposure. One roentgen equals 2.58×10^{-4} coulombs/kilogram of air ~~((see "Exposure"))~~.

~~((68))~~ (112) "Sanitary sewerage" means a system of public sewers for carrying off waste water and refuse, but excluding sewage treatment facilities, septic tanks, and leach fields owned or operated by the licensee or registrant.

(113) "Sealed source" means any device containing radioactive material ~~((that is permanently bonded or fixed in a capsule or matrix designed to prevent release and dispersal of the radioactive material under the most severe conditions which are likely to be encountered in normal use and handling))~~ to be used as a source of radiation which has been constructed in such a manner as to prevent the escape of any radioactive material.

~~((69))~~ (114) "Shallow dose equivalent" (H_s), which applies to the external exposure of the skin or an extremity, means the dose equivalent at a tissue depth of 0.007 centimeter (7 mg/cm^2) averaged over an area of 1 square centimeter.

(115) "SI" means an abbreviation of the International System of Units.

(116) "Sievert" means the SI unit of any of the quantities expressed as dose equivalent. The dose equivalent in sievert is equal to the absorbed dose in gray multiplied by the quality factor ($1 \text{ Sv} = 100 \text{ rem}$).

(117) "Site boundary" means that line beyond which the land or property is not owned, leased, or otherwise controlled by the licensee or registrant.

(118) "Source container" means a device in which radioactive material is transported or stored.

(119) "Source material" means: (a) Uranium or thorium, or any combination thereof, in any physical or chemical form, or (b) ores which contain by weight one-twentieth of one percent (0.05 percent) or more of (i) uranium, (ii) thorium, or (iii) any combination thereof. Source material does not include special nuclear material.

~~((70))~~ "Source of radiation" means any radioactive material, or any device or equipment emitting or capable of producing ionizing radiation.

~~(71)~~ "Source container" means a device in which radioactive material is transported or stored.

~~(72))~~ (120) "Source material milling" means ~~((any activity that results in the production of byproduct material as defined in subsection (8)(b) of this section))~~ the extraction

or concentration of uranium or thorium from any ore processing primarily for its source material content.

~~((73))~~ (121) "Source of radiation" means any radioactive material, or any device or equipment emitting or capable of producing ionizing radiation.

(122) "Special form radioactive material" means radioactive material which satisfies the following conditions:

(a) It is either a single solid piece or is contained in a sealed capsule that can only be opened by destroying the capsule;

(b) The piece or capsule has at least one dimension not less than five millimeters (0.197 inch); and

(c) It satisfies the test requirements ~~((of 10 CFR 71.75))~~ specified by the United States Nuclear Regulatory Commission. A special form encapsulation designed in accordance with the United States Nuclear Regulatory Commission requirements in effect on June 30, 1983, and constructed prior to July 1, 1985, may continue to be used. A special form encapsulation either designed or constructed after June 30, 1985, must meet requirements of this definition applicable at the time of its design or construction.

~~((74))~~ (123) "Special nuclear material" means:

(a) Plutonium, uranium-233, uranium enriched in the isotope 233 or in the isotope 235, and any other material that the United States Nuclear Regulatory Commission, pursuant to the provisions of section 51 of the Atomic Energy Act of 1954, as amended, determines to be special nuclear material, but does not include source material; or

(b) Any material artificially enriched in any of the foregoing, but does not include source material.

(124) "Special nuclear material in quantities not sufficient to form a critical mass" means uranium enriched in the isotope U-235 in quantities not exceeding three hundred fifty grams of contained U-235; Uranium-233 in quantities not exceeding two hundred grams; Plutonium in quantities not exceeding two hundred grams; or any combination of them in accordance with the following formula: For each kind of special nuclear material, determine the ratio between the quantity of that special nuclear material and the quantity specified above for the same kind of special nuclear material. The sum of such ratios for all of the kinds of special nuclear material in combination shall not exceed "1" (i.e., unity). For example, the following quantities in combination would not exceed the limitation and are within the formula:

$$\begin{array}{r}
 175(\text{grams contained U-235}) \\
 \hline
 350 \\
 + \\
 50(\text{grams U-233}) \\
 \hline
 200 \\
 + \\
 50(\text{grams Pu}) \\
 \hline
 200 < 1
 \end{array}$$

~~((75))~~ (125) "State" as used in WAC 246-232-090(5) means the several states of the union, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Mariana Islands.

~~((76))~~ (126) "Stochastic effect" means a health effect that occurs randomly and for which the probability of the

PERMANENT

PERMANENT

effect occurring, rather than its severity, is assumed to be a linear function of dose without threshold. Hereditary effects and cancer incidence are examples of stochastic effects. For purposes of these regulations, probabilistic effect is an equivalent term.

(127) "Survey" means an evaluation of the radiological conditions and potential hazards incident to the production, use, release, disposal, ~~((and))~~ or presence of sources of radiation ~~((under a specific set of conditions to determine actual or potential radiation hazards))~~. When appropriate, such evaluation includes, but is not limited to, tests, physical examinations, calculations and measurements of levels of radiation or concentration of radioactive material present.

~~((77))~~ (128) "Test" means (a) the process of verifying compliance with an applicable regulation, or (b) a method for determining the characteristics or condition of sources of radiation or components thereof.

~~((78))~~ (129) "These regulations" mean all parts of the rules for radiation protection of the state of Washington.

~~((79))~~ (130) "Total effective dose equivalent" (TEDE) means the sum of the deep dose equivalent for external exposures and the committed effective dose equivalent for internal exposures.

(131) "Total organ dose equivalent (TODE)" means the sum of the deep dose equivalent and the committed dose equivalent to the organ or tissue receiving the highest dose.

(132) "Type A packaging" means packaging designed in accordance with 49 CFR 173.411 and 173.412 to retain its integral containment and shielding under normal conditions of transport as demonstrated by tests described in 49 CFR 173.465 or 173.466 as appropriate. The contents are limited to A₁ or A₂ quantities. The package does not require competent authority approval.

~~((80))~~ (133) "Type A quantity" means a quantity of radioactive material less than or equal to the A₁ or A₂ value for a single radionuclide, or for which the sum of the fractions does not exceed unity for a mixture of radionuclides.

~~((81))~~ (134) "Type B packaging" means packaging approved by the United States Nuclear Regulatory Commission for the transport of quantities of radioactivity in excess of A₁ or A₂. It is defined in detail in 10 CFR 71.4.

~~((82))~~ (135) "Type B quantity" means a quantity of radioactive material in excess of a Type A quantity. It requires Type B packaging for transportation.

~~((83))~~ "Uncontrolled area." See "Unrestricted area."

~~((84))~~ (136) "United States Department of Energy" means the Department of Energy established by Public Law 95-91, August 4, 1977, 91 Stat. 565, 42 U.S.C. 7101 et seq., to the extent that the department exercises functions formerly vested in the United States Atomic Energy Commission, its chairman, members, officers and components and transferred to the United States Energy Research and Development Administration and to the administrator thereof pursuant to sections 104 (b), (c) and (d) of the Energy Reorganization Act of 1974 (Public Law 93-438, October 11, 1974, 88 Stat. 1233 at 1237, 42 U.S.C. 5814 effective January 19, 1975) and retransferred to the Secretary of Energy pursuant to section 301(a) of the Department of Energy Organization Act (Public Law 95-91, August 4, 1977, 91 Stat. 565 at 577-578, 42 U.S.C. 7151, effective October 1, 1977).

~~((85))~~ (137) "Unrefined and unprocessed ore" means ore in its natural form prior to any processing, such as grinding, roasting, beneficiating, or refining.

~~((86))~~ (138) "Unrestricted area" (uncontrolled area) means any area ~~((access to which is not controlled by the licensee or registrant for purposes of protection of individuals from exposure to radiation and radioactive material, and any area used for residential quarters))~~ which is not a restricted area and where the external dose will not exceed 2 mrem in any one hour. In addition, the public dose, taking into account occupancy factors, will not exceed 100 mrem total effective dose equivalent in any one year.

(139) "Very high radiation area" means an area, accessible to individuals, in which radiation levels could result in an individual receiving an absorbed dose in excess of 5 Gy (500 rad) in one hour at one meter from a source of radiation or from any surface that the radiation penetrates.

~~((87))~~ (140) "Waste handling licensees" mean persons licensed to receive and store radioactive wastes prior to disposal and/or persons licensed to dispose of radioactive waste.

~~((88))~~ (141) "Week" means seven consecutive days starting on Sunday.

(142) "Weighting factor" w_T for an organ or tissue (T) means the proportion of the risk of stochastic effects resulting from irradiation of that organ or tissue to the total risk of stochastic effects when the whole body is irradiated uniformly. For calculating the effective dose equivalent, the values of w_T are:

ORGAN DOSE WEIGHTING FACTORS

| Organ or Tissue | w _T |
|-----------------|-------------------|
| Gonads | 0.25 |
| Breast | 0.15 |
| Red bone marrow | 0.12 |
| Lung | 0.12 |
| Thyroid | 0.03 |
| Bone surfaces | 0.03 |
| Remainder | 0.30 ^a |
| Whole Body | 1.00 ^b |

^a 0.30 results from 0.06 for each of 5 "remainder" organs, excluding the skin and the lens of the eye, that receive the highest doses.

^b For the purpose of weighting the external whole body dose, for adding it to the internal dose, a single weighting factor, w_T = 1.0, has been specified. The use of other weighting factors for external exposure will be approved on a case-by-case basis until such time as specific guidance is issued.

(143) "Whole body" means, for purposes of external exposure, head, trunk including male gonads, arms above the elbow, or legs above the knee.

(144) "Worker" means an individual engaged in work under a license or registration issued by the department and controlled by a licensee or registrant ~~((, but does not include the licensee or registrant))~~. Where the licensee or registrant is an individual rather than one of the other legal entities defined under "person," the radiation exposure limits for the worker also apply to the individual who is the licensee or registrant. If students of age eighteen years or older are subjected routinely to work involving radiation, then the

students are considered to be occupational workers. Individuals of less than eighteen years of age shall meet the requirements of WAC 246-221-050.

(145) "Working level" (WL) means any combination of short-lived radon daughters in 1 liter of air that will result in the ultimate emission of 1.3×10^5 MeV of potential alpha particle energy. The short-lived radon daughters are — for radon-222: polonium-218, lead-214, bismuth-214, and polonium-214; and for radon-220: polonium-216, lead-212, bismuth-212, and polonium-212.

(146) "Working level month" (WLM) means an exposure to one working level for one hundred seventy hours — two thousand working hours per year divided by twelve months per year is approximately equal to one hundred seventy hours per month.

(147) "Year" means the period of time beginning in January used to determine compliance with the provisions of these regulations. The licensee or registrant may change the starting date of the year used to determine compliance by the licensee or registrant provided that the change is made at the beginning of the year and that no day is omitted or duplicated in consecutive years.

AMENDATORY SECTION (Amending Order 121, filed 12/27/90, effective 1/31/91)

WAC 246-220-080 Prohibited uses. (1) Hand-held fluoroscopic screens shall not be used unless listed in the Registry of Sealed Sources and Devices or accepted for certifications by the United States Food and Drug Administration, Center for Devices and Radiological Health.

(2) Shoe-fitting fluoroscopic devices shall not be used.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-220-090 Communications. All communications and reports concerning these regulations, and applications filed thereunder, should be addressed to the Department of Health, Division of Radiation Protection, ((Mailstop LE-43)) P.O. Box 47827, Olympia, Washington 98504-7827. The emergency telephone number in Seattle, is 206-682-5327 or 206 (NUCLEAR).

AMENDATORY SECTION (Amending Order 121, filed 12/27/90, effective 1/31/91)

WAC 246-220-120 Appendix B—Information on transportation special form licensed material. (1) "Special form" means any of the following physical forms of licensed material:

(a) The material is in solid form having no dimension less than 0.5 millimeter or at least one dimension greater than five millimeters; does not melt, sublime, or ignite in air at a temperature of 1,000 degrees Fahrenheit; will not shatter or crumble if subjected to the percussion test described in this section; and is not dissolved or converted into dispersible form to the extent of more than 0.005 percent by weight by immersion for one week in water at 68 degrees Fahrenheit or in air at 86 degrees Fahrenheit; or

(b) The material is securely contained in a capsule having no dimension less than 0.5 millimeter or at least one dimension greater than five millimeters, which will retain its

contents if subjected to the tests prescribed in this section; and which is constructed of materials which do not melt, sublime, or ignite in air at 1,475 degrees Fahrenheit, and do not dissolve, or convert into dispersible form, to the extent of more than 0.005 percent by weight by immersion for one week in water at 68 degrees Fahrenheit or in air at 86 degrees Fahrenheit.

(2) *Tests for special form licensed material.*

(a) Free drop - A free drop through a distance of thirty feet onto a flat essentially unyielding horizontal surface, striking the surface in such a position as to suffer maximum damage.

(b) Percussion - Impact of the flat circular end of a one inch diameter steel rod weighing three pounds, dropped through a distance of forty inches. The capsule or material shall be placed on a sheet of lead, of hardness number 3.5 to 4.5 on the Vickers scale, and not more than one inch thick, supported by a smooth essentially unyielding surface.

(c) Heating - Heating in air to a temperature of 1,475 degrees Fahrenheit and remaining at that temperature for a period of ten minutes.

(d) Immersion - Immersion for twenty-four hours in water at room temperature. The water shall be at pH 6-pH 8, with a maximum conductivity of ten ((microohms)) micromhos per centimeter.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-220-130 Appendix C—The international system of units (SI). ((This appendix does not contain any regulations, but is included for informational purposes only.

The Metric Conversion Act of 1975 (PL 94-168) urges the increasing awareness and use of the International System of Units (SI). This appendix is included to acquaint licensees and/or registrants with selected terms of SI units. Future revisions to chapters 246-220 through 246-255 WAC may use these units.

(1) *Absorbed dose.* The unit of absorbed dose is the gray (Gy) which is equal to 1 joule per kilogram. One rad is equal to 1×10^{-2} gray. A submultiple is the milligray (mGy).

(2) *Dose equivalent.* The unit of dose equivalent is the sievert (Sv) which is equal to 1 joule per kilogram as modified by the quality factor. One rem is equal to 1×10^{-2} sievert. A submultiple is the millisievert (mSv).

(3) *Exposure.* The unit of exposure is the coulombs per kilogram (C/kg). One roentgen is equal to 2.58×10^{-4} coulombs per kilogram of dry air. Multiples of this unit are the millicoulomb per kilogram (mC/kg) and the microcoulomb per kilogram (uC/kg) of dry air at standard temperature and pressure.

(4) *Radioactivity.* The unit of measurement of radioactivity is the becquerel (Bq) and is equal to one transformation per second. One curie is equal to 3.7×10^{10} becquerels. Multiples are megabecquerel (MBq) and gigabecquerel (GBq).) **Conversion factors.**

| Multiply | by | to obtain |
|------------|-------------------------|---------------------------|
| becquerels | 2.703×10^{-11} | curies |
| becquerels | 2.703×10^{-8} | millicuries |
| curies | 3.700×10^{10} | becquerels |
| curies | 2.220×10^{12} | disintegrations/min (dpm) |

| | | |
|---------------|---------------------------|---------------------------|
| curies | 10 ³ | millicuries |
| curies | 10 ⁶ | microcuries |
| curies | 10 ¹² | picocuries |
| dis/min (dpm) | 4.505 x 10 ⁻¹⁰ | millicuries |
| dis/min (dpm) | 4.505 x 10 ⁻⁷ | microcuries |
| dis/sec (Bq) | 2.703 x 10 ⁻⁸ | millicuries |
| dis/sec (Bq) | 2.703 x 10 ⁻⁵ | microcuries |
| gray | 100 | rad |
| microcuries | 3.700 x 10 ⁴ | becquerels |
| microcuries | 2.220 x 10 ⁶ | disintegrations/min (dpm) |
| millicuries | 3.700 x 10 ⁷ | becquerels |
| millicuries | 2.220 x 10 ⁹ | disintegrations/min (dpm) |
| rad | 0.01 | gray |
| rem | 0.01 | sievert |
| sievert | 100 | rem |

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-221-010 (~~(Radiation dose to individuals in restricted areas.)*~~) **Occupational dose limits for adults.** (1) (~~Except as provided in subsection (2) of this section no licensee or registrant shall possess, use, store, receive, or transfer sources of radiation in such a manner as to cause any individual in a restricted area to receive in any period of one calendar quarter from all sources of radiation in the licensee's or registrant's possession a dose in excess of the limits specified in the following table:~~

Rem per Calendar Quarter

| | |
|--|-------|
| Whole body; head and trunk; active blood forming organs; lens of eyes; or gonads | 1.25 |
| Hands and forearms; feet and ankles | 18.75 |
| Skin of whole body | 7.5 |

Note: ~~*For determining the doses specified in this section a dose from x or gamma rays up to 10 MeV may be assumed to be equivalent to the exposure measured by a properly calibrated appropriate instrument in air at or near the body surface in the region of the highest dose rate.~~

~~(2) A licensee or registrant may permit an individual in a restricted area to receive a dose to the whole body greater than that permitted under subsection (1) of this section, provided that:~~

~~(a) During any calendar quarter the dose to the whole body from sources of radiation in the licensee's or registrant's possession shall not exceed three rems; and~~

~~(b) The dose to the whole body, when added to the accumulated occupational dose to the whole body, shall not exceed 5(N-18) rems when "N" equals the individual's age in years at the individual's last birthday; and~~

~~(c) The licensee or registrant has determined the individual's accumulated occupational dose to the whole body on department Form RHF 4 or on a clear and legible record containing all the information required in that form and has otherwise complied with the requirements of WAC 246-221-020. As used in subsection (2) of this section "dose to the whole body" shall be deemed to include any dose to the whole body, gonads, active blood forming organs, head and trunk, or lens of the eye; and~~

~~(d) The licensee or registrant has determined that the predicted dose to the whole body is as low as is reasonably achievable and consistent with the statements in WAC 246-220-007. The licensee or registrant shall perform an evaluation of the expected whole body dose before permitting any individual to receive a whole body dose in excess of the limits specified in subsection (1) of this section.~~

~~A written record of the prior evaluation of this exposure shall be retained for inspection by the department.)~~ The licensee or registrant shall control the occupational dose to individual adults, except for planned special exposures pursuant to WAC 246-221-030, to the following dose limits:

- (a) An annual limit, which is the more limiting of:
 - (i) The total effective dose equivalent being equal to 0.05 Sv (5 rem); or
 - (ii) The sum of the deep dose equivalent and the committed dose equivalent to any individual organ or tissue other than the lens of the eye being equal to 0.50 Sv (50 rem).

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-221-001 Purpose and scope. (1) This chapter establishes standards for protection against radiation hazards. Except as otherwise specifically provided, this chapter applies to all licensees or registrants. The requirements of this chapter are designed to control the receipt, possession, use, transfer, and disposal of sources of radiation by any licensee or registrant so the total dose to an individual, including doses resulting from all sources of radiation other than background radiation, does not exceed the standards for protection against radiation prescribed in this chapter.

(2) The limits in this chapter do not apply to doses due to background radiation, to exposure of patients to radiation for the purpose of medical diagnosis or therapy, or to voluntary participation in medical research programs.

(3) Nothing in this chapter shall be interpreted as limiting ((the intentional exposure of patients to radiation for the purpose of medical diagnosis or therapy)) actions that may be necessary to protect health and safety in an emergency.

(4) The definitions contained in WAC 246-220-010 also apply to this chapter. WAC 246-220-007, Statement of philosophy, is directly applicable to this chapter.

NEW SECTION

WAC 246-221-005 Radiation protection programs.

(1) Each specific licensee shall develop, document, and implement a radiation protection program sufficient to ensure compliance with the provisions of this chapter.

(2) The licensee shall use, to the extent practicable, procedures and engineering controls based upon sound radiation protection principles to achieve occupational doses and doses to members of the public that are as low as is reasonably achievable (ALARA).

(3) The licensee shall review the radiation protection program content and implementation at the frequency specified in the license.

(4) Each licensee shall maintain records of the radiation protection program, including:

- (a) The provisions of the program; and
- (b) Audits, where required, and other reviews of program content and implementation.

PERMANENT

(b) The annual limits to the lens of the eye, to the skin, and to the extremities which are:

(i) An eye dose equivalent of 0.15 Sv (15 rem); and

(ii) A shallow dose equivalent of 0.50 Sv (50 rem) to the skin or to any extremity.

(2) Doses received in excess of the annual limits, including doses received during accidents, emergencies, and planned special exposures, must be subtracted from the limits specified in WAC 246-221-030 for planned special exposures that the individual may receive during the current year and during the individual's lifetime.

(3) The assigned deep dose equivalent and shallow dose equivalent shall be for the portion of the body receiving the highest exposure. The deep dose equivalent, eye dose equivalent and shallow dose equivalent may be assessed from surveys or other radiation measurements for the purpose of demonstrating compliance with the occupational dose limits, if the individual monitoring device was not in the region of highest potential exposure, or the results of individual monitoring are unavailable.

(4) Derived air concentration (DAC) and annual limit on intake (ALI) values are specified in WAC 246-221-290 and may be used to determine the individual's dose and to demonstrate compliance with the occupational dose limits.

(5) Notwithstanding the annual dose limits, the licensee shall limit the soluble uranium intake by an individual to 10 milligrams in a week in consideration of chemical toxicity.

(6) The licensee or registrant shall reduce the dose that an individual may be allowed to receive in the current year by the amount of occupational dose received while employed by any other person during the current year as determined in accordance with WAC 246-221-020.

NEW SECTION

WAC 246-221-015 Compliance with requirements for summation of external and internal doses. (1) If the licensee is required to monitor pursuant to both WAC 246-221-090 and 246-221-100, the licensee shall demonstrate compliance with the dose limits by summing external and internal doses. If the licensee is required to monitor only pursuant to WAC 246-221-090 or only pursuant to WAC 246-221-100, then summation is not required to demonstrate compliance with the dose limits. The licensee may demonstrate compliance with the requirements for summation of external and internal doses pursuant to subsections (2), (3), and (4) of this section. The dose equivalents for the lens of the eye, the skin, and the extremities are not included in the summation, but are subject to separate limits.

(2) **Intake by inhalation.** If the only intake of radionuclides is by inhalation, the total effective dose equivalent limit is not exceeded if the sum of the deep dose equivalent divided by the total effective dose equivalent limit, and one of the following, does not exceed unity:

(a) The sum of the fractions of the inhalation ALI for each radionuclide; or

(b) The total number of derived air concentration-hours (DAC-hours) for all radionuclides divided by two thousand; or

(c) The sum of the calculated committed effective dose equivalents to all significantly irradiated organs or tissues (T) calculated from bioassay data using appropriate biological

models and expressed as a fraction of the annual limit. For purposes of this requirement, an organ or tissue is deemed to be significantly irradiated if, for that organ or tissue, the product of the weighting factors, w_T , and the committed dose equivalent, $H_{T,50}$, per unit intake is greater than ten percent of the maximum weighted value of H_{50} , that is, $w_T H_{T,50}$, per unit intake for any organ or tissue.

(3) **Intake by oral ingestion.** If the occupationally exposed individual also receives an intake of radionuclides by oral ingestion greater than ten percent of the applicable oral ALI, the licensee shall account for this intake and include it in demonstrating compliance with the limits.

(4) **In take through wounds or absorption through skin.** The licensee shall evaluate and, to the extent practical, account for intakes through wounds or skin absorption. The intake through intact skin has been included in the calculation of DAC for hydrogen-3 and does not need to be evaluated or accounted for pursuant to this section.

(5) **External dose from airborne radioactive material.** Licensees shall, when determining the dose from airborne radioactive material, include the contribution to the deep dose equivalent, eye dose equivalent, and shallow dose equivalent from external exposure to the radioactive cloud. Airborne radioactivity measurements and DAC values shall not be used as the primary means to assess the deep dose equivalent when the airborne radioactive material includes radionuclides other than noble gases or if the cloud of airborne radioactive material is not relatively uniform. The determination of the deep dose equivalent to an individual shall be based upon measurements using instruments or individual monitoring devices.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-221-020 Determination of prior ((accumulated)) occupational dose. ~~((Determination of prior dose. Each licensee or registrant shall require any individual, prior to first entry of the individual into the licensee's or registrant's restricted area during each employment or work assignment under such circumstances that the individual will receive or is likely to receive in any period of one calendar quarter an occupational dose in excess of 25 percent of the applicable standards specified in WAC 246-221-010(1) and 246-221-050 to disclose and verify in a written, signed statement, either:~~

~~(1) That the individual had no prior occupational dose during the current calendar quarter; or~~

~~(2) The nature and amount of any occupational dose which the individual may have received during that specifically identified current calendar quarter from sources of radiation possessed or controlled by other persons. Each licensee shall maintain records of such statements until the department authorizes their disposition.)) (1) For each individual who may enter the licensee's or registrant's restricted area and is likely to receive, in a year, an occupational dose requiring monitoring pursuant to WAC 246-221-090 and 246-221-100, the licensee or registrant shall:~~

~~(a) Determine the occupational radiation dose received during the current year; and~~

~~(b) Attempt to obtain the records of lifetime cumulative occupational radiation dose.~~

PERMANENT

(2) Prior to permitting an individual to participate in a planned special exposure, the licensee or registrant shall determine:

(a) The internal and external doses from all previous planned special exposures; and

(b) All doses in excess of the limits, including doses received during accidents and emergencies, received during the lifetime of the individual.

(3) In complying with the requirements of subsection (1) of this section, a licensee or registrant may:

(a) Accept, as a record of the occupational dose that the individual received during the current year, a written signed statement from the individual, or from the individual's most recent employer for work involving radiation exposure, that discloses the nature and the amount of any occupational dose that the individual received during the current year; and

(b) Accept, as the record of lifetime cumulative radiation dose, an up-to-date Form RHF-4A, or equivalent, signed by the individual and countersigned by an appropriate official of the most recent employer for work involving radiation exposure, or the individual's current employer, if the individual is not employed by the licensee or registrant; and

(c) Obtain reports of the individual's dose equivalent from the most recent employer for work involving radiation exposure, or the individual's current employer, if the individual is not employed by the licensee or registrant, by telephone, telegram, facsimile, or letter. The licensee or registrant shall request a written verification of the dose data if the authenticity of the transmitted report cannot be established.

(4) The licensee or registrant shall record the exposure history, as required by subsection (1) of this section, on Form RHF-4A, or other clear and legible record, of all the information required on that form. The form or record shall show each period in which the individual received occupational exposure to radiation or radioactive material and shall be signed by the individual who received the exposure. For each period for which the licensee or registrant obtains reports, the licensee or registrant shall use the dose shown in the report in preparing Form RHF-4A. For any period in which the licensee or registrant does not obtain a report, the licensee or registrant shall place a notation on Form RHF-4A indicating the periods of time for which data are not available.

(5) Licensees or registrants are not required to reevaluate the separate external dose equivalents and internal committed dose equivalents or intakes of radionuclides assessed under the regulations in effect before January 1, 1994. Further, occupational exposure histories obtained and recorded on Form RHF-4 before January 1, 1994, would not have included effective dose equivalent, but may be used in the absence of specific information on the intake of radionuclides by the individual.

(6) If the licensee or registrant is unable to obtain a complete record of an individual's current and previously accumulated occupational dose, the licensee or registrant shall assume:

(a) In establishing administrative controls under WAC 246-221-010(6) for the current year, that the allowable dose limit for the individual is reduced by 12.5 mSv (1.25 rem) for each calendar quarter for which records were unavailable

and the individual was engaged in activities that could have resulted in occupational radiation exposure; and

(b) That the individual is not available for planned special exposures.

(7) The licensee or registrant shall retain the records on Form RHF-4A or equivalent until the department terminates each pertinent license requiring this record. The licensee or registrant shall retain records used in preparing Form RHF-4 or RHF-4A for three years after the record is made.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-221-030 Requirements for (~~exceeding occupational radiation doses~~) planned special exposures.

~~((1) Before permitting, pursuant to WAC 246-221-010(2), any individual in a restricted area to receive an occupational radiation dose in excess of the standards specified in WAC 246-221-010(1) each licensee or registrant shall:~~

~~(a) Obtain a certificate on state of Washington occupational external radiation exposure history (Form RHF-4) or on a clear and legible record containing all the information required in that form, signed by the individual, showing each period of time after the individual attained the age of 18 in which the individual received an occupational dose of radiation; and~~

~~(b) Calculate on Form RHF-4 in accordance with the instructions appearing therein, or on a clear and legible record containing all the information required in that form, the previously accumulated occupational dose received by the individual and the additional dose allowed for that individual under WAC 246-221-010(2).~~

In the preparation of Form RHF-4, or a clear and legible record containing all the information required in that form, the licensee or registrant shall make a reasonable effort to obtain reports of the individual's previously accumulated occupational dose. For each period for which the licensee or registrant obtains such reports, the dose shown in the report shall be used in preparing the form. In any case where a licensee or registrant is unable to obtain reports of the individual's occupational dose for a previous complete calendar quarter, it shall be assumed that the individual has received the occupational dose specified in whichever of the following columns apply:

| | <u>Column 1</u> | <u>Column 2</u> |
|--------------|--|---|
| | <u>Assumed Dose in Rems for Calendar Quarters Prior to January 1, 1961</u> | <u>Assumed Dose in Rems for Calendar Quarters Beginning on or After January 1, 1961</u> |
| Part of Body | | |

| | | |
|--|------|------|
| Whole body, gonads, active blood-forming organs, head and trunk, lens of eye | 3.75 | 1.25 |
|--|------|------|

(2) The licensee or registrant shall retain and preserve records used in preparing Form RHF-4 until the department authorizes their disposition. If calculation of the individual's accumulated occupational dose for all periods prior to January 1, 1961, yields a result higher than the applicable accumulated dose value for the individual as of that date, as specified in WAC 246-221-010(2)(b) the excess may be disregarded.) A licensee or registrant may authorize an adult worker to receive doses in addition to and accounted for

separately from the doses received under the limits specified in WAC 246-221-010 provided that each of the following conditions is satisfied:

(1) The licensee or registrant authorizes a planned special exposure only in an exceptional situation when alternatives that might avoid the higher exposure are unavailable or impractical.

(2) The licensee or registrant, and employer if the employer is not the licensee or registrant, specifically authorizes the planned special exposure, in writing, before the exposure occurs.

(3) Before a planned special exposure, the licensee or registrant ensures that each individual involved is:

(a) Informed of the purpose of the planned operation; and

(b) Informed of the estimated doses and associated potential risks and specific radiation levels or other conditions that might be involved in performing the task; and

(c) Instructed in the measures to be taken to keep the dose ALARA considering other risks that may be present.

(4) Prior to permitting an individual to participate in a planned special exposure, the licensee or registrant ascertains prior doses as required by WAC 246-221-020(2) during the lifetime of the individual for each individual involved.

(5) Subject to WAC 246-221-010(2), the licensee or registrant shall not authorize a planned special exposure that would cause an individual to receive a dose from all planned special exposures and all doses in excess of the limits to exceed:

(a) The numerical values of any of the dose limits in WAC 246-221-010(1) in any year; and

(b) Five times the annual dose limits in WAC 246-221-010(1) during the individual's lifetime.

(6) The licensee or registrant maintains records that describe:

(a) The exceptional circumstances requiring the use of a planned special exposure; and

(b) The name of the management official who authorized the planned special exposure and a copy of the signed authorization; and

(c) What actions were necessary; and

(d) Why the actions were necessary; and

(e) What precautions were taken to assure that doses were maintained ALARA; and

(f) What individual and collective doses were expected to result.

(7) The licensee or registrant records the best estimate of the dose resulting from the planned special exposure in the individual's record and informs the individual, in writing, of the dose within thirty days from the date of the planned special exposure. The dose from planned special exposures shall not be considered in controlling future occupational dose of the individual pursuant to WAC 246-221-010(1) but shall be included in evaluations required by subsections (4) and (5) of this section.

(8) The licensee or registrant submits a written report in accordance with WAC 246-221-265.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-221-040 Determination of internal exposure of individuals to concentrations of radioactive materials in restricted areas. ~~((1) Requirements for exposures to individuals.~~

~~(a) No licensee shall possess, use, or transfer radioactive material in such a manner as to permit any individual in a restricted area to inhale a quantity of radioactive material in any period of one calendar quarter greater than the quantity which would result from inhalation for 40 hours per week for 13 weeks at uniform concentrations of radioactive material in air specified in WAC 246-221-290, Appendix A, Table I, Column 1^{1, 2, 3}. If the radioactive material is of such form that intake by absorption through the skin is likely, individual exposures to radioactive material shall be controlled so that the uptake of radioactive material by any organ from either inhalation or absorption or both routes of intake^{4, 5} in any calendar quarter does not exceed that which would result from inhaling such radioactive material for 40 hours per week for 13 weeks at uniform concentrations specified in WAC 246-221-290, Appendix A, Table I, Column 1.~~

~~(b) No licensee shall possess, use, or transfer mixtures of U-234, U-235, and U-238 in soluble form in such a manner as to permit any individual in a restricted area to inhale a quantity of such material in excess of the intake limits specified in Appendix A, Table I, Column 1 of this part. If such soluble uranium is of a form such that absorption through the skin is likely, individual exposures to such material shall be controlled so that the uptake of such material by any organ from either inhalation or absorption or both routes of intake⁴ does not exceed that which would result from inhaling such material at the limits specified in WAC 246-221-290, Appendix A, Table I, Column 1 and footnote 4 thereto.~~

~~(c) For purposes of determining compliance with the requirements of this section the licensee shall use suitable measurements of concentrations of radioactive materials in air for detecting and evaluating airborne radioactivity in restricted areas and in addition, as appropriate, shall use measurements of radioactivity in the body, measurements of radioactivity excreted from the body, or any combination of such measurements as may be necessary for timely detection and assessment of individual intakes of radioactivity by exposed individuals. It is assumed that an individual inhales radioactive material at the airborne concentration in which he or she is present unless he or she uses respiratory protective equipment pursuant to this section. When assessment of a particular individual's intake of radioactive material is necessary, intakes less than those which would result from inhalation for 2 hours in any one day or for 10 hours in any one week at uniform concentrations specified in Appendix A, Table I, Column 1 need not be included in such assessment, provided that for any assessment in excess of these amounts the entire amount is included.~~

~~(2)(a) The licensee shall, as a precautionary procedure, use process or other engineering controls, to the extent practicable, to limit concentrations of radioactive materials in air to levels below those which delimit an airborne radioactivity area as defined in WAC 246-220-010.~~

~~(b) When it is impracticable to apply process or other engineering controls to limit concentrations of radioactive material in air below those defined in WAC 246-220-010, other precautionary procedures, such as increased surveillance, limitation of working times, or provision of respiratory protective equipment, shall be used to maintain intake of radioactive material by any individual within any period of seven consecutive days as far below that intake of radioactive material which would result from inhalation of such material for 40 hours at the uniform concentrations specified in Appendix A, Table I, Column 1 as is reasonably achievable. Whenever the intake of radioactive material by any individual exceeds this 40-hour control measure, the licensee shall make such evaluations and take such actions as are necessary to assure against recurrence. The licensee shall maintain records of such occurrences, evaluations, and actions taken in a clear and readily identifiable form suitable for summary review and evaluation.~~

~~(3) When respiratory protective equipment is used to limit the inhalation of airborne radioactive material pursuant to subsection (2)(b) of this section, the licensee may make allowance for such use in estimating exposures of individuals to such materials provided that such equipment is used as stipulated in Regulatory Guide 8.15, "Acceptable Programs for Respiratory Protection."⁶~~

~~(4) Notwithstanding the provisions of subsections (2) and (3) of this section, the department may impose further restrictions:~~

~~(a) On the extent to which a licensee may make allowance for use of respirators in lieu of provision of process, containment, ventilation, or other engineering controls, if application of such controls is found to be practicable; and~~

~~(b) As might be necessary to assure that the respiratory protective program of the licensee is adequate in limiting exposures of personnel to airborne radioactive materials.~~

~~(5) The licensee shall notify, in writing, the department at least 30 days before the date that respiratory protective equipment is first used under the provisions of this section:~~

Notes: ¹Since the concentration specified for tritium oxide vapor assumes equal intakes by skin absorption and inhalation, the total intake permitted is twice that which would result from inhalation alone at the concentration specified in H-3(s) in Appendix A, Table I, Column 1 for 40 hours per week for 13 weeks.

²For radioactive materials designated "sub" in the "isotope" column of the table, the concentration value specified is based upon exposure to the material as an external radiation source. Individual exposures to these materials may be accounted for as part of the limitation on individual dose in WAC 246-221-010. These materials shall be subject to the precautionary procedures required by subsection (2)(a) of this section.

³Multiply the concentration values specified in Appendix A, Table I, Column 1 by 6.3×10^8 ml to obtain the quarterly quantity limit. Multiply the concentration value specified in Appendix A, Table I, Column 1 of this part by 2.5×10^9 ml to obtain the annual quantity limit for Rn-222.

⁴Significant intake by ingestion or injection is presumed to occur only as a result of circumstances such as accident, inadvertence, poor procedure, or similar special conditions. Such intakes must be evaluated and accounted for by techniques and procedures as may be appropriate to the circumstances for the occurrence. Exposures so evaluated shall be included in determining whether the limitation on individual exposures in subsection (1)(a) of this section has been exceeded.

⁵Regulatory guidance on assessment of individual intakes of radioactive material is given in Regulatory Guide 8.9, "Acceptable Concepts, Models, Equations and Assumptions for a Bioassay Program," single copies of which are available from the Office of Standards Development, United States Nuclear Regulatory Commission, Washington, D.C. 20555, upon written request.

⁶Single copies of Regulatory Guide 8.15 are available for the Office of Standards Development, United States Nuclear Regulatory Commission, Washington, D.C. 20555, upon written request.)

For purposes of assessing dose used to determine compliance with occupational dose equivalent limits, the licensee shall, when required under WAC 246-221-100, take suitable and timely measurements of:

(a) Concentrations of radioactive materials in air in work areas; or

(b) Quantities of radionuclides in the body; or

(c) Quantities of radionuclides excreted from the body;

or

(d) Combinations of these measurements.

(2) Unless respiratory protective equipment is used, as provided in WAC 246-221-117, or the assessment of intake is based on bioassays, the licensee shall assume that an individual inhales radioactive material at the airborne concentration in which the individual is present.

(3) When specific information on the physical and biochemical properties of the radionuclides taken into the body or the behavior of the material in an individual is known, the licensee may:

(a) Use that information to calculate the committed effective dose equivalent, and, if used, the licensee shall document that information in the individual's record; and

(b) Upon prior approval of the department, adjust the DAC or ALI values to reflect the actual physical and chemical characteristics of airborne radioactive material, for example, aerosol size distribution or density; and

(c) Separately assess the contribution of fractional intakes of Class D, W, or Y compounds of a given radionuclide to the committed effective dose equivalent. See WAC 246-221-290.

(4) If the licensee chooses to assess intakes of Class Y material using the measurements given in subsection (1)(b) or (c) of this section, the licensee may delay the recording and reporting of the assessments for periods up to seven months, unless otherwise required by WAC 246-221-250 or 246-221-260. This delay permits the licensee to make additional measurements basic to the assessments.

(5) If the identity and concentration of each radionuclide in a mixture are known, the fraction of the DAC applicable to the mixture for use in calculating DAC-hours shall be either:

(a) The sum of the ratios of the concentration to the appropriate DAC value, that is, D, W, or Y, from WAC 246-221-290 for each radionuclide in the mixture; or

(b) The ratio of the total concentration for all radionuclides in the mixture to the most restrictive DAC value for any radionuclide in the mixture.

(6) If the identity of each radionuclide in a mixture is known, but the concentration of one or more of the radionuclides in the mixture is not known, the DAC for the mixture shall be the most restrictive DAC of any radionuclide in the mixture.

(7) When a mixture of radionuclides in air exists, a licensee may disregard certain radionuclides in the mixture if:

(a) The licensee uses the total activity of the mixture in demonstrating compliance with the dose limits in WAC 246-221-010 and in complying with the monitoring requirements in WAC 246-221-100; and

(b) The concentration of any radionuclide disregarded is less than ten percent of its DAC; and

(c) The sum of these percentages for all of the radionuclides disregarded in the mixture does not exceed thirty percent.

(8) When determining the committed effective dose equivalent, the following information may be considered:

(a) In order to calculate the committed effective dose equivalent, the licensee may assume that the inhalation of one ALI, or an exposure of 2,000 DAC-hours, results in a committed effective dose equivalent of 0.05 Sv (5 rem) for radionuclides that have their ALIs or DACs based on the committed effective dose equivalent.

(b) For an ALI and the associated DAC determined by the nonstochastic organ dose limit of 0.50 Sv (50 rem), the intake of radionuclides that would result in a committed effective dose equivalent of 0.05 Sv (5 rem), that is, the stochastic ALI, is listed in parentheses in Table I of WAC 246-221-290. The licensee may, as a simplifying assumption, use the stochastic ALIs to determine committed effective dose equivalent. However, if the licensee uses the stochastic ALIs, the licensee shall also demonstrate that the limit in WAC 246-221-010 (1)(a)(ii) is met.

Reviser's note: The typographical error in the above section occurred in the copy filed by the agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-221-050 ((Exposure of) Occupational dose limits for minors.((*) ((†))) No licensee or registrant shall possess, use, or transfer sources of radiation in such a manner as to cause any occupationally exposed individual ((within a restricted area.)) who is under 18 years of age, to receive ((in any period of one calendar quarter from all sources of radiation in such licensee's or registrant's possession)) a dose in excess of 10 percent of the annual occupational dose limits specified in ((the table in)) WAC 246-221-010(1).

((2) No licensee shall possess, use, or transfer radioactive material in such a manner as to cause any individual within a restricted area, who is under 18 years of age, to be exposed to airborne radioactive material in an average concentration in excess of the limits specified in WAC 246-221-290, Appendix A, Table II, of this chapter. For purposes of this paragraph, concentrations may be averaged over periods not greater than a week.

(3) The provisions of WAC 246-221-040 (2)(b) and (3) shall apply to exposures subject to subsection (2) of this section except that the references in WAC 246-221-040 (2)(b) and (3) to Appendix A, Table I, Column 1 shall be deemed to be referenced to Appendix A, Table II, Column 1.

Note: ~~*For determining the doses specified in this section, a dose from x or gamma rays up to 10 MeV may be assumed to be equivalent to the exposure measured by a properly calibrated appropriate instrument in air at or near the body surface in the region of the highest dose rate.))~~

NEW SECTION

WAC 246-221-055 Dose to an embryo/fetus. (1) The licensee or registrant shall ensure that the dose to an embryo/fetus during the entire pregnancy, due to occupational exposure of a declared pregnant woman, does not exceed 5 mSv (0.5 rem).

(2) Once pregnancy has been declared, the licensee or registrant shall make every effort to avoid substantial variation above a uniform monthly exposure rate to a declared pregnant woman so as to satisfy the limit in subsection (1) of this section.

(3) If by the time the woman declares pregnancy to the licensee or registrant, the dose to the embryo/fetus has exceeded 4.5 mSv (0.45 rem), the licensee or registrant shall be deemed to be in compliance with subsection (1) of this section if the additional dose to the embryo/fetus does not exceed 0.50 mSv (0.05 rem) during the remainder of the pregnancy.

(4) The dose to an embryo/fetus shall be taken as the sum of:

(a) The calculated dose equivalent to the embryo/fetus resulting from external exposure of the declared pregnant woman or, in the absence of this information, the deep dose equivalent to the declared pregnant woman; and

(b) The dose to the embryo/fetus from radionuclides in the embryo/fetus and radionuclides in the declared pregnant woman.

(5) The licensee or registrant shall maintain the records of dose to an embryo/fetus with the records of dose to the declared pregnant woman. The declaration of pregnancy, including the estimated date of conception, shall also be kept on file, but may be maintained separately from the dose records.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-221-060 ((Permissible levels of radiation from external sources in unrestricted areas.*)) Dose limits for individual members of the public.

((Note: *It is the intent of this section to limit radiation levels so that it is unlikely that individuals in unrestricted areas would receive a dose to the whole body in excess of 0.5 rem in any calendar year. If in specific instances, it is determined by the department that this intent is not met, the department may, pursuant to WAC 246-220-100, impose such additional requirements on the licensee or registrant as may be necessary to meet the intent.

(1) Except as authorized by the department pursuant to subsection (2) of this section, no licensee or registrant shall possess, use, or transfer sources of radiation in such a manner as to create in any unrestricted area from such sources of radiation in that person's possession:

(a) Radiation levels which, if an individual were continuously present in the area, could result in the individual's receiving a dose in excess of two millirems in any one hour; or

(b) Radiation levels which, if an individual were continuously present in the area, could result in the individual's receiving a dose in excess of one hundred millirems in any seven consecutive days.

(2) Any person may apply to the department for proposed limits upon levels of radiation in unrestricted areas in excess of those specified in subsection (1) of this section resulting from the applicant's possession or use of sources of radiation. Such applications should include information as to anticipated average radiation levels and anticipated occupancy times for each unrestricted area involved. The department may approve the proposed limits if the applicant demonstrates to the satisfaction of the department that the proposed limits are not likely to cause any individual to receive a dose to the whole body in any period of one calendar year in excess of 0.5 rem and that the proposed limits are consistent with WAC 246-220-007.

(3) In addition to other requirements of this part, licensees engaged in uranium fuel cycle operations subject to the provisions of 40 CFR Part 190, "Environmental Radiation Protection Standards for Nuclear Power Operation," shall comply with that part.) (1) Each licensee or registrant shall conduct operations so that:

(a) The total effective dose equivalent to individual members of the public from the licensed or registered operation does not exceed 1 mSv (0.1 rem) in a year, exclusive of the dose contribution from the licensee's or registrant's disposal of radioactive material into sanitary sewerage in accordance with WAC 246-221-190; and

(b) The dose in any unrestricted area from external sources does not exceed 0.02 mSv (0.002 rem) in any one hour.

(2) If the licensee or registrant permits members of the public to have access to restricted areas, they shall be escorted and the limits for members of the public continue to apply to those individuals.

(3) Notwithstanding subsection (1) of this section, a licensee or registrant may continue to operate a facility constructed and put into operation prior to January 1, 1994, where the annual dose limit for an individual member of the public is more than 1 mSv (0.1 rem) and less than 5 mSv (0.5 rem) total effective dose equivalent, provided:

(a) The facility's approved operating conditions for each radiation source remain the same. Any increase in the following operating conditions shall require reevaluation and/or modification of the facility shielding applicable to the source of radiation to meet the 1 mSv (0.1 rem) total effective dose equivalent limit for individual members of the public: size of the radiation source, workload, or occupancy factors associated with the source of radiation; and

(b) Any change in the permanent shielding of the facility due to remodeling, repair or replacement shall require the facility to meet the 1 mSv (0.1 rem) total effective dose equivalent limit for individual members of the public for areas affected by that portion of the shielding.

(4) Each licensee or registrant shall maintain records sufficient to demonstrate compliance with the dose limit for individual members of the public.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-221-070 ((Concentration in effluents released to unrestricted areas;)) Compliance with dose limits for individual members of the public. (1) ((A licensee shall not possess, use, or transfer licensed material so as to release to an unrestricted area radioactive material in concentrations which exceed the limits specified in WAC 246-221-290, Appendix A, Table II, except as authorized pursuant to subsection (2) of this section. For purposes of this section concentrations may be averaged over a period not greater than one calendar year.

(2) An application for a license or amendment may include proposed limits higher than those specified in subsection (1) of this section. The department will approve the proposed limits if the applicant demonstrates:

(a) That the applicant has made a reasonable effort to minimize the radioactivity contained in effluents released to unrestricted areas; and

(b) That it is not likely that radioactive material discharged in the effluent would result in the exposure of an individual to concentrations of radioactive material in air or water exceeding the limits specified in WAC 246-221-290, Appendix A, Table II.

(3) An application for higher limits pursuant to subsection (2) of this section shall include information demonstrating that the applicant has made a reasonable effort to minimize the radioactivity discharged in effluents to unrestricted areas, and shall include, as pertinent:

(a) Information as to flow rates, total volume of effluent, peak concentration of each radionuclide in the effluent, and concentration of each radionuclide in the effluent averaged over a period of one calendar year at the point where the effluent leaves a stack, tube, pipe, or similar conduit;

(b) A description of the properties of the effluents, including:

(i) Chemical composition;

(ii) Physical characteristics, including suspended solids content in liquid effluents, and nature of gas or aerosol for air effluents;

(iii) The hydrogen ion concentrations (pH) of liquid effluents; and

(iv) The size range of particulates in effluents released into air;

(e) A description of the anticipated human occupancy in the unrestricted area where the highest concentration of radioactive material from the effluent is expected, and, in the case of a river or stream, a description of water uses downstream from the point of release of the effluent;

(d) Information as to the highest concentration of each radionuclide in an unrestricted area, including anticipated concentrations averaged over a period of one calendar year:

(i) In air at any point of human occupancy, or

(ii) In water at points of use downstream from the point of release of the effluent;

(e) The background concentration of radionuclides in the receiving river or stream prior to the release of liquid effluent;

(f) A description of the environmental monitoring equipment, including sensitivity of the system, and proce-

dures and calculations to determine concentrations of radionuclides in the unrestricted area and possible reconcentrations of radionuclides; and

(g) ~~A description of the waste treatment facilities and procedures used to reduce the concentration of radionuclides in effluents prior to their release.~~

(4) ~~For the purposes of this section, the concentration limits in WAC 246-221-290, Appendix A, Table II of this part shall apply at the boundary of the restricted area. The concentration of radioactive material discharged through a stack, pipe or similar conduit may be determined with respect to the point where the material leaves the conduit. If the conduit discharges within the restricted area, the concentration at the boundary may be determined by applying appropriate factors for dilution, dispersion, or decay between the point of discharge and the boundary.~~

(5) ~~In addition to limiting concentrations in effluent streams, the department may limit quantities of radioactive material released in air or water during a specified period of time if it appears that the daily intake of radioactive material from air, water, or food by a suitable sample of an exposed population group, averaged over a period not exceeding one calendar year, would otherwise exceed the daily intake resulting from continuous exposure to air or water containing one third the concentration of radioactive material specified in WAC 246-221-290, Appendix A, Table II.~~

(6) ~~In addition to the limits set in subsection (1) of this section all radioactive emissions to the atmosphere must meet the requirements of chapter 246-247 WAC.~~

(7)) (1) The licensee shall make or cause to be made surveys of radiation levels in unrestricted areas and radioactive materials in effluents released to unrestricted areas to demonstrate compliance with the dose limits for individual members of the public in WAC 246-221-060.

(2) A licensee shall show compliance with the annual dose limit in WAC 246-221-060 by:

(a) Demonstrating by measurement or calculation that the total effective dose equivalent to the individual likely to receive the highest dose from the licensed operation does not exceed the annual dose limit; or

(b) Demonstrating that:

(i) The annual average concentrations of radioactive material released in gaseous and liquid effluents at the boundary of the unrestricted area do not exceed the values specified in Table II of WAC 246-221-290; and

(ii) If an individual were continually present in an unrestricted area, the dose from external sources would not exceed 0.02 mSv (0.002 rem) in an hour and 0.50 mSv (0.05 rem) in a year.

(3) Upon approval from the department, the licensee may adjust the effluent concentration values in WAC 246-221-290, Table II, for members of the public, to take into account the actual physical and chemical characteristics of the effluents, such as, aerosol size distribution, solubility, density, radioactive decay equilibrium, and chemical form.

(4) The provisions of this section do not apply to disposal of radioactive material into sanitary sewerage systems, which is governed by WAC 246-221-190.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-221-080 Leak tests. (1) Each sealed radioactive source possessed under the provisions of a specific license, other than hydrogen-3 (tritium), with a half-life greater than thirty days and in any form other than gas, shall be tested and results obtained for leakage and/or contamination prior to initial use and at six-month intervals or as specified by the license, except that each source designed for the purpose of emitting alpha particles shall be tested at intervals not to exceed three months. If at any other time there is reason to suspect that a sealed source might have been damaged, it shall be tested for leakage and results obtained before further use. In the absence of a certificate from a transferor indicating that a test for leakage has been made within six months prior to the transfer (three months for a source designed to emit alpha particles), the sealed source shall not be put into use until tested and the results received.

(2) Leak tests shall be capable of detecting the presence of 185 Bq (0.005 microcurie) of removable contamination. The results of leak tests made pursuant to subsection (1) of this section shall be recorded in units of becquerel or microcuries and shall be maintained for inspection by the department. Any test conducted pursuant to subsection (1) which reveals the presence of 185 Bq (0.005 microcurie) or more of removable contamination shall be considered evidence that the sealed source is leaking. The licensee shall immediately withdraw the source from use shall take action to prevent the spread of contamination and shall cause it to be decontaminated and repaired or to be disposed in accordance with WAC 246-232-080. If a sealed source shows evidence of leaking, a report shall be filed with the department within five days of the test, describing the equipment involved, the test results, and the corrective action taken. ((Where sealed sources are permanently mounted in devices or equipment,))

(3) Test samples shall be taken from the sealed source or from the internal surfaces or the opening of the container in which the sealed source is stored or from surfaces of devices or equipment in which the sealed source is permanently mounted. Tests for contamination and leakage may be made by wiping appropriate accessible surfaces on which one might expect contamination to accumulate and measuring these wipes for transferred contamination. Test samples shall also be taken from the interior surfaces of the container in which a sealed source of radium is stored.

((3)) (4) Leak tests are required for sealed radioactive sources that are greater than 3.7 MBq (100 microcuries) for beta and gamma ((emitters)) emitting sources and greater than 370 KBq (10 microcuries) for sources designed to emit alpha ((emitters)) particles.

(5) Tests for leakage or contamination shall be performed by persons specifically authorized by the department, an agreement state, a licensing state, or the United States Nuclear Regulatory Commission to perform such services.

AMENDATORY SECTION (Amending Order 245, filed 2/21/92, effective 3/23/92)

WAC 246-221-090 Personnel monitoring for external dose. Each licensee or registrant shall monitor occupational exposure from sources of radiation at levels sufficient to demonstrate compliance with the occupational dose limits of WAC 246-221-010, 246-221-030, 246-221-050 and 246-221-055.

(1) Each licensee or registrant shall supply ~~((appropriate personnel monitoring equipment to;))~~ and shall require the use of ~~((such equipment))~~ individual monitoring devices by:

(a) Each ~~((individual who enters a restricted area under such circumstances that the individual receives, or is))~~ adult likely to receive, in one year from sources external to the body, a dose in ~~((any calendar quarter in))~~ excess of ~~((25))~~ ten percent of the applicable ~~((value))~~ limits specified in WAC 246-221-010(1).

(b) Each ~~((individual under 18 years of age who enters a restricted area under such circumstances that the individual receives, or is))~~ minor or declared pregnant woman likely to receive, in one year from sources external to the body, a dose ~~((in any calendar quarter))~~ in excess of ~~((5))~~ ten percent of the applicable ~~((value))~~ limits specified in WAC ~~((246-221-010(1)))~~ 246-221-050 or 246-221-055.

(c) Each individual who enters a high or very high radiation area.

(2) Personnel monitoring devices assigned to an individual:

(a) Shall not intentionally be exposed to give a false or erroneous reading;

(b) Shall be assigned to one individual per exposure interval (i.e., weekly, monthly) and used to determine exposure for that individual only;

(c) Shall not be worn by any individual other than that individual originally assigned to the device;

(d) Personnel monitoring devices that are exposed while not being worn by the assigned individual shall be processed and recorded as soon as possible. A replacement monitoring device shall be assigned to the individual immediately. A record of the circumstances of the exposure shall be retained.

(3) All personnel dosimeters, ~~((except for direct and indirect reading pocket ionization chambers and those dosimeters used to measure the dose to ((hands and forearms, feet, and ankles)))~~ any extremities, that require processing to determine the radiation dose and that are utilized by licensees or registrants to comply with subsection (1) of this section, with other applicable provisions of chapters 246-220 through 246-255 WAC, or with conditions specified in a licensee's license must be processed and evaluated by a dosimetry processor:

(a) Holding current personnel dosimetry accreditation from either the National Voluntary Laboratory Accreditation Program (NVLAP) of the National Institute of Standards and Technology (formerly known as the National Bureau of Standards) or the United States Department of Energy Laboratory Accreditation Program for Personnel Dosimetry Systems (DOELAP); and

(b) Approved in this accreditation process for the type of radiation or radiations included in the NVLAP or DOELAP program that most closely approximate the type of

radiation or radiations for which the individual wearing the dosimeter is monitored.

(4) For the purposes of this section "dosimetry processor" means an individual or an organization that processes and evaluates personnel monitoring ~~((equipment))~~ devices in order to determine the radiation dose delivered to the ~~((equipment))~~ device.

(5) Each licensee or registrant shall maintain records of doses received by all individuals for whom monitoring was required pursuant to subsection (1) of this section, and records of doses received during planned special exposures, accidents, and emergency conditions. Assessments of dose equivalent and records made using units in effect before January 1, 1994, need not be changed. These records shall include, when applicable:

(a) The deep dose equivalent to the whole body, eye dose equivalent, shallow dose equivalent to the skin, and shallow dose equivalent to the extremities; and

(b) The total effective dose equivalent when required by WAC 246-221-015; and

(c) The total of the deep dose equivalent and the committed dose to the organ receiving the highest total dose (total organ dose equivalent).

(6) The licensee or registrant shall maintain the records specified in subsection (5) of this section on department Form RHF-5A, in accordance with the instructions provided thereon, or in clear and legible records containing all the information required by Form RHF-5A; and shall update the information at least annually.

(7) Each licensee or registrant shall ensure that individuals, for whom they are required to monitor occupational doses in accordance with subsection (1) of this section, wear individual monitoring devices as follows:

(a) An individual monitoring device used for monitoring the dose to the whole body shall be worn at the unshielded or least shielded location of the whole body likely to receive the highest exposure. When a protective apron is worn, the location of the individual monitoring device is typically at the neck (collar).

(b) Any additional individual monitoring device used for monitoring the dose to an embryo/fetus of a declared pregnant woman, pursuant to WAC 246-221-055(1), shall be located at the waist under any protective apron being worn by the woman.

(c) An individual monitoring device used for monitoring the eye dose equivalent, to demonstrate compliance with WAC 246-221-010 (1)(b)(i), shall be located at the neck (collar), outside any protective apron being worn by the monitored individual, or at an unshielded location closer to the eye.

(d) An individual monitoring device used for monitoring the dose to the extremities, to demonstrate compliance with WAC 246-221-010 (1)(b)(ii), shall be worn on the extremity likely to receive the highest exposure. Each individual monitoring device shall be oriented to measure the highest dose to the extremity being monitored.

AMENDATORY SECTION (Amending Order 121, filed 12/27/90, effective 1/31/91)

WAC 246-221-100 (~~Orders requiring furnishing bioassay services.~~) **Personnel monitoring for internal dose.** (1) Each licensee shall monitor, to determine compliance with WAC 246-221-040, the occupational intake of radioactive material by and assess the committed effective dose equivalent to:

(a) Adults likely to receive, in 1 year, an intake in excess of ten percent of the applicable ALI in Table I, Columns 1 and 2, of WAC 246-221-290; and

(b) Minors and declared pregnant women likely to receive, in one year, a committed effective dose equivalent in excess of 0.50 mSv (0.05 rem).

(2) Where necessary or desirable in order to aid in determining the extent of an individual's exposure to concentrations of radioactive material, the department may incorporate license provisions or issue an order requiring a licensee or registrant to make available to the individual appropriate bioassay services and to furnish a copy of the reports of such services to the department.

(3) Each licensee shall maintain records of doses received by all individuals for whom monitoring was required pursuant to subsections (1) and (2) of this section, and records of doses received during planned special exposures, accidents, and emergency conditions. Assessments of dose equivalent and records made using units in effect before January 1, 1994, need not be changed. These records shall include, when applicable:

(a) The estimated intake or body burden of radionuclides; and

(b) The committed effective dose equivalent assigned to the intake or body burden of radionuclides; and

(c) The specific information used to calculate the committed effective dose equivalent pursuant to WAC 246-221-040; and

(d) The total effective dose equivalent when required by WAC 246-221-015; and

(e) The total of the deep dose equivalent and the committed dose to the organ receiving the highest total dose (total organ dose equivalent).

(4) The licensee or registrant shall maintain the records specified in subsection (3) of this section on department Form RHF-5A, in accordance with the instructions provided thereon, or in clear and legible records containing all the information required by Form RHF-5A; and shall update the information at least annually.

NEW SECTION

WAC 246-221-102 Control of access to high radiation areas. (1) The licensee or registrant shall ensure that each entrance or access point to a high radiation area has one or more of the following features:

(a) A control device that, upon entry into the area, causes the level of radiation to be reduced below that level at which an individual might receive a deep dose equivalent of 1 mSv (0.1 rem) in one hour at thirty centimeters from the source of radiation or from any surface that the radiation penetrates; or

(b) A control device that energizes a conspicuous visible or audible alarm signal so that the individual entering the

high radiation area and the supervisor of the activity are made aware of the entry; or

(c) Entryways that are locked, except during periods when access to the areas is required, with positive control over each individual entry.

(2) In place of the controls required by subsection (1) of this section for a high radiation area, the licensee or registrant may substitute continuous direct or electronic surveillance that is capable of preventing unauthorized entry.

(3) The licensee or registrant may apply to the department for approval of alternative methods for controlling access to high radiation areas.

(4) The licensee or registrant shall establish the controls required by subsections (1) and (3) of this section in a way that does not prevent individuals from leaving a high radiation area.

(5) The licensee is not required to control each entrance or access point to a room or other area that is a high radiation area solely because of the presence of radioactive materials prepared for transport and packaged and labeled in accordance with the regulations of the United States Department of Transportation provided that:

(a) The packages do not remain in the area longer than three days; and

(b) The dose rate at one meter from the external surface of any package does not exceed 0.1 mSv (0.01 rem) per hour.

(6) The licensee is not required to control entrance or access to rooms or other areas in hospitals solely because of the presence of patients containing radioactive material, provided that there are personnel in attendance who are taking the necessary precautions to prevent the exposure of individuals to radiation or radioactive material in excess of the established limits and to operate within the ALARA provisions of the licensee's radiation protection program.

(7) The licensee or registrant is not required to control entrance or access to rooms or other areas as described in this section if the licensee or registrant has met all the specific requirements for access and control specified in other applicable chapters of these regulations, such as, chapter 246-243 WAC for industrial radiography, chapter 246-225 WAC for x-rays in the healing arts, and chapter 246-229 WAC for particle accelerators.

NEW SECTION

WAC 246-221-104 Control of access to very high radiation areas. (1) In addition to the requirements in WAC 246-221-102, the licensee or registrant shall institute additional measures to ensure that an individual is not able to gain unauthorized or inadvertent access to areas in which radiation levels could be encountered at five Gy (500 rad) or more in one hour at one meter from a source of radiation or any surface through which the radiation penetrates. This requirement does not apply to rooms or areas in which diagnostic x-ray systems are the only source of radiation, or to nonself-shielded irradiators.

(2) The licensee or registrant is not required to control entrance or access to rooms or other areas containing sources of radiation capable of producing a very high radiation area as described in this section if the licensee or registrant has met all the specific requirements for access and control

specified in other applicable chapters of these regulations, such as, chapter 246-243 WAC for industrial radiography, chapter 246-225 WAC for x-rays in the healing arts, and chapter 246-229 WAC for particle accelerators.

NEW SECTION

WAC 246-221-106 Control of access to very high radiation areas—Irradiators. (1) This section applies to licensees or registrants with sources of radiation in nonself-shielded irradiators. This section does not apply to sources of radiation that are used in teletherapy, in industrial radiography, or in completely self-shielded irradiators in which the source of radiation is both stored and operated within the same shielding radiation barrier and, in the designed configuration of the irradiator, is always physically inaccessible to any individual and cannot create a radiation level of five Gy (500 rad) or more in one hour at one meter in an area that is accessible to any individual.

(2) Each area in which there may exist radiation levels in excess of five Gy (500 rad) in one hour at one meter from a source of radiation that is used to irradiate materials shall meet the following requirements:

(a) Each entrance or access point shall be equipped with entry control devices which:

(i) Function automatically to prevent any individual from inadvertently entering a very high radiation area; and

(ii) Permit deliberate entry into the area only after a control device is actuated that causes the radiation level within the area, from the source of radiation, to be reduced below that at which it would be possible for an individual to receive a deep dose equivalent in excess of one mSv (0.1 rem) in one hour; and

(iii) Prevent operation of the source of radiation if it would produce radiation levels in the area that could result in a deep dose equivalent to an individual in excess of one mSv (0.1 rem) in one hour.

(b) Additional control devices shall be provided so that, upon failure of the entry control devices to function as required by (a) of this subsection:

(i) The radiation level within the area, from the source of radiation, is reduced below that at which it would be possible for an individual to receive a deep dose equivalent in excess of one mSv (0.1 rem) in one hour; and

(ii) Conspicuous visible and audible alarm signals are generated to make an individual attempting to enter the area aware of the hazard and at least one other authorized individual, who is physically present, familiar with the activity, and prepared to render or summon assistance, aware of the failure of the entry control devices.

(c) The licensee or registrant shall provide control devices so that, upon failure or removal of physical radiation barriers other than the sealed source's shielded storage container:

(i) The radiation level from the source of radiation is reduced below that at which it would be possible for an individual to receive a deep dose equivalent in excess of one mSv (0.1 rem) in one hour; and

(ii) Conspicuous visible and audible alarm signals are generated to make potentially affected individuals aware of the hazard and the licensee or registrant or at least one other individual, who is familiar with the activity and prepared to

render or summon assistance, aware of the failure or removal of the physical barrier.

(d) When the shield for stored sealed sources is a liquid, the licensee shall provide means to monitor the integrity of the shield and to signal, automatically, loss of adequate shielding.

(e) Physical radiation barriers that comprise permanent structural components, such as walls, that have no credible probability of failure or removal in ordinary circumstances need not meet the requirements of (c) and (d) of this subsection.

(f) Each area shall be equipped with devices that will automatically generate conspicuous visible and audible alarm signals to alert personnel in the area before the source of radiation can be put into operation and in time for any individual in the area to operate a clearly identified control device, which must be installed in the area and which can prevent the source of radiation from being put into operation.

(g) Each area shall be controlled by use of such administrative procedures and such devices as are necessary to ensure that the area is cleared of personnel prior to each use of the source of radiation.

(h) Each area shall be checked by a radiation measurement to ensure that, prior to the first individual's entry into the area after any use of the source of radiation, the radiation level from the source of radiation in the area is below that at which it would be possible for an individual to receive a deep dose equivalent in excess of one mSv (0.1 rem) in one hour.

(i) Entry and exit portals that are used in transporting materials to and from the irradiation area, and that are not intended for use by individuals, shall be controlled by such devices and administrative procedures as are necessary to physically protect and warn against inadvertent entry by any individual through these portals. Exit portals for irradiated materials shall be equipped to detect and signal the presence of any loose radioactive material that is carried toward such an exit and automatically to prevent loose radioactive material from being carried out of the area.

(3) The entry control devices required in subsection (2)(a) of this section shall be tested for proper functioning:

(a) Prior to initial operation with the source of radiation on any day, unless operations were continued uninterrupted from the previous day; and

(b) Prior to resumption of operation of the source of radiation after any unintentional interruption; and

(c) In accordance with a schedule for periodic tests of the entry control and warning systems submitted by the licensee or registrant and approved by the department.

(4) The licensee or registrant shall not conduct operations, other than those necessary to place the source of radiation in safe condition or to effect repairs on controls, unless control devices are functioning properly.

(5) Licensees, registrants, or applicants for licenses or registrations for sources of radiation within the purview of subsection (2) of this section which will be used in a variety of positions or in locations, such as open fields or forests, that make it impracticable to comply with certain requirements of subsection (2) of this section, such as those for the automatic control of radiation levels, may apply to the department for approval of alternative safety measures. Alternative safety measures shall provide personnel protec-

tion at least equivalent to those specified in subsection (2) of this section. At least one of the alternative measures shall include an entry-preventing interlock control based on a measurement of the radiation that ensures the absence of high radiation levels before an individual can gain access to the area where such sources of radiation are used.

(6) The entry control devices required by subsections (2) and (3) of this section shall be established in such a way that no individual will be prevented from leaving the area.

(7) The licensee shall maintain records of tests made pursuant to subsection (3) of this section on entry control devices for very high radiation areas. These records shall include the date, time, and results of each such test of function.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-221-110 Surveys. (1) Each licensee or registrant shall make or cause to be made such surveys, as defined in WAC 246-220-010, as may be necessary for the licensee or registrant to establish compliance with these regulations and are reasonable under the circumstances to evaluate radiation levels, concentrations or quantities of radioactive material, and the extent of potential radiation hazards that may be present. Records of such surveys shall be preserved as specified in WAC 246-221-230. Information on performing surveys may be found in the United States Nuclear Regulatory Commission's Regulatory Guide 8.23.

(2) The licensee shall ensure that instruments and equipment used for quantitative radiation measurements, for example, dose rate and effluent monitoring, are calibrated annually at intervals not to exceed thirteen months for the radiation measured.

NEW SECTION

WAC 246-221-113 Use of process, engineering or other controls. (1) The licensee shall use, to the extent practicable, process or other engineering controls, such as, containment or ventilation, to control the concentrations of radioactive material in air.

(2) When it is not practicable to apply process or other engineering controls to control the concentrations of radioactive material in air to values below those that define an airborne radioactivity area, the licensee shall, consistent with maintaining the total effective dose equivalent ALARA, increase monitoring and limit intakes by one or more of the following means:

- (a) Control of access; or
- (b) Limitation of exposure times; or
- (c) Use of respiratory protection equipment; or
- (d) Other controls.

NEW SECTION

WAC 246-221-117 Use of individual respiratory protection equipment. (1) If the licensee uses respiratory protection equipment to limit intakes pursuant to WAC 246-221-113:

(a) The licensee shall use only respiratory protection equipment that is:

(i) Tested and certified or had certification extended by the National Institute for Occupational Safety and Health and the Mine Safety and Health Administration; or

(ii) Approved by the department on the basis of the licensee's submittal of an application for authorized use of other respiratory protection equipment, including a demonstration by testing, or a demonstration on the basis of reliable test information, that the material and performance characteristics of the equipment are capable of providing the proposed degree of protection under anticipated conditions of use.

(b) The licensee shall implement and maintain a respiratory protection program that includes:

(i) Air sampling sufficient to identify the potential hazard, permit proper equipment selection, and estimate exposures; and

(ii) Surveys and bioassays, as appropriate, to evaluate actual intakes; and

(iii) Testing of respirators for operability immediately prior to each use; and

(iv) Written procedures regarding selection, fitting, issuance, maintenance, cleaning, repair, and testing of respirators, including testing for operability immediately prior to each use; supervision and training of personnel; monitoring, including air sampling and bioassays; and recordkeeping; and

(v) Determination by a physician prior to initial fitting of respirators, and at least every twelve months thereafter, that the individual user is physically able to use the respiratory protection equipment.

(c) The licensee shall issue a written policy statement on respirator usage covering:

(i) The use of process or other engineering controls, instead of respirators; and

(ii) The routine, nonroutine, and emergency use of respirators; and

(iii) The length of periods of respirator use and relief from respirator use.

(d) The licensee shall advise each respirator user that the user may leave the area at any time for relief from respirator use in the event of equipment malfunction, physical or psychological distress, procedural or communication failure, significant deterioration of operating conditions, or any other conditions that might require such relief.

(e) The licensee shall use equipment within the equipment manufacturer's expressed limitations for type and mode of use and shall provide proper visual, communication, and other special capabilities, such as adequate skin protection, when needed.

(2) When estimating exposure of individuals to airborne radioactive materials, the licensee may make allowance for respiratory protection equipment used to limit intakes pursuant to WAC 246-221-113, provided that the following conditions, in addition to those in subsection (1) of this section, are satisfied:

(a) The licensee selects respiratory protection equipment that provides a protection factor, specified in WAC 246-221-285, greater than the multiple by which peak concentrations of airborne radioactive materials in the working area are expected to exceed the values specified in WAC 246-221-290, Table I, Column 3. However, if the selection of respiratory protection equipment with a protection factor

greater than the peak concentration is inconsistent with the goal specified in WAC 246-221-113 of keeping the total effective dose equivalent ALARA, the licensee may select respiratory protection equipment with a lower protection factor provided that such a selection would result in a total effective dose equivalent that is ALARA. The concentration of radioactive material in the air that is inhaled when respirators are worn may be initially estimated by dividing the average concentration in air, during each period of uninterrupted use, by the protection factor. If the exposure is later found to be greater than initially estimated, the corrected value shall be used; if the exposure is later found to be less than initially estimated, the corrected value may be used.

(b) The licensee shall obtain authorization from the department before assigning respiratory protection factors in excess of those specified in WAC 246-221-285. The department may authorize a licensee to use higher protection factors on receipt of an application that:

(i) Describes the situation for which a need exists for higher protection factors, and

(ii) Demonstrates that the respiratory protection equipment provides these higher protection factors under the proposed conditions of use.

(3) In an emergency, the licensee shall use as emergency equipment only respiratory protection equipment that has been specifically certified or had certification extended for emergency use by the National Institute for Occupational Safety and Health and the Mine Safety and Health Administration.

(4) Unless already authorized by license condition, the licensee shall notify the department in writing at least thirty days before the date that respiratory protection equipment is first used pursuant to either subsection (1) or (2) of this section.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-221-120 Caution signs, and labels (and signals)). (1) ~~((General.))~~ The radiation symbol shall be used on all signs, labels, or other written means of warning individuals concerning radiation hazards.

(a) ~~((Except as otherwise authorized by the department, symbols prescribed by this section shall use the conventional radiation caution colors (magenta or purple on yellow background).))~~ The symbol prescribed by this section is the conventional three-blade design: Radiation symbol

- ~~((i) Cross-hatch area is to be magenta or purple.~~
- ~~((ii) Background is to be yellow.~~

(b) The symbol prescribed by this section shall be:

(i) Magenta, purple, or black on a yellow background;

or
 (ii) Conspicuously etched or stamped without regard to a color requirement on sources, source holders or device components containing sources which are subjected to extreme environmental conditions which would cause the color to deteriorate.

(2) The conventional radiation symbol as described in ~~((a) of this)~~ subsection (1) of this section shall be used only for:

~~((i))~~ (a) Instructing individuals to be cognizant of a potential radiation hazard as prescribed in ~~((e))~~ subsections (4) through ~~((j))~~ (10) of this ~~((subsection))~~ section.

~~((ii))~~ (b) Indicating that information presented pertains to the topic of radiation.

~~((e))~~ (3) In addition to the contents of signs and labels prescribed in this section, a licensee or registrant may provide on or near such signs and labels any additional

information which may be appropriate in aiding individuals to minimize exposure to radiation.

~~((4))~~ (4) Each radiation area and entrance thereto shall be conspicuously posted with a sign or signs bearing the radiation caution symbol and the words: CAUTION* - RADIATION AREA. However, in an exceptionally large room where other activities of a nonradiological nature are conducted the entrance need not be posted provided a conspicuous barricade with an appropriate number of signs is established to delineate the radiation area.

((Note: *The word "DANGER" may be substituted for "CAUTION" on signs required by (d) through (h) of this subsection.

~~(e) High radiation areas.~~

~~((i))~~ (5) Each high radiation area and all entrances thereto shall be conspicuously posted with a sign or signs bearing the radiation caution symbol and the words: CAUTION* - HIGH RADIATION AREA or DANGER - HIGH RADIATION AREA. To avoid unnecessary exposure, the licensee or registrant may satisfy this requirement by posting the sign at the estimated location or vicinity of the high radiation area.

~~((ii) Each entrance or access point to a high radiation area shall be:~~

~~(A) Equipped with a control device which shall cause the level of radiation to be reduced below that at which an individual might receive a dose of one hundred millirems in one hour upon entry into the area; or~~

~~(B) Equipped with a control device which shall energize a conspicuous visible or audible alarm signal in such a manner that the individual entering the high radiation area and the licensee or a supervisor of the activity are made aware of the entry; or~~

~~(C) Maintained locked except during periods when access to the area is required, with positive control over each individual entry.~~

~~((iii) The controls required by (e)(ii) of this subsection shall be established in such a way that no individual will be prevented from leaving a high radiation area.~~

~~((iv) In the case of a high radiation area established for a period of thirty days or less, direct surveillance to prevent unauthorized entry may be substituted for the controls required by (e)(ii) of this subsection. Direct surveillance requires the continuous physical presence of an individual capable of taking all necessary precautions to prevent unwarranted exposure of individuals.~~

~~((v) Any licensee or registrant may apply to the department for approval of methods not included in (e)(ii) and (iv) of this subsection for controlling access to high radiation areas. The department will approve the proposed alternatives if the licensee or registrant demonstrates that the alternative methods of control will prevent unauthorized entry into a high radiation area, and that the requirement of (e)(ii) of this subsection is met.~~

~~(vi) Very high radiation areas:~~

~~(A) Each area in which there may exist radiation levels in excess of five hundred rems in one hour at one meter from a sealed radioactive source² that is used to irradiate materials shall:~~

~~(I) Have each entrance or access point equipped with entry control devices which shall function automatically to prevent any individual from inadvertently entering the area~~

252-030

when such radiation levels exist; permit deliberate entry into the area only after a control device is actuated that shall cause the radiation level within the area, from the sealed source, to be reduced below that at which it would be impossible for an individual to receive a dose in excess of one hundred mrem in one hour; and prevent operation of the source if the source would produce radiation levels in the area that could result in a dose to an individual in excess of one hundred mrem in one hour. The entry control devices required by (e)(vi)(A) of this subsection shall be established in such a way that no individual will be prevented from leaving the area.

(II) Be equipped with additional control devices such that upon failure of the entry control devices to function as required by (e)(vi)(A)(I) of this subsection the radiation level within the area, from the sealed source, shall be reduced below that at which it would be possible for an individual to receive a dose in excess of one hundred mrem in one hour; and visible and audible alarm signals shall be generated to make an individual attempting to enter the area aware of the hazard and the licensee or at least one other individual who is familiar with the activity and prepared to render or summon assistance, aware of such failure of the entry control devices;

(III) Be equipped with control devices such that upon failure or removal of physical radiation barriers other than the source's shielded storage container the radiation level from the source shall be reduced below that at which it would be possible for an individual to receive a dose in excess of one hundred mrem in one hour; and visible and audible alarm signals shall be generated to make potentially affected individuals aware of the hazard and the licensee or at least one other individual, who is familiar with the activity and prepared to render or summon assistance, aware of the failure or removal of the physical barrier. When the shield for the stored source is a liquid, means shall be provided to monitor the integrity of the shield and to signal, automatically, loss of adequate shielding. Physical radiation barriers that comprise permanent structural components, such as walls, that have no credible probability of failure or removal in ordinary circumstances need not meet the requirements of (e)(vi)(A)(III) of this subsection;

(IV) Be equipped with devices that will automatically generate visible and audible alarm signals to alert personnel in the area before the source can be put into operation and in sufficient time for any individual in the area to operate a clearly identified control device which shall be installed in the area and which can prevent the source from being put into operation;

(V) Be controlled by use of such administrative procedure and such devices as are necessary to assure that the area is cleared of personnel prior to each use of the source preceding which use it might have been possible for an individual to have entered the area;

(VI) Be checked by a physical radiation measurement to assure that prior to the first individual's entry into the area after any use of the source, the radiation level from the source in the area is below that at which it would be possible for an individual to receive a dose in excess of one hundred mrem in one hour;

(VII) Have entry control devices required in (e)(vi)(A)(I) of this subsection which have been tested for proper

functioning prior to initial operation with such source of radiation on any day that operations are not uninterruptedly continued from the previous day or before resuming operations after any unintended interruption, and for which records are kept of the dates, times, and results of such tests of function. No operations other than those necessary to place the source in safe condition or to effect repairs on controls shall be conducted with such source unless control devices are functioning properly. The licensee shall submit an acceptable schedule for more complete periodic tests of the entry control and warning systems to be established and adhered to as a condition of the license;

(VIII) Have those entry and exit portals that are used in transporting materials to and from the irradiation area, and that are not intended for use by individuals, controlled by such devices and administrative procedures as are necessary to physically protect and warn against inadvertent entry by any individual through such portals. Exit portals for processed materials shall be equipped to detect and signal the presence of loose radiation sources that are carried toward such an exit and to automatically prevent such loose sources from being carried out of the area.

(B) Licensees with, or applicants for, licenses for radiation sources that are within the purview of (e)(vi)(A) of this subsection, and that must be used in a variety of positions or in peculiar locations, such as open fields or forests, that make it impracticable to comply with certain requirements of (e)(vi)(A) of this subsection, such as those for the automatic control of radiation levels, may apply to the department for approval, prior to use of safety measures that are alternative to those specified in (e)(vi)(C) of this subsection, and that will provide at least an equivalent degree of personnel protection in the use of such sources. At least one of the alternative measures must include an entry preventing interlock control based on a physical measurement of radiation that assures the absence of high radiation levels before an individual can gain access to an area where such sources are used.

~~(f) Airborne radioactivity areas.)~~ (6) Each very high radiation area shall be conspicuously posted with a sign or signs bearing the radiation caution symbol and the words: GRAVE DANGER - VERY HIGH RADIATION AREA. To avoid unnecessary exposure, the licensee or registrant may satisfy this requirement by posting the sign at the estimated location or vicinity of the very high radiation area.

(7) Each airborne radioactivity area shall be conspicuously posted with a sign or signs bearing the radiation caution symbol and the words: CAUTION* - AIRBORNE RADIOACTIVITY AREA or DANGER - AIRBORNE RADIOACTIVITY AREA.

~~((g) Additional requirements.~~

~~(i))~~ (8) Each area or room in which any radioactive material((, other than natural uranium or thorium;)) is used or stored in an amount exceeding 10 times the quantity of radioactive material specified in ((Appendix B of this part)) WAC 246-221-300 shall be conspicuously posted with a sign or signs bearing the radiation caution symbol and the words: CAUTION* - RADIOACTIVE MATERIAL or DANGER - RADIOACTIVE MATERIAL.

~~((ii) Each area or room in which natural uranium or thorium is used or stored in an amount exceeding one hundred times the quantity specified in Appendix B of this~~

part shall be conspicuously posted with a sign or signs bearing the radiation caution symbol and the words: CAUTION* - RADIOACTIVE MATERIAL.

~~(h) Containers and articles.~~

~~(i) Except as provided in this section,)) (9) Each container of radioactive material shall bear a durable, clearly visible label identifying the radioactive contents((-~~

~~(ii) A label required pursuant to (h)(i) of this subsection shall bear)) including:~~

~~(a) The radiation caution symbol and the words: CAUTION* - RADIOACTIVE MATERIAL OR DANGER - RADIOACTIVE MATERIAL. ((It shall also provide))~~

~~(b) Sufficient information to permit individuals handling or using the containers, or working in the vicinity thereof, to take precautions to avoid or minimize exposures((-~~

~~As appropriate, the information will include)), such as radionuclides present, radiation levels, ((kinds of material,)) estimate of activity((-, date for which activity is estimated)) and mass enrichment.~~

~~((+)) (c) Where containers are used for storage, ((the labels required in this subdivision shall state also)) the quantities and kinds of radioactive materials in the containers and the date of measurement of the quantities.~~

~~((+)) (10) All radiation machines shall be labeled in a conspicuous manner ((which cautions)) so as to caution individuals that radiation is produced when the machine is being operated.~~

~~((2) Notwithstanding the provisions of subsection (1)(h), (i) of this section labeling is not required:~~

~~(a) For laboratory containers, such as beakers, flasks, and test tubes, used transiently in laboratory procedures when the person using such containers is present. For such containers a label identifying the radioactive contents is not required.~~

~~(b) For containers that do not contain radioactive material in quantities greater than the applicable quantities listed in WAC 246-221-300, Appendix B.~~

~~(c) For containers containing only natural uranium or thorium in quantities no greater than ten times the applicable quantities listed in WAC 246-221-300, Appendix B.~~

~~(d) For containers that do not contain radioactive material in concentrations greater than the applicable concentrations listed in WAC 246-221-290, Column 2, Table I, Appendix A.~~

~~(e) For containers when they are attended by an individual who takes the precautions necessary to prevent the exposure of any individual to radiation or radioactive material in excess of the limits established by the regulations in this part;~~

~~(f) For containers when they are in transport and packaged and labeled in accordance with regulations published by the United States Department of Transportation;~~

~~(g) For containers which are accessible only to individuals authorized to handle or use them* or to work in the vicinity thereof, provided that the contents are identified to such individuals by a readily available written record;~~

Note: *For example, containers in locations such as water-filled canals, storage vaults, or hot cells.

~~(h) For manufacturing and process equipment such as piping and tanks.~~

~~(3) Each licensee, prior to disposal of an empty container which previously held radioactive material shall properly survey for contamination and remove or deface the radioactive material label or otherwise clearly indicate that the container no longer contains radioactive materials.~~

~~⁷This paragraph does not apply to radioactive sources that are used in teletherapy, in radiography, or in completely self shielded irradiators in which the source is both stored and operated within the same shielding radiation barrier and, in the designed configuration of the irradiator, is always physically inaccessible to any individual and cannot create high levels of radiation in an area that is accessible to any individual. This paragraph also does not apply to sources from which the radiation is incidental to some other use nor to nuclear reactor generated radiation other than radiation from byproduct, source, or special nuclear materials that are used in sealed sources in nonself shielded irradiators.))~~

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-221-130 Exceptions from posting and labeling requirements. (1) A room or area is not required to be posted with a caution sign because of the presence of a sealed source, provided the radiation level ((30.5)) 30 centimeters from the surface of the source container or housing does not exceed 0.05 mSv (five millirem) per hour.

(2) Rooms or other areas in hospitals are not required to be posted with caution signs((- and control of entrance or access thereto pursuant to WAC 246-221-120 (1)(c) is not required,)) because of the presence of patients containing ((less than 30 millieuries of)) radioactive material provided that ((there are personnel in attendance who will take the precautions necessary to prevent the exposure of any individual to radiation or radioactive material in excess of the limits established in the regulations in this chapter)) confinement is not required pursuant to chapters 246-239 and 246-240 WAC.

(3) Caution signs are not required to be posted in areas or rooms containing radioactive material for periods of less than eight hours provided that:

(a) The material is constantly attended during such periods by an individual who shall take the precautions necessary to prevent the exposure of any individual to radiation or radioactive material in excess of the limits established in this part; and

(b) Such area or room is subject to the licensee's or registrant's control.

(4) A room or other area is not required to be posted with a caution sign((- and control is not required for each entrance or access point to a room or other area which is used solely for the storage)) because of the presence of radioactive material prepared for transport and packaged and labeled in accordance with regulations of the United States Department of Transportation.

(5) ((Rooms with x ray equipment may not be required to be posted with caution signs provided that access is controlled.)) A room or area is not required to be posted with a caution sign because of the presence of a diagnostic x-ray system used solely for healing arts purposes.

(6) The interior of a teletherapy room is not required to be posted with caution signs provided such posting is conspicuously placed at the entrance(s) to the rooms.

(7) A licensee is not required to label:

(a) Containers holding licensed material in quantities less than the quantities listed in WAC 246-221-300; or

(b) Containers holding licensed material in concentrations less than those specified in WAC 246-221-290, Table III; or

(c) Containers attended by an individual who takes the precautions necessary to prevent the exposure of any individual to radiation or radioactive material in excess of the limits established by this chapter; or

(d) Containers when they are in transport and packaged and labeled in accordance with the regulations of the United States Department of Transportation; or

(e) Containers such as those located in water-filled canals, storage vaults, or hot cells, that are accessible only to individuals authorized to handle or use them, or to work in the vicinity of the containers, provided the contents are identified to these individuals by a readily available written record. The record shall be retained as long as the containers are in use for the purpose indicated on the record; or

(f) Installed manufacturing or process equipment, such as chemical process equipment, piping, and tanks.

(8) Each licensee, prior to removal or disposal of empty uncontaminated containers to unrestricted areas, shall remove or deface the radioactive material label or otherwise clearly indicate that the container no longer contains radioactive materials.

AMENDATORY SECTION (Amending Order 121, filed 12/27/90, effective 1/31/91)

WAC 246-221-150 Security and control of stored radioactive material and radiation machines. (1) Licensed radioactive materials and registered radiation machines shall be secured from, or controlled in such a manner so as to prevent, unauthorized access or removal from the place of storage.

(2) Licensed radioactive materials in an unrestricted area and not in storage shall be tended under the constant surveillance and immediate control of the licensee.

(3) Registered radiation machines in an unrestricted area and not in storage shall be under the control of the registrant.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-221-160 Procedures for picking up, receiving, and opening packages. (1)(a) Each licensee ((or registrant)) who expects to receive a package containing quantities of radioactive material in excess of the Type A₁ or A₂ quantities specified in WAC 246-220-110 shall make arrangements to receive:

(i) ((If the package is to be delivered to the licensee's or registrant's facility by the carrier, make arrangements to receive)) The package when it is offered for delivery by the carrier; or

(ii) ((If the package is to be picked up by the licensee or registrant at the carrier's terminal, make arrangements to receive)) Immediate notification from the carrier of the arrival of the package at the carrier's terminal.

(b) Each licensee ((or registrant)) who picks up a package of radioactive material from a carrier's terminal

shall pick up the package expeditiously upon receipt of notification from the carrier of its arrival.

(2)((~~a~~)) Each licensee ((or registrant, upon receipt of a package of radioactive material, shall monitor the external surfaces of the package for radioactive contamination caused by leakage of the radioactive contents, except:

(i) Packages containing less than one hundred times the quantity of nuclide(s) specified in WAC 246-232-120, Schedule B;

(ii) Packages containing no more than 10 millicuries of radioactive material consisting solely of tritium, carbon-14, sulfur-35, or iodine-125;

(iii) Packages containing only radioactive material as gases or in special form;

(iv) Packages containing only radioactive material in other than liquid form (including Mo-99/Tc-99m generators) and not exceeding the Type A₁ or A₂ quantity limit specified in WAC 246-220-110; and

(v) Packages containing only radionuclides with half-lives of less than 30 days and a total quantity of no more than 100 millicuries.

The monitoring shall be performed)) shall:

(a) Monitor for radioactive contamination the external surfaces of any package labeled with a Radioactive White I, Yellow II or Yellow III label unless the package contains only radioactive material in the form of gas or in special form as defined in WAC 246-220-010 and 246-220-120; and

(b) Monitor the radiation levels of the external surfaces of any package labeled with a Radioactive White I, Yellow II or Yellow III label unless the package contains quantities of radioactive material that are less than or equal to the Type A quantity, as defined in WAC 246-220-110; and

(c) Monitor all packages known to contain radioactive material for radioactive contamination and radiation levels if the package has evidence of potential contamination, such as packages that are crushed, wet, or damaged.

(3) The monitoring shall be performed:

(a) Immediately upon receipt if there is evidence of package degradation or any other evidence of potential contamination or excessive radiation levels; or

(b) As soon as practicable after receipt, but no later than three hours after the package is received at the licensee's facility if received during the licensee's normal working hours, or no later than three hours from the beginning of the next working day if received after normal working hours.

((~~b~~)) If removable radioactive contamination in excess of 0.01 microcurie (22,200 transformations per minute) per one hundred square centimeters of package surface is found on the external surfaces of the package, the licensee shall immediately notify by telephone, telegraph, mailgram or facsimile, the final delivering carrier, shipper and the department.

(3)(a) Each licensee or registrant, upon receipt of a package containing quantities of radioactive material in excess of the Type A₁ or A₂ quantities specified in WAC 246-220-110, other than those transported by exclusive use vehicle, shall monitor the radiation levels external to the package. The package shall be monitored as soon as practicable after receipt, but no later than three hours after the package is received at the licensee's facility if received during the licensee's normal working hours, and no later

than three hours from the beginning of the next working day if received after normal working hours.

~~(b) If radiation levels are found on the external surface of the package in excess of two hundred millirem per hour, or at one meter from the external surface of the package in excess of ten millirem per hour, the licensee or registrant shall immediately notify, by telephone, telegraph, mailgram or facsimile, the shipper, the final delivering carrier and the department.))~~

(4) The licensee shall immediately notify the final delivery carrier and, by telephone and telegram, mailgram, or facsimile, the department when:

(a) For normal shipments, removable radioactive surface contamination exceeds either 22 dpm/cm² for beta-gamma emitting radionuclides, all radionuclides with half-lives less than ten days, natural uranium, natural thorium, uranium-235, uranium-238, thorium-232, and thorium-228 and thorium 230 when contained in ores or concentrates; or 2.2 dpm/cm² for all other alpha emitting radionuclides; or

(b) For exclusive use shipments, removable radioactive surface contamination exceeds either 220 dpm/cm² for beta-gamma emitting radionuclides, all radionuclides with half-lives less than ten days, natural uranium, natural thorium, uranium-235, uranium-238, thorium-232, and thorium-228 and thorium 230 when contained in ores or concentrates; or 22 dpm/cm² for all other alpha emitting radionuclides; or

(c) For normal or exclusive use shipments, external radiation levels exceed two mSv/hour (200 millirem per hour) at any point on the external surface of the package; or

(d) For exclusive use shipments where the shipment is made in a closed transport vehicle, packages are secured in a fixed position, and no loading or unloading occurs between the beginning and end of transportation, external radiation levels exceed ten mSv/hour (1000 millirem per hour) at any point on the external surface of the package.

(5) Each licensee (~~or registrant~~) shall establish and maintain procedures for safely opening packages in which radioactive material is received, and shall assure that such procedures are followed and that due consideration is given to instructions for the type of package being opened and the monitoring of potentially contaminated packaging material (including packages containing radioactive material in gaseous form) to assure that only background levels of radiation are present prior to disposal of such material as nonradioactive waste. (~~In addition, this shall include a wipe sample of the outside of any inner package which contains a liquid or dispersible radionuclide (radioactive wastes shall be exempted). Copies of such written procedures shall be retained for inspection by the department.~~)

(6) Licensees transferring special form sources to and from a work site in vehicles owned or operated by the licensee are exempt from the contamination monitoring requirements of subsection (2)(a) of this section but are not exempt from the monitoring requirement in subsection (2)(b) of this section for measuring radiation levels to ensure that the source is still properly lodged in its shield.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-221-170 Waste disposal, general requirement. (1) No licensee shall dispose of any radioactive material except:

~~((+))~~ (a) By transfer to an authorized recipient as provided in WAC 246-232-080, or chapter 246-249 WAC; or

~~((2))~~ (b) As authorized pursuant to WAC 246-221-070, 246-221-180, 246-221-190, ~~((or))~~ 246-221-200, 246-221-210, or 246-221-220.

(c) By decay in storage as authorized in a specific license.

(2) A person shall be specifically licensed to receive waste containing licensed material from other persons for:

(a) Treatment prior to disposal; or

(b) Treatment or disposal by incineration; or

(c) Decay in storage; or

(d) Disposal at a land disposal facility licensed pursuant to chapter 246-250 WAC; or

(e) Storage until transferred to a disposal facility authorized to receive the waste.

(3) Nothing in chapter 246-221 WAC relieves the licensee from complying with other applicable federal, state, and local regulations governing any other toxic or hazardous properties of materials that may be disposed pursuant to this chapter.

(4) Each licensee shall maintain records of all transfers and disposals of radioactive material.

AMENDATORY SECTION (Amending Order 121, filed 12/27/90, effective 1/31/91)

WAC 246-221-180 Method of obtaining approval of proposed disposal procedures. Any person may apply to the department for approval of proposed procedures to dispose of radioactive material in a manner not otherwise authorized in this chapter. Each application shall contain a description of the radioactive material, including the quantities and kinds of radioactive material and levels of radioactivity involved, the physical and chemical properties that have an impact on risk evaluation, and the proposed manner and conditions of disposal. The application, where appropriate, shall also include an analysis and evaluation of pertinent information as to the nature of the environment, including topographical, geological, meteorological, and hydrological characteristics; usage of ground and surface waters in the general area; the nature and location of other potentially affected facilities; analyses and procedures to ensure that doses are maintained ALARA within the dose limits of this chapter; and procedures to be observed to minimize the risk of unexpected or hazardous exposures.

The department will not approve any application for a license to receive radioactive material from other persons for disposal on land not owned by a state or the federal government.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-221-190 Disposal by release into sanitary sewerage systems. (1) No licensee shall discharge radioactive material into a sanitary sewerage system unless:

~~((1))~~ (a) It is readily soluble or it is biological material which is readily dispersible in water;

~~((2))~~ ~~The quantity of any radioactive material released into the system by the licensee in any one day does not exceed the larger of:~~

~~(a) The quantity which, if diluted by the average daily quantity of sewage released into the sewer by the licensee, will result in an average concentration not greater than the limits specified in WAC 246-221-290, Appendix A, Table I, Column 2; or~~

~~(b) Ten times the quantity of such material specified in WAC 246-221-300, Appendix B of this part;~~

~~((3))~~ (b) The quantity of any radioactive material released in any one month, if diluted by the average monthly quantity of water released by the licensee, will not result in an average concentration exceeding the limits specified in WAC 246-221-290, ~~((Appendix A, Table I, Column 2))~~ Table III; and

~~((4))~~ ~~The gross quantity of all radioactive material except hydrogen 3 and carbon 14 released into the sewerage system by the licensee does not exceed one curie (1Ci) per year. The amount released into the sewerage system for hydrogen 3 shall not exceed 5 curies per year and for carbon 14 shall not exceed 1 curie per year.)~~ (c) The sum of the fractions for each radionuclide, if more than one radionuclide is released, will not exceed unity; where the fraction for each radionuclide is determined by dividing the actual monthly average concentration of each radionuclide released by the licensee into the sewer by the concentration of that radionuclide listed in Table III of WAC 246-221-290; and

(d) The total quantity of licensed and other radioactive material that the licensee releases into the sanitary sewerage system in a year does not exceed 185 GBq (5 Ci) of hydrogen-3, 37 GBq (1 Ci) of carbon-14, and 37 GBq (1 Ci) of all other radioactive materials combined.

(2) Excreta from individuals undergoing medical diagnosis or therapy with radioactive material shall be exempt from any limitations contained in this section (~~Provided, That the licensee provides for appropriate radiological monitoring whenever any waste line in the licensee's installation which may carry such excreta is opened~~).

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-221-220 Disposal of specific wastes. (1) Any licensee may dispose of the following licensed material without regard to its radioactivity:

~~((1))~~ (a) 1.85 KBq (0.05 microcuries) or less of hydrogen-3 or carbon-14, per gram of medium, used for liquid scintillation counting; and

~~((2))~~ (b) 1.85 KBq (0.05 microcuries) or less of hydrogen-3 or carbon-14, per gram of animal tissue averaged over the weight of the entire animal (~~Provided however, Tissue may not be disposed~~).

(2) The licensee shall not dispose of tissue under this section in a manner that would permit its use either as food for humans or as animal feed; and

(3) Nothing in this section, however, relieves the licensee of maintaining records showing the receipt, transfer and disposal of such byproduct material as specified in WAC 246-220-020; and

(4) Nothing in this section relieves the licensee from complying with other applicable federal, state and local regulations governing any other toxic or hazardous property of these materials.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-221-230 Records ~~((of surveys, radiation monitoring, and disposal))~~ important to radiation safety.

~~(1) ((Each licensee or registrant shall maintain records showing the radiation exposures of all individuals for whom personnel monitoring is required under WAC 246-221-090. Such records shall be kept on state of Washington current occupational external radiation exposure (Form RHF 5), in accordance with the instructions contained in that form, or on clear and legible records containing all the information required by Form RHF 5. The doses entered on the forms or records shall be for periods of time not exceeding one calendar quarter.~~

(2) Each licensee or registrant shall maintain records in the same units used in this part, showing the results of surveys required by WAC 246-221-110 monitoring required by WAC 246-221-160, and disposals made under WAC 246-221-180, 246-221-190, 246-221-200, 246-221-210, and 246-221-220.

~~(3)(a) Records of individual exposure to radiation and to radioactive material which must be maintained pursuant to the provisions of subsection (1) of this section and records of bioassays, including results of whole body counting examinations made pursuant to WAC 246-221-100, shall be preserved indefinitely or until the department authorizes their disposal.~~

~~(b) Records of the results of surveys and monitoring which must be maintained pursuant to subsection (2) of this section shall be preserved for two years after completion of the survey except that the following records shall be maintained until the department authorizes their disposition:~~

~~(i) Records of the results of surveys to determine compliance with WAC 246-221-040;~~

~~(ii) In the absence of personnel monitoring data, records of the results of surveys to determine external radiation dose;~~

~~(iii) Records of the results of surveys used to evaluate the release of radioactive effluents to the environment.~~

~~(4) Records of disposal of licensed material made pursuant to WAC 246-221-180, 246-221-190, 246-221-200, 246-221-210, or 246-221-220 shall be maintained until the department authorizes their disposition.)~~ Each licensee or registrant shall make and retain records of activities, program reviews, measurements, and calculations which may be necessary to determine the extent of occupational and public exposure from sources of radiation under the control of the licensee or registrant.

(2) Each record required by this section shall be legible throughout the specified retention period.

(3) Each licensee or registrant shall use the SI units: Becquerel, gray, sievert and coulomb per kilogram, or the special units: Curie, rad, rem, and roentgen, including multiples and subdivisions, and shall clearly indicate the units of all quantities on records required by these regulations.

(4) The licensee or registrant shall make a clear distinction among the quantities entered on the records required by these regulations such as, total effective dose equivalent, total organ dose equivalent, shallow dose equivalent, eye dose equivalent, deep dose equivalent, or committed effective dose equivalent.

(5) Records which must be maintained pursuant to this part (~~may~~) shall be the original or a reproduced copy or microform if such reproduced copy or microform is duly authenticated by authorized personnel and the microform is capable of producing a clear and legible copy after storage for the period specified by department regulations. The record may also be stored in electronic media with the capability for producing legible, accurate, and complete records during the required retention period. Electronic media data storage systems shall incorporate standard or universally recognized security measures. Records, such as letters, drawings, and specifications, shall include all pertinent information, such as stamps, initials, and signatures.

(6) The licensee shall maintain adequate safeguards against tampering with and loss of records.

(7) The licensee or registrant shall retain the following required records until the department terminates each pertinent license or registration requiring the record, and upon termination of the license or registration, the licensee or registrant shall store for at least thirty years:

(a) Records of prior occupational dose and exposure history as recorded on department Form RHF-4 or RHF-4A, or equivalent;

(b) Records on department Form RHF-5 or RHF-5A, or equivalent, of doses received by all individuals for whom monitoring was required pursuant to WAC 246-221-090 and 246-221-100;

(c) Records of doses received during planned special exposures, accidents, and emergency conditions;

(d) The specific information used to calculate the committed effective dose equivalent pursuant to WAC 246-221-040(3);

(e) Records of the results of surveys to determine the dose from external sources of radiation used, in the absence of or in combination with individual monitoring data, in the assessment of individual dose equivalents;

(f) Records of the results of measurements and calculations used to determine individual intakes of radioactive material and used in the assessment of internal dose;

(g) Records showing the results of air sampling, surveys, and bioassays required pursuant to WAC 246-221-117 (1)(b)(i) and (ii);

(h) Records of the results of measurements and calculations used to evaluate the release of radioactive effluents to the environment.

(8) The licensee or registrant shall retain the following records until the department terminates the pertinent license or registration requiring the record:

(a) Records of waste disposal made under the provisions of WAC 246-221-180, 246-221-190, 246-221-210 and 246-

221-220, chapter 246-249 WAC, and any burials in soil as previously authorized;

(b) Records of dose to individual members of the public as required by WAC 246-221-060(4);

(c) Records of the provisions of the radiation protection program as required by WAC 246-221-005.

(9) The licensee or registrant shall retain the following records for three years after the record is made:

(a) Records of testing entry control devices for very high radiation areas as required by WAC 246-221-106(3);

(b) Records used in preparing department Form RHF-4 or RHF-4A;

(c) Records showing the results of general surveys required by WAC 246-221-110 and package surveys required by WAC 246-221-160;

(d) Records of calibrations required by WAC 246-221-110;

(e) Records of program audits and other reviews of the content and implementation of the radiation protection program required by WAC 246-221-005;

(f) Records of waste disposal by decay in storage.

(~~(6)~~) (10) If there is a conflict between the department's regulations in this part, license condition, or other written department approval or authorization pertaining to the retention period for the same type of record, the retention period specified in the regulations in this part for such records shall apply unless the department, pursuant to WAC 246-220-050, has granted a specific exemption from the record retention requirements specified in the regulations in this part.

(~~(7)~~) (11) The discontinuance or curtailment of activities does not relieve the licensee or registrant of responsibility for retaining all records required by this section. (~~A licensee or registrant may, however, request the department to accept such records. The acceptance of the records by the department relieves the licensee or registrant of subsequent responsibility only in respect to their preservation as required in this section.~~)

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-221-240 Reports of (~~theft or loss of~~) stolen, lost or missing radiation sources. (1) Each licensee and/or registrant shall report (~~immediately~~) by telephone (206/682-5327) and confirm promptly by letter telegram, mailgram, or facsimile to the State Department of Health, Division of Radiation Protection, (~~Mailstop LE-13~~) P.O. Box 47827, Olympia, Washington (~~98504, the actual or attempted theft or loss as soon as such theft or loss becomes known to the licensee and/or registrant of:~~

(1) Any radiation producing machine; or

(2) Any quantity of radioactive material in excess of a quantity exempted under WAC 246-221-300, Appendix B, or any item not exempted in chapter 246-232 WAC)) 98504-7827.

(a) Immediately after its occurrence becomes known to the licensee, stolen, lost, or missing radioactive material in an aggregate quantity equal to or greater than one thousand times the quantity specified in WAC 246-221-300; or

(b) Within thirty days after its occurrence becomes known to the licensee, lost, stolen, or missing radioactive

material in an aggregate quantity greater than ten times the quantity specified in Appendix C that is still missing or any item not exempted in chapter 246-232 WAC; or

(c) Immediately after its occurrence becomes known to the registrant, a stolen, lost, or missing radiation machine.

(2) Each licensee or registrant required to make a report pursuant to subsection (1) of this section shall, within thirty days after making the telephone report, make a written report to the department setting forth the following information:

(a) A description of the licensed or registered source of radiation involved, including, for radioactive material, the kind, quantity, and chemical and physical form; and, for radiation machines, the manufacturer, model and serial number, type and maximum energy of radiation emitted; and

(b) A description of the circumstances under which the loss or theft occurred; and

(c) A statement of disposition, or probable disposition, of the licensed or registered source of radiation involved; and

(d) Exposures of individuals to radiation, circumstances under which the exposures occurred, and the possible total effective dose equivalent to persons in unrestricted areas; and

(e) Actions that have been taken, or will be taken, to recover the source of radiation; and

(f) Procedures or measures that have been, or will be, adopted to ensure against a recurrence of the loss or theft of licensed or registered sources of radiation.

(3) Subsequent to filing the written report, the licensee or registrant shall also report additional substantive information on the loss or theft within thirty days after the licensee or registrant learns of such information.

(4) The licensee or registrant shall prepare any report filed with the department pursuant to this section so that names of individuals who may have received exposure to radiation are stated in a separate and detachable portion of the report.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-221-250 Notification of incidents. (1) **Immediate notification.** Notwithstanding other requirements for notification, each licensee and/or registrant shall immediately notify the State Department of Health, Division of Radiation Protection, ((Mailstop LE-13)) P.O. Box 47827, Olympia, Washington 98504-7827, by telephone (206/682-5327) and confirming letter, telegram, mailgram, or facsimile of any incident involving any radiation source which may have caused or threatens to cause:

~~((a) A dose to the whole body of any individual, or any dosimetry device assigned to any individual, of twenty-five rems or more of radiation; a dose to the skin of the whole body of any individual or any dosimetry device assigned to any individual of one hundred fifty rems or more of radiation; or a dose to the feet, ankles, hands, or forearms of any individual, or any dosimetry device assigned to any individual, of three hundred seventy-five rems or more of radiation; or~~

~~(b) The release of radioactive material in concentrations which, if averaged over a period of twenty-four hours, would exceed five thousand times the limits specified for such~~

~~materials in WAC 246-221-290, Appendix A, Table II.) (a) An individual to receive:~~

~~(i) A total effective dose equivalent of 0.25 Sv (25 rem) or more; or~~

~~(ii) An eye dose equivalent of 0.75 Sv (75 rem) or more; or~~

~~(iii) A shallow dose equivalent to the skin or extremities or a total organ dose equivalent of 2.5 Sv (250 rem) or more; or~~

~~(b) The release of radioactive material, inside or outside of a restricted area, so that, had an individual been present for twenty-four hours, the individual could have received an intake five times the occupational ALI. This provision does not apply to locations where personnel are not normally stationed during routine operations, such as hot-cells or process enclosures.~~

(2) Twenty-four hour notification. Each licensee and/or registrant shall within twenty-four hours of discovery of the event, notify the State Department of Health, Division of Radiation Protection, ((Mailstop LE-13)) P.O. Box 47827, Olympia, Washington 98504-7827, by telephone (206/682-5327) and confirming letter, telegram, mailgram, or facsimile of any incident involving any radiation source possessed which may have caused or threatens to cause:

~~((a) A dose to the whole body of any individual, or any dosimetry device assigned to any individual, of five rems or more of radiation; a dose to the skin of the whole body of any individual or any dosimetry device assigned to any individual of thirty rems or more of radiation; or a dose to the feet, ankles, hands, or forearms or any dosimetry device assigned to any individual, of seventy-five rems or more of radiation; or~~

~~(b) The release of radioactive material in concentrations which, if averaged over a period of twenty-four hours, would exceed five hundred times the limits specified for such materials in WAC 246-221-290, Appendix A, Table II.) (a) An individual to receive, in a period of twenty-four hours:~~

~~(i) A total effective dose equivalent exceeding 0.05 Sv (5 rem); or~~

~~(ii) An eye dose equivalent exceeding 0.15 Sv (15 rem); or~~

~~(iii) A shallow dose equivalent to the skin or extremities or a total organ dose equivalent exceeding 0.5 Sv (50 rem); or~~

~~(b) The release of radioactive material, inside or outside of a restricted area, so that, had an individual been present for twenty-four hours, the individual could have received an intake in excess of one occupational ALI. This provision does not apply to locations where personnel are not normally stationed during routine operations, such as hot-cells or process enclosures.~~

(3) For each occurrence, requiring notification pursuant to this section, a prompt investigation of the situation shall be initiated by the licensee/registrant. A written report of the findings of the investigation shall be sent to the department within thirty days.

(4) The licensee or registrant shall prepare each report filed with the department pursuant to this section so that names of individuals who have received exposure to sources of radiation are stated in a separate and detachable portion of the report.

Any report filed with the department pursuant to this section shall ~~((be prepared in the manner))~~ contain the information described in WAC 246-221-260 (2) and (3).

(5) The provisions of this section do not apply to doses that result from planned special exposures, provided such doses are within the limits for planned special exposures and are reported pursuant to WAC 246-221-265.

(6) Telephone notifications that do not involve immediate or twenty-four hour notification shall not be made to the emergency number (Seattle 206/682-5327). Routine calls should be made to the Olympia office (206/753-3468).

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-221-260 Reports of overexposures and excessive levels and concentrations. (1) In addition to any notification required by WAC 246-221-250, each licensee or registrant shall ~~((make a report in writing within 30 days to the department of each exposure of an individual to radiation level or concentrations of radioactive material in excess of any applicable limit as set forth in this part or as otherwise approved by the department))~~ submit a written report to the department within thirty days after learning of any of the following occurrences:

(a) Incidents for which notification is required by WAC 246-221-250; or

(b) Doses in excess of any of the following:

(i) The occupational dose limits for adults in WAC 246-221-010; or

(ii) The occupational dose limits for a minor in WAC 246-221-050; or

(iii) The limits for an embryo/fetus of a declared pregnant woman in WAC 246-221-055; or

(iv) The limits for an individual member of the public in WAC 246-221-060; or

(v) Any applicable limit in the license; or

(c) Levels of radiation or concentrations of radioactive material in:

(i) A restricted area in excess of applicable limits in the license; or

(ii) An unrestricted area in excess of ten times the applicable limit set forth in this chapter or in the license or registration, whether or not involving exposure of any individual in excess of the limits in WAC 246-221-060; or

(d) For source materials milling licensees and nuclear power plants subject to the provisions of United States Environmental Protection Agency's generally applicable environmental radiation standards in 40 CFR 190, levels of radiation or releases of radioactive material in excess of those standards, or of license conditions related to those standards.

(2) Each report required by subsection (1) of this section shall describe:

(a) The extent of exposure of individuals to radiation or to radioactive material, including estimates of each individual's dose as required by subsection (3) of this section;

(b) Levels of radiation and concentrations of radioactive material involved;

(c) The cause of exposure, levels or concentrations; and

(d) Corrective steps taken or planned to assure against a recurrence, including the schedule for achieving conformance with applicable limits, generally applicable environmental standards, and associated license conditions.

~~(3) ((Any))~~ Each report filed with the department pursuant to this section shall include for each individual exposed the name, social security number, and date of birth, and an estimate of the individual's dose. With respect to the limit for the embryo/fetus in WAC 246-221-055, the identifiers should be those of the declared pregnant woman. The report shall be prepared so that this information is stated in a separate and detachable part of the report.

(4) Individuals shall be notified of reports in accordance with the requirements of WAC 246-222-040.

~~((5) In addition to any notification required by WAC 246-221-250, each licensee shall make a report in writing within 30 days to the department of levels of radiation or releases of radioactive material in excess of limits specified by 40 CFR Part 190, "Environmental radiation protection standards for nuclear power operations," or in excess of license conditions related to compliance with 40 CFR Part 190. Each report required under this paragraph shall describe the extent of exposure of individuals to radiation or to radioactive material; levels of radiation and concentrations of radioactive material involved; the cause of the exposure; levels of concentrations; and corrective steps taken or planned to assure against a recurrence.))~~

NEW SECTION

WAC 246-221-265 Special reports to the department—Planned special exposures, individual monitoring results from certain licensees, and leaking sources. (1) The licensee or registrant shall submit a written report to the department within thirty days following any planned special exposure conducted in accordance with WAC 246-221-030, informing the department that a planned special exposure was conducted and indicating the date the planned special exposure occurred and the information required by WAC 246-221-030.

(2) Each licensee in a category listed in subsection (3) of this section shall submit an annual report of the results of individual monitoring carried out by the licensee for each individual for whom monitoring was required by WAC 246-221-090 and 246-221-100 during that year. The licensee may include additional data for individuals for whom monitoring was provided but not required. The licensee shall use department Form RHF-5A or electronic media containing all the information required by department Form 5A.

(3) The requirement to submit individual monitoring results annually applies to each person licensed by the department to:

(a) Possess or use sources of radiation for purposes of industrial radiography pursuant to chapters 246-235 and 246-243 WAC; or

(b) Receive radioactive waste from other persons for disposal pursuant to chapter 246-250 WAC; or

(c) Possess or use at any time, for processing or manufacturing for distribution pursuant to chapter 246-235 WAC, radioactive material in quantities exceeding any one of the following quantities:

PERMANENT

| Radionuclide | Ci | Activity | GBq |
|----------------|-------|----------|--------|
| Cesium-137 | 1 | | 37 |
| Cobalt-60 | 1 | | 37 |
| Gold-198 | 100 | | 3,700 |
| Iodine-131 | 1 | | 37 |
| Iridium-192 | 10 | | 370 |
| Krypton-85 | 1,000 | | 37,000 |
| Promethium-147 | 10 | | 370 |
| Technetium-99m | 1,000 | | 37,000 |

(4) The department may require as a license condition, or by rule, regulation, or order pursuant to WAC 246-220-100, reports of annual individual monitoring results from licensees processing or manufacturing for distribution radionuclides not on the list in subsection (3)(c) of this section, provided the radionuclides are in quantities sufficient to cause comparable radiation levels to those on the list.

(5) The licensee shall file the report required by subsection (2) of this section, covering the preceding year, on or before April 30 of each year. The licensee shall submit the report to the department.

(6) The licensee shall file a written report with the department within five days after learning that a sealed source is leaking or contaminated. The report shall describe the source, source holder, equipment in which the source is installed, the test results and the corrective action taken.

AMENDATORY SECTION (Amending Order 121, filed 12/27/90, effective 1/31/91)

WAC 246-221-270 Vacating premises and release of equipment. (1) Each specific licensee shall, no less than 30 days before vacating or relinquishing possession or control of premises which may have been contaminated with radioactive material as a result of licensed activities, notify the department in writing of intent to vacate. ~~((When deemed necessary by the department, the licensee shall decontaminate the premises in such a manner as the department may specify.))~~

(2) Each licensee, before vacating any premise or transferring the premise, shall permanently decontaminate such premise below or equal to the standards specified in WAC 246-232-140. A survey shall be made after such decontamination and the Department and the landlord or subsequent tenant or transferee shall be provided with a copy of such survey no later than the date of vacating or relinquishing possession or control of the premise.

(3) No machinery, instruments, laboratory equipment or any other property used in contact with, or close proximity to radioactive material at a licensed premise shall be assigned, sold, leased, or transferred to an unlicensed person unless such property has been decontaminated to meet the standards specified in WAC 246-232-140. A survey shall be made after such decontamination and the Department and subsequent owner or transferee shall be provided with a copy of such survey report.

NEW SECTION

WAC 246-221-275 Notification of changes in a facility. Each licensee or registrant shall notify the department of changes in any room or area in a facility where a source of radiation is used. Changes of interest to the department include, but are not limited to, new or replacement equipment containing or emitting radiation, increased occupancy, repair or replacement of existing shielding, new shielding, alteration of the ventilation system, and changes in procedures done in the room or area.

NEW SECTION

WAC 246-221-285 Protection factors for respirators. (1) The licensee may use the following information in the selection of respiratory protective equipment to be used only where the contaminants have been identified and the concentration, or possible concentrations, are known.

| Description ² | Protection Factors ¹ | | Tested & Certified Equipment | |
|---|--|-------------------|--|--|
| | Modes ³ | Particulates only | Particulates, gases, vapors ³ | NIOSH & MSHA ⁴ tests for permissibility |
| I. AIR-PURIFYING RESPIRATORS⁶ | | | | |
| Facepiece, half-mask ⁷ | NP | 10 | | 30 CFR 11, Subpart K. |
| Facepiece, full | NP | 50 | | |
| Facepiece, half-mask, full, or hood | PP | 1000 | | |
| II. ATMOSPHERE-SUPPLYING RESPIRATORS | | | | |
| 1. Air-line respirator | | | | |
| Facepiece, half-mask | CF | | 1000 | |

| III. COMBINATION RESPIRATORS | | | | |
| Any combination of air-purifying and atmosphere-supplying respirators | Protection factor for type and mode of operation as listed above | | | 30 CFR 11, Sec.11.63(b) |

FOOTNOTES

- The protection factor is a measure of the degree of protection afforded by a respirator, defined as the ratio of the concentration of airborne radioactive material outside the respiratory protective equipment to that inside the equipment, usually inside the facepiece, under conditions of use. It is applied to the ambient airborne concentration to estimate the concentrations inhaled by the wearer according to the following formula:

$$\text{Concentration inhaled} = \frac{\text{Ambient airborne concentration}}{\text{Protection factor}}$$

The protection factors apply:

- a. Only for individuals trained in using respirators and wearing properly fitted respirators that are used and maintained under supervision in a well-planned respiratory protective program.
 - b. For air-purifying respirators only when high efficiency particulate filters, above 99.97% removal efficiency by thermally generated 0.3 μm dioctyl phthalate (DOP) test or equivalent, are used in atmospheres not deficient in oxygen and not containing radioactive gas or vapor respiratory hazards.
 - c. No adjustment is to be made for the use of sorbents against radioactive material in the form of gases or vapors.
 - d. For atmosphere-supplying respirators only when supplied with adequate respirable air. Respirable air shall be provided of the quality and quantity required in accordance with the National Institute for Occupational Safety and Health and the Mine Safety and Health Administration certification described in 30 CFR 11. Oxygen and air shall not be used in the same apparatus.
2. Only for shaven faces and where nothing interferes with the seal of tight-fitting facepieces against the skin. Hoods and suits are excepted.
 3. The mode symbols are defined as follows:
 CF = continuous flow
 D = demand
 NP = negative pressure, that is, negative phase during inhalation
 PD = pressure demand, that is, always positive pressure
 PP = positive pressure
 RD = demand, recirculating or closed circuit
 RP = pressure demand, recirculating or closed circuit
 4. NIOSH & MSHA are the National Institute for Occupational Safety and Health and the Mine Safety and Health Administration.
 5. Excluding radioactive contaminants that present an absorption or submersion hazard. For tritium oxide, approximately one-third of the intake occurs by absorption through the skin so that an overall protection factor of less than two is appropriate when atmosphere-supplying respirators are used to protect against tritium oxide. If the protection factor for respiratory protective equipment is five, the effective protection factor for tritium is about 1.4; with protection factors of ten, the effective factor for tritium oxide is about 1.7; and with protection factors of one hundred or more, the effective factor for tritium oxide is about 1.9. Air-purifying respirators are not suitable for protection against tritium oxide. See also footnote 9 concerning supplied-air suits.
 6. Canisters and cartridges shall not be used beyond service-life limitations.
 7. Under-chin type only. This type of respirator is not satisfactory for use where it might be possible, if an accident or emergency were to occur, for the ambient airborne concentrations to reach instantaneous values greater than ten times the pertinent values in Table I, Column 3 of WAC 246-221-290. This type of respirator is not suitable for protection against plutonium or other high-toxicity materials. The mask is to be tested for fit prior to use, each time it is donned.
 8. Equipment shall be operated in a manner that ensures that proper air flow-rates are maintained. A protection factor of no more than one thousand may be utilized for tested-and-certified supplied-air hoods when a minimum air flow of six cubic feet per minute (0.17 m³/min) is maintained and calibrated air line pressure gauges or flow measuring devices are used. A protection factor of up to two thousand may be used for tested and certified hoods only when the air flow is maintained at the manufacturer's recommended maximum rate for the equipment, this rate is greater than six cubic feet per minute (0.17 m³/min) and calibrated air line pressure gauges or flow measuring devices are used.

The design of the supplied-air hood or helmet, with a minimum flow of six cubic feet per minute (0.17 m³/min) of air, may determine its overall efficiency and the protection it provides. For example, some hoods aspirate contaminated air into the breathing zone when the wearer works with hands-over-head.

- This aspiration may be overcome if a short cape-like extension to the hood is worn under a coat or overalls. Other limitations specified by the approval agency shall be considered before using a hood in certain types of atmospheres. See footnote 9.
9. Appropriate protection factors shall be determined, taking into account the design of the suit and its permeability to the contaminant under conditions of use. There shall be a standby rescue person equipped with a respirator or other apparatus appropriate for the potential hazards and communications equipment whenever supplied-air suits are used.
 10. No approval schedules are currently available for this equipment. Equipment is to be evaluated by testing or on the basis of reliable test information.
 11. This type of respirator may provide greater protection and be used as an emergency device in unknown concentrations for protection against inhalation hazards. External radiation hazards and other limitations to permitted exposure, such as skin absorption, must be taken into account in such circumstances.
 12. Quantitative fit testing shall be performed on each individual, and no more than 0.02% leakage is allowed with this type of apparatus. Perceptible outward leakage of gas from this or any positive pressure self-contained breathing apparatus is unacceptable because service life will be reduced substantially. Special training in the use of this type of apparatus shall be provided to the wearer.

(2) The licensee may use protection factors for respirators approved by the United States Bureau of Mines and the National Institute for Occupational Safety and Health, according to applicable approvals for respirators for type and mode of use to protect against airborne radionuclides, to the extent that they do not exceed the protection factors listed in the table given in subsection (1) of this section. The protection factors listed in this table may not be appropriate to circumstances where chemical or other respiratory hazards exist in addition to radioactive hazards. The selection and use of respirators for such circumstances should take into account applicable approvals of the United States Bureau of Mines and the National Institute for Occupational Safety and Health.

(3) The licensee should also be aware that the concentration values in Table I, Column 3 of WAC 246-221-290 are based on internal dose due to inhalation, and that radioactive contaminants may present external exposure hazards at higher concentrations. Under these circumstances, limitations on occupancy may have to be governed by external dose limits.

AMENDATORY SECTION (Amending Order 121, filed 12/27/90, effective 1/31/91)

WAC 246-221-290 Appendix A—((Concentrations in air and water above natural background.)) Annual limits on intake (ALI) and derived air concentrations (DAC) of radionuclides for occupational exposure; effluent concentrations; concentrations for release to sanitary sewerage.

Table listing radionuclides such as Uranium (92), Vanadium (23), Xenon (54), Ytterbium (70), Yttrium (39), Zinc (30), and Zirconium (40) with their respective decay modes and activity values.

Vanadium (23) - V 48 - S 2x10^-7, I 6x10^-8, 9x10^-4, 8x10^-4, 6x10^-9, 3x10^-5, 2x10^-9, 3x10^-5

Xenon (54) - Xe 131m Sub 2x10^-5, Xe 133m Sub 1x10^-5, Xe 133 Sub 1x10^-5, Xe 135 Sub 4x10^-6

Ytterbium (70) - Yb 175 - S 7x10^-7, I 6x10^-7, 3x10^-3, 3x10^-3, 2x10^-8, 1x10^-4, 2x10^-8, 1x10^-4

Yttrium (39) - Y 90, Y 91m, Y 91, Y 92, Y 93 - S, I, Sub values ranging from 1x10^-7 to 8x10^-4

Zinc (30) - Zn 65, Zn 69m, Zn 69 - S, I, Sub values ranging from 1x10^-7 to 9x10^-6

Zirconium (40) - Zr 93, Zr 95, Zr 97 - S, I, Sub values ranging from 1x10^-7 to 9x10^-8

Any single radionuclide not listed above with decay mode other than alpha emission or spontaneous fission and with radioactive half life less than 2 hours. Sub 1x10^-6, 3x10^-8

Any single radionuclide not listed above with decay mode other than alpha emission or spontaneous fission and with radioactive half life greater than 2 hours. 3x10^-9, 9x10^-5, 1x10^-10, 3x10^-6

Any single radionuclide not listed above, which decays by alpha emission or spontaneous fission. 6x10^-13, 4x10^-7, 2x10^-14, 3x10^-8

For purposes of these regulations, the designation 10 (number), indicates 10 raised to the minus (number) power.*

Notes: 1-Soluble (S); Insoluble (I).

2 "Sub" means that values given are for submersion in a semispherical infinite cloud of airborne material.

3 For purposes of these regulations, it may be assumed that the daughter activity concentrations in the following table are equivalent to an air concentration of 10^-7 microcuries of radon-

222 per milliliter of air in equilibrium with the daughters RaA, RaB, RaC, and RaC'.

Alpha-Emitting Daughter Activity Collected Per Milliliter of Air

Table with 3 columns: Maximum Time Between Collection and Measurement (hours), Microcuries/ml, Total alpha disintegrations per minute per ml. Values range from 0.5 to 3.0 hours.

a. The duration of sample collection and the duration of measurement should be sufficiently short compared to the time between collection and measurement, as not to have a statistically significant effect upon the results.

4. For soluble mixtures of U-238, U-234 and U-235 in air chemical toxicity may be the limiting factor. If the percentage by weight (enrichment) of U-235 is less than 5, the concentration value for a 40 hour work week, Table I, is 0.2 milligrams uranium per cubic meter of air average.

SA = 3.6x10^-7 curies/gram U U depleted SA = (0.4 + 0.38 E + 0.0034 E^2) 10^-6 E >= 0.72

where E is the percentage by weight of U-235, expressed as percent.

Note: In any case where there is a mixture in air or water of more than one radionuclide, the limiting values for purposes of this Appendix should be determined as follows:

1. If the identity and concentration of each radionuclide in the mixture are known, the limiting values should be derived as follows: Determine, for each radionuclide in the mixture, the ratio between the quantity present in the mixture and the limit otherwise established in Appendix "A" for the specific radionuclide when not in a mixture. The sum of such ratios for all the radionuclides in the mixture may not exceed "1" (i.e., "unity")

Example: If radionuclides a, b, and c are present in concentrations Ca, Cb, and Cc, and if the applicable MPC's are MPCa, MPCb, and MPCc, respectively, then the concentrations shall be limited so that the following relationship exists:

Ca/MPCa + Cb/MPCb + Cc/MPCc <= 1

2. If either the identity or the concentration of any radionuclide in the mixture is not known, the limiting values for purposes of Appendix "A" shall be:

- a. For purposes of Table I, Col. 1 6x10^-13
b. For purposes of Table I, Col. 2 4x10^-7
c. For purposes of Table II, Col. 1 2x10^-14
d. For purposes of Table II, Col. 2 3x10^-8

2. If any of the conditions specified below are met, the corresponding values specified below may be used in lieu of those specified in paragraph 2, above:

a. If the identity of each radionuclide in the mixture is known but the concentration of one or more of the radionuclides in the mixture is not known, the concentration limit for the mixture is the limit specified in Appen-

PERMANENT

dix "A" for the radionuclide in the mixture having the lowest concentration limit; or

b. If the identity of each radionuclide in the mixture is not known, but it is known that certain radionuclides specified in Appendix "A" are not present in the mixture, the concentration limit for the mixture is the lowest concentration limit specified in Appendix "A" for any radionuclide which is not known to be absent from the mixture; or

e. Radionuclide

| Table I Restricted Area | | Table II Unrestricted Area | |
|----------------------------|-----------------------|-------------------------------|-----------------------|

| Air | Water | Air | Water |
| ($\mu\text{Ci/ml}$) | ($\mu\text{Ci/ml}$) | ($\mu\text{Ci/ml}$) | ($\mu\text{Ci/ml}$) |

If it is known that Sr-90, I-125, I-126, I-129, I-131, (I-133 Table II only), Pb-210, Po-210, At-211, Ra-223, Ra-224, Ra-226, Ac-227, Ra-228, Th-230, Pa-231, Th-232, Th-nat, Cm-248, Cf-254, and Fm-256 are not present _____ 9×10^{-5} _____ 3×10^{-6}

If it is known that Sr-90, I-125, I-126, I-129, (I-131, I-133, Table II only), Pb-210, Po-210, Ra-223, Ra-226, Ra-228, Pa-231, Th-nat, Cm-248, Cf-254, and Fm-256 are not present _____ 6×10^{-5} _____ 2×10^{-6}

If it is known that Sr-90, I-129 (I-125, I-126, I-131, Table II only), Pb-210, Ra-226, Ra-228, Cm-248, and Cf-254 are not present _____ 2×10^{-5} _____ 6×10^{-7}

If it is known that (I-129, Table II only), Ra-226, and Ra-228 are not present _____ 3×10^{-6} _____ 1×10^{-7}

If it is known that alpha emitters and Sr-90, I-129, Pb-210, Ac-227, Ra-228, Pa-230, Pa-241, and Bk-249 are not present _____ 3×10^{-9} _____ 1×10^{-10}

If it is known that alpha emitters and Pb-210, Ac-227, Ra-228, and Pu-241 are not present _____ 3×10^{-10} _____ 1×10^{-11}

If it is known that alpha emitters and Ac-227 are not present _____ 3×10^{-11} _____ 1×10^{-12}

If it is known that Ac-227, Th-230, Pa-231, Pu-238, Pu-239, Pu-240, Pu-242, Pu-244, Cm-248, Cf-249 and Cf-251 are not present _____ 3×10^{-12} _____ 1×10^{-13}

4. If the mixture of radionuclides consists of uranium and its daughter products in ore dust prior to chemical processing of the uranium ore, the values specified below may be used in lieu of those determined in accordance with paragraph 1 above or those specified in paragraphs 2 and 3 above.

a. For purposes of Table I, Column 1, 1×10^{-10} $\mu\text{Ci/ml}$ gross alpha activity; or 5×10^{-11} $\mu\text{Ci/ml}$ natural uranium; or 75 micrograms per cubic meter of air natural uranium.

b. For purposes of Table II, Column 1, 3×10^{-12} $\mu\text{Ci/ml}$ gross alpha activity; 2×10^{-12} $\mu\text{Ci/ml}$ natural uranium; or 3 micrograms per cubic meter of air natural uranium.

5. For purposes of this note, a radionuclide may be considered as not present in a mixture if (a) the ratio of the concentration of that radionuclide in the mixture (C_p) to the concentration limit for that radionuclide specified in Table II of Appendix "A" (MPC_p) does not exceed 1/10, (i.e., $C_p/MPC_p \leq 1/10$) and (b) the sum of such ratios for all radionuclides considered as not

present in the mixture does not exceed 1/4 (i.e., $\sum C_p/MPC_p + C_y/MPC_y \leq 1/4$.)

For each radionuclide, Table I indicates the chemical form which is to be used for selecting the appropriate ALI or DAC value. The ALIs and DACs for inhalation are given for an aerosol with an activity median aerodynamic diameter (AMAD) of 1 μm (micron) and for three classes (D,W,Y) of radioactive material, which refer to their retention (approximately days, weeks or years) in the pulmonary region of the lung. This classification applies to a range of clearance half-times for D if less than ten days, for W from ten to one hundred days, and for Y greater than one hundred days. Table II provides concentration limits for airborne and liquid effluents released to the general environment. Table III provides concentration limits for discharges to sanitary sewerage.

Note: The values in Tables I, II, and III are presented in the computer "E" notation. In this notation a value of 6E-02 represents a value of 6×10^{-2} or 0.06, 6E+2 represents 6×10^2 or 600, and 6E+0 represents 6×10^0 or 6.

Table I "Occupational Values"

Note that the columns in Table I of this appendix captioned "Oral Ingestion ALI," "Inhalation ALI," and "DAC," are applicable to occupational exposure to radioactive material.

The ALIs in this appendix are the annual intakes of given radionuclide by "Reference Man" which would result in either: A committed effective dose equivalent of 0.05 Sv (5 rem), stochastic ALI; or a committed dose equivalent of 0.5 Sv (50 rem) to an organ or tissue, nonstochastic ALI. The stochastic ALIs were derived to result in a risk, due to irradiation of organs and tissues, comparable to the risk associated with deep dose equivalent to the whole body of 0.05 Sv (5 rem). The derivation includes multiplying the committed dose equivalent to an organ or tissue by a weighting factor, w_T . This weighting factor is the proportion of the risk of stochastic effects resulting from irradiation of the organ or tissue, T, to the total risk of stochastic effects when the whole body is irradiated uniformly. The values of w_T are listed under the definition of weighting factor in WAC 246-221-005. The nonstochastic ALIs were derived to avoid nonstochastic effects, such as prompt damage to tissue or reduction in organ function.

A value of $w_T = 0.06$ is applicable to each of the five organs or tissues in the "remainder" category receiving the highest dose equivalents, and the dose equivalents of all other remaining tissues may be disregarded. The following portions of the GI tract — stomach, small intestine, upper large intestine, and lower large intestine — are to be treated as four separate organs.

Note that the dose equivalents for an extremity, elbows, arms below the elbows, feet and lower legs, knees, and legs below the knees, skin, and lens of the eye are not considered in computing the committed effective dose equivalent, but are subject to limits that must be met separately.

When an ALI is defined by the stochastic dose limit, this value alone is given. When an ALI is determined by the non-stochastic dose limit to an organ, the organ or tissue to which the limit applies is shown, and the ALI for the

PERMANENT

stochastic limit is shown in parentheses. Abbreviated organ or tissue designations are used:

LLI wall = lower large intestine wall;
St. wall = stomach wall;
Blad wall = bladder wall; and
Bone surf = bone surface.

The use of the ALIs listed first, the more limiting of the stochastic and nonstochastic ALIs, will ensure that nonstochastic effects are avoided and that the risk of stochastic effects is limited to an acceptably low value. If, in a particular situation involving a radionuclide for which the nonstochastic ALI is limiting, use of that nonstochastic ALI is considered unduly conservative, the licensee may use the stochastic ALI to determine the committed effective dose equivalent. However, the licensee shall also ensure that the 0.5 Sv (50 rem) dose equivalent limit for any organ or tissue is not exceeded by the sum of the external deep dose equivalent plus the internal committed dose equivalent to that organ, not the effective dose. For the case where there is no external dose contribution, this would be demonstrated if the sum of the fractions of the nonstochastic ALIs (ALI_{ns}) that contribute to the committed dose equivalent to the organ receiving the highest dose does not exceed unity, that is, \sum (intake (in μCi) of each radionuclide/ ALI_{ns}) ≤ 1.0 . If there is an external deep dose equivalent contribution of H_{ext} , then this sum must be less than $1 - (H_{\text{ext}}/50)$, instead of ≤ 1.0 .

The derived air concentration (DAC) values are derived limits intended to control chronic occupational exposures. The relationship between the DAC and the ALI is given by:

$$\text{DAC} = \text{ALI (in } \mu\text{Ci)} / (2000 \text{ hours per working year} \times 60 \text{ minutes/hour} \times 2 \times 10^4 \text{ ml per minute}) = [\text{ALI} / 2.4 \times 10^9] \mu\text{Ci/ml,}$$

where 2×10^4 ml per minute is the volume of air breathed per minute at work by Reference Man under working conditions of light work.

The DAC values relate to one of two modes of exposure: Either external submersion or the internal committed dose equivalents resulting from inhalation of radioactive materials. DACs based upon submersion are for immersion in a semi-infinite cloud of uniform concentration and apply to each radionuclide separately.

The ALI and DAC values include contributions to exposure by the single radionuclide named and any ingrowth of daughter radionuclides produced in the body by decay of the parent. However, intakes that include both the parent and daughter radionuclides should be treated by the general method appropriate for mixtures.

The values of ALI and DAC do not apply directly when the individual both ingests and inhales a radionuclide, when the individual is exposed to a mixture of radionuclides by either inhalation or ingestion or both, or when the individual is exposed to both internal and external irradiation. See WAC 246-221-015. When an individual is exposed to radioactive materials which fall under several of the translocation classifications of the same radionuclide, such as, Class D, Class W, or Class Y, the exposure may be evaluated as if it were a mixture of different radionuclides.

It should be noted that the classification of a compound as Class D, W, or Y is based on the chemical form of the compound and does not take into account the radiological half-life of different radionuclides. For this reason, values are given for Class D, W, and Y compounds, even for very short-lived radionuclides.

Table II "Effluent Concentrations"

The columns in Table II of this appendix captioned "Effluents," "Air" and "Water" are applicable to the assessment and control of dose to the public, particularly in the implementation of the provisions of WAC 246-221-070. The concentration values given in Columns 1 and 2 of Table II are equivalent to the radionuclide concentrations which, if inhaled or ingested continuously over the course of a year, would produce a total effective dose equivalent of 0.50 mSv (0.05 rem).

Consideration of nonstochastic limits has not been included in deriving the air and water effluent concentration limits because nonstochastic effects are presumed not to occur at or below the dose levels established for individual members of the public. For radionuclides, where the nonstochastic limit was governing in deriving the occupational DAC, the stochastic ALI was used in deriving the corresponding airborne effluent limit in Table II. For this reason, the DAC and airborne effluent limits are not always proportional as was the case in the previous Appendix A of this chapter.

The air concentration values listed in Table II, Column 1 were derived by one of two methods. For those radionuclides for which the stochastic limit is governing, the occupational stochastic inhalation ALI was divided by 2.4×10^9 , relating the inhalation ALI to the DAC, as explained above, and then divided by a factor of three hundred. The factor of three hundred includes the following components: A factor of fifty to relate the 0.05 Sv (5 rem) annual occupational dose limit to the 1 mSv (0.1 rem) limit for members of the public, a factor of three to adjust for the difference in exposure time and the inhalation rate for a worker and that for members of the public; and a factor of two to adjust the occupational values, derived for adults, so that they are applicable to other age groups.

For those radionuclides for which submersion, that is external dose, is limiting, the occupational DAC in Table I, Column 3 was divided by two hundred nineteen. The factor of two hundred nineteen is composed of a factor of fifty, as described above, and a factor of 4.38 relating occupational exposure for two thousand hours per year to full-time exposure (eight thousand seven hundred sixty hours per year). Note that an additional factor of two for age considerations is not warranted in the submersion case.

The water concentrations were derived by taking the most restrictive occupational stochastic oral ingestion ALI and dividing by 7.3×10^7 . The factor of 7.3×10^7 (ml) includes the following components: The factors of fifty and two described above and a factor of 7.3×10^5 (ml) which is the annual water intake of Reference Man.

Note 2 of this appendix provides groupings of radionuclides which are applicable to unknown mixtures of

radionuclides. These groupings, including occupational inhalation ALIs and DACs, air and water effluent concentrations and releases to sewer, require demonstrating that the most limiting radionuclides in successive classes are absent. The limit for the unknown mixture is defined when the presence of one of the listed radionuclides cannot be definitely excluded as being present either from knowledge of the radionuclide composition of the source or from actual measurements.

Table III "Releases to Sewers"

The monthly average concentrations for release to sanitary sewerage are applicable to the provisions in WAC 246-221-190. The concentration values were derived by taking the most restrictive occupational stochastic oral ingestion ALI and dividing by 7.3×10^6 (ml). The factor of 7.3×10^6 (ml) is composed of a factor of 7.3×10^5 (ml), the annual water intake by Reference Man, and a factor of ten, such that the concentrations, if the sewage released by the licensee were the only source of water ingested by a Reference Man during a year, would result in a committed effective dose equivalent of 5 mSv (0.5 rem).

FOOTNOTES:

¹"Submersion" means that values given are for submersion in a hemispherical semi-infinite cloud of airborne material.

²These radionuclides have radiological half-lives of less than 2 hours. The total effective dose equivalent received during operations with these radionuclides might include a significant contribution from external exposure. The DAC values for all radionuclides, other than those designated Class "Submersion," are based upon the committed effective dose equivalent due to the intake of the radionuclide into the body and do NOT include potentially significant contributions to dose equivalent from external exposures. The licensee may substitute 1E-7 µCi/ml for the listed DAC to account for the submersion dose prospectively, but should use individual monitoring devices or other radiation measuring instruments that measure external exposure to demonstrate compliance with the limits. (See WAC 246-221-015(5).)

³For soluble mixtures of U-238, U-234, and U-235 in air, chemical toxicity may be the limiting factor (see WAC 246-221-010(5)). If the percent by weight (enrichment) of U-235 is not greater than 5, the concentration value for a 40-hour workweek is 0.2 milligrams uranium per cubic meter of air average. For any enrichment, the product of the average concentration and time of exposure during a 40-hour workweek shall not exceed 8E-3 (SA) µCi-hr/ml, where SA

is the specific activity of the uranium inhaled. The specific activity for natural uranium is 6.77E-7 curies per gram U. The specific activity for other mixtures of U-238, U-235, and U-234, if not known, shall be:

$$SA = 3.6E-7 \text{ curies/gram U, U-depleted}$$

$$SA = [0.4 + 0.38 (\text{enrichment}) + 0.0034 (\text{enrichment})^2] E-6, \text{ enrichment} \geq 0.72$$

where enrichment is the percentage by weight of U-235, expressed as percent.

NOTE:

1. If the identity of each radionuclide in a mixture is known but the concentration of one or more of the radionuclides in the mixture is not known, the DAC for the mixture shall be the most restrictive DAC of any radionuclide in the mixture.
2. If the identity of each radionuclide in the mixture is not known, but it is known that certain radionuclides specified in this appendix are not present in the mixture, the inhalation ALI, DAC, and effluent and sewage concentrations for the mixture are the lowest values specified in this appendix for any radionuclide that is not known to be absent from the mixture; or

PERMANENT

Es-254, Fm-257, and Md-258 are not present

3. If a mixture of radionuclides consists of uranium and its daughters in ore dust (10 µm AMAD particle distribution assumed) prior to chemical separation of the uranium from the ore, the following values may be used for the DAC of the mixture: 6E-11 µCi of gross alpha activity from uranium-238, uranium-234, thorium-230, and radium-226 per milliliter of air; 3E-11 µCi of natural uranium per milliliter of air; or 45 micrograms of natural uranium per cubic meter of air.
4. If the identity and concentration of each radionuclide in a mixture are known, the limiting values should be derived as follows: Determine, for each radionuclide in the mixture, the ratio between the concentration present in the mixture and the concentration otherwise established in this section for the specific radionuclide when not in a mixture. The sum of such ratios for all of the radionuclides in the mixture may not exceed "1" (i.e., "unity").

Example: If radionuclides "A," "B," and "C" are present in concentrations CA, CB, and CC, and if the applicable DACs are DAC_A, DAC_B, and DAC_C, respectively, then the concentrations shall be limited so that the following relationship exists:

$$\frac{C_A}{DAC_A} + \frac{C_B}{DAC_B} + \frac{C_C}{DAC_C} \leq 1$$

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-221-300 Appendix B—Minimum quantities (exempt from) of radioactive material requiring labeling.

Notes: ¹Based on alpha disintegration rate of Th-232, Th-230 and their daughter products.

²Based on alpha disintegration rate of U-238, U-234, and U-235.

Material _____ Microcuries

Any alpha emitting radionuclide not listed above or mixtures of alpha emitters of unknown composition _____ 0.01

Any radionuclide other than alpha emitting radionuclides, not listed above or mixtures of beta emitters of unknown composition _____ 0.1

Note: For purposes of WAC 246-221-120 and 246-221-190, where there is involved a combination of isotopes in known amounts, the limit for the combination should be derived as follows: Determine, for each isotope in the combination, the ratio between the quantity present in the combination and the limit otherwise established for the specific isotope when not in combination. The sum of such ratios for all the isotopes in the combination may not exceed "1" (i.e., "unity"). Example: For purposes of WAC 246-221-120 (1)(g), if a particular batch, room, or area contains 200 µCi of Au-198 and 500 µCi of C-14, it may also contain not more than 3 µCi of I-131 and remain unposted. This limit was determined as follows:

$$200 \mu\text{Ci Au-198}/1,000 \mu\text{Ci} + 500 \mu\text{Ci C-14}/1,000 \mu\text{Ci} + 3 \mu\text{Ci I-131}/10 \mu\text{Ci} = 1$$

The denominator in each of the above ratios was obtained by multiplying the figure in the table by 10 as provided in WAC 246-221-120 (1)(g).))

Any alpha-emitting radionuclide not listed above or mixtures of alpha emitters of unknown composition 0.001

Any radionuclide other than alpha-emitting radionuclides not listed above, or mixtures of beta emitters of unknown composition 0.01

NOTE: For purposes of WAC 246-221-120(8), 246-221-130 (7)(a), and 246-221-240(1) where there is involved a combination of radionuclides in known amounts, the limit for the combination shall be derived as follows: Determine, for each radionuclide in the combination, the ratio between the quantity present in the combination and the limit otherwise established for the specific radionuclide when not in combination. The sum of such ratios for all radionuclides in the combination may not exceed "1" — that is, unity.

1 - The quantities listed above were derived by taking 1/10th of the most restrictive ALI listed in Table I, Columns 1 and 2, of WAC 246-221-290, rounding to the nearest factor of 10, and constraining the values listed between 37 Bq and 37 MBq (0.001 and 1,000 µCi). Values of 3.7 MBq (100 µCi) have been assigned for radionuclides having a radioactive half-life in excess of E+9 years, except rhenium, 37 MBq (1,000 µCi), to take into account their low specific activity.

* To convert µCi to kBq, multiply the µCi value by 37.

PERMANENT

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-222-020 Posting of notices to workers. (1) Each licensee or registrant shall post current copies of the following documents:

(a) The regulations in this chapter and in chapter 246-221 WAC;

(b) The license, ~~((certificate of registration,))~~ conditions or documents incorporated into the license by reference and amendments thereto;

(c) The operating procedures applicable to work under the license or registration;

(d) Any notice of noncompliance involving radiological working conditions, proposed imposition of civil penalty, order issued pursuant to chapter 246-220 WAC, or any response from the licensee or registrant.

(2) If posting of a document specified in subsection (1)(a), (b), or (c) of this section is not practicable, the licensee or registrant may post a notice which describes the document and states where it may be examined.

(3) Each licensee or registrant shall conspicuously post pertinent emergency procedures when emergency procedures are required by the department.

(4) Properly completed department Form RHF-3 "Notice to employees," shall be posted by each licensee or registrant wherever individuals work in or frequent any portion of a restricted area.

(5) Documents, notices or forms posted pursuant to this section shall appear in a sufficient number of places to permit individuals engaged in work under the license or registration to observe them on the way to or from any particular work location to which the document applies, shall be conspicuous, and shall be replaced if defaced or altered.

(6) Department documents posted pursuant to subsection (1)(d) of this section shall be posted as specified by subsection (5) of this section within five working days after receipt of the documents from the department; the licensee's or registrant's response, if any, shall be posted ~~((for a minimum of))~~ within five working days after dispatch from the licensee or registrant. Such documents shall remain posted for a minimum of five working days or until action correcting the item(s) of noncompliance has been completed, whichever is later.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-222-030 Instructions to workers. (1) All individuals ~~((working in or frequenting any portion of a restricted area))~~ likely to receive an occupational dose:

(a) Shall be kept informed of the storage, transfer, or use of sources of radiation in ~~((such portions of the restricted area))~~ the licensee's or registrant's facility;

(b) Shall be instructed in the health protection considerations for the individual and potential offspring associated with exposure to radiation or radioactive material, in precautions or procedures to minimize exposure, and in the purposes and functions of protective devices employed;

(c) Shall be instructed in, and instructed to observe, to the extent within the worker's control, the applicable provisions of these regulations, department form RHF-3 "Notice to employees," and license conditions for the

protection of personnel from exposures to radiation or radioactive material ~~((occurring in such areas));~~

(d) Shall be instructed that any worker or representative of workers who believes that a violation of the regulations, license conditions, or unnecessary exposure to radiation exists or occurred, may request an inspection by the department by oral or written notification. The notification shall set forth specific grounds for the complaint. Any such notification to the department is confidential;

(e) Shall be instructed of their right to notify the department if the individual suspects improper actions by a licensee/registrant, or conditions which may lead to a violation of these regulations, the license/registration, or unnecessary exposure to radiation or radioactive materials;

(f) Shall be instructed that employment discrimination by a licensee/registrant against an employee because of actions described in this chapter is prohibited;

(g) Shall be instructed as to their responsibility to report promptly to the licensee or registrant any condition which may constitute, lead to, or cause a violation of the act, these regulations, and licenses or unnecessary exposure to radiation or radioactive material;

(h) Shall be instructed in the appropriate response to warnings made in the event of any unusual occurrence or malfunction that may involve exposure to radiation or radioactive material; and

(i) Shall be advised as to the radiation exposure reports which workers shall be furnished pursuant to WAC 246-222-040.

(2) ~~((By July 1, 1984,))~~ Records of these instructions described in subsection (1) of this section ~~((;))~~ for all individuals working in, or frequenting any portion of, a restricted area shall be maintained for inspection by the department until further notice. These records shall include a copy of this section, or all the information contained in this section, along with a dated verification signature by the employee stating that the individual ~~((is satisfied with the))~~ has received an explanation of the instructions contained in this section.

(3) The extent of these instructions shall be commensurate with potential radiological health protection considerations ~~((in the restricted area))~~ present in the workplace.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-222-040 Notifications and reports to individuals. (1) Radiation exposure data for an individual and the results of any measurements, analyses, and calculations of radioactive material deposited or retained in the body of an individual shall be reported to the individual as specified in this section. The information reported shall include data and results obtained pursuant to these regulations, orders, and license conditions, as shown in records maintained by the licensee or registrant pursuant to these regulations. Each notification and report shall:

(a) Be in writing;

(b) Include appropriate identifying data such as the name of the licensee or registrant, the name of the individual, and the individual's identification number, preferably Social Security number;

(c) Include the individual's exposure information; and

(d) Contain the following statement:

"This report is furnished to you under the provisions of the Washington state department of health, division of radiation protection, rules and regulations for radiation protection. You should preserve this report for further reference."

(2) ~~((Upon request of the worker,))~~ Each licensee or registrant shall advise each worker annually of the worker's ~~((current and accumulated exposure to radiation or radioactive material))~~ dose as shown in records maintained by the licensee or registrant pursuant to WAC 246-221-090, 246-221-100, and 246-221-230 ~~((1) and (3))~~.

(3) At the request of a worker formerly engaged in work controlled by the licensee or the registrant, each licensee or registrant shall furnish to each worker or former worker a report of the worker's dose due to exposure to radiation or radioactive material upon termination. For the purposes of this section, termination means the end of employment with the licensee or the end of a work assignment in the licensee's restricted area(s) in a given calendar quarter without expectation, or specific scheduling, of reentry into such restricted area(s) during the remainder of that calendar quarter. Such report shall be furnished within thirty days from the time the request is made, or within thirty days after the exposure of the individual has been determined by the licensee or registrant, whichever is later; shall cover, within the period of time specified in the request, ~~((each calendar quarter))~~ the dose record for each year in which the worker's activities involved exposure to radiation from radioactive material licensed by, or radiation machines registered with the department; and shall include the dates and locations of work under the license or registration in which the worker participated during this period.

(4) ~~((When a licensee or registrant is required pursuant to WAC 246-221-260 to report to the department any exposure of an individual to radiation or radioactive material, the licensee or the registrant shall also provide the individual a written report on the individual's exposure data included therein. Such reports shall be transmitted at a time not later than the transmittal to the department.~~

(5)) In addition to the requirements of subsection (3) of this section, at the request of a worker who is terminating employment ~~((in a given calendar quarter))~~ with the licensee or registrant in work involving radiation exposure, ~~((or of a worker who, while employed by another person, is terminating assignment to work involving radiation exposure in the licensee's facility in that calendar quarter))~~ during the current year, each licensee or registrant shall provide at termination to each such worker, or to the worker's designee ~~((at termination,))~~ a written report regarding the radiation dose received by that worker from operations of the licensee or registrant during ~~((that specifically identified calendar quarter or fraction thereof, or provide a written statement of that dose if the finally determined personnel monitoring results are not available at that time. Estimated doses shall be clearly indicated as such))~~ the current year. If the most recent individual monitoring results are not available at that time, a written estimate of the dose shall be provided together with a clear indication that this is an estimate.

(5) When a licensee or registrant is required pursuant to WAC 246-221-260 to report to the department any exposure

of an individual to radiation or radioactive material, the licensee or the registrant shall also provide the individual a written report on the individual's exposure data included therein. Such reports shall be transmitted at a time not later than the transmittal to the department.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-222-070 Requests by workers for inspections. (1) Any worker or representative of workers who believes that a violation of the act, of these regulations, or of license conditions exists or has occurred in work under a license or registration with regard to radiological working conditions in which the worker is engaged, may request an inspection by giving notice of the alleged violation to the Washington state department of health, division of radiation protection. Any such notice shall be in writing, shall set forth the specific grounds for the notice, and shall be signed by the worker or representative of the workers. A copy shall be provided to the licensee or registrant by the office of radiation protection no later than at the time of inspection except that, upon the request of the worker giving such notice, his or her name and the name of individuals referred to therein shall not appear in such copy or on any record published, released, or made available by the department, except for good cause shown.

(2) If, upon receipt of such notice, the inspector for the ~~((office))~~ division of radiation protection determines that the complaint meets the requirements set forth in subsection (1) of this section, and that there are reasonable grounds to believe that the alleged violation exists or has occurred, the inspector shall cause an inspection to be made as soon as practicable, to determine if such alleged violation exists or has occurred. Inspections pursuant to this section need not be limited to matters referred to in the complaint.

(3) No licensee or registrant shall discharge or in any manner discriminate against any worker because such worker has filed any complaint or instituted or caused to be instituted any proceeding under these regulations or has testified or is about to testify in any such proceeding or because of the exercise by such worker on behalf of the worker or other workers of any option afforded by this chapter.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-222-080 Inspections not warranted—Informal review. (1) If the department of health, division of radiation protection determines, with respect to a complaint under WAC 246-222-070 that an inspection is not warranted because there are no reasonable grounds to believe that a violation exists or has occurred, the ~~((office))~~ division of radiation protection shall notify the complainant in writing of such determination.

(a) If the complaint resulted from activities concerning naturally occurring or accelerator produced radioactive materials and/or radiation producing machines: The complainant may obtain review of such determination by submitting a written statement of position to the Assistant Director, Division of Industrial Safety and Health, ~~((Mailstop HC 402))~~ P.O. Box 4600, Olympia, Washington 98504-4600. Such request for informal review will be processed according

to the provisions of WAC 296-350-460 and the provisions of the interagency agreement between the department of labor and industries and the department of health, division of radiation protection, if any.

(b) If the complaint resulted from activities concerning byproduct material, source material, and/or special nuclear material: The complainant may obtain review of such determination by submitting a written statement of position with the Department of Health, Division of Radiation Protection, (~~Mailstop LE-13~~) P.O. Box 47827, Olympia, Washington 98504-7827 (206/753-3468), who will provide the licensee or registrant with a copy of such statement by certified mail, excluding, at the request of the complainant, the name of the complainant. The licensee or registrant may submit an opposing written statement of position with the department of health, division of radiation protection, who will provide the complainant with a copy of such statement by certified mail. Upon the request of the complainant, the department of health may hold an informal conference in which the complainant and the licensee or registrant may orally present their views. An informal conference may also be held at the request of the licensee or registrant, but disclosure of the identity of the complainant will be made only following receipt of written authorization from the complainant. After considering all written or oral views presented, the department of health shall affirm, modify, or reverse the determination of the division of radiation protection and furnish the complainant and the licensee or registrant a written notification of the decision and the reason therefor.

(2) If the division of radiation protection determines that an inspection is not warranted because the requirements of WAC 246-222-070(1) have not been met, it shall notify the complainant in writing of such determination. Such determination shall be without prejudice to the filing of a new complaint meeting the requirements of WAC 246-222-070(1).

AMENDATORY SECTION (Amending Order 183, filed 7/23/91, effective 8/23/91)

WAC 246-224-040 Expiration (~~of certificate~~) of registration. Except as provided by WAC 246-224-050(2) each (~~certificate of~~) registration shall expire at the end of the day on the date stated therein.

AMENDATORY SECTION (Amending Order 183, filed 7/23/91, effective 8/23/91)

WAC 246-224-050 Renewal (~~of certificate~~) of registration. (1) Application for renewal of registration shall be filed in accordance with WAC 246-224-020 and 246-254-053 at least thirty days prior to the expiration date.

(2) In any case in which a registrant not less than thirty days prior to the expiration of his existing (~~certificate of~~) registration has filed an application in proper form for renewal, such existing (~~certificate of~~) registration shall not expire until the application status has been determined by the department.

AMENDATORY SECTION (Amending Order 183, filed 7/23/91, effective 8/23/91)

WAC 246-224-070 Report of changes. The registrant shall notify the department in writing when making any change which would render the information contained in the application for registration (~~and/or certificate of registration~~) no longer accurate. Notifications shall be sent to X-Ray Control Section, Department of Health, (~~Mailstop LE-13~~) P.O. Box 47827, Olympia, WA 98504-7827. Notification shall be sent no later than thirty days after such change in the registration information.

REPEALER

The following section of the Washington Administrative Code is repealed:

WAC 246-224-030 Issuance of certificate of registration.

AMENDATORY SECTION (Amending Order 183, filed 7/23/91, effective 8/23/91)

WAC 246-225-030 General requirements—Plan review. (1) Before construction, the floor plans and equipment arrangement of medical installations (new or modifications of existing installations) utilizing x-rays for diagnostic or therapeutic purposes shall be submitted to:

(a) A qualified expert for determination of shielding requirements using National Council on Radiation Protection and Measurements Report No. 49, or equivalent; and

(b) The department for subsequent review.

Review shall not imply approval.

(2) The review of such plans shall not preclude the requirement of additional modifications should a subsequent analysis of operating conditions indicate the possibility of an individual receiving a dose in excess of the limits required under WAC 246-221-010, 246-221-050, and 246-221-060.

(3) Diagnostic veterinary, podiatric, and dental facilities shall be exempt from submitting shielding calculations and floor plans.

(4) In order for the department to provide an evaluation, technical advice, and official review of the shielding requirements for a medical radiation installation, a floor plan drawn to scale and the following data are required:

(a) The normal location of the x-ray tube, along with an indication of anode-cathode orientation to the cassette holders;

(b) The limits of the tube travel;

(c) The directions in which the tube is pointed;

(d) Window locations;

(e) The location of the control booth or operator's position;

(f) The exposure switch location;

(g) The position of the viewing window, if any;

(h) The composition and thickness of the walls;

(i) If more than one story, the height floor-to-floor;

(j) If more than one story, the composition and thickness of materials in the ceiling or floor;

(k) The make and model of the x-ray machine;

(l) The maximum kVp and mA;

PERMANENT

(m) The types of examinations or treatments (for example, chest, (~~cephalometric~~) spine, general x-ray, or therapy);

(n) The identification and occupancy of areas adjacent to the x-ray room;

(o) The anticipated x-ray workload expressed in number of patients and exposures per week including:

(i) Technique factors used, or milliamperere-seconds or milliamperere-minutes per week; and

(ii) Estimates of the percentage of the workload expected to occur for a particular beam direction.

(5) For new and modified installations only, the following are minimum design requirements for medical x-ray machine operator booths. These requirements do not apply to dental, podiatry, and veterinary installations. See subsections (6) and (7) of this section for dental panoramic and cephalometric requirements.

(a) The operator shall be allotted (~~(7.5 square feet)~~) 0.7 sq. meters (7.5 sq. ft.) or more of unobstructed floor space in the x-ray booths.

(i) The (~~(7.5 square feet)~~) 0.7 sq. meters (7.5 sq. ft.) of minimum space specified under subsection (5)(a) of this section shall be a geometric configuration where no dimension is less than (~~(two feet)~~) 61.0 centimeters (2.0 ft.).

(ii) The allotted space shall exclude an encumbrance by the console, such as an overhang, cables, or other similar encroachment.

(iii) An extension of a straight line drawn between any point on the edge of the booth shielding and the nearest vertical edge of a (~~(chest)~~) vertical cassette holder (~~(or)~~)₂ corner of the examination table, or any part of the tube housing assembly shall not impinge on the unobstructed space.

(iv) The booth walls shall be (~~(seven feet high)~~) 2.1 meters (7.0 ft.) or more and shall be permanently fixed to the floor or other structure as may be necessary.

(v) When a door or moveable panel is used as the integral part of the booth structure, it must have a permissive device which will prevent an exposure when the door or panel is not closed.

(b) Switch placement. The operator's switch for the radiographic machine shall be fixed within the booth. The switch shall:

(i) Be at least 102 centimeters (forty inches) inside the protected area; and

(ii) Allow the operator to use the available viewing windows.

(c) Viewing system requirements.

(i) Each booth shall have at least one viewing device which shall:

(A) Be placed so the operator can view the patient during exposure; and

(B) Be placed so the operator can have full view of the entries into the room.

(ii) When the viewing system is a window, the following requirements also apply:

(A) The window shall have a visible area of (~~(one)~~) 930 square centimeters (1.0 square foot) or more; and

(B) The glass shall have the same lead equivalence or more as that required in the booth's wall where the glass is mounted.

(iii) When the viewing system is by mirrors, the mirrors shall be located to accomplish the general requirements under subdivision (i) of this subsection.

(iv) When the viewing system is by electronic means (for example, TV):

(A) The camera shall be located to accomplish the general requirements under subdivision (i) of this subsection; and

(B) There shall be an alternate viewing system as a backup for electronic failure.

(d) New or modified facilities shall maintain a copy of the floor plan and shielding calculations required under subsection (1) of this section.

(6) Dimensions of primary beam shielding (~~((chest, cephalometric)))~~) shall exceed the largest possible beam size by 30.5 centimeters (one foot) or more in every direction. Cephalometric primary beam shielding shall be deemed adequate if, for a maximum workload of twenty films a week, two-pound lead is installed (for occupied areas).

(7) A viewing device shall be present in dental panoramic and cephalometric x-ray installations, so the requirements of subsection (5)(c) of this section are met.

AMENDATORY SECTION (Amending Order 183, filed 7/23/91, effective 8/23/91)

WAC 246-225-040 General requirements for diagnostic x-ray systems. In addition to other requirements of this chapter, diagnostic x-ray systems shall meet the following requirements:

(1) *Warning label.* The control panel containing the main power switch shall bear the warning statement, legible and accessible to view: "WARNING: This x-ray unit may be dangerous to patient and operator unless safe exposure factors and operating instructions are observed."

(2) *Battery charge indicator.* On battery-powered generators, visual means shall be provided on the control panel to indicate the battery is in a state of charge adequate for proper operation.

(3) *Leakage radiation from the diagnostic source assembly.* The leakage radiation from the diagnostic source assembly, measured at a distance of 1 meter in any direction from the source, shall not exceed 2.58×10^{-5} coulombs per kilogram (100 milliroentgens) in one hour when the x-ray tube is operated at its leakage technique factors. Compliance shall be determined by measurements averaged over an area of one hundred square centimeters with no linear dimension greater than twenty centimeters.

(4) *Radiation from components other than the diagnostic source assembly.* The radiation emitted by a component other than the diagnostic source assembly shall not exceed 5.16×10^{-7} coulombs per kilogram (2 milliroentgens) in one hour at 5 centimeters from an accessible surface of the component when it is operated in an assembled x-ray system under conditions for which it was designed. Compliance shall be determined by measurements averaged over an area of 100 square centimeters with no linear dimension greater than 20 centimeters.

(5) *Beam quality.*

(a) The half-value layer (HVL) of the useful beam for a given x-ray tube potential shall not be less than the values shown in this section, Table I. If it is necessary to deter-

mine such half-value layer at an x-ray tube potential which is not listed in Table I, linear interpolation or extrapolation shall be made.

WAC 246-225-040 TABLE I

| Design operating range (kilovolts peak) | Measured potential (kilovolts peak) | Half-value layer (millimeters of aluminum equivalent) | Half-value layer (millimeter of aluminum equivalent for dental units) |
|---|-------------------------------------|---|---|
| Below 51— | 30 | 0.3 | N/A |
| | 40 | 0.4 | N/A |
| | 50 | 0.5 | 1.5 |
| 51 to 70— | 51 | 1.2 | 1.5 |
| | 60 | 1.3 | 1.5 |
| | 70 | 1.5 | 1.5 |
| Above 70— | 71 | 2.1 | 2.1 |
| | 80 | 2.3 | 2.3 |
| | 90 | 2.5 | 2.5 |
| | 100 | 2.7 | 2.7 |
| | 110 | 3.0 | 3.0 |
| | 120 | 3.2 | 3.2 |
| | 130 | 3.5 | 3.5 |
| | 140 | 3.8 | 3.8 |
| | 150 | 4.1 | 4.1 |

(b) For capacitor energy storage equipment, compliance shall be determined with ~~((neither the minimum nor the maximum quantity of charge per))~~ the system fully charged and a setting of at least 10 mAs for each exposure.

(c) The required minimal half-value layer shall include the filtration contributed by materials permanently in position between the focal spot of the tube and the patient. (For example, a table top when the tube is mounted "under the table" and inherent filtration of the tube)

(d) Filtration control. For x-ray systems with variable kVp and variable filtration for the useful beam, a device shall link the kVp selector with the filters and shall prevent an exposure unless the minimum amount of filtration required by subdivision (a) of this subsection is in the useful beam for the selected kVp.

(6) *Multiple tubes.* Where two or more radiographic tubes are controlled by one exposure switch, the tube or tubes selected shall be clearly indicated prior to initiation of the exposure. Such indication shall be both on the x-ray control panel and near or on the selected tube housing assembly.

(7) *Mechanical support of tube head.* The tube housing assembly supports shall be adjusted such that the tube housing assembly remains stable during an exposure unless the tube housing movement during exposure is a designed function of the x-ray system.

(8) *Technique indicators.*

(a) The technique factors used during an exposure shall be indicated before the exposure begins, except when automatic exposure controls are used, in which case the technique factors set prior to the exposure shall be indicated.

(b) On equipment having fixed technique factors, the requirement, under subdivision (a) of this subsection may be met by permanent markings. Indication of technique factors shall be visible from the operator's position except in the case of spot films made by the fluoroscopist.

(9) Certified units. All diagnostic x-ray systems certified to comply with 21 CFR 1020 shall meet the requirements of that certification.

(10) Linearity. The difference between the ratio of exposure to mAs at one mA or mAs setting and the ratio at another mA or mAs setting shall not exceed 0.10 times the sum of the ratios. This is written as:

$$X_1 - X_2 \leq 0.10 (X_1 + X_2)$$

Where X1 and X2 are the ratios (mR/mAs) for each mA or mAs station.

The test shall be performed at any selections of mA or mAs without regard to focal spot size, provided neither focal spot size is less than 0.45 millimeter.

(11) kVp accuracy. The difference between the indicated and actual kVp of an x-ray machine shall not be greater than ten percent of the indicated kVp, or, alternatively, if available, the accuracy specifications of the control panel manufacturer must be met.

AMENDATORY SECTION (Amending Order 183, filed 7/23/91, effective 8/23/91)

WAC 246-225-050 Fluoroscopic x-ray systems. Fluoroscopic x-ray systems shall meet the following requirements:

(1) Limitation of useful beam.

(a) The fluoroscopic tube shall not produce x-rays unless the primary barrier is in position to intercept the entire useful beam at all times.

(b) The entire cross section of the useful beam shall be intercepted by the primary protective barrier of the fluoroscopic image assembly at any source-to-image-distance (SID).

(c) Nonimage-intensified fluoroscopic equipment shall not be used.

(d) For ~~((image-intensified))~~ fluoroscopic equipment without a spot film device, neither the length nor the width of the fluoroscopic x-ray field in the plane of the image receptor shall exceed that of the visible area of the image receptor by more than three percent of the SID. The sum of the excess length and the excess width shall be no greater than four percent of the SID. Measurements shall be made at the minimum SID available but at no less than ~~((eight))~~ 20 centimeters (8 inches) table top to image receptor distance.

(e) For uncertified ~~((image-intensified))~~ fluoroscopic equipment with a spot film device, the fluoroscopic x-ray beam with the shutters wide open (during either fluoroscopy itself or spot films) shall be no larger than the dimensions of the largest spot film size for which the device is designed. Measurements shall be made at the minimum SID available, but at no less than ~~((eight))~~ 20 centimeters (8 inches) table top to the film plane distance.

(f) For certified (21 CFR 1020) ~~((image-intensified))~~ fluoroscopic equipment with a spot film device, neither the length nor the width of the fluoroscopic x-ray field in the plane of the image receptor shall exceed that of the visible area of the image receptor by more than three percent of the SID. The sum of the excess length and width shall be no greater than four percent of the SID. Measurements shall be made at the minimum SID available, but at no less than

PERMANENT

~~((eight))~~ 20 centimeters (8 inches) table top to film plane distance.

(g) Fluoroscopic equipment beam limitation:

(i) Means shall be provided to reduce the beam size at the plane of the image receptor to 125 square centimeters or less; and

(ii) The minimum field size at the greatest SID shall be equal to or less than 5 centimeters by 5 centimeters.

(2) *Activation of the fluoroscopic tube.* X-ray production in the fluoroscopic mode shall be controlled by a deadman switch.

(3) *Entrance exposure rate allowable limits.*

(a) For equipment with or without automatic brightness control, the exposure rate measured at the point where the center of the useful beam enters the patient shall not exceed 2.58×10^{-3} coulombs per kilogram per minute (ten roentgens per minute), except during film recording of fluoroscopic images or when an optional high level control (HLC) is activated.

(b) For equipment provided with HLC, the equipment shall not be operable at a combination of tube potential and current which will result in an exposure rate in excess of 1.29×10^{-3} coulombs per kilogram per minute (5 roentgens per minute) at the point where the center of the useful beam enters the patient, unless the HLC is activated.

(i) Special means of activation of high level controls, such as additional pressure applied continuously by the operator, shall be required to avoid accidental use.

(ii) A continuous signal audible to the fluoroscopist shall indicate the high level control is employed.

(c) Measuring compliance of entrance exposure rate limits. Compliance with subsection (3) of this section shall be determined as follows:

(i) Movable grids and compression devices shall be removed from the useful beam during the measurement;

(ii) If the source is below the table, exposure rate shall be measured 1 centimeter above the table top or cradle;

(iii) If the source is above the table, the exposure rate shall be measured at 30 centimeters above the table top with the end of the beam-limiting device or spacer positioned as closely as possible to the point of measurement;

(iv) In a C-arm type of fluoroscope, the exposure rate shall be measured 30 centimeters from the input surface of the fluoroscopic imaging assembly, with the source positioned at any available SID, provided the end of the beam-limiting device or spacer is no closer than 30 centimeters from the input surface of fluoroscopic imaging assembly; and

(v) In a lateral-type fluoroscope, the exposure rate shall be measured at a point 15 centimeters from the center line of the x-ray ~~((source))~~ table with the end of the beam-limiting device or spacer positioned as closely as possible to the point of measurement. If the table top is movable, the table top shall be positioned as closely as possible to the lateral x-ray source, with the end of the beam-limiting device or spacer no closer than 15 centimeters to the center line of the x-ray table.

(d) Periodic measurement of entrance exposure rate limits.

(i) Periodic measurements of the exposure rate shall be made. An adequate period for such measurements shall be

annually or after maintenance of the system affecting the exposure rate.

(ii) Results of exposure rate measurements shall be available where the fluoroscopist has ready access to the measurements while using that fluoroscope. Results of the measurements shall include:

(A) The maximum possible coulombs per kilogram per minute (R/minute), as well as the ~~((physical factors used to determine data))~~ technique factors associated with it;

(B) The name of the person performing the measurements;

(C) The last ~~((two))~~ date~~((s))~~ the measurements were performed; and

(D) The type of device used in making the measurements.

(iii) Conditions of measurement:

(A) The kVp shall be adjusted to that which will produce the maximum entrance exposure rate;

(B) The high level control, if present, shall not be activated;

(C) The x-ray systems that incorporate automatic exposure rate control (automatic brightness control) shall have sufficient material, for example, lead or lead equivalence, placed in the useful beam to produce the maximum output of the x-ray system; and

(D) X-ray systems not incorporating automatic exposure rate control shall utilize ~~((the maximum milliamperage))~~ whatever combination of kVp, mA, and other selectable parameters that will generate the highest exposure rate of the x-ray system. Materials, for example, an attenuation block, may be placed in the useful beam to protect the imaging system, as long as the material does not affect the measurement of the exposure rate.

(4) *Barrier transmitted radiation rate limits.*

(a) The exposure rate due to transmission through the primary protective barrier with the attenuation block in the useful beam, combined with radiation from the image intensifier, if provided, shall not exceed 5.16×10^{-7} coulombs per kilogram per hour (2 milliroentgens per hour) for each 2.58×10^{-4} coulombs per kilogram per minute (roentgen per minute) of entrance exposure rate. The barrier transmission measurement shall be made at 10 centimeters from an accessible surface of the fluoroscopic imaging assembly beyond the plane of the image receptor.

(b) Measuring compliance of barrier transmission.

(i) The exposure rate due to transmission through the primary protective barrier combined with radiation from the image intensifier shall be determined by measurements averaged over an area of 100 square centimeters with no linear dimension greater than 20 centimeters.

(ii) If the source is below the table top, the measurement shall be made with the input surface of the fluoroscopic imaging assembly positioned 30 centimeters above the table top.

(iii) If the source is above the table top and the SID is variable, the measurement shall be made with the end of the beam-limiting device or spacer as close to the table top as it can be placed, provided the beam-limiting device or spacer shall not be closer than 30 centimeters.

(iv) Movable grids and compression devices shall be removed from the useful beam during the measurement.

(5) *Indication of potential and current.* During fluoroscopy and cinefluorography, x-ray tube potential and current shall be continuously indicated.

(6) *Source-skin distance (SSD).* The source to skin distance shall not be less than:

- (a) 38 centimeters on stationary fluoroscopes;
- (b) 30 centimeters on mobile fluoroscopes; and
- (c) 20 centimeters for image intensified fluoroscopes used for specific surgical application. The user must provide precautionary measures for the use of the fluoroscope due to its short SSD.

(7) *Fluoroscopic timer.*

(a) Means shall be provided to preset the cumulative on-time of the fluoroscopic tube. The maximum cumulative time of the timing device shall not exceed five minutes without resetting.

(b) A signal audible to the fluoroscopist shall indicate the completion of a preset cumulative on-time. Such signal shall continue to sound while x-rays are produced until the timing device is reset. Alternatively, the timing device may terminate exposures at the end of the preset time.

(c) Total fluoroscopic on-time for each patient shall be recorded, either in patient's chart or in a separate log.

(8) *Control of scattered radiation.*

(a) Fluoroscopic table designs when combined with normal operating procedures shall be such that no unprotected part of staff or ancillary person's body shall be exposed to unattenuated scattered radiation which originates from under the table. The attenuation required shall be not less than 0.25 mm lead equivalent.

(b) Equipment configuration when combined with procedures shall be such that no portion of staff or ancillary person's body, except the extremities, shall be exposed to the unattenuated scattered radiation emanating from above the table top unless:

(i) The radiation has passed through not less than 0.25 mm lead equivalent material, for example, drapes, Bucky-slot cover-sliding or folding panel, or self-supporting curtains, in addition to lead equivalency provided by the protective apron referred to under WAC 246-225-020 (2)(e); and

(ii) Exceptions to subdivision (b) of this subsection may be made in some special procedures where a sterile field will not permit the use of the normal protective barriers. Where the use of prefitted sterilized covers for the barriers is practical, the department shall not permit such exception.

(9) *Radiation therapy simulation systems.* Radiation therapy simulation systems shall be exempt from the requirements of subsection((s)) (3)((-4), and (-7)) of this section(~~(- Provided, That:)~~). In addition, these systems shall be exempt from:

(a) Subsections (1) and (4) of this section provided such systems are designed and used in such a manner that no individual other than the patient is in the x-ray room when the system is producing x-rays; and

(b) ~~((The systems not meeting the requirements of))~~ Subsection (7) of this section if such systems are provided with a means of indicating the cumulative time ((during which)) that an individual patient has been exposed to x-rays. ((The timer shall be reset between examinations in such cases:))

AMENDATORY SECTION (Amending Order 183, filed 7/23/91, effective 8/23/91)

WAC 246-225-150 X-ray film developing requirements. Compliance with this section is required of healing arts registrants and is designed to ensure the patient and operator exposure is minimized, and to produce optimum image quality and diagnostic information.

(1) Manual processing of films:

(a) The following relationship between temperature of the developer and development time must be used (standard chemistry only):

| THERMOMETER READINGS (DEGREES) | | MINIMUM DEVELOPING TIMES (MINUTES) |
|-----------------------------------|----|--|
| C | F | |
| 27 - | 80 | 2 |
| | 79 | 2 |
| | 78 | 2 1/2 |
| | 77 | 2 1/2 |
| 24 - | 76 | 3 |
| | 75 | 3 |
| | 74 | 3 1/2 |
| | 73 | 3 1/2 |
| 22 - | 72 | 4 |
| | 71 | 4 |
| | 70 | 4 1/2 |
| | 69 | 4 1/2 |
| 20 - | 68 | 5 |
| | 67 | 5 1/2 |
| | 66 | 5 1/2 |
| | 65 | 6 |
| 18 - | 64 | 6 1/2 |
| | 63 | 7 |
| | 62 | 8 |
| | 61 | 8 1/2 |
| 16 - | 60 | 9 1/2 |

(b) *Processing of film.* All films shall be processed to achieve adequate sensitometric performance. This criterion shall be adjudged met if:

(i) Film manufacturer's published recommendations for time and temperature are followed; or

(ii) Each film is developed in accordance with the time-temperature chart as required under subdivision (a) of this subsection.

(c) Devices shall be available giving:

(i) The actual temperature of the developer; and

(ii) An audible or visible signal indicating the termination of a preset time (in minutes).

(d) Chemical-film processing control.

(i) Chemicals shall be mixed in accordance with the chemical manufacturer's recommendations.

(ii) Developer replenisher shall be periodically added to the developer tank based on the recommendations of the chemical or film manufacturer. Solution may be removed from the tank to permit the addition of an adequate volume of replenisher.

(iii) All processing chemicals shall be completely replaced at least every two months.

PERMANENT

(2) Automatic film processors shall be set up and maintained so radiographic density and contrast are optimal. This criterion shall be adjudged met if:

(a) Film manufacturer's published specifications for time and temperature are followed. In the absence of such specifications, the film shall be developed using the following chart:

| MINIMAL REQUIRED DEVELOPER TEMPERATURE | | PROCESSOR DEVELOPER IMMERSION TIME* |
|--|----|-------------------------------------|
| °C | °F | Seconds |
| 35 | 95 | 20 |
| 34.5 | 94 | 21 |
| 34 | 93 | 22 |
| 33.5 | 92 | 23 |
| 33 | 91 | 24 |
| 32 | 90 | 25 |
| 31.5 | 89 | 26 |
| 31 | 88 | 27 |
| 30.5 | 87 | 28 |
| 30 | 86 | 29 |
| 29.5 | 85 | 30 |

*Immersion time only, no cross-over time included.

The specified developer temperature and immersion time shall be posted in the dark room or on the automatic processor; and

(b) Replenishment of the developer chemistry is optimal:

(i) The processor shall deliver an adequate rate of developer replenishment; and

(ii) For facilities with a low x-ray workload, standby replenishment, flood replenishment, or periodically sending (~~blank~~) prefixed films through the processor may be necessary.

(c) Sensitometric tests of processor performance demonstrate the processor is achieving radiographic density and contrast equal to other processor models operating at equivalent developer immersion time and developer temperatures and using comparable chemistry.

(3) *Darkrooms.* Darkrooms shall be constructed so film being processed, handled, or stored will be exposed only to light passed through a safelight filter. The filter shall be of the type specified by the film manufacturer. Bulb wattage in the safelight shall be no greater than fifteen watts. The safelight shall be mounted at least 1.2 meters (four feet) above work areas.

(4) The department shall make x-ray film development and darkroom tests as necessary to determine compliance with this section.

AMENDATORY SECTION (Amending Order 240, filed 2/7/92, effective 3/9/92)

WAC 246-225-160 Mammography. (1) The use of a special purpose x-ray machine designed and used solely for mammography is required. Exempted from this requirement shall be (~~general purpose~~) x-ray equipment (~~used for~~) using xerography (that meets these regulations) for evaluation of breast implant integrity. (~~This exemption is in effect until January 1, 1994.~~)

(2) All mammographic calibration, evaluation, service, and quality control actions shall be documented in writing and maintained at the facility for a three-year period. Records must be easily accessible to operators of these x-ray units.

(3) All tests requiring the use of a breast phantom shall employ a phantom similar to or identical to the one required by the American College of Radiology for its mammography accreditation program.

(4) Machine requirements:

(a) Mammography x-ray machines must be (~~calibrated~~) evaluated upon any major component change and on a yearly basis by a qualified medical physicist. (~~Calibration~~) Evaluation shall document (but is not limited to) half-value layer (HVL), kVP accuracy, reproducibility, timer accuracy, resolution achieved with film in use at the facility, focal spot size, mA linearity, light versus x-ray field alignment, and patient exposures (glandular tissue dose) following the measurement protocol in NCRP Report No. 85 (using a breast phantom). This requirement shall include initial acceptance testing upon the x-ray system's installation prior to human use.

(b) The half-value layer (HVL) for film/screen mammography shall be (~~at least 0.30 mm of aluminum (and shall not exceed 0.40 mm) as measured at 30 kVP~~) between the values of measured kVp/100 and measured kVp/100 + 0.1 millimeters aluminum. The half-value layer for xerography shall be at least 1.2 mm but no greater than 1.6 mm of aluminum as measured at 50 kVP. The HVL shall include the contribution to filtration made by the compression device.

(c) Exposure reproducibility: Manual techniques. See WAC 246-225-090.

(d) Exposure reproducibility: Photo-timed techniques. (~~A breast phantom shall be used to obtain a series of four photo-timed radiographs (all selectable machine parameters shall be held constant). Optical density (O.D.) of a selected area on the image in the range of 1.0-2.0 O.D. shall be analyzed and the measurements for these films shall be within 0.10 O.D. of each other.~~) Mammographic systems in the AEC mode shall be able to maintain constant film density to within an optical density of ± 0.3 of the average optical density over the range of clinically used kVps, using BR-12 or other breast equivalent material phantom thicknesses of 2 centimeters to 6 centimeters. If the facility has established a technique chart that utilizes varying technical factors for different breast thicknesses, those adjustments in technique may be used when complying with this requirement.

(e) Radiographic timers. See WAC 246-225-070.

(f) kVP accuracy: The kVP accuracy published by the x-ray machine manufacturer shall be maintained at the specified level. For determination of actual versus indicated kVP, the manufacturer's recommendations for testing shall be followed.

(g) mA linearity. See WAC 246-225-040(10).

(h) All special purpose x-ray machines designed solely for mammography and installed after January 1, 1992, shall be equipped with a milli-ampere-second (mAs) read-out device, registering after each phototimed exposure. Alternatively, a means of determining mAs after each exposure shall be provided.

(i) Beam limitation:

(i) Mammographic systems shall be provided with means to limit the useful beam such that the x-ray field at the plane of the image receptor does not extend beyond any edge of the image receptor at any designed SID except the edge of the image receptor designed to be adjacent to the chest wall where the x-ray field may not extend beyond such edge by more than two percent of the SID.

(ii) Beam limiting devices consisting of an assortment of fixed, removable cones sufficient to meet the requirement for each combination of image receptor size and SID for which the unit is designed shall have clear and permanent markings to indicate the image receptor size and SID for which it is designed.

(iii) When the beam limiting device and image receptor support device are designed to be used to immobilize the breast during a mammographic procedure and the SID may vary, the SID indication specified in WAC 246-225-060 (4)(c)(i) and (ii) shall be the maximum SID for which the beam limiting device or aperture is designed.

(iv) In the absence of a visually defined x-ray field each image receptor support shall have clear and permanent markings to indicate the maximum image receptor size for which it is designed.

(j) The combination of source-to-image distance, magnification, and focal spot size shall result in a radiographic resolution of at least 12 line pairs per millimeter. This standard applies to the ~~((routine))~~ mammographic, single emulsion film being used at the facility.

(k) The x-ray machine shall be equipped with a means of immobilizing and compressing the breast with a force of at least twenty-five pounds but no greater than ~~((fifty))~~ forty pounds.

(l) Dedicated mammographic x-ray units are exempted from the requirements of WAC 246-225-030 (5)(b)(i) provided that appropriate operator shielding is employed (as defined by NCRP Report 49).

(m) Transmission limit for image receptor supporting devices used for mammography. For x-ray systems manufactured after September 5, 1978, which are designed only for mammography, the transmission of the primary beam through any image receptor support provided with the system shall be limited such that the exposure 5 centimeters from any accessible surface beyond the plane of the image receptor supporting device does not exceed 25.8 nanocoulombs per kilogram (0.1 milliroentgen) ~~((25.8 nC/kg))~~ for each activation of the tube. Exposure shall be measured with the system operated at the minimum SID for which it is designed. Compliance shall be determined at the maximum rated peak tube potential for the system and at the maximum rated product of tube current and exposure time (mAs) for that peak tube potential. Compliance shall be determined by measurements averaged over an area of 100 square centimeters with no linear dimension greater than 20 centimeters.

(n) Maximum glandular doses. Glandular tissue dose for a cranio-caudal view of a 4.5 cm compressed breast using dose calculation methods found in NCRP Report # 85 shall not exceed the following:

Screen-film:

No grid = 1.5 milliGray (100 millirads)/projection

Grid = 2.5 milliGray (300 millirads)/projection

Xerox = 4.0 milliGray (400 millirads)/projection

(5) A quality control program shall be written and implemented for all mammographic facilities. This shall include (but shall not be limited to) tests performed, testing frequency, testing protocol, control limits for each test, corrective actions taken, and equipment maintenance/service. Program requirements include:

(a) Daily tests:

Film processor control charts using a sensitometric/densitometric based measurement system shall be required for each day the mammographic machine is in operation. Single emulsion mammographic film shall be used for this evaluation. The sensitometer shall be one with a 21-step optical attenuator.

Parameters in daily film processor tests shall include:

(i) Speed index (mid-density):

Control limits ± 0.15 optical density

(ii) Contrast index (density difference):

Control limits ± 0.15 optical density

(iii) Base + fog:

Maximum density shall not exceed 0.20 optical density.

(iv) Solution temperatures~~((±))~~, using a digital thermometer that reads out in tenths of a degree and that is accurate to within $\pm 0.5^\circ\text{F}$.

Control limits ± 1.0 F

(b) Monthly tests:

(i) Chemical replenishment rates.

(ii) ~~((Breast phantom imaging shall visualize a minimum of four fibers, three masses, and three speck groups, or the minimum acceptability standard of the American College of Radiology in its accreditation program, whichever is more restrictive))~~ Image quality evaluation. The mammographic system shall be capable of providing an image of a 0.75 mm fiber, 0.32 mm speck group, and a 0.75 mm mass from an ACR, or equivalent, phantom on the standard mammographic image receptor system in use at the facility. Mammograms shall not be taken on patients if this minimum is not met. Any fibers, speck groups or masses larger than those specified shall also be imaged.

(c) Quarterly tests:

(i) Film/screen contact for all cassettes, using a 40-mesh copper screen.

(ii) Analyses of reject/repeat films.

(iii) Fixer retention in processed film.

(d) Semi-annual tests:

(i) Darkroom fog.

(ii) Compression device force.

(e) Yearly tests: See WAC 246-225-160 (4)(a) ~~((Calibration))~~.

~~((e))~~ (f) Cassette screens must be cleaned at least weekly.

~~((f))~~ (g) Records shall be maintained for quality control test equipment which requires calibration, and such calibrations shall be performed in accordance with recommendations of the manufacturer of the test equipment.

~~((g))~~ (h) Film processing. See WAC 246-225-150. A film processor that cannot be consistently made to operate within the control limits specified in (a) of this subsection shall not be used to process mammographic films.

(6) Operator competency:

(a) A mammographic machine operator shall be licensed, certified, or registered by the department as either:

(i) A health care practitioner, licensed under Title 18 RCW, if performing mammography is within the person's authorized scope of practice; or

(ii) A diagnostic radiologic technologist certified in accordance with chapter 18.84 RCW; or

(iii) An x-ray technician registered in accordance with chapter 18.84 RCW, with two or more years' experience in performing mammography and satisfactory completion of ~~((two or more classes in mammography approved))~~ at least sixteen hours of training in mammographic positioning, mammographic quality assurance, and/or other related areas subject to approval by the department.

(b) A mammographic machine operator shall complete the equivalent of at least ~~((one mammography class per calendar year; the class is))~~ eight hours of training every twelve months covering such areas as mammographic positioning, mammographic quality assurance and other related areas subject to approval by the department.

(c) A mammographic machine operator shall meet the requirements of WAC 246-225-020 (2)(b) and 246-225-99920.

(7) Masking devices shall be made available to block extraneous light from the viewer's eye when the illuminated surface of the viewbox is larger than the ~~((image area))~~ exposed area on the film.

(8) Additional requirement for mobile mammography services:

The daily film processor performance testing required in subsection (5)(a) of this section shall apply to all film processors used by the mobile service. No processor shall be used unless it meets the control limits specified by subsection (5)(a)(i) through (iv) of this section.

AMENDATORY SECTION (Amending Order 183, filed 7/23/91, effective 8/23/91)

WAC 246-225-99910 Appendix I—Good practices. The following are included in this handbook of regulations as suggested good practices and are not intended to be a regulation. The topics presented in these good practices may, however, become incorporated into the Washington Administrative Code at a future date.

(1) Exchange of information. Because patient exposure to diagnostic x-rays is the most predominant source of exposure to artificially produced ionizing radiation, radiographs should be exchanged among the practitioners of the various healing arts. Such exchange can only benefit patients by reducing the unnecessary repeated exposures of patients who are referred to, or change to, other practitioners.

(2) Patient exposure guidelines. The following patient exposure values should be achievable with high speed image receptor systems, proper filtration, a reasonable radiographic density preference, proper choice of ~~((kVp))~~ technique factors, and proper film development. State radiation safety surveyors can provide registrants with results of measurements of patient exposure values upon request.

Dental Bitewing (D-Speed Film)*

| KVP Range Utilized | Upper Limit of Skin Entrance Exposure, mR |
|--------------------|---|
| 50 - 64 | 350 |
| 65 - 70 | 300 |
| 71 - 80 | 250 |
| 81 - 90 | 200 |

Medical (400 Speed Imaging System)*

| Exam* | Upper Limit of Skin Entrance Exposure, mR |
|---------------------|---|
| Abdomen (AP) | 300 |
| Lumbar spine (AP) | 350 |
| Cervical spine (AP) | 95 |
| Full spine (AP) | 150 |
| Skull (LAT) | 70 |
| Chest (PA) | 10 (Nongrid), 15 (Grid) |

*On average-size adult patients

**Chapter 246-227 WAC
RADIATION PROTECTION—INDUSTRIAL X-RAY**

NEW SECTION

WAC 246-227-001 Purpose. The regulations in this chapter establish radiation safety requirements for persons utilizing x-ray machines for industrial radiography. The requirements of this part are in addition to and not in substitution for the other requirements of these regulations.

NEW SECTION

WAC 246-227-010 Scope. The regulations in this chapter apply to all registrants who use x-ray machines for industrial radiography: *Provided, however,* That nothing in this part shall apply to the use of sources of radiation in the healing arts.

NEW SECTION

WAC 246-227-020 Definitions. As used in this part: (1) "Enclosed radiography" means industrial radiography employing radiation machines conducted in an enclosed cabinet or room and includes cabinet radiography and shielded room radiography.

(a) "Cabinet radiography" means industrial radiography employing radiation machines conducted in an enclosure or cabinet so shielded that every location at the exterior of the enclosure or cabinet meets the condition specified in WAC 246-221-060.

"Cabinet x-ray system" means an x-ray system with the x-ray tube installed in an enclosure (hereinafter termed "cabinet") which, independently of existing architectural structure except the floor on which it may be placed, is intended to contain at least that portion of a material being irradiated, provide radiation attenuation, and exclude personnel from its interior during generation of x-radiation. Included are all x-ray systems designed primarily for the inspection of carry-on baggage at airline, railroad, and bus

PERMANENT

terminals, and in similar facilities. An x-ray tube used within a shielded part of a building, or x-ray equipment which may temporarily or occasionally incorporate portable shielding is not considered a cabinet x-ray system.

(b) "Shielded-room radiography" means industrial radiography conducted in a room so shielded that every location on the exterior of the room meets the conditions specified in WAC 246-221-060.

(2) "Industrial radiography" means the examination of the macroscopic structure of materials by nondestructive methods utilizing x-ray machines. Industrial radiography as used in this chapter does not include well logging operations.

(3) "Permanent radiographic installation" means an installation in which the shielding is an integral part to the building structure, such that the radiographic operations conducted there are not mobile and not temporary.

(4) "Personal supervision" means supervision by a radiographer such that the radiographer is physically present at the radiography site and in such proximity that communication can be maintained and immediate assistance given as required.

(5) "Radiographer" means any individual who performs or who, in attendance at the site where x-ray machines are being used, personally supervises industrial radiographic operations and who is responsible to the registrant for assuring compliance with the requirements of these regulations.

(6) "Radiographer's assistant" means any individual who, under the personal supervision of a radiographer, uses radiation machines, or radiation survey instruments in industrial radiography.

NEW SECTION

WAC 246-227-040 Radiation survey instruments.

(1) The registrant shall maintain sufficient calibrated and operable radiation survey instruments to make physical radiation surveys as required by this part and chapter 246-221 WAC. Instrumentation required by this section shall have a range such that two milliroentgens per hour through one roentgen per hour can be measured.

(2) Each radiation survey instrument shall be calibrated:

(a) At energies appropriate for use and at intervals not to exceed three months and after each instrument servicing;

(b) Such that accuracy within \pm twenty percent traceable to a national standard can be demonstrated; and

(c) At two or more widely separated points, other than zero, on each scale.

(3) Records of these calibrations shall be maintained for three years after the most recent calibration date.

(4) The requirements of this section do not apply to registrants using only radiation machines in enclosed radiographic systems.

NEW SECTION

WAC 246-227-050 Utilization and survey records.

(1) Each registrant shall maintain records of the following information for three years after the date of each radiographic operation and shall maintain these records for inspection by the department:

(a) A description (or make and model number) of the radiation machine used along with the techniques utilized for each job;

(b) The identity of the radiographer and radiographer's assistant performing the work;

(c) Locations where used and dates of use;

(d) A physical radiation survey made of the boundary of the restricted area during radiographic operations. The maximum reading at the boundary shall be recorded. The records shall indicate approximate distance from source to boundaries and any occupied areas with exposure levels greater than 2 mR in any hour during radiographic operations; and

(e) The model and serial number of the survey meter used in (d) of this subsection.

(2) The requirements of subsection (1) of this section shall not apply in industrial radiography utilizing radiation machines in enclosed interlocked cabinets or rooms which are not occupied during radiographic operations, which are equipped with interlocks such that the radiation machine will not operate unless all openings are securely closed and which is so shielded that every location on the exterior meets conditions for an unrestricted area, as specified in WAC 246-221-060.

NEW SECTION

WAC 246-227-060 Limitations—Personal radiation safety requirements for radiographers and radiographer's assistants. (1) No registrant shall permit any individual to act as a radiographer as defined in this chapter until such individual:

(a) Has been instructed in the subjects outlined in WAC 246-227-170;

(b) Has received copies of and instruction in the regulations contained in chapters 246-220, 246-222, 246-221 and 246-227 WAC, and the registrant's operating and emergency procedures, and shall have demonstrated understanding thereof;

(c) Has demonstrated competence to use the radiation machine and the radiation survey instruments which will be employed in the individual's assignment; and

(d) Has demonstrated understanding of the instructions in this paragraph by successful completion of written test or oral test on the subjects covered.

(2) No registrant shall permit any individual to act as a radiographer's assistant as defined in this part until such individual:

(a) Has received copies of an instruction in the registrant's operating and emergency procedures;

(b) Has demonstrated competence to use, under the personal supervision of the radiographer, the radiation survey instruments which will be employed in the individual's assignment;

(c) Has demonstrated understanding of the instructions in this paragraph by successfully completing a written or oral test.

(3) Each registrant shall maintain records of training and testing which demonstrate that the requirements of subsections (1) and (2) of this section are met. These records shall be retained for at least one year following termination of employment.

(4) When a radiographer's assistant is using an x-ray machine, the radiographer shall maintain direct surveillance.

NEW SECTION

WAC 246-227-070 Operating and emergency procedures. The registrant's operating and emergency procedures shall include instructions in at least the following:

(1) The handling and use of radiation machines to be employed such that no individual is likely to be exposed to radiation doses in excess of the limits established in chapter 246-221 WAC;

(2) Methods and occasions for conducting radiation surveys;

(3) Methods for controlling access to radiographic areas;

(4) Methods and occasions for locking or securing radiation machines;

(5) Personnel monitoring and the use of personnel monitoring equipment including steps that must be taken immediately by radiography personnel in the event a pocket dosimeter is found to be off-scale;

(6) The procedure for notifying proper personnel in the event of a theft, loss, overexposure or accident involving a radiation machine; and

(7) Maintenance of records.

NEW SECTION

WAC 246-227-080 Personnel monitoring control.

(1) No registrant shall permit any individual to act as a radiographer or as a radiographer's assistant unless, at all times during radiographic operations, each such individual shall wear a film or TLD badge and a direct reading pocket dosimeter. Pocket dosimeters shall be capable of measuring exposures from zero to at least two hundred milliroentgens. A film or TLD badge shall be assigned to and worn by only one individual.

(2) Pocket dosimeters shall be read and doses recorded daily. Pocket dosimeters shall be charged at the beginning of each working day. Pocket dosimeters shall be checked at least annually for correct response to radiation. Acceptable dosimeters shall read within \pm thirty percent of the true radiation exposure. A film or TLD badge shall be immediately processed if a pocket dosimeter is discharged beyond its range during normal use. The film or TLD badge reports received from the film or TLD badge processor and records of pocket dosimeter readings shall be maintained until the department authorizes their disposal.

(3) The requirements for use of pocket dosimeter or pocket chamber shall not apply in industrial radiography utilizing radiation machines in enclosed interlocked cabinets or rooms which are not occupied during radiographic operations, which are equipped with interlocks such that the radiation machine will not operate unless all openings are securely closed and which are so shielded that every location on the exterior meets conditions for an unrestricted area, as specified in WAC 246-221-060.

(4) The requirement for film badges or TLDs do not apply to those users of cabinet x-ray systems which do not allow human access and which meet the requirements of WAC 246-227-130.

NEW SECTION

WAC 246-227-090 Security—Precautionary procedures in radiographic operations. (1) During each radiographic operation, the radiographer or radiographer's assistant shall maintain a direct surveillance of the operation to protect against unauthorized entry into a high radiation area, as defined in chapter 246-220 WAC except:

(a) Where the high radiation area is equipped with a control device or alarm system as described in WAC 246-221-120 (1)(e)(ii); or

(b) Where the high radiation area is locked to protect against unauthorized or accidental entry.

(2) When not in operation or when not under direct surveillance, radiation machines shall be secured to prevent use by unauthorized personnel.

NEW SECTION

WAC 246-227-095 Posting. Notwithstanding any provisions in WAC 246-221-130, areas in which radiography is being performed shall be conspicuously posted and access to the area shall be controlled as required by WAC 246-221-120. This requirement shall not apply to areas using enclosed radiography systems (cabinets) which do not allow human access and in which the requirements of WAC 246-221-060 are met at the surface of the cabinet.

NEW SECTION

WAC 246-227-120 Other records required. Each registrant conducting industrial radiography shall have the following documents, where applicable, available on site for inspection by the department:

(1) Operating and emergency procedures;

(2) Applicable regulations;

(3) Survey records required pursuant to WAC 246-227-050;

(4) Daily pocket dosimeter records for the period of operation at the site pursuant to WAC 246-227-080; and

(5) Proof of the latest calibration for specific instruments in use at the site pursuant to WAC 246-227-040.

NEW SECTION

WAC 246-227-130 Special requirements for enclosed radiography. (1) Shielded room radiography systems and cabinet systems shall:

(a) Comply with all applicable requirements of this chapter and WAC 246-221-060;

(b) Be interlocked such that the exposure will terminate if a door or port accessible to individuals is opened during the exposure, except for those systems employing conveyor belts or sample ports; and

(c) Be tested for the proper operation of interlocks, high radiation area control devices or alarm systems, where applicable, at the beginning of each day of use. The results of these tests shall be recorded and maintained for three years.

(2) The registrant shall perform an evaluation, at intervals not to exceed one year, to determine conformance with this chapter and WAC 246-221-060. Records of each evaluation shall be maintained for three years.

NEW SECTION

WAC 246-227-150 Special requirements for permanent radiographic installation. Permanent radiographic installations having high radiation area entrance controls of the types described in WAC 246-221-102(1) or where the high radiation area is locked to protect against unauthorized or accidental entry, shall also meet the following special requirements:

(1) Each entrance that is used for personnel access to the high radiation area in a permanent radiographic installation to which this section applies shall have both visible and audible warning signals to warn of the presence of radiation. The visible signal shall be actuated by radiation whenever the x-rays are exposed. The audible signal shall be actuated when an attempt is made to enter the installation while x-rays are being generated.

(2) Both visible and audible alarm systems are required and shall be tested prior to the first use of a source in the installation and thereafter at intervals not to exceed three months. Records of the tests shall be kept for three years.

(3) The department shall review and approve, in advance of construction, plans for permanent radiographic installations whose construction had not commenced by the effective date of these regulations. Construction of the permanent facility shall be in accordance with the plans approved by the department.

(4) A physical radiation survey shall be conducted and results recorded following construction or major modification of the facility to be used in the installation. Radiography shall not be conducted if exposure levels in unrestricted areas are greater than 2mR in any hour. Any increase in output capability of radiation machines will require resurvey of the installation prior to the conduct of industrial radiography.

NEW SECTION

WAC 246-227-170 Appendix A—Minimum subjects to be covered in training radiographers. (1) Fundamentals of radiation safety:

- (a) Characteristics of ionizing radiation;
- (b) Units of radiation dose (mrem) and quantity of radioactivity (curie);
- (c) Hazards of exposure to radiation:
 - (i) Radiation protection standards;
 - (ii) Biological effects of radiation dose;
- (d) Levels of radiation from x-ray machines;
- (e) Methods of controlling radiation dose:
 - (i) Working time;
 - (ii) Working distances;
 - (iii) Shielding.
- (2) Radiation detection instrumentation to be used:
 - (a) Use of radiation survey instruments:
 - (i) Operation;
 - (ii) Calibration;
 - (iii) Limitations;
 - (b) Survey techniques;
 - (c) Use of personnel monitoring equipment:
 - (i) Film badges;
 - (ii) Pocket dosimeters;
 - (iii) Thermoluminescent dosimeters.
- (3) Operation and control of x-ray equipment.

(4) The requirements of pertinent federal and state regulations.

(5) The registrant's written operating and emergency procedures.

(6) Case histories of radiography accidents.

NEW SECTION

WAC 246-235-055 Precedence of license condition over regulation. (1) A license condition may be used to specifically modify any regulation pertaining to the possession, use, storage, transfer, or disposal of radioactive material. Any license condition used to modify an existing regulation shall set forth the title, chapter, section, and, where applicable, any subsection and paragraph numbers for the regulation being modified, and fully define the nature and extent of the modification.

(2) In the event a regulation is changed, an existing license condition that is more restrictive than the new regulation remains in force until there is an amendment or renewal of the license that removes or modifies the license condition.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-235-130 Appendix—General laboratory rules for safe use of unsealed sources. (1) In addition to the requirements set forth in WAC 246-235-020, a specific licensee who uses unsealed, unplated and/or liquid sources (~~should~~) shall possess adequate facilities including ventilation systems which are compatible with the proposed uses: and,

(2) Possess, use, and store, radioactive materials in accordance with, but not limited to, the following:

(a) Receive, handle, and store radioactive materials only at specifically designated locations within the applicant's facility. Vessels containing radioactive material must be labeled as required by chapter 246-221 WAC.

(b) Wear disposable gloves at all times when handling dispersible radioactive material or potentially contaminated items.

(c) Wear personnel monitoring devices (film badge and/or TLD), when required, at all times when working with, or in the vicinity of, radioactive materials. Extremity doses shall be considered in evaluating the need for separate extremity dosimeters. (~~Calculations based on whole body badge results for photon emitters may be used in lieu of separate extremity dosimeters.~~) Extremity dosimetry should be worn when working with millicurie or greater quantities of material (excluding low energy beta emitters and pure alpha emitters). Monitoring devices, when not in use, shall be stored only in a designated low-background area. Calculations based on whole body badge results for photon emitters may be used in lieu of separate extremity dosimeters.

(d) Use remote tools, lead shields, lead-glass shields, and/or plexiglass shields as appropriate.

(e) Prohibit eating, chewing, drinking, smoking, and application of cosmetics in any area where radioactive material is used or stored.

(f) Do not store food, drink or personal effects in any area, container, or refrigerator designated for radioactive materials use or storage.

(g) Do not pipette radioactive materials or perform any similar operation by employing mouth suction.

(h) Use disposable absorbent material with impervious backing to cover work surfaces where spillage is possible.

(i) Properly dress and protect open wounds on exposed body surfaces before working with radioactive materials.

(j) Wear laboratory coats when working with radioactive material. Potentially contaminated laboratory coats shall not be worn outside the immediate work area.

(k) Nuclides in gaseous or volatile form, or with a high potential for volatilization (~~should~~) shall be used only in areas with adequate ventilation systems (~~which conform to the requirements of WAC 246-221-040 and 246-221-070~~).

AMENDATORY SECTION (Amending Order 121, filed 12/27/90, effective 1/31/91)

WAC 246-243-010 Scope. The regulations in this chapter apply to all licensees (~~or registrants~~) who use sources of radiation for industrial radiography: *Provided, however,* That nothing in this part shall apply to the use of sources of radiation in the healing arts.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-243-020 Definitions. As used in this part:

(1) "Enclosed radiography" means industrial radiography employing (~~radiation machines~~) radiographic exposure devices conducted in an enclosed cabinet or room and includes cabinet radiography and shielded room radiography.

(a) "Cabinet radiography" means industrial radiography employing (~~radiation machines~~) radiographic exposure devices conducted in an enclosure or cabinet so shielded that every location at the exterior meets the conditions specified in WAC 246-221-060 of these regulations.

~~((i) "Cabinet x ray system" means an x ray system with the x ray tube installed in an enclosure (hereinafter termed "cabinet") which, independently of existing architectural structure except the floor on which it may be placed, is intended to contain at least that portion of a material being irradiated, provide radiation attenuation, and exclude personnel from its interior during generation of x radiation. Included are all x ray systems designed primarily for the inspection of carry on baggage at airline, railroad, and bus terminals, and in similar facilities. An x ray tube used within a shielded part of a building, or x ray equipment which may temporarily or occasionally incorporate portable shielding is not considered a cabinet x ray system.))~~

(b) "Shielded-room radiography" means industrial radiography conducted in a room so shielded that every location on the exterior meets the conditions specified in WAC 246-221-060 of these regulations.

(2) "Industrial radiography" means the examination of the macroscopic structure of materials by nondestructive methods utilizing sources of radiation. Industrial radiography as used in this chapter does not include well logging operations.

(3) "Permanent radiographic installation" means a shielded installation or structure designed or intended for

radiography employing a radiographic exposure device and in which radiography is regularly performed, regardless of ownership.

(4) "Personal supervision" means supervision by a radiographer such that the radiographer is physically present at the radiography site and in such proximity that communication can be maintained and immediate assistance given as required. When a radiographer's assistant is using or handling sources of radiation, the radiographer must maintain direct surveillance.

(5) "Radiographer" means any individual who performs or who, in attendance at the site where sources of radiation are being used, personally supervises industrial radiographic operations and who is responsible to the licensee (~~or registrant~~) for assuring compliance with the requirements of these regulations and all license conditions.

(6) "Radiographer's assistant" means any individual who, under the personal supervision of a radiographer, uses sources of radiation, related handling tools, or radiation survey instruments in industrial radiography.

(7) "Radiographic exposure device" means any instrument containing a sealed source fastened or contained therein, in which the sealed source or shielding thereof may be moved, or otherwise changed, from a shielded to unshielded position for purposes of making a radiographic exposure.

(8) "Shielded position" means the location within the radiographic exposure device or storage container which, by manufacturer's design, is (~~in one~~) the proper location for storage of the sealed source.

(9) "Source changer" means a device designed and used for replacement of sealed sources in radiographic exposure devices, including those also used for transporting and storage of sealed sources.

(10) "Storage container" means a device in which sealed sources are transported or stored.

(11) Temporary job site refers to any location which is not specifically authorized and described in a license (~~or registration~~).

AMENDATORY SECTION (Amending Order 121, filed 12/27/90, effective 1/31/91)

WAC 246-243-040 Equipment control. (1) Equipment used in industrial radiography operations must meet the following criteria, the following requirements apply to radiographic exposure devices and associated equipment that allow the source to be moved out of the device for routine operation:

(a) The coupling between the source assembly and the control cable must be designed in such a manner that the source assembly will not become disconnected if cranked outside the guide tube. The coupling must be such that it can not be unintentionally disconnected under normal and reasonably foreseeable abnormal conditions.

(b) The device must automatically secure the source assembly when it is cranked back into the fully shielded position within the device. The securing system may only be released by means of a deliberate operation on the exposure device.

(c) The outlet fittings, lock box, and drive cable fitting on each radiographic exposure device must be equipped with

safety plugs or covers which must be installed during storage and transportation to protect the source assembly from water, mud, sand, or other foreign matter.

(d) The guide tube must have passed the crushing tests for the control tube as specified in ANSI N432 and a kinking resistance test that closely approximates the kinking forces likely to be encountered during use.

(e) Guide tubes or exposure heads connected directly to the device must be used when moving the source out of the device.

(f) An exposure head or similar device designed to protect the source assembly from passing out of the end of the guide tube must be attached to the outermost end of the guide tube during radiographic operations. The guide tube exposure head connection must be able to withstand the tensile test for control units specified in ANSI N432.

(g) Source changers must provide a system for assuring that the source will not be accidentally withdrawn from the changer when connecting or disconnecting the drive cable to or from a source assembly.

(h) All newly manufactured radiographic exposure devices and associated equipment acquired by licenses after January 1, 1995, must comply with the requirements of this section.

(i) All radiographic exposure devices and associated equipment in use after January 1, 1998, must comply with the requirements of this section.

(2) Limits on levels of radiation for radiographic exposure devices and storage containers:

~~((1))~~ (a) Radiographic exposure devices measuring less than four inches from the sealed source storage position to any exterior surface of the device shall have no radiation level in excess of fifty milliroentgens per hour (50mR/hr) at six inches from any exterior surface of the device.

~~((2))~~ (b) Radiographic exposure devices measuring a minimum of four inches from the sealed source storage position to any exterior surface of the device, and all storage containers for sealed sources or outer containers for radiographic exposure devices, shall have no radiation level in excess of two hundred milliroentgens per hour (200mR/hr) at any exterior surface, and ten milliroentgens per hour (10mR/hr) at one meter from any exterior surface.

~~((3))~~ (c) The radiation levels specified are with the sealed source in the shielded (i.e., "off") position.

AMENDATORY SECTION (Amending Order 121, filed 12/27/90, effective 1/31/91)

WAC 246-243-070 Storage precautions. (1) Locked radiographic exposure devices and storage containers shall be physically secured to prevent tampering or removal by unauthorized personnel.

(2) At least one calibrated and operable radiation survey instrument shall be available at the storage area whenever a radiographic exposure device, a storage container, or source is being placed in storage.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-243-080 Radiation survey instruments. (1) The licensee ~~((or registrant))~~ shall maintain sufficient calibrated and operable radiation survey instruments to make

physical radiation surveys as required by this part and chapter 246-221 WAC. Instrumentation required by this section shall have a range such that two milliroentgens per hour through one roentgen per hour can be measured.

(2) Each radiation survey instrument shall be calibrated:

(a) At energies appropriate for use and at intervals not to exceed three months and after each instrument servicing;

(b) Such that accuracy within ± 20 percent traceable to a national standard can be demonstrated; and

(c) At two or more widely separated points, other than zero, on each scale.

(3) Records shall be maintained of these calibrations for ~~((two))~~ three years after the calibration date for inspection by the department.

~~((4) The requirements of this section do not apply to registrants using only radiation machines in enclosed radiographic systems.)~~

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-243-090 Leak testing, repair, tagging, opening, modification, and replacement of sealed sources.

(1) The replacement of any sealed source fastened to or contained in a radiographic exposure device and leak testing, repair, tagging, opening, or any other modification of any sealed source shall be performed only by persons specifically authorized to do so by the department, the United States Nuclear Regulatory Commission, or any agreement state.

(2) Each sealed source shall be tested for leakage at intervals not to exceed six months. In the absence of a certificate from a transferor that a test has been made within the six-month period prior to the transfer, the sealed source shall not be put into use until tested and results obtained.

(3) The leak test shall be capable of detecting the presence of 185 becquerels (0.005 microcurie) of removable contamination on the sealed source. An acceptable leak test for sealed sources in the possession of a radiography licensee would be to test at the nearest accessible point to the sealed source storage position, or other appropriate measuring point, by a procedure ~~((to be approved pursuant to WAC 246-235-080 (5)(e)))~~ specifically approved in a license condition. Records of leak test results shall be kept in units of microcuries and maintained for inspection by the department for ~~((two))~~ three years after the leak test is performed.

(4) Any test conducted pursuant to subsections (2) and (3) of this section which reveals the presence of 185 becquerels (0.005 microcurie) or more of removable radioactive material shall be considered evidence that the sealed source is leaking. The licensee shall immediately withdraw the equipment involved from use and shall cause it to be decontaminated and repaired or to be disposed in accordance with regulations of the department. Within five days after obtaining results of the test, the licensee shall file a report with the department describing the involved equipment, the test results, and the corrective action taken.

(5) A sealed source which is not fastened to or contained in a radiographic exposure device shall have permanently attached to it a durable tag at least one inch square bearing the prescribed radiation caution symbol in conventional colors magenta or purple on a yellow background, and

at least the instructions: "Danger - Radioactive Material - Do not handle - Notify civil authorities if found."

(6) Each radiographic exposure device shall have permanently and conspicuously attached to it a durable label at least two inches square bearing the prescribed radiation caution symbol in conventional colors (magenta or purple on a yellow background), and at a minimum the instructions, "Danger - Radioactive Material - Do not handle - Notify civil authorities if found."

(7) Each radiographic exposure device must have attached to it by the user, a durable, legible, clearly visible label bearing the following:

(a) Chemical symbol and mass number of the radionuclide in the device;

(b) Activity and the date on which this activity was last measured;

(c) Model number and serial number of the sealed source;

(d) Manufacturer of the sealed source; and

(e) Licensee's name, address, and telephone number.

AMENDATORY SECTION (Amending Order 121, filed 12/27/90, effective 1/31/91)

WAC 246-243-100 Quarterly inventory. Each licensee shall conduct a quarterly physical inventory to account for all sealed sources received or possessed. The records of the inventories shall be maintained for ~~((two))~~ three years from the date of inventory for inspection by the department and shall include:

(1) Exposure device or source changer make, model, and serial number;

(2) Sealed source serial number and manufacturer;

(3) ~~((Isotope))~~ Radionuclide and current activity;

(4) Location of device/changer;

(5) Date of inventory;

(6) Name of person who performed inventory.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-243-110 Utilization logs. (1) Each licensee ~~((and/or registrant))~~ shall maintain current logs, which shall be kept available for inspection by the department for ~~((two))~~ three years from the date of the recorded event, at the address specified in the license showing for each radiation exposure device the following information:

(a) A description (or make and model number) of each radiation exposure device or storage container in which the sealed source is located;

(b) The identity of the radiographer to whom assigned; and

(c) Locations where used and dates of use.

~~(2) ((The requirements of subsection (1) of this section shall not apply in industrial radiography utilizing radiation machines in enclosed interlocked cabinets or rooms which are not occupied during radiographic operations, which are equipped with interlocks such that the radiation machine will not operate unless all openings are securely closed and which is so shielded that every location on the exterior meets conditions for an unrestricted area, as specified in WAC 246-221-060.~~

~~(3))~~ A separately identified utilization log is not required if the equivalent information is available in records of the licensee ~~((or registrant))~~ and available at the address specified in the license.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-243-120 Inspection and maintenance of radiographic exposure devices, control cables, storage containers and source changers. (1) The licensee shall conduct a program for inspection and maintenance of radiographic exposure devices, storage containers, control units (to include cables), and source changers at intervals, not to exceed three months or prior to first use thereafter to assure proper functioning of components important to safety. Records of these inspections and maintenance shall be kept for ~~((two))~~ three years.

(2) The licensee shall check for obvious defects in radiographic exposure devices, storage containers, control assemblies, and source changers prior to use each day the equipment is used.

(3) The licensee's program shall include a thorough visual inspection for corrosion, and specific maintenance procedures that address corrosion removal and prevention.

(4) If any inspection conducted pursuant to subsections (1) or (2) of this section reveals damage to components critical to radiation safety, the device shall be removed from service until proper repairs have been made.

(5) Any maintenance performed on radiographic exposure devices and accessories shall be in accordance with the manufacturer's specifications.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-243-130 Limitations—Personal radiation safety requirements for radiographers and radiographers' assistants. (1) No licensee ~~((or registrant))~~ shall permit any individual to act as a radiographer as defined in this chapter until such individual:

(a) Has been instructed in the subjects outlined in WAC 246-243-230;

(b) Has received copies of and instruction in the regulations contained in chapters 246-220, 246-222, 246-221, and 246-243 WAC and the applicable sections of appropriate license(s), and the licensee's ~~((or registrant's))~~ operating and emergency procedures, and shall have demonstrated understanding thereof;

(c) Has demonstrated competence to use the source of radiation, related handling tools, and radiation survey instruments which will be employed in the individual's assignment; and

(d) Has demonstrated understanding of the instructions in this paragraph by successful completion of written test and a field examination on the subjects covered.

(2) No licensee ~~((or registrant))~~ shall permit any individual to act as a radiographer's assistant as defined in this part until such individual:

(a) Has received copies of and instruction in the licensee's ~~((or registrant's))~~ operating and emergency procedures;

(b) Has demonstrated competence to use under the personal supervision of the radiographer the sources of radiation, related handling tools, and radiation survey instruments which will be employed in the individual's assignment;

(c) Has demonstrated understanding of the instructions in this paragraph by successfully completing a written or oral test and a field examination on the subjects covered; and

(d) Records of the above training including copies of written tests and dates of oral tests and field examinations shall be maintained ~~((for three years))~~ for at least one year following termination of employment.

(3) Each licensee ~~((or registrant))~~ shall maintain, for inspection by the department, records of training and testing which demonstrate that the requirements of subsections (1) and (2) of this section and WAC 246-235-080 (5)(a) are met.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-243-140 Operating and emergency procedures. The licensee's ~~((or registrant's))~~ operating and emergency procedures shall include instructions in at least the following:

(1) The handling and use of sources of radiation to be employed such that no individual is likely to be exposed to radiation doses in excess of the limits established in chapter 246-221 WAC Standards for protection against radiation;

(2) Methods and occasions for conducting radiation surveys;

(3) Methods for controlling access to radiographic areas;

(4) Methods and occasions for locking and securing sources of radiation;

(5) Personnel monitoring and the use of personnel monitoring equipment including steps that must be taken immediately by radiography personnel in the event a pocket dosimeter is found to be off-scale;

(6) Transportation to field locations, including packing of sources of radiation in the vehicles, posting of vehicles, and control of sources of radiation during transportation;

(7) Minimizing exposure of individuals in the event of an accident;

(8) ~~((The procedure for))~~ Notifying proper personnel in the event of a theft, loss, overexposure or accident involving sources of radiation;

(9) Maintenance of records; ~~((and))~~

(10) The inspection and maintenance of radiographic exposure devices and storage containers; and

(11) Identifying and reporting defects and noncompliance as required by these regulations.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-243-150 Personnel monitoring control.

(1) No licensee ~~((or registrant))~~ shall permit any individual to act as a radiographer or as a radiographer's assistant unless, at all times during radiographic operations, each such individual shall wear a film or TLD badge ~~((and))~~, a direct reading pocket dosimeter, and an alarming rate meter. In permanent facilities where other appropriate alarming or warning devices are in routine use, the wearing of an alarming rate meter is not required. Pocket dosimeters shall

be capable of measuring ~~((doses))~~ exposures from zero to at least 200 milliroentgens. A film or TLD badge shall be assigned to and worn by only one individual.

(2)(a) Pocket dosimeters shall be read and ~~((doses))~~ exposures recorded daily. Pocket dosimeters shall be charged at the beginning of each working day. Pocket dosimeters shall be checked annually at periods not to exceed ~~((one year))~~ thirteen months for correct response to radiation. Acceptable dosimeters shall read within plus or minus ~~((30))~~ twenty percent of the true radiation exposure.

(b) Each alarming rate meter must:

(i) Be checked to ensure that the alarm functions properly (sounds) prior to use at the start of each shift;

(ii) Be set to give an alarm signal at a maximum preset rate of 500 mR/hr.;

(iii) Require special means to change the preset alarm functions; and

(iv) Be calibrated annually at periods not to exceed thirteen months for correct response to radiation: Acceptable rate meters must alarm within plus or minus twenty percent of the true radiation exposure rate.

(c) A film or TLD badge shall be immediately processed if a pocket dosimeter is discharged beyond its range during normal use. The film or TLD badge reports received from the film or TLD badge processor and records of pocket dosimeter readings shall be maintained for inspection by the department until it authorizes their disposal.

~~((3)) The requirements for use of pocket dosimeter or pocket chamber shall not apply in industrial radiography utilizing radiation machines in enclosed interlocked cabinets or rooms which are not occupied during radiographic operations, which are equipped with interlocks such that the radiation machine will not operate unless all openings are securely closed and which are so shielded that every location on the exterior meets conditions for an unrestricted area, as specified in WAC 246-221-060.)~~

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-243-160 Supervision of radiographers' assistants. Whenever a radiographer's assistant uses radiographic exposure devices, uses sealed sources or related source handling tools, or conducts radiation surveys required by WAC 246-243-190 (2), (3), ~~((or))~~ (4), or (5) to determine that the sealed source has returned to the shielded position after an exposure, he or she shall be under the personal supervision of a radiographer, as defined in WAC 246-243-020. Personal supervision shall include (1) the radiographer's personal presence at the site where the sealed sources are being used, (2) the ability of the radiographer to communicate and give immediate assistance if required, and (3) the radiographer's ability to observe the performance of his/her assistant during the operations referred to in this section.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-243-170 Security—Precautionary procedures in radiographic operations. (1) During each radiographic operation, the radiographer or radiographer's assistant shall maintain a direct surveillance of the operation

to protect against unauthorized entry into a high radiation area, as defined in chapter 246-220 WAC except:

(a) Where the high radiation area is equipped with a control device or alarm system as described in WAC ((246-221-120 (1)(e)(ii))) 246-221-102(1); or

(b) Where the high radiation area is locked to protect against unauthorized or accidental entry.

(2) When not in operation or when not under direct surveillance, portable radiation exposure devices (~~and mobile or portable radiation machines~~) shall be physically secured to prevent removal by unauthorized personnel.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-243-180 Posting. Notwithstanding any provisions in paragraph WAC 246-221-130 areas in which radiography is being performed or in which a radiographic exposure device is being stored shall be conspicuously posted and access to the area shall be controlled as required by WAC 246-221-120 and 246-221-102(1).

(1) All potential radiation areas where industrial radiographic operations are to be performed shall be posted based on calculated or estimated exposure rates before industrial radiography operations begin.

(2) Each time the exposure device is relocated and/or the exposed position of the sealed source is changed, the requirements of subsection (1) of this section shall be met.

AMENDATORY SECTION (Amending Order 245, filed 2/21/92, effective 3/23/92)

WAC 246-243-190 Radiation surveys and survey records. (1) No radiographic operation shall be conducted unless calibrated and operable radiation survey instrumentation as described in WAC 246-243-080 is available and used at each site where radiographic (~~exposures are made~~) operations are being performed and at the storage area whenever a radiographic exposure device, a storage container, or source is being placed in storage.

(2) A physical radiation survey shall be made after each radiographic exposure utilizing radiographic exposure devices or sealed sources of radioactive material to determine that the sealed source has been returned to its shielded position. The (~~entire~~) horizontal circumference of the radiographic exposure device shall be surveyed. If the radiographic exposure device has a source guide tube, the survey shall include the guide tube.

(3) A physical radiation survey shall be made to determine that each sealed source is in its shielded condition prior to securing the radiographic exposure device or storage container as specified in WAC 246-243-060. The (~~entire~~) horizontal circumference of the radiographic exposure device shall be surveyed. If the radiographic exposure device has a source guide tube, the survey shall include the guide tube.

(4) A physical radiation survey shall be made of the boundary of the restricted area during radiographic operations not employing shielded room radiography. The maximum survey reading at the boundary shall be recorded. The records shall indicate approximate distance from source to boundaries, whether or not the exposed source is collimated and any occupied areas with exposure levels greater than 2 mR in any hour during radiographic operations.

(5) A survey with a calibrated and operable survey instrument shall be made any time a radiographic exposure device is placed into the storage area to ensure that the sealed source is in its shielded position. The horizontal circumference of the radiographic exposure device with emphasis on the source exit port must be surveyed.

(6) Records required by subsections (3) (~~and~~), (4), and (5) of this section shall include the model and serial number of the survey meter used and shall be maintained for inspection by the department for three years after completion of the survey. If the survey was used to determine an individual's exposure, however, the records of the survey shall be maintained until the department authorizes their disposition.

NEW SECTION

WAC 246-243-195 Reporting. (1) In addition to the reporting requirements specified in other sections of the regulations, each licensee shall provide a written report to the department within thirty days of the occurrence of any of the following incidents involving radiographic equipment:

(a) Unintentional disconnection of the source assembly from the control cable.

(b) Inability to retract the source assembly to its fully shielded position and secure it in this position.

(c) Failure of any component (critical to safe operation of the device) to properly perform its intended function.

(2) The licensee shall include the following information in each report submitted under subsection (1) of the section.

(a) A description of the equipment problem;

(b) Cause of each incident, if known;

(c) Manufacturer and model number of equipment involved in the incident;

(d) Place, time, and date of incident;

(e) Actions taken to reestablish normal operations;

(f) Corrective actions taken or planned to prevent recurrence;

(g) Qualifications of personnel involved in the incident.

(3) Reports of overexposure submitted under WAC 246-221-260 which involve failure of safety components of radiographic equipment must also include the information specified in subsection (2) of this section.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-243-200 Records required at temporary job sites. Each licensee (~~or registrant~~) conducting (~~industrial radiography~~) radiographic operations at a temporary site shall have the following records available at that site for inspection by the department:

(1) Appropriate license;

(2) Operating and emergency procedures;

(3) Applicable regulations;

(4) Survey records required pursuant to WAC 246-243-190 for the period of operation at the site;

(5) Daily pocket dosimeter records for the period of operation at the site;

(6) The latest instrument calibration and leak test record for specific devices in use at the site.

NEW SECTION**WAC 246-243-205 Temporary job site notification.**

(1) Each licensee shall provide notification to the department as required by the department, preferably twenty-four hours but no later than two hours, prior to beginning radiographic operations at a temporary job site. The notification will be given by using the prescribed 1-800 telephone notification system. The notification shall include:

- (a) Name and office telephone number of the licensee;
- (b) Radioactive materials license number;
- (c) Address or directions to the temporary job site;
- (d) Specific date(s), time(s), and duration of expected radiographic operations;
- (e) Names of radiographers and, if applicable, radiographer assistants taking part in the radiographic operations; and
- (f) Name and telephone number of a contact person at the temporary job site.

(2) In the event that operations at a temporary job site continue for longer than thirty days, the licensee will renotify the department, as required by subsection (1) of this section, each succeeding month.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-243-210 Special requirements for enclosed radiography. (1) ~~((Systems for enclosed radiography designed to allow admittance of individuals during x-radiation generation shall:~~

~~(a) Comply with all applicable requirements of chapter 246-243 WAC and WAC 246-221-060 of these regulations.~~

~~(b) Be evaluated at intervals not to exceed one year to assure compliance with the applicable requirements as specified in (a) of this subsection. Records of these evaluations shall be maintained for inspection by the department for a period of two years after the evaluation.~~

~~(c) Interlocks are required on all enclosed radiographic systems, such that the exposure will terminate if a door or port accessible to individuals is opened during the exposure, except for those systems employing conveyor belts or sample ports.~~

~~(2) Cabinet x-ray)) Radiographic exposure device systems designed to exclude individuals during ((x-radiation)) radiography are exempt from the requirements of chapter 246-243 WAC except that:~~

~~(a) Operating personnel must be provided with either a film badge or a thermoluminescent dosimeter and reports of the results must be maintained for inspection by the department.~~

~~(b) No ((registrant)) licensee shall permit any individual to operate ((a cabinet x-ray)) radiographic exposure device systems until such individual has received a copy of and instruction in the operating procedures for the unit and has demonstrated competence in its use. Records which demonstrate compliance with this subparagraph shall be maintained for inspection by the department until disposition is authorized by the department.~~

~~(c) Tests for proper operation of high radiation area control devices or alarm systems, where applicable, must be conducted at the beginning of each day of use and recorded.~~

(d) The ((registrant)) licensee shall perform an evaluation, at intervals not to exceed one year, to determine conformance with WAC 246-221-060 of these regulations.

Records of these evaluations shall be maintained for inspection by the department for a period of ((two)) three years after the evaluation.

AMENDATORY SECTION (Amending Order 184, filed 7/24/91, effective 8/24/91)

WAC 246-243-220 Special requirements for permanent radiographic installation. Permanent radiographic installations having high radiation area entrance controls of the types described in WAC ((246-221-120-1)(e)(ii)) 246-221-102(1) or where the high radiation area is locked to protect against unauthorized or accidental entry, shall also meet the following special requirements.

(1) Each entrance that is used for personnel access to the high radiation area in a permanent radiographic installation to which this section applies shall have both visible and audible warning signals to warn of the presence of radiation. The visible signal shall be actuated by radiation whenever the source is exposed. The audible signal shall be actuated when an attempt is made to enter the installation while the source is exposed.

(2) Both visible and audible alarm systems are required and shall be tested prior to the first use of a source in the installation and thereafter at intervals not to exceed three months. Records of the tests shall be kept for ((two)) three years.

(3) The department shall review and approve, in advance of construction, plans for permanent radiographic installations whose construction had not commenced by the effective date of these regulations. Construction of the permanent facility shall be in accordance with the plans approved by the department.

(4) A physical radiation survey shall be conducted and results recorded following construction or major modification of the facility to be used in the installation. Radiography shall not be conducted if exposure levels in unrestricted areas are greater than 2 mR in any hour. Any increase in source strength will require resurvey of the installation prior to the conduct of industrial radiography.

AMENDATORY SECTION (Amending Order 121, filed 12/27/90, effective 1/31/91)

WAC 246-243-230 Appendix A—Minimum subjects to be covered in training radiographers. (1) *Fundamentals of radiation safety*

- (a) Characteristics of ionizing radiation
- (b) Units of radiation dose (mrem) and quantity of radioactivity (curie)
- (c) Hazards of exposure to radiation
 - (i) Radiation protection standards
 - (ii) Biological effects of radiation dose
 - (d) Levels of radiation from sources of radiation
 - (e) Methods of controlling radiation dose
 - (i) Working time
 - (ii) Working distances
 - (iii) Shielding
- (2) *Radiation detection instrumentation to be used*
 - (a) Use of radiation survey instruments

- (i) Operation
- (ii) Calibration
- (iii) Limitations
- (b) Survey techniques
- (c) Use of personnel monitoring equipment
- (i) Film badges
- (ii) Pocket dosimeters
- (iii) Thermoluminescent dosimeters
- (iv) Alarming rate meters

(3) Radiographic equipment to be used

- (a) Remote handling equipment
- (b) Radiographic exposure devices and sealed sources
- (c) Storage containers
- ~~((d) Operation and control of x-ray equipment))~~

(4) The requirements of pertinent federal and state regulations

(5) The licensee's ~~((or registrant's))~~ written operating and emergency procedures

- (6) Case histories of radiography accidents.

AMENDATORY SECTION (Amending Order 121, filed 12/27/90, effective 1/31/91)

WAC 246-243-240 Appendix B—General guidelines for inspection of radiography equipment. (1) Panoramic devices (devices in which the source is physically removed from shielded container during exposure) should be inspected for:

- (a) Radiographic exposure unit;
 - (i) Abnormal surface radiation levels anywhere on camera;
 - (ii) Condition of safety plugs;
 - (iii) Proper operation of locking mechanism;
 - (iv) Condition of pigtail connector;
 - (v) Alignment of "S" tube with exit port;
 - (vi) Condition of carrying device (straps, handle, etc.);
 - (vii) Proper labeling;
- (b) Source tube;
 - (i) Rust, corrosion, dirt, or sludge buildup inside the source tube;
 - (ii) Condition of source tube connector;
 - (iii) Condition of source stop;
 - (iv) Kinks or damage that could prevent proper operation;
- (c) Control cables and drive mechanism;
 - (i) Proper drive mechanism for this camera, if appropriate;
 - (ii) Changes in general operating characteristics;
 - (iii) Condition of connector on drive cable;
 - (iv) Drive cable flexibility, wear, and rust;
 - (v) Excessive wear or damage to crank assembly parts;
 - (vi) Damage to drive cable conduit that could prevent the cable from moving freely;
 - (vii) Connection of the control cable connector with the pigtail connector for proper mating;
 - (viii) Proper operation of source position indicator, if applicable.
- (2) Directional beam devices should be inspected for:
 - (a) Abnormal surface radiation;
 - (b) Changes in the general operating characteristics of the unit;
 - (c) Proper operation of shutter mechanism;

- (d) Chafing or binding of shutter mechanism;
- (e) Damage to the device which might impair its operation;
- (f) Proper operation of locking mechanism;
- (g) Proper drive mechanism with this camera, if appropriate;
- (h) Condition of carrying device (strap, handle, etc.);
- (i) Proper labeling.

AMENDATORY SECTION (Amending Order 187, filed 8/7/91, effective 9/7/91)

WAC 246-250-001 Purpose and scope. (1) The regulations in this chapter establish procedures, criteria, and terms and conditions upon which the department issues licenses for land disposal of low-level radioactive wastes received from other persons. (Applicability of the requirements in this chapter to department licenses for waste disposal facilities in effect on the effective date of this regulation will be determined on a case-by-case basis and implemented through terms and conditions of the license or by orders issued by the department.) The requirements of this chapter are in addition to, and not in substitution for, other applicable requirements of these regulations or other state regulations.

(2) The regulations in this chapter do not apply to disposal of ~~((by product material as defined in WAC 246-220-010 (7)(b)))~~ tailings or wastes produced by the extraction or concentration of uranium or thorium from any ore where the tailings or wastes result in quantities greater than 10,000 kilograms and containing more than 185 mega becquerels (five millicuries) of radium 226, or disposal of waste provided in WAC 246-221-070, 246-221-190, or 246-221-200.

(3) This chapter establishes procedural requirements and performance objectives applicable to any method of land disposal. It establishes specific technical requirements for near-surface disposal of radioactive waste which involves disposal in the uppermost portion of the earth.

AMENDATORY SECTION (Amending Order 187, filed 8/7/91, effective 9/7/91)

WAC 246-252-030 Criteria related to disposition of uranium mill tailings or wastes. As used in this section, the term "as low as reasonably achievable" has the same meaning as in WAC 246-220-007. The term by-product material ~~((has the same meaning as WAC 246-220-010 (6)(b)))~~ means the tailings or wastes produced by the extraction or concentration of uranium or thorium from any ore processed primarily for its source material content.

As required by WAC 246-235-110(6), each applicant for a license to possess and use source material in conjunction with uranium or thorium milling, or by-product material at sites formerly associated with such milling, is required to include in a license application proposed specifications relating to the milling operation and the disposition of tailings or waste resulting from such milling activities. This section establishes criteria relating to the siting, operation, decontamination, decommissioning, and reclamation of mills and tailings or waste systems and sites at which such mills and systems are located and site and by-product material ownership. Applications must clearly demonstrate how these

criteria have been addressed. The specifications shall be developed considering the expected full capacity of tailings or waste systems and the lifetime of mill operations. Where later expansions of systems or operations may be likely, the amenability of the disposal system to accommodate increased capacities without degradation in long-term stability and other performance factors shall be evaluated.

Licensees or applicants may propose alternatives to the specific requirements in these criteria. The alternative proposals may take into account local or regional conditions, including geology, topography, hydrology, and meteorology. The department may find that the proposed alternatives meet the department's requirements if the alternatives will achieve a level of stabilization and containment of the sites concerned, and a level of protection for public health, safety, and the environment from radiological and nonradiological hazards associated with the sites, which is equivalent to, to the extent practicable, or more stringent than the level which would be achieved by the requirements of the standards promulgated by the United States Environmental Protection Agency in 40 CFR 192, Subparts D and E.

(1) Criterion 1 - In selecting among alternative tailings disposal sites or judging the adequacy of existing tailings sites, the following site features which would contribute to meeting the broad objective of permanent isolation of the tailings and associated contaminants from man and the environment for one thousand years to the extent reasonably achievable, and in any case, for at least two hundred years without ongoing active maintenance shall be considered:

- (a) Remoteness from populated areas;
- (b) Hydrogeologic and other environmental conditions conducive to continued immobilization and isolation of contaminants from groundwater sources; and
- (c) Potential for minimizing erosion, disturbance, and dispersion by natural forces over the long term.

The site selection process must be an optimization to the maximum extent reasonably achievable in terms of these features.

In the selection of disposal sites, primary emphasis shall be given to isolation of tailings or wastes, a matter having long-term impacts, as opposed to consideration only of short-term convenience or benefits, such as minimization of transportation or land acquisition costs. While isolation of tailings will be a function of both site characteristics and engineering design, overriding consideration shall be given to siting features given the long-term nature of the tailings hazards.

Tailings shall be disposed in a manner such that no active maintenance is required to preserve the condition of the site.

(2) Criterion 2 - To avoid proliferation of small waste disposal sites, by-product material from in-situ extraction operations, such as residues from solution evaporation or contaminated control processes, and wastes from small remote above ground extraction operations shall be disposed at existing large mill tailings disposal sites; unless, considering the nature of the wastes, such as their volume and specific activity and the costs and environmental impacts of transporting the wastes to a large disposal site, such offsite disposal is demonstrated to be impracticable or the advantage of onsite burial clearly outweighs the benefits of reducing the perpetual surveillance obligations.

(3) Criterion 3 - The "prime option" for disposal of tailings is placement below grade, either in mines or specially excavated pits (that is, where the need for any specially constructed retention structure is eliminated).

The evaluation of alternative sites and disposal methods performed by mill operators in support of their proposed tailings disposal program (provided in applicants' environmental reports) shall reflect serious consideration of this disposal mode. In some instances, below grade disposal may not be the most environmentally sound approach, such as might be the case if a groundwater formation is relatively close to the surface or not very well isolated by overlying soils and rock. Also, geologic and topographic conditions might make full, below grade burial impracticable; for example, near-surface bedrock could create prominent excavation costs while more suitable alternate sites may be available. Where full below grade burial is not practicable, the size of the retention structures, and the size and steepness of slopes of associated exposed embankments, shall be minimized by excavation to the maximum extent reasonably achievable or appropriate, given the geologic and hydrogeologic conditions at a site. In these cases, it must be demonstrated that an above-grade disposal program will provide reasonably equivalent isolation of the tailings from natural erosional forces.

(4) Criterion 4 - The following site and design criteria shall be adhered to whether tailings or wastes are disposed of above or below grade:

(a) Upstream rainfall catchment areas must be minimized to decrease erosion potential and the size of the probable maximum flood which could erode or wash out sections of the tailings disposal area.

(b) Topographic features shall provide good wind protection.

(c) Embankment and cover slopes shall be relatively flat after final stabilization to minimize erosion potential and to provide conservative factors of safety assuring long-term stability. The broad objective should be to contour final slopes to grades which are as close as possible to those which would be provided if tailings were disposed of below grade; this could, for example, lead to slopes of about ten horizontal to one vertical (10h:1v) or less steep. In general, slopes should not be steeper than about 5h:1v. Where steeper slopes are proposed, reasons why a slope less steep than 5h:1v would be impracticable should be provided, and compensating factors and conditions which make such slopes acceptable should be identified.

(d) A fully self-sustaining vegetative cover shall be established or rock cover employed to reduce wind and water erosion to negligible levels.

Where a full vegetative cover is not likely to be self-sustaining due to climatic conditions, such as in semi-arid and arid regions, rock cover shall be employed on slopes of the impoundment system. The NRC will consider relaxing this requirement for extremely gentle slopes such as those which may exist on the top of the pile.

The following factors shall be considered in establishing the final rock cover design to avoid displacement of rock particles by human and animal traffic or by natural processes, and to preclude undercutting and piping:

(i) Shape, size, composition, gradation of rock particles (excepting bedding material, average particle size shall be at least cobble size or greater);

(ii) Rock cover thickness and zoning of particles by size; and

(iii) Steepness of underlying slopes.

(e) Individual rock fragments shall be dense, sound, and resistant to abrasion, and free from defects that would tend to unduly increase their destruction by water and frost actions. Weak, friable, or laminated aggregate shall not be used. Shale, rock laminated with shale, and cherts shall not be used.

Rock covering of slopes may not be required where top covers are on the order of ten meters or greater; impoundment slopes are on the order of 10h:1v or less; bulk cover materials have inherently favorable erosion resistance characteristics; and there is negligible drainage catchment area upstream of the pile, and there is good wind protection as described in (a) and (b) of this subsection.

(f) Impoundment surfaces shall be contoured to avoid areas of concentrated surface runoff or abrupt or sharp changes in slope gradient. In addition to rock cover on slopes, areas toward which surface runoff might be directed shall be well protected with substantial rock cover (riprap). In addition to providing for stability of the impoundment systems itself, the overall stability, erosion potential, and geomorphology of surrounding terrain shall be evaluated to assure that there are no processes, such as gully erosion, which would lead to impoundment instability.

(g) The impoundment shall not be located near a capable fault that could cause a maximum credible earthquake larger than that which the impoundment could reasonably be expected to withstand. As used in this criterion, the term "capable fault" has the same meaning as defined in Section III (g) of Appendix A of 10 CFR Part 100. The term "maximum credible earthquake" means that earthquake which would cause the maximum vibratory ground motion based upon an evaluation of earthquake potential considering the regional and local geology and seismology and specific characteristics of local subsurface material.

(h) The impoundment, where feasible, should be designed to incorporate features which will promote deposition of suspended particles. For example, design features which promote deposition of sediment suspended in any runoff which flows into the impoundment area might be utilized; the object of such a design feature would be to enhance the thickness of cover over time.

(5) Criterion 5 - Criteria 5(a) through 5(g) and new Criterion 13 incorporate the basic groundwater protection standards imposed by the United States Environmental Protection Agency in 40 CFR Part 192, Subparts D and E (48 FR 45926; October 7, 1983) which apply during operations and prior to the end of closure. Groundwater monitoring to comply with these standards is required by Criterion 7.

(a) The primary groundwater protection standard is a design standard for surface impoundments used to manage uranium and thorium by-product material. Surface impoundments (except for an existing portion) must have a liner that is designed, constructed, and installed to prevent any migration of wastes out of the impoundment to the adjacent

subsurface soil, groundwater, or surface water at any time during the active life (including the closure period) of the impoundment. The liner may be constructed of materials that may allow wastes to migrate into the liner (but not into the adjacent subsurface soil, groundwater, or surface water) during the active life of the facility, provided that impoundment closure includes removal or decontamination of all waste residues, contaminated containment system components (liners, etc.), contaminated subsoils, and structures and equipment contaminated with waste and leachate. For impoundments that will be closed with the liner material left in place, the liner must be constructed of materials that can prevent wastes from migrating into the liner during the active life of the facility.

(b) The liner required by (a) of this subsection must be:

(i) Constructed of materials that have appropriate chemical properties and sufficient strength and thickness to prevent failure due to pressure gradients (including static head and external hydrogeologic forces), physical contact with the waste or leachate to which they are exposed, climatic conditions, the stress of installation, and the stress of daily operation;

(ii) Placed upon a foundation or base capable of providing support to the liner and resistance to pressure gradients above and below the liner to prevent failure of the liner due to settlement, compression, or uplift; and

(iii) Installed to cover all surrounding earth likely to be in contact with the wastes or leachate.

(c) The applicant or licensee will be exempted from the requirements of (a) of this subsection if the department finds, based on a demonstration by the applicant or licensee, that alternate design and operating practices, including the closure plan, together with site characteristics will prevent the migration of any hazardous constituents into groundwater or surface water at any future time. In deciding whether to grant an exemption, the department will consider:

(i) The nature and quantity of the wastes;

(ii) The proposed alternate design and operation;

(iii) The hydrogeologic setting of the facility, including the attenuative capacity and thickness of the liners and soils present between the impoundment and groundwater or surface water; and

(iv) All other factors which would influence the quality and mobility of the leachate produced and the potential for it to migrate to groundwater or surface water.

(d) A surface impoundment must be designed, constructed, maintained, and operated to prevent overtopping resulting from normal or abnormal operations; overfilling; wind and wave actions; rainfall; run-on; from malfunctions of level controllers, alarms, and other equipment; and human error.

(e) When dikes are used to form the surface impoundment, the dikes must be designed, constructed, and maintained with sufficient structural integrity to prevent massive failure of the dikes. In ensuring structural integrity, it must not be presumed that the liner system will function without leakage during the active life of the impoundment.

(f) Uranium and thorium by-product materials must be managed to conform to the following secondary groundwater protection standard: Hazardous constituents entering the groundwater from a licensed site must not exceed the specified concentration limits in the uppermost aquifer beyond the point of compliance during the compliance

period. Hazardous constituents are those constituents identified by the department pursuant to (g) of this subsection. Specified concentration limits are those limits established by the department as indicated in (j) of this subsection. The department will also establish the point of compliance and compliance period on a site specific basis through license conditions and orders. The objective in selecting the point of compliance is to provide the earliest practicable warning that the impoundment is releasing hazardous constituents to the groundwater. The point of compliance must be selected to provide prompt indication of groundwater contamination on the hydraulically downgradient edge of the disposal area. The department must identify hazardous constituents, establish concentration limits, set the compliance period, and adjust the point of compliance, if needed, when the detection monitoring established under criterion 7 indicates leakage of hazardous constituents from the disposal area.

(g) A constituent becomes a hazardous constituent subject to (j) of this subsection when the constituent:

(i) Is reasonably expected to be in or derived from the by-product material in the disposal area;

(ii) Has been detected in the groundwater in the uppermost aquifer; and

(iii) Is listed in WAC 246-252-050 Appendix A.

(h) The department may exclude a detected constituent from the set of hazardous constituents on a site specific basis if it finds that the constituent is not capable of posing a substantial present or potential hazard to human health or the environment. In deciding whether to exclude constituents, the department will consider the following:

(i) Potential adverse effect on groundwater quality, considering —

(A) The physical and chemical characteristics of the waste in the licensed site, including its potential for migration;

(B) The hydrogeological characteristics of the facility and surrounding land;

(C) The quantity of groundwater and the direction of groundwater flow;

(D) The proximity and withdrawal rates of groundwater users;

(E) The current and future uses of groundwater in the area;

(F) The existing quality of groundwater, including other sources of contamination and their cumulative impact on the groundwater quality;

(G) The potential for health risks caused by human exposure to waste constituents;

(H) The potential damage to wildlife, crops, vegetation, and physical structures caused by exposure to waste constituents;

(I) The persistence and permanence of the potential adverse effects.

(ii) Potential adverse effects on hydraulically-connected surface water quality, considering —

(A) The volume and physical and chemical characteristics of the waste in the licensed site;

(B) The hydrogeological characteristics of the facility and surrounding land;

(C) The quantity and quality of groundwater, and the direction of groundwater flow;

(D) The patterns of rainfall in the region;

(E) The proximity of the licensed site to surface waters;

(F) The current and future uses of surface waters in the area and any water quality standards established for those surface waters;

(G) The existing quality of surface water, including other sources of contamination and the cumulative impact on surface water quality;

(H) The potential for health risks caused by human exposure to waste constituents;

(I) The potential damage to wildlife, crops, vegetation, and physical structures caused by exposure to waste constituents; and

(J) The persistence and permanence of the potential adverse effects.

(i) In making any determinations under (h) and (k) of this subsection about the use of groundwater in the area around the facility, the department will consider any identification of underground sources of drinking water and exempted aquifers made by the United States Environmental Protection Agency.

(j) At the point of compliance, the concentration of a hazardous constituent must not exceed —

(i) The department approved background concentration of that constituent in the groundwater;

(ii) The respective value given in the table in subsection (5)(l) of this section if the constituent is listed in the table and if the background level of the constituent is below the value listed; or

(iii) An alternate concentration limit established by the department.

(k) Conceptually, background concentrations pose no incremental hazards and the drinking water limits in (j)(i) of this subsection state acceptable hazards but these two options may not be practically achievable at a specific site. Alternate concentration limits that present no significant hazard may be proposed by licensees for department consideration. Licensees must provide the basis for any proposed limits including consideration of practicable corrective actions, that limits are as low as reasonably achievable, and information on the factors the department must consider.

The department will establish a site specific alternate concentration limit for a hazardous constituent as provided in (j) of this subsection if it finds that the constituent will not pose a substantial present or potential hazard to human health or the environment as long as the alternate concentration limit is not exceeded. In establishing alternate concentration limits, the department will apply its as low as reasonably achievable criterion in this chapter. The department will also consider the following factors:

(i) Potential adverse effects on groundwater quality, considering —

(A) The physical and chemical characteristics of the waste in the licensed site including its potential for migration;

(B) The hydrogeological characteristics of the facility and surrounding land;

(C) The quantity of groundwater and the direction of groundwater flow;

(D) The proximity and withdrawal rates of groundwater users;

(E) The current and future uses of groundwater in the area;

(F) The existing quality of groundwater, including other sources of contamination and their cumulative impact on the groundwater quality;

(G) The potential for health risks caused by human exposure to waste constituents;

(H) The potential damage to wildlife, crops, vegetation, and physical structures caused by exposure to waste constituents;

(I) The persistence and permanence of the potential adverse effects.

(ii) Potential adverse effects on hydraulically-connected surface water quality, considering —

(A) The volume and physical and chemical characteristics of the waste in the licensed site;

(B) The hydrogeological characteristics of the facility and surrounding land;

(C) The quantity and quality of groundwater, and the direction of groundwater flow;

(D) The patterns of rainfall in the region;

(E) The proximity of the licensed site to surface waters;

(F) The current and future uses of surface waters in the area and any water quality standards established for those surface waters;

(G) The existing quality of surface water including other sources of contamination and the cumulative impact on surface water quality;

(H) The potential for health risks caused by human exposure to waste constituents;

(I) The potential damage to wildlife, crops, vegetation, and physical structures caused by exposure to waste constituents; and

(J) The persistence and permanence of the potential adverse effects.

(I) MAXIMUM VALUES FOR GROUNDWATER PROTECTION:

| Constituent or Property | Maximum Concentration |
|--|-----------------------|
| | Milligrams per liter |
| Arsenic | 0.05 |
| Barium | 1.0 |
| Cadmium | 0.01 |
| Chromium | 0.05 |
| Lead | 0.05 |
| Mercury | 0.002 |
| Selenium | 0.01 |
| Silver | 0.05 |
| Endrin (1,2,3,4,10,10-hexachloro-1,7 -expoxy-1,4,4a,5,6,7,8,9a-octahydro-1, 4-endo, endo-5,8-dimethano naphthalene) | 0.0002 |
| Lindane (1,2,3,4,5,6-hexachlorocyclohexane, gamma isomer) | 0.004 |
| Methoxychlor (1,1,1-Trichloro-2,2-bis (p-methoxyphenylethane) | 0.1 |
| Toxaphene (C ₁₀ H ₁₀ Cl ₅ , Technical chlorinated camphene, 67-69 percent chlorine) | 0.005 |
| 2,4-D (2,4-Dichlorophenoxyacetic acid) | 0.1 |
| 2,4,5-TP Silvex (2,4,5-Trichlorophenoxypropionic acid) | 0.01 |

| | Picocuries per liter |
|--|----------------------|
| Combined radium - 226 and radium - 228 | 5 |
| Gross alpha - particle activity (excluding radon and uranium when producing uranium by-product material or thorium when producing thorium by-product material) | 15 |

(m) If the groundwater protection standards established under (f) of this subsection are exceeded at a licensed site, a corrective action program must be put into operation as soon as is practicable, and in no event later than eighteen months after the department finds that the standards have been exceeded. The licensee shall submit the proposed corrective action program and supporting rationale for department approval prior to putting the program into operation, unless otherwise directed by the department. The objective of the program is to return hazardous constituent concentration levels in groundwater to the concentration limits set as standards. The licensee's proposed program must address removing the hazardous constituents that have entered the groundwater at the point of compliance or treating them in place. The program must also address removing or treating in place any hazardous constituents that exceed concentration limits in groundwater between the point of compliance and the downgradient facility property boundary. The licensee shall continue corrective action measures to the extent necessary to achieve and maintain compliance with the groundwater protection standard. The department will determine when the licensee may terminate corrective action measures based on data from the groundwater monitoring program and other information that provide reasonable assurance that the groundwater protection standard will not be exceeded.

(n) In developing and conducting groundwater protection programs, applicants and licensees shall also consider the following:

(i) Installation of bottom liners (where synthetic liners are used, a leakage detection system must be installed immediately below the liner to ensure major failures are detected if they occur. This is in addition to the groundwater monitoring program conducted as provided in Criterion 7. Where clay liners are proposed or relatively thin, in-situ clay soils are to be relied upon for seepage control, tests must be conducted with representative tailings solutions and clay materials to confirm that no significant deterioration of permeability or stability properties will occur with continuous exposure of clay to tailings solutions. Tests must be run for a sufficient period of time to reveal any effects if they are going to occur (in some cases deterioration has been observed to occur rather rapidly after about nine months of exposure)).

(ii) Mill process designs which provide the maximum practicable recycle of solutions and conservation of water to reduce the net input of liquid to the tailings impoundment.

(iii) Dewatering of tailings by process devices and/or in-situ drainage systems (at new sites, tailings must be dewatered by a drainage system installed at the bottom of the impoundment to lower the phreatic surface and reduce the driving head of seepage, unless tests show tailings are not amenable to such a system. Where in-situ dewatering is to be conducted, the impoundment bottom must be graded to assure that the drains are at a low point. The drains must be protected by suitable filter materials to assure that drains

remain free running. The drainage system must also be adequately sized to assure good drainage).

(iv) Neutralization to promote immobilization of hazardous constituents.

(o) Where groundwater impacts are occurring at an existing site due to seepage, action must be taken to alleviate conditions that lead to excessive seepage impacts and restore groundwater quality. The specific seepage control and groundwater protection method, or combination of methods, to be used must be worked out on a site-specific basis. Technical specifications must be prepared to control installation of seepage control systems. A quality assurance, testing, and inspection program, which includes supervision by a qualified engineer or scientist, must be established to assure the specifications are met.

(p) In support of a tailings disposal system proposal, the applicant/operator shall supply information concerning the following:

(i) The chemical and radioactive characteristics of the waste solutions.

(ii) The characteristics of the underlying soil and geologic formations particularly as they will control transport of contaminants and solutions. This includes detailed information concerning extent, thickness, uniformity, shape, and orientation of underlying strata. Hydraulic gradients and conductivities of the various formations must be determined. This information must be gathered from borings and field survey methods taken within the proposed impoundment area and in surrounding areas where contaminants might migrate to groundwater. The information gathered on boreholes must include both geologic and geophysical logs in sufficient number and degree of sophistication to allow determining significant discontinuities, fractures, and channeled deposits of high hydraulic conductivity. If field survey methods are used, they should be in addition to and calibrated with borehole logging. Hydrologic parameters such as permeability may not be determined on the basis of laboratory analysis of samples alone; a sufficient amount of field testing (e.g., pump tests) must be conducted to assure actual field properties are adequately understood. Testing must be conducted to allow estimating chemi-sorption attenuation properties of underlying soil and rock.

(iii) Location, extent, quality, capacity and current uses of any groundwater at and near the site.

(q) Steps must be taken during stockpiling of ore to minimize penetration of radionuclides into underlying soils; suitable methods include lining and/or compaction of ore storage areas.

(6) Criterion 6 - (a) In cases where waste by-product material is to be permanently disposed, an earthen cover shall be placed over tailings or wastes at the end of the milling operations and the waste disposal area shall be closed in accordance with a design¹ which shall provide reasonable assurance of control of radiological hazard to:

(i) Be effective for one thousand years, to the extent reasonably achievable, and, in any case, for at least two hundred years; and

(ii) Limit releases of Radon-222 from uranium by-product materials, and Radon-220 from thorium by-product materials, to the atmosphere so as to not exceed an average² release rate of twenty picocuries per square meter per second ($\text{pCi}/\text{m}^2\text{s}$) to the extent practicable throughout the effective

design life determined pursuant to (a)(i) of this subsection. In computing required tailings cover thicknesses, moisture in soils in excess of amounts found normally in similar soils in similar circumstances shall not be considered. Direct gamma exposure from the tailings or wastes should be reduced to background levels. The effects of any thin synthetic layer shall not be taken into account in determining the calculated radon exhalation level. If nonsoil materials are proposed as cover materials, it must be demonstrated that such materials will not crack or degrade by differential settlement, weathering, or other mechanism over long term time intervals.

(b) Near surface materials (i.e., within the top three meters) shall not include mine waste or rock that contains elevated levels of radium; soils used for near surface cover must be essentially the same, as far as radioactivity is concerned, as that of surrounding soils. This is to insure that surface radon exhalation is not significantly above background because of the cover material itself.

(c) The design requirements in this criterion for longevity and control of radon releases shall apply to any portion of a licensed and/or disposal site unless such portion contains a concentration of radium in land, averaged over areas of one hundred square meters, which, as a result of by-product material does not exceed the background level by more than:

(i) Five picocuries per gram (pCi/g) of Radium-226, or, in the case of thorium by-product material, Radium-228, averaged over the first fifteen centimeters below the surface; and

(ii) Fifteen pCi/g of Radium-226, or, in the case of thorium by-product material, Radium-228, averaged over fifteen centimeters thick layers more than fifteen centimeters below the surface.

(d) The licensee must also address the nonradiological hazards associated with the wastes in planning and implementing closure. The licensee shall ensure that disposal areas are closed in a manner that minimizes the need for further maintenance. To the extent necessary to prevent threats to human health and the environment, the license shall control, minimize, or eliminate post-closure escape of nonradiological hazardous constituents, leachate, contaminated rainwater, or waste decomposition products to the ground or surface waters or to the atmosphere.

Footnotes:

¹ The standard applies to design. Monitoring for radon after installation of an appropriately designed cover is not required.

² This average shall apply to the entire surface of each disposal area over periods of at least one year, but short compared to one hundred years. Radon will come from both uranium by-product materials and from covering material. Radon emissions from covering materials should be estimated as part of developing a closure plan for each site. The standard, however, applies only to emissions from by-product materials to the atmosphere.

(7) Criterion 7 - At least one full year prior to any major site construction, a preoperational monitoring program must be conducted to provide complete baseline data on a milling site and its environs. Throughout the construction and operating phases of the mill, an operational monitoring program must be conducted to complete the following:

(a) To measure or evaluate compliance with applicable standards and regulations;

(b) To evaluate performance of control systems and procedures;

- (c) To evaluate environmental impacts of operation; and
 (d) To detect potential long-term effects.

The licensee shall establish a detection monitoring program needed for the department to set the site-specific groundwater protection standards in Criterion 5 of this section. For all monitoring under this paragraph, the licensee or applicant will propose for department approval as license conditions, which constituents are to be monitored on a site-specific basis. A detection monitoring program has two purposes. The initial purpose of the program is to detect leakage of hazardous (~~constituents~~) constituents from the disposal area so that the need to set groundwater protection standards is monitored. If leakage is detected, the second purpose of the program is to generate data and information needed for the department to establish the standards under Criterion 5. The data and information must provide a sufficient basis to identify those hazardous constituents which require concentration limit standards and to enable the department to set the limits for those constituents and the compliance period. They may also need to provide the basis for adjustments to the point of compliance. For licenses in effect September 30, 1983, the detection monitoring programs must have been in place by October 1, 1984. For licenses issued after September 30, 1983, the detection monitoring programs must be in place when specified by the department in orders or license conditions. Once groundwater protection standards have been established pursuant to Criterion 5, the licensee shall establish and implement a compliance monitoring program. The purpose of the compliance monitoring program is to determine that the hazardous constituent concentrations in ground water continue to comply with the standards set by the department. In conjunction with a corrective action program, the licensee shall establish and implement a corrective action monitoring program. The purpose of the corrective action monitoring program is to demonstrate the effectiveness of the corrective actions. Any monitoring program required by this paragraph may be based on existing monitoring programs to the extent the existing programs can meet the stated objective for the program.

(8) Criterion 8 - Milling operations shall be conducted so that all airborne effluent releases are reduced to as low as is reasonably achievable. The primary means of accomplishing this shall be by means of emission controls. Institutional controls, such as extending the site boundary and exclusion area, may be employed to ensure that offsite exposure limits are met, but only after all practicable measures have been taken to control emissions at the source. Notwithstanding the existence of individual dose standards, strict control of emissions is necessary to assure that population exposures are reduced to the maximum extent reasonably achievable and to avoid site contamination. The greatest potential sources of offsite radiation exposure (aside from radon exposure) are dusting from dry surfaces of the tailings disposal area not covered by tailings solution and emissions from yellowcake drying and packaging operations. During operations and prior to closure, radiation doses from radon emissions from surface impoundments shall be kept as low as is reasonably achievable. Checks shall be made and logged hourly of all parameters (e.g., differential pressure and scrubber water flow rate) which determine the efficiency of yellowcake stack emission control equipment operation.

It shall be determined whether or not conditions are within a range prescribed to ensure that the equipment is operating consistently near peak efficiency; corrective action shall be taken when performance is outside of prescribed ranges. Effluent control devices shall be operative at all times during drying and packaging operations and whenever air is exhausting from the yellowcake stack.

Drying and packaging operations shall terminate when controls are inoperative. When checks indicate the equipment is not operating within the range prescribed for peak efficiency, actions shall be taken to restore parameters to the prescribed range. When this cannot be done without shutdown and repairs, drying and packaging operations shall cease as soon as practicable.

Operations may not be restarted after cessation due to off-normal performance until needed corrective actions have been identified and implemented. All such cessations, corrective actions, and restarts shall be reported to the department in writing, within ten days of the subsequent restart.

To control dusting from tailings, that portion not covered by standing liquids shall be wetted or chemically stabilized to prevent or minimize blowing and dusting to the maximum extent reasonably achievable. This requirement may be relaxed if tailings are effectively sheltered from wind, such as may be the case where they are disposed of below grade and the tailings surface is not exposed to wind. Consideration shall be given in planning tailings disposal programs to methods which would allow phased covering and reclamation of tailings impoundments since this will help in controlling particulate and radon emissions during operation. To control dustings from diffuse sources, such as tailings and ore pads where automatic controls do not apply, operators shall develop written operating procedures specifying the methods of control which will be utilized.

Milling operations producing or involving thorium by-product material shall be conducted in such a manner as to provide reasonable assurance that the annual dose equivalent does not exceed twenty-five millirems to the whole body, seventy-five millirems to the thyroid, and twenty-five millirems to any other organ of any member of the public as a result of exposures to the planned discharge of radioactive materials, Radon-220 and its daughters excepted, to the general environment.

Uranium and thorium by-product materials shall be managed so as to conform to the applicable provisions of Title 40 of the Code of Federal Regulations, Part 440, Ore Mining and Dressing Point Source Category: Effluent Limitations Guidelines and New Source Performance Standards, Subpart C, Uranium, Radium, and Vanadium Ores Subcategory, as codified on January 1, 1983.

The licensee shall establish a detection monitoring program needed to establish the groundwater protection standards in subsection (5)(f) of this section. A detection monitoring program has two purposes. The initial purpose of the program is to detect leakage of hazardous constituents from the disposal area so that the need to set groundwater protection standards is monitored. If leakage is detected, the second purpose of the program is to generate data and information needed for the department to establish the standards under subsection (5)(f) of this section. The data and information must provide a sufficient basis to identify

those hazardous constituents which require concentration limit standards and to enable the department to set the limits for those constituents and the compliance period. They may also need to provide the basis for adjustments to the point of compliance. For licenses in effect September 30, 1983, the detection monitoring programs must have been in place by October 1, 1984. For licenses issued after September 30, 1983, the detection monitoring programs must be in place when specified by the department in orders or license conditions. Once groundwater protection standards have been established pursuant to subsection (5)(f) of this section, the licensee shall establish and implement a compliance monitoring program. The purpose of the compliance monitoring program is to determine that the hazardous constituent concentrations in groundwater continue to comply with the standards set by the department. In conjunction with a corrective action program, the licensee shall establish and implement a corrective action monitoring program. The purpose of the corrective action monitoring program is to demonstrate the effectiveness of the corrective actions. Any monitoring program required by this paragraph may be based on existing monitoring programs to the extent the existing programs can meet the stated objective for the program.

Daily inspections of tailings or waste retention systems must be conducted by a qualified engineer or scientist and documented. The department must be immediately notified of any failure in a tailings or waste retention system which results in a release of tailings or waste into unrestricted areas, and/or of any unusual conditions (conditions not contemplated in the design of the retention system) which if not corrected could indicate the potential or lead to failure of the system and result in a release of tailings or waste into unrestricted areas.

(9) Criterion 9 - (a) Pursuant to chapter 70.121 RCW, and except as otherwise provided, financial surety arrangements for site reclamation and long-term surveillance and control which may consist of surety bonds, cash deposits, certificates of deposit, deposits of government securities, irrevocable letters or lines of credit, or any combination of the above, or other arrangements approved by the department, milling operations shall be established for source material to ensure the protection of the public health and safety in the event of abandonment, default, or other inability of the licensee to meet the requirements of the act and these regulations.

(i) The amount of funds to be ensured by such surety arrangements shall be based on department-approved cost estimates.

(ii) Self-insurance, or any arrangement which essentially constitutes self-insurance (e.g., a contract with a state or federal agency), will not satisfy the surety requirement, since this provides no additional assurance other than that which already exists through license requirements.

(b) The arrangements required in (a) of this subsection shall be established prior to commencement of operations to assure that sufficient funds will be available to carry out decontamination and decommissioning of the facility.

(c) Amendments to licenses in effect on the effective date of this regulation may be issued, providing that the required surety arrangements are established within ninety days after the effective date of this subsection.

(d) For source material milling operations, the amount of funds to be ensured by such surety arrangements shall be based on department-approved cost estimates in an approved plan for (i) decontamination and decommissioning of mill buildings and the milling site to levels which would allow unrestricted use of these areas upon decommissioning, and (ii) the reclamation of tailings and/or waste disposal areas in accordance with the technical criteria delineated in this section. The licensee shall submit this plan in conjunction with an environmental report that addresses the expected environmental impacts of the milling operation, decommissioning and tailings reclamation, and evaluates alternatives for mitigating these impacts. In addition, the surety shall cover the payment of the charge for long-term surveillance and control required by the department. In establishing specific surety arrangements, the licensee's cost estimates shall take into account total costs that would be incurred if an independent contractor were hired to perform the decommissioning and reclamation work. In order to avoid unnecessary duplication and expense, the department may accept financial sureties that have been consolidated with financial or surety arrangements established to meet requirements of other federal or state agencies and/or local governing bodies for such decommissioning, decontamination, reclamation, and long-term site surveillance, provided such arrangements are considered adequate to satisfy these requirements and that portion of the surety which covers the decommissioning and reclamation of the mill, mill tailings site and associated areas, and the long-term funding charge is clearly identified and committed for use in accomplishing these activities. The licensee's surety mechanism will be reviewed annually by the department to assure that sufficient funds will be available for completion of the reclamation plan if the work had to be performed by an independent contractor. The amount of surety liability should be adjusted to recognize any increases or decreases resulting from inflation, changes in engineering plans, activities performed, and any other conditions affecting costs. Regardless of whether reclamation is phased through the life of the operation or takes place at the end of operations, an appropriate portion of surety liability shall be retained until final compliance with the reclamation plan is determined. This will yield a surety that is at least sufficient at all times to cover the costs of decommissioning and reclamation of the areas that are expected to be disturbed before the next license renewal. The term of the surety mechanism must be open ended, unless it can be demonstrated that another arrangement would provide an equivalent level of assurance. This assurance could be provided with a surety instrument which is written for a specific period of time (e.g., five years), yet which must be automatically renewed unless the surety notifies the beneficiary (the state regulatory agency) and the principal (the licensee) some reasonable time (e.g., ninety days) prior to the renewal date of their intention not to renew. In such a situation, the surety requirement still exists and the licensee would be required to submit an acceptable replacement surety within a brief period of time to allow at least sixty days for the department to collect.

Proof of forfeiture must not be necessary to collect the surety so that in the event that the licensee could not provide an acceptable replacement surety within the required time, the surety shall be automatically collected prior to its

expiration. The conditions described above would have to be clearly stated on any surety instrument which is not open-ended and must be agreed to by all parties.

Long-term care requirements. Pursuant to chapter 70.121 RCW, and as otherwise provided in WAC 246-235-080 (6)(d), a long-term care trust fund shall be established by source material milling licensees prior to the issuance of the license.

(10) Criterion 10 - (a) A minimum charge of two hundred fifty thousand dollars (1978 United States dollars) accrued as specified in WAC 246-235-080 (6)(d) to cover the costs of long-term surveillance shall be paid by each mill operator to the agency prior to the termination of a uranium or thorium mill license. If site surveillance or control requirements at a particular site are determined, on the basis of a site-specific evaluation, to be significantly greater than those specified in (a) of this subsection (e.g., if fencing is determined to be necessary), variance in funding requirements may be specified by the department. The total charge to cover the costs of long-term surveillance shall be such that, with an assumed one percent annual real interest rate, the collected funds will yield interest in an amount sufficient to cover the annual costs of site surveillance. The charge will be adjusted annually prior to actual payments to recognize inflation. The inflation rate to be used is that indicated by the change in the consumer price index published by the United States Department of Labor, Bureau of Labor Statistics. Contributions by a licensee to the long-term care trust fund pursuant to chapter 70.121 RCW shall be transferred to cover the costs assessed under this criterion.

(11) Criterion 11 - These criteria relating to ownership of tailings and their disposal sites become effective on November 8, 1981, and apply to all licenses terminated, issued, or renewed after that date.

Any uranium or thorium milling license or tailings license shall contain such terms and conditions as the United States Nuclear Regulatory Commission determines necessary to assure that prior to termination of the license, the licensee will comply with ownership requirements of this criterion for sites used for tailings disposal.

Title to the by-product material licensed pursuant to WAC 246-252-030 and land, including any interests therein (other than land owned by the United States or by the state of Washington) which is used for the disposal of any such by-product material, or is essential to ensure the long-term stability of such disposal site, shall be transferred to the United States or the state of Washington. In view of the fact that physical isolation must be the primary means of long term control, and government land ownership is a desirable supplementary measure, ownership of certain severable subsurface interests (for example, mineral rights) may be determined to be unnecessary to protect the public health and safety and the environment. In any case, the applicant/operator must demonstrate a serious effort to obtain such subsurface rights, and must, in the event that certain rights cannot be obtained, provide notification in local public land records of the fact that the land is being used for the disposal of radioactive material and is subject to either a United States Nuclear Regulatory Commission general or specific license prohibiting the disruption and disturbance of the tailings. In some rare cases, such as may occur with deep burial where no ongoing site surveillance will be

required, surface land ownership transfer requirements may be waived. For licenses issued before November 8, 1981, the United States Nuclear Regulatory Commission may take into account the status of the ownership of such land, and interests therein, and the ability of a licensee to transfer title and custody thereof to the United States or the state. If the United States Nuclear Regulatory Commission, subsequent to title transfer, determines that use of the surface or subsurface estates, or both, of the land transferred to the United States or to a state will not endanger the public health, safety, welfare or environment, the United States Nuclear Regulatory Commission may permit the use of the surface or subsurface estates, or both, of such land in a manner consistent with the provisions provided in these criteria. If the United States Nuclear Regulatory Commission permits such use of such land, it will provide the person who transferred such land with the right of first refusal with respect to such use of such land.

Material and land transferred to the United States or a state in accordance with this criterion must be transferred without cost to the United States or a state other than administrative and legal costs incurred in carrying out such transfer.

The provisions of this part, respecting transfer of title and custody to land and tailings and wastes, do not apply in the case of lands held in trust by the United States for any Indian tribe, or lands owned by such Indian tribe subject to a restriction against alienation imposed by the United States. In the case of such lands which are used for the disposal of byproduct material, as defined in this section, the licensee shall enter into arrangements with the United States Nuclear Regulatory Commission as may be appropriate to assure the long-term surveillance of such lands by the United States.

(12) Criterion 12 - The final disposition of tailings or wastes at milling sites should be such that ongoing active maintenance is not necessary to preserve isolation. As a minimum, annual site inspections must be conducted by the government agency retaining ultimate custody of the site where tailings or wastes are stored, to confirm the integrity of the stabilized tailings or waste systems, and to determine the need, if any, for maintenance and/or monitoring. Results of the inspection must be reported to the United States Nuclear Regulatory Commission within sixty days following each inspection. The United States Nuclear Regulatory Commission may require more frequent site inspections if, on the basis of a site-specific evaluation, such a need appears necessary, due to the features of a particular tailings or waste disposal system.

(13) Criterion 13 - Secondary groundwater protection standards required by Criterion 5 of this section are concentration limits for individual hazardous constituents. The list of constituents found in Appendix A of this chapter, chapter 246-252 WAC, identifies the constituents for which standards must be set and complied with if the specific constituent is reasonably expected to be in or derived from the by-product material and has been detected in groundwater. For purposes of this criterion, the property of gross alpha activity will be treated as if it is a hazardous constituent. Thus, when setting standards under subsection (5)(j) of this section, the department will also set a limit for gross alpha activity.

WSR 94-01-074
PERMANENT RULES
OFFICE OF THE
SECRETARY OF STATE
 (Corporations Division)

[Filed December 9, 1993, 4:04 p.m., effective January 10, 1994]

Date of Adoption: December 9, 1993.

Purpose: To establish the same, single fee for all service of process.

Citation of Existing Rules Affected by this Order: Amending WAC 434-110-075 (amending WSR 93-20-072, filed October 1, 1993).

Statutory Authority for Adoption: Chapters 34.05 and 43.07 RCW and Title 23B, 24 and 46 RCW.

Other Authority: Chapter 269, Laws of 1993.

Pursuant to notice filed as WSR 93-22-091 on November 2, 1993.

Changes Other than Editing from Proposed to Adopted Version: To set fee for service of process on the Secretary of State.

Effective Date of Rule: January 10, 1994.

December 9, 1993
 Donald F. Whiting
 Assistant Secretary of State

AMENDATORY SECTION (Amending WSR 93-20-072, filed 10/1/93)

WAC 434-110-075 Miscellaneous fees. (1) For photocopies, fees are as follows:

- (a) Each annual report, five-dollars;
 - (b) Articles of incorporation or any single document, ten dollars;
 - (c) Amendments to articles and mergers, twenty dollars;
 - (d) All charter documents, thirty dollars;
 - (e) Surcharge for files exceeding one hundred pages of copy, thirteen dollars for each fifty page increment (number of pages determined by weight of copies);
- (2) For certificates of existence fees are as follows:
- (a) With complete historical data, under embossed seal, thirty-dollars;
 - (b) Computer generated, under embossed seal, twenty-dollars;
 - (c) Duplicate certificate, under gold or embossed seal, twenty dollars.
- (3) For each certified copy of any document the fee is ten-dollars plus the copy fee.
- (4) For any service of process the fee is fifty dollars.

WSR 94-01-076
PERMANENT RULES
DEPARTMENT OF AGRICULTURE
 [Filed December 10, 1993, 8:50 a.m.]

Date of Adoption: December 10, 1993.

Purpose: To add five weeds to the state noxious weed list, and to amend the regions of mandatory control of Class B weeds.

Citation of Existing Rules Affected by this Order: Amending WAC 16-750-011 and 16-750-015.

Statutory Authority for Adoption: Chapter 17.10 RCW. Pursuant to notice filed as WSR 93-20-101 on October 5, 1993.

Changes Other than Editing from Proposed to Adopted Version: A proposed addition to the Class B list, saltcedar, was moved to the Class C list. A proposed addition to the Class C list, reed canarygrass, was removed.

Effective Date of Rule: Thirty-one days after filing.
 December 10, 1993

Ray H. Fann, Chairman
 Noxious Weed Control Board

AMENDATORY SECTION (Amending WSR 93-01-004, filed 12/2/92, effective 1/2/93)

WAC 16-750-011 State noxious weed list—Class B noxious weeds.

| Name | Will be a "Class B designate" in all lands lying within: |
|---|---|
| (1) blackgrass <i>Alopecurus myosuroides</i> | (a) regions 1,2,3,5,6,8,9,10 (b) Ferry, Stevens, Pend Oreille counties of region 4 (c) Adams County of region 7. |
| (2) blueweed <i>Echium vulgare</i> | (a) regions 1,2,3,4,5,6,8,9,10 (b) region 7 except for an area starting at the Stevens County line on SR 291 south to the SR 291 bridge over the Little Spokane River, thence upstream along the Little Spokane River to the first Rutter Parkway Bridge; thence south along the Rutter Parkway to the intersection of Rutter Parkway and Indian Trail Road; thence southerly along Indian Trail Road to a point three miles south (on section line between sections 22 and 27, T-26N, R-42E); thence due west to a point intersecting the line between Ranges 41 and 42; thence north along this line to a point 1/4 mile south of Charles Road; thence northwesterly parallel to Charles Road to a point 1/4 miles south of the intersection of Charles Road and West Shore Road; thence northerly along West Shore Road to the Spokane River (Long Lake); thence southeasterly along the Spokane River to the point of beginning. |
| (3) broom, Scotch <i>Cytisus scoparius</i> | (a) regions 3,4,6,7,9,10. |
| (4) bryony, white <i>Bryonia alba</i> | (a) regions 1,2,3,4,5,6,8,9 (b) region 7 except Whitman County (c) Franklin County of region 10. |
| (5) bugloss, common <i>Anchusa officinalis</i> | (a) regions 1,2,3,5,6,8,9,10 (b) region 4 except Stevens and Spokane counties (c) Lincoln, Adams, and Whitman counties of region 7. |
| (6) bugloss, annual <i>Anchusa arvensis</i> | (a) regions 1,2,3,4,5,6,8,9 (b) Lincoln and Adams counties (c) Whitman County except ranges 43 through 46 East of Townships 16 through 20 North. |
| (7) camelthorn <i>Alhagi pseudalhagi</i> | (a) regions 1,2,3,4,5,7,8,9 (b) region 6 except those portions of Sections 23,24,25, and 29 through 36, T16N, R27E, W.M. lying outside Intercountry Weed District No. 52 and except Sections 1 through 12, T15N, R27E, W.M. in Grant County (c) Franklin, Columbia, Garfield, and Asotin counties of region 10 (d) an area beginning at the Washington — Oregon border at the southwest portion of section 15, R32E, T6N, then north to the northwest corner of section 3, R32E, |

PERMANENT

- T7N, then east to the northeast corner of section 3, R36E, T7N, then south to southeast portion of section 15, R36E, T6N, at the Washington — Oregon border, then west along the Washington — Oregon border to the point of beginning.
- (8) catsear, common
Hypochaeris radicata
- (9) Cordgrass, smooth
Spartina alterniflora
- (10) cordgrass, common
Spartina anglica
- (11) daisy, oxeeye
Chrysanthemum leucanthemum
- (12) deadnettle, hybrid
Lamium hybridum
- (13) elodea, Brazilian
Egeria densa
- (14) fieldcress, Austrian
Rorippa austriaca
- (15) gorse
Ulex europaeus
- (16) hawkweed, orange
Hieracium aurantiacum
- (17) hawkweed, yellow
Hieracium pratense
- (18) hedge parsley
Torilis arvensis
- (19) indigobush
Amorpha fruticosa
- (20) knapweed, black
Centaurea nigra
- (21) knapweed, brown
Centaurea jacea
- (22) knapweed, diffuse
Centaurea diffusa
- (23) knapweed, meadow
Centaurea jacea x nigra
- (24) knapweed, Russian
Acroptilon repens
- (25) knapweed, spotted
Centaurea maculosa
- (26) lepyrodiclis
Lepydodictis holsteoides
- (27) loosestrife, garden
Lysimachia vulgaris
- (28) loosestrife, purple
Lythrum salicaria
- (29) loosestrife, wand
Lythrum virgatum
- (30) nutsedge, yellow
Cyperus esculentus
- (a) regions 3,4,6,7,9,10.
- (a) regions 1,3,4,5,6,7,9,10
- (b) region 2 except bays and estuaries of Skagit County
- (c) region 8 except bays and estuaries of Pacific County.
- (a) regions 1,3,4,5,6,7,8,9,10
- (b) region 2 except bays and estuaries of Skagit, Island, and Snohomish counties.
- (a) regions 7,10((-))
- (b) region 9 except those areas lying within Klickitat and Yakima counties west of Range 13 East((-))
- (c) region 6 except those areas lying within Yakima and Kittitas counties west of Range 13 E.
- (a) regions 1,3,4,5,6,7,8,9,10
- (b) region 2 except Skagit County.
- (a) regions 3,4,6,7,9,10.
- (a) regions 1,2,3,4,5,6,8,9
- (b) regions 7 and 10 except within the Palouse River Canyon from Big Palouse Falls to the Snake River.
- (a) regions 3,4,6,7,9,10
- (b) Skagit County of region 2
- (c) Thurston and Pierce counties of region 5
- (d) Wahkiakum and Cowlitz counties of region 8.
- (a) regions 3,6,9,10
- (b) Ferry County of region 4
- (c) Thurston County of region 5
- (d) Lincoln and Adams counties of region 7.
- (a) regions 1,2,3,5,6,7,8,9,10
- (b) region 4 except north of T32N in Pend Oreille County and east Highway 395 and north of Highway 20 in Stevens County.
- (a) regions 1,2,3,4,5,6,7,8,10
- (b) Yakima, Benton, Franklin counties
- (c) Klickitat County except those lands lying within T4N, R10E, R11E, R12E, R13E, R14E; T3N, R10E, R11E, R12E, R13E; T2N, R12E, R13E.
- (a) regions 1,2,3,4,5,6
- (b) regions 7 and 10 except within 200 feet of the Snake River from Central Ferry downstream
- (c) regions 8, 9, and 10 except within 200 feet of the Columbia River.
- (a) regions 1,2,3,4,5,7,9,10
- (b) region 6 except Kittitas County
- (c) region 8 except Clark County.
- (a) regions 1,2,3,4,5,7,9,10
- (b) region 6 except Kittitas County
- (c) region 8 except Clark County.
- (a) regions 1,2,5,8
- (b) Grant County lying in Townships 13 through 16 North, Ranges 25 through 27 East; Townships 17 and 18 N., Ranges 25 through 30 East; Townships 19 and 20 North, Ranges 29 and 30 East; T21N, R23E, Sections 1 through 30; T21N, R26E., Sections 5,6,7,8,17, and 18; East 1/2 Township 21N, Range 27E.; T21N, Ranges 28 through 30 E; those portions of Townships 22 through 28N, Ranges 28 through 30 E.; those portions of Township 22 through 28N., Ranges 23 through 30 E. lying in Grant County; all W.M.
- (c) Adams County except those areas within T15N, R36E, Section 36; T15N, R37E, Sections 22,26,27,28,31,32,33 and 34; T15N, R37E, western half of Sections 23, 24 and 25; T15N, R38E, Sections 2,10, 11,14,15,19 and 20; T16N, R38E, Sections 34 and 35; T17N, R37E, Sections 5 and 6
- (d) Franklin County of regions 9 and 10.
- (a) regions 1,2,3,4,5,7,9,10
- (b) region 6 except Kittitas County
- (c) region 8 except Clark County.
- (a) regions 1,2,5,7,8
- (b) region 4 except that area lying within the boundaries of the Colville Indian Reservation within Ferry County
- (c) Adams County of region 6
- (d) Intercounty Weed District No. 52
- (e) region 10 except Franklin County.
- (a) regions 1,2,3,5,6,8,9
- (b) Ferry County of region 4
- (c) Adams and Whitman counties of region 7
- (d) region 10 except Garfield County.
- (a) regions 1,2,3,4,5,6,8,9,10
- (b) region 7 except an area within Whitman County east of the Pullman — Wawawai Road from Wawawai to Pullman and south of State Highway 270 from Pullman to Moscow, Idaho.
- (a) regions 1,2,3,4,6,7,8,9,10
- (b) region 5 except King County.
- (a) regions 1,4,7,8
- (b) region 2 except Snohomish County
- (c) region 3 except within 100 feet of the ordinary highwater mark of the Okanogan River from the Canadian border south to Riverside
- (d) region 5 except King County
- (e) region 6 except that portion of Grant County lying northerly of the Frenchmen Hills-O'Sullivan Dam Road, southerly of Highway Interstate 90, easterly of the section line of the location of County Road J SW/NW if constructed and westerly of the section line of the location of County Road H SE/NE if constructed
- (f) region 9 except Benton County
- (g) region 10 except Walla Walla County
- (h) Intercounty Weed Districts No. 51 and No. 52.
- (a) regions 1,4,7,8
- (b) region 2 except Snohomish County
- (c) region 3 except within 100 feet of the ordinary highwater mark of the Okanogan River from the Canadian border south to Riverside
- (d) region 5 except King County
- (e) region 6 except that portion of Grant County lying northerly of the Frenchmen Hills-O'Sullivan Dam Road, southerly of Highway Interstate 90, easterly of the section line of the location of County Road J SW/NW if constructed and westerly of the section line of the location of County Road H SE/NE if constructed
- (f) region 9 except Benton County
- (g) region 10 except Walla Walla County
- (h) Intercounty Weed Districts No. 51 and No. 52.
- (a) regions 1,2,3,4,5,7,8
- (b) region 6 except((-)) those areas lying between State Highway 26 and State Highway 28, and westerly of Dodson Road in Grant County, and except S 1/2, Sec. 2, T20N, R25E., W.M.
- (c) region 9 except:
- (i) except those areas lying within the following boundary description within Yakima County: Beginning at the intersection of Highway 12 and Parker Heights Road and continuing easterly to Konnowac

Pass Road follow said road north to the intersection of Konnowac Pass Road and Nightingale Road. The northern boundary shall be the Roza Canal, continuing from the established point at Nightingale Road. The boundaries will follow the Roza Canal easterly to the County Line Road. The east boundaries will be the Yakima/Benton County Line from a point beginning at the County Line and Highway 22 (near Byron) continuing westerly along Highway 22 (to near the city of Mabton) to the intersection of Highway 22 and the Reservation Boundary (Division Road) and continuing north to the Yakima River. Then it will follow the river northwest to the Wapato-Donald Road continuing north along said road to Highway 12 then Highway 12 to Parker Heights Road.

- (31) oxtongue, hawkweed
Picris hieracioides
- (32) parrot feather
Myriophyllum brasiliense
- (33) pepperweed, perennial
Lepidium latifolium

- ((33)) (34) ragwort, tansy
Senecio jacobaea

- ((34)) (35) sandbur, longspine
Cenchrus longispinus

- ((35)) (36) skeletonweed, rush
Chondrilla juncea

- (ii) an area lying southerly of State Route 4 and within T2N, Ranges 13 and 14 E of Klickitat County

- (d) region 10 except Walla Walla County.
(a) regions 1,2,3,4,5,6,7,9,10
(b) region 8 except Skamania County.
(a) regions 1,2,3,4,5,6,7,9,10
(b) region 8 except Clark, Cowlitz, and Wahkiakum counties.

- (a) regions 1,2,3,4,5,7,8,10
(b) Grant County lying northerly of Township 21, North, W.M.
(c) Intercounty Weed Districts No. 51 and 52.

- (a) regions 3,4,6,7,9,10
(b) region 5, that portion of Pierce County lying south or east of a boundary beginning at the White River and State Highway 410, then west along State Highway 410 to intersection with State Highway 162 (Orting) to intersection with Orville Road, then south along Orville Road to intersection with Kapowsin Highway (304th Street East), then west following Kapowsin Highway to intersection with State Route 7, then south along State Route 7 to intersection with State Route 702, then west along State Route 702 to intersection with State Route 507, then southwest along State Route 507 to intersection with the Nisqually River.

- (a) regions 1,2,3,4,5,7,8
(b) Adams County of region 6 except for that area lying within Intercounty Weed District No. 52
(c) Intercounty Weed District No. 51.

- (a) regions 1,2,3,5,8,9
(b) Franklin County except T13N, R36E, and T14N, R36E
(c) Adams County except those areas lying ((east)) west of a ((boundary)) line running north from Franklin County along the western boundary of Range 36 East to State Highway 26 then ((east on State Highway 26 to State Highway 261 then north on State Highway 261 to Sutton Road then east on Sutton Road to Snyder Road then north on Snyder Road extended to Providence Road then west on Providence Road to Klein Road then north on Klein Road to Wollandt Road then east on Wollandt Road to Interstate 90 then east on I-90)) north on Sage Road until it intersects Lee Road, then due north until intersection with Providence Road, then east to State Highway 261, then north along State Highway 261 to its intersection with Interstate 90, henceforth on a due north line to intersection with Bauman Road, then north along Bauman Road to its terminus,

- ((36)) (37) sowthistle, perennial
Sonchus arvensis arvensis
- ((37)) (38) spurge, leafy
Euphorbia esula

- ((38)) (39) starthistle, yellow
Centaurea solstitialis

- ((39)) (40) Swainsonpea
Sphaerophysa salsula

- then due north to the Lincoln County line.
- (d) region 6 except that portion lying within Grant County that is southerly of State Highway 28, northerly of Interstate Highway 90 and easterly of Grant County Road E Northwest
- (e) Pend Oreille and Stevens counties north of Township 33 North
- (f) Ferry County
- (g) Asotin County of region 10
- (h) Garfield and Columbia counties south of Highway 12
- (i) Whitman County lying in Ranges 43 through 46 East of Townships 15 through 20 North; T14N, Ranges 44 through 46 East; and T13N, Ranges 45 and 46 East.

- (a) regions 1,2,3,4,5,7,8,9,10
(a) regions 1,2,3,4,5,6,8,9,10
(b) region 7 except as follows:
(i) T27N, R37E, Sections 34,35,36; T27N, R38E, Sections 31,32,33; T26N, R37E, Sections 1,2,3,10, 11,12,13,14,15,16,26; T26N, R38E, Sections 5, 6,7,8 of Lincoln County
(ii) T24N, R43E, Section 12, Qtr. Section 3, Parcel No. 9068 of Spokane County.

- (a) regions 1,2,3,((4))5,6,8
(b) region 4 except those areas within Stevens County bounded by a line beginning at the intersection of State Highway 20 and State Highway 25, then north to intersection with Pinkston Creek Road, then east along Pinkston Creek Road to intersection with Highland Loop Road, then south along Highland Loop Road to intersection with State Highway 20, then west along State Highway 20 to intersection with State Highway 25
(c) region 7 except those areas within Whitman County lying south of State Highway 26 from the Adams County line to Colfax and south of State Highway 195 from Colfax to Pullman and south of State Highway 270 from Pullman to the Idaho border

- ((e))
(d) Franklin County
((f))
(e) region 9 except Klickitat County
((g))
(f) in all lands lying within Asotin County, Region 10, except as follows: T11N, R44E, Sections 25,26,27,28,29,31,32, 33,34, and 35; T11N, R45E, Sections 21,22,23, and 25; T11N, R36E, Sections 19,20,21,28,29,30,31,32, and 33; T10N, R44E, Sections 1,2,3,4,5,6,8,9,10,11, 12,15, and 16; T10N, R45E, Sections 23 and 24; T10N, R46E, Sections 7,8, 17,18,19,20,21,22,27,34, and 35; T9N, R46E, Sections 1,2,12,13,14,23,24, 25,26,35, and 36; T9N, R47E, Sections 18,19,30, and 31; T8N, R46E, Sections 1,2,3,9,10,11,12,13,14,15,16,23, and 24; T8N, R47E, Sections 8,17,18,19,20,29, 30,31, and 32.

- (a) regions 1,2,3,4,5,7,8
(b) Columbia, Garfield, Asotin, and Franklin counties
(c) an area beginning at the Washington — Oregon border at the southwest portion of Section 15, R32E, T6N, then north to the northwest corner of Section 3, R32E, T7N, then east to the northeast corner of Section 3, R36E, T7N, then south to the southeast portion of Section 15, R36E, T6N, at the Washington — Oregon border, then west along the Washington — Oregon border to the point of beginning
(d) Weed District No. 3 of Grant County.

((40)) (41) thistle, musk
Carduus nutans
((44)) (42) thistle, plumeless
Carduus acanthoides

((42)) (43) thistle, Scotch
Onopordum acanthium

((43)) (44) toadflax, Dalmatian
Linaria genistifolia
spp. dalmatica

((44)) (45) watermilfoil,
Eurasian
Myriophyllum spicatum

- (a) regions 1,2,3,5,6,7,8,9,10
- (b) Spokane and Pend Oreille counties.
- (a) regions 1,2,3,5,6,7,8,9,10
- (b) region 4 except those areas within Stevens County lying north of State Highway 20.
- (a) regions 1,2,3,4,5,6,8,9
- (b) region 7 except for those areas within Whitman County lying south of State Highway 26 from the Adams County line to Colfax and south of State Highway 195 from Colfax to Pullman and south of State Highway 270 from Pullman to the Idaho border
- (c) Franklin County.
- (a) regions 1,2,5,8,10
- (b) Kittitas, Chelan, Douglas, and Adams counties of region 6
- (c) Intercounty Weed District No. 51
- (d) Weed District No. 3 of Grant County
- (e) Lincoln and Adams counties
- (f) The western two miles of Spokane County of region 7
- (g) region 9 except as follows:
 - (i) those areas lying within Yakima County
 - (ii) those areas lying west of the Klickitat River and within Klickitat County.
- (a) regions 1,8,9,10
- (b) region 7 except Spokane County.

WSR 94-01-082

PERMANENT RULES

DEPARTMENT OF LICENSING

[Filed December 13, 1993, 8:43 a.m., effective July 1, 1994]

Date of Adoption: December 13, 1993.

Purpose: To encourage highway safety and uniform traffic laws by adopting rules to serve as a model ordinance for use by any city, town, or county.

Statutory Authority for Adoption: RCW 46.90.010.

Pursuant to notice filed as WSR 93-20-079 on October 4, 1993.

Changes Other than Editing from Proposed to Adopted Version: WAC 308-330-418 proposed new section deleted. Provision proposed for adoption was contrary to RCW 46.61.230 and 46.61.240 adopted by reference in WAC 308-330-415.

Effective Date of Rule: July 1, 1994.

December 13, 1993

Kathy Baros Friedt

Director

Chapter 308-330 WAC

WASHINGTON MODEL TRAFFIC ORDINANCE

NEW SECTION

WAC 308-330-005 Purpose of this chapter. The purpose of this chapter is to encourage highway safety and uniform traffic laws by authorizing the department of licensing to adopt a comprehensive compilation of sound, uniform traffic laws to serve as a guide which local authorities may adopt by reference or any part thereof, including all future amendments or additions thereto. Any local authority which adopts this chapter by reference may at any time exclude any section or sections from this chapter which it does not desire to include in its local traffic ordinance. This chapter is not intended to deny any local authority its legislative power, but rather to enhance safe and efficient movement of traffic throughout the state by having current, uniform traffic laws available.

NEW SECTION

WAC 308-330-010 Amendments to this chapter automatically included. The addition of any new section to, or amendment or repeal of any section in, this chapter shall be deemed to amend any city, town, or county ordinance which has adopted by reference to this chapter or any part thereof, and it shall not be necessary for the legislative authority of any city, town, or county to take any action with respect to such addition, amendment, or repeal notwithstanding the provisions of RCW 35.21.180, 35A.12.140, 35A.13.180, and 36.32.120(7).

NEW SECTION

WAC 308-330-030 Uniformity in application. The provisions of this chapter relating to the operation of vehicles shall be applicable and uniform upon all persons operating vehicles upon the public highways of this state, except as otherwise specifically provided.

AMENDATORY SECTION (Amending WSR 93-01-004, filed 12/2/92, effective 1/2/93)

WAC 16-750-015 State noxious weed list—Class C noxious weeds.

| Common Name | Scientific Name |
|--------------------------------|---|
| baby's breath | <i>Gypsophila paniculata</i> |
| bindweed, field | <i>Convolvulus arvensis</i> |
| carrot, wild | <i>Daucus carota</i> |
| ((eathefly, conical | <i>Silene conoidea</i>) |
| chervil, wild | <i>Anthriscus sylvestris</i> |
| <u>cinquefoil, sulphur</u> | <u><i>Potentilla recta</i></u> |
| <u>cockle, white</u> | <u><i>Lychnis alba</i></u> |
| cocklebur, spiny | <i>Xanthium spinosum</i> |
| cross, hoary | <i>Cardaria draba</i> |
| dodder, smoothseed alfalfa | <i>Cuscuta approximata</i> |
| garden rocket | <i>Eruca vesicaria</i> spp. sativa |
| goatgrass, jointed | <i>Aegilops cylindrica</i> |
| henbane, black | <i>Hyoscyamus niger</i> |
| houndstongue | <i>Cynoglossum officinale</i> |
| kochia | <i>Kochia scoparia</i> |
| mayweed, scentless | <i>Matricaria maritima</i> var. <i>agrestis</i> |
| mullein, common | <i>Verbascum thapsus</i> |
| nightshade, bitter | <i>Solanum dulcamara</i> |
| poison-hemlock | <i>Conium maculatum</i> |
| puncturevine | <i>Tribulus terrestris</i> |
| rye, cereal | <i>Secale cereale</i> |
| <u>saltcedar</u> | <u><i>Tamarix</i> species</u> |
| snapdragon, dwarf | <i>Chaenorrhinum minus</i> |
| spikeweed | <i>Hemizonia pungens</i> |
| St. Johnswort, common | <i>Hypericum perforatum</i> |
| tansy, common | <i>Tanacetum vulgare</i> |
| toadflax, yellow | <i>Linaria vulgaris</i> |
| thistle, bull | <i>Cirsium vulgare</i> |
| thistle, Canada | <i>Cirsium arvense</i> |
| whiteweed, hairy | <i>Cardaria pubescens</i> |
| wormwood, absinth | <i>Artemisia absinthium</i> |

NEW SECTION

WAC 308-330-100 Chapter 46.04 RCW (Definitions) adopted by reference. All sections of chapter 46.04 RCW as now or hereafter amended are hereby adopted by reference as a part of this chapter in all respects as though such sections were set forth herein in full.

NEW SECTION

WAC 308-330-109 Bus. "Bus" means every motor vehicle designed for carrying more than ten passengers and used for transportation of persons, and every motor vehicle, other than a taxicab, designed and used for the transportation of persons for compensation.

NEW SECTION

WAC 308-330-112 Bus stop. "Bus stop" means a fixed portion of the highway parallel and adjacent to the curb to be reserved exclusively for buses for layover in operating schedules or while waiting for, loading, or unloading passengers: *Provided*, That such bus provides regularly scheduled service within the jurisdiction of the local authority.

NEW SECTION

WAC 308-330-115 City. "City" means every incorporated city and town.

NEW SECTION

WAC 308-330-118 Demolish. "Demolish" means to destroy completely by use of a hydraulic baler and shears, or a shredder.

NEW SECTION

WAC 308-330-121 Department. "Department" means the department of licensing unless otherwise specified in this chapter.

NEW SECTION

WAC 308-330-123 Director. "Director" means the director of licensing unless the director of a different department of government is specified.

NEW SECTION

WAC 308-330-127 Holidays. "Holidays" include the first day of January, commonly called New Year's Day; the third Monday in January, commonly called Martin Luther King Jr. day; the third Monday of February, being celebrated as the anniversary of the birth of George Washington; the thirtieth day of May, commonly known as Memorial Day; the fourth day of July, being the anniversary of the Declaration of Independence; the first Monday in September, to be known as Labor Day; the fourth Thursday in November, to be known as Thanksgiving Day; the twenty-fifth day of December, commonly called Christmas Day; and any other day specified by ordinance by the local authority to be a holiday. Whenever any holiday falls upon a Sunday, the following Monday shall be a holiday.

NEW SECTION

WAC 308-330-133 Loading zone. "Loading zone" means a space reserved for the exclusive use of vehicles during the loading or unloading of property or passengers.

NEW SECTION

WAC 308-330-136 Official time standard. "Official time standard" means, whenever certain hours are named, standard time or daylight saving time as may be in current use within the jurisdiction of the local authority.

NEW SECTION

WAC 308-330-139 Ordinance. "Ordinance" means a city or town ordinance or a county ordinance or resolution.

NEW SECTION

WAC 308-330-142 Parking meter. "Parking meter" means any mechanical device or meter placed or erected adjacent to a parking meter space, for the purpose of regulating or controlling the period of time of occupancy of such parking meter space by any vehicle. Each parking meter installed shall indicate by proper legend the legal parking time and when operated shall at all times indicate the balance of legal parking time, and at the expiration of such period shall indicate illegal or overtime parking. Each meter shall bear a legend indicating the days and hours when the requirement to deposit coins therein shall apply, the value of the coins to be deposited, and the limited period of time for which parking is lawfully permitted in the parking meter space in which such meter is located.

NEW SECTION

WAC 308-330-145 Parking meter space. "Parking meter space" means any space within a parking meter zone, adjacent to a parking meter and which is duly designated for the parking of a single vehicle by appropriate markings on the pavement and/or the curb.

NEW SECTION

WAC 308-330-148 Parking meter zone. "Parking meter zone" means any highway or part thereof or any off-street parking lot on which parking meters are installed and in operation.

NEW SECTION

WAC 308-330-151 Passenger loading zone. "Passenger loading zone" means a place reserved for the exclusive use of vehicles while receiving or discharging passengers.

NEW SECTION

WAC 308-330-154 Planting strip. "Planting strip" means that portion of a highway lying between the constructed curb, or edge of the roadway, and the property line exclusive of the sidewalk area.

NEW SECTION

WAC 308-330-157 Police or police officer. "Police or police officer" includes the police officers of a city, a town, marshal, or the sheriff and his/her deputies of a county whichever is applicable, but when the term sheriff is used in this chapter, it shall only mean the sheriff.

NEW SECTION

WAC 308-330-160 Police chief or chief of police. "Police chief or chief of police" includes the police chief or chief police officer of a city, a town marshal, or the sheriff of a county, whichever is applicable, but when the term sheriff is used in this chapter, it shall only mean the sheriff.

NEW SECTION

WAC 308-330-163 Police department. "Police department" includes the police department of a city or town or the sheriff's office of a county whichever is applicable, but when the term sheriff is used in this chapter, it shall only mean the sheriff.

NEW SECTION

WAC 308-330-169 School bus zone. "School bus zone" means a designated portion of the highway along the curb reserved for loading and unloading school buses during designated hours.

NEW SECTION

WAC 308-330-172 Service parking. "Service parking" means the use of a parking meter space while rendering service in cleaning, painting, adjusting, or making minor repairs or replacements in or to buildings or building equipment or to public utilities.

NEW SECTION

WAC 308-330-175 Street. "Street" means a "city street."

NEW SECTION

WAC 308-330-178 Taxicab. "Taxicab" means a motor vehicle for hire used for the transportation of persons for compensation, and not operated exclusively over a fixed route or between fixed termini.

NEW SECTION

WAC 308-330-181 Taxicab stand. "Taxicab stand" means a fixed portion of a highway set aside for taxicabs to stand or wait for passengers.

NEW SECTION

WAC 308-330-184 Tow truck operator. "Tow truck operator" means a person, firm, partnership, association, or corporation which, in its course of business, provides towing services for vehicles and automobile hulks.

NEW SECTION

WAC 308-330-187 Traffic division. "Traffic division" means the traffic division of the police department of the local authority, or in the event a traffic division is not established, then said term whenever used in this chapter shall be deemed to refer to the police department of the local authority.

NEW SECTION

WAC 308-330-190 U-turn. "U-turn" means turning a vehicle so as to proceed in the opposite direction on the same roadway.

NEW SECTION

WAC 308-330-195 RCW sections adopted—Live-stock. The following sections of the Revised Code of Washington (RCW) pertaining to livestock on highway right-of-way as now or hereafter amended are hereby adopted by reference as a part of this chapter in all respects as though such sections were set forth herein in full: RCW 16.24.065, and 16.24.070.

NEW SECTION

WAC 308-330-197 RCW sections adopted—Off road and nonhighway vehicles. The following sections of the Revised Code of Washington (RCW) pertaining to off road and nonhighway vehicles as now or hereafter amended are hereby adopted by reference as a part of this chapter in all respects as though such sections were set forth herein in full: RCW 46.09.020, 46.09.120, 46.09.130, 46.09.140, and 46.09.180.

NEW SECTION

WAC 308-330-200 RCW sections adopted—Snowmobiles. The following sections of the Revised Code of Washington (RCW) pertaining to snowmobiles as now or hereafter amended are hereby adopted by reference as a part of this chapter in all respects as though such sections were set forth herein in full: RCW 46.10.010, 46.10.090, 46.10.100, 46.10.110, 46.10.120, 46.10.130, 46.10.140, and 46.10.190.

NEW SECTION

WAC 308-330-205 Public employees to obey traffic regulations. The provisions of this chapter shall apply to the drivers of all vehicles owned or operated by the United States, the state, or any county, city, town, district, or any other political subdivision of the state, subject to such specific exceptions as are set forth in this chapter.

NEW SECTION

WAC 308-330-210 Police administration. There is established in the police department of the local authority a traffic division to be under the control of a police officer appointed by, and directly responsible to, the chief of police.

NEW SECTION

WAC 308-330-215 Duty of traffic division. It shall be the duty of the traffic division with such aid as may be rendered by other members of the police department to enforce the traffic regulations of the local authority, to make arrests for traffic violations, to investigate accidents and to cooperate with the traffic engineer and other officers of the local authority in the administration of the traffic laws and in developing ways and means to improve traffic conditions, and to carry out those duties specially imposed upon the said division by this chapter and the traffic ordinances of the local authority.

NEW SECTION

WAC 308-330-220 Authority of police and fire department officials. (1) Officers of the police department or such officers as are assigned by the chief of police are authorized to direct all traffic by voice, hand, or signal in conformance with law: *Provided*, That in the event of a fire or other emergency or to expedite traffic or to safeguard pedestrians, officers of the police department may direct traffic as conditions may require notwithstanding the provisions of law.

(2) Officers of the fire department, when at the scene of a fire, may direct or assist the police in directing traffic thereat or in the immediate vicinity.

NEW SECTION

WAC 308-330-225 Records of traffic violations. (1) The police department or the traffic division thereof shall keep a record of all violations of the traffic ordinances of the local authority or of the state motor vehicle laws of which any person has been charged, with the exception of illegal parking or standing violations, together with a record of the final disposition of all such alleged offenses. Such records shall be so maintained as to show all types of violations and the total of each. Such records shall accumulate during at least a five-year period, and from that time on the records shall be maintained complete for at least the most recent five-year period.

(2) All forms for records of violations and notices of violations shall be serially numbered. For each month and year a written record of all such forms shall be kept.

(3) Records and reports concerning a person shall be available upon request only to that particular person requesting such record or report concerning himself, or the legal guardian thereof, the parent of a minor, or any authorized representative of such interested party, or the attorney or insurer thereof.

NEW SECTION

WAC 308-330-230 Traffic division to investigate accidents. It shall be the duty of the traffic division, assisted by other members of the police department, to investigate traffic accidents, to arrest, and to assist in the prosecution of those persons charged with violations of law causing or contributing to such accidents.

NEW SECTION

WAC 308-330-235 Traffic accident studies. Whenever the accidents at any particular location become numerous, the traffic division shall cooperate with the traffic engineer in conducting studies of such accidents and in determining remedial measures.

NEW SECTION

WAC 308-330-240 Traffic accident reports. The traffic division shall maintain a suitable system of filing traffic accident reports. Accident reports or cards referring to them shall be filed alphabetically by location. Such reports shall be available for the use and the information of the traffic engineer.

NEW SECTION

WAC 308-330-245 Traffic division to submit annual traffic safety report. The traffic division shall annually prepare a traffic report which shall be filed with the appointing authority of the local authority. Such report shall contain information on traffic matters in the local authority as follows:

(1) The number of traffic accidents, the number of persons killed, the number of persons injured, and other pertinent traffic accident data;

(2) The number of traffic accidents investigated and other pertinent data on the safety activities of the police;

(3) The plans and recommendations of the division for future traffic safety activities.

NEW SECTION

WAC 308-330-250 Police department to administer bicycle licenses. The police department or some other office or department designated by the local authority shall administer the bicycle license regulations required by this chapter.

NEW SECTION

WAC 308-330-255 Police department to regulate parking meters. The police department shall be responsible for the regulation, control, operation, and use of parking meters installed in all parking meter zones.

NEW SECTION

WAC 308-330-260 Traffic engineer. (1) The office of traffic engineer is established: *Provided*, That if there is no traffic engineer, then the engineer of the local authority shall serve as traffic engineer in addition to his/her other functions, and shall exercise the powers and duties with respect to traffic as provided in this chapter: *Provided further*, That if there is no engineer in the local authority, then the appointing authority shall designate a person to exercise such powers and duties.

(2) It shall be the general duty of the traffic engineer to determine the installation and maintenance of traffic control devices, to conduct engineering analysis of traffic accidents and to devise remedial measures, to conduct engineering investigations of traffic conditions, to plan the operation of traffic on the highways of the local authority, to cooperate

PERMANENT

with other officials in the development of ways and means to improve traffic conditions, and to carry out the additional powers and duties imposed by any ordinances of the local authority.

NEW SECTION

WAC 308-330-265 Traffic engineer—Authority. The traffic engineer is authorized:

(1) To place and maintain official traffic control devices when and as required under the traffic ordinances or resolutions of the local authority to make effective the provisions of said ordinances or resolutions, and may place and maintain such additional official traffic control devices as he/she may deem necessary to regulate, warn, or guide traffic under the traffic ordinances or resolutions of the local authority;

(2) To place and maintain official traffic control devices as he/she may deem necessary to regulate, warn, or guide traffic for construction, detours, emergencies, and special conditions;

(3) To designate and maintain, by appropriate devices, marks, or lines upon the surface of the roadway, crosswalks at intersections where in his/her opinion there is particular danger to pedestrians crossing the roadway, and in such other places as he/she may deem necessary;

(4) To establish safety zones of such kind and character and at such places as he/she may deem necessary for the protection of pedestrians;

(5) To mark traffic lanes upon the roadway of any highway where a regular alignment of traffic is necessary;

(6) To regulate the timing of traffic signals so as to permit the movement of traffic in an orderly and safe manner;

(7) To place official traffic control devices within or adjacent to intersections indicating the course to be traveled by vehicles turning at such intersections, in accordance with the provisions of this chapter, and such course to be traveled as so indicated may conform to or be other than as prescribed by law;

(8) To determine those intersections at which drivers of vehicles shall not make a right, left, or U-turn, and shall place proper signs at such intersections. The making of such turns may be prohibited between certain hours of any day and permitted at other hours, in which event the same shall be plainly indicated on the signs or they may be removed when such turns are permitted;

(9) To erect and maintain stop signs, yield signs, or other official traffic control devices to designate arterial highways or to designate intersection or other roadway junctions at which vehicular traffic on one or more of the roadways shall yield or stop and yield before entering the intersection or junction, except as provided in RCW 46.61.195;

(10) To issue special permits to authorize the backing of a vehicle to the curb for the purpose of loading or unloading property subject to the terms and conditions of such permit. Such permits may be issued either to the owner or lessee of real property alongside the curb or to the owner of the vehicle and shall grant to such person the privilege as therein stated and authorized by this section;

(11) To erect signs indicating no parking upon both sides of a highway when the width of the improved roadway does not exceed twenty feet, or upon one side of a highway as indicated by such signs when the width of the improved roadway is between twenty and twenty-eight feet;

(12) To determine when standing or parking may be permitted upon the left-hand side of any roadway when the highway includes two or more separate roadways and traffic is restricted to one direction upon any such roadway and to erect signs giving notice thereof;

(13) To determine and designate by proper signs places not exceeding one hundred feet in length in which the stopping, standing, or parking of vehicles would create an especially hazardous condition or would cause unusual delay to traffic;

(14) To determine the location of loading zones, passenger loading zones, and tow-away zones and shall place and maintain appropriate signs or curb markings supplemented with the appropriate words stenciled on the curb indicating the same and stating the hours during which the provisions of this chapter are applicable;

(15) To establish bus stops, bus stands, taxicab stands, and stands for other for hire vehicles on such highways in such places and in such number as he/she shall determine to be of the greatest benefit and convenience to the public, and every such bus stop, bus stand, taxicab stand, or other stand shall be designated by appropriate signs or by curb markings supplemented with the appropriate words stenciled on the curb;

(16) To erect and maintain official traffic control devices on any highway or part thereof to impose gross weight limits on the basis of an engineering and traffic investigation;

(17) To erect and maintain official traffic control devices on any highway or part thereof to prohibit the operation of trucks exceeding ten thousand pounds gross weight on the basis of an engineering and traffic investigation: *Provided*, That such devices shall not prohibit necessary local operation on such highways for the purpose of making a pickup or delivery;

(18) To erect and maintain official traffic control devices on any highway or part thereof to impose vehicle size restrictions on the basis of an engineering and traffic investigation;

(19) To determine and designate those heavily traveled highways upon which shall be prohibited any class or kind of traffic which is found to be incompatible with the normal and safe movement of traffic on the basis of an engineering and traffic investigation and shall erect appropriate official traffic control devices giving notice thereof;

(20) To install parking meters in the established parking meter zones upon the curb adjacent to each designated parking space;

(21) To designate the parking space adjacent to each parking meter for which such meter is to be used by appropriate markings upon the curb and/or the pavement of the highway;

(22) To post appropriate signs making it unlawful for pedestrians to cross highways in certain crosswalks when such crossing would endanger either pedestrian or vehicular traffic using the highway;

(23) To test new or proposed traffic control devices under actual conditions of traffic.

NEW SECTION

WAC 308-330-270 Local authority—Authority. After an engineering and traffic investigation by the traffic engineer, the local authority may by resolution:

(1) Decrease maximum speed limits pursuant to RCW 46.61.415;

(2) Increase maximum speed limits pursuant to RCW 46.61.415;

(3) Determine and declare the maximum speed limits on arterial highways pursuant to RCW 46.61.415;

(4) Determine and declare upon what highways angle parking shall be permitted pursuant to RCW 46.61.575(3);

(5) Prohibit, regulate, or limit, stopping, standing, or parking of vehicles on any highway at all times or during such times as shall be indicated by official traffic control devices;

(6) Determine and declare parking meter zones upon those highways or parts thereof where the installation of parking meters will be necessary to regulate parking;

(7) Close any highway or part thereof temporarily to any or all traffic;

(8) Determine and declare one-way highways pursuant to RCW 46.61.135;

(9) Determine and declare arterial highways pursuant to RCW 46.61.195 and 46.61.435.

NEW SECTION

WAC 308-330-275 Traffic safety commission—Powers and duties. (1) There is established a traffic safety commission to serve without compensation, consisting of the traffic engineer, the chief of police, or, in his/her discretion as his/her representative, the chief of the traffic division or other cognizant member of the police department, one representative each from the engineer's office and the attorney's office, and such number of other officers of the local authority and representatives of unofficial bodies as may be determined and appointed by the appointing authority of the local authority. The chair of the commission shall be appointed by such appointing authority and may be removed by such authority.

(2) It shall be the duty of the traffic safety commission, and to this end it shall have authority within the limits of the funds at its disposal, to coordinate traffic activities, to supervise the preparation and publication of traffic reports, to receive complaints having to do with traffic matters, and to recommend to the legislative body of the local authority and to the traffic engineer, the chief of the traffic division, and other officials, ways and means for improving traffic conditions and the administration and enforcement of traffic regulations.

NEW SECTION

WAC 308-330-300 RCW sections adopted—Certificates of ownership and registrations. The following sections of the Revised Code of Washington (RCW) pertaining to vehicle certificates of ownership and registrations as now or hereafter amended are hereby adopted by reference

as a part of this chapter in all respects as though such sections were set forth herein in full: RCW 46.12.070, 46.12.080, 46.12.101, 46.12.102, 46.12.260, 46.12.300, 46.12.310, 46.12.320, 46.12.330, 46.12.340, 46.12.350, and 46.12.380.

NEW SECTION

WAC 308-330-305 RCW sections adopted—Vehicle licenses. The following sections of the Revised Code of Washington (RCW) pertaining to vehicle licenses as now or hereafter amended are hereby adopted by reference as a part of this chapter in all respects as though such sections were set forth herein in full: RCW 46.16.010, 46.16.011, 46.16.022, 46.16.023, 46.16.025, 46.16.028, 46.16.030, 46.16.048, 46.16.088, 46.16.135, 46.16.140, 46.16.145, 46.16.170, 46.16.180, 46.16.240, 46.16.260, 46.16.290, 46.16.316, 46.16.381, 46.16.390, 46.16.500, 46.16.505, 46.16.595, and 46.16.710.

NEW SECTION

WAC 308-330-307 RCW sections adopted—Driver licenses identicards. The following sections of the Revised Code of Washington (RCW) pertaining to driver licenses identification cards as now or hereafter amended are hereby adopted by reference as a part of this chapter in all respects as though such sections were set forth herein in full: RCW 46.20.021, 46.20.022, 46.20.025, 46.20.027, 46.20.031, 46.20.041, 46.20.045, 46.20.190, 46.20.220, 46.20.308, 46.20.336, 46.20.338, 46.20.342, 46.20.343, 46.20.344, 46.20.391, 46.20.394, 46.20.410, 46.20.420, 46.20.430, 46.20.435, 46.20.500, 46.20.510, 46.20.550, and 46.20.750.

NEW SECTION

WAC 308-330-309 RCW sections adopted—Uniform Commercial Driver's License Act. The following sections of the Revised Code of Washington (RCW) pertaining to the Uniform Commercial Driver's License Act as now or hereafter amended are hereby adopted by reference as a part of this chapter in all respects as though such sections were set forth herein in full: RCW 46.25.010, 46.25.020, 46.25.030, 46.25.040, 46.25.050, 46.25.110, 46.25.120, and 46.25.170.

NEW SECTION

WAC 308-330-310 RCW sections adopted—Financial responsibility. The following section of the Revised Code of Washington (RCW) pertaining to financial responsibility as now or hereafter amended is hereby adopted by reference as a part of this chapter in all respects as though such section were set forth herein in full: RCW 46.29.605.

NEW SECTION

WAC 308-330-312 RCW sections adopted—Mandatory liability insurance. The following sections of the Revised Code of Washington (RCW) pertaining to mandatory liability insurance as now or hereafter amended are hereby adopted by reference as a part of this chapter in all respects as through such sections were set forth herein in

full: RCW 46.30.010, 46.30.020, 46.30.030, and 46.30.040.

NEW SECTION

WAC 308-330-314 RCW sections adopted—Vehicle inspection. The following sections of the Revised Code of Washington (RCW) pertaining to vehicle inspection as now or hereafter amended are hereby adopted by reference as a part of this chapter in all respects as though such sections were set forth herein in full: RCW 46.32.060 and 46.32.070.

NEW SECTION

WAC 308-330-316 RCW sections adopted—Vehicle lighting and other equipment. The following sections of the Revised Code of Washington (RCW) pertaining to vehicle lighting and other equipment as now or hereafter amended are hereby adopted by reference as a part of this chapter in all respects as though such sections were set forth herein in full: RCW 46.37.010, 46.37.020, 46.37.030, 46.37.040, 46.37.050, 46.37.060, 46.37.070, 46.37.080, 46.37.090, 46.37.100, 46.37.110, 46.37.120, 46.37.130, 46.37.140, 46.37.150, 46.37.160, 46.37.170, 46.37.180, 46.37.184, 46.37.185, 46.37.186, 46.37.187, 46.37.188, 46.37.190, 46.37.193, 46.37.196, 46.37.200, 46.37.210, 46.37.215, 46.37.220, 46.37.230, 46.37.240, 46.37.260, 46.37.270, 46.37.280, 46.37.290, 46.37.300, 46.37.310, 46.37.340, 46.37.351, 46.37.360, 46.37.365, 46.37.369, 46.37.375, 46.37.380, 46.37.390, 46.37.400, 46.37.410, 46.37.420, 46.37.423, 46.37.424, 46.37.425, 46.37.430, 46.37.435, 46.37.440, 46.37.450, 46.37.460, 46.37.465, 46.37.467, 46.37.470, 46.37.480, 46.37.490, 46.37.500, 46.37.510, 46.37.513, 46.37.517, 46.37.520, 46.37.522, 46.37.523, 46.37.524, 46.37.525, 46.37.527, 46.37.528, 46.37.529, 46.37.530, 46.37.535, 46.37.537, 46.37.539, 46.37.540, 46.37.550, 46.37.560, 46.37.570, 46.37.590, 46.37.600, 46.37.610, and 46.37.620.

NEW SECTION

WAC 308-330-320 RCW sections adopted—Size, weight, load. The following sections of the Revised Code of Washington (RCW) pertaining to vehicle size, weight, and load as now or hereafter amended are hereby adopted by reference as a part of this chapter in all respects as though such sections were set forth herein in full: RCW 46.44.010, 46.44.015, 46.44.020, 46.44.030, 46.44.034, 46.44.036, 46.44.037, 46.44.041, 46.44.042, 46.44.047, 46.44.050, 46.44.060, 46.44.070, 46.44.090, 46.44.091, 46.44.092, 46.44.093, 46.44.095, 46.44.096, 46.44.105, 46.44.120, 46.44.130, 46.44.140, 46.44.170, 46.44.173, 46.44.175, and 46.44.180.

NEW SECTION

WAC 308-330-322 RCW sections adopted—Transportation of hazardous materials. The following section of the Revised Code of Washington (RCW) pertaining to transportation of hazardous materials as now or hereafter amended is hereby adopted by reference as a part of this chapter in all respects as though such section were set forth herein in full: RCW 46.48.170.

NEW SECTION

WAC 308-330-325 RCW sections adopted—Accidents, reports. The following sections of the Revised Code of Washington (RCW) pertaining to accidents and accident reports as now or hereafter amended are hereby adopted by reference as a part of this chapter in all respects as though such sections were set forth herein in full: RCW 46.52.010, 46.52.020, 46.52.030, 46.52.040, 46.52.070, 46.52.080, 46.52.088, 46.52.090, and 46.52.100.

NEW SECTION

WAC 308-330-327 RCW sections adopted—Hulk haulers and scrap processors. The following sections of the Revised Code of Washington (RCW) pertaining to hulk haulers and scrap processors as now or hereafter amended are hereby adopted by reference as a part of this chapter in all respects as though such sections were set forth herein in full: RCW 46.79.010 and 46.79.120.

NEW SECTION

WAC 308-330-329 RCW sections adopted—Rental car businesses. The following section of the Revised Code of Washington (RCW) pertaining to rental car businesses as now or hereafter amended is hereby adopted by reference as a part of this chapter in all respects as though such section were set forth herein in full: RCW 46.87.023.

NEW SECTION

WAC 308-330-330 RCW sections adopted—Motor vehicle wreckers. The following section of the Revised Code of Washington (RCW) pertaining to motor vehicle wreckers as now or hereafter amended is hereby adopted by reference as a part of this chapter in all respects as though such section were set forth herein in full: RCW 46.80.010.

NEW SECTION

WAC 308-330-360 Owner of record presumed liable for costs when vehicle abandoned—Exception. (1) The abandonment of any vehicle or automobile hulk shall constitute a prima facie presumption that the last owner of record is responsible for such abandonment and thus liable for any costs incurred in removing, storing, and disposing of any abandoned vehicle.

(2) A registered owner transferring a vehicle shall be relieved from personal liability under this section if within five days of the transfer he/she transmits to the department a seller's report of sale on a form prescribed by the director.

NEW SECTION

WAC 308-330-365 Contract with registered disposer to dispose of vehicles and hulks—Compliance required. (1) The local authority may contract with any tow truck operator who is engaged in removing and storing of vehicles and who is registered as a registered disposer by the department for the purpose of disposing of certain automobile hulks, abandoned junk motor vehicles, and abandoned vehicles.

(2) Any registered disposer under contract to the local authority for the removing and storing of vehicles or hulks shall comply with the administrative regulations relative to the handling and disposing of vehicles or hulks as may be promulgated by the local authority or the director.

NEW SECTION

WAC 308-330-370 Stolen and abandoned vehicles—Reports of—Recovery, report required, penalty—Disposition. It shall be the duty of the chief of police to report immediately to the chief of the Washington state patrol all motor vehicles reported to them as stolen or recovered, upon forms to be provided by the chief of the Washington state patrol.

In the event that any motor vehicle reported as stolen has been recovered, failure of the person so reporting the same as stolen to report the recovery thereof to the chief of police to whom such motor vehicle was reported as stolen is a traffic infraction.

It shall be the duty of the chief of police to report to the chief of the Washington state patrol all vehicles or automobile hulks found abandoned on a highway or at any other place and the same shall, at the direction of a law enforcement officer, be placed in the custody of a registered disposer.

NEW SECTION

WAC 308-330-375 Disposition of abandoned junk motor vehicles. (1) Notwithstanding any other provision of law, the chief of police on his/her own volition, or upon request from a private person having the right to possession of property upon which an abandoned junk motor vehicle has been left, shall inspect and may authorize the disposal of an abandoned junk motor vehicle. The chief of police shall record the make of such vehicle, the serial number if available, and shall also detail the damaged or missing equipment to substantiate a fair market value as scrap only. He/she shall prepare in duplicate for each such abandoned junk motor vehicle as an authorization to dispose on a form provided by the director. He/she shall issue the original copy of such authorization to dispose to any licensed hulk hauler, motor vehicle wrecker, or scrap processor for the purpose of acquiring an abandoned junk motor vehicle: *Provided*, That such acquisition is for the purpose of ultimate transfer to and demolition by a licensed scrap processor.

(2) Any moneys arising from the disposal of abandoned junk motor vehicles shall be deposited in the county general fund.

NEW SECTION

WAC 308-330-400 Provisions of chapter refer to vehicles upon highway—Exception. The provisions of this chapter relating to the operation of vehicles refer exclusively to the operation of vehicles upon highways except:

(1) Where a different place is specifically referred to in a given section;

(2) The provisions of RCW 46.52.010, 46.52.020, 46.52.030, 46.52.070, 46.52.080, 46.52.090, and 46.61.500

through 46.61.515 shall apply upon highways and elsewhere throughout the jurisdiction of the local authority.

NEW SECTION

WAC 308-330-403 Required obedience to traffic ordinance. It is unlawful for any person to do any act forbidden or fail to perform any act required by this chapter.

NEW SECTION

WAC 308-330-406 RCW sections adopted—Abandoned, unauthorized, and junk vehicle tow truck operators. The following sections of the Revised Code of Washington (RCW) pertaining to abandoned, unauthorized, and junk vehicle tow truck operators as now or hereafter amended are hereby adopted by reference as a part of this chapter in all respects as though such sections were set forth herein in full: RCW 46.55.010, 46.55.020, 46.55.030, 46.55.035, 46.55.037, 46.55.040, 46.55.050, 46.55.060, 46.55.063, 46.55.070, 46.55.080, 46.55.085, 46.55.090, 46.55.100, 46.55.105, 46.55.110, 46.55.113, 46.55.120, 46.55.130, 46.55.140, 46.55.150, 46.55.160, 46.55.170, 46.55.230, 46.55.240, and 46.55.910.

NEW SECTION

WAC 308-330-408 RCW sections adopted—Traffic laws, signs, signals, markings. The following sections of the Revised Code of Washington (RCW) pertaining to obedience to and effect of traffic laws, traffic signs, signals and markings as now or hereafter amended are hereby adopted by reference as a part of this chapter in all respects as though such sections were set forth herein in full: RCW 46.61.005, 46.61.015, 46.61.020, 46.61.021, 46.61.022, 46.61.024, 46.61.025, 46.61.030, 46.61.035, 46.61.050, 46.61.055, 46.61.060, 46.61.065, 46.61.070, 46.61.072, 46.61.075, 46.61.080, 46.61.085, and 46.61.220.

NEW SECTION

WAC 308-330-409 Traffic control devices required—Stopping, standing, and parking. No prohibition, regulation, or limitation relating to stopping, standing, or parking imposed under this chapter or any ordinance of the local authority for which traffic control devices are required shall be effective unless official traffic control devices are erected and in place at the time of any alleged offense.

NEW SECTION

WAC 308-330-412 Crossing new pavement and markings. No person shall ride or drive any animal, bicycle, or vehicle, across any newly made pavement or freshly applied markings on any highway when a sign, cone marker, or other warning device is in place warning persons not to drive across such pavement or marking.

NEW SECTION

WAC 308-330-415 RCW sections adopted—Right of way. The following sections of the Revised Code of Washington (RCW) pertaining to vehicles and pedestrians use of roadways, right of way, rights and duties as now or

hereafter amended are hereby adopted by reference as a part of this chapter in all respects as though such sections were set forth herein in full: RCW 46.61.100, 46.61.105, 46.61.110, 46.61.115, 46.61.120, 46.61.125, 46.61.130, 46.61.135, 46.61.140, 46.61.145, 46.61.150, 46.61.155, 46.61.160, 46.61.180, 46.61.185, 46.61.190, 46.61.195, 46.61.200, 46.61.202, 46.61.205, 46.61.210, 46.61.215, 46.61.230, 46.61.235, 46.61.240, 46.61.245, 46.61.250, 46.61.255, 46.61.260, 46.61.261, 46.61.264, 46.61.266, and 46.61.269.

NEW SECTION

WAC 308-330-421 RCW sections adopted—Starting and stopping. The following sections of the Revised Code of Washington (RCW) pertaining to turning, starting, signals on stopping and turning, and special stops as now or hereafter amended are hereby adopted by reference as a part of this chapter in all respects as though such sections were set forth herein in full: RCW 46.61.290, 46.61.295, 46.61.300, 46.61.305, 46.61.310, 46.61.315, 46.61.340, 46.61.345, 46.61.350, 46.61.355, 46.61.365, 46.61.370, 46.61.371, 46.61.372, 46.61.375, and 46.61.385.

NEW SECTION

WAC 308-330-423 RCW sections adopted—Speed restrictions. The following sections of the Revised Code of Washington (RCW) pertaining to speed restrictions as now or hereafter amended are hereby adopted by reference as a part of this chapter in all respects as though such sections were set forth herein in full: RCW 46.61.400, 46.61.415, 46.61.425, 46.61.427, 46.61.428, 46.61.435, 46.61.440, 46.61.445, 46.61.450, 46.61.455, 46.61.460, 46.61.465, 46.61.470, and 46.61.475.

NEW SECTION

WAC 308-330-425 RCW sections adopted—Reckless driving, vehicular homicide and assault. The following sections of the Revised Code of Washington (RCW) pertaining to reckless driving, driving while under the influence of intoxicating liquor or any drug, vehicular homicide and assault as now or hereafter amended are hereby adopted by reference as a part of this chapter in all respects as though such sections were set forth herein in full: RCW 46.61.500, 46.61.502, 46.61.504, 46.61.506, 46.61.515, 46.61.517, 46.61.519, 46.61.5191, 46.61.5195, 46.61.525, 46.61.530, 46.61.535, and 46.61.540.

NEW SECTION

WAC 308-330-430 Obedience to angle-parking signs or markings. Upon those highways which have been signed or marked for angle-parking, no person shall park or stand a vehicle other than at the angle to the curb or edge of the roadway indicated by such signs or markings.

NEW SECTION

WAC 308-330-433 Parking not to obstruct traffic. (1) No person shall park a vehicle upon a highway in such a manner or under such conditions as to leave available less

than ten feet of the width of the roadway for free movement of vehicular traffic.

(2) No person shall stop, stand, or park a vehicle within an alley in such position as to block the driveway entrance to any abutting property.

NEW SECTION

WAC 308-330-436 Parking for certain purposes unlawful. (1) No person shall park any vehicle upon any highway for the principle of:

- (a) Displaying advertising;
- (b) Displaying such vehicle for sale;
- (c) Selling merchandise from such vehicle, except when authorized.

(2) No person shall park any vehicle upon any roadway for the principle purpose of washing, greasing, or repairing such vehicle except repairs necessitated by an emergency.

NEW SECTION

WAC 308-330-439 Standing in passenger loading zone. No person shall stop, stand, or park a vehicle for any purpose or period of time other than for the expeditious loading or unloading of passengers in any place marked as a passenger loading zone during hours when the regulations applicable to the loading zone are effective, and then only for a period not to exceed three minutes.

NEW SECTION

WAC 308-330-442 Standing in loading zone. (1) No person shall stop, stand, or park a vehicle for any purpose or period of time other than for the expeditious unloading and delivery or pickup and loading of property in any place marked as a loading zone during hours when the provisions applicable to such zone are in effect. In no case shall the stop for loading and unloading of property exceed thirty minutes.

(2) The driver of a vehicle may stop temporarily at a loading zone for the purpose of and while actually engaged in loading or unloading passengers when such stopping does not interfere with any vehicle which is waiting to enter or about to enter such zone to load or unload property.

NEW SECTION

WAC 308-330-445 Standing in a tow-away zone. No person shall stop, stand, or park a vehicle in a place marked as a tow-away zone during hours when the provisions applicable to such zone are in effect.

NEW SECTION

WAC 308-330-448 Violating permits for loading or unloading at an angle to the curb. It shall be unlawful for any permittee or other person to violate any of the special terms or conditions of any permit issued by the traffic engineer for the backing of a vehicle to the curb for the purpose of loading or unloading property.

NEW SECTION

WAC 308-330-451 Standing or parking on one-way roadways. In the event a highway includes two or more separate roadways, no person shall stand or park a vehicle upon the left-hand side of such one-way roadway unless signs are erected to permit such standing or parking.

NEW SECTION

WAC 308-330-454 Stopping, standing, and parking of buses and taxicabs regulated. (1) The operator of a bus shall not stand or park such vehicle upon any highway at any place other than a designated bus stop. This provision shall not prevent the operator of a bus from temporarily stopping in accordance with other stopping, standing, or parking regulations at any place for the purpose of and while actually engaged in the expeditious loading or unloading of passengers or their baggage.

(2) The operator of a bus shall enter a bus stop or passenger loading zone on a highway in such a manner that the bus when stopped to load or unload passengers or baggage shall be in a position with the right front wheel of such vehicle not farther than eighteen inches from the curb and the bus approximately parallel to the curb so as not to unduly impede the movement of other vehicular traffic.

(3) The operator of a taxicab shall not stand or park such vehicle upon any highway at any place other than in a designated taxicab stand. This provision shall not prevent the operator of a taxicab from temporarily stopping in accordance with other stopping, standing, or parking regulations at any place for the purpose of and while actually engaged in the expeditious loading or unloading of passengers.

NEW SECTION

WAC 308-330-457 Restricted use of bus stops and taxicab stands. No person shall stop, stand, or park a vehicle other than a bus in a bus stop, or other than a taxicab in a taxicab stand when any such stop or stand has been officially designated and appropriately signed, except the driver of a passenger vehicle may temporarily stop there for the purpose of, or while actually engaged in, loading or unloading passengers when such stopping does not interfere with any bus, or taxicab waiting to enter or about to enter such stop or stand.

NEW SECTION

WAC 308-330-460 Right of way for parking. The driver of any vehicle who first begins driving or maneuvering his/her vehicle into a vacant parking space shall have a prior right of way to park in such place, and it shall be unlawful for another driver to attempt to deprive him/her thereof by blocking his/her access or otherwise. For the purpose of establishing right of way in this section it shall be considered proper to back into any but a front-in angle parking space.

NEW SECTION

WAC 308-330-462 RCW sections adopted—Stopping, standing, and parking. The following sections of the Revised Code of Washington (RCW) pertaining to vehicle stopping, standing, and parking as now or hereafter amended are hereby adopted by reference as a part of this chapter in all respects as though such sections were set forth herein in full: RCW 46.61.560, 46.61.570, 46.61.575, 46.61.581, 46.61.582, 46.61.583, and 46.61.590.

NEW SECTION

WAC 308-330-464 RCW sections adopted—Operation and restrictions. The following sections of the Revised Code of Washington (RCW) pertaining to the operation of vehicles and the restriction of certain acts and practices of vehicle operators and passengers as now or hereafter amended are hereby adopted by reference as a part of this chapter in all respects as though such sections were set forth herein in full: RCW 46.61.600, 46.61.605, 46.61.606, 46.61.608, 46.61.610, 46.61.611, 46.61.612, 46.61.614, 46.61.615, 46.61.620, 46.61.625, 46.61.630, 46.61.635, 46.61.640, 46.61.645, 46.61.655, 46.61.660, 46.61.665, 46.61.670, 46.61.675, 46.61.680, 46.61.685, 46.61.687, 46.61.688, 46.61.690, 46.61.700, 46.61.710, 46.61.720, and 46.61.730.

NEW SECTION

WAC 308-330-466 Funeral processions. (1) A funeral procession shall proceed to the place of interment by the most direct route which is both legal and practicable.

(2) A funeral procession shall be accompanied by adequate escort vehicles for traffic control purposes as determined by the chief of police.

(3) All motor vehicles in a funeral procession shall be identified by having their headlights turned on or by such other method as may be determined and designated by the chief of police.

(4) All motor vehicles in a funeral procession shall be operated as near to the right-hand edge of the roadway as is practicable and shall follow the vehicle ahead as close as is practicable and safe.

NEW SECTION

WAC 308-330-469 When permits required for parades and processions. With the exception of funeral processions and parades of the armed forces of the United States, the military forces of this state, and the forces of the police and fire departments, no processions or parades shall be conducted on the highways within the jurisdiction of the local authority except in accordance with a permit issued by the chief of police and such other regulations as are set forth in this chapter which may be applicable.

NEW SECTION

WAC 308-330-472 Interfering with processions. (1) No person shall unreasonably interfere with a procession.

(2) No person shall operate a vehicle that is not part of a procession between the vehicles of the procession. This provision shall not apply at intersections where traffic is

controlled by traffic control devices unless a police officer is present at such intersections to direct traffic so as to preserve the continuity of the procession.

NEW SECTION

WAC 308-330-475 Boarding or alighting from vehicles. No person shall board or alight from any vehicle while such vehicle is in motion.

NEW SECTION

WAC 308-330-478 Unlawful riding. No person shall ride upon any portion of a vehicle not designed or intended for the use of passengers. This provision shall not apply to an employee engaged in the necessary discharge of a duty, or to persons riding within truck bodies in space intended for merchandise.

NEW SECTION

WAC 308-330-481 RCW sections adopted—Operation of nonmotorized vehicles. The following sections of the Revised Code of Washington (RCW) pertaining to the operation of nonmotorized vehicles as now or hereafter amended are hereby adopted by reference as a part of this chapter in all respects as though such sections were set forth herein in full: RCW 46.61.750, 46.61.755, 46.61.758, 46.61.760, 46.61.765, 46.61.770, 46.61.775, and 46.61.780.

NEW SECTION

WAC 308-330-500 Bicycle license required. No person who resides within the jurisdiction of the local authority shall ride or propel a bicycle on any highway or upon any public path set aside for the exclusive use of bicycles unless such bicycle has been licensed and a license plate or decal is attached thereto as provided in WAC 308-330-500 through 308-330-540.

NEW SECTION

WAC 308-330-505 Bicycle license application. Application for a bicycle license and license plate or decal shall be made upon a form provided by and to the chief of police. An annual license fee as prescribed by the local authority shall be paid to the local authority before each license or renewal thereof is granted. Duplicate license plates or decals may be supplied for the same cost as the original plate or decal in the event of loss of the plate or decal.

NEW SECTION

WAC 308-330-510 Issuance of bicycle license. (1) The chief of police upon receiving proper application therefor is authorized to issue a bicycle license which shall be effective for one calendar year.

(2) The chief of police shall not issue a license for any bicycle when he/she knows or has reasonable grounds to believe that the applicant is not the owner of, or entitled to the possession of, such bicycle.

(3) The chief of police shall keep a record of the number of each license, the date issued, the name and

address of the person to whom issued, and a record of all bicycle license fees collected by him.

NEW SECTION

WAC 308-330-515 Attachment of bicycle license plate or decal. (1) The chief of police, upon issuing a bicycle license, shall also issue a license plate or decal bearing the license number assigned to the bicycle, and the name of the local authority.

(2) Such license plate or decal shall be firmly attached to the rear mudguard or frame of the bicycle for which issued in such position as to be plainly visible from the rear.

(3) No person shall remove a license plate or decal from a bicycle during the period for which issued except upon a transfer of ownership or in the event the bicycle is dismantled and no longer operated upon any highway within the jurisdiction of the local authority.

NEW SECTION

WAC 308-330-520 Inspection of bicycles. The chief of police, or an officer assigned such responsibility, may inspect each bicycle before licensing the same and may refuse a license for any bicycle which he/she determines is in unsafe mechanical condition.

NEW SECTION

WAC 308-330-525 Renewal of bicycle license. Upon the expiration of any bicycle license, the same may be renewed upon application and payment of the same fee as upon an original application.

NEW SECTION

WAC 308-330-530 Bicycle transfer of ownership. Upon the sale or other transfer of a licensed bicycle, the licensee shall remove the license plate or decal and shall either surrender the same to the chief of police or may upon proper application, but without payment of additional fee, have such plate or decal assigned to another bicycle owned by the applicant.

NEW SECTION

WAC 308-330-535 Bicycle rental agencies. A rental agency shall not rent or offer any bicycle for rent unless the bicycle is licensed and a license plate or decal is attached thereto as provided herein and such bicycle is equipped with the equipment required by RCW 46.61.780.

NEW SECTION

WAC 308-330-540 Bicycle dealers. Every person engaged in the business of buying or selling new or second-hand bicycles shall make a report to the chief of police of every bicycle purchased or sold by such dealer, giving the name and address of the person from whom purchased or to whom sold, a description of such bicycle by name or make, the frame number thereof, and number of license plate or decal, if any, found thereon.

NEW SECTION

WAC 308-330-545 Bicycles—Obedience to traffic control devices. (1) Any person operating a bicycle shall obey the instructions of official traffic control devices applicable to vehicles, unless otherwise directed by a police officer.

(2) Whenever authorized signs are erected indicating that no right or left or U-turn is permitted, no person operating a bicycle shall disobey the directions of any such sign, except where such person dismounts from the bicycle at the right-hand curb or as close as is practicable to the right edge of the right-hand shoulder to make any such turn, in which event such person shall then obey the regulations applicable to pedestrians.

NEW SECTION

WAC 308-330-550 Bicycles—Parking. No person shall park a bicycle upon a highway other than:

- (1) Off the roadway except in designated areas;
- (2) Upon the sidewalk in a rack to support the bicycle;
- (3) Against a building; or
- (4) In such manner as to afford the least obstruction to pedestrian traffic.

NEW SECTION

WAC 308-330-555 Bicycles—Riding on sidewalks.

(1) No person shall ride a bicycle upon a sidewalk in a business district.

(2) A person may ride a bicycle on any other sidewalk or any roadway unless restricted or prohibited by traffic control devices.

(3) Whenever any person is riding a bicycle upon a sidewalk, such person shall yield the right of way to any pedestrian.

NEW SECTION

WAC 308-330-560 Bicycles—Penalties. Violation of any provision of WAC 308-330-500 through 308-330-540 is a traffic infraction.

NEW SECTION

WAC 308-330-565 Unclaimed bicycles. All unclaimed bicycles in the custody of the police department shall be disposed of as provided in chapter 63.32 RCW.

NEW SECTION

WAC 308-330-600 Parking meter spaces. No person shall park a vehicle in any designated parking meter space during the restricted or regulated time applicable to the parking meter zone in which such meter is located so that any part of such vehicle occupies more than one such space or protrudes beyond the markings designating such space, except that a vehicle which is of a size too large to be parked within a single designated parking meter space shall be permitted to occupy two adjoining parking meter spaces when coins shall have been deposited in the parking meter for each space so occupied as is required for the parking of other vehicles in such spaces.

NEW SECTION

WAC 308-330-610 Parking meters—Deposit of coins and time limits. (1) No person shall park a vehicle in any parking meter space alongside of and next to which a parking meter has been installed during the restricted and regulated time applicable to the parking meter zone in which such meter is located unless a United States coin or coins of the appropriate denomination as indicated on the parking meter shall have been deposited therein, or shall have been previously deposited therein for an unexpired interval of time, and said meter has been placed in operation.

(2) No person shall permit a vehicle within his/her control to be parked in any parking meter space during the restricted and regulated time applicable to the parking meter zone in which such meter is located while the parking meter for such space indicates by signal that the lawful parking time in such space has expired. This provision shall not apply to the act of parking or the necessary time which is required to deposit immediately thereafter a coin or coins in such meter.

(3) No person shall park a vehicle in any parking meter space for a consecutive period of time longer than that limited period of time for which parking is lawfully permitted in the parking meter zone in which such meter is located, irrespective of the number or amounts of the coins deposited in such meter.

(4) The provisions of this section shall not relieve any person from the duty to observe other and more restrictive provisions of this chapter prohibiting or limiting the stopping, standing, or parking of vehicles in specified places or at specified times.

NEW SECTION

WAC 308-330-620 Parking meters—Use of slugs prohibited. No person shall deposit or attempt to deposit in any parking meter any bent coin, slug, button, or any other device or substance as substitutes for United States coins.

NEW SECTION

WAC 308-330-630 Tampering with parking meter. No person shall deface, injure, tamper with, open, or wilfully break, destroy, or impair the usefulness of any parking meter.

NEW SECTION

WAC 308-330-640 Parking meters—Rule of evidence. The parking or standing of any motor vehicle in a parking space, at which space the parking meter displays the sign or signal indicating illegal parking, shall constitute a prima facie presumption that the vehicle has been parked or allowed to stand in such space for a period longer than permitted by this chapter.

NEW SECTION

WAC 308-330-650 Parking meters—Application of proceeds. (1) The coins required to be deposited in parking meters are levied and assessed as fees to cover the regulation and control of parking upon highways, the costs of parking meters, their installation, inspection, supervision, operation,

repair, and maintenance, control and use of parking spaces, and regulating the parking of vehicles in parking meter zones; and the costs of acquiring, establishing, improving, maintaining, and operating public off-street parking facilities.

(2) The coins deposited in parking meters shall be collected by the duly authorized agents of the local authority and shall be deposited by them as directed by the local authority.

(3) The local authority shall pay from the moneys collected from parking meters the costs for any parking meters purchased and installed as provided herein, and expenses incurred for their installation, inspection, service, supervision, repair, and maintenance, for making collections from such parking meters, and for the enforcement of provisions herein applicable to parking meter zones. The net proceeds derived from the operation of parking meters after the payment of such costs and expenses, may be used for parking studies and for the acquisition, establishment, improvement, maintenance, and operation of public off-street parking facilities.

NEW SECTION

WAC 308-330-660 Service parking. The chief of police is authorized to issue a permit for service parking upon payment of the fee prescribed by the local authority and upon the following conditions:

(1) Application shall be made to the chief of police on such forms as the chief of police shall prescribe. The applicant shall set forth the applicant's business and the necessity for such permit. The chief of police shall investigate the facts as necessary.

(2) If it appears that a necessity exists, the chief of police may authorize the issuance of such permit under the conditions prescribed in this section.

(3) Upon issuance of the permit, the permittee shall be issued a hood to use in covering any parking meter. As many hoods may be issued upon payment of the prescribed fee as the chief of police deems necessary or convenient for the applicant. The hood shall be provided with a padlock, tow keys, and an identification card attached with a blank space thereon.

(4) Upon entering any parking meter space available, the permittee shall place the hood over the parking meter and lock the same and shall indicate in such blank space the exact place where the service work is being rendered.

(5) The permittee shall not place the hood over any meter when the space is occupied by another vehicle, and shall before vacating the space at the conclusion of the work remove the hood. The hood shall not be allowed to remain in place for over one hour when the space is not occupied by an authorized vehicle, nor shall it be allowed to remain in place after 6:00 p.m. on any weekday or on any Sunday or holiday. It shall not be used during hours when parking or stopping in the parking meter space is prohibited. No vehicle licensed as a passenger car shall be parked in the space covered by the hooded parking meter.

(6) The chief of police may revoke any permit if the service parking hood is used for any purpose other than that authorized in this section or for any violation of this chapter. Upon revocation, the hood shall immediately be returned to the police department and all fees paid shall be forfeited.

Police officers finding such hood in use shall investigate the use being made thereof, and if it is found in violation of this section shall report the facts to the chief of police.

(7) Any permit issued under this section shall, unless revoked, be valid for a period of one year.

(8) The permittee shall also pay a deposit in an amount prescribed by the local authority at the time of issuance of the hood, padlock, and keys, which shall remain the property of the local authority. In case a hood, a padlock, or key becomes lost or destroyed or so defaced that it is no longer usable, the permittee shall forfeit deposit.

NEW SECTION

WAC 308-330-700 RCW sections adopted—Disposition of traffic infractions. The following sections of the Revised Code of Washington (RCW) pertaining to the disposition of traffic infractions as now or hereafter amended are hereby adopted by such reference as a part of this chapter in all respects as though such sections were set forth herein in full: RCW 46.63.010, 46.63.020, 46.63.030, 46.63.040, 46.63.060, 46.63.070, 46.63.080, 46.63.090, 46.63.100, 46.63.110, 46.63.120, 46.63.130, 46.63.140, and 46.63.151.

NEW SECTION

WAC 308-330-705 RCW sections adopted—Enforcement. The following sections of the Revised Code of Washington (RCW) pertaining to traffic enforcement agencies as now or hereafter amended are hereby adopted by reference as a part of this chapter in all respects as though such sections were set forth herein in full: RCW 46.64.010, 46.64.015, 46.64.025, 46.64.030, 46.64.035, 46.64.048, and 46.64.050.

NEW SECTION

WAC 308-330-710 Penalties. Unless another penalty is expressly provided by law, any person found to have committed an act designated a traffic infraction under the provisions of these rules shall be punished by a penalty of not more than two hundred fifty dollars.

NEW SECTION

WAC 308-330-720 Citation on illegally parked vehicle. Whenever any motor vehicle without driver is found parked, standing, or stopped in violation of this chapter, the officer finding such vehicle shall take its registration number and may take any other information displayed on the vehicle which may identify its user, and shall conspicuously affix to such vehicle a traffic citation.

NEW SECTION

WAC 308-330-730 Failure to comply with traffic citation attached to parked vehicle. If a violator of any provision of this chapter on stopping, standing, or parking does not appear in response to a traffic citation affixed to such motor vehicle within a period of five days, the clerk of the traffic court shall send to the owner of the motor vehicle to which the traffic citation was affixed a letter informing him/her of the violation and warning him/her that in the

event such letter is disregarded for a period of five days, a warrant of arrest will be issued.

NEW SECTION

WAC 308-330-740 Presumption in reference to illegal parking. (1) In any prosecution charging a violation of any law or regulation governing the stopping, standing, or parking of a vehicle, proof that the particular vehicle described in the complaint was stopping, standing, or parking in violation of any such law or regulation, together with proof that the defendant named in the complaint was at the time of such violation, the registered owner of such vehicle, shall constitute in evidence a prima facie presumption that the registered owner of such vehicle was the person who parked or placed such vehicle at the point where, and for the time during which, such violation occurred.

(2) The foregoing stated presumption shall apply only when the procedure as prescribed in WAC 308-330-720 and 308-330-730 has been followed.

NEW SECTION

WAC 308-330-800 RCW sections adopted—Traffic control devices. The following sections of the Revised Code of Washington (RCW) pertaining to traffic control devices as now or hereafter amended are hereby adopted by reference as a part of this chapter in all respects as though such sections were set forth herein in full: RCW 47.36.060, 47.36.110, 47.36.180, 47.36.200, and 47.36.220.

NEW SECTION

WAC 308-330-810 RCW sections adopted—Limited access facilities. The following sections of the Revised Code of Washington (RCW) pertaining to limited access facilities as now or hereafter amended are hereby adopted by reference as a part of this chapter in all respects as though such sections were set forth herein in full: RCW 47.52.010, 47.52.011, 47.52.040, 47.52.110, and 47.52.120.

NEW SECTION

WAC 308-330-815 RCW sections adopted—Alcoholic beverage control. The following sections of the Revised Code of Washington (RCW) pertaining to drinking in public conveyance as now or hereafter amended are hereby adopted by reference as a part of this chapter in all respects as though such sections were set forth herein in full: RCW 66.44.240 and 66.44.250.

NEW SECTION

WAC 308-330-820 RCW sections adopted—Guide and service dogs. The following sections of the Revised Code of Washington (RCW) pertaining to guide and service dogs as now or hereafter amended are hereby adopted by reference as a part of this chapter in all respects as though such sections were set forth herein in full: RCW 70.84.020, 70.84.021, and 70.84.040.

NEW SECTION

WAC 308-330-825 RCW sections adopted—Littering. The following section of the Revised Code of Washington (RCW) pertaining to littering as now or hereafter amended is hereby adopted by reference as a part of this chapter in all respects as though such section were set forth herein in full: RCW 70.93.060.

NEW SECTION

WAC 308-330-910 Uniformity of interpretation. This chapter shall be so interpreted and construed as to effectuate its general purpose to make uniform the laws of those local authorities which enact it.

WSR 94-01-083
PERMANENT RULES
PUGET SOUND AIR
POLLUTION CONTROL AGENCY
[Filed December 13, 1993, 2:13 p.m.]

Date of Adoption: December 9, 1993.

Purpose: To make specific agency regulations federally enforceable, to provide additional time for compliance with the VOC limit for commercial aerospace topcoat, to provide additional time for development of an appropriate continuous emission monitoring standard for vapor recovery units, and to clarify the regulations.

Citation of Existing Rules Affected by this Order: Repealing PSAPCA Regulation I - Section 9.06 and Regulation II - Sections 4.02, 4.04, and 4.05; amending PSAPCA Regulation I - Section 9.05, Regulation II - Sections 2.05, 3.04, 3.05, 3.08, 3.09 and 3.11, and Regulation III - Section 3.01.

Statutory Authority for Adoption: Chapter 70.94 RCW. Pursuant to notice filed as WSR 93-22-112 on November 3, 1993.

Changes Other than Editing from Proposed to Adopted Version: In Regulation II, Section 3.09, instead of requiring all commercial aerospace topcoats to comply by May 1, 1994, those topcoats already qualified will have to meet the standard by January 1, 1994; while the remaining topcoats must be qualified and comply by January 1, 1995.

Effective Date of Rule: Thirty-one days after filing.

December 10, 1993

Gerald S. Pade

Air Pollution Engineer

NEW SECTION

REGULATION I SECTION 3.23 ALTERNATE MEANS OF COMPLIANCE

Other emission reduction methods may be employed to achieve compliance with the emissions standards of Regulations I, II, and III if the owner or operator demonstrates to the satisfaction of the Control Officer that they are at least as effective as the required methods and they are included in a permit issued under Articles 6 or 7 of this Regulation.

AMENDATORY SECTION

**REGULATION I SECTION 9.05 ((INCINERATOR))
REFUSE BURNING**

- (a) It shall be unlawful for any person to cause or allow the burning of combustible refuse except in a multiple chamber incinerator ((as defined in Section 1.07 and)) provided with ((emission)) control equipment((, or in equipment found by the Control Officer in advance of such use to be equally effective for the purpose of air pollution control)).
- (b) It shall be unlawful for any person to cause or allow the operation of refuse burning equipment any time other than daylight hours.

REPEALER

**REGULATION I SECTION 9.06 REFUSE BURNING
EQUIPMENT: TIME RESTRICTION**

AMENDATORY SECTION

**REGULATION II SECTION 2.05 GASOLINE LOADING
TERMINALS**

- (a) Section 2.05 shall apply to all gasoline loading terminals with an annual gasoline throughput greater than 7,200,000 gallons.
- (b) It shall be unlawful for any person to cause or allow the loading of gasoline into any transport tank unless all the following conditions are met:
 - (1) The loading terminal shall employ bottom loading and be equipped with a vapor recovery system;
 - (2) All loading lines and vapor lines shall be equipped with vapor-tight fittings that close automatically upon disconnect;
 - (3) All vapor return lines shall be connected between the transport tank and the vapor recovery system such that all displaced volatile organic compounds are vented to the vapor recovery system; and
 - (4) The back-pressure in the vapor lines shall not exceed 4.5 kPa (18 inches) of water pressure.
- (c) The vapor recovery system required by ((Section 2.05(b))) this section shall prevent the emission of at least 90% by weight of the volatile organic compounds and shall limit the emission of volatile organic compounds to no more than 35 ((80)) milligrams per liter (mg/l) of gasoline transferred.
 ((After December 31, 1993, the vapor recovery system shall limit the emission of VOC to no more than 35 mg/l of gasoline transferred and 2.0% VOC by volume, measured as propane. If the existing system cannot meet these emission limits, the owner shall submit a Notice of Construction for a new or modified system by September 1, 1992.))
- (d) The vapor recovery system required by Section 2.05(b) shall be equipped with a continuous emission monitoring system meeting the requirements of Article 12 of Regulation I.
- ((e) The provisions of Section 2.05(d) shall take effect May 1, 1992.)

AMENDATORY SECTION

**REGULATION II SECTION 3.04 MOTOR VEHICLE
AND MOBILE EQUIPMENT COATING OPERATIONS**

- (a) It shall be unlawful for any person to cause or allow the application of any coating with a VOC content in excess of the following limits to Group I vehicles and their parts and components, or Group II vehicles and mobile equipment where color match is required:

| Type of Coating | VOC Content (excluding water ((but including negligibly reactive compounds))) | |
|-----------------------------|--|-----------|
| | Grams/Liter | (Lbs/Gal) |
| Pretreatment Wash Primer | 780 | (6.5) |
| Precoat | 780 | (6.5) |
| Primer/Primer Surfacer | 720 | (6.0) |
| Primer Sealer | 720 | (6.0) |
| Topcoat | 720 | (6.0) |
| Metallic/Iridescent Topcoat | 720 | (6.0) |

- (b) It shall be unlawful for any person to cause or allow the application of any coating with a VOC content in excess of the following limits to Group II vehicles and mobile equipment where color match is not required:

| Type of Coating | VOC Content (excluding water ((but including negligibly reactive compounds))) | |
|-----------------------------|--|----------|
| | Grams/Liter | (Lb/Gal) |
| Pretreatment Wash Primer | 780 | (6.5) |
| Precoat | 780 | (6.5) |
| Primer | 340 | (2.8) |
| Topcoat | 420 | (3.5) |
| Metallic/Iridescent Topcoat | 650 | (5.4) |
| Extreme Performance | 750 | (6.2) |
| Camouflage | 420 | (3.5) |

- (c) It shall be unlawful for any person to cause or allow the use of any specialty coating with a VOC content in excess of 840 grams/liter (7.0 lbs/gal), excluding water. Use of all specialty coatings except antiglare/safety coatings shall not exceed 5.0% of all coatings applied on a daily basis.
- (d) The maximum calculated VOC content of each coating regulated by ((Section 3.04)) this section shall be displayed on the container, or be provided in a handout at the point of sale to the end user, or be provided by other sources and be available for inspection in order to evaluate compliance.
- (e) It shall be unlawful for any person to cause or allow the application of any VOC-containing material((, including any negligibly reactive compound,)) to any Group I or II vehicle or mobile equipment or their parts and components unless the coating is applied by the use of one of the following methods:
 - (1) High volume, low pressure (0.1 to 10 psig air pressure for atomization) ((application)) spray equipment,
 - (2) Electrostatic ((application)) spray equipment,
 - (3) Flow coat ((application)),
 - (4) Dip coat ((application)),
 - (5) Brush coat ((application)),
 - (6) Hand-held aerosol cans,
 - (7) Roll coat ((application)), or

PERMANENT

- (8) Air brush (~~Other application methods that have received the prior written approval of the Control Officer~~).
- ~~((f)) The provisions of Section 3.04(e) shall not apply to equipment used for the application of touch up coatings, stencil coatings, or other similar applications that have received the prior written approval of the Control Officer.~~
- ~~(f)~~
~~((g))~~ It shall be unlawful for any person to use any VOC-containing material (~~(including any negligibly reactive compound)~~) for the cleanup of spray equipment, including paint lines, unless equipment for collecting the VOC-containing material (~~(including any negligibly reactive compound)~~) and minimizing the evaporation to the atmosphere is employed. All VOC-containing materials (~~(including any negligibly reactive compound)~~) that are flushed through the spray equipment or lines during cleanup shall be collected in a closed container.
- ~~(g)~~
~~((h))~~ It shall be unlawful for any person to use open containers for the storage or disposal of VOC-containing materials (~~(including any negligibly reactive compound)~~). Such containers and tanks shall be kept closed except when being cleaned or when materials are being added, mixed, or removed. Closed containers for solvent rag or paper disposal are required. Empty containers as defined in WAC 173-303-160 are exempt.
- ~~((i)) The provisions of Section 3.04 shall become effective January 1, 1992; except that for Topcoat and Clearcoat applications, Section 3.04(e) shall become effective January 1, 1993.~~

AMENDATORY SECTION

REGULATION II SECTION 3.05 GRAPHIC ARTS SYSTEMS

- (a) This section shall apply to all rotogravure and flexographic printing facilities that use more than 90 megagrams (100 tons) per year of volatile organic compounds.
- (b) Machines that have both coating units (apply a uniform layer of material across the entire width of a web) and printing units (forming words, designs and pictures) shall be included under this section rather than Section 3.03 of this Regulation (~~(Can and Paper Coating Operations)~~).
- (c) It shall be unlawful for any person to operate a facility subject to this regulation unless:
- (1) The volatile fraction of ink, as it is applied to the substrate, contains 25% by volume or less of volatile organic compounds;
 - (2) The ink, as it is applied to the substrate, less water, contains 60% by volume or more nonvolatile material; or,
 - (3) The owner or operator installs and operates:
 - (A) A capture system (~~(which)~~) that shall collect at least:

- (i) 75% of the emissions from a publication rotogravure process; or
 - (ii) 65% of the emissions from a packaging rotogravure process; or
 - (iii) 60% of the emissions from a flexographic process; and
- (B) (~~(A carbon adsorption system which)~~) Control equipment that reduces the volatile organic compound emissions from the capture system by at least 90% by weight (~~(or~~
- ~~(C) An equivalent volatile organic compound emission reduction system approved by the Control Officer).~~

AMENDATORY SECTION

REGULATION II SECTION 3.08 POLYESTER, VINYLESTER, GELCOAT, AND RESIN OPERATIONS

- (a) (~~(Section 3.08)~~) This section shall apply to manufacturing operations involving the use of polyester, vinylester, gelcoat, or resin in which the styrene monomer is a reactive monomer for the resin.
- (b) It shall be unlawful for any person to cause or allow the application of polyester resin, vinylester resin, gelcoat, or any other resin (~~(in a manufacturing facility)~~) unless the operation is conducted inside an enclosed area that is registered with the Agency. The exhaust from the operation shall be vented to the atmosphere through a vertical stack (~~(or through the use of another technique that has received the prior written approval of the Control Officer)~~). For spray-coating applications of polyester resin, vinylester resin, gelcoat, or any other resin, the enclosed area shall incorporate a dry filter to control the overspray.
- (c) It shall be unlawful for any person to use a chopper gun or spray gun to apply polyester resin, vinylester resin, gelcoat, or any other resin, unless the coating is applied by the use of one of the following methods:
- (1) High volume, low pressure (0.1 to 10 psig air pressure for atomization) (~~(application)~~) spray equipment,
 - (2) Electrostatic (~~(application)~~) spray equipment,
 - (3) Airless (~~(application)~~) spray equipment, or
 - (4) Air-assisted airless (~~(application)~~) spray equipment (~~(or~~
 - ~~(5) Other application methods that have received the prior written approval of the Control Officer).~~
- (d) The provisions of Section 3.08(c) shall not apply to touchup and repair using a hand-held, air atomized spray gun that has a container for resin as part of the gun.
- (e) It shall be unlawful for any person to use any VOC-containing material (~~(including any negligibly reactive compound)~~) for the cleanup of spray equipment, including resin lines, unless equipment for collecting the VOC-containing material (~~(including any negligibly reactive compound)~~) and minimizing the evaporation to the atmosphere is employed. All VOC-containing materials (~~(including any negligibly reactive compound)~~) that are flushed through the spray equipment or

lines during cleanup shall be collected in a closed container.

- (f) It shall be unlawful for any person to use open containers for the storage or disposal of VOC-containing materials(~~(, including any negligibly reactive compound)~~). Such containers and tanks shall be kept closed except when being cleaned or when materials are being added, mixed, or removed. Closed containers for solvent rag or paper disposal are required. Empty containers as defined in WAC 173-303-160 are exempt.
- ~~((g) The provisions of Section 3.08 shall become effective January 1, 1992.))~~

AMENDATORY SECTION

REGULATION II SECTION 3.09 AEROSPACE COMPONENT COATING OPERATIONS

- (a) ~~((Section 3.09))~~ This section shall apply to any operation in which coatings are applied to aerospace components.
- (b) It shall be unlawful for any person to cause or allow the application of any coating specified below that contains in excess of the following limits:

| Type of Coating | VOC Content (excluding water) | |
|------------------------------|----------------------------------|-----------|
| | Grams/Liter | (Lbs/Gal) |
| Military Aerospace Topcoat | 420 | (3.5) |
| Commercial Aerospace Topcoat | 420 | (3.5) |
| Military Aerospace Primer | 350 | (2.9) |
| Commercial Aerospace Primer | 350 | (2.9) |
| Temporary Protective Coating | 250 | (2.1) |

- ~~((1) The application of any primer or topecoat specified below to aerospace components that contains in excess of:~~
- ~~(A) 350 grams of VOC per liter of military aerospace primer, less water, including any negligibly reactive compound, as applied.~~
- ~~(B) 420 grams of VOC per liter of military aerospace topecoat, less water, including any negligibly reactive compound, as applied.~~
- ~~(C) Beginning January 1, 1994, 350 grams of VOC per liter of commercial aerospace primer, less water, including any negligibly reactive compound, as applied. Any conversion to water based primer before July 1, 1992 may be banked as an emission credit pursuant to Section 6.08 of Regulation I.~~
- ~~(D) Beginning January 1, 1994, 420 grams of VOC per liter of commercial aerospace topecoat, less water, including any negligibly reactive compound, as applied. Any conversion to high solids topecoat before July 1, 1992 may be banked as an emission credit pursuant to Section 6.08 of Regulation I.~~
- ~~(E) Until December 31, 1993, 650 grams of VOC per liter of commercial aerospace primer, less water, including any negligibly reactive compound, as supplied.~~
- ~~(F) Until December 31, 1993, 600 grams of VOC per liter of commercial aerospace topecoat, less~~

~~water, including any negligibly reactive compound, as supplied.~~

- ~~(2) The application of any temporary protective coating that contains more than 250 grams of VOC per liter of material, less water, including any negligibly reactive compound, as applied.~~
- ~~(e) The emission limits of Section 3.09(b) shall be achieved by:~~
 - ~~(1) The application of reasonably available low solvent coating technology;~~
 - ~~(2) A vapor collection and disposal system; or~~
 - ~~(3) An equivalent method of VOC reduction certified by the owner or operator and approved by the Control Officer.))~~

~~(c)~~
~~((d))~~ It shall be unlawful for any person to cause or allow the application of any ~~((primer, topecoat or temporary protective coating to any aerospace component))~~ coating listed in Section 3.09(b) unless the coating is applied by the use of one of the following methods:

- (1) High volume, low pressure (0.1 to 10 psig air pressure for atomization) ~~((application))~~ spray equipment,
- (2) Electrostatic ~~((application))~~ spray equipment,
- (3) Flow coat ~~((application))~~,
- (4) Dip coat ~~((application))~~,
- (5) Brush coat ~~((application))~~,
- (6) Trowel coat ~~((application))~~,
- (7) Hand-held aerosol cans,
- (8) Roll coat ~~((application))~~,
- (9) Electrodeposition ~~((application))~~,
- (10) Curtain coat ~~((application))~~, or
- (11) Air brush ~~((Other application methods that have received the prior written approval of the Control Officer))~~.

- ~~((e)) The provisions of Sections 3.09 (b) and (d) shall not apply to the following materials:~~
 - ~~(1) Coatings for masking in chemical etching operations;~~
 - ~~(2) Adhesive bonding primer;~~
 - ~~(3) Flight test coatings;~~
 - ~~(4) Space vehicle coatings;~~
 - ~~(5) Fuel tank coatings; or~~
 - ~~(6) Specialty coatings.~~

~~(f) The provisions of Section 3.09(d) shall not apply to equipment used for the application of touch-up coatings, stencil coatings, wire markings, inks, and sheet mold compounds, or other similar applications that have received the prior written approval of the Control Officer.))~~

~~(d)~~
~~((g))~~ It shall be unlawful for any person to use any VOC-containing material(~~(, including any negligibly reactive compound;))~~ for the cleanup of spray equipment, including paint lines, unless equipment for collecting the VOC-containing material(~~(, including any negligibly reactive compound;))~~ and minimizing the evaporation to the atmosphere is employed. All VOC-containing materials(~~(, including any negligibly reactive compound;))~~ that are

PERMANENT

flushed through the spray equipment or lines during cleanup shall be collected in a closed container.

~~(e)~~
~~((#))~~ It shall be unlawful for any person to use open containers for the storage or disposal of VOC-containing materials (~~(, including any negligibly reactive compound)~~). Such containers shall be kept closed except when being cleaned or when materials are being added, mixed, or removed. Closed containers for solvent rag or paper disposal are required. Empty containers as defined in WAC 173-303-160 are exempt.

~~(f)~~
~~((#))~~ The VOC limit for commercial aerospace topcoat in ((provisions of)) Section 3.09(b) ((3.09(d))) shall become effective January 1, 1994, except for those topcoat tints that have not been qualified as of that date. All commercial aerospace topcoats must meet the VOC limit no later than January 1, 1995 ((1992)).

AMENDATORY SECTION

REGULATION II SECTION 3.11 COATINGS AND INK MANUFACTURING

- (a) ~~((The purpose of Section 3.11 is to limit emissions of VOC from mixing vats at coating and ink manufacturing complexes. Section 3.11))~~ This section shall apply to any paint or ink manufacturing facility that mixes, blends, or compounds paints, varnishes, lacquers, enamels, shellacs, printing inks or sealers that contain volatile organic compounds.
- (b) It shall be unlawful for any person to manufacture coatings or inks unless all mixing vats containing VOC (~~(, including any negligibly reactive compound,))~~ are kept covered, except to add ingredients or to take samples, with lids that satisfy all the following conditions:
- (1) Lids shall extend at least 1/2 inch beyond the outer rim of the vat or be attached to the rim of the vat;
 - (2) Lids shall be maintained in good condition such that, when in place, they maintain contact with the rim for at least 90% of the circumference of the rim of the vat;
 - (3) Lids may have a slit to allow clearance for insertion of a mixer shaft. The slit shall be covered after insertion of the mixer, except to allow safe clearance for the mixer shaft.
- (c) It shall be unlawful for any person to cause or allow the use of VOC-containing materials (~~(, including any negligibly reactive compound,))~~ for vat cleaning unless the cleaning is done in a manner that minimizes the emissions of VOCs.
- ~~((d))~~ ~~The provisions of Section 3.11 shall become effective January 1, 1992.)~~

REPEALER

REGULATION II ARTICLE 4: GENERAL PROVISIONS

REPEALER

REGULATION II SECTION 4.02 TESTING AND MONITORING

REPEALER

REGULATION II SECTION 4.04 EXCEPTIONS TO VOC EMISSION STANDARDS AND REQUIREMENTS

REPEALER

REGULATION II SECTION 4.05 SEPARABILITY

AMENDATORY SECTION

REGULATION III SECTION 3.01 CHROMIC ACID PLATING AND ANODIZING

- (a) It shall be unlawful for any person to cause or allow the operation of any chromic acid plating or anodizing tank unless the tank is equipped with a permanent ampere-hour accumulator that is operating at all times electrical current is applied to the tank and the facility-wide uncontrolled hexavalent chromium emissions from plating or anodizing tanks are reduced by at least 95% using either of the following control techniques:
- (1) An anti-mist additive (~~((or other equally effective control method which has been approved by the Control Officer))~~) shall be employed; or
 - (2) The tank shall be equipped with:
 - (A) A capture system (~~((approved by the Control Officer, which))~~) that represents good engineering practice and (~~((which))~~) that shall be in place and in operation at all times electrical current is applied to the tank; and
 - (B) Control equipment or a ((A)) combination of anti-mist additives ((or other control method and use of control devices which)) and control equipment that collectively ((shall)) limit hexavalent chromium emissions to less than 0.15 milligrams per ampere-hour of electrical charge applied to the tank.
- (b) It shall be unlawful for any person to cause or allow the operation of any chromic acid plating or anodizing tank at a facility where the facility-wide hexavalent chromium emissions from chromic acid plating and anodizing are greater than 1 kilogram per year after the application of the control techniques required by Section 3.01(a) ((above)), unless the facility-wide uncontrolled hexavalent chromium emissions from plating and anodizing tanks are reduced by at least 99% using either of the following control techniques:
- (1) An anti-mist additive (~~((or other equally effective control method which has been approved by the Control Officer))~~) shall be employed; or
 - (2) The tank shall be equipped with:
 - (A) A capture system (~~((approved by the Control Officer, which))~~) that represents good engineering practice and (~~((which))~~) that shall be in

place and in operation at all times electrical current is applied to the tank; and

- (B) Control equipment or a ((A)) combination of anti-mist additives ((or other control method and use of control devices which)) and control equipment that collectively ((shall)) limit hexavalent chromium emissions to less than 0.03 milligrams per ampere-hour of electrical charge applied to the tank.
- (c) It shall be unlawful for any person to cause or allow the operation of any chromic acid plating or anodizing tank at a facility where the facility-wide hexavalent chromium emissions from chromic acid plating and anodizing would be greater than 1 kilogram per year after the application of the control techniques required by Section 3.01(b) ((above)), unless the facility-wide uncontrolled hexavalent chromium emissions from plating and anodizing tanks are reduced by at least 99.8% using either of the following control techniques:
- (1) An anti-mist additive (~~((or other equally effective control method which has been approved by the Control Officer))~~) shall be employed; or
 - (2) The tank shall be equipped with:
 - (A) A capture system (~~((approved by the Control Officer, which))~~) that represents good engineering practice and (~~((which))~~) that shall be in place and in operation at all times electrical current is applied to the tank; and
 - (B) Control equipment or a ((A)) combination of anti-mist additives ((or other control method and use of control devices which)) and control equipment that collectively ((shall)) limit hexavalent chromium emissions to less than 0.006 milligrams per ampere-hour of electrical charge applied to the tank.
- (d) The owner or operator of the source shall report the facility-wide hexavalent chromium emissions to the Agency annually using procedures approved by the Control Officer.
- ~~((e) The provisions of Sections 3.01 (b) and (c) shall be met on the following schedule:~~
- ~~(1) Submit Progress Report by January 1, 1992; and~~
 - ~~(2) Achieve Final Compliance by July 1, 1992.)~~

WSR 94-01-084
PERMANENT RULES
YAKIMA COUNTY
CLEAN AIR AUTHORITY
 [Filed December 13, 1993, 2:21 p.m.]

Date of Adoption: December 8, 1993.

Purpose: Explicitly state fees and fee schedules for source registration, notices of construction, asbestos removal notification, outdoor burning permits, and air operating permits.

Citation of Existing Rules Affected by this Order: Amending restated Regulation I of the YCCAA.

Statutory Authority for Adoption: Chapter 70.94 RCW.

Pursuant to notice filed as WSR 93-21-048 on October 18, 1993.

Changes Other than Editing from Proposed to Adopted Version: Clarification of terms in following subsections: Chapter 1.03(48), 1.03(49), 4.01(16), 4.01(27), 4.01(29), 4.01(30), 5.06(H), 9.04(A), and 9.04(E). Reference changed from chapter 70.94 RCW to chapter 173-401 WAC in Sections 6.01 and 6.02(B). Reference to chapter 173-490 WAC added to Section 12.01. Addition of Attachments 1 and 2, maps of Woodsmoke Control Zone and Yakima Urban Area, respectively.

Effective Date of Rule: Thirty-one days after filing.

December 10, 1993

Tom T. Silva, Director
 Air Pollution Control Officer

SECTION 4.01 - REGISTRATION

A. The owner or operator of each source within the following source categories, that does not hold an operating permit, shall register the source with the Authority:

1. Agricultural drying and dehydrating operations;
2. Asphalt plants;
3. Beverage can surface coating operations;
4. Bulk gasoline terminals;
5. Cattle feed lots; for the purposes of registration a cattle feed lot is a place with facilities for 1,000 or more head of cattle which are kept closely confined for commercial purposes and substantially all feed used is delivered to them;
6. Chemical plants;
7. Ferrous foundries;
8. Fertilizer plants;
9. Flexible vinyl and urethane coating and printing operations;
10. Grain handling, seed processing, pea and lentil processing;
11. Metallic mineral processing plants;
12. Mineralogical processing plants;
13. Nonferrous foundries;
14. Other metallurgical processing plants;
15. Petroleum refineries;
16. Power boilers;
17. Rendering plants;
18. Scrap metal operations;
19. Synthetic organic chemical manufacturing industries;
20. Sulfuric acid plants;
21. Synthetic fiber production facilities;
22. Veneer dryers;
23. Wood waste incinerators including wigwam burners;
24. Other incinerators designed for a capacity of 100 lbs. per hour or more;
25. Stationary internal combustion engines rated at 500 h.p. or more;
26. Sawmills, including processing for lumber, plywood, shake, shingle, pulp wood, insulating board, or any combination thereof.
27. Any category of stationary sources to which a New Source Performance Standard (NSPS) applies. The categories as identified in the federal regulations 40 CFR Part 60 (January 1, 1993) are as follows:

| | | | |
|------------|---|------------------------|--|
| Subpart D | Fossil fuel fired steam generators for which construction commenced after August 17, 1971, and prior to September 19, 1978, which have a heat input greater than 73 megawatts but not greater than 250 megawatts | Subpart Z | Ferroalloy production facilities |
| | | Subpart AA | Steel plants: Electric arc furnaces |
| | | Subpart AAa | Steel plants: Electric arc furnaces and argon-oxygen decarburization vessels |
| Subpart Da | Electric utility steam generating units for which construction commenced after September 18, 1978, which have a heat input greater than 73 megawatts but not greater than 250 megawatts | Subpart BB | Kraft pulp mills |
| | | Subpart CC | Glass manufacturing plants |
| | | Subpart DD | Grain elevators |
| | | Subpart EE | Industrial surface coating: Metal furniture |
| Subpart Db | Industrial-commercial-institutional steam generating units for which construction commenced after June 19, 1984, and prior to June 19, 1986, which have a heat input greater than 29 megawatts but less than 73 megawatts | Subpart GG | Stationary gas turbines |
| | | Subpart HH | Lime manufacturing plants |
| | | Subpart KK | Lead-acid battery plants |
| | | Subpart LL | Metallic mineral processing plants |
| | | Subpart MM | Automobile and light duty truck surface coating operations |
| Subpart Dc | Small industrial-commercial-institutional steam generating units | Subpart NN | Phosphate rock plants |
| Subpart E | Incinerators | Subpart PP | Ammonium sulfate manufacture |
| Subpart Ea | Municipal waste combustors | Subpart QQ | Publication rotogravure printing |
| Subpart F | Portland cement plants | Subpart RR | Pressure sensitive tape and label surface coating operations |
| Subpart G | Nitric acid plants | Subpart SS | Industrial surface coating: Large appliances |
| Subpart H | Sulfuric acid plants | Subpart TT | Industrial surface coating: Metal coils |
| Subpart I | Asphalt concrete plants | Subpart UU | Asphalt processing and asphalt roofing manufacture |
| Subpart J | Petroleum refineries which produce less than 25,000 barrels per day of refined products | Subpart VV | SOCMI equipment leaks (VOC) |
| Subpart K | Storage vessels for petroleum liquid constructed after June 11, 1973, and prior to May 19, 1978, which have a capacity greater than 40,000 gallons | Subpart WW | Beverage can surface coating operations |
| Subpart Ka | Storage vessels for petroleum liquids constructed after May 18, 1978, which have a capacity greater than 40,000 gallons | Subpart XX | Bulk gasoline terminals |
| Subpart Kb | Volatile organic liquid storage vessels (including petroleum liquid storage vessels) constructed, reconstructed, or modified after July 23, 1984 | Subpart AAA | New residential wood heaters |
| Subpart L | Secondary lead smelters | Subpart BBB | Rubber tire manufacturing industry |
| Subpart M | Brass and bronze ingot production plants | Subpart DDD | VOC emissions from the polymer manufacturing industry |
| Subpart N | Iron and steel plants | Subpart FFF | Flexible vinyl and urethane coating and printing |
| Subpart O | Sewage treatment plants | Subpart GGG | Petroleum refineries - compressors and fugitive emission sources |
| Subpart P | Primary copper smelters | Subpart HHH | Synthetic fiber production facilities |
| Subpart Q | Primary zinc smelters | Subpart III | VOC emissions from SOCMI air oxidation unit processes |
| Subpart R | Primary lead smelters | Subpart JJJ | Petroleum dry cleaners |
| Subpart S | Primary aluminum reduction plants | Subpart KKK | Equipment leaks of VOC from onshore natural gas processing plants |
| Subpart T | Phosphate fertilizer industry: Wet process phosphoric acid plants | Subpart LLL | Onshore natural gas processing; SO ₂ emissions |
| Subpart U | Phosphate fertilizer industry: Superphosphoric acid plants | Subpart NNN | VOC emissions from SOCMI distillation operations |
| Subpart V | Phosphate fertilizer industry: Diammonium phosphate plants | Subpart PPP | Wool fiberglass insulation manufacturing plants |
| Subpart W | Phosphate fertilizer industry: Triple superphosphate plants | Subpart QQQ | VOC emissions from petroleum refinery wastewater emissions |
| Subpart X | Phosphate fertilizer industry: Granular triple superphosphate storage facilities | Subpart SSS | Magnetic tape coating facilities |
| Subpart Y | Coal preparation plants | Subpart TTT | Industrial surface coating: Surface coating of plastic parts for business machines |
| | | Subpart VVV | Polymeric coating of supporting substrates facilities: |

Note: For fossil fuel fired steam generators referenced by Subpart D and Da above, units greater than 250 megawatts are governed by the energy facility site.

28. Any source which emits a contaminant subject to a National Emission Standard for Hazardous Air Pollutants (NESHAPS);

29. Any major stationary source as defined below; "Major source" means any stationary source (or any group of stationary sources) that are located on one or more contiguous or adjacent properties, and are under common control of the same person (or persons under common control) belonging to a single major industrial grouping and that are described in (a), (b), or (c) of this subsection. For the purposes of defining "major source," a stationary source or group of stationary sources shall be considered part of a single industrial grouping if all of the pollutant emitting activities at such source or group of sources on contiguous or adjacent properties belong to the same major group (i.e., all have the same two-digit code) as described in the *Standard Industrial Classification Manual*, 1987.

(a) A major source under section 112 of the FCAA, which is defined as any stationary source or group of stationary sources located within a contiguous area and under common control that emits or has the potential to emit, in the aggregate, ten tons per year (tpy) or more of any hazardous air pollutant which has been listed pursuant to section 112(b) of the FCAA, twenty-five tpy or more of any combination of such hazardous air pollutants, or such lesser quantity as the Administrator may establish by rule. Notwithstanding the preceding sentence, emissions from any oil or gas exploration or production well (with its associated equipment) and emissions from any pipeline compressor or pump station shall not be aggregated with emissions from other similar units, whether or not such units are in a contiguous area or under common control, to determine whether such units or stations are major sources; or

(b) A major stationary source of air pollutants, as defined in section 302 of the FCAA, that directly emits or has the potential to emit, one hundred tpy or more of any air pollutant (including any major source of fugitive emissions of any such pollutant, as determined by rule by the Administrator).

(c) A major stationary source as defined in part D of title I of the FCAA, including:

(i) For ozone nonattainment areas, sources with the potential to emit one hundred tpy or more of volatile organic compounds or oxides of nitrogen in areas classified as "marginal" or "moderate," fifty tpy or more in areas classified as "serious," twenty-five tpy or more in areas classified as "severe," and ten tpy or more in areas classified as "extreme"; except that the references in this paragraph to one hundred, fifty, twenty-five, and ten tpy of nitrogen oxides shall not apply with respect to any source for which the Administrator has made a finding, under section 182 (f)(1) or (2) of the FCAA, that requirements under section 182(f) of the FCAA do not apply;

(ii) For ozone transport regions established pursuant to section 184 of the FCAA, sources with the potential to emit fifty tpy or more of volatile organic compounds;

(iii) For carbon monoxide nonattainment areas (A) that are classified as "serious," and (B) in which stationary

sources contribute significantly to carbon monoxide levels, sources with the potential to emit fifty tpy or more of carbon monoxide; and

(iv) For particulate matter (PM-10) nonattainment areas classified as "serious," sources with the potential to emit seventy tpy or more of PM-10.

30. Any of the following categories of sources which are listed in WAC 173-460-030(1):

Standard industrial classifications:

Major group 10-Metal mining.

Major group 12-Bituminous coal and lignite mining.

Major group 13-Oil and gas extraction.

Manufacturing industries major groups 20-39.

Major group 49-Electric, gas, and sanitary services except 4971 irrigation systems.

Dry cleaning plants, 7216.

General medical surgical hospitals, 8062.

Specialty hospitals, 8069.

National Security, 9711.

Any Source category listed in WAC 173-490-030(1) except WAC 173-490-030 (1)(e) Gasoline dispensing facilities.

WAC 173-490-030(1) categories:

- a. Petroleum refineries.
- b. Petroleum liquid storage tanks.
- c. Gasoline loading terminals.
- d. Bulk gasoline plants.
- e. ~~Gasoline dispensing facilities.~~
- f. Surface coaters.
- g. Open top vapor degreasers.
- h. Conveyerized degreasers.
- i. Gasoline transport tanks.
- j. Vapor collection systems.
- k. Perchloroethylene dry cleaning systems.
- l. Graphic arts systems.
- m. Surface coaters of miscellaneous metal parts and products.
- n. Synthesized pharmaceutical manufacturing facilities.
- o. Flatwood panel manufacturers and surface finishing facilities.

Any of the following sources:

Landfills.

Sites subject to chapter 173-340 WAC Model Toxics Control Act—Cleanup regulation.

B. A special report of closure shall be filed with the Authority whenever operations producing emissions are permanently ceased for any source listed in Section 4.01(A) above.

C. It shall be the duty of all persons, firms or corporations engaged in the business of selling combustion type orchard heating devices to report to the Authority the sale of such devices to be installed or used anywhere within the jurisdiction of the Yakima County Clean Air Authority.

The report herein provided for shall be in writing and shall be delivered to or mailed to the Authority within ten (10) days after such sale and shall contain the name and address of the purchaser and the location of the property at which such devices are to be installed or used.

D. The owner or operator of any proposed new source shall register the source with the Authority.

E. Initial registration and reporting shall be on forms supplied by the Authority within the time specified thereon. The forms will provide for the submission of information concerning locations, size and height of contaminant outlets, processes employed, nature of the contaminant emission and such other information relevant to air pollution as the Authority may require.

After initial registration and reporting, subsequent general reports shall be filed annually during January on forms supplied by the Authority in accordance with the terms of the Pollution Disclosure Act of 1971, Chapter 160, Laws of 1971, Extraordinary Session.

F. A separate registration shall be required for each source of contaminant provided that an owner or lessee has the option to register a process with a detailed inventory of contaminant sources and emissions related to said process and provided further than an owner need not make a separate registration for identical units or equipment or control apparatus installed, altered or operated in an identical manner on the same premises.

G. Each registration shall be signed by the owner or lessee or agent for such owner or lessee. The owner or the lessee of the source shall be responsible for the registration and the correctness of the information submitted.

H. All registrants shall pay a fee for registration in accordance with the registration fee schedule in Article XIII, Section 13.01 of this regulation.

Reviser's note: The spelling errors in the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

Reviser's note: The typographical errors in the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

SECTION 4.02 - NOTICE OF CONSTRUCTION

A. General Requirement.

No person shall construct, install or establish a new air contaminant source, except those sources excluded in Section 4.03 of this Regulation, without first filing with the Authority a "Notice of Construction, Installation or Establishment of New Air Contaminant Source", on forms prepared and furnished by the Authority.

For the purpose of this section, addition to or enlargement or replacement of an air contaminant source, or any major alteration therein, shall be construed as construction, installation or establishment of a new air contaminant source.

B. Completeness Determination.

Within thirty (30) days after the receipt of Notice of Construction application the Authority shall either notify the applicant in writing that the application is complete or that additional information is necessary. The Authority may require the submission of plans, specifications and such other information as it deems necessary concerning the proposed construction, installation and establishment of such source.

C. Final Approval.

Within sixty (60) days of receipt by the Authority of a complete Notice of Construction application the Authority shall either:

1. Issue a final decision on the application, or
2. For those Notice of Construction application reviews subject to public notice initiate notice and comment on a proposed decision and issue thereafter, as promptly as possible, a final decision.

D. Conditions.

Every order of approval issued pursuant to this section shall:

1. Be reviewed prior to issuance by a professional engineer in the employ of the Authority or the Washington State Department of Ecology.

2. Include a determination of whether the operation of the new air contaminant source at the location proposed will cause any ambient air quality standard to be exceeded or cause a potential hazard to public health.

3. Include a determination that the proposed new source will comply with all applicable New Source Performance Standards and National Emission Standards for Hazardous Air Pollutants.

Any Notice of Construction review of a modification shall be limited to the emission unit or units proposed to be modified and the air contaminants whose emissions would increase as the result of the modification.

Nothing in this Regulation shall be construed to authorize the Board to require the use of emission control equipment or other equipment, machinery or devices of any particular type from any particular supplier or produced by any particular manufacturer.

Any features, machines and devices constituting parts of or called for by plans, specifications or other information submitted pursuant to this section shall be maintained and operated in good working order.

The absence of any ordinance, resolution, rule or regulation or the failure to issue an order pursuant to this section shall not relieve a person from his or her obligation to comply with applicable emission control requirements or with any other provision of the law.

E. Control Technology Requirements:

For new sources in nonattainment areas, Best Available Control technology (BACT) will be employed, except that if the new source is a major stationary source or the proposed modification is a major modification it will achieve the Lowest Achievable Emission Rate (LAER) for the contaminants for which the area has been designated nonattainment.

For new sources in attainment or nonclassifiable areas, Best Available Control Technology (BACT) will be employed for all pollutants not previously emitted or whose emissions would increase as a result of the new source or modification.

For an existing stationary source for which the emission control technology is replaced or substantially altered, Reasonably Available Control Technology (RACT) and reasonable operation and maintenance conditions for the control equipment may be required by the Authority.

F. Notice of Completion - Notice of Violation.

The owner or applicant shall notify the Board or Control Officer of the completion of construction, installation or establishment and the date upon which operation will commence. The Board or Control Officer may, within thirty (30) days of receipt of notice of completion, inspect the construction, installation, or establishment, and the Board or Control Officer may issue a Notice of Violation, if he finds

that the construction, installation, or establishment is not in accord with the plans, specifications or other information submitted to the Authority.

G. Temporary Sources.

For sources such as asphalt batch plants with multiple locations which locate temporarily at particular sites, the owner or operator shall be permitted to operate at a temporary location without filing a notice of construction, providing that the owner or operator notifies the Authority of intent to operate at the new location at least thirty (30) days prior to starting the operation, and supplies sufficient information to enable the Authority to determine that the operation will comply with the emission standards for a new source and the applicable ambient air standards. The permission to operate shall be for a limited period of time and the Authority may set specific conditions for operation during said period which shall include a requirement to comply with all applicable emission standards.

H. Public Notice.

1. Notice of Construction applications shall be subject to public notice under the following conditions:

- a. If otherwise required by state or federal laws or regulations; or
- b. If the proposed source would cause an annual increase of ten tons of any air contaminant for which the ambient air quality standards have been established; or
- c. If the Yakima County Clean Air Authority determines that such public comment would be appropriate.

2. Within fifteen days of receipt of a complete application for a Notice of Construction the Authority shall determine whether public notice is required, and if so it shall publish notice to the public of an opportunity to submit written comments during a thirty (30) day period. Such public notice shall contain the following information:

- a. The name and address of the owner;
- b. A brief description of the proposed construction;
- c. The location at which a copy of the preliminary determination and a summary of the information considered in making such preliminary determination are available to the public.

I. Fee Assessment.

Any person submitting a Notice of Construction pursuant to the terms of this Regulation shall be assessed a fee by the Authority in accordance with the fee schedule in Article XIII, Section 13.02 of this regulation.

SECTION 5.01 - OUTDOOR BURNING

Outdoor burning in Yakima County shall, unless specifically exempted in Section 5.03(E), be conducted only by permit issued by the local responsible jurisdiction and shall be subject to the limitations set forth herein.

A. The issuance of outdoor burning permits for the following activities shall be governed by the Authority, local city, town or fire protection district in which such fire or fires are being conducted.

1. Residential Burning;
2. Outdoor burning of residue of natural character such as trees, stumps, shrubbery or other natural vegetation arising from land clearing projects.

B. The issuance of permits for the following outdoor burning shall be governed by the Washington State Depart-

ment of Natural Resources or by federal authorities for lands under federal control:

1. Abating of forest fire hazard;
2. Prevention of fire hazard;
3. Instruction of public officials in the method of forest fire fighting;
4. Any silviculture operation to improve the forest lands of the state;

5. All silvicultural burning used to promote regeneration of rare and endangered plants found within natural area preserves, as identified under Chapter 79.70 RCW or used to maintain fire dependent ecosystems for rare plants or animals within the state, federal and private natural park area preserves, natural resource conservation areas, parks and other wildlife areas.

C. All other outdoor burning will be governed by permits issued by the Yakima County Clean Air Authority.

D. It is a violation of these Regulations for any person to conduct outdoor burning without obtaining a permit from the responsible jurisdiction as set forth above.

E. Any person requesting a permit from a local responsible jurisdiction, such as local city, town, fire protection district, conservation district or the Authority, for an outdoor burning permit shall pay a fee as governed by the fee schedule of that agency then in effect. The fee schedule in effect for the Yakima County Clean Air Authority is as shown in Article XIII, Section 13.03 of this regulation.

SECTION 5.09 - MINIMUM STANDARDS OR PROCEDURES FOR CERTAIN SOURCE CATEGORIES

The Authority finds that reasonable regulation of sources within certain categories requires separate standards applicable to such categories. The standards set forth in this section shall be the minimum standards for sources within the categories listed and except as specifically provided in this Section, such sources shall be required to meet the provisions of Section 5.06, Section 5.07, and Section 5.08.

A. Asphalt Batch Plants.

1. All batch plants shall meet all requirements of Title 40 CFR 60.90 Subpart I, "Standards of Performance for Hot Mix Asphalt Facilities".

2. Asphalt batch plants shall utilize Best Available Control Technology and shall be maintained and operated to minimize emissions.

B. Hogged Fuel Boilers.

1. No person shall operate a hogged fuel boiler that will cause or permit an emission for more than three (3) minutes in any one (1) hour of an air contaminant from any source which, at the emission point or within a reasonable distance of the emission point, exceeds twenty percent (20%) opacity or which causes an emission of particulate matter in excess of one-fifth (0.20) grains per standard dry cubic foot.

Provided that emissions may exceed twenty percent opacity for up to fifteen consecutive minutes once in any eight hours. The intent of this provision is to permit the soot blowing and grate cleaning necessary to the operation of these units. This practice is to be scheduled for the same specific times each day and the Authority shall be notified of the schedule or any changes.

2. All hogged fuel boilers shall utilize Reasonably Available Control Technology and shall be maintained and operated to minimize emissions.

3. The Authority may establish additional requirements for hogged fuel boilers located in or proposed for location in sensitive areas. These additional requirements may include, but shall not be limited to:

a. A requirement to meet provisions of Section 5.07.

b. A requirement to utilize Best Available Control Technology.

c. A requirement to reduce or eliminate emissions if the Authority establishes that such emissions unreasonably interfere with the use or enjoyment of the property of others or if such reductions or eliminations are necessary to meet ambient air quality standards.

C. Orchard Heating.

1. Burning of rubber material, asphaltic products, crankcase oil or petroleum wastes, plastic, or garbage is prohibited.

2. It shall be unlawful to burn any material or operate any orchard heating device that causes visible emissions exceeding twenty percent (20%) opacity, except during the first thirty (30) minutes after such device or material is ignited.

D. Grain Elevators.

1. Any grain elevator which is primarily classified as a materials handling operation shall meet all the provisions of Section 5.06, B, C, D, and E.

2. The Authority may establish additional requirements for grain elevators located, or proposed for location, in sensitive areas. These requirements may include, but shall not be limited to:

a. A requirement to meet the provisions of Section 5.06 and Section 5.08.

E. Asbestos.

No person shall remove or otherwise disturb asbestos, to the extent that asbestos fibers may become airborne, without notifying the Authority ten (10) business days prior to removal. If removal is necessary due to an emergency, the ten day waiting period may be waived by the Authority.

1. Private Residents.

Private homeowners, when removing friable asbestos materials from their normally occupied or will be normally occupied homes, may be required to remove the asbestos materials according to the National Emission Standard for Hazardous Air Pollutants (NESHAPS) as set forth in Title 40 Code of Federal Regulations part 61, as the same now exists or may be amended. Removal and disposal of non-friable asbestos materials shall be conducted in accordance with practices and procedures approved by the Authority.

2. Small Quantity Asbestos Material.

Asbestos Materials in quantities less than 160 square feet or 260 linear feet must be removed and disposed of according to practices and procedures approved by the Authority.

3. Commercial, Industrial or other sources.

No person shall demolish any commercial, institutional, or industrial building, or any residential facility constructed to house four (4) or more families without first performing a thorough inspection, to be conducted by a qualified expert to determine the quantities and types of asbestos materials present. If it is determined that such building contains asbestos, no person shall commence the demolition of such

facility without complying with the requirements of NESHAPS, the Federal Rule stated in E (1) above.

4. Fees or Administrative Charges.

Fees associated with this subsection (5.09(E)) shall be in accordance with Article XIII, Section 13.04 of this regulation.

Reviser's note: The spelling errors in the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

SECTION 6.09 - FEE ASSESSMENT

Pursuant to RCW 70.94.161(14), the Authority shall allocate its fiscal 1994 air operating permit program development costs among the sources under its jurisdiction emitting one hundred tons or more per year of a regulated pollutant during calendar year 1992 and shall collect interim fees from these sources. Interim air operating permit fees collected by the Authority on behalf of the Department of Ecology shall be remitted to the Department by March 1, 1994.

Pursuant to RCW 70.94, (Bill 1089), the Authority shall determine, assess, and collect annual fees sufficient to cover the Authority's direct and indirect costs of implementing its air operating permit program.

Upon receiving delegation authority per Section 6.03 of this article, air operating permit fees collected by the Authority on behalf of the Department of Ecology shall be collected from each source in two equal payments and shall be remitted to the Department by March 1 and June 30, respectively, of each year.

All air operating permit fees collected by the Authority on its own behalf shall be deposited into an air operating permit account dedicated exclusively to the support of its Air Operating Permit Program. The payment schedule for all air operating permit fees collected by the Authority on its own behalf shall be four equal payments with each payment due at the beginning of the respective fiscal quarter. The fiscal year for the Authority begins July First.

All air operating permit fees collected by the Authority on behalf of itself shall be calculated according to Article XIII, Section 13.05 of this regulation.

Reviser's note: The spelling error in the above section occurred in the copy filed by the agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

ARTICLE XIII

FEE SCHEDULES AND OTHER CHARGES

SECTION 13.01 - REGISTRATION FEE SCHEDULE

Sources required to register according to the requirements of Article IV of this regulation shall pay annual registration fees according to the following schedule:

| Criteria | Class | Fee |
|---|-----------|-------|
| Potential Controlled Emissions > 100 tons per year | A-1 | \$550 |
| Potential Uncontrolled Emissions > 100 tons per year | A-2 | \$550 |
| Potential Uncontrolled Emissions < 100 tons per year | B | \$75 |
| Potential Controlled Toxic Emissions > 10/25* tons per year | A-1 toxic | \$550 |
| Potential Uncontrolled Toxic Emissions > 10/25* tons per year | A-2 toxic | \$550 |
| Potential Uncontrolled Toxic Emissions < 10/25* tons per year | B toxic | \$75 |

*10 tons of a single toxic pollutant or a combined total of 25 tons of two or more toxic pollutants.

SECTION 13.02 - NOTICE OF CONSTRUCTION FEE SCHEDULE

Sources required to file a "Notice of Construction, Installation or Establishment of New Air Contaminant Source" shall pay a fee according to the following schedule:

| | |
|--|---------|
| Filing Fee (for all sources): | \$50 |
| Fuel Burning Equipment Installation (MMBTU/H): | |
| <5 | \$25 |
| 5-10 | \$100 |
| 10-20 | \$150 |
| 20-50 | \$250 |
| 50-100 | \$350 |
| 100-250 | \$500 |
| 250-500 | \$1,000 |
| >500 | \$1,500 |
| Fuel Burning Equipment Fuel Change (MMBTU/H): | |
| <5 | \$15 |
| 5-10 | \$40 |
| 10-20 | \$60 |
| 20-50 | \$80 |
| 50-100 | \$100 |
| 100-250 | \$150 |
| 250-500 | \$200 |
| >500 | \$250 |
| Refuse Burning Equipment (tons per day Rated Capacity): | |
| <5(w/o HCl controls) | \$100 |
| 5-12(w/o HCl controls) | \$200 |
| <12(w/ HCl controls) | \$500 |
| 12-250(w/ HCl controls) | \$2,000 |
| >250(w/ HCl controls) | \$4,000 |

| | |
|--|---------|
| Solid Waste Incineration (tons/hour): | |
| 0.5-2 | \$0 |
| 2-4 | \$0 |
| >4 | \$0 |
| Other Incinerators (pounds/hour): | |
| <100 | \$0 |
| 100-200 | \$300 |
| 200-500 | \$500 |
| 500-1,000 | \$750 |
| Volatile Material Storage Tanks (gals): | |
| <4,000 | \$0 |
| 4,000-20,000 | \$0 |
| 20,000-40,000 | \$65 |
| 40,000-100,000 | \$200 |
| 100,000-500,000 | \$750 |
| 500,000-1,000,000 | \$1,200 |
| >1,000,000 | \$1,200 |
| Significant Emissions Surcharge: | \$250 |
| Gasoline Stations: | |
| Stage I | \$50 |
| Stage II | \$50 |
| Temporary Source: | \$75 |
| Odor Source: | \$200 |
| SEPA: | \$50 |

PERMANENT

SECTION 13.03 - OUTDOOR BURNING PERMIT FEES

The Authority shall collect a fee of \$5 for each outdoor burning permit it issues under the requirements of Article V of this regulation.

SECTION 13.04 - ASBESTOS NOTIFICATION FEE SCHEDULE

Any person applying for a Notification of Demolition or Renovation from the Authority or private homeowners, prior to removing asbestos materials from their homes, may be assessed a fee by the Authority in accordance with the following fee schedule:

PERMANENT

| Amount to be removed: | | Fee |
|------------------------|-------------|-------|
| lineal feet | square feet | |
| >50,000 | >10,000 | \$500 |
| <50,000 | <10,000 | \$250 |
| <5,000 | <1,000 | \$100 |
| <260 | <160 | \$25 |
| <11 | <10 | \$25 |
| Residential | | \$25 |
| Surcharges/Other Fees: | | |
| Emergency | | \$50 |
| Demolition | | \$0 |
| Amendment | | \$25 |
| Annual Notices | | \$100 |
| Encapsulation | | \$0 |

SECTION 13.05 - AIR OPERATING PERMIT FEE DETERMINATION

A. Workload Analysis.

The Authority shall conduct an annual workload analysis of its air operating permit program to determine the adequacy and fairness of the air operating permit fees. The workload analysis shall identify all permit administration activities that the Authority will perform during that year. Permit Administration activities included all activities listed in RCW 70.94.162 (2)(a). The workload analysis shall be based on the Authority's historical record of time and resource expenditures attributable to the air operating permit program.

B. Budget Development.

The Authority shall prepare an annual operating permit program budget. The budget shall included both the direct and indirect costs of the permit administration activities identified in the workload analysis, and shall take into account projected fund balances at the start of each fiscal year.

C. Fee Allocation.

Fees sufficient to cover the costs of the Authority's air operating permit program shall be assessed such that each source shall pay an amount equal to that source's portion of the total annual emissions (determined from the previous year's emission inventory) of the fee applicable pollutants from all the permit program source's within the Authority's jurisdiction. The fee applicable pollutants shall be as follows:

- 1) Total Suspended Particulate (TSP)
- 2) Sulfur Oxides (SOx)
- 3) Nitrogen Oxides (NOx)
- 4) Volatile Organic Compounds (VOC)
- 5) Hazardous Air Pollutants (HAPs)

The air operating permit fee for an individual source shall be calculated according to the following formula:

$$F = B \times SE/TE,$$

where:

F = Source's annual air operating permit fee;

B = The Authority's budget for the air operating permit program;

SE = The sum of the annual emissions of fee applicable pollutants in tons per year from the source;

TE = The sum of annual emissions of fee applicable pollutants in tons per year from all permit program sources.

D. Public Notice.

The workload analysis budget and fee allocations shall be made available upon request. Any proposed revisions to the annual fee schedule shall be presented to the Board for adoption after public notice has been given.

Reviser's note: The typographical error in the above section occurred in the copy filed by the agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

DULY ADOPTED THIS 8th day of December, 1993.

SIGNED YAKIMA COUNTY CLEAN AIR AUTHORITY BY:

Pat Berndt (Chairperson)
 Glen Chandler
 Thomas W. Gasseling
 Charles Klarich

Attest: Betty Tabayoyon
 Secretary

**WSR 94-01-087
 PERMANENT RULES
 PARKS AND RECREATION
 COMMISSION**

[Filed December 13, 1993, 2:49 p.m.]

Date of Adoption: December 10, 1993.

Purpose: Amends WAC 352-32-010 Definitions and 352-32-130 Aircraft, to exempt paragliders from the prohibition on aircraft activities in state parks under certain conditions.

Citation of Existing Rules Affected by this Order: Amending WAC 352-32-010 and 352-32-130.

Statutory Authority for Adoption: RCW 43.51.040.

Pursuant to notice filed as WSR 93-21-037 on October 15, 1993.

Changes Other than Editing from Proposed to Adopted Version: Language removed in subsection (3)(e)(iv) and (viii) and added in subsections (2) and (3)(vi), (xi), and (xii) and changed in subsection (3)(f) to clarify the conditions under which paragliding is allowed in state parks.

Effective Date of Rule: Thirty-one days after filing.

December 10, 1993
 Robert C. Petersen
 Chair

AMENDATORY SECTION (Amending WSR 93-08-025, filed 3/30/93, effective 5/1/93)

WAC 352-32-010 Definitions. Whenever used in this chapter the following terms shall be defined as herein indicated:

~~((1) "Commission" shall mean the Washington state parks and recreation commission.~~

~~(2) "Director" shall mean the director of the Washington state parks and recreation commission.~~

~~(3) "Ranger" shall mean a duly appointed Washington state parks ranger who is vested with police powers under RCW 43.51.170, and shall include the park manager in charge of any state park area.~~

~~(4) "Person" shall mean all natural persons, firms, partnerships, corporations, clubs, and all associations or combinations of persons whenever acting for themselves or by an agent, servant, or employee.~~

~~(5) "Recreation vehicle" shall mean a vehicle/trailer unit, van, pickup truck with camper, motor home, converted bus, or any similar type vehicle which contains sleeping and/or housekeeping accommodations.~~

~~(6) "Standard campsite" shall mean a designated camping site which is served by nearby domestic water, sink waste, garbage disposal and flush comfort station. Each campsite includes a camp stove and picnic table.~~

~~(7) "Utility campsite" shall mean a standard campsite with the addition of electricity and one or all of the following utility hookups: Domestic water or sewer.~~

~~(8) "Primitive campsite" shall mean a campsite not provided with flush comfort station nearby and which may not have any of the amenities of a standard campsite.~~

~~(9) "Multiple campsite" shall mean a designated and posted camping facility encompassing two or more individual standard, utility or primitive campsites.~~

~~(10) "Camping" shall mean erecting a tent or shelter or arranging bedding, or both, or parking a recreation vehicle or other vehicle for the purpose of remaining overnight.~~

~~(11) "Group camping areas" are designated areas usually primitive with minimal utilities and site amenities and are for the use of organized groups. Facilities and extent of development vary from park to park.~~

~~(12) "Emergency area" is an area in the park separate from the designated overnight camping area, which may be used for camping between the hours of 9 p.m. and 8 a.m. when no alternative camping facilities are available within reasonable driving distances.~~

~~(13) "State park area" shall mean any area under the ownership, management, or control of the commission, including trust lands which have been withdrawn from sale or lease by order of the commissioner of public lands and the management of which has been transferred to the commission, and specifically including all those areas defined in WAC 352-16-020. State park areas do not include the seashore conservation area as defined in RCW 43.51.655 and as regulated under chapter 352-36 WAC.~~

~~(14) "Environmental learning centers (ELC)" shall mean those designated specialized facilities (formerly called resident group camps) designed to promote outdoor camping experiences and environmental education by groups in a residential setting. A group can be formalized group or an organized collection of families wishing to camp or use the~~

~~ELC. ELCs are located at Camp Wooten, Columbia County; Brooks Memorial State Park, Klickitat County; Sun Lakes State Park, Grant County; Deception Pass State Park, Island and Skagit Counties; Fort Flagler State Park, Jefferson County; Millersylvania State Park, Thurston County; Moran State Park, San Juan County; Fields' Spring State Park, Asotin County; and Sequim Bay State Park, Clallam County.~~

~~(15) "Public assembly" shall mean a meeting, rally, gathering, demonstration, vigil, picketing, speechmaking, march, parade, religious service, or other congregation of persons for the purpose of public expression of views of a political or religious nature for which there is a reasonable expectation that more than one hundred persons will attend based on information provided by the applicant. Public assemblies must be open to all members of the public, and are generally the subject of attendance solicitations circulated prior to the event, such as media advertising, flyers, brochures, word of mouth notification, or other form of prior encouragement to attend.~~

~~Alternatively, the agency director may declare an event to be a public assembly in the following cases: Where evidentiary circumstances and supporting material suggest that more than one hundred persons will attend, even where the applicant does not indicate such an expectation; or where there is reason to expect a need for special preparations by the agency or the applicant, due to the nature or location of the event.~~

~~(16) "Camping unit" shall mean a group of people (one or more persons) that is organized, equipped and capable of sustaining its own camping activity.~~

~~(17) "Residence" shall mean the long term habitation of facilities at a given state park for purposes whose primary character is not recreational. "Residence" is characterized by one or both of the following patterns:~~

~~(a) Camping at a given park for more than twenty days within a thirty day time period May 1 through September 30; or thirty days within a sixty day time period October 1 through April 30. As provided in WAC 352-32-030(7), continuous occupancy of facilities by the same camping unit shall be limited to ten consecutive nights May 1 through September 30 and fifteen consecutive nights October 1 through April 30 in one park, after which the camping unit must vacate the overnight park facilities for three consecutive nights. The time period shall begin on the date for which the first night's fee is paid.~~

~~(b) The designation of the park facility as a permanent or temporary address on official documents or applications submitted to public or private agencies or institutions.~~

~~(18) "Motoreycle" means every motor vehicle having a saddle for the use of the rider and designed to travel on not more than three wheels in contact with the ground, but excluding a farm tractor and a moped.~~

~~(19) "Upland" shall mean all lands lying above mean high water.~~

~~(20) "Special recreation event" shall mean a group recreation activity in a state park sponsored or organized by an individual or organization that requires reserving park areas, planning, facilities, staffing, or other services beyond the level normally provided at the state park to ensure public welfare and safety and facility and/or environmental protection.~~

(21) "Marine trail camping areas" are specially designated group camp areas identified with signs, that are near marine water ways, and that have varying facilities and extent of development.

(22) "Boat launch" shall mean any facility located in a state park area designated for the purpose of placing or retrieving any vehicle-born or trailer-born watercraft into or out of the water.

(23) "Trailer dump station" shall mean any state park sewage disposal facility designated for the disposal of sewage waste from any recreation vehicle, other than as may be provided in a utility campsite.

(24) "Popular destination park" shall mean any state park designated by the director as a popular destination park because, during the year preceding designation, the park had an average overnight occupancy rate of sixty percent or more during the period of May 21 through September 14.

(25) "Day area parking space" shall mean any designated parking space within any state park area designated for daytime vehicle parking.) "Boat launch" shall mean any facility located in a state park area designated for the purpose of placing or retrieving any vehicle-born or trailer-born watercraft into or out of the water.

"Camping" shall mean erecting a tent or shelter or arranging bedding, or both, or parking a recreation vehicle or other vehicle for the purpose of remaining overnight.

"Camping unit" shall mean a group of people (one or more persons) that is organized, equipped and capable of sustaining its own camping activity.

"Commission" shall mean the Washington state parks and recreation commission.

"Day area parking space" shall mean any designated parking space within any state park area designated for daytime vehicle parking.

"Director" shall mean the director of the Washington state parks and recreation commission.

"Emergency area" is an area in the park separate from the designated overnight camping area, which may be used for camping between the hours of 9 p.m. and 8 a.m. when no alternative camping facilities are available within reasonable driving distances.

"Environmental learning centers (ELC)" shall mean those designated specialized facilities (formerly called resident group camps) designed to promote outdoor camping experiences and environmental education by groups in a residential setting. A group can be formalized group or an organized collection of families wishing to camp or use the ELC. ELCs are located at Camp Wooten, Columbia County; Brooks Memorial State Park, Klickitat County; Sun Lakes State Park, Grant County; Deception Pass State Park, Island and Skagit Counties; Fort Flagler State Park, Jefferson County; Millersylvania State Park, Thurston County; Moran State Park, San Juan County; Fields' Spring State Park, Asotin County; and Sequim Bay State Park, Clallam County.

"Group camping areas" are designated areas usually primitive with minimal utilities and site amenities and are for the use of organized groups. Facilities and extent of development vary from park to park.

"Marine trail camping areas" are specially designated group camp areas identified with signs, that are near marine water ways, and that have varying facilities and extent of development.

"Motorcycle" means every motor vehicle having a saddle for the use of the rider and designed to travel on not more than three wheels in contact with the ground, but excluding a farm tractor and a moped.

"Multiple campsite" shall mean a designated and posted camping facility encompassing two or more individual standard, utility or primitive campsites.

"Paraglider" shall mean an unpowered ultralight vehicle capable of flight, consisting of a fabric, rectangular or elliptical canopy or wing connected to the pilot by suspension lines and straps, made entirely of nonrigid materials except for the pilot's harness and fasteners. The term "paraglider" shall not include hanggliders or parachutes.

"Person" shall mean all natural persons, firms, partnerships, corporations, clubs, and all associations or combinations of persons whenever acting for themselves or by an agent, servant, or employee.

"Popular destination park" shall mean any state park designated by the director as a popular destination park because, during the year preceding designation, the park had an average overnight occupancy rate of sixty percent or more during the period of May 21 through September 14.

"Primitive campsite" shall mean a campsite not provided with flush comfort station nearby and which may not have any of the amenities of a standard campsite.

"Public assembly" shall mean a meeting, rally, gathering, demonstration, vigil, picketing, speechmaking, march, parade, religious service, or other congregation of persons for the purpose of public expression of views of a political or religious nature for which there is a reasonable expectation that more than one hundred persons will attend based on information provided by the applicant. Public assemblies must be open to all members of the public, and are generally the subject of attendance solicitations circulated prior to the event, such as media advertising, flyers, brochures, word-of-mouth notification, or other form of prior encouragement to attend.

Alternatively, the agency director may declare an event to be a public assembly in the following cases: Where evidentiary circumstances and supporting material suggest that more than one hundred persons will attend, even where the applicant does not indicate such an expectation; or where there is reason to expect a need for special preparations by the agency or the applicant, due to the nature or location of the event.

"Ranger" shall mean a duly appointed Washington state parks ranger who is vested with police powers under RCW 43.51.170, and shall include the park manager in charge of any state park area.

"Recreation vehicle" shall mean a vehicle/trailer unit, van, pickup truck with camper, motor home, converted bus, or any similar type vehicle which contains sleeping and/or housekeeping accommodations.

"Residence" shall mean the long-term habitation of facilities at a given state park for purposes whose primary character is not recreational. "Residence" is characterized by one or both of the following patterns:

Camping at a given park for more than twenty days within a thirty-day time period May 1 through September 30; or thirty days within a sixty-day time period October 1 through April 30. As provided in WAC 352-32-030(7), continuous occupancy of facilities by the same camping unit

shall be limited to ten consecutive nights May 1 through September 30 and fifteen consecutive nights October 1 through April 30 in one park, after which the camping unit must vacate the overnight park facilities for three consecutive nights. The time period shall begin on the date for which the first night's fee is paid.

The designation of the park facility as a permanent or temporary address on official documents or applications submitted to public or private agencies or institutions.

"Special recreation event" shall mean a group recreation activity in a state park sponsored or organized by an individual or organization that requires reserving park areas, planning, facilities, staffing, or other services beyond the level normally provided at the state park to ensure public welfare and safety and facility and/or environmental protection.

"Standard campsite" shall mean a designated camping site which is served by nearby domestic water, sink waste, garbage disposal and flush comfort station. Each campsite includes a camp stove and picnic table.

"State park area" shall mean any area under the ownership, management, or control of the commission, including trust lands which have been withdrawn from sale or lease by order of the commissioner of public lands and the management of which has been transferred to the commission, and specifically including all those areas defined in WAC 352-16-020. State park areas do not include the seashore conservation area as defined in RCW 43.51.655 and as regulated under chapter 352-36 WAC.

"Trailer dump station" shall mean any state park sewage disposal facility designated for the disposal of sewage waste from any recreation vehicle, other than as may be provided in a utility campsite.

"Upland" shall mean all lands lying above mean high water.

"Utility campsite" shall mean a standard campsite with the addition of electricity and one or all of the following utility hookups: Domestic water or sewer.

AMENDATORY SECTION (Amending Order 102, filed 11/24/87)

WAC 352-32-130 Aircraft. (1) No aircraft shall land on or take off from any body of water or land area in a state park area not specifically designated for landing aircraft. This provision does not apply to official aircraft used in the performance of search and rescue missions, medical emergencies, law enforcement activities, or firefighting activities. It also does not apply in cases where the director specifically authorizes such landings or take offs, in writing, associated with the operational, or administrative needs of the agency or state.

(2) Individuals who have complied with the registration process provided or who have obtained a special recreation event permit pursuant to WAC 352-32-047 may launch and land paragliders in state park areas specifically designated by the director as available for paragliding. Prior to any such designation, the director or designee shall advertise and conduct a public meeting in the region where the park is located. The director shall consider the potential impacts of paragliding in the proposed area, including but not limited to the following factors: The degree of conflict paragliding

may have with other park uses, public safety issues, and any potential damage to park resources/facilities. Any park designated for paragliding shall be conspicuously posted as such by the director.

(3) Individuals paragliding in state parks must:

(a) Comply with the registration process provided for such purposes;

(b) Observe all applicable laws and regulations;

(c) Never destroy or disturb park facilities, natural features, or historical or archeological resources;

(d) Conduct themselves with thoughtfulness, courtesy and consideration for others, and not interfere with other recreational activities;

(e) Conduct themselves in compliance with the following basic safety regulations:

(i) Comply with specific site operational rules that are posted;

(ii) Fly in a manner consistent with the pilot rating held;

(iii) Preplanned landings should be made in areas no smaller than forty feet wide by one hundred feet long;

(iv) Make preflight checks of weather, equipment and site conditions;

(v) Observe all published traffic and right of way flight guidelines, including yielding right of way to all aircraft;

(vi) Wear protective clothing, headgear, Coast Guard approved flotation gear, reserve parachute, supplemental oxygen and communication equipment as appropriate for conditions;

(vii) Fly in a manner that does not create a hazard for other persons or property;

(viii) Fly only during daylight hours, or hours otherwise specified by posting at the site;

(ix) Do not fly over congested areas of parks or open air assembly of persons;

(x) Fly only in designated areas of parks;

(xi) Fly with visual reference to the ground surface at all times.

(xii) Do not tether paraglider to the ground or other stable nonmovable object.

(f) Not fly while under the influence of alcohol or drugs.

WSR 94-01-094

PERMANENT RULES

DEPARTMENT OF

SOCIAL AND HEALTH SERVICES

(Public Assistance)

[Order 3685—Filed December 14, 1993, 2:21 p.m.]

Date of Adoption: December 14, 1993.

Purpose: Sets up a supplemental pharmaceutical manufacturers' state discount in order for their drug to be prescribed without special authorization by medical assistance administration. Deletes the requirement that the department not require prior authorization for new drugs for a six-month period, new WAC 388-91-007 Drugs—Drug discount agreement.

Citation of Existing Rules Affected by this Order: Amending WAC 388-91-010 Drugs—Not requiring prior authorization and 388-91-020 Drugs—Requiring authorization.

Statutory Authority for Adoption: RCW 74.08.090.

Pursuant to notice filed as WSR 94-01-046 on December 7, 1993.

Changes Other than Editing from Proposed to Adopted Version: WAC 388-91-020(1) third sentence, clarifies that if the only reason a drug is listed as needing prior authorization is that the drug manufacturer/labeler has failed to sign a Washington state drug discount agreement, then authorization is needed, but the authorization does not need to be prior to filling the prescription; and WAC 388-91-020 (2)(c), added the word "when."

Effective Date of Rule: Thirty-one days after filing,

December 14, 1993

Dewey Brock, Chief

Office of Vendor Services

NEW SECTION

WAC 388-91-007 Drugs—Drug discount agreement.

(1) A supplemental drug discount agreement between each pharmaceutical manufacturer and the department is required. This agreement is to provide a supplemental drug discount in addition to the amount provided to the Medicaid program under the terms of their agreement with the federal Department of Health and Human Services.

(2) The supplemental drug discount shall be a percentage applied to the quarterly basic Health Care Financing Administration (HCFA) requested rebated amount. The discount will be assessed when the HCFA rebate amount, per labeler code, exceeds one thousand dollars in a reporting quarter.

AMENDATORY SECTION (Amending Order 3286, filed 11/19/91, effective 12/20/91)

WAC 388-91-010 Drugs—Not requiring prior authorization. (1) The department shall publish a list of all drugs not requiring prior approval as described under subsections (3)(a) through (3)(e) and (4) of this section. The medical assistance administration may make changes to this list ~~((based on the recommendations of the drug review advisory committee))~~ providing that action is in compliance with regulations governing the drug program and with acceptable management policies.

(2) The list described under subsection (1) of this section may include drugs which require prior approval only because the manufacturer has not signed a supplemental drug discount agreement as specified under subsection (3)(f) of this section. The department shall publish a list of manufacturers who have signed a supplemental drug discount agreement and whose products may not require prior approval.

(3) The department's decision not to require authorization for drug preparations ~~((is))~~ shall be based on ~~((these))~~ the following criteria:

(a) The drug ~~((shall be))~~ is established as a part of necessary and essential care for the condition for which ~~((it))~~ the drug is used;

(b) The drug ~~((shall be))~~ is in general use by physicians practicing in Washington;

(c) The drug ~~((shall be))~~ is of moderate cost. The department shall use generic forms when the drug is listed

under the department or federal maximum allowable cost (MAC) programs. When two preparations of equal effectiveness but disparate costs are presented, the department shall select the less expensive drug;

(d) The food and drug administration shall not have classified the drug as "less than effective";

(e) The drug ~~((shall))~~ is not ~~((be))~~ experimental~~((—(3)))~~; and

(f) That the drug manufacturer/labeler sign a Washington state drug discount agreement.

(4) The department shall use the following process to determine when a drug preparation requires prior authorization:

(a) Review objective, scientific information and utilization data for appropriateness according to the criteria in subsection ~~((2))~~ (3) of this section; or

(b) Provide for the potential appointment of an advisory committee by the secretary in accordance with RCW 43.20A.360 to review and advise the medical assistance administration whether the drug preparation requires prior authorization; and

(c) Make appropriate changes in the ~~((need to not))~~ requirement of prior ((authorize)) authorization as to a drug preparation when consistent with subsection ((2)) (3) of this section, and may accept recommendations of the advisory committee providing that action is in compliance with regulations governing the program and with acceptable management policies.

~~((4))~~ (5) Until January 1, 1994 the department shall ((comply with federal Medicaid laws to)) not require prior authorization for any new biological or drug that the federal Food and Drug Administration approves ((for a period of six months after such approval)) between July 1, 1993 through December 31, 1993.

AMENDATORY SECTION (Amending Order 3286, filed 11/19/91, effective 12/20/91)

WAC 388-91-020 Drugs—Requiring authorization.

(1) The pharmacist shall make a request to the department for drugs requiring prior authorization before dispensing the drug. The request shall be supported by the medical diagnosis and include proper justification for the drug. For drugs requiring prior authorization solely because the drug manufacturer/labeler has failed to sign a Washington state drug discount agreement, the authorization may be obtained subsequent to filling the prescription.

(2) ~~((Payment))~~ The department may ((be made)) pay for drugs requiring prior authorization which are prescribed without prior authorization only:

(a) In an acute emergency ((and));

(b) If the physician can substantiate that a drug is mandatory ((-)) and

(c) ~~((The))~~ When the department ((shall receive)) receives justification within seventy-two hours for consideration.

WSR 94-01-095
PERMANENT RULES
UTILITIES AND TRANSPORTATION
COMMISSION

[Order R-404, Docket No. UW-930955—Filed December 14, 1993, 4:45 p.m.]

In the matter of amending WAC 480-110-051(6) relating to interest on water company customer deposits.

The Washington Utilities and Transportation Commission takes this action under Notice No. WSR 93-21-045, filed with the code reviser on October 18, 1993. The commission brings this proceeding pursuant to RCW 80.01.040.

This proceeding complies with the Open Public Meetings Act (chapter 42.30 RCW), the Administrative Procedure Act (chapter 34.05 RCW), the State Register Act (chapter 34.08 RCW), the State Environmental Policy Act of 1971 (chapter 34.21C RCW), and the Regulatory Fairness Act (chapter 19.85 RCW).

The commission scheduled this matter for oral comment and adoption under Notice No. WSR 93-21-045, for 9:00 a.m., Wednesday, December 8, 1993, in the Commission's Hearing Room, Second Floor, Chandler Plaza Building, 1300 South Evergreen Park Drive S.W., Olympia, WA. The notice provided interested persons the opportunity to submit written comments to the commission until November 17, 1993.

Written comments were presented by the commission staff.

No other party submitted written comments.

The rule change proposal was considered for adoption at the commission's regularly scheduled open public meeting on December 8, 1993, before Chairman Sharon L. Nelson, Commissioner Richard D. Casad, and Commissioner Richard Hemstad. Oral comments were made by Diana Otto on behalf of the commission staff. After considering the written and oral comments, the commission adopted the rule as noticed.

In reviewing the entire record, the commission determines that WAC 480-110-051(6) should be amended to read as set forth in Appendix A, as a rule of the Washington Utilities and Transportation Commission, to take effect pursuant to RCW 34.05.380.

ORDER

THE COMMISSION ORDERS That WAC 480-110-051(6) is amended to read as set forth in Appendix A, as a rule of the Washington Utilities and Transportation Commission, to take effect pursuant to RCW 34.05.380; and

THE COMMISSION FURTHER ORDERS That this order and the rule shown below, after being recorded in the register of the Washington Utilities and Transportation Commission, shall be forwarded to the code reviser for filing pursuant to chapter 34.05 RCW and chapter 1-21 WAC.

THE COMMISSION Adopts the commission staff memoranda, presented both at the time the commission considered noticing and considered adopting this rule, as its brief explanatory statement of the reasons for adoption, as provided in RCW 34.05.355.

DATED at Olympia, Washington, this 8th day of December 1993.

Washington Utilities and Transportation Commission
 Sharon L. Nelson, Chairman
 Richard Hemstad, Commissioner

APPENDIX A

AMENDATORY SECTION (Amending Order R-85, filed 6/30/76)

WAC 480-110-051 Deposits. (1) Establishment of credit. An applicant for residential service may establish credit by demonstrating to the utility any one of the following factors:

(a) Prior service with the utility in question during the next previous 12 months for at least six consecutive months during which service was rendered and was not disconnected for failure to pay, and no more than one delinquency notice was served upon the customer.

(b) Prior service with a utility of the same type as that of which service is sought with a satisfactory payment record as demonstrated in (a) above, provided that the reference may be quickly and easily checked, and the necessary information is provided.

(c) Full-time consecutive employment during the entire 12 months next previous to the application for service, with no more than two employers, and the applicant is currently employed or has a regular source of income.

(d) Ownership of a significant legal interest in the premises to be served.

(e) Furnishing of a satisfactory guarantor to secure payment of bills for service requested in a specified amount not to exceed the amount of cash deposit which may be required.

(f) Demonstration that applicant is a satisfactory risk by appropriate means including, but not limited to, the production in person at a listed business office of two major credit cards, or other credit references, which may be quickly and easily checked by the utility.

(2) Establishment of credit—Nonresidential. An applicant for nonresidential service may be required to demonstrate that it is a satisfactory credit risk by reasonable means appropriate under the circumstances.

(3) Deposit requirements. A deposit may be required under the following circumstances:

(a) Where the applicant has failed to establish a satisfactory credit history as outlined above.

(b) In any event, a deposit may be required when, within the 12 months prior to the application, the applicant's service of a similar type has been disconnected for failure to pay amounts owing, when due; where there is an unpaid, overdue balance owing for similar service from the utility to which application is being made or from any other water company; or where two or more delinquency notices have been served upon the applicant by any other water company during the 12 months previous to the application for service.

(c) Initiation or continuation of service to a residence where a prior customer still resides and where any balance for such service to that prior customer is past due or owing.

(4) Amount of deposit. In instances where a deposit may be required by the utility, the deposit shall not exceed two-twelfths of estimated annual billings for utilities billing monthly, three-twelfths of estimated annual billings for

utilities billing bimonthly, and four-twelfths of estimated annual billings for utilities billing trimonthly.

(5) Transfer of deposit. Where a customer of whom a deposit is required transfers his service to a new location within the same utility's service area, the deposit, less any outstanding balance, shall be transferable and applicable to the new service location.

(6) Interest on deposits. Interest on deposits held shall be accrued at the rate (~~established according to law as interest upon judgments in superior courts of the state of Washington as of January 1 of each~~) calculated as a simple average of the effective interest rate for new issues of one year treasury bills, computed from December 1 of each year, continuing through November 30 of the following year. Deposits shall earn that calculated interest rate during January 1 through December 31 of the subsequent year. Interest shall be computed from the time of deposit to the time of (~~termination of service~~) refund or total application of the deposit and shall be compounded annually.

(7) Extended payment of deposits. Where a customer or applicant for service of whom a deposit is required is unable to pay the entire amount of the deposit in advance of connection or continuation of service, the customer or applicant shall be allowed to pay 50 percent of the deposit amount prior to service, with the remaining amount payable in equal amounts on the utility's ordinary billing cycle during the first two months of service. A customer or applicant who is unable to meet this deposit requirement shall have the opportunity to receive service under subsection (8), alternative to deposit, next below.

(8) Alternative to deposit. A customer or applicant for service of whom a deposit is required, but who is unable to make a deposit, shall be allowed, as an alternative to the making of a deposit, to prepay any installation charges and reasonably estimated regular service charges at periods corresponding to the utility's regular billing period or budget billings for the length of time during which a deposit would ordinarily have been required. The customer shall then be billed in a normal fashion.

(9) When payment is made by cash, a receipt shall be furnished to each applicant or customer for the amount deposited.

(10) Refund of deposits. Deposits plus accrued interest shall be refunded under the following circumstances and in the following form:

(a) Satisfactory payment. Where the customer has for 12 consecutive months paid for service when due in a prompt and satisfactory manner as evidenced by the following:

(i) The utility has not initiated disconnection proceedings against the customer.

(ii) No more than two notices of delinquency have been made to the customer by the utility.

(b) Termination of service. Upon termination of service, the utility shall return to the customer the amount then on deposit plus accrued interest, less any amounts due the utility by the customer for service rendered.

(c) Refunds - how made. Any deposit plus accrued interest, shall be refunded to the customer either in the form of a check issued and mailed to the customer no longer than 15 days following completion of 12 months' satisfactory payment as described above, or applied to the customer's bill

for service in the 13th and, if appropriate, subsequent months, in accordance with the preference as to form of refund indicated by the customer at the time of deposit or as thereafter modified.

(11) Nothing in this rule shall prevent the requirement of a larger deposit or a new deposit when conditions warrant. Should a larger or new deposit be required, the reasons therefor shall be specified in writing to the customer. Any requirement for a new or larger deposit shall be in conformity with the standards set forth in this rule.

WSR 94-01-100
PERMANENT RULES
DEPARTMENT OF
LABOR AND INDUSTRIES
[Filed December 16, 1993, 10:30 a.m.]

Date of Adoption: December 16, 1993.

Purpose: To increase the fee for filing the statement of intent to pay prevailing wage and affidavit of wages paid forms and to expand the coverage of prevailing wage to reflect statutory change.

Citation of Existing Rules Affected by this Order: Amending WAC 296-127-010, 296-127-040, and 296-127-045.

Statutory Authority for Adoption: RCW 39.12.070.

Pursuant to notice filed as WSR 93-20-131 on October 6, 1993.

Effective Date of Rule: Thirty-one days after filing.
December 16, 1993
Mark O. Brown
Director

AMENDATORY SECTION (Amending WSR 92-01-104, filed 12/18/91, effective 1/31/92)

WAC 296-127-010 Definitions for chapter 296-127 WAC. (1) "Department" means the department of labor and industries.

(2) "Director" means the director of the department or his or her duly authorized deputy or representative.

(3) "Industrial statistician" means the industrial statistician of the department's employment standards, apprenticeship, and crime victims (ESAC) division.

(4) "Assistant director" means the assistant director of the employment standards, apprenticeship, and crime victims (ESAC) division or his or her duly authorized deputy or representative.

(5) "Contractor" means:

(a) The prime contractor, and each and every subcontractor, required to be registered under chapter 18.27 RCW and/or licensed under chapter 19.28 RCW, that performs any work on a public works project site, and/or is required to pay industrial insurance premiums as a construction company.

(b) Employers engaged in shipbuilding and ship repair, building service maintenance, and any fabricator or manufacturer that produces nonstandard items specifically for a public works project.

(c) Employers that contract with contractors or subcontractors for the purpose of the production and/or delivery of materials pursuant to the terms of WAC 296-127-018.

(6) The term municipality shall include every city, county, town, district, political subdivision, or other public agency thereof which is authorized by law to require the execution of public work, except drainage districts, diking districts, diking and drainage improvement districts, drainage improvement districts, diking improvement districts, consolidated diking and drainage improvement districts, consolidated drainage improvement districts, consolidated diking improvement districts, irrigation districts, or any such other districts as shall from time to time be authorized by law for the reclamation or development of waste or undeveloped lands.

(7)(a) The term "public work" shall include:

(i) All work, construction, alteration, enlargement, improvement, repair, and/or demolition that is executed by contract, purchase order, or any other legal agreement and that is executed at the cost of the state of Washington or of any municipality. The source of the funding shall not determine the applicability of the statute, and may include, but is not limited to, such sources as those payments made through contracts with insurance companies on behalf of the insured state or municipality;

(ii) All work, construction, alteration, enlargement, improvement, repair, and/or demolition which, by law, constitutes a lien or charge on any property of the state or of a municipality;

(iii) ~~((New))~~ All work, construction, alteration, repair, or improvement, other than ordinary maintenance that ((are caused by)) the state ((agencies)) or a municipality causes to be ((built)) performed by a private party through a contract to rent, lease, or purchase at least ((eighty)) fifty percent of ((such facility for occupation by)) the project by one or more state agencies or municipalities, pursuant to RCW ((43.82.015)) 39.04.260;

(iv) Maintenance, except ordinary maintenance as defined by (b)(iii) of this subsection, when performed by contract. Maintenance is defined as keeping existing facilities in good usable, operational condition;

(v) Janitorial and building service maintenance as defined by WAC 296-127-023, when performed by contract, on public buildings and/or assets; and

(vi) The fabrication and/or manufacture of nonstandard items produced by contract specifically for a public works project as defined by (a)(i) through (v) of this subsection.

(b) The term "public work" shall not include:

(i) Work, construction, alteration, enlargement, improvement, repair, demolition, and/or maintenance for which no wage or salary compensation is paid, consistent with the requirements of RCW 35.21.278;

(ii) The construction, alteration, repair, or improvement of any municipal street railway system;

(iii) Ordinary maintenance which is defined as work not performed by contract and that is performed on a regularly scheduled basis (e.g., daily, weekly, monthly, seasonally, semiannually, but not less frequently than once per year), to service, check, or replace items that are not broken; or work not performed by contract that is not regularly scheduled but is required to maintain the asset so that repair does not become necessary.

(8) "Contract" means a contract, purchase order, or any other legal agreement in writing for public work to be performed for a fixed or determinable amount, which is duly awarded after advertisement and competitive bid. A contract that is awarded from a small works roster, or under the emergency provisions of state law, need not be advertised.

(9) "Residential construction" means construction, alteration, repair, improvement, or maintenance of single family dwellings, duplexes, apartments, condominiums, and other residential structures not to exceed four stories in height, including basement, when used solely as permanent residences. It does not include the utilities construction (water and sewer lines), or work on streets, or work on other structures (e.g., for recreation and business.)

AMENDATORY SECTION (Amending WSR 90-24-053, filed 12/3/90, effective 1/3/91)

WAC 296-127-040 Statement of intent to pay prevailing wages. (1) All statements of intent to pay prevailing wages submitted to the industrial statistician of the department shall be accompanied by a fee of ~~((twelve))~~ twenty-five dollars ((and fifty cents)) for each statement. Fees shall be made payable to the department of labor and industries.

(2) Any agency, division, or department of the state of Washington which through agreement with the department certifies statements of intent for its own contracts shall provide to the industrial statistician each month the number of statements of intent certified and quarterly shall send a fee of ~~((ten))~~ twenty dollars for each statement of intent to pay prevailing wages it has certified. This fee shall be sent to the industrial statistician and be made payable to the department of labor and industries.

AMENDATORY SECTION (Amending WSR 90-24-053, filed 12/3/90, effective 1/3/91)

WAC 296-127-045 Affidavit of wages paid. (1) All affidavits of wages paid submitted to the industrial statistician of the department shall be accompanied by a fee of ~~((twelve))~~ twenty-five dollars ~~((and fifty cents))~~ for each affidavit of wages paid. All fees shall be made payable to the department of labor and industries.

(2) Any agency, division, or department of the state of Washington which through agreement with the department certifies affidavits of wages paid for its own contracts shall provide to the industrial statistician each month the number of affidavit of wages paid it has certified and quarterly shall send a fee of ~~((ten))~~ twenty dollars for each affidavit of wages paid it has certified. This fee shall be sent to the industrial statistician and be made payable to the department of labor and industries.

WSR 94-01-101
PERMANENT RULES
STATE BOARD OF EDUCATION
[Filed December 16, 1993, 10:50 a.m.]

Date of Adoption: November 19, 1993.

Purpose: Changes for editorial clarification and codifying administrative policies and new sections to implement new provisions of certification requirements.

Citation of Existing Rules Affected by this Order: Amending WAC 180-79-065, 180-79-115, 180-79-120, 180-79-125, 180-79-245, and 180-79-303.

Statutory Authority for Adoption: RCW 28A.410.010.

Pursuant to notice filed as WSR 93-20-095 on October 5, 1993.

Effective Date of Rule: Thirty-one days after filing.

December 16, 1993

Dr. Monica Schmidt

Executive Director/Secretary

AMENDATORY SECTION (Amending WSR 92-20-083, filed 10/6/92, effective 11/6/92)

WAC 180-79-065 Initial and continuing certificates—Applicable conditions. The following shall apply to initial and continuing certificates issued pursuant to this chapter:

(1) Initial certificate.

An initial educational staff associate or administrator certificate issued prior to August 31, 1988, or an initial teacher certificate may be renewed for an additional three-year period on application and verification that the individual has completed all course work requirements from a regionally accredited institution of higher education for continuing certification or has completed at least fifteen quarter hours (ten semester hours) of course work from a regionally accredited institution of higher education since the certificate was issued or renewed.

(2) Continuing certificate.

(a) The continuing certificates of holders who were eligible for such certificates prior to August 31, 1987 and who applied for such certificates prior to July 1, 1988 or who would have been eligible for such certificates prior to August 31, 1987, but for one of the three-year experience requirement and who complete such requirement and apply for such certificate prior to August 31, 1988, will be valid for life. Holders of valid continuing certificates affected by this subsection shall be entitled to have such certificate reissued and subject to the terms and conditions applicable to certification at the time of reissuance including the continuing education requirements of chapter 180-85 WAC.

(b) All continuing certificates not affected by the exception stated in (a) of this subsection shall lapse if the holder does not complete the continuing education requirement specified in chapter 180-85 WAC. To reinstate such a lapsed continuing certificate the individual must complete the requirements for reinstatement stated within chapter 180-85 WAC.

AMENDATORY SECTION (Amending WSR 92-20-083, filed 10/6/92, effective 11/6/92)

WAC 180-79-115 Academic requirements for certification—Teachers. Candidates for teachers' certificates shall complete the following requirements in addition to those set forth in WAC 180-75-080 and 180-75-085.

(1) Initial.

(a) Candidates for the initial certificate who apply for such certificate on or before August 31, 1992, shall hold a

baccalaureate degree from a regionally accredited college or university and shall have completed the degree major in an academic field or in the teaching specialization of early childhood, elementary, reading, or special education.

(b) Candidates for the initial certificate who apply for such certificate after August 31, 1992, shall hold an approved baccalaureate degree from a regionally accredited college or university: *Provided*, That if the approved baccalaureate degree is in early childhood education, elementary education, or special education, the candidate also must have at least thirty quarter hours (twenty semester hours) in one of the academic fields listed in WAC 180-79-080 (3)(a) through (e) and (4).

(2) Continuing.

(a) Candidates who apply for a continuing certificate shall have at least forty-five quarter hours (thirty semester hours) of upper division and/or graduate work completed from a regionally accredited institution of higher education subsequent to the conferral of the baccalaureate degree: *Provided*, That if the individual is pursuing study in a new subject matter area or specialization, lower division courses in that subject area or specialization shall be accepted toward continuing certification upon completion of the requirements for an endorsement in that subject area or specialization.

(b) Candidates for a continuing certificate shall have been granted at least two subject area endorsements.

(c) Candidates who apply for a continuing certificate after August 31, 1992, who have not successfully completed course work or an in-service program including a minimum of ten clock hours of instruction on issues of abuse, must complete such course work or in-service program as a condition for the issuance of a continuing certificate. The content of the course work or in-service program shall discuss the identification of physical, emotional, sexual, and substance abuse, information on the impact of abuse on the behavior and learning abilities of students, discussion of the responsibilities of a teacher to report abuse or provide assistance to students who are the victims of abuse, and methods for teaching students about abuse of all types and their prevention.

AMENDATORY SECTION (Amending WSR 92-04-044, filed 1/31/92, effective 3/2/92)

WAC 180-79-120 Academic requirements for certification—Administrators. Candidates for the respective administrative certificate shall complete the following requirements in addition to those set forth in WAC 180-75-085 and 180-79-124.

(1) Superintendent.

(a) Initial.

(i) The candidate who applies for an initial certificate on or before August 31, 1992, shall hold a master's degree and complete at least fifteen quarter hours (ten semester hours) of graduate study beyond the master's degree in education-related course work and shall hold or be eligible to hold a valid initial or continuing teacher or ESA certificate at the time he or she applies for the initial superintendent's certificate.

(ii) The candidate who applies for an initial certificate after August 31, 1992, shall hold an approved masters degree and have completed subsequent to the baccalaureate degree

at least forty-five quarter hours (thirty semester hours) of graduate level course work in education.

(iii) The candidate must meet requirements for a superintendent's certificate pursuant to WAC 180-79-049.

(b) Continuing.

(i) The candidate who applies for a continuing certificate on or before August 31, 1992, shall have completed at least thirty quarter hours (twenty semester hours) of graduate work beyond the master's degree.

(ii) The candidate who applies after August 31, 1992, shall hold an approved masters degree and have completed subsequent to the baccalaureate degree at least sixty quarter hours (forty semester hours) of graduate level course work in education or shall hold a doctorate in education.

(iii) The candidate must meet requirements for a superintendent's certificate pursuant to WAC 180-79-049.

(2) Principal.

(a) Initial.

(i) The candidate who applies on or before August 31, 1992, shall hold or have held a Washington initial, continuing or comparable teaching certificate from another state at the time he or she applies for the initial principal's certificate and shall have completed an approved program for the preparation of principals.

(ii) The candidate who applies after August 31, 1992, shall hold a masters degree and have completed an approved program for the preparation of principals.

(b) Continuing.

(i) The candidate who applies on or before August 31, 1992, shall hold a master's degree.

(ii) The candidate who applies after August 31, 1992, shall hold an approved masters degree and completed subsequent to the baccalaureate degree at least forty-five hours (thirty semester hours) of graduate level course work in education or shall hold a doctorate in education.

(iii) The candidate must meet requirements for a principal's certificate pursuant to WAC 180-79-049.

(3) Program administrator.

(a) Initial.

(i) The candidate who applies on or before August 31, 1992, shall hold a valid initial or continuing teacher or educational staff associate certificate at the time he or she applies for the program administrator's initial certificate and shall hold a master's degree.

(ii) The candidate who applies after August 31, 1992, shall hold an approved masters degree, a masters degree required for an educational staff associate certificate, a masters degree in school nursing, occupational therapy or physical therapy, or a masters degree in public, education, or business administration and have completed subsequent to the baccalaureate degree at least twenty-four quarter hours (sixteen semester hours) of graduate level course work in education.

(b) Continuing.

(i) The candidate who applies on or before August 31, 1992, shall have completed at least fifteen quarter hours (ten semester hours) of graduate work subsequent to the master's degree relevant to educational administration or his or her subject matter field(s) or specialization(s).

(ii) The candidate who applies after August 31, 1992, shall hold an approved masters degree, a masters degree required for an educational staff associate certificate, a

masters degree in school nursing, occupational therapy, physical therapy, or a masters degree in public, education, or business administration and have completed subsequent to the baccalaureate degree at least thirty quarter hours (twenty semester hours) of graduate level course work in education or shall hold a doctorate in education.

NEW SECTION

WAC 180-79-124 Child abuse course work requirement for continuing certification—Administrators.

Candidates who apply for a continuing administrator certificate after August 31, 1994, must have successfully completed course work or an in-service program including a minimum of ten clock hours of instruction on issues of abuse as a condition for the issuance of a continuing certificate. The content of the course work or in-service program shall discuss the identification of physical, emotional, sexual, and substance abuse, information on the impact of abuse on the behavior and learning abilities of students, discussion of the responsibilities of a teacher to report abuse or provide assistance to students who are the victims of abuse, and methods for teaching students about abuse of all types and their prevention.

AMENDATORY SECTION (Amending Order 27-88, filed 12/14/88)

WAC 180-79-125 Academic requirements for certification—Educational staff associate (ESA).

Candidates for ESA certification shall complete the following requirements in addition to those set forth in WAC 180-75-085 and 180-79-126: *Provided*, That it shall not be necessary for any candidate who holds a master's or doctorate degree to obtain the specified master's degree if the candidate provides satisfactory evidence to the superintendent of public instruction that he or she has completed all course work requirements relevant to the required masters degree and has satisfactorily completed a comprehensive written examination required in such masters degree program: *Provided*, That if any candidate has been awarded a masters degree without a comprehensive written examination, the candidate, as a condition for certification, shall arrange to take such an examination with any accredited college or university and provide the superintendent of public instruction with an affidavit from the chair of the department of such academic field that he or she has successfully completed the above noted comprehensive examination.

(1) Communication disorders specialist.

(a) Initial. The candidate shall have completed all requirements for the master's degree (except special projects or thesis) with a major in speech pathology and/or audiology.

(b) Continuing. The candidate shall hold a master's degree with a major in speech pathology and/or audiology.

(2) School counselor.

(a) Initial. The candidate shall have completed all requirements for the master's degree (except special projects or thesis) with a major in counseling.

(b) Continuing. The candidate shall hold a master's degree with a major in counseling.

(3) School occupational therapist.

(a) Initial.

(i) The candidate shall have completed an approved or accredited baccalaureate degree program in occupational therapy.

(ii) The candidate shall hold a valid license as an occupational therapist in Washington state.

(b) Continuing. The candidate shall have completed the requirements for an initial endorsement as a school occupational therapist and have completed at least fifteen quarter hours (ten semester hours) of course work beyond the baccalaureate degree in occupational therapy, other health sciences, or education.

(4) School physical therapist.

(a) The candidate shall hold a baccalaureate degree in physical therapy from a college or university having an approved or accredited school of physical therapy or the candidate shall hold a baccalaureate degree and a certificate in physical therapy from an accredited school of physical therapy.

(i) The candidate shall hold a valid license as a physical therapist in Washington state.

(b) Continuing. The candidate shall have completed the requirements for an initial endorsement as a school physical therapist and have completed at least fifteen quarter hours (ten semester hours) of course work beyond the baccalaureate degree in physical therapy, other health sciences, or education.

(5) School psychologist.

(a) Initial.

The candidate shall have completed all requirements for the master's degree (except special projects or thesis) with a major or specialization in school psychology.

(b) Continuing. The candidate shall hold a master's degree with a major or specialization in school psychology.

(6) Reading resource specialist.

(a) Initial.

(i) The candidate shall have completed all requirements for the master's degree (except special projects or thesis) with a major or specialization in reading.

(ii) The candidate shall hold or have held a teaching certificate.

(b) Continuing. The candidate shall have completed the requirements for an initial certificate as a reading resource specialist and shall hold a master's degree with a major or specialization in reading.

(7) School nurse.

(a) Initial.

(i) The candidate shall hold a valid license as a registered nurse (RN) in Washington state.

(ii) The candidate shall hold a baccalaureate degree in nursing and have completed at least fifteen quarter hours (ten semester hours) of post baccalaureate upper division or graduate work in education, nursing, or other health sciences.

(b) Continuing. The candidate shall have completed the requirements for an initial endorsement as a school nurse and have completed at least an additional thirty quarter hours (twenty semester hours) of graduate work in education, nursing or other health sciences.

(8) School social worker.

(a) Initial.

The candidate shall have completed all requirements for a master's degree in social work except special projects or thesis.

(b) Continuing. The candidate shall hold a master's degree in social work.

NEW SECTION

WAC 180-79-126 Child abuse course work requirement for continuing certification—Educational staff associate. Candidates who apply for a continuing educational staff associate certificate after August 31, 1994, must have successfully completed course work or an in-service program including a minimum of ten clock hours of instruction on issues of abuse as a condition for the issuance of a continuing certificate. The content of the course work or in-service program shall discuss the identification of physical, emotional, sexual, and substance abuse, information on the impact of abuse on the behavior and learning abilities of students, discussion of the responsibilities of a teacher to report abuse or provide assistance to students who are the victims of abuse, and methods for teaching students about abuse of all types and their prevention.

AMENDATORY SECTION (Amending WSR 90-12-075, filed 6/1/90, effective 7/2/90)

WAC 180-79-245 Out-of-state candidates. (~~Out-of-state candidates for certification shall not be required to demonstrate passage of any applicable admission-to-practice or other applicable examination until making application for a continuing certificate.~~) Candidates for certification from other states shall be eligible for Washington certificates as follows:

(1) Initial certificate. The initial certificate shall be issued by the superintendent of public instruction to any candidate who meets one of the following:

(a) Qualifies under provisions of the interstate compact.

(b) Holds the appropriate degree and, if applicable, credit hours and/or licensing as set forth in this chapter and has completed a state approved preparation program at a regionally accredited college or university in the professional field for which the certificate is to be issued and such additional professional fields as required by WAC 180-79-049.

(c) Holds an appropriate degree from a regionally accredited college or university and also holds or has held ~~(an) an appropriate certificate ((#)) issued by another state and has practiced at the P-12 level in that respective role ((under the appropriate certificate))~~ outside the state of Washington for three years.

(d) Holds an appropriate degree from a regionally accredited college or university and has practiced three years as an educational staff associate in that role in a state where such certificate was not required.

(2) Continuing certificate. The continuing certificate shall be issued on verification that the candidate has met all requirements for initial and continuing certification in the state of Washington.

NEW SECTION

WAC 180-79-247 Establishing equivalency for course work, degrees and programs completed in countries outside the United States. Certification candidates who have completed degree and/or approved professional

preparation programs in a country other than the United States may be required to submit:

(1) A statement of degree equivalency for the appropriate degree from a foreign credentials' evaluation agency approved by the office of the superintendent of public instruction.

(2) A statement from an official of the college or university where the certification program was completed, indicating completion of the program and approval of the program by the agency governing certification in that country.

AMENDATORY SECTION (Amending Order 27-88, filed 12/14/88)

WAC 180-79-303 Endorsement by examination. In lieu of completing the required number of credit hours and the essential areas of study, or any portion of such requirements, ~~((Washington colleges and universities with an approved preparation program for teachers may waive all or any portion of the requirement for a particular endorsement and recommend the candidate to the superintendent of public instruction for the particular endorsement if the following conditions are met:~~

~~(1) The candidate is required to demonstrate subject matter competency for all or a portion of the requirement waived through passage of one or more written examinations:~~

~~(2) In the case of waiver of an essential area of study, a faculty member regularly responsible for teaching a course which covers that essential area of study must attest to the fact that the proposed examination is of sufficient scope and depth to evaluate the candidate's knowledge of the essential)) individuals may add endorsements to an initial or continuing teaching certificate by examination in one of the following ways:~~

~~(1) An individual may add an endorsement to a teaching certificate by obtaining a score of not less than one-half standard deviation below the mean on a graduate record examination in the subject matter area for which endorsement is sought.~~

~~(2) Washington colleges and universities with an approved preparation program for teachers may waive all or any portion of the requirement for a particular endorsement and recommend the candidate to the superintendent of public instruction for the particular endorsement if the following conditions are met:~~

~~(a) The candidate is required to demonstrate subject matter competency for all or a portion of the requirement waived through passage of one or more written examinations.~~

~~(b) In the case of waiver of an essential area of study, a faculty member regularly responsible for teaching a course which covers that essential area of study must attest to the fact that the proposed examination is of sufficient scope and depth to evaluate the candidate's knowledge of the essential area of study.~~

AMENDATORY SECTION

NWAPA REGULATION SECTION 104 - ADOPTION OF STATE AND FEDERAL LAWS AND RULES

104.1 All provisions of State Law as it now exists or may be hereafter amended, which is pertinent to the operation the Authority is hereby adopted by reference and made part of the Regulation of the Authority as of ~~September 8, 1993~~ December 8, 1993. Specifically, there is adopted by reference the Washington State Clean Air Act (RCW 70.94), the Administrative Procedures Act (RCW 34.04) and RCW 43.21A and 43.21B and the following state rules: WAC 173-400, WAC 173-401, WAC 173-402, WAC 173-403, WAC 173-410, WAC 173-415, WAC 173-425, WAC 173-430, WAC 173-433, WAC 173-434, WAC 173-440, WAC 173-460, WAC 173-470, WAC 173-474, WAC 173-475, WAC 173-480, WAC 173-481, WAC 173-490, WAC 173-491, and WAC 173-802.

104.2 All provisions of the following federal rules are hereby adopted by reference and made part of the Regulation of the Authority as of ~~September 8, 1993~~ December 8, 1993: 40 CFR Part 60 (Standards of Performance For New Stationary Sources) subparts A, B, C, Ca, Cb, D, Da, Db, Dc, E, Ea, F, G, H, I, J, K, Ka, Kb, L, M, N, Na, O, P, Q, R, S, T, U, V, W, X, Y, Z, AA, AAa, BB, CC, DD, EE, FF, GG, HH, KK, LL, MM, NN, OO, PP, QQ, RR, SS, TT, UU, VV, WW, XX, YY, AAA, BBB, DDD, FFF, GGG, HHH, III, JJJ, KKK, LLL, NNN, OOO, PPP, QQQ, SSS, TTT, VVV; and 40 CFR Part 61 (National Emission Standards For Hazardous Air Pollutants) Subparts A, B, C, D, E, F, H, I, J, K, L, M, N, O, P, Q, R, T, V, W, Y, BB, FF and 40 CFR Part 63 (National Emission Standards for Hazardous Air Pollutants for Source Categories) Subpart M.

Amended: September 8, 1993, December 8, 1993

Reviser's note: The typographical errors in the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION

NWAPA REGULATION SECTION 150 - POLLUTANT DISCLOSURE - REPORTING BY AIR CONTAMINANT SOURCES

150.13 The estimated annual total production of wastes discharged into the air in units and contaminants designated by the Authority. Annual emission reports shall be submitted to the NWAPA within ~~20~~ 105 days after the end of the previous calendar year. If the emission report is not submitted by the required date and the emissions are used to determine operating permit fees as described in Section 324.126 then potential to emit will be used to determine said fees.

Reviser's note: The typographical error in the above section occurred in the copy filed by the agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION

December 13, 1993
 Vern E. Wagar
 Executive Director

NWAPA REGULATION SECTION 324 - FEES

324.121 Commencing with the effective date of the operating permit program the Authority shall assess and collect annual air operating permit fees in its jurisdiction for any source specified in section 7661(a) of Title V of the Federal Clean Air Act (FCAA) or WAC 173-401-300 (excluding sources regulated by the Washington State Department of Ecology Industrial Section). The total fees required by the NWAPA to administer the program shall be determined by a workload analysis conducted by the staff and approved annually by resolution by the Board of Directors in a public hearing. Allocation of the fees to individual affected sources shall be based on the following:

Reviser's note: The typographical error in the above section occurred in the copy filed by the agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION

NWAPA REGULATION SECTION 326 - OPERATING PERMITS

326.1 Purpose

The purpose of this Section is to provide for the implementation of a renewable operating permit program consistent with the requirements of Title V of the Federal Clean Air Act Amendments of 1990, WAC 173-401 and RCW 70.94.

326.2 Applicability

The provisions of this section shall apply to all sources within the NWAPA jurisdiction excluding those regulated by the Washington State Department of Ecology Industrial Section subject to the requirements of section 7661(a) of the Federal Clean Air Act (FCAA) or WAC 173-401-300.

WSR 94-01-115
PERMANENT RULES
COUNTY ROAD
ADMINISTRATION BOARD
 [Filed December 17, 1993, 9:30 a.m.]

Date of Adoption: October 6, 1993.

Purpose: Change fixed values for regional land area ratios to a biennially updated method.

Citation of Existing Rules Affected by this Order: Amending WAC 136-119-020.

Statutory Authority for Adoption: RCW 36.79.060.

Pursuant to notice filed as WSR 93-18-029 on August 25, 1993.

Changes Other than Editing from Proposed to Adopted Version: Change information source from secretary of transportation to Office of Financial Management.

Effective Date of Rule: Thirty-one days after filing.

AMENDATORY SECTION (Amending Order 56, filed 7/30/84)

WAC 136-110-020 Computation of land area ratio.
 ((The rural land areas of each region, and the ratio which they bear to the total rural land area of the state are shown as follows:

| REGION | RURAL LAND AREA SQ. MILE | % OF TOTAL RURAL LAND AREA |
|-------------|-----------------------------|----------------------------------|
| Puget Sound | 5,005 | 7.71 |
| Northwest | 8,060 | 12.43 |
| Northeast | 26,711 | 41.14 |
| Southeast | 14,748 | 22.72 |
| Southwest | 10,387 | 16.00 |
| TOTAL | 64,920 | 100.00)) |

The ratio which the total county rural land area of each region bears to the total rural land area of all counties of the state shall be computed from information provided by the office of financial management as of July 1, 1993, and each two years thereafter.

PERMANENT RULES
COUNTY ROAD
ADMINISTRATION BOARD
 [Filed December 17, 1993, 9:31 a.m.]

Date of Adoption: October 6, 1993.

Purpose: To include rural arterials (Federal Function Classes 02 and 06) in definition of "arterials" for county arterial preservation program eligibility.

Citation of Existing Rules Affected by this Order: Amending WAC 136-310-010.

Statutory Authority for Adoption: RCW 46.68.095(4). Pursuant to notice filed as WSR 93-18-028 on August 25, 1993.

Effective Date of Rule: Thirty-one days after filing.
 December 13, 1993
 Vern E. Wagar
 Executive Director

AMENDATORY SECTION (Amending Order 81, filed 11/6/90, effective 12/7/90)

WAC 136-310-010 Certification of county arterial mileage. (1) Classification. The act specifies that expenditure of CAPA funds is restricted to paved arterials in the unincorporated area of each county. Arterials are defined as being those county roads:

(a) In urban areas, classified as arterials (Federal Functional Classes 12, 13, 14, 15, and 16) or classified as collectors (Federal Functional Class 17);

(b) In rural areas, classified as arterials (Federal Functional Classes 02 and 06) or classified as major collectors (Federal Functional Class 07) or minor collectors (Federal Functional Class 08).

PERMANENT

Paved roads are defined as those roads which, at the time of CAPA allocation determination, are hard-surfaced through the application of a bituminous surface treatment (BST), asphaltic concrete pavement (ACP), or portland cement concrete (PCC). Brick or block surfaces shall also be considered as paved.

(2) Source of information. The master county road log as maintained by the CRABoard in accordance with chapter 136-60 WAC shall be the source of official paved road mileages to be used for CAPA distribution.

PERMANENT RULES
DEPARTMENT OF PERSONNEL

[Filed December 17, 1993, 4:59 p.m., effective January 18, 1994]

Date of Adoption: December 17, 1993.

Purpose: The new chapter 356-56 WAC creates the Washington management service and creates new rules for managers.

Citation of Existing Rules Affected by this Order: WAC 356-56-001 Declaration of purpose, 356-56-002 Inclusion in the Washington management service, 356-56-010 Application of rules, 356-56-015 Phase in agencies, 356-56-020 Role of the Department of Personnel, 356-56-021 Transition of career executive program, 356-56-030 Equal opportunity and affirmative action, 356-56-035 Definitions, 356-56-050 Transition, 356-56-100 Compensation policy and practice, 356-56-105 Position evaluation— Assignment to management bands, 356-56-115 Salary adjustments, 356-56-120 Other pay practices, 356-56-125 Salary surveys, 356-56-200 Recruitment and selection policy and practice, 356-56-205 Movement within Washington management service, 356-56-210 Movement between Washington management service and Washington general service positions, 356-56-215 Interim appointments, 356-56-220 Review period—Attaining permanent status, 356-56-230 Reversion, 356-56-255 Return from exempt service, 356-56-400 Training and development, 356-56-410 Tuition reimbursement and educational leave, 356-56-420 Human resource development plan, 356-56-440 Performance evaluation, 356-56-500 Disciplinary actions, 356-56-550 Reduction in force—Agency procedure—Bump options, 356-56-600 Appeals, 356-56-610 Reviews, 356-56-630 Resignation, 356-56-650 Record keeping, and 356-56-660 Administrative procedures.

Statutory Authority for Adoption: Chapter 41.06 RCW and RCW 41.06.500.

PERMANENT

Pursuant to notice filed as WSR 94-01-048 on December 7, 1993; and WSR 93-23-067 on November 16, 1993.

Changes Other than Editing from Proposed to Adopted Version: The changes that have occurred in chapter 356-56 WAC are a result of many public meetings with people concerned with or affected by these rules. Changes occurred in almost every section as a result of editing and content comments from assistant attorney generals, affected employees, personnel representatives, employee organization representatives, and agencies' directors. The rules were reorganized for better understanding and smoother flow.

Effective Date of Rule: January 18, 1994.

NEW SECTION

WAC 356-56-001 Declaration of purpose. (1) The general purpose of this chapter of rules is to establish for the state a system of personnel administration called the Washington management service, as authorized in RCW 41.06.500.

(2) Except as provided in RCW 41.06.070, the director of the department of personnel is authorized to adopt, after consultation with state agencies and employee organizations, rules for managers as defined in WAC 356-56-002.

(3) In establishing rules for managers, the director shall adhere to the following goals:

(a) A simplified classification system that facilitates movement of managers between agencies and promotes upward mobility;

(b) A compensation system consistent with RCW 41.06.150(17). The system shall provide flexibility in setting and changing salaries;

(c) A performance appraisal system that emphasizes individual accountability for program results and efficient management of resources; effective planning, organization, and communication skills; valuing and managing workplace diversity; development of leadership and interpersonal abilities; and employee development;

(d) Strengthened management training and career development programs that build critical management knowledge, skills, and abilities; focusing on managing and valuing workplace diversity; empowering employees by enabling them to share in workplace decision making, and to be innovative, willing to take risks, and able to accept and deal with change; promoting a workplace where the overall focus is on the recipient of the government services and how these services can be improved; and enhancing mobility and career advancement opportunities;

(e) Flexible recruitment and hiring procedures that enable agencies to compete effectively with other employers, both public and private, for managers with appropriate skills and training; allowing consideration of all qualified candidates for positions as managers; and achieving affirmative action goals and diversity in the workplace;

(f) Provisions that managers may only be reduced, dismissed, suspended, or demoted for cause;

(g) Facilitation of decentralized and regional administration; and,

(h) Ensure that decisions are not based on patronage or political affiliation.

NEW SECTION

WAC 356-56-002 Inclusion in the Washington management service. (1) Chapter 356-56 WAC applies only to classified employees or positions that meet the definition of manager. Each agency will identify all positions that meet this definition and will place them in the Washington management service. Manager or managerial employee means the incumbent of a position that is assigned as follows:

(a) Formulates state-wide policy or directs the work of an agency or agency subdivision;

(b) Administers one or more state-wide policies or programs of an agency or agency subdivision;

PERMANENT

(c) Manages, administers, and controls a local branch office of an agency or an agency subdivision, including the physical, financial, or personnel resources;

(d) Has substantial responsibility in personnel administration, legislative relations, public information, or the preparation and administration of budgets; or,

(e) Functionally is above the first level of supervision and exercises authority that is not merely routine or clerical in nature and requires the consistent use of independent judgment.

(2) Chapter 356-56 WAC shall not apply to managers whose positions are exempt from civil service or who are employed by institutions of higher education and related boards.

NEW SECTION

WAC 356-56-010 Application of rules. (1) These rules shall be separate from rules adopted by the Washington personnel resources board for other classified employees, and to the extent that the rules adopted apply only to managers, shall take precedence over rules adopted by the board, and are not subject to review by the board.

(2) The intent of the director of personnel in adopting the rules in this chapter is to comprehensively cover the personnel matters relating to Washington management service positions. Therefore, if a Washington management service issue is identified that the director has not specifically addressed by adopting rules, the Washington personnel resources board rules shall not be effective or take precedence in addressing the issue.

(3) Except where specifically stated otherwise, the following WAC chapters do not apply to positions or employees included in the Washington management service:

- WAC 356-05 Definitions
- WAC 356-10 Classification
- WAC 356-14 Compensation
- WAC 356-15 Compensation Plan Appendix
- WAC 356-22 Recruitment - Examination
- WAC 356-26 Registers - Certification
- WAC 356-30 Appointments - Separation
- WAC 356-34 Disciplinary Action - Appeals
- WAC 356-37 Hearings
- WAC 356-39 Human Resource Development
- WAC 356-49 Intersystem Employment

(4) Except where specifically stated otherwise, the following WAC Chapters do apply to positions or employees included in the Washington management service:

- WAC 356-06 General Provisions
- WAC 356-07 Operations and Public Records
- WAC 356-09 Affirmative Action Program
- WAC 356-18 Leave
- WAC 356-35 Disability-Separation-Appeals-Procedures
- WAC 356-42 Labor Relations
- WAC 356-46 Miscellaneous
- WAC 356-48 State Internship Program

NEW SECTION

WAC 356-56-015 Phase in agencies—Application of rules. Chapter 356-56 WAC adopted by the director of personnel and effective January 1994 will apply only to the department of personnel, department of revenue, department of transportation, and office of minority and women’s business enterprises. After the phase-in period, the director will adopt rules that apply to all agencies.

NEW SECTION

WAC 356-56-020 Role of the department of personnel. (1) The department of personnel will provide support, guidelines, and assistance to agencies in the decentralized administration of all aspects of the Washington management service.

(2) The department of personnel will consult with each agency as needed to ensure fair and equitable administration of Washington management service rules.

NEW SECTION

WAC 356-56-021 Washington management service—Transition of career executive program. (1) The provisions of this section apply only to managerial employees appointed to career executive program positions in probationary, trial service or permanent status as of June 30, 1993. The provisions of WAC 356-56-021 do not apply to managerial employees in these positions in agencies listed in WAC 356-56-015.

(2) Individuals who leave the above positions, all other managerial employees, and all vacant managerial positions are subject to the provisions of the remaining chapters of WAC 356, until such time as the director adopts rules in WAC 356-56 which pertain to those employees and positions.

(3) Managerial employees referenced in sub-section (1) of this section who successfully complete a twelve-month probationary or trial service period shall attain permanent status in the classification to which their position is allocated.

(4) Permanent managerial employees referenced in sub-section (1) of this section shall retain permanent status in the classification to which their position is allocated.

(5) Managerial employees referenced in sub-section (1) of this section who have been in the same job class and position for four consecutive years from career executive appointment date shall be removed from coverage of the provisions of this section, UNLESS an extension is approved by the director or designee.

(6) An agency director may remove a managerial employee from coverage of the provisions of this section, provided that the employee was informed of a limitation of less than four consecutive years on career executive program participation upon appointment to the program.

(7) Permanent managerial employees who voluntarily leave career executive transition status or leave in accordance with sub-sections (5) and (6) of this section, shall remain in their position and retain permanent status. Agencies shall notify the director of personnel, or designee of these vacancies.

PERMANENT

(8) Managerial employees who have not successfully completed a probationary or trial service period into positions referred in sub-section (1) of this section, or where the position is subsequently abolished, shall be entitled to return to the position or class previously held with permanent status. If such position is not available, the managerial employee shall return to a position similar in nature and salary to the position previously held. Employees appointed into these positions via the open competitive process shall not have return rights under the provisions of this section.

(9) Employees shall not be offered reduction-in-force options or trial service reversion rights to filled positions that were in the career executive program on June 30, 1993. Agencies may elect to return entitled exempt employees to these positions.

(10) Except for the agencies named in WAC 356-56-015, this section providing for career executive transition into the Washington management service shall be in effect until the director of personnel adopts rules in chapter 356-56 WAC replacing this section and encompassing all classified managerial employees subject to the provisions of chapter 41.06 RCW.

NEW SECTION

WAC 356-56-030 Equal opportunity and affirmative action. (1) Washington management service policies and practices shall not discriminate on the basis of race, creed, color, national origin, sex, age, marital status, veteran status, sexual orientation, or the presence of any sensory, mental, or physical disability.

(2) Each agency will include Washington management service positions in its affirmative action plans required by chapter 356-09 WAC. Each agency will be accountable for establishing procedures, goals, timetables, and record keeping and monitoring procedures for Washington management service positions as part of its affirmative action program.

NEW SECTION

WAC 356-56-035 Definitions. (1) **Anchor positions.** Generic anchor positions are those which are found in many agencies; they are commonly understood and similarly used from agency to agency. Agency-specific anchor positions are those anchor positions in each agency which are commonly understood and similarly used throughout the agency.

(2) **Appointing authority.** A person or group of persons designated by the agency head to make appointments, impose formal discipline or otherwise regulate personnel matters.

(3) **Management bands.** A series of management levels included in the Washington management service. Placement in a band reflects the nature of management, decision-making environment and policy impact, and scope of management accountability and control assigned to the position.

(4) **Salary level.** A range of ten percent higher and lower than the salary assigned to the position.

(5) **Washington general service.** The system of personnel administration that applies to classified employees or positions under the jurisdiction of chapter 41.06 RCW and exclusively under those chapters of Title 356 WAC that are adopted by the Washington personnel resources board.

(6) **Washington management service.** The system of personnel administration that applies to classified managerial employees or positions under the jurisdiction of RCW 41.06.022 and 41.06.500 and those chapters of Title 356 WAC that are adopted by the director of personnel.

NEW SECTION

WAC 356-56-050 Transition. (1) Until such time that an agency completes the initial evaluation of the position (as described in WAC 356-56-105) or changes the position, the incumbent and position when initially placed in the Washington management service will:

(a) Retain current salary;

(b) Continue to receive periodic increments as specified in WAC 356-14-110 within the forty-five thousand dollar salary limit set by the 1993 legislature;

(c) Immediately assume permanent status in the Washington management service for permanent status employees;

(d) Obtain permanent status upon completion of the probationary or trial service time period for employees in trial service or probationary status at the time of transition; and,

(e) Continue in the current work period designation until changed by the agency.

(2) Until all positions in an agency are evaluated in accordance with WAC 356-56-105, employees shall be treated in accordance with WAC 356-30-330 should a reduction in force occur.

(3) Permanent status employees who are in project positions at the time their regular positions are placed in the Washington management service, have return rights to the same or similar Washington management service positions.

NEW SECTION

WAC 356-56-100 Compensation policy and practice. (1) Each agency has the overall responsibility for effectively managing and properly budgeting for salaries for its Washington management service positions. Each agency shall develop policies and procedures, consistent with chapter 356-56 WAC and guidelines established by the department of personnel, for fair and objective internal salary administration. In developing and administering these policies and procedures, each agency will adhere to the following:

(a) In all aspects of compensation administration, no agency policy or procedure shall be negotiated or agreed to that reduces an agency's flexibility and discretion in assigning salaries, making salary adjustments, or other pay practices.

(b) Point factor evaluations of anchor positions will provide a framework for the evaluations of the remaining positions in the Washington management service. The department of personnel will participate in re-evaluations of generic anchor positions.

(c) Each agency will identify agency-specific anchor positions which are generally used the same throughout the agency.

(2) The salary for each position shall have a relationship to both its point factor evaluation and the prevailing market rate.

NEW SECTION

WAC 356-56-105 Position evaluation—Assignment to management bands. Management bands are a series of management levels included in the Washington management service. Placement in a band reflects the nature of management, decision-making environment and policy impact, and scope of management accountability and control assigned to the position. Each agency will evaluate its positions using a managerial point factor system developed by the department of personnel. The number of points resulting from the evaluation will determine to which management band a position is assigned.

NEW SECTION

WAC 356-56-115 Salary adjustments. (1) Adjustments to the compensation for a position with no change in point factor evaluation shall not exceed the maximum or fall below the minimum amount set by the director of personnel for the management band. Normally, salary adjustments initiated by the agency will not exceed ten percent for a single fiscal year. Requests for exception may be granted only by the director of personnel. Salary adjustments may be made under the following conditions:

(a) Legislatively directed general and/or special increase;
 (b) Documented recruitment and/or retention problems as approved by the agency director or designee;

(c) Documented agency and/or state internal salary relationship problems, as approved by the agency director or designee; or

(d) Progression adjustments may be granted during the first four years following hire or promotion (in accordance with 356-56-205(1)). An agency may adjust an employee's pay by up to five percent annually in recognition of the employee's demonstrated growth and development.

(i) An employee who transitions into Washington management service shall continue to receive an annual increment until the employee's salary reaches the maximum of the range assigned to the former job classification.

(ii) Progression adjustments must be within the forty-five thousand dollar salary limit established by the 1993 legislature until such time as the limit is changed or removed.

(2) Voluntary movement to a position of a lesser point factor evaluation may result in a salary decrease which exceeds ten percent.

(3) A promotion is the assignment of additional responsibilities which results in a higher point factor evaluation in the same position, or movement to a different position that has a higher point factor evaluation. Increases in salary made to meet the new point factor evaluation may exceed ten percent.

(4) A disciplinary demotion is the assignment of responsibilities which results in a lower point factor evaluation in the same position, or movement to a different position that has a lower point factor evaluation. The resulting salary decrease may exceed ten percent and must be in conformance with the provisions of the Fair Labor Standards Act. A disciplinary reduction in salary in conformance with the Fair Labor Standards Act may also exceed ten percent.

(5) Involuntary downward movement based on a non-disciplinary reassignment of duties that results in a lower point factor evaluation of an employee's present position shall not cause a decrease in the employee's current salary. The employee's current salary will be retained until such time as it is exceeded by the new salary level or the employee leaves the position.

(6) An agency may provide a lump sum recognition payment within guidelines established by the department of personnel in recognition of documented exceptional work and performance results. Such recognition compensation shall not become a permanent salary increase but is considered to be income for the documented exceptional work and performance results. A payment made as a lump sum for recognition purposes shall be included within the ten percent annual adjustment limitation in the fiscal year in which it is paid.

NEW SECTION

WAC 356-56-120 Other pay practices. (1) Each agency shall be responsible for determining the work period designation for each of its positions in accordance with the federal Fair Labor Standards Act. For positions covered by the overtime provisions of the Fair Labor Standards Act, pay shall be administered as prescribed by chapter 356-15 WAC.

(2) Leave accrual and use and holiday time will be administered as prescribed in chapter 356-18 WAC.

NEW SECTION

WAC 356-56-125 Salary surveys. Every even-numbered year the department of personnel shall conduct a survey of selected management positions and pay practices to determine the general competitiveness of the management band salary structure and salaries paid to specific surveyed positions. Salary survey recommendations will be forwarded to the office of the governor and to the legislature. Additional surveys may be conducted, or other survey information used, by the department of personnel to make specific salary recommendations for Washington management service positions.

NEW SECTION

WAC 356-56-200 Recruitment and selection policy and practice. Each agency shall develop policies and procedures for filling positions and for employee movement that will best meet client, employee, management, and organizational needs.

(1) Policies and procedures for recruitment and selection will be inherently flexible, permitting methods and strategies to be varied and customized for each recruitment and selection need. In all aspects of recruitment and selection, no agency policy or procedure shall be negotiated or agreed to if it will reduce the agency's flexibility and discretion in filling a position or moving an employee; provided that, such policies and procedures are consistent with chapter 356-56 WAC.

(2) In developing and administering these policies and procedures, each agency will adhere to the following:

(a) Provide for the ability to consider any or all qualified candidates for hire, promotion, or internal movement.

(b) Ensure that hiring decisions are fair, objective, and based on the evaluation of the knowledge, skills, abilities, and other job related characteristics required for successful job performance.

(c) Support workforce diversity and affirmative action goals.

(d) Consider the career development of the agency's employees and other state employees.

(e) Ensure that hiring decisions are not based on patronage or political affiliation.

(f) Ensure compliance with state and federal laws relating to employee selection and nondiscrimination.

(g) Encourage decentralized and regional administration of the recruitment and selection processes when it is appropriate for the agency.

(h) Encourage notification of the department of personnel when recruiting outside the hiring agency.

NEW SECTION

WAC 356-56-205 Movement within Washington management service. (1) A promotion within the Washington management service occurs when an employee's salary is adjusted upward as a result of WAC 356-56-115(3). A review period may be required as specified in WAC 356-56-220.

(2) There is no required promotional preference when recruiting and selecting for Washington management service positions. However, an agency may determine, on an individual position basis, if it is in the organization's best interest to limit the candidate pool to those eligible for agency or service-wide promotion.

(3) A transfer is the movement of an employee from one position to a different position or movement of a position from one section, department, or geographical location to another. The salary of the employee or the position remains at the same salary level.

(a) An employee and the affected agency or agencies may agree to a transfer within Washington management service, within an agency, or between agencies.

(b) An agency or agencies may transfer an employee or a position with an incumbent to meet client or organizational needs if the new location is within a reasonable commute as defined by the agency.

(c) An agency may transfer a position at any time. However, if the transfer results in an unreasonable commute for the incumbent, and the incumbent does not agree to transfer with the position, the rules on reduction in force as provided in WAC 356-56-550 shall apply.

NEW SECTION

WAC 356-56-210 Movement between Washington management service and Washington general service positions. (1) Employees who have attained permanent status, or who have completed six months of the review period in the Washington management service are eligible to compete under promotional recruitments for Washington general service positions.

(2) Permanent employees may transfer from the Washington management service to Washington general service positions if their salary is within the salary range of the Washington general service position.

(3) Permanent employees may transfer from Washington general service to Washington management service positions if their salary is within the salary level of the Washington management service position.

(4) Permanent employees may voluntarily demote between Washington management service and Washington general service positions at a lower pay level than their current permanent position.

NEW SECTION

WAC 356-56-215 Acting appointments. An agency may make acting, non-permanent appointments when necessary to meet organizational needs. Prior to the appointment, the appointing authority will communicate in writing to the employee the length, intent, salary, and other conditions of the appointment. Permanent employees will have the right to resume their previous or similar position at the conclusion of the acting appointment. However, an employee shall not be forced to accept an acting appointment that results in an increase or decrease in salary.

NEW SECTION

WAC 356-56-220 Review period—Attaining permanent status. (1) The review period for an appointee to a position within the Washington management service is a period of time to allow the employer to ensure the appointee meets the performance and other requirements of the position.

(2) Based on the nature of the job and the skills of the appointee, the review period will be between twelve and eighteen months as determined by the appointing authority. The appointing authority will inform the appointee in writing at the time of appointment of the length of the review period.

(3) Appointees from outside state service and promotional appointees will attain permanent status in the position upon successful completion of the review period.

(4) An appointing authority may require a permanent employee who transfers or voluntarily demotes to serve a review period.

(5) An employee who is promoted to a different Washington management service position during the review period, will begin a new review period for the new position. The employee will concurrently serve both the original and the new review period and will attain permanent status as a state employee in the original position when the original review period elapses.

(6) An employee who is appointed to a Washington management service position from a Washington general service position while serving a probationary or trial service period in the same or similar occupational field will serve the trial service or probationary period concurrently with the review period. The employee will attain permanent status in the previous job classification once the original probationary or trial service period elapses.

(7) The agency may require a review period when the employee remains in the same position and receives a promotion.

NEW SECTION

WAC 356-56-230 Reversion. (1) During the review period, the appointing authority may separate or revert the employee from the position with written notification of the effective date.

(2) If a Washington management service permanent employee is appointed to a position within an agency or to another agency and reverted during the review period, the hiring agency will place the employee in a vacant funded position for which the employee is qualified, and that is comparable to the employee's position and salary prior to the last Washington management service appointment.

(3) Within the first six months of any review period, an employee may voluntarily revert to the position, if vacant and funded, held prior to the employee's first Washington management service appointment or to a similar funded vacant position at the same salary range. If no funded vacancies are available, the employee may request to be placed on the reversion registers for the Washington general service class in which the employee held status prior to the first Washington management service appointment.

(4) Nothing in this section shall preclude agencies and the reverted employee from reaching mutual agreement on placement of a reverted employee within the Washington management service or within the Washington general service if permitted by the respective rules.

(5) If reversion of a permanent employee appointed to or within the Washington management service results in fewer funded positions than employees entitled to the positions, and the agency consequently conducts a reduction in force, the provisions of WAC 356-56-550 will apply.

(6) Reversion of employees appointed from the Washington general service will be carried out as provided in WAC 356-30-320.

(a) A permanent employee who is appointed from the Washington general service to a Washington management service position with the same agency will retain reversion rights to the class in which the employee held permanent status prior to the appointment.

(b) A permanent employee who is appointed from the Washington general service to a Washington management service position in another agency and is reverted retains the right to return to a funded position in the class and agency in which the employee held permanent status prior to the appointment to the Washington management service. If no vacant funded position is available, the employee may request to be placed on the reversion register as per WAC 356-26-030 (3) and (5) and 356-30-320.

(7) An appointee to a Washington management service position from outside state service who is separated prior to completion of the review period will not attain permanent status, nor have reversion rights to any position within the Washington management service or within the Washington general service.

(8) Employees may not appeal reversion or separation from the review period.

NEW SECTION

WAC 356-56-255 Return from exempt service. Return from an exempt appointment will be accomplished as provided in WAC 356-06-055.

NEW SECTION

WAC 356-56-400 Training and development. (1) The responsibility for training and development is a collaborative effort among state agencies, managers, and the department of personnel.

(a) Each state agency shall provide development and training opportunities specifically designed to refine and broaden managerial knowledge, skills, and abilities. Diversity and education about the civil service system will be part of this training.

(b) Managers shall be responsible for seeking out and fully participating in opportunities to enhance their knowledge, skills, and abilities.

(2) The department of personnel shall assist state agencies by providing a quality training program and consultative and technical assistance to help agencies address the development needs of their managers.

NEW SECTION

WAC 356-56-410 Tuition reimbursement and educational leave. Each agency shall develop policies for managerial development and training opportunities and criteria for providing textbooks, materials, registration fees, and other training and educational expenses, tuition reimbursement, and educational leave.

NEW SECTION

WAC 356-56-420 Human resource development plan. Each agency shall ensure that the development needs of managers are incorporated into the agency's human resource development plan. Each agency is responsible for periodic evaluations of its plan.

NEW SECTION

WAC 356-56-440 Performance evaluation. (1) Each agency shall evaluate the performance of its managers during their review periods and at least annually thereafter.

(2) The department of personnel shall provide a performance evaluation system which shall be used by each state agency for evaluation of its managers. Agencies may tailor the managerial evaluation system to fulfill agency-unique needs, provided the emphasis be placed on:

(a) Collaboration and communication between the supervisor and managerial employee during the performance planning and evaluation process;

(b) Planning for and assessment of results;

(c) Preparation of a management development plan; and,

(d) Assessment of those knowledge, skills, and abilities that are critical to effective managerial performance.

NEW SECTION

WAC 356-56-500 Disciplinary action. Appointing authorities may demote, suspend, reduce in salary, or dismiss a permanent Washington management service employee for cause. The disciplinary process shall be administered in accordance with WAC 356-34-020 through 356-34-070. However, these actions must be in conformance with the Fair Labor Standards Act.

NEW SECTION

WAC 356-56-550 Reduction in force—Agency procedure—Bump options. (1) Washington management service employees may be separated due to reduction in force in accordance with WAC 356-30-330, except that WAC 356-30-330 (3)(d) through (f) and (7) shall not apply. Seniority shall be defined as provided in WAC 356-05-390.

(2) Appointment to vacancies and "bumping" shall occur in accordance with the agency reduction in force plan and the following:

(a) Appointing authorities will seek within the agency a funded vacant position for which the employee has the required job skills that is at the same salary within the Washington management service. If no funded vacancies exist, then the appointing authority shall seek a funded position within the agency at the same or lower salary for which the separated employee has greater seniority, applicable personal work history, and the required job skills as outlined in the agency reduction in force plan. The appointing authority will first look within the current management band for equivalent funded positions at the same salary, and if none are found, then progressively to lower salaries. The appointing authority may consider vacant positions within the agency at a higher salary. Lower salary positions are positions where the mid-point salary is lower than the mid-point salary of the current position. Mid-point salary is the resultant salary of the point factor evaluation plus any prevailing rate factor.

(b) Appointing authorities will consider appropriate Washington general service positions within the agency in the same occupational field with the same or similar salary for which the employee is qualified and has held permanent status, prior to considering appropriate Washington management service positions within the agency which have a lower salary.

(c) Permanent Washington management service employees who have no options for the same or similar positions in the Washington management service, and who have held permanent status in the Washington general service, will be afforded reduction in force rights as provided in chapter 356-30 WAC.

NEW SECTION

WAC 356-56-600 Appeals. (1) Only disciplinary action as defined in WAC 356-56-500, transfer that is alleged to be an unreasonable commute, disability separation, or reduction in force action directly affecting a permanent Washington management service employee may be appealable to the personnel appeals board as provided in Title 358 WAC.

(2) Decisions on which Washington management service positions shall be eliminated under reduction in force actions shall not be appealable to the personnel appeals board.

NEW SECTION

WAC 356-56-610 Reviews. (1) Each agency will develop policies and procedures for conducting an informal review of certain actions with which the affected employee disagrees (except as described in WAC 356-56-600). In developing and administering these policies, the agency will adhere to the following:

(a) The informal review shall be limited to a maximum of three levels of review within the agency.

(b) Informal reviews may be limited to a review of documentation and other relevant information. Review decisions should be prompt.

(c) Except as provided in WAC 356-56-610 (3)(c), the informal review will be conducted by the agency director or designee.

(2) Employee requests for review must be in writing and requested within fifteen calendar days of the action or notification or awareness (whichever was first) of the action to be reviewed.

(3) An agency shall conduct an informal review, at the employee's request, for the following actions:

(a) Salary adjustment (or lack thereof) when the responsibilities of the permanent employee's position have been changed.

(b) Placement actions following reversion of a permanent employee.

(c) Decisions about if a position is included in the Washington management service.

(i) The final agency-internal review shall be conducted by the agency director or designee.

(ii) If the incumbent disagrees with the agency director/designee's decision, he/she may request a review by the director of the department of personnel, provided that such request is made within fifteen calendar days of notification of the decision. Such review will be limited to relevant documents and information and will be final.

(4) Each agency is responsible for identifying and acting upon patterns or trends that signal problems or training needs among its managers.

(5) Each agency shall maintain a record of the number, nature, and outcome of informal reviews.

(6) The director of personnel retains the right to review any review decision rendered by agency heads or designees or any actions taken under the Washington management service.

NEW SECTION

WAC 356-56-630 Resignation. Washington management service employees may resign following the provisions of WAC 356-30-250 (1) through (4).

NEW SECTION

WAC 356-56-650 Record keeping. Each agency will maintain records of employees in the Washington management service. The records will identify employees as members of the Washington management service, including

position numbers and position titles, and track all personnel actions related to them. Agencies will be responsible for reporting statistical information to the department of personnel regarding diversity, applicant flow, and appointments following each selection.

NEW SECTION

WAC 356-56-660 Administrative procedures—Rule making. (1) The director of personnel will adopt rules as necessary and appropriate pursuant to RCW 41.06.500 and chapter 356-56 WAC. The director will hold a formal, public meeting to receive comments and a record of proceedings will be maintained.

(2) The meetings in which the director of personnel receives comments on rule proposals shall be conducted in a facility and manner that reasonably accommodates the needs of persons with disabilities.

(3) Interested parties may participate in the formulation of rules or amendments thereto by offering proposals for the director's consideration. As necessary, informal meetings of interested parties and department of personnel staff may be called prior to presenting rule proposals to the director.

WSR 94-01-134
PERMANENT RULES
FOREST PRACTICES BOARD

[Filed December 20, 1993, 2:34 p.m., effective January 1, 1994]

Date of Adoption: December 9, 1993.

Purpose: To modify forest practices rules, in order to protect public resources coincident with maintaining a viable timber industry.

Citation of Existing Rules Affected by this Order: Amending WAC 222-08-030, 222-12-020, 222-16-030, 222-16-035, 222-16-060, 222-24-010, 222-24-025, 222-24-040, 222-34-030, 222-46-010, 222-46-020, 222-46-030, 222-46-040, 222-46-060, 222-46-070, and chapter 222-22 WAC; and new WAC 222-46-065.

Statutory Authority for Adoption: RCW 76.09.040, 76.09.170, and chapter 34.05 RCW.

Pursuant to notice filed as WSR 93-20-077 on October 4, 1993.

Changes Other than Editing from Proposed to Adopted Version: Sections dealing with calculation of the penalty and the base penalty schedule were clarified and simplified as a result of public comments. These changes were not substantial changes.

Other Findings Required by Other Provisions of Law as Precondition to Adoption or Effectiveness of Rule: The 1993 legislature amended RCW 76.09.170 which requires that the board adopt a penalty schedule to be effective no later than January 1, 1994.

Effective Date of Rule: January 1, 1994.

December 10, 1993
Jennifer M. Belcher
Commissioner of Public Lands

AMENDATORY SECTION (Amending Order 263, filed 6/16/76)

WAC 222-08-030 Reporting procedures. The department shall:

(1) **Survey and identify** all silviculturally related nonpoint sources of pollution and related control programs in the state,

(2) **Prepare an analysis** of the above activities and programs, and

(3) **Report and recommend** to the ~~((forest practices advisory committee, the))~~ forest practices board and to the governor additional rules and regulations, procedures and/or methods necessary for the control of such sources to the extent feasible.

AMENDATORY SECTION (Amending WSR 93-12-001, filed 5/19/93, effective 6/19/93)

WAC 222-12-020 Regulation sections. These regulations are organized as follows:

Chapter 222-08 WAC Practices and procedures.

Chapter 222-10 WAC State Environmental Policy Act Guidelines.

Chapter 222-12 WAC Policy and organization.

Chapter 222-16 WAC Definitions.

Chapter 222-20 WAC Application and notification procedures.

Chapter 222-22 WAC Watershed analysis.

Chapter 222-24 WAC Road construction and maintenance.

Chapter 222-30 WAC Timber harvesting.

Chapter 222-34 WAC Reforestation.

Chapter 222-38 WAC Forest chemicals.

Chapter 222-42 WAC Supplemental directives.

Chapter 222-46 WAC Consultation and enforcement.

Chapter 222-50 WAC Relationship to other laws and regulations.

AMENDATORY SECTION (Amending WSR 92-15-011, filed 7/2/92, effective 8/2/92)

WAC 222-16-030 Water typing system. *The department in cooperation with the departments of fisheries, wildlife and ecology, and in consultation with affected Indian tribes shall classify streams, lakes and ponds and prepare stream classification maps showing the location of Type 1, 2, 3 and 4 Waters within the various forested areas of the state. Such maps shall be available for public inspection at region offices of the department. The waters will be classified using the following criteria. If a dispute arises concerning a water type the department shall make available informal conferences, which shall include the departments of fisheries, wildlife and ecology, and affected Indian tribes and those contesting the adopted water types. These conferences shall be established under procedures established in WAC 222-46-020.

*(1) "**Type 1 Water**" means all waters, within their ordinary high-water mark, as inventoried as "shorelines of the state" under chapter 90.58 RCW and the rules promulgated pursuant to chapter 90.58 RCW, but not including those waters' associated wetlands as defined in chapter 90.58 RCW.

***(2) "Type 2 Water"** shall mean segments of natural waters which are not classified as Type 1 Water and have a high fish, wildlife, or human use. These are segments of natural waters and periodically inundated areas of their associated wetlands, which:

(a) Are diverted for domestic use by more than 100 residential or camping units or by a public accommodation facility licensed to serve more than 100 persons, where such diversion is determined by the department to be a valid appropriation of water and the only practical water source for such users. Such waters shall be considered to be Type 2 Water upstream from the point of such diversion for 1,500 feet or until the drainage area is reduced by 50 percent, whichever is less;

(b) Are within a federal, state, local, or private campground having more than 30 camping units: *Provided*, That the water shall not be considered to enter a campground until it reaches the boundary of the park lands available for public use and comes within 100 feet of a camping unit, trail or other park improvement;

(c) Are used by substantial numbers of anadromous or resident game fish for spawning, rearing or migration. Waters having the following characteristics are presumed to have highly significant fish populations:

(i) Stream segments having a defined channel 20 feet or greater in width between the ordinary high-water marks and having a gradient of less than 4 percent.

(ii) Lakes, ponds, or impoundments having a surface area of 1 acre or greater at seasonal low water.

(d) Are used by salmonids for off-channel habitat. These areas are critical to the maintenance of optimum survival of juvenile salmonids. This habitat shall be identified based on the following criteria:

(i) The site must be connected to a stream bearing salmonids and accessible during some period of the year; and

(ii) The off-channel water must be accessible to juvenile salmonids through a drainage with less than a 5% gradient.

***(3) "Type 3 Water"** shall mean segments of natural waters which are not classified as Type 1 or 2 Water and have a moderate to slight fish, wildlife, and human use. These are segments of natural waters and periodically inundated areas of their associated wetlands which:

(a) Are diverted for domestic use by more than 10 residential or camping units or by a public accommodation facility licensed to serve more than 10 persons, where such diversion is determined by the department to be a valid appropriation of water and the only practical water source for such users. Such waters shall be considered to be Type 3 Water upstream from the point of such diversion for 1,500 feet or until the drainage area is reduced by 50 percent, whichever is less;

(b) Are used by significant numbers of anadromous fish for spawning, rearing or migration. Waters having the following characteristics are presumed to have significant anadromous fish use:

(i) Stream segments having a defined channel of 5 feet or greater in width between the ordinary high-water marks; and having a gradient of less than 12 percent and not upstream of a falls of more than 10 vertical feet.

(ii) Ponds or impoundments having a surface area of less than 1 acre at seasonal low water and having an outlet to an anadromous fish stream.

(c) Are used by significant numbers of resident game fish. Waters with the following characteristics are presumed to have significant resident game fish use:

(i) Stream segments having a defined channel of 10 feet or greater in width between the ordinary high-water marks; and a summer low flow greater than 0.3 cubic feet per second; and a gradient of less than 12 percent.

(ii) Ponds or impoundments having a surface area greater than 0.5 acre at seasonal low water.

(d) Are highly significant for protection of downstream water quality. Tributaries which contribute greater than 20 percent of the flow to a Type 1 or 2 Water are presumed to be significant for 1,500 feet from their confluence with the Type 1 or 2 Water or until their drainage area is less than 50 percent of their drainage area at the point of confluence, whichever is less.

***(4) "Type 4 Water"** classification shall be applied to segments of natural waters which are not classified as Type 1, 2 or 3, and for the purpose of protecting water quality downstream are classified as Type 4 Water upstream until the channel width becomes less than 2 feet in width between the ordinary high-water marks. Their significance lies in their influence on water quality downstream in Type 1, 2, and 3 Waters. These may be perennial or intermittent.

***(5) "Type 5 Water"** classification shall be applied to all natural waters not classified as Type 1, 2, 3 or 4; including streams with or without well-defined channels, areas of perennial or intermittent seepage, ponds, natural sinks and drainageways having short periods of spring or storm runoff.

***(6) For purposes of this section:**

(a) "Residential unit" means a home, apartment, residential condominium unit or mobile home, serving as the principal place of residence.

(b) "Camping unit" means an area intended and used for:

(i) Overnight camping or picnicking by the public containing at least a fireplace, picnic table and access to water and sanitary facilities; or

(ii) A permanent home or condominium unit or mobile home not qualifying as a "residential unit" because of part time occupancy.

(c) "Resident game fish" means game fish as described in the Washington game code that spend their life cycle in fresh water. Steelhead, searun cutthroat and Dolly Varden trout are anadromous game fish and should not be confused with resident game fish.

(d) "Public accommodation facility" means a business establishment open to and licensed to serve the public, such as a restaurant, tavern, motel or hotel.

(e) "Natural waters" only excludes water conveyance systems which are artificially constructed and actively maintained for irrigation.

(f) "Seasonal low flow" and "seasonal low water" mean the conditions of the 7-day, 2-year low water situation, as measured or estimated by accepted hydrologic techniques recognized by the department.

(g) "Channel width and gradient" means a measurement over a representative section of at least 500 linear feet with at least 10 evenly spaced measurement points along the

normal stream channel but excluding unusually wide areas of negligible gradient such as marshy or swampy areas, beaver ponds and impoundments. Channel gradient may be determined utilizing stream profiles plotted from United States geological survey topographic maps.

(h) "Intermittent streams" means those segments of streams that normally go dry.

AMENDATORY SECTION (Amending WSR 92-15-011, filed 7/2/92, effective 8/2/92)

WAC 222-16-035 Wetland typing system. *The department in cooperation with the departments of fisheries, wildlife, and ecology, and affected Indian tribes shall classify wetlands. The wetlands will be classified in order to distinguish those which require wetland management zones and those which do not. Wetlands which require wetland management zones shall be identified using the following criteria. Accurate delineation of wetlands in accordance with the manual shall be required only where necessary to determine whether replacement by substitution or enhancement is required pursuant to WAC 222-24-025(10) and shall be limited to the area of wetland proposed to be filled. For the purposes of determining acreage to classify or type wetlands under this section, approximate determination using aerial photographs and maps, including the national wetlands inventory, shall be sufficient. In addition, the innermost boundary of the wetland management zone on Type A or B wetlands may be determined by either of two methods: Delineation of the wetland edge, or identifying the point where the crown cover changes from less than 30% to 30% or more. Except where necessary to determine whether replacement by substitution or enhancement is required pursuant to WAC 222-24-025(10), accurate delineation shall not be required under this Title 222 WAC for activities regulated by these rules, including but not limited to the location of roads, landings, culverts, and cross drains. Landowners are encouraged to leave vegetation in these forested wetlands in undisturbed leave areas where possible. When so requested by any affected landowners, applicant or aggrieved person, the department shall make available informal conferences, which shall include the departments of fisheries, wildlife, and ecology, and affected Indian tribes and those contesting the adopted wetland types. These conferences shall be established under procedures established in WAC 222-46-020.

*(1) "**Nonforested wetlands**" means any wetland or portion thereof that has, or if the trees were mature would have, a crown closure of less than 30 percent.

(a) "**Type A Wetland**" classification shall be applied to all nonforested wetlands which:

(i) Are greater than 0.5 acre in size, including any acreage of open water where the water is completely surrounded by the wetland; and

(ii) Are associated with at least 0.5 acre of ponded or standing open water. The open water must be present on the site for at least 7 consecutive days between April 1 and October 1 to be considered for the purposes of these rules; or

(iii) Are bogs and fens greater than 0.25 acre.

(b) "**Type B Wetland**" classification shall be applied to all other nonforested wetlands greater than 0.25 acre.

*(2) "**Forested wetland**" means any wetland or portion thereof that has, or if the trees were mature would have, a crown closure of 30 percent or more.

AMENDATORY SECTION (Amending WSR 91-23-052, filed 11/15/91, effective 12/16/91)

WAC 222-16-060 Lands with a likelihood of future conversion. (1) Prior to identification of any forest lands as having a likelihood of future conversion to urban development within a ten-year period, the department shall consider all available information, including but not limited to:

(a) Whether the land is assessed under the provisions of chapter ((84-28,)) 84.33(7) or 84.34 RCW;

(b) Whether the land is excluded from any local improvement district;

(c) Whether the classification of the land in the local comprehensive plan or the local zoning ordinance permits or encourages long-term timber production;

(d) Whether the land lies outside the current or proposed boundary of a city or the urban growth boundary of a city or outside a water or sewer district;

(e) Whether the land has received previous development permit approval;

(f) The presence or absence of a written forest management plan for the land.

Any identification must be consistent with any local or regional land use plans or ordinances.

(2) A local government entity with jurisdiction or an affected Indian tribe may submit to the department a proposal for identification of forest lands that have the likelihood of future conversion to urban development within a ten-year period.

(3) The department may develop a public participation process when identifying forest lands with a likelihood of future conversion to urban development within a ten-year period.

(4) Forest lands that have been identified by the department prior to the effective date of this section as having a likelihood of future conversion to urban development within a ten-year period shall be reviewed under subsection (1) of this section to determine if the identification should be withdrawn or modified.

(5) A landowner that submits an application or notification in an area that has been identified as having a likelihood of future conversion to urban development within a ten-year period may request the department to reconsider the identification of the affected parcel. The department shall remove the identification if the landowner complies with (a) of this subsection and at least one from (b) or (c) of this subsection:

(a) The landowner submits a statement of intent not to convert to a use other than commercial timber operation for a period of ten years after completion of the forest practice. The statement shall be on a form prepared by the department and shall indicate the landowner is aware of the provisions of RCW 76.09.060 (3)(b); and

(b) The land is enrolled under the provisions of chapter 84.28, 84.33, or 84.34 RCW; or

(c) A written forest management plan for the land covering the next ten years has been reviewed and accepted by the department.

AMENDATORY SECTION (Amending WSR 92-15-011, filed 7/2/92, effective 8/2/92)

WAC 222-22-010 Policy. *(1) Public resources may be adversely affected by the interaction of two or more forest practices. The purpose of this rule is to address these cumulative effects of forest practices on the public resources of fish, water, and capital improvements of the state or its political subdivisions. The long-term objective of this rule is to protect and restore these public resources and the productive capacity of fish habitat adversely affected by forest practices while maintaining a viable forest products industry. The board intends that this be accomplished through prescriptions designed to protect and allow the recovery of fish, water, and capital improvements of the state or its political subdivisions, through enforcement against noncompliance of the forest practice rules in this Title 222 WAC, and through voluntary mitigation measures. This system also allows for monitoring, subsequent watershed analysis, and adaptive management.

*(2) Adaptive management in a watershed analysis process requires advances in technology and cooperation among resource managers. The board finds that it is appropriate to promulgate rules to address certain cumulative effects by means of the watershed analysis system, while recognizing the pioneering nature of this system and the need to monitor its success in predicting and preventing adverse change to fish, water, and capital improvements of the state and its political subdivisions.

*(3) Many factors other than forest practices can have a significant effect on the condition of fish, water, and capital improvements of the state or its political subdivisions. Nonforest practice contributions to cumulative effects should be addressed by the appropriate jurisdictional authorities. When a watershed analysis identifies a potential adverse effect on fish, water, and capital improvements of the state or its political subdivisions from activities that are not regulated under chapter 76.09 RCW, the department should notify any governmental agency or Indian tribe having jurisdiction over those activities.

*(4) The rules in this chapter set forth a system for identifying the probability of change and the likelihood of this change adversely affecting specific characteristics of fish, water, and capital improvements of the state or its political subdivisions, and for using forest management prescriptions to avoid or minimize significant adverse effects from forest practices. The rules in this chapter are in addition to, and do not take the place of, the other forest practices rules in this Title 222 WAC.

*(5) These rules are intended to be applied and should be construed in such a manner as to minimize the delay associated with the review of individual forest practice applications and notifications by increasing the predictability of the process and the appropriate management response.

AMENDATORY SECTION (Amending WSR 92-15-011, filed 7/2/92, effective 8/2/92)**WAC 222-22-020 Watershed administrative units.**

*(1) For purposes of this chapter, the state is divided into areas known as watershed administrative units (WAUs). The department shall, in cooperation with the departments of ecology, fisheries, and wildlife, federally recognized Indian

tribes, local government entities, forest land owners, and the public, define WAUs throughout the state. The department shall identify WAUs on a map.

*(2) WAUs should generally be between 10,000 to 50,000 acres in size and should be discrete hydrologic units. The board recognizes, however, that identified watershed processes and potential effects on resource characteristics differ, and require different spatial scales of analysis, and the department's determination of the WAUs should recognize these differences. The board further recognizes that mixed land uses will affect the ability of a watershed analysis to predict probabilities and identify causation as required under this chapter, and the department's conduct and approval of a watershed analysis under this chapter shall take this effect into account.

*(3) The department is directed to conduct periodic reviews of the WAUs adopted under this chapter to determine whether revisions are needed to more efficiently assess potential cumulative effects. The department shall consult the departments of ecology, fisheries, and wildlife, affected Indian tribes, forest land owners, local government entities, and the public. From time to time and as appropriate, the department shall make recommendations to the board regarding revision of watershed administrative units.

AMENDATORY SECTION (Amending WSR 92-15-011, filed 7/2/92, effective 8/2/92)**WAC 222-22-030 Qualification of watershed resource analysts, specialists, and field managers.**

*(1) The department shall set the minimum qualifications for analysts participating in level 1 assessments conducted under WAC 222-22-050, for specialists participating in level 2 assessments conducted under WAC 222-22-060, and for field managers participating in recommendation of prescriptions under WAC 222-22-070. The minimum qualifications shall be specific for the disciplines needed to participate in level 1 and level 2 assessments and in the recommendations of prescriptions, and shall include, at a minimum, formal education in the relevant discipline and field experience. Minimum qualifications for analysts participating in level 2 assessments should typically include a graduate degree in the relevant discipline.

*(2) The department shall coordinate with relevant state and federal agencies, affected Indian tribes, forest land owners, local government entities, and the public to seek and utilize available qualified expertise to participate in watershed analysis.

*(3) Qualified analysts, specialists, and field managers shall, while and only for the purpose of conducting a watershed analysis or monitoring in a WAU, be duly authorized representatives of the department for the purposes of RCW 76.09.150.

*(4) An individual may qualify in more than one science or management skill. Qualification under subsection (1) of this section shall be effective for 5 years. When a qualification expires, a person requesting requalification shall meet the criteria in effect at the time of requalification.

*(5) The department shall provide and coordinate training for, maintain a register of, and monitor the performance of qualified analysts, specialists, and field managers by region. The department shall disqualify analysts, special-

ists, and field managers who fail to meet the levels of performance required by the qualification standards.

AMENDATORY SECTION (Amending WSR 92-15-011, filed 7/2/92, effective 8/2/92)

WAC 222-22-040 Watershed prioritization. *(1) The department shall determine, by region, the order in which it will analyze WAUs. The department shall cooperate with the departments of ecology, wildlife, and fisheries, affected Indian tribes, forest land owners, and the public in setting priorities. In setting priorities or reprioritizing WAUs, the department shall consider the availability of participation and assistance that may be provided by affected Indian tribes and local government entities.

*(2) Except as set forth in subsection (3) of this section, the department shall undertake a watershed analysis on each WAU, in the order established under subsection (1) of this section.

*(3) The owner or owners of ten percent or more of the nonfederal forest land acreage in a WAU may notify the department in writing that the owner or owners intend to conduct a level 1 assessment, level 2 assessment, or both, and the prescription recommendation process on the WAU under this chapter at their own expense. The notice shall identify the teams proposed to conduct the watershed analysis, which shall be comprised of individuals qualified by the department pursuant to WAC 222-22-030. The department shall promptly notify any owner or owners sending notice under this subsection if any member of the designated teams is not so qualified. Within 30 days of delivering a notice to the department under this subsection, the forest land owner or owners shall begin the level 1 assessment under WAC 222-22-050 or, at its option, the level 2 assessment under WAC 222-22-060. An approved forest land owner team shall, while and only for the purposes of conducting a watershed analysis in a WAU, be a duly authorized representative of the department for the purposes of RCW 76.09.150. The board encourages forest land owners conducting assessments under this chapter to include available, qualified expertise from state and federal agencies, affected Indian tribes, forest land owners, local government entities, and the public.

*(4) Before beginning an analysis in a WAU, the department or the forest land owner conducting the analysis shall provide reasonable notice, including notice by regular United States mail where names and addresses have been provided to the department, to all forest land owners in the WAU, and to affected Indian tribes. The department or the forest land owner shall provide reasonable notice to the public and to state, federal, and local government entities, by, among other things, posting the notice conspicuously in the office of the departmental region containing the WAU. The notice shall be in a form designated by the department and give notice that an analysis is being conducted, by whose team, the time period of the analysis, and the dates and locations in which the draft analysis will be available for review and comment.

AMENDATORY SECTION (Amending WSR 92-15-011, filed 7/2/92, effective 8/2/92)

WAC 222-22-050 Level 1 watershed resource assessment. *(1) To begin a watershed resource analysis on a WAU, the department shall assemble a level 1 assessment team consisting of analysts qualified under WAC 222-22-030(1). A forest land owner or owners acting under WAC 222-22-040(3) may assemble a level 1 assessment team consisting of analysts qualified under WAC 222-22-030(1) or, at its option, may begin the analysis under WAC 222-22-060. Each level 1 team shall include persons qualified in the disciplines indicated as necessary in the methodology, and should generally include persons qualified in:

- (a) Forestry;
- (b) Forest hydrology;
- (c) Forest soil science or geology;
- (d) Fisheries science; and
- (e) Geomorphology.

Any owner, and any cooperating group of owners, of ten percent or more of the nonfederal forest land acreage in the WAU and any affected Indian tribe shall be entitled to include one qualified individual to participate on the team at its own expense.

*(2) The level 1 team shall perform an inventory of the WAU utilizing the methodology, indices of resource condition, and checklists set forth in the manual in accordance with the following:

(a) The team shall survey the WAU for fish, water, and capital improvements of the state or its political subdivisions and shall display their location on a map of the WAU. The team shall determine the current condition of the resource characteristics of these resources, shall classify their condition as "good," "fair," or "poor," and shall display this information on the map of the WAU. The criteria used to determine current resource conditions shall include indices of resource condition, in addition to such other criteria as may be included in the manual. The indices will include two levels, which will distinguish between good, fair, and poor conditions.

(b) The team shall assess the likelihood that identified watershed processes in a given physical location will be adversely changed by one forest practice or by cumulative effects and that, as a result, a material amount of water, wood, sediment, or energy (e.g., affecting temperature) will be delivered to fish, water, or capital improvements of the state or its political subdivisions. (This process is referred to in this chapter as "adverse change and deliverability.") (For example, the team will address the likelihood that road construction will result in mass wasting and a slide that will in turn reach a stream.) The team shall rate this likelihood of adverse change and deliverability as "high," "medium," "low," or "indeterminate." Those likelihoods rated high, medium, or indeterminate shall be displayed on the map of the WAU.

(c) For each instance of high, medium, or indeterminate likelihood of adverse change and deliverability identified under (b) of this subsection, the team shall assess the vulnerability of potentially affected resource characteristics. Criteria for resource vulnerability shall include indices of resource condition as described in (a) of this subsection and quantitative means to assess the likelihood of material

adverse effects to resource characteristics caused by forest practices. (For example, the team will assess the potential damage that increased sediment caused by a slide reaching a stream will cause to salmon spawning habitat that is already in fair or poor condition.) The team shall rate this vulnerability "high," "medium," "low," or "indeterminate" and shall display those vulnerabilities on the map of the WAU. If there are no other criteria in the manual to assess vulnerability at the time of the assessment, current resource condition shall be used, with good condition equivalent to low vulnerability, fair condition equivalent to medium vulnerability, and poor condition equivalent to high vulnerability.

(d) The team shall identify as areas of resource sensitivity, as provided in table 1 of this section, the locations in which a management response is required under WAC 222-22-070(3) because, as a result of one forest practice or of cumulative effects, there is a combination of a high, medium, or indeterminate likelihood of adverse change and deliverability under (b) of this subsection and a low, medium, high, or indeterminate vulnerability of resource characteristics under (c) of this subsection:

Table 1
AREAS OF RESOURCE SENSITIVITY AND MANAGEMENT RESPONSE
Likelihood of Adverse Change and Deliverability

| | Low | Medium | High |
|--------|----------------|----------------------------|----------------------------|
| Low | Standard rules | Standard rules | Response: Prevent or avoid |
| Medium | Standard rules | Response: Minimize | Response: Prevent or avoid |
| High | Standard rules | Response: Prevent or avoid | Response: Prevent or avoid |

The team shall display the areas of resource sensitivity on the map of the WAU.

(e) The decision criteria used to determine low, medium, and high likelihood of adverse change and deliverability shall be as set forth in the manual. A low designation generally means there is minimal likelihood that there will be adverse change and deliverability. A medium designation generally means there is a significant likelihood that there will be adverse change and deliverability. A high designation generally means that adverse change and deliverability is more likely than not with a reasonable degree of confidence. Any areas identified as indeterminate in the level 1 assessment shall be classified for the purposes of the level 1 assessment as medium until a level 2 assessment is done on the WAU under WAC 222-22-060, during which the uncertainties shall be resolved.

(f) The team shall prepare a causal mechanism report regarding the relationships of each process identified in (b) and (c) of this subsection. The report shall demonstrate that the team's determinations were made in accordance with the manual. If, in the course of conducting a level 1 assessment, the team identifies areas in which voluntary corrective action will significantly reduce the likelihood of material, adverse effects to the condition of a resource characteristic, the team shall include this information in the report, and the department shall convey this information to the applicable land owner.

*(3) Within 21 days of mailing notice under WAC 222-22-040(4), the level 1 team shall submit to the department its draft level 1 assessment, which shall consist of the map of the WAU marked as set forth in this section and the causal mechanism report proposed under subsection (2)(f) of this section. If the level 1 team is unable to agree as to one or more resource sensitivities or potential resource sensitivities, or the causal mechanism report, alternative designations and an explanation therefor shall be included in the draft assessment. Where the draft level 1 assessment delivered to the department contains alternative designations, the department shall within 21 days of the receipt of the draft level 1 assessment make its best determination and approve that option which it concludes most accurately reflects the proper application of the methodologies, indices of resource condition, and checklists set forth in the manual.

*(4) If the level 1 assessment contains any areas in which the likelihood of adverse change and deliverability or resource vulnerability are identified as indeterminate under this section or if the level 1 methodology recommends it, the department shall assemble a level 2 assessment team under WAC 222-22-060 to resolve the uncertainties in the assessment, unless a forest land owner acting under WAC 222-22-040(3) has conducted a level 2 assessment on the WAU.

*(5) Pending the completion of the level 2 assessment, if any, on the WAU, the department shall select interim prescriptions using the process and standards described in WAC 222-22-070 (1), (2), and (3) and 222-22-080(3) and shall apply them to applications and notifications as provided in WAC 222-22-090 (1) and (2). Before submitting recommended interim prescriptions to the department, the field managers' team under WAC 222-22-070(1) shall review the recommended prescriptions with available representatives of the jurisdictional management authorities of the fish, water, and capital improvements of the state or its political subdivisions in the WAU, including, but not limited to, the departments of fisheries, ecology, and affected Indian tribes.

AMENDATORY SECTION (Amending WSR 92-15-011, filed 7/2/92, effective 8/2/92)

WAC 222-22-060 Level 2 watershed resource assessment. *(1) The department, or forest land owner acting under WAC 222-22-040(3), may assemble a level 2 assessment team either, in the case of a forest land owner, to begin a watershed analysis or to review the level 1 assessment on a WAU. The level 2 team shall consist of specialists qualified under WAC 222-22-030(1). Each level 2 team shall include persons qualified in the disciplines indicated as necessary in the methodology, and should generally include persons qualified in:

- (a) Forestry;
- (b) Forest hydrology;
- (c) Forest soil science or geology;
- (d) Fisheries science; and
- (e) Geomorphology.

Any owner, and any cooperating group of owners, of ten percent or more of the nonfederal forest land acreage in the WAU and any affected Indian tribe shall be entitled to designate one qualified member of the team at its own expense.

*(2) The level 2 team shall perform an assessment of the WAU utilizing the methodology, indices of resource condition, and checklist set forth in the manual in accordance with the following:

(a) If a level 1 assessment has not been conducted under WAC 222-22-050, the assessment team shall complete the tasks required under WAC 222-22-050(2), except that the level 2 team shall not rate any likelihood of adverse change and deliverability or resource vulnerability as indeterminate.

(b) If the level 2 team has been assembled to review a level 1 assessment, the level 2 team shall, notwithstanding its optional review of all or part of the level 1 assessment, review each likelihood of adverse change and deliverability and resource vulnerability rated as indeterminate and shall revise each indeterminate rating to low, medium, or high and shall revise the map of the WAU accordingly.

*(3) Within 60 days of mailing notice under WAC 222-22-040(4) where a watershed analysis begins with a level 2 assessment or within 60 days of beginning a level 2 assessment after completion of a level 1 assessment, the level 2 team shall submit to the department its draft level 2 assessment, which shall consist of the map of the WAU and the causal mechanism report.

*(4) The level 2 team shall endeavor to produce a consensus report. If the level 2 team is unable to agree as to one or more areas of resource sensitivity or the causal mechanism report, alternative designations and an explanation therefor shall be included in the draft assessment. Where the draft level 2 assessment delivered to the department contains alternative designations or reports, the department shall within 30 days of the receipt of the draft level 2 assessment make its best determination and approve that option which it concludes most accurately reflects the proper application of the methodologies, indices of resource condition, and checklists set forth in the manual.

AMENDATORY SECTION (Amending WSR 92-15-011, filed 7/2/92, effective 8/2/92)

WAC 222-22-070 Prescription recommendation.

*(1) For each WAU for which a watershed analysis is undertaken, the department, or forest land owner acting under WAC 222-22-040(3), shall assemble a team of field managers qualified under WAC 222-22-030(1). The team shall include persons qualified in the disciplines indicated as necessary in the methodology, and shall generally include persons qualified in:

- (a) Forest resource management;
- (b) Forest harvest and road systems engineering;
- (c) Forest hydrology; and
- (d) Fisheries science or management.

Any owner, and any cooperating group of owners, of ten percent or more of the nonfederal forest land acreage in the WAU and any affected Indian tribe shall be entitled to include one qualified individual to participate on the team at its own expense.

*(2) Each forest land owner in a WAU shall have the right to submit to the department or the forest land owner conducting the watershed analysis prescriptions for areas of resource sensitivity on its land. If these prescriptions are received within the time period described in subsection (4)

of this section, they shall be considered for inclusion in the watershed analysis.

*(3) For each identified area of resource sensitivity, the field managers' team shall, in consultation with the level 1 and level 2 teams, if any, select and recommend to the department prescriptions. These prescriptions shall be reasonably designed to minimize, or to prevent or avoid, as set forth in table 1 in WAC 222-22-050 (2)(d), the likelihood of adverse change and deliverability that has the potential to cause a material, adverse effect to resource characteristics in accordance with the following:

(a) The prescriptions shall be designed to provide forest land owners and operators with as much flexibility as is reasonably possible while addressing the area of resource sensitivity. The prescriptions should, where appropriate, include, but not be limited to, plans for road abandonment, orphaned roads, and road maintenance and plans for applying prescriptions to recognized land features identified in the WAU as areas of resource sensitivity but not fully mapped;

(b) Each set of prescriptions shall provide for an option for an alternate plan under WAC 222-12-040, which the applicant shows meets or exceeds the protection provided by the other prescriptions approved for a given area of resource sensitivity; and

(c) The regulation of forest practices and cumulative effects under this chapter shall not require mitigation for activities or events not regulated under chapter 76.09 RCW. Any hazardous condition subject to forest practices identified in a watershed analysis requiring corrective action shall be referred to the department for consideration under RCW 76.09.300 et seq.

*(4) The field managers' team shall submit the recommended prescriptions to the department within 30 days of the submission to the department of the level 2 assessment under WAC 222-22-060 or within 21 days of the submission to the department of the level 1 assessment under WAC 222-22-050.

AMENDATORY SECTION (Amending WSR 92-15-011, filed 7/2/92, effective 8/2/92)

WAC 222-22-080 Approval of watershed analysis.

*(1) Upon receipt of the recommended prescriptions resulting from a level 2 assessment under WAC 222-22-060 or a level 1 assessment under WAC 222-22-050 where a level 2 assessment will not be conducted, the department shall select prescriptions. The department shall circulate the draft watershed analysis to the departments of ecology, fisheries, and wildlife, affected Indian tribes, local government entities, forest land owners in the WAU, and the public for review and comment. The prescriptions recommended by the field managers' team shall be given substantial weight. Within thirty days of receipt of the prescriptions, the department shall review comments, revise the watershed analysis as appropriate, and approve or disapprove the watershed analysis for the WAU.

*(2) The department should notify any governmental agency or Indian tribe having jurisdiction over activities which are not regulated under chapter 76.09 RCW but which are identified in the draft analysis as having a potential for an adverse impact on identified fish, water, and capital improvements of the state or its political subdivisions.

*(3) The department shall approve the draft watershed analysis unless it finds:

(a) For any level 1 assessment or level 2 assessment, that:

(i) The team failed in a material respect to apply the methodology, indices of resource condition, or checklists set forth in the manual; or

(ii) A team meeting the criteria promulgated by the department and using the defined methodologies, indices of resource conditions, and checklists set forth in the manual could not reasonably have come to the conclusions identified in the draft level 1 or level 2 assessment; and

(b) For the prescriptions, that they will not accomplish the purposes and policies of this chapter and of the Forest Practices Act, chapter 76.09 RCW.

(c) In making its findings under this subsection, the department shall take into account its ability to revise assessments under WAC 222-22-090(3).

*(4) If the department does not approve the draft watershed analysis, it shall set forth in writing a detailed explanation of the reasons for its disapproval.

AMENDATORY SECTION (Amending WSR 92-15-011, filed 7/2/92, effective 8/2/92)

WAC 222-22-090 Use and review of watershed analysis. *(1) Where a watershed analysis has been completed for a WAU under this chapter:

(a) Forest practices applications and notifications submitted to the department shall indicate whether an area of resource sensitivity will be affected and, if so, which prescription the operator, timber owner, or forest land owner shall use in conducting the forest practice in the area of resource sensitivity;

(b) The department shall assist operators, timber owners, and forest land owners in obtaining governmental permits required for the prescription (see WAC 222-50-020 and 222-50-030);

(c) The department shall confirm that the prescription selected under (a) of this subsection was one of the prescriptions approved for the area of resource sensitivity under WAC 222-22-080 and shall require the use of the prescription; and

(d) The department shall not further condition forest practice applications and notifications in an area of resource sensitivity in a WAU where the applicant will use a prescription contained in the watershed analysis nor shall the department further condition forest practice applications and notifications outside an area of resource sensitivity in a WAU, except for reasons other than the watershed processes and fish, water, and capital improvements of the state or its political subdivisions analyzed in the watershed analysis in the WAU, and except to correct mapping errors, misidentification of soils, landforms, vegetation, or stream features, or other similar factual errors.

*(2) Pending completion of a watershed analysis for a WAU, the department shall process forest practices notifications and applications in accordance with the other chapters of this title, except that applications and notifications received for forest practices on a WAU after the date notice is mailed under WAC 222-22-040(4) commencing a watershed analysis on the WAU shall be conditioned to

require compliance with interim, draft, and final prescriptions, as available. Processing and approval of applications and notifications shall not be delayed by reason of review, approval, or appeal of a watershed analysis.

*(3) The board encourages cooperative and voluntary monitoring. Evaluation of resource conditions may be conducted by qualified specialists, analysts, and field managers as determined under WAC 222-22-030. Subsequent watershed analysis and management strategies in response to areas where recovery is not occurring shall be conducted in accordance with this chapter.

*(4) Where the condition of resource characteristics in a WAU are fair or poor, the department shall evaluate the effectiveness of the prescriptions applied under this chapter to the WAU in providing for the protection and recovery of the resource characteristic. If the department finds that the prescriptions are not providing for such protection and recovery over a period of 3 years, the department shall repeat the watershed analysis in the WAU. Aside from the foregoing, once a watershed analysis is completed on a WAU, it shall be revised in whole or in part upon the earliest of the following to occur:

(a) Five years after the date the watershed analysis is final, if necessary;

(b) The occurrence of a natural disaster having a material adverse effect on the resource characteristics of the WAU;

(c) Deterioration in the condition of a resource characteristic in the WAU measured over a 12-month period or no improvement in a resource characteristic in fair or poor condition in the WAU measured over a 12-month period unless the department determines, in cooperation with the departments of ecology, wildlife, and fisheries, affected Indian tribes, forest land owners, and the public, that a longer period is reasonably necessary to allow the prescriptions selected to produce improvement; or

(d) The request of an owner of forest land in the WAU which wishes to conduct a watershed analysis at its own expense.

Revision of an approved watershed analysis shall be conducted in accordance with the processes, methods, and standards set forth in this chapter, except that the revised watershed analysis shall be conducted only on the areas affected in the case of revisions under (b) or (c) of this subsection, and may be conducted on areas smaller than the entire WAU in the case of revisions under (a) and (d) of this subsection. The areas on which the watershed analysis revision is to be conducted shall be determined by the department and clearly delineated on a map before beginning the assessment revision. Forest practices shall be conditioned under the current watershed analysis pending the completion of any revisions.

AMENDATORY SECTION (Amending WSR 92-15-011, filed 7/2/92, effective 8/2/92)

WAC 222-22-100 Application review prior to watershed analysis. *(1) The watershed analysis system established in this chapter is a principal methodology for assessing the effects on fish, water, and capital improvements of the state or its political subdivisions of two or more forest practices. Recognizing that it will not be possible to

achieve state-wide implementation of the analysis process for all WAUs for some time, the board hereby establishes certain interim regulatory measures pending watershed analysis on a given WAU. These measures are designed to ensure use of the best available analysis techniques and existing authorities to protect fish, water, and capital improvements of the state or its political subdivisions.

*(1) The department shall continue to use its implementation and enforcement authority to prevent damage to fish, water, and capital improvements of the state or its political subdivisions. See chapter 222-46 WAC.

(a) The department shall continue to concentrate and exercise its authority in implementing the use of existing road construction, maintenance, and abandonment rules where there is evidence of road-related damage to fish, water, and capital improvements of the state or its political subdivisions. The applicable road construction and maintenance rules can be found in chapter 222-24 WAC.

(b) The department shall report to the board each quarter the results of its road construction, maintenance, and abandonment enforcement program. No later than October 31 of each year, the board shall report on results and recommendations for regulatory change as needed to protect fish, water, and capital improvements of the state or its political subdivisions.

*(2) The department shall condition the size of clearcut harvest applications in the significant rain-on-snow zone where the department determines, using local evidence, that peak flows have resulted in material damages to public resources. The department may prepare conditioning guidelines to assess and condition applications located in a significant rain-on-snow zone.

(a) Each year not later than August 31, the department shall provide a summary report of actions taken under rain-on-snow conditioning or conditioning guidelines to the appropriate board committee.

(b) Such conditioning authority shall expire upon completion of watershed analysis in a WAU.

(c) Nothing in this section shall require a watershed analysis to develop harvest size recommendations.

AMENDATORY SECTION (Amending WSR 92-15-011, filed 7/2/92, effective 8/2/92)

WAC 222-24-010 Policy((#)). *(1) A well designed, located, constructed, and maintained system of forest roads is essential to forest management and protection of the public resources. Riparian areas contain some of the more productive conditions for growing timber, are heavily used by wildlife and provide essential habitat for fish and wildlife and essential functions in the protection of water quality. Wetland areas serve several significant functions in addition to timber production: Providing fish and wildlife habitat, protecting water quality, moderating and preserving water quantity. Wetlands may also contain unique or rare ecological systems.

*(2) All road and landing construction within wetlands shall be conducted so that choices are made in the following descending order of preference:

(a) Avoid impacts by selecting the least environmentally damaging landing location, road location and road length; or

(b) Minimize impacts by such things as reducing the subgrade width, fill acreage and spoil areas; or

(c) Restore affected areas by removing temporary fills or road sections upon the completion of the project; or

(d) Reduce or eliminate impacts over time by preserving or maintaining areas; or

(e) Replace affected areas by creating new wetlands or enhancing existing wetlands.

*(3) An accurate delineation of wetland boundaries shall not be required under this section except where necessary to determine acreage of road or landing construction which fills or drains more than 0.5 acre of a wetland. Landowners are encouraged to voluntarily increase wetland acreage and functions over the long-term.

*(4) Extra protection is required during road construction and maintenance to protect these resources and timber growing potential. Landowners and fisheries and wildlife managers are encouraged to cooperate to develop road management and abandonment plans. Landowners are further encouraged to cooperate in sharing roads to minimize road mileage and avoid duplicative road construction.

*(5) This section covers the location, design, construction, maintenance and abandonment of forest roads, bridges, stream crossings, quarries, borrow pits, and disposal sites used for forest road construction and is intended to assist landowners in proper road planning, construction and maintenance so as to protect public resources.

(Note: Other laws and regulations and/or permit requirements may apply. See chapter 222-50 WAC.)

AMENDATORY SECTION (Amending WSR 92-15-011, filed 7/2/92, effective 8/2/92)

WAC 222-24-025 Road design. (1) Use the minimum design standard that produces a road sufficient to carry the anticipated traffic load with reasonable safety.

*(2) **Subgrade width** should average not more than 32 feet for double lane roads and 20 feet for single lane roads, exclusive of ditches, plus any additional width necessary for safe operations on curves and turnouts. Where road location in wetlands is unavoidable (see WAC 222-24-010(2)), minimize subgrade width.

(3) **Balance excavation** and embankments so that as much of the excavated material as is practical will be deposited in the roadway fill sections. Where full bench construction is necessary, design suitable embankments so that the excavated material may be end hauled to appropriate deposit areas.

(4) **Design or construct** cut and fill slopes to the normal angle of repose for the materials involved, or at a lesser angle whenever practical.

*(5) **All roads** should be outloped or ditched on the uphill side and appropriate surface drainage shall be provided by the use of adequate cross drains, ditches, drivable dips, relief culverts, water bars, diversion ditches, or other such structures demonstrated to be equally effective.

*(6) **Cross drains**, relief culverts, and diversion ditches shall not discharge onto erodible soils, or over fill slopes unless adequate outfall protection is provided.

*(7) **Install** cross drains, culverts, water bars, drivable dips, or diversion ditches on all forest roads to minimize erosion of the road bed, cut bank, and fill slope, or to reduce

sedimentation of Type 1, 2, 3 or 4 Water. Cross drains are required in wetlands to provide for continued hydrologic connectivity. These drainage structures shall be installed at all natural drainages, all low points in the road gradient and spaced no wider than as follows:

| Grade | Distance Westside | Distance Eastside |
|-----------|----------------------|----------------------|
| 0 to 7% | 1,000 ft. | 1,500 ft. |
| 8% to 15% | 800 ft. | 1,000 ft. |
| over 15% | 600 ft. | 800 ft. |

More frequent culvert spacing or other drainage improvements are required where site specific evidence of peak flows or soil instability makes additional culverts necessary to minimize erosion of the road bed, ditches, cut bank, and fill slope to reduce sedimentation of Type 1, 2, 3 or 4 Waters, or within wetlands or to avoid unreasonable risk to public resources. See ((~~Part 5, Table 2 in the forest practices board manual for~~)) "Additional culvert spacing recommendations(-)" in the forest practices board manual. On request of the applicant, the department may approve less frequent drainage spacing where parent material (e.g. rock, gravel) or topography justify.

*** (8) Relief culverts** installed on forest roads shall meet the following minimum specifications:

(a) Be at least 18 inches in diameter or equivalent in western Washington and 15 inches in diameter or equivalent in eastern Washington.

(b) Be installed sloping toward the outside edge of the road at a minimum gradient of 3 percent.

*** (9) Ditch diversion.** Where roadside ditches slope toward a Type 1, 2, 3 Water, or Type A or B Wetland for more than 300 feet and otherwise would discharge into the stream or wetland, divert the ditchwater onto the forest floor by relief culvert or other means at the first practical point.

*** (10) Filling or draining** more than 0.5 acre of a wetland requires replacement by substitution or enhancement of the lost wetland functions and, for creation of new wetlands, area. See the Board Manual. Where creation of new wetlands is proposed, the objective of successful replacement by substitution of lost wetland area shall be on an acre for acre basis and of the same type and in the same general location. Where replacement by enhancement of wetlands is proposed, the objective shall be to provide for an equivalent amount of function to replace that which is lost.

AMENDATORY SECTION (Amending WSR 92-23-056, filed 11/17/92, effective 12/18/92)

WAC 222-24-040 Water crossing structures. *** (1) Bridge construction.**

(a) Bridges are required for new crossings of any Type 1 or 2 Waters regularly used for recreational boating.

(b) Permanent bridges shall not constrict clearly defined channels and shall be designed to pass the 50-year flood level or the road shall be constructed to provide erosion protection from the 50-year flood waters which exceed the water-carrying capacity of the drainage structure.

(c) One end of each new permanent log or wood bridge shall be tied or firmly anchored if any of the bridge structure is within 10 vertical feet of the 50-year flood level.

(d) Excavation for bridges, placement of sills or abutments, and the placement of stringers or girders shall be accomplished from outside the ordinary high-water mark of all waters, except when such operations are authorized by a hydraulic project approval.

(e) Earth embankments constructed for use as bridge approaches shall be protected from erosion by high water. Some examples of protection are: Planted or seeded ground cover, bulkheads, rock riprap, or retaining walls.

(f) When earthen materials are used for bridge surfacing, curbs of sufficient size shall be installed to be above the surface material and prevent such surface material from falling into the stream bed.

*** (2) Culvert installation:** All permanent culverts installed in forest roads shall be of a size that is adequate to carry the 50-year flood or the road shall be constructed to provide erosion protection from the 50-year flood waters which exceed the water-carrying capacity of the drainage structure. Refer to ((~~Part 5~~)) "Recommended culvert sizes" in the forest practices board manual for the size of permanent culverts recommended for use in forest roads. If the department determines that because of unstable slopes the culvert size shown on that table is inadequate to protect public resources, it may require culvert sizes in accordance with the nomograph (chart) contained in ((~~Part 5 of~~)) the forest practices board manual or with other generally accepted engineering principles.

(a) No permanent culverts shall be installed that are smaller than:

(i) 24 inches in diameter or the equivalent for anadromous fish streams or wetlands where anadromous fish are present.

(ii) 18 inches or the equivalent for resident game fish streams.

(iii) 18 inches or the equivalent for all other water or wetland crossings in western Washington.

(iv) 15 inches or the equivalent for all other water or wetland crossings in eastern Washington.

(b) The alignment and slope of the culvert shall parallel the natural flow of the stream whenever possible.

(c) When fish life is present, construct the bottom of the culvert at or below the natural stream bed at the inlet and outlet.

(d) Terminate culverts on materials that will not readily erode, such as riprap, the original stream bed (if stable), or other suitable materials.

(e) If water is diverted from its natural channel, return this water to its natural stream bed via culvert, flume, spillway, or the equivalent.

(f) When flumes, downspouts, downfall culverts, etc., are used to protect fill slopes or to return water to its natural courses, the discharge point shall be protected from erosion by: (i) Reducing the velocity of the water, (ii) use of rock spillways, (iii) riprap, (iv) splash plates, or (v) other methods or structures demonstrated to be equally effective.

(g) Stream beds shall be cleared for a distance of 50 feet upstream from the culvert inlet of such slash or debris that reasonably may be expected to plug the culvert.

(h) The entrance of all culverts should have adequate catch basins and headwalls to minimize the possibility of erosion or fill failure.

***(3) Culverts in anadromous fish streams.** In addition to the requirements of subsection (2) of this section, in streams used by anadromous fish:

(a) Culverts shall be either open bottomed or have the bottom covered with gravel and installed at least 6 inches below the natural stream bed at the inlet and outlet.

(b) Closed bottom culverts shall not slope more than 1/2 percent; except as provided in (e) of this subsection; open bottom culverts shall not slope more than the natural slope of the stream bed.

(c) Where multiple culverts are used, one culvert shall be at least 6 inches lower than the other(s).

(d) Culverts shall be set to retain normal stream water depth throughout the culvert length. A downstream control may be required to create pooled water back into the culvert and to insure downstream stream bed stability.

(e) Closed bottom culverts, set at existing stream gradients between 1/2 percent and 3 percent slope shall be designed with baffles for water velocity control, or have an approved designed fishway.

(f) The department, after consultation with the departments of fisheries and wildlife, shall impose any necessary limitations on the time of year in which such culverts may be installed to prevent interference with migration or spawning of anadromous fish.

(g) Any of the requirements in (a) through (f) of this subsection may be superseded by a hydraulic project approval.

***(4) Temporary water crossings.**

(a) Temporary bridges and culverts, adequate to carry the highest anticipated flow in lieu of carrying the 50-year flood, may be used:

(i) In the westside region if installed after June 1 and removed by September 30 of the same year.

(ii) In the eastside region if installed after the spring runoff and removed prior to the snow buildup which could feed a heavy runoff.

(iii) At other times, when the department and applicant can agree to specific dates of installation and removal.

(b) Temporary bridges and culverts shall be promptly removed upon completion of use, and the approaches to the crossing shall be water barred and stabilized at the time of the crossing removal.

(c) Temporary wetland crossings shall be abandoned and restored based on a written plan approved by the department prior to construction.

(5) Properly prepared and maintained fords may be used during periods of low water providing a hydraulic permit is acquired.

AMENDATORY SECTION (Amending Order 535, filed 11/16/87, effective 1/1/88)

WAC 222-34-030 Reforestation—Plans—Reports—Inspections. (1) **Reforestation plans.** Reforestation plans must be submitted with the application or notification except where no reforestation is required. The department shall designate difficult regeneration areas utilizing silvicultural information. When a forest practice is proposed for such an area, the department may require additional information regarding harvest systems and post harvest site preparation, as well as regeneration. The department shall approve the

reforestation plan for difficult regeneration areas if it determines that such a plan will achieve acceptable stocking according to WAC 222-34-010 and 222-34-020.

(2) **Reforestation reports.** The landowner, forest landowner, or his/her designee shall file a report with the department either at the time of completion of planting or reforestation or at the end of the normal planting season. When artificial seeding is used the report shall be filed 2 growing seasons after seeding.

(3) **The reports in subsection (2) of this section must contain at least the following:**

(a) The original forest practice application or notification number.

(b) Species reforested, planted, or seeded.

(c) Age of stock planted or seed source zone.

(d) Description of actual area reforested, planted, or seeded.

(4) **Inspection; supplemental planting or reforestation directives.**

(a) Within 12 months after a reforestation report is received, the department shall inspect the reforested lands. The department shall issue written notice to the landowner, forest landowner, or his/her designee stating whether supplemental planting or reforestation or further inspection is required within 30 days after the deadline for inspection or the reforestation shall be deemed satisfactory.

(b) If the inspection shows that acceptable stocking levels have not been achieved, the department shall direct the forest landowner to perform supplemental planting in accordance with the planting standards of WAC 222-34-010 (3) and (4)(a)(ii), 222-34-020 (3) and (4)(a)(ii): *Provided, That:*

(i) In lieu of such supplemental planting, the department and the forest landowner may agree on a supplemental reforestation plan.

(ii) Supplemental planting or reforestation shall not be required where in the opinion of the department planting or reforestation is not feasible due to rocky ground, dry conditions, excessively high water table or other adverse site factors and the department determines that there is little probability of significantly increasing the stocking level.

(iii) Where supplemental planting or reforestation has been required by the department, the landowner, forest landowner, or his/her designee shall file a report of supplemental planting or reforestation upon completion.

(iv) Except where stocking improvement is necessary to protect public resources and is feasible, further supplementary planting shall not be required where acceptable stocking levels have not been achieved after two properly performed supplemental plantings.

(c) Within 12 months after a supplemental planting or reforestation report is received, the department shall inspect the reforested lands.

(d) **Evidence of compliance.** The department shall within 30 days after the deadline for inspection or reinspection and when requested by the forest landowner confirm in writing whether acceptable stocking levels have been achieved, provided field conditions do not prevent the department from properly evaluating the reforestation.

(e) Where a natural regeneration plan has been approved by the department, the department may allow up to 10 years to achieve acceptable stocking levels.

**Chapter 222-46 WAC
CONSULTATION AND ENFORCEMENT**

AMENDATORY SECTION (Amending Order 263, filed 6/16/76)

WAC 222-46-010 Policy—Enforcement. It is the policy of the act and the board to encourage informal, practical, result-oriented resolution of alleged violations and actions needed to prevent damage to public resources. It is also the policy of the act and the board to provide, consistent with the principles of due process, effective procedures for enforcement. It is the policy of the board to use a progressive approach to enforcement, and civil penalties should be one of the least used enforcement mechanisms; such an approach usually begins with consultation and voluntary efforts to achieve compliance while generally reserving civil penalties to more serious infractions. This part of these regulations provides the following enforcement procedures: Informal conferences; notices to comply; stop work orders; corrective actions by the department; civil penalties; injunctions and other civil judicial relief; and criminal penalties. ~~((The enforcement procedure used in any particular case shall be appropriate in view of the nature and extent of the violation or the damage or risk to public resources and the degree of bad faith or good faith of the persons charged.))~~ Civil penalties shall be appropriate to the violation or its potential to damage public resources.

AMENDATORY SECTION (Amending WSR 93-12-001, filed 5/19/93, effective 6/19/93)

WAC 222-46-020 Informal conferences. (1) **Opportunity mandatory.** The department shall afford the operator and/or ~~((his/her))~~ a designated representative reasonable opportunities to discuss proposed enforcement actions at an informal conference prior to taking further enforcement action, unless the department determines that there may be imminent damages to the public resource. Informal conferences may be used at any stage in enforcement proceedings, except that the department may refuse to conduct informal conferences with respect to any matter then pending before the appeals board or a court.

(2) **Reports required.** Department personnel in attendance at informal conferences shall keep written notes of the date and place of the conference, the persons in attendance, the subject matter discussed, and any decisions reached with respect to further enforcement action. Copies of the conference notes shall be forwarded to the landowner and the timber owner.

(3) **Records available.** Copies of written notes shall be sent to each participant in the conference, be kept in the department files until one year after final action on the application involved, and be open to public inspection.

(4) **Local government entity conditions.** If the proposed enforcement actions involve conditions imposed pursuant to WAC 222-20-040(3), then the local government entity shall be involved in the informal conference.

AMENDATORY SECTION (Amending WSR 91-23-052, filed 11/15/91, effective 12/16/91)

WAC 222-46-030 Notice to comply. If a violation, a deviation, material damage or potential for material damage to a public resource has occurred and the department determines that a stop work order is unnecessary, then the department shall issue and serve upon the operator and/or landowner a notice which will clearly set forth:

(1)(a) **The specific** nature, extent, and time of failure to comply with the approved application; or identifying the damage or potential damage; and/or

(b) The relevant provisions of the Forest Practices Act or of the forest practices regulations relating thereto;

(2) **The right** of the operator ~~((or))~~ landowner, or timber owner to a hearing before the department; and

(3) **The specific** course of action ordered by the department to be followed by the operator to correct such failure to comply and to prevent, correct and/or compensate for material damage to public resources which resulted from any violation, unauthorized deviation, or willful or negligent disregard for potential damage to a public resource; and/or those courses of action necessary to prevent continuing damage to public resources where the damage is resulting from the forest practice activities but has not resulted from any violation, unauthorized deviation, or negligence.

(4) **Local government entity conditions.** If the notice to comply involves a condition imposed pursuant to WAC 222-20-040(3), then the specific course of action ordered by the department shall include a requirement that the operator obtain approval of the local government entity of the action to be taken.

(5) **The department** shall mail a copy ~~((thereof))~~ of the notice to comply to the forest landowner and the timber owner at the addresses shown on the application, showing the date of service upon the operator. The department shall also mail a copy to the local government entity if a condition imposed pursuant to WAC 222-20-040(3) is involved.

Such notice to comply shall become a final order of the department: *Provided*, That no direct appeal to the appeals board will be allowed from such final order. Such operator shall undertake the course of action so ordered by the department unless, within fifteen days after the date of service of such notice to comply, the operator, forest landowner, or timber owner, shall request the department in writing to schedule a hearing. If so requested, the department shall schedule a hearing on a date not more than twenty days after receiving such request. The local government entity shall participate in the hearing if a condition imposed pursuant to WAC 222-20-040(3) is involved. Within ten days after such hearing, the department shall issue a final order either withdrawing its notice to comply or clearly setting forth the specific course of action to be followed by such operator. Such operator shall undertake the course of action so ordered by the department unless within thirty days after the date of such final order, the operator, forest landowner, or timber owner appeals such final order to the appeals board. No person shall be under any obligation under this section to prevent, correct, or compensate for any damage to public resources which occurs more than one year after the date of completion of the forest practices operations involved exclusive of reforestation,

unless such forest practices were not conducted in accordance with forest practices rules and regulations: *Provided*, That this provision shall not relieve the forest landowner from any obligation to comply with forest practices rules and regulations pertaining to providing continuing road maintenance. No action to recover damages shall be taken under this section more than two years after the date the damage involved occurs.

AMENDATORY SECTION (Amending WSR 91-23-052, filed 11/15/91, effective 12/16/91)

WAC 222-46-040 Stop work orders. (1) **The department** shall have the authority to serve upon an operator a stop work order which shall be a final order of the department if:

(a) There is any violation of the provisions of the Forest Practices Act or these regulations; or

(b) There is a deviation from the approved application; or

(c) Immediate action is necessary to prevent continuation of or to avoid material damage to a public resource.

(2) **The stop work order** shall set forth:

(a) The specific nature, extent, and time of the violation, deviation, damage, or potential damage;

(b) An order to stop all work connected with the violation, deviation, damage, or potential damage;

(c) The specific course of action needed to correct such violation or deviation or to prevent damage and to correct and/or compensate for damage to public resources which has resulted from any violation, unauthorized deviation, or willful or negligent disregard for potential damage to a public resource ~~(; and)~~. The stop work order shall also set forth those courses of action necessary to prevent continuing damage to public resources where the damage is resulting from the forest practice activities but has not resulted from any violation, unauthorized deviation, or negligence. If the stop work order involves a condition imposed pursuant to WAC 222-20-040(3), then the specific course of action ordered by the department shall include a requirement that the operator obtain approval of the local government entity of the action to be taken.

(d) The stop work order shall also set forth the right of the operator to a hearing before the appeals board.

The department shall immediately file a copy of such order with the appeals board and mail a copy thereof to the timber owner and forest landowner at the addresses shown on the application. The department shall also mail a copy to the local government entity if a condition imposed pursuant to WAC 222-20-040(3) is involved.

The operator, timber owner, or forest landowner may commence an appeal to the appeals board within fifteen days after service upon the operator. If such appeal is commenced, a hearing shall be held not more than twenty days after copies of the notice of appeal were filed with the appeals board. Such proceeding shall be a contested case within the meaning of chapter 34.05 RCW.

The operator shall comply with the order of the department immediately upon being served, but the appeals board if requested shall have authority to continue or discontinue in whole or in part the order of the department under such

conditions as it may impose pending the outcome of the proceeding.

AMENDATORY SECTION (Amending Order 263, filed 6/16/76)

WAC 222-46-060 Civil penalties. (1) **Amount of penalty.** Every person who ~~((fails to comply with))~~ violates any provisions of RCW 76.09.010 through 76.09.280 ((as now or hereafter amended or the Forest Practices Act)) or of the forest practices ((regulations)) rules adopted pursuant thereto, or who converts forest land to a use other than commercial timber operation within three years after completion of the forest practice without the consent of the county, city, or town, shall be subject to a penalty in an amount of not more than ~~((five hundred))~~ ten thousand dollars (((\$500.00)) for each such violation. Each and every such violation shall be a separate and distinct violation. In case of a failure to comply with a ~~((notice pursuant to RCW 76.09.090 as now or hereafter amended or a))~~ stop work order, every day's continuance thereafter shall be a separate and distinct violation.

(2) **Penalty assessments** shall consider the following:

(a) Repairability of the adverse effect from the violation;

(b) Whether the violation of the act or rules was intentional;

(c) Cooperation with the department;

(d) Previous violation history;

(e) Severity of the impact or the potential for material damage to public resources; and

(f) The extent to which a penalty to be imposed on a forest landowner for a forest practice violation committed by another should be reduced because the owner was unaware of the violation and did not receive substantial economic benefits from the violation.

(3) **Calculation of penalty.** The department shall evaluate any violation to determine if a civil penalty is warranted. When penalties are to be assessed they shall be calculated using the following process:

(a) Determine the base penalty; see WAC 222-46-065.

(b) The penalty may be adjusted using factors specific to the incident and the site. The following additional factors will be independently considered and added to the base penalty to calculate the civil penalty:

(i) Repairability:

Repairability shall be based on the length of time natural restoration or implementation of a restoration plan will take and whether repair can be achieved. The penalty will be substantially increased when natural restoration will not occur within three years and the damage cannot be effectively corrected. For this factor, up to double the base penalty may be added to the penalty.

(ii) Intention:

In making a determination of intent, the department shall consider, but not be limited to, the following considerations: The foreseeability of the violation; whether precautions were taken to avoid the violation; whether an informal conference or enforcement action was served on the violator prior to the violation. For this factor, up to double the base penalty may be added to the penalty.

(iii) Cooperation:

The department shall consider whether the violator did or did not make any attempt to correct the problem. Timeliness of action(s) and/or ignoring or evading agency contacts or directives shall determine if the penalty shall be increased. For this factor, up to double the base penalty may be added to the penalty.

(iv) Previous violation(s):

The department shall consider whether the violator has previous violations of a forest practice rule or regulation as documented in an enforcement action. The department may consider company organizations and assignment of operational responsibilities when evaluating previous violations. A history of violations with adverse impacts or potential for adverse impacts or that shows a pattern of ignoring the rules or the act, shall result in a substantially larger penalty.

Enforcement actions for the purposes of this section shall include notices to comply, stop work orders, civil penalties, and criminal citations when those enforcement actions are associated with forest practice violations. For this factor, up to quadruple the base penalty may be added to the penalty.

(v) Severity:

The department shall adjust the penalty based on the extent and magnitude of the damage or potential damage to public resources. For this factor, up to quadruple the base penalty may be added to the penalty.

(vi) Landowner involvement:

If in the opinion of the department, the landowner exercised reasonable prudence in the development of timber sale contracts or supervision of the forest practice operations, was unaware of the forest practice violation, and the landowner received no substantial economic benefit from the violation, then the landowner generally would not be assessed a civil penalty.

(c) In accordance with RCW 76.09.170, the penalty may not exceed ten thousand dollars for each and every violation.

(d) The department shall determine whether all or a portion of the penalty should be assessed against the operator, landowner, and/or timber owner. The department should consider the responsible party, the degree of control, the sophistication of the party and whether different parties conducted different violations.

(4) Other participants. Every person who through an act of commission or omission procures, aids or abets in the violation shall be considered to have violated the provisions of this section and shall be subject to the penalty (~~herein~~) provided for in this section.

~~((3))~~ (5) Government employees. (~~Provided, That~~) No penalty shall be imposed under this section upon any governmental official, an employee of any governmental department, agency, or entity, or a member of any board (~~or advisory committee~~) created by the act for any act or omission in his/her duties in the administration of the act or of these (~~regulations~~) rules.

~~((4))~~ (6) Written notice. The penalty (~~herein provided for~~) shall be imposed by a notice in writing, either by certified mail with return receipt requested or by personal service, to the person incurring the same from the department (~~of natural resources~~) describing the violation with reasonable particularity.

(7) Remission or mitigation. Within ~~((45))~~ fifteen days after the notice is received, the person incurring the penalty

may apply in writing to the department's manager of the region in which the penalty was issued, for the remission or mitigation of such penalty. Upon receipt of the application, the department may remit or mitigate the penalty upon whatever terms the department in its discretion deems proper: *Provided*, That the department deems such remission or mitigation to be in the best interests of carrying out the purposes of the act. The department (~~of natural resources~~) shall have authority to ascertain the facts regarding all such applications in such reasonable manner and under such (~~regulations~~) rules as they may deem proper. The reviewer may reduce, dismiss or not change the civil penalty. Within fifteen days of the completion of the regional review, the person incurring the penalty may apply in writing to the supervisor of the department for further review.

~~((5))~~ (8) Right of appeal. Any person incurring any penalty hereunder may appeal the same to the forest practices appeals board. Such appeals shall be filed within ~~((30))~~ thirty days of receipt of notice imposing any penalty unless an application for remission or mitigation is made to the department. When such an application for remission or mitigation is made, such appeals shall be filed within ~~((30))~~ thirty days of receipt of notice from the department setting forth the disposition of the application for remission or mitigation. Concurrently with the filing of any appeal to the forest practices appeals board as provided in this section, the appellant shall file a copy of the appeal with the department region from which the penalty was issued and a copy with the office of the attorney general.

~~((6))~~ (9) Penalties due. (~~Any~~) The penalty imposed (~~hereunder~~) under this section shall become due and payable ~~((30))~~ thirty days after receipt of a notice imposing the same unless application for remission or mitigation is made or an appeal is filed. When such an application for remission or mitigation is made, any penalty incurred (~~hereunder~~) under this section shall become due and payable ~~((30))~~ thirty days after receipt of notice setting forth the disposition of such application unless an appeal is filed from such disposition. Whenever an appeal of (~~any~~) the penalty incurred (~~hereunder~~) is filed, the penalty shall become due and payable only upon completion of all administrative and judicial review proceedings and the issuance of a final order or decision confirming the penalty in whole or in part.

~~((7) Foreclosure.)~~ (10) Enforcement. If the amount of any penalty is not paid to the department within ~~((30))~~ thirty days after it becomes due and payable, the attorney general, upon the request of the department, shall bring an action in the name of the state of Washington in the superior court of Thurston county or of any county in which such violator may do business, to recover such penalty. In all such actions the procedure and rules of evidence shall be the same as an ordinary civil action except as otherwise provided in the Forest Practices Act. In addition to or as an alternative to seeking enforcement of penalties in superior court, the department may bring an action in district court as provided in Title 3 RCW, to collect penalties.

(11) Liens. Penalties imposed under this section for violations associated with a conversion to a use other than commercial timber operation shall be a lien upon the real property of the person assessed the penalty. The department

may collect such amounts in the same manner provided in chapter 60.04 RCW for mechanics' liens.

NEW SECTION

WAC 222-46-065 Base penalty schedule. All other WAC or RCW violations not specifically mentioned in this list shall have a base penalty of five hundred dollars.

Violations of the following shall have a base penalty of two thousand dollars:

| Statute or Rule | Description |
|---|--|
| WAC 222-20-010 RCW 76.09.050 | Operation without an approved forest practices application/notification. |
| WAC 222-20-010 RCW 76.09.060 | Willful misrepresentation of information on the forest practices application /notification. |
| WAC 222-20-050 RCW 76.09.060 | Conversion of land without consent of the county, city or town. |
| WAC 222-20-040 WAC 222-20-060 RCW 76.09.060 | Significant, in the opinion of the department, deviation from an approved forest practices application/notification. |

AMENDATORY SECTION (Amending Order 263, filed 6/16/76)

WAC 222-46-070 Injunctions, civil suits, disapprovals. (1) ~~The department ((of natural resources, through the attorney general,))~~ may take any necessary action to enforce any final order or final decision, ~~((or to enjoin any forest practices by any person for a 1 year period after such person has failed to comply with a final order or a final decision))~~ and may disapprove for up to one year any forest practices application or notification submitted by any person who has failed to comply with a final order or decision as set forth in RCW 76.09.080, 76.09.090, or 76.09.110, or has failed to pay any civil penalties as provided in RCW 76.09.170.

The department shall provide written notice of its intent to disapprove future applications or notifications, and shall forward copies of such notice to any affected landowner, timber owner or operator; such written notice shall occur within ninety days of the failure to comply with a final order or decisions as set forth in RCW 76.09.080, 76.09.090, or 76.09.110, or has failed to pay any civil penalties as provided in RCW 76.09.170. The disapproval period shall run from thirty days following the date of actual notice or from the date all appeals, if any, have been exhausted.

Any person provided notice of intent to disapprove an application or notification may seek review from the forest practices appeals board within thirty days of the date of notice.

(2) A county may bring injunctive, declaratory, or other actions for enforcement for forest practice activities within its jurisdiction in the superior court as provided by law against the department, the forest landowner, timber owner or operator to enforce the forest practices regulations or any final order of the department or the appeals board ~~((= Provided, That)).~~ No civil or criminal penalties shall be imposed for past actions or omissions if such actions or omissions were conducted pursuant to an approval or directive of the department ~~((of natural resources. And provided further, That such actions shall not be com-~~

~~menced)).~~ A county may not commence injunctions, declaratory actions, or other actions for enforcement under this subsection unless the department fails to take appropriate actions after ~~((+0))~~ ten days' written notice to the department by the county of a violation of the forest practices ~~((regulations))~~ rules or final orders of the department or the appeals board.

**WSR 94-01-146
PERMANENT RULES
UTILITIES AND TRANSPORTATION
COMMISSION**

[Order R-406, Docket No. UT-931027—Filed December 21, 1993, 10:07 a.m.]

In the matter of amending WAC 480-80-390 relating to mandatory cost changes (MCC) for telecommunication companies.

The Washington Utilities and Transportation Commission takes this action under Notice No. WSR 93-22-115, filed with the code reviser on November 3, 1993. The commission brings this proceeding pursuant to RCW 80.01.040.

This proceeding complies with the Open Public Meetings Act (chapter 42.30 RCW), the Administrative Procedure Act (chapter 34.05 RCW), the State Register Act (chapter 34.08 RCW), the State Environmental Policy Act of 1971 (chapter 34.21C RCW), and the Regulatory Fairness Act (chapter 19.85 RCW).

The commission scheduled this matter for oral comment and adoption under Notice No. WSR 93-22-115, for 9:00 a.m., Wednesday, December 15, 1993, in the Commission's Hearing Room, Second Floor, Chandler Plaza Building, 1300 South Evergreen Park Drive S.W., Olympia, WA. The notice provided interested persons the opportunity to submit written comments to the commission until November 30, 1993.

Written comments were presented by Washington Independent Telephone Association, public counsel, and by the commission staff.

The rule change proposal was considered for adoption at the commission's regularly scheduled open public meeting on December 15, 1993, before Chairman Sharon L. Nelson and Commissioner Richard Hemstad. The proposal would decrease the authorized overall rate of return and return on equity from 10.25% to 9.73% and 11.5% to 10.45%, respectfully, to qualify a rate change request for streamlined processing under the rule. Oral comments were made by GTE Northwest Incorporated; Don Trotter, public counsel; and Kathy Folsom on behalf of the commission staff. GTE Northwest Incorporated objected to use of the proposed return on equity and rate of return. The company believed that a recent upward movement of interest rates signaled a trend in increasing capital costs. Public counsel supported the amendments to the rule as proposed by commission staff. After considering the written and oral comment, the commission adopted the rule as proposed.

In reviewing the entire record, the commission determines that WAC 480-80-390 should be amended to read as set forth in Appendix A, as a rule of the Washington

PERMANENT

Utilities and Transportation Commission, to take effect pursuant to RCW 34.05.380.

ORDER

THE COMMISSION ORDERS that WAC 480-80-390 is amended to read as set forth in Appendix A, as a rule of the Washington Utilities and Transportation Commission, to take effect pursuant to RCW 34.05.380.

THE COMMISSION FURTHER ORDERS That this order and the rule shown below, after being recorded in the register of the Washington Utilities and Transportation Commission, shall be forwarded to the code reviser for filing pursuant to chapter 34.05 RCW and chapter 1-21 WAC.

THE COMMISSION Adopts the commission staff memoranda, presented at the times the commission considered noticing and adopting this proposal under RCW 34.05.355.

DATED at Olympia, Washington, this 17th day of December 1993.

Washington Utilities and Transportation Commission
Sharon L. Nelson, Chairman
Richard Hemstad, Commissioner

AMENDATORY SECTION (Amending Order R-385, Docket No. UT-920960, filed 4/19/93, effective 5/20/93)

WAC 480-80-390 Mandatory cost changes for telecommunications companies. (1) This section establishes streamlined procedures to be applied to rate filings by local exchange telecommunication companies which seek to reflect in rate increases jurisdictional separations changes and mandatory accounting and tax changes imposed by a governmental authority which are accepted for intrastate ratemaking purposes by the commission.

(2) In order to qualify for jurisdictional separations or mandatory accounting and tax change treatment, a filing seeking to increase rates shall meet the following requirements at a minimum:

(a) It shall be accompanied by a recital that the company has or will within forty-five days of the filing complete distribution in the manner specified in WAC 480-80-125 of a notice to customers containing information as to the rate increase consistent with that required in that portion of the rule denominated "summary of requested rate increases," and further containing the name and mailing address of the commission and public counsel, and advising the customers that they may contact the same with respect to the proposed rate change. Proof of compliance with the foregoing shall be on file with the commission at least thirty days before any rates sought under this procedure shall be made effective.

(b) The filing shall be accompanied by supporting documentation demonstrating the calculation of the proposed increase and the authority for the change.

(c)(i) A company seeking this treatment for a proposed increase shall submit a rate of return statement, on a commission basis, which demonstrates that the company is not presently exceeding a reasonable level of earnings. If the company is exceeding a reasonable level of earnings, the proposed increase shall be reduced accordingly. All supporting documentation used to develop the rate of return statement shall be provided with the filing. For the purposes of

this rule, "reasonable level of earnings" is the company's authorized overall rate of return or the rate of return developed pursuant to (e) of this subsection, whichever is more current. Companies with revenues exceeding five hundred million dollars annually may use their authorized rate of return if established within the prior two years. If no return has been established within two years, such companies may not be accorded the procedures designated by this rule, unless in the judgment of the commission, such authorized return is not unreasonable for purposes of a filing under this rule. If a company cannot depict Washington intrastate results of operations with reasonable accuracy, the total Washington realized return may be used for this test.

(ii) The rate of return statement shall not be a fully pro formed results of operations statement, but must depict the results of operations on a commission basis. For purposes of this rule, "commission basis" means that the rate base includes those standard rate base components that have been historically accepted by the commission for ratemaking, and further includes restating actual adjustments which restate a company's booked results of operations to a ratemaking basis and also includes an appropriate pro forma debt adjustment. These restating adjustments should be made to account for jurisdictional differences where they depart from FCC Part 32. Accounting rules set forth in WAC 480-120-031 may be used as a guide to satisfy most adjustments required to restate per books results of operations. Nonoperating, nonrecurring, or extraordinary items, and unregulated operating items, or any other item that materially distorts test period earnings or expenses shall be removed from booked results of operations before the achieved return is calculated. For purposes of this rule, "commission basis" does not include new theories or approaches which have not been previously addressed to and resolved by the commission.

(d) The supporting documentation specified in (b) and (c) of this subsection shall be submitted at the time of the tariff filing or the first notice to customers, whichever occurs first.

(e) The qualifying overall rate of return will be either not greater than ~~((10.25))~~ 9.73 percent or based upon a ~~((11.50))~~ 10.45 percent return on equity. The ~~((10.25))~~ 9.73 percent overall rate of return will be adjusted according to the following table:

| |
|--|
| 90% DEBT COMPANIES USE 40.00% OF TARGET RATE OF RETURN |
| 80% DEBT COMPANIES USE 48.00% OF TARGET RATE OF RETURN |
| 70% DEBT COMPANIES USE 57.60% OF TARGET RATE OF RETURN |
| 60% DEBT COMPANIES USE 69.12% OF TARGET RATE OF RETURN |

Using the ~~((11.50))~~ 10.45 percent return on equity, the overall fair rate of return will be determined on an individual company basis giving consideration to the company's cost of debt and preferred equity, each adjusted for any known and measurable effects, and utilizing an appropriate capital structure.

For the purposes of this rule only, "appropriate capital structure" shall be defined as a minimum of forty percent equity and a maximum of sixty percent equity. Capital structures outside these parameters will be adjusted to the minimum or maximum, whichever is closer.

The rates shall be reviewed during the third quarter of each calendar year, and such action taken as may be necessary and appropriate to reflect the current capital market

conditions: *Provided*, That nothing herein shall foreclose more frequent review and adjustment of the overall rate of return or return on equity as circumstances may indicate. Nothing in this rule shall foreclose a utility from seeking a different return on equity, nor shall the returns or the methodologies stated in this section be considered as precedent for any other commission proceedings.

(3) Except for costs identified with a particular customer class, any revenue requirement change sought to be reflected by this treatment shall be spread on a uniform revenue percentage basis by customer class, defined as residential, business, and interexchange, whether or not classified as competitive.

Costs identified with interexchange services shall be spread to access charges using approved commission methodology. Costs identified with any other specific class or service shall be spread to that class or service on a uniform percentage basis. In exceptional circumstances, a company may propose an alternative rate design or rate spread.

(4) If the commission has reason to believe that the quality of the company's service is not consistent with its public service obligations, or if the commission has reason to believe that the company's results of operations, proposed rate design or proposed rate spread, or proposed alternative rate design or rate spread require a more extensive review, the commission may decline to apply the procedures contemplated by this rule.

(5) If jurisdictional separations or mandatory accounting and tax change treatment is found to be appropriate, the commission will ordinarily take final action within ninety days of the date of filing.

(6) Nothing in this section shall be construed to prevent any company, the commission, or any customer from utilizing any other procedures which are otherwise permitted by law.

WSR 94-01-178
PERMANENT RULES
WASHINGTON STATE PATROL
 [Filed December 22, 1993, 9:22 a.m.]

Date of Adoption: December 21, 1993.

Purpose: Chapters 446-55 and 446-60 WAC are being repealed because of the adoption of federal regulations. WAC 446-65-010 is being amended to adopt federal regulations (49 CFR parts 391 and 395).

Citation of Existing Rules Affected by this Order: Repealing chapters 446-55 and 446-60 WAC; and amending WAC 446-65-010.

Statutory Authority for Adoption: RCW 46.32.020.

Pursuant to notice filed as WSR 93-20-033 on September 28, 1993.

Effective Date of Rule: Thirty-one days after filing.
 December 21, 1993
 Roger W. Bruett
 Chief

REPEALER

The following chapter of the Washington Administrative Code is repealed:

- WAC 446-55-005 Promulgation.
- WAC 446-55-010 Scope and interpretation of the rules in this chapter—
 Additional qualifications—
 Duties of private carrier-drivers.
- WAC 446-55-020 General exemptions.
- WAC 446-55-030 Definitions.
- WAC 446-55-040 Familiarity with rules.
- WAC 446-55-050 Aiding or abetting violations.
- WAC 446-55-060 Qualifications of drivers.
- WAC 446-55-070 Disqualification of drivers.
- WAC 446-55-080 Application for employment.
- WAC 446-55-090 Investigation and inquiries.
- WAC 446-55-100 Annual review of driving record.
- WAC 446-55-110 Record of violations.
- WAC 446-55-120 Road test.
- WAC 446-55-130 Equivalent of road test.
- WAC 446-55-140 Written examination.
- WAC 446-55-150 Examination format.
- WAC 446-55-160 Equivalent of written examination.
- WAC 446-55-165 Exemptions for single vehicle owner drivers.
- WAC 446-55-170 Physical qualifications for drivers.
- WAC 446-55-180 Medical examination—Certificate of physical examination.
- WAC 446-55-190 Persons who must be medically examined and certified.
- WAC 446-55-220 Driver qualification files.
- WAC 446-55-230 Drivers who were regularly employed for a continuous three-year period prior to the effective date of this rule.
- WAC 446-55-250 Intermittent, casual, or occasional drivers.
- WAC 446-55-260 Drivers furnished by other motor carriers.
- WAC 446-55-270 Drivers of articulated (combination) farm vehicles.
- WAC 446-55-280 Intrastate drivers of vehicles transporting combustible liquids.

REPEALER

The following chapter of the Washington Administrative Code is repealed:

- WAC 446-60-005 Promulgation.
- WAC 446-60-010 Compliance with, knowledge of, and interpretation of, the rules in this chapter.
- WAC 446-60-015 General exemptions.
- WAC 446-60-020 Definitions.

WASHINGTON STATE PATROL
 [Filed December 22, 1993, 9:25 a.m.]

Date of Adoption: December 21, 1993.

Purpose: WAC 204-74A-050 is being amended regarding the operation of lamps and stop signals on school buses.

Citation of Existing Rules Affected by this Order: Amending WAC 204-74A-050.

Statutory Authority for Adoption: RCW 46.37.005.

Pursuant to notice filed as WSR 93-20-034 on September 28, 1993.

Effective Date of Rule: Thirty-one days after filing.
 December 21, 1993
 Roger W. Bruett
 Chief

AMENDATORY SECTION (Amending WSR 90-18-047, filed 8/30/90, effective 9/30/90)

WAC 204-74A-050 Operation of lamps. (1) Operation of the warning lamp system shall be in compliance with FMVSS 108. Activation of the warning lamp sequence shall begin only by means of a manually-operated switch. Such

activation will cause the right and left amber lamps to flash alternately until the (~~bus entrance door is opened or the~~) stop signal arm is extended, or the bus entrance door is opened, at which time the amber lamps shall be automatically deactivated and the right and left red lamps shall be automatically activated. Whenever the warning lamp system has been activated, opening of the entrance door shall automatically deactivate the amber lamps, cause the stop signal arm to extend, and activate the red lamps. Automatic extension of the stop signal arm does not apply to systems equipped with a manually operated stop signal arm. All lamps shall flash at a rate from sixty to one hundred twenty times per minute and shall reach full brilliance during each cycle.

(2) Lamp controls shall consist of:

(a) The master or sequencing switch which shall be in plain view and mounted within easy reach of the driver, and which shall activate the system sequencing and deactivate the system at any time during the sequence.

(b) An override switch which shall automatically activate the red lamps whenever the stop signal arm is extended even though the master control switch is turned off, and which shall automatically deactivate the amber lamps if previously activated regardless of the then present normal state of sequencing or entrance door position. Such override switch shall be designed and installed so as to function with air, vacuum, electric, or manually operated stop signal arms. The stop signal arm shall be capable of being extended at any time, regardless of the position of the entrance door. The opening of the entrance door shall not cause extension of the stop signal arm, or the activation of the red lamps unless the master switch has been activated.

(c) A minimum of two pilot lamps, one amber and one red, each of which shall flash when the like colored warning lamps are in operation. Pilot lamps which show the operation of each individual lamp are permissible. All pilot lamps shall be located so as to be clearly visible to the driver.

(3) The warning lamp system shall be operated in accordance with the regulations set forth in chapter 392-145 WAC.

WSR 94-01-180
PERMANENT RULES
WASHINGTON STATE PATROL
 [Filed December 22, 1993, 9:27 a.m.]

Date of Adoption: December 21, 1993.

Purpose: WAC 446-50-040 is being repealed due to a change in federal law (49 CFR parts 171-180, and part 397).

Citation of Existing Rules Affected by this Order: Repealing WAC 446-50-040.

Statutory Authority for Adoption: RCW 46.48.190.

Pursuant to notice filed as WSR 93-20-032 on September 28, 1993.

Effective Date of Rule: Thirty-one days after filing.
 December 21, 1993
 Roger W. Bruett
 Chief

REPEALER

The following section of the Washington Administrative Code is repealed:

WAC 446-50-040 Procedure upon entering the state.

WSR 94-01-181**PERMANENT RULES****BELLEVUE COMMUNITY COLLEGE**

[Filed December 22, 1993, 9:30 a.m.]

Date of Adoption: December 21, 1993.

Purpose: Repeals existing rule governing refunds. Establishes rules under which refunds for withdrawal for courses may be given and fees may be assessed for schedule changes. Makes permanent, emergency enacted rule.

Citation of Existing Rules Affected by this Order: Repealing WAC 132H-160-180.

Statutory Authority for Adoption: RCW 28B.50.140.

Pursuant to notice filed as WSR 93-23-044 and 93-23-045 on November 12, 1993.

Changes Other than Editing from Proposed to Adopted Version: Subsection (2) tuition and fees will be refunded at 50% from day three rather than day four as stated in the proposed version, and the word "the" was added before fourth week of . . . in subsections (2) and (3).

Effective Date of Rule: Thirty-one days after filing.
December 21, 1993

Elise J. Erickson
Executive Assistant
Secretary, Board of Trustees

NEW SECTION

WAC 132H-160-182 Student schedule changes — Refund policy and administrative fees. Community College District VIII board of trustees has authorized the registrar to collect an administrative fee when a student adds or drops course(s) or withdraws from the college. In addition, the registrar is also authorized to refund fees when a student withdraws from college or a course(s). The registrar has the authority to make judgments regarding refunds in extraordinary circumstances. A student who is requested to withdraw for disciplinary reasons will not be eligible for a refund. Refund provisions for students receiving Title IV Federal aid are described in WAC 132H-160-185, Refund for Title IV Federal Aid Recipients.

Tuition and related fees are refunded upon withdrawal from college or a course(s) as follows:

(1) Tuition and fees will be refunded at 100% prior to the third day of the quarter for complete withdrawal from college, withdrawal from a course(s) (reduction of class load below 10 credits), and for classes the college has cancelled.

(2) Tuition and fees will be refunded at 50% from day three through the fourth week of the quarter for complete withdrawal from college or withdrawal from a course(s) (reduction of class load below 10 credits).

(3) Tuition and fees will not be refunded after the fourth week of the quarter.

(4) If an insurance claim has been filed, no refund will be granted for insurance fees.

(5) Self support programs may develop different refund policies based upon programmatic reasons, with institutional approval. Policies pertaining to these programs will be listed in the quarterly schedule.

WSR 94-01-190**PERMANENT RULES****SUPERINTENDENT OF PUBLIC INSTRUCTION**

[Filed December 22, 1993, 10:31 a.m.]

Date of Adoption: December 22, 1993.

Purpose: These rules determine, in part, placement of certificated instructional staff on LEAP salary allocation documents.

Citation of Existing Rules Affected by this Order: Repealing WAC 392-121-260, 392-121-265, 392-121-267, 392-121-272, 392-121-285, and 392-121-290; and amending WAC 392-121-245, 392-121-250, 392-121-255, 392-121-257, 392-121-261, 392-121-270, 392-121-280, and 392-121-295.

Statutory Authority for Adoption: RCW 28A.150.290 and 28A.150.400.

Other Authority: The Biennial Operating Appropriations Act.

Pursuant to notice filed as WSR 93-19-091 on September 15, 1993.

Effective Date of Rule: Thirty-one days after filing.
December 22, 1993

Judith A. Billings
Superintendent of
Public Instruction

AMENDATORY SECTION (Amending Order 88-8, filed 1/11/88)

WAC 392-121-245 Definition—Certificated years of experience. Regardless of the experience factors used by a school district for the purposes of its salary schedule(s), as used in this chapter, the term "years of experience" means the number of years of accumulated full-time and part-time professional education employment prior to the current reporting school year in the state of Washington, out-of-state, and a foreign country and shall be reported by the school district to the nearest tenth. School districts shall report all years of experience including those beyond the experience limit of the school district's salary schedule. The traditional nine-month academic year shall be considered as one school year. Not more than one school year of experience may be counted for any twelve-month period. Substitute days, if documented, shall be reported as part-time professional education employment calculated by dividing the accumulated number of full-time substitute days by one hundred eighty and rounding to the nearest tenth. Partial substitute days shall be reported as part-time professional education employment calculated by dividing the part of the day worked by the full day as determined by the district and rounded to the nearest tenth of a day. Professional education experience shall be limited to the following:

(1) Employment in public or private preschools or elementary and secondary schools in positions which require certification where:

(a) Schools include the Centrum education program, the Pacific Science Center education program, and educational centers authorized under chapter 28A.205. RCW;

(b) Certification means the concurrent public professional education licensing requirements established in the state, province, country, or other governmental unit in which employment occurred;

(2) Employment in public or private vocational-technical schools, technical colleges, community/junior colleges, colleges, and universities in positions comparable to those which require certification in ((the common schools)) Washington school districts;

(3) Employment in ((an)) a governmental educational agency ((or institution)) with regional administrative responsibilities for preschool, elementary, and/or secondary education including but not limited to an educational service district, office of the superintendent of public instruction, or United States department of education in any professional position including but not limited to C.P.A., architect, business manager, or physician;

(4) Experience in the following areas ((if recognized by the district for placement on the district salary schedule)):

(a) Military, Peace Corps, or Vista service which interrupted professional employment((+)) included in subsection (1), (2), or (3) of this section; and

(b) Sabbatical leave((- and (+))).

(5) For nondegreed vocational instructors ((who hold no degree)), up to a maximum of six years of management experience as defined in WAC 180-77-003 acquired after the instructor meets the minimum vocational certification requirements established in WAC 180-77-040. If a degree is obtained while employed in the state of Washington as a nondegreed vocational instructor, the eligible years of management experience pursuant to this subsection reported on Form S-275 prior to the awarding of the degree shall continue to be reported but shall not increase.

NEW SECTION

WAC 392-121-249 Definition—Regionally accredited institution of higher education. As used in this chapter, "regionally accredited institution of higher education" means the same as defined in WAC 180-78-010(6).

AMENDATORY SECTION (Amending Order 88-8, filed 1/11/88)

WAC 392-121-250 Definition—Highest degree level. As used in this chapter, the term "highest degree level" means:

(1) The highest degree earned by the employee from ((an)) a regionally accredited ((college or university)) institution of higher education;

(2) "Nondegreed" for a certificated instructional employee who holds no bachelor's or higher level degree; or

(3) "Nondegreed" for a certificated instructional employee who holds a valid vocational certificate acquired as the result of industrial experience rather than college training, and who has a degree earned from a regionally accredited

institution of higher education prior to the issue of the initial vocational certificate, which is incidental to or not related to the vocational certificate.

AMENDATORY SECTION (Amending Order 88-8, filed 1/11/88)

WAC 392-121-255 Definition—Academic credits. As used in this chapter, "academic credits" means credits determined as follows:

(1) Credits are earned after the awarding or conferring of the employee's first bachelor's degree((-));

(2) Credits are earned on or before October 1 of the year for which allocations are being calculated pursuant to this chapter((-));

(3) Credits are earned from ((an)) a regionally accredited institution of higher education: *Provided*, That credits, determined eligible pursuant to subsections (1), (2), (4) and (5) of this section, earned from any other accredited community college, college, or university((-) and reported on Form S-275 on or before December 31, 1992, shall continue to be reported;

(4) Credits are transferrable or applicable to a bachelor's or more advanced degree program((-)); *Provided*, That for educational courses which are the same or identical no more credits for that educational course than are transferrable or applicable to a bachelor's or more advanced degree program at that institution shall be counted;

(5) Credits are not counted as in-service credits pursuant to WAC 392-121-257((-) or nondegree credits pursuant to WAC 392-121-259;

(6) The number of credits equals the number of quarter hours, units or semester hours each converted to quarter hours earned ((from the community college, college, or university)) pursuant to this section; and

(7) Accumulate credits to the nearest tenth.

AMENDATORY SECTION (Amending Order 18, filed 7/19/90, effective 8/19/90)

WAC 392-121-257 Definition—In-service credits. As used in this chapter, "in-service credits" means credits determined as follows:

(1) Credits are earned after August 31, 1987.

(2) Credits are earned on or before October 1 of the year for which allocations are being calculated pursuant to this chapter.

(3) Credits are earned in either:

(a) A locally approved in-service training program which means a program approved by a school district board of directors, and meeting standards adopted by the state board of education pursuant to the standards in WAC 180-85-200 and the development of which has been participated in by an in-service training task force whose membership is the same as provided under RCW 28A.415.040; or

(b) A state approved continuing education program offered by an education agency approved to provide in-service for the purposes of continuing education as provided for under rules adopted by the state board of education pursuant to chapter 180-85 WAC.

(4) Credits are not counted as academic credits pursuant to WAC 392-121-255 or nondegree credits pursuant to WAC 392-121-259.

(5) Credits are not earned for the purpose of satisfying the requirements of the employee's next highest degree.

(6) Ten locally approved in-service or state approved continuing education credit hours defined in WAC 180-85-030 equal one in-service credit.

(7) Accumulate credits to the nearest tenth.

NEW SECTION

WAC 392-121-259 Definition—Nondegree credits.

As used in this chapter, "nondegree credits" means credits recognized for nondegreed basic education certificated instructional employees as follows:

(1) Zero credits shall be recognized for persons holding a valid initial or provisional certificate as a school nurse, a life teaching certificate, or a valid certificate as a special elementary or secondary consultant, or special crafts teacher.

(2) Thirty credits shall be recognized for persons holding a valid continuing or standard school nurse certificate.

(3) Persons holding valid vocational certificates as provided for in chapter 180-77 WAC shall accumulate recognized credits as follows:

(a) One credit for each ten clock hours of approved vocational teacher training meeting the requirements of WAC 180-77-003 and 180-77-045.

(b) One credit for each one hundred clock hours of occupational experience as defined in WAC 180-77-003 such that each calendar year is limited to a maximum of twenty credits.

(c) Clock hours used in determining credits in (a) and (b) of this subsection must be earned after meeting the minimum vocational certification requirements as established in WAC 180-77-040.

(4) Accumulate credits to the nearest tenth.

AMENDATORY SECTION (Amending Order 15, filed 6/20/90, effective 7/21/90)

WAC 392-121-261 Definition—Total eligible credits

~~((effective for the 1990-91 school year and thereafter)).~~
~~((For the 1990-91 school year and thereafter))~~ As used in this chapter, "total eligible credits" means the total number of credits determined as follows:

(1) For an employee whose highest degree is a bachelor's degree, sum:

(a) Academic and in-service credits; and

(b) Nondegree credits, determined pursuant to WAC 392-121-259 and reported on Form S-275 prior to the awarding of the bachelor's degree for vocational instructors who obtain a bachelor's degree while employed in the state of Washington as a nondegreed vocational instructor.

(2) For an employee whose highest degree is a master's degree, sum:

(a) Academic and in-service credits in excess of forty-five earned after the awarding or conferring of the bachelor's degree and prior to the awarding or conferring of the master's degree; and

(b) Academic and in-service credits earned after the awarding or conferring of the master's degree.

(3) Notwithstanding WAC 392-121-255 and 392-121-257, total eligible credits shall also include academic and in-

service credits earned after October 1, 1991, and prior to January 1, 1992, if:

(a) The employee's highest degree is a bachelor's degree;

(b) The employee's total eligible credits earned prior to October 1, 1991, are less than one hundred thirty-five; and

(c) The credits earned between October 1, 1991, and January 1, 1992, bring the employee's total credits to one hundred thirty-five or more.

(4) For a nondegreed employee sum only nondegree credits.

AMENDATORY SECTION (Amending Order 92-15, filed 11/16/92, effective 12/17/92)

WAC 392-121-270 Placement of basic education certificated instructional (~~staff with degrees on the state-wide salary allocation schedule and~~) employees on LEAP salary allocation documents. Each basic education certificated instructional employee (~~(with a degree)~~) shall be placed on (~~the state-wide salary allocation schedule and on~~) LEAP salary allocation documents based on the employee's certificated years of experience, highest degree level, and total eligible credits (~~as~~) each defined in this chapter(~~-~~) provided that:

(1) If an employee holds more than one degree of the same level, additional credits shall be counted after the first degree.

(2) (~~A certificated instructional employee who holds a valid vocational certificate acquired as the result of industrial experience rather than college training, and who also has earned a college degree which is incidental to or not related to the vocational certificate shall be reported by the school district as holding no degree.~~

(3)) An employee whose highest degree is a bachelor's degree, whose total eligible credits are ninety or greater, and whose total eligible credits earned prior to January 1, 1992, were less than one hundred thirty-five shall be placed on the BA + 90 column.

(3) An employee whose highest degree level is nondegreed shall be placed on the BA columns except that such persons holding valid vocational certificates with one hundred thirty-five or more eligible credits shall be placed on the MA + 0 column.

(4) A vocational instructor who obtains a bachelor's degree while employed in the state of Washington as a nondegreed vocational instructor and for whom one hundred thirty-five or more eligible credits determined pursuant to WAC 392-121-259 were reported on Form S-275 prior to the awarding of that bachelor's degree shall continue to be placed on the MA + 0 column and shall not advance to any other column unless a master's degree is obtained.

(5) For placement on (~~the state-wide salary allocation schedule and on~~) LEAP salary allocation documents, certificated years of experience and total eligible credits shall be rounded to the nearest whole number. One-half year or credit shall be rounded to the next highest year or credit.

~~((4) Effective for the 1992-93 school year and thereafter, an employee whose highest degree is a bachelor's degree, whose total eligible credits are ninety or greater, and whose total eligible credits earned prior to January 1, 1992, were less than one hundred thirty-five shall be placed on the~~

~~BA + 90 column of the state wide salary allocation table and LEAP salary allocation documents.))~~

AMENDATORY SECTION (Amending Order 92-15, filed 11/16/92, effective 12/17/92)

WAC 392-121-280 Placement on ~~((state wide salary allocation schedule and on))~~ LEAP salary allocation documents—Documentation required. School districts shall have documentation on file and available for review which substantiates each basic education certificated instructional employee's placement on ~~((the state wide salary allocation schedule and on))~~ LEAP salary allocation documents. The minimum requirements are as follows:

(1) Districts shall document the date of awarding or conferring of the highest degree ~~((—Documentation shall include))~~ including the date upon which the degree was awarded or conferred as recorded on the diploma or ~~((official))~~ transcript ~~((—Provided, That))~~ from the registrar of the regionally accredited institution of higher education.

(a) If the highest degree is a master's degree, the district shall also document the date of awarding or conferring of the first bachelor's degree.

(b) If the degree was awarded by an institution which does not confer degrees after each term, and all degree requirements were completed at a time other than the date recorded on the diploma or transcript, ~~((an official notatized))~~ a written statement from the registrar of the institution verifying a prior completion date shall be adequate documentation.

(2) Districts shall document academic credits by having on file ~~((an official))~~ a transcript ~~((or letter))~~ from the registrar of the regionally accredited institution of higher education granting the credits. For purposes of this subsection:

(a) An academic credit is deemed "earned" at the end of the term for which it appears on the transcript: *Provided*, That a written statement from the registrar of the institution verifying a prior earned date may establish the date a credit was earned;

(b) Washington state community college credits numbered one hundred and above are deemed transferable for purposes of WAC 392-121-255 subject to the limitations of that same subsection.

(3) Districts shall document in-service credits by having on file a document meeting standards established in WAC 180-85-107 ~~((1) through (3)))~~.

(4) Districts shall document nondegree credits.

(a) For approved vocational teacher training credits pursuant to WAC 392-121-259(3) districts shall have on file a document meeting standards established in WAC 180-85-107 and evidence that the training was authorized pursuant to WAC 180-77-045.

(b) For credits calculated from converted occupational experience pursuant to WAC 392-121-259(3) districts shall have on file documents which provide:

(i) Evidence that the occupational experience meets the requirements of WAC 180-77-003;

(ii) Evidence of the individual's actual number of hours of employment for each year including dates of employment; and

(iii) The district calculation of converted credits pursuant to WAC 392-121-259(3).

(5) Districts shall document certificated years of experience ~~((that are eligible for application on the state wide salary allocation schedule and on LEAP salary allocation documents—Documentation for))~~ as follows:

(a) For certificated years of experience ~~((shall be on letters or any other))~~ obtained and reported on Form S-275 prior to the 1994-95 school year districts shall have on file documents that provide evidence of employment including dates of employment.

(b) For certificated years of experience reported on Form S-275 for the first time after the 1993-94 school year districts shall have on file:

(i) The total number of hours per year for an employee working full-time with each employer;

(ii) The number of hours per year and dates of employment with each employer excluding unpaid leave: *Provided*, That documentation of hours in excess of one full-time certificated year of experience in any twelve-month period is not required;

(iii) The quotient of the hours determined in (b)(i) of this subsection divided by the hours in (b)(ii) of this subsection to two decimals for each year;

(iv) The name and address of the employer;

(v) For those counting out-of-district experience pursuant to WAC 392-121-245(1), evidence whether or not the position required professional education certification pursuant to WAC 392-121-245 (1)(b);

(vi) For those counting experience pursuant to WAC 392-121-245(2), a brief description of the previous employment which documents the school district's decision that the position was comparable to one requiring certification in the Washington school districts;

(vii) For those counting management experience pursuant to WAC 293-121-245(5), evidence that the experience meets the requirements of WAC 180-77-003.

(6) Any documentation required by this section may be original or copies of the original: *Provided*, That each copy is subject to school district acceptance or rejection.

(7) The falsification or deliberate misrepresentation, including omission of a material fact concerning degrees, credits, or experience by an education practitioner as defined in WAC 180-87-035 shall be deemed an act of unprofessional conduct pursuant to WAC 180-87-050. In such an event the provisions of chapters 180-86 and 180-87 WAC shall apply.

Reviser's note: The typographical error in the above section occurred in the copy filed by the agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

AMENDATORY SECTION (Amending Order 92-15, filed 11/16/92, effective 12/17/92)

WAC 392-121-295 Definition—District average staff mix factor for basic education certificated instructional staff. As used in this chapter, "district average staff mix factor for basic education certificated instructional staff" means the number rounded to five decimal places determined as follows:

(1) Assign a staff mix factor to each basic education certificated instructional employee by placing the employee

on the appropriate LEAP salary allocation document pursuant to WAC 392-121-270 (~~or 392-121-272~~);

(2) Multiply the result by the full-time equivalency for the time each employee meets the definition of full-time equivalent basic education certificated instructional employee pursuant to WAC 392-121-215;

(3) Sum the results obtained in subsection (2) of this section for all basic education certificated instructional employees of the school district; and

(4) Divide the result by the district's total full-time equivalent basic education certificated instructional staff.

(5) For the purpose of this section basic education certificated instructional staff are those employed by the school district as of October 1 of the school year as reported to the superintendent of public instruction on Form S-275.

REPEALER

The following sections of the Washington Administrative Code are repealed:

- | | |
|-----------------|---|
| WAC 392-121-260 | Definition—Total eligible credits effective for the 1989-90 school year. |
| WAC 392-121-265 | Definition—State-wide salary allocation schedule. |
| WAC 392-121-267 | Definition—LEAP Document 1. |
| WAC 392-121-272 | Placement of nondegree certificated instructional personnel on the state-wide salary allocation schedule and on LEAP salary allocation documents. |
| WAC 392-121-285 | Definition—District average basic education certificated instructional staff salary per placement on the state-wide salary allocation schedule. |
| WAC 392-121-290 | Definition—District actual average annual basic education certificated instructional staff salary. |

WSR 94-01-012
EMERGENCY RULES
DEPARTMENT OF FISHERIES

[Order 93-139—Filed December 2, 1993, 5:55 p.m.]

Date of Adoption: December 2, 1993.

Purpose: Amend personal use rules.

Citation of Existing Rules Affected by this Order:
 Amending WAC 220-56-128.

Statutory Authority for Adoption: RCW 75.08.080.

Pursuant to RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: A harvestable surplus of chum salmon remains available at the mouth of the Hoodsport Hatchery. An orderly fishery has been maintained and these surplus fish provide angling opportunity.

Effective Date of Rule: Immediately.

December 2, 1993

Judith Freeman

Deputy

for Robert Turner

Director

NEW SECTION

WAC 220-56-12800H Closed area - Hoodsport Hatchery. Notwithstanding the provisions of WAC 220-56-124 and WAC 220-56-128, effective December 3, 1993 through December 31, 1993, it is lawful to fish for and possess salmon taken for personal use in those waters of Hood Canal seaward of marker buoys at the mouth of Finch Creek. The daily bag limit is three salmon, not more than two of which may be chinook salmon, and the minimum size limit for chinook salmon is 22 inches. It is unlawful to fish for food fish within 100 feet of the mouth of Finch Creek from 10:00 p.m. to 6:00 a.m. daily, or after 12:00 midnight December 31, 1993.

REPEALER

The following section of the Washington Administrative Code is repealed:

WAC 220-56-12800G Food fish fishing - Closed
 area - Hoodsport. (93-79)

WSR 94-01-039
EMERGENCY RULES
PUBLIC DISCLOSURE COMMISSION

[Filed December 6, 1993, 3:44 p.m.]

Date of Adoption: November 16, 1993.

Purpose: Amend campaign disclosure forms.

Citation of Existing Rules Affected by this Order:
 Amending WAC 390-16-011, 390-16-012, 390-16-031, 390-16-032, 390-16-033, 390-16-041, and 390-16-050.

Statutory Authority for Adoption: RCW 42.17.390.

Pursuant to RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: Implement changes pursuant to Initiative 134.

Effective Date of Rule: Immediately.

December 6, 1993

Karen M. Copeland

Administrative Officer

[AMENDATORY SECTION] (Amending WSR 93-15-004, filed 7/7/93)]

WAC 390-16-011 Forms—Registration statement for political committees. The official form for providing the statement of organization by political committees for designating a campaign treasurer and depository and for reporting information required to qualify for abbreviated campaign finance reporting is designated "C-1pc", revised ((4/93)) 11/93. Copies of this form are available at the commission office, Room 403, Evergreen Plaza Building, Olympia, Washington 98504. Any attachments shall be on 8-1/2" x 11" white paper.

NEW REGISTRATION OR UPDATE OF PRIOR REGISTRATION?
 NEW: Complete all items in the registration
 AMENDED: Supply the information below which has changed

COMMITTEE STATUS
 Continuing committee
 19 _____ election only; election date _____

1. What is the purpose or description of the committee?
 Bona Fide Political Party Committee (official state or county central committee or legislative district committee). If you are not supporting the entire party ticket, attach a list or specify here the names of the candidates you support. _____ Ballot Number _____ FOR AGAINST
 Ballot Committee (Initiative, Bond, Levy, Recall, etc.). Name or description of ballot measure: _____
 Political Action Committee, Political Club or Organization (including party clubs). If PAC is associated with a business, association, labor union, or similar entity, specify name: _____
 Other. Explain on attached sheet.

2. Related or affiliated committees. List name, address and relationship _____

3. HOW MUCH DO YOU PLAN TO SPEND DURING THIS ENTIRE ELECTION CAMPAIGN, INCLUDING THE PRIMARY AND GENERAL ELECTIONS? BASED ON THAT ESTIMATE, CHOOSE ONE OF THE REPORTING OPTIONS BELOW. (If the committee is a continuing organization, estimate spending on a calendar year basis.)
If no box is checked you are obligated to use Full Reporting. See reporting instruction booklets for information about reports required and changing reporting options.
 ABBREVIATED REPORTING
We will use the Abbreviated Reporting System. We will raise and spend no more than \$2,000 and will accept no more than \$200 in the aggregate from any one contributor.
 FULL REPORTING
We will use the Full Reporting System. We understand this means we must file the frequent, detailed reports required by law.

4. Treasurer's Name and Address (List deputy treasurers on attached sheet.) _____ Daytime Telephone Number () _____

5. Committee's Principal Officers. List name, address and title _____

6. Campaign Bank or Depository.
Branch _____ City _____

7. Campaign records are to be open for public inspection the last eight days before the election. (Two hours daily between 8 AM - 8 PM, Monday - Friday.) Show location and hours below:
Street Address (Do not use a Post Office Box Number) _____ Hours _____

8. Fair Campaign Practices: All committee officers are encouraged to subscribe to the Code of Fair Campaign Practices printed in campaign instruction booklets.

9. Signature and Certification. I certify that this statement is true, complete and correct to the best of my knowledge.
Committee treasurer's signature _____ Date _____

Need campaign finance forms and instructions for the reporting system selected?
Please check one of the following boxes:
 I already have forms and instructions.
 I will get forms and instructions from my county elections office.
 I want the Public Disclosure Commission to mail me the proper forms and instructions.

EMERGENCY

INSTRUCTIONS

Please consult PDC instruction manuals when completing this report. Reporting requirements are contained in and governed by chapters 42.17 RCW and 390-16 WAC.

- WHO MUST FILE** Persons, committees, organizations and groups that receive contributions and make expenditures in support of or opposition to: candidates in jurisdictions of 5,000 or more registered voters as of the last general election; statewide ballot issues; or local ballot issues in jurisdictions with 1,000 or more registered voters as of the last general election.
- WHEN TO FILE** Within 2 weeks of organizing a committee or first expecting to receive contributions or make expenditures, whichever occurs first. **(Committees that organize within three weeks of an election must file within three business days of forming or of expecting to receive contributions or make expenditures.)** File an amended C-1pc form within 10 days of significant changes to the registration information provided. Continuing political committees using Abbreviated Reporting must also file a C-1pc annually in January. Reports are considered filed as of the postmark date or date hand-delivered to PDC.
- WHERE TO FILE** Send the **original to PDC** at the above address. Send a **copy to the County Auditor** (County Elections Department) of the county in which the committee headquarters is located. If there is no headquarters, send to the County Auditor of the county in which the treasurer resides.
- REPORTING OPTIONS**
 - Abbreviated Reporting: May be used by committees that raise and spend no more than \$2,000 on their campaign activities. No more than \$200 may be accepted from any contributor. A 10th-of-the-month post primary, general or special election C-4 ABB report is required. Continuing committees re-register annually and file a year-end C-4 ABB by January 10 for any year in which they do not participate in an election.
 - Full Reporting: Required of all committees that do not qualify for Abbreviated Reporting. Frequent, detailed reports of contributions and expenditures are required until the committee is disbanded and the campaign account is closed.
- OTHER REPORTS**
 - C-3 (Cash Receipts Report): Used with Full Reporting only.
 - C-4 (Contribution and Expenditure Report): Used with Full Reporting only.
 - C-4 ABB (Receipts and Expenditures Summary): Filed by candidates and committees using Abbreviated Reporting.
 - Special Report E (Earmarked Contributions Report): Filed by committees that receive funds earmarked for use on behalf of a candidate or another political committee.
- FAIR CAMPAIGN PRACTICES CODE** This is a voluntary code adopted by PDC to stress the importance of ethical campaign practices. All committee members and supporters are encouraged to follow the Code's principles.

For assistance, call or write PDC!

COPY — County Elections Dept. (Auditor)
COPY — Your own records

EMERGENCY

INSTRUCTIONS

Please consult PDC instruction manuals when completing this report.
 Reporting requirements are contained in and governed by chapters 42.17 RCW and 390-16 WAC.

- WHO MUST FILE** Candidates who run for state or local office in jurisdictions that had 5,000 or more registered voters as of the last general election or in jurisdictions covering an entire county.
- WHEN TO FILE** Within 2 weeks of becoming a candidate (that is, receiving contributions, making expenditures, announcing candidacy, reserving space or filing for office, whichever occurs first). File an amended registration within 10 days of changes affecting accuracy of previously filed C-1. Report is considered filed as of postmark date or date hand-delivered to PDC.
- WHERE TO FILE** Send the **original to PDC** at the above address. Send a **copy to County Auditor** (County Elections Department) of the county in which the candidate resides.
- REPORTING OPTIONS**
 - Option I (MINI): May be used by candidates who raise and spend no more than \$500 on their campaigns (including personal funds), in addition to the filing fee amount. Limited to receiving \$200 or less from any contributor other than the candidate (who may give the entire \$500).
 - Option II (ABBREVIATED): May be used by candidates who raise and spend no more than \$2,000 on their campaigns (including personal funds). Filing fee costs count toward this limit. No more than \$200 may be accepted from any contributor other than the candidate.
 - Option III (FULL): Required of candidates who do not qualify for Mini or Abbreviated Reporting. Frequent, detailed reports of contributions and expenditures are required as long as the campaign account remains open.
- OTHER REPORTS**
 - F-1 (Financial Affairs Statement): Filed by candidates within 2 weeks of becoming a candidate, unless a previous F-1 filing has been made in the same calendar year.
 - C-3 (Cash Receipts Report): Used with Full Reporting only.
 - C-4 (Contribution and Expenditure Report): Used with Full Reporting only.
 - C-4 ABB (Receipts and Expenditures Summary): Filed by candidates using Abbreviated Reporting.
- FAIR CAMPAIGN PRACTICES CODE** This is a voluntary code adopted by PDC to stress the importance of ethical campaign practices. All candidates and campaign workers are encouraged to follow the Code's principles.

For assistance, call or write PDC!

|--|---|
| PDC FORM C3 <small>(3/93)</small> | CASH RECEIPTS AND MONETARY CONTRIBUTIONS |
|--|---|

INSTRUCTIONS

Please consult PDC instruction manuals when completing this report.

Reporting requirements are contained in and governed by chapters 42.17 RCW and 390-16 WAC.

GENERAL GUIDELINES

- 1) All contributions and miscellaneous receipts must be deposited into the campaign bank account. Complete a C-3 for each bank deposit. File the reports as described below.
- 2) Anonymous contributions (those for which you do not have the contributor's name and address) are limited to the larger of \$300 or 1% of the total contributions received to date for this election. Unidentified small contributions raised through qualifying fund raising events do not count toward the anonymous contribution limit.
- 3) A candidate's cash contributions to the campaign are reported on Form C-3. Loans from the candidate are reported on line 1c of the C-3 as well as Schedule L. Unreimbursed out-of-pocket expenditures are reported as in-kind contributions on Schedule B to the C-4. Reimbursed out-of-pocket expenditures are reported on Schedule A to the C-4.
- 4) Contributions of \$25 or less may be combined and the total amount reported on line 3e of the C-3. While the names and addresses of contributors giving \$25 or less need not be reported, treasurers must keep a private list of these small contributors and the amounts given. When the total donated by any of these contributors exceeds \$25, that person's name and address must be included on the relevant C-3 report.
- 5) During the 21 days before the general election, contributions from one source may not exceed \$50,000 to a state-wide candidate or \$5,000 to any other candidate or committee. These limits do not apply to contributions received from major WA State political parties.

WHO MUST FILE

Treasurer of each candidate and political committee using Full Reporting. No C-3s are filed with Mini and Abbreviated Reporting. C-3 reports may be signed by designated deputy treasurers.

FILING DATES

During the four months or more before the general or a special election (prior to July 1 for general elections), file C-3s each time a C-4 report is filed.

Within four months or less before the general or special election (beginning July 1 for general elections), file the C-3 on the same day the bank deposit is made. (Contributions are to be deposited within five business days of receipt.)

WHERE TO FILE

Send original C-3 reports, along with Schedule L's, if necessary, to PDC at the above address. Candidates send a duplicate copy to their County Auditor (County Elections Department). Political committees send a copy to County Auditor of the county in which their headquarters is located or, if no headquarters, the county in which their treasurer resides.

CONTRIBUTIONS OVER \$500

During the 7 days before the primary and the 21 days before the general election, candidates and committees must file special reports of each contribution received that exceeds \$500. The report discloses the amount of the contribution, the date received, the name and address of the donor as well as the name and address of the recipient.

If possible, a written report (C-3 form, telegram, mailgram, or nightletter) of these large contributions should be delivered to PDC within 48 hours (or the first working day after receipt). Otherwise, call PDC with the information required within the 48-hour or first working day timeframe and mail written confirmation of this telephone report within two days of receiving the contribution.

Any political committee, lobbyist or lobbyist employer who makes a contribution over \$500 during the 7 days before the primary or 21 days before the general election must notify PDC and the recipient of the contribution within 24 hours or the first working day after the contribution was made.

For assistance, call or write PDC!

EMERGENCY

Reporting requirements are contained in and governed by chapters 42.17 RCW and 390-16 WAC.
 Consult PDC instruction manuals when completing this report.

CONTRIBUTIONS OF \$100 OR MORE When an individual gives the campaign a total of \$100 or more in the aggregate, that person's employer must be identified by name, city, state and the person's occupation must also be disclosed. Once an individual gives at least \$100, occupation and employer information will appear on every report showing additional contributions from the individual.

For all candidates – when an individual gives \$100 or more since the beginning of the campaign, show occupation and employer information.

For Single Election Political Committees (e.g., ballot issue committees) – when an individual gives \$100 or more since the beginning of the campaign, show occupation and employer.

For Continuing Political Committees (e.g., party committees & PACs) – when an individual gives \$100 or more since the beginning of the calendar year, show occupation and employer.

PRIMARY/GENERAL ELECTION Candidates for legislative or state executive office must specify in Part 2 of the C-3 form whether a contribution is designated for the primary or the general election. If a contribution is for the primary election, put a "X" in the PRI box; if it counts toward the contributor's general election limit, put an "X" in the GEN box. If one check is used to make both a primary and a general election contribution, use two separate contributor blocks - one each for the primary and general donations. See instruction manual for example.

Local and judicial office candidates, political committees and continuing political committees - primary and general election designations not required; disregard these boxes.

AGGREGATE TOTAL The total put in the Aggregate Total column for each contributor will depend on who is filing the report. See below.

Legislative or State Executive Candidates: Show the total given for each election. If the contributor is giving a primary election contribution, the Aggregate Total figure is the total of that person's primary election contributions. If the GEN box is checked, the Aggregate Total is the contributor's general election total. (Only your campaign records and PDC's computer records will keep track of the grand total for both elections.)

Local and Judicial Candidates: Show the total given since the beginning of the campaign.

Political Committees Organized for One Election Only: Show the total given since the beginning of the campaign.

Continuing Political Committees: Show the total given since the beginning of the calendar year.

Instructions

Use this form as an attachment to your C3 (Cash Receipts and Bank Deposits).

Item No. description: As each item to be auctioned is received, assign it a number and a brief description.

Contributor: The person or organization which donates an article to be auctioned. If your committee purchases items for auction, state "purchased by committee" under contributor's name.

Buyer: The person who buys the item being auctioned.

Fair market value: The retail value of the article. If the retail value cannot be estimated or found, state "unknown."

Sale price: The amount the buyer paid for the item.

Amount over fair market value: The amount the sale price exceeds fair market value. If sale price is less than fair market value, leave blank.

Total given by this person during campaign:

Contributor—Fair market value of the item (substitute sale price, if lower) plus all previous contributions made to the candidate or committee.

Buyer—Amount over fair market value plus all previous contributions made to candidate or committee.

Cash payments: A payment of more than \$50.00 may not be accepted unless a receipt, signed by the buyer and the candidate, treasurer or deputy treasurer is prepared and made part of the committee's financial records.

AUCTION REPORT

Use this form as an attachment to C3 to report items donated and sold at auctions.

| Candidate or committee name JONES FOR SHERIFF COMMITTEE | | | | Date auction was held 9/14/XX | |

EMERGENCY

INSTRUCTIONS

Item No./Description: As each item to be auctioned is received, assign it a number and a brief description.

Contributor: The person or organization that donates an item or service to be auctioned. If the campaign purchases items for auction, state "purchased by committee" under contributor's name. If auction is held by state office candidate, designate which election (PRI or GEN) contribution is for. Contribution amount is fair market value of item or service and is subject to any applicable contribution limit. Adjust fair market value amount if sold for less than initial fair market value. See No. 2 below.

Buyer: The person who buys the item or service being auctioned. If auction is held by state office candidate, designate which election (PRI or GEN) buyer is giving to when purchase price exceeds fair market value amount.

Fair Market Value: The retail value of the article. Adjust if amount paid is less than fair market value. See No. 2 below.

Sale Price: The amount the buyer paid for the item or service.

Amount Over Fair Market Value: The amount the sale price exceeds fair market value. If sale price is less than or equal to the fair market value, leave blank. The amount paid in excess of fair market value is a contribution from the buyer and is subject to any applicable contribution limit.

Aggregate Total:

Contributor: Fair market value of the donation plus all previous contributions made during campaign (for state office candidates, all contributions made for election designated; for continuing political committees, all contributions made during calendar year).

Buyer: Amount over fair market value plus all previous contributions made during campaign (for state office candidates, all contributions made for election designated; for continuing political committees, all contributions made during calendar year).

Cash Payments: No cash payment of more than \$50 may be accepted unless a receipt, signed by the buyer and the candidate, treasurer or deputy treasurer, is prepared and made part of the campaign's financial records.

AUCTION REPORT

Use this form as an attachment to C3 to report items donated and sold at auctions.

INSTRUCTIONS:

The purpose of this report is to highlight receipt of an earmarked contribution. (That is, a contribution given to one candidate or political committee with the understanding, intent or instruction that it be used to benefit another candidate or committee.) This report is filed in addition to any other required reporting of the transaction.

A separate "Special Report E" is filed for each earmarked contribution received by any candidate or political committee.

File this report within two working days of receiving the earmarked contribution. Mail or deliver the original to PDC. Send a copy to the benefiting candidate or committee, also within two working days.

NOTE: Candidates or committees for whom the earmarked contribution is ultimately intended report the contribution when they actually receive it. Such candidates and committees will use form C-3 or Schedule B to the C-3 to show receipt of the contribution. See PDC instruction manual for examples and more information.

File this report within two working days of receiving the earmarked contribution. Mail or deliver the original to PDC. Send a copy to the benefiting candidate or committee, also within two working days.

NOTE: Candidates for legislative and statewide executive office are subject to state contribution limits. Earmarked contributions count toward the applicable limit and are attributed to the original source of the contribution (unless another person controlled the choice of recipient). It's a violation for anyone to accept a contribution in excess of the relevant limit. Verify with the campaign of a legislative or statewide office candidate before accepting a contribution earmarked for the benefit of such a candidate.

|--------------------------------|--|

INSTRUCTIONS

Please consult PDC instruction manuals when completing this report.
 Reporting requirements are contained in and governed by chapters 42.17 RCW and 390-16 WAC.

- WHO MUST FILE** Each candidate and political committee using Full Reporting.
- FILING DATES**
- 1) File with C-1 (Registration) if you received contributions or made expenditures before registering.
 - 2) File on the 10th of each month if contributions or expenditures were over \$200 since last C-4 was filed. (Note: These 10th-of-the-month reports are not required if another C-4 must be filed during that month. See #3 below.)
 - 3) For each primary, general and special election in which the candidate or political committee makes an expenditure, file
 - ◆ 20 days prior to the election
 - ◆ 7 days prior to the election
 - ◆ 10th of the first month after the election*

(*Not required after primary from candidates who will be in the general election or from continuing political committees.)
 - 4) File final report when campaign is finished or committee closes operation. Often, this coincides with the primary or general post-election, 10th-of-the-month report.
- All reports are considered filed as of the postmark date or the date hand-delivered to PDC.
- SCHEDULES AND ATTACHMENTS**
- State executive and legislative candidates will file Schedules A-s/l, B-s/l, C and L, as appropriate, along with the C-4.
- Judicial and local office candidates and all political committees will file Schedules A, B, C and L, as appropriate, along with their C-4 reports.
- All candidates and committees must attach any C-4 reports that were due but not filed.
- WHERE TO SEND REPORTS**
- Send original C-4 reports along with any attachments to PDC at the above address. Candidates send a duplicate copy to their County Auditor (County Elections Department). Political committees send a copy to County Auditor of the county in which their headquarters is located or, if no headquarters, the county in which their treasurer resides.
- OTHER REPORTS**
- C-3 (Cash receipts Report): Used with Full Reporting only.
- C-4 (Contribution and Expenditure Report): Used with Full Reporting only.
- C-4 ABB (Receipts and Expenditures Summary): Filed by candidates using Abbreviated Reporting.
- Special Report E (Earmarked Contributions Report): Filed by committees that receive funds earmarked for use on behalf of another candidate or committee.

For assistance, call or write PDC!

Political committees send a copy to County Auditor of the county in which their headquarters is located or, if no headquarters, the county in which their treasurer resides.

(Candidates for city offices, city ballot issue committees and other political committees who give to city candidates or ballot issue committees check with City Clerk regarding any local filing requirement.)

EMERGENCY

EXPENDITURE CODE DEFINITIONS AND USES

- C MONETARY, IN-KIND AND EARMARKED CONTRIBUTIONS** (including transfers) your campaign makes to other candidates and committees. Put a "C" in the Code column, in the Description column specify who was benefited and, if in kind, what was purchased.
- I INDEPENDENT EXPENDITURES** (those expenditures that benefit other candidates or committees but are made independently of them). Put an "I" in the Code column and fully describe purpose.
- L LITERATURE**. Use "L" for expenditures made for the preparation and production of campaign literature and printed solicitations, including expenditures for mailing lists, design, photography, copy, layout, printing and reproduction. Use "P" for literature mailing costs.
- B BROADCAST ADVERTISING**. Use "B" for expenditures associated with the production and purchase of radio and television advertising.
- N NEWSPAPER & PERIODICAL ADVERTISING**. Use "N" for expenditures associated with the production and purchase of advertising in newspapers, periodicals and other publications.
- O OTHER ADVERTISING**. Use "O" for expenditures associated with the production and purchase of advertising on billboards, yard signs and campaign paraphernalia such as buttons, bumper stickers, T-shirts, etc.
- P POSTAGE**. Use "P" for expenditures for stamps, postage, United Parcel Service, Federal Express and direct mail services (postage only). Use "L" for design and other production costs associated with producing campaign literature.
- F FUNDRAISING EVENTS**. Use "F" for expenditures associated with holding a fundraiser, including payments to restaurants, hotels, caterers, other food and refreshment vendors, entertainers and speakers. Use "L" for expenditures for printed matter produced in connection with fundraising events.
- S SURVEYS AND POLLS**. Use "S" for expenditures associated with designing or producing polls, reports on election trends, voter surveys, telemarketing, telephone banks, GOTV drives, etc.
- T TRAVEL, ACCOMMODATIONS, MEALS**. Use "T" for expenditures associated with travel. If vendor has been paid directly, identify the traveller in Description column. If travel payment was made to credit card company or traveller (for out-of-pocket expenses), itemize expenses on separate sheet and attach to Schedule A.
- M MANAGEMENT AND CONSULTING SERVICES**. Use "M" for salaries, fees and commissions paid to campaign management companies and contract consultants, including law firms, whether the person is retained or formally employed by the campaign (for tax withholding purposes).
- W WAGES, SALARIES, BENEFITS**. Use "W" for expenditures associated with hiring campaign employees and other freelance workers who provide miscellaneous services other than campaign management or consulting.
- G GENERAL OPERATION AND OVERHEAD**. Use "G" for general campaign operating expenses and overhead, including filing fees, miscellaneous campaign expenses, headquarters rental, utilities, and purchase or rental of office equipment and furniture for the campaign.

EXPENDITURE CODE DEFINITIONS AND USES

(for use on Schedule A and Schedule B, Item 3)

- C MONETARY, IN-KIND AND EARMARKED CONTRIBUTIONS** your campaign legally makes to other campaigns. Put a "C" in the Code column, in the Description column specify who was benefited and, if in-kind, what was purchased.
- I INDEPENDENT EXPENDITURES** (those expenditures that benefit other candidates or committees but are made independently of them). Put an "I" in the Code column and fully describe purpose.
- L LITERATURE**. Use "L" for expenditures made for the preparation and production of campaign literature and printed solicitations, including expenditures for mailing lists, design, photography, copy, layout, printing and reproduction. Use "P" for literature mailing costs.
- B BROADCAST ADVERTISING**. Use "B" for expenditures associated with the production and purchase of radio and television advertising.
- N NEWSPAPER & PERIODICAL ADVERTISING**. Use "N" for expenditures associated with the production and purchase of advertising in newspapers, periodicals and other publications.
- O OTHER ADVERTISING**. Use "O" for expenditures associated with the production and purchase of advertising on billboards, yard signs and campaign paraphernalia such as buttons, bumper stickers, T-shirts, etc.
- V VOTER SIGNATURE GATHERING**. Use "V" for expenditures made directly or indirectly to compensate a person or entity for soliciting or procuring signatures on a statewide initiative or referendum petition. Attach itemization of each such payment.
- P POSTAGE**. Use "P" for expenditures for stamps, postage, United Parcel Service, Federal Express and direct mail services (postage only). Use "L" for design and other production costs associated with producing campaign literature.
- F FUNDRAISING EVENTS**. Use "F" for expenditures associated with holding a fundraiser, including payments to restaurants, hotels, caterers, other food and refreshment vendors, entertainers and speakers. Use "L" for expenditures for printed matter produced in connection with fundraising events.
- S SURVEYS AND POLLS**. Use "S" for expenditures associated with designing or producing polls, reports on election trends, voter surveys, telemarketing, telephone banks, GOTV drives, etc.
- T TRAVEL, ACCOMMODATIONS, MEALS**. Use "T" for expenditures associated with travel. If vendor has been paid directly, identify the traveller in Description column. If travel payment was made to credit card company or traveller (for out-of-pocket expenses), itemize expenses on separate sheet and attach to Schedule A.
- M MANAGEMENT AND CONSULTING SERVICES**. Use "M" for salaries, fees and commissions paid to campaign management companies and contract consultants, including law firms, whether the person is retained or formally employed by the campaign (for tax withholding purposes).
- W WAGES, SALARIES, BENEFITS**. Use "W" for expenditures associated with hiring campaign employees and other freelance workers who provide miscellaneous services other than campaign management or consulting.
- G GENERAL OPERATION AND OVERHEAD**. Use "G" for general campaign operating expenses and overhead, including filing fees, miscellaneous campaign expenses, headquarters rental, utilities, and purchase or rental of office equipment and furniture for the campaign.

INSTRUCTIONS

Please consult PDC instruction manuals when completing this schedule.
 Reporting requirements are contained in and governed by chapters 42.17 RCW and 390-16 WAC.

WHO MUST FILE Each candidate and political committee using full reporting that receives one or more campaign loans.

FILING DATES When a loan is received by the campaign, complete Part 1 and file the Schedule L with the C-3 report that corresponds with the loan's deposit into the account. Use a separate schedule for each loan received.

When a loan is paid or forgiven, in whole or in part, complete Part 2 and/or Part 3 and file the Schedule L with the C-4 covering the period when the payment or forgiveness occurred.

When one or more loans remain unpaid, complete Part 4 and file the schedule with each C-4 report until all loans are repaid in full or forgiven. (The same schedule may be used to show loan payments, forgiveness information and to show which loans remain unpaid.)

If travel payment was made to credit card company or traveller (for out-of-pocket expenses), itemize expenses on separate sheet and attach to Sch. A-s/l.

"M" MANAGEMENT AND CONSULTING SERVICES. Use "M" for salaries, fees and commissions paid to campaign management companies and contract consultants, including law firms, whether the person is retained or formally employed by the campaign (for tax withholding purposes).

"W" WAGES, SALARIES, BENEFITS. Use "W" for expenditures associated with hiring campaign employees and other freelance workers who provide miscellaneous services other than campaign management or consulting.

"G" GENERAL OPERATION AND OVERHEAD. Use "G" for general campaign operating expenses and overhead, including filing fees, miscellaneous campaign expenses, headquarters rental, utilities, and purchase or rental of office equipment and furniture. (Note: these are campaign-related expenses, not costs associated with holding public office.)

INSTRUCTIONS

Please consult PDC instruction manuals when completing this report. Reporting requirements are contained in and governed by chapters 42.17 RCW and 390-16 WAC.

WHO MUST FILE Each candidate and political committee using Abbreviated Reporting.

FILING DATES

- 1) Special election candidates and political committees supporting or opposing special election candidates or ballot issues file on the 10th of the month following the election.
- 2) Candidates who lose in the primary and political committees supporting or opposing primary election ballot issues file on October 10.
- 3) Candidates who are in the general election and political committees making expenditures supporting or opposing general election candidates or ballot measures file on December 10.
- 4) Continuing political committees not taking part in elections during a year file annual reports on January 10 cover the preceding calendar year.
- 5) A final report is filed whenever a candidate's committee or a political committee ceases operation, disposes of any surplus campaign funds and has a zero account balance. Final reports may be filed at any time and may coincide with one of the due dates listed above.

All reports are considered filed as of the postmark date or the date hand-delivered to PDC.

WHERE TO FILE

Send original C-4 ABB report to PDC at the above address. Candidates send a duplicate copy to their County Auditor (County Elections Department). Political committees send a copy to County Auditor of the county in which their headquarters is located or, if no headquarters, the county in which their treasurer resides.

For assistance, call or write PDC!

(Statutory reference: RCW 42.17.090 (1)(K))

WHO MUST REPORT

A political committee not domiciled in the State of Washington, a federal committee or other committee not required to register under Washington law, which has made contributions to a state or local candidate political committee in Washington state.

Signature of committee official

Name

Title Date

WHEN TO REPORT

A C-5 report is due within ten days of a Washington state candidate or political committee receiving a contribution of more than \$50 from an out-of-state or federal PAC. After filing an initial C-5 report, subsequent reports during the same calendar year may be filed by letter updating or amending the information previously reported. These follow-up reports are also due within ten days of contributions's receipt.

SEND REPORT TO

Public Disclosure Commission

VIOLATIONS AND PENALTIES

- Candidates for legislative office have a contribution limit of \$500 per election. Candidates for statewide executive office have a limit of \$1,000 per election. Each primary and general is a separate election.
- It is a violation of law for any person to make, or for any political committee or any local or judicial candidate to accept from any one person, contributions in the aggregate exceeding \$5,000 within 21 days of a general election
- Failure to report contributions and file the information required by this report within 10 days after the Washington candidate or committee receives the funds will cause the funds to be returned or forfeited to the state.

EMERGENCY

Reviser's note: The bracketed material preceding the section above was supplied by the code reviser's office.

WSR 94-01-041
EMERGENCY RULES
UTILITIES AND TRANSPORTATION
COMMISSION

[Order R-403, Docket No. TV-930886—Filed December 6, 1993, 4:42 p.m.]

In the matter of amending WAC 480-12-030, 480-12-126, 480-12-127, 480-12-130, 480-12-135, and 480-12-350 and adopting WAC 480-12-131 relating to compliance with base state registration requirements.

This is an emergency rulemaking proceeding that is designed to amend and adopt rules immediately.

The Washington Utilities and Transportation Commission is conducting this rulemaking pursuant to RCW 80.01.040 and 34.05.350. This proceeding complies with the Open Public Meetings Act (chapter 42.30 RCW), the Administrative Procedure Act (chapter 34.05 RCW), the State Register Act (chapter 34.08 RCW), the State Environmental Policy Act (chapter 43.21C RCW), and the Regulatory Fairness Act (chapter 19.85 RCW).

The facts requiring emergency action are as follows: The federal Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA), codified at 49 USC Sec. 11506, has been enacted, and the Interstate Commerce Commission has promulgated rules under the act. Together, the laws and rules require termination of existing Washington state regulation of interstate motor carrier activity, and state requirements for states who wish to register interstate carriers for activity occurring after January 1, 1994.

The commission promulgated emergency rules in Docket No. TV-930886, August 1993, by which it began allowing registration for interstate activity to be conducted during 1994, and on November 3, 1993, filed rules with the code reviser to take effect January 1, 1994, to implement the program on a permanent basis. However, because existing interstate regulation must continue until December 31, 1993, because registration must be allowed to continue for activity to be conducted after January 1, 1994, and because the existing emergency rules permitting such registration for activity to be conducted after January 1, expire 120 days after filing, emergency rules are again needed to fill the gap.

The amendment to WAC 480-12-030 operates to amend the permanent rule filed on November 3, 1993, and effective on December 4, 1993. The amendment applies to preserve existing provisions of law for interstate activities conducted prior to January 1, 1994. The remaining emergency amendments apply only to registration occurring before January 1, 1994, for interstate operations to be conducted on or after that date. They preserve the existing regulations for operations conducted prior to that time.

The Washington Utilities and Transportation Commission finds that an emergency exists. It finds that the provisions of federal law and regulation, and the provisions of Washington state law, require immediate action to preserve existing interstate registration systems for interstate activity to be conducted before January 1, 1994, and for activity to be conducted on or after that date.

These amendments adversely affect no economic values, and they have no adverse effect on the environment.

In reviewing the entire record, the commission determines that it should amend WAC 480-12-030, 480-12-126, 480-12-127, 480-12-130, 480-12-135, and 480-12-350 and that it should adopt WAC 480-12-131 to read as set forth in Appendix A, shown below and included in it by this reference, to be effective as follows: These emergency rules shall be effective on December 4, 1993, and shall cease to be effective at midnight on December 31, 1993.

ORDER

THE COMMISSION ORDERS That WAC 480-12-030, 480-12-126, 480-12-127, 480-12-130, 480-12-135, and 480-12-350 are amended and WAC 480-12-131 is adopted as set forth in Appendix A, shown below, to take effect immediately and shall cease to be effective at midnight, December 31, 1993, pursuant to RCW 34.05.350 and 34.05.380(2).

THE COMMISSION ALSO ORDERS That this order and the rules set out in Appendix A to this order, after being first recorded in the order register of the Washington Utilities and Transportation Commission, shall be forwarded to the code reviser for filing pursuant to chapter 34.05 RCW and chapter 1-21 WAC.

DATED at Olympia, Washington, and effective this 6th day of December 1993.

Washington Utilities and Transportation Commission
Sharon L. Nelson, Chairman
Richard Hemstad, Commissioner

APPENDIX A

[**AMENDATORY SECTION** (Amending Order R-398, Docket No. A-930791, filed 11/3/93)]

WAC 480-12-030 Applications. (1) Intrastate authority. Applications to acquire temporary or permanent common or contract motor carrier authority by transfer, by acquisition of control, or by demonstration of need and/or public interest shall be made on forms furnished by the commission and shall contain all the information, documents, and exhibits called for in the form or the form's instructions. No application will be accepted for filing unless it is accompanied by the required fee. The fee for applications seeking original or extended permanent authority, or the transfer or acquisition of existing authority, shall be five hundred fifty dollars; it shall be two hundred fifty dollars for applications for temporary authority, two hundred fifty dollars for applications for reinstatement of permits under WAC 480-12-065 if filed within thirty days after cancellation, fifty dollars for applications for emergency temporary authority, and thirty-five dollars for applications for change of corporate name. The commission may refuse to accept applications until all required information is supplied and until the authority sought to be acquired or retained has been expressed in clear and acceptable permit terminology. The commission's acceptance of an application for filing does not indicate the commission's approval of proposed permit language or requested effect of the application, nor is the commission thereafter foreclosed from finding that the

information presented in the application is insufficient. An applicant for partial transfer must also submit a proposed revision of the retained portion of the permit complying with WAC 480-12-050(5), which will be docketed with the transfer application.

(2) Interstate authority. ~~((Each carrier operating in interstate commerce on the public roads of the state of Washington shall apply to register its insurance with the commission pursuant to WAC 480-12-126 through 480-12-135. Every such application shall be granted if it contains all necessary information and documentation, if the information provided is true and correct, and if the required fee is paid.))~~ Applications to register ICC operating authority with the commission shall be accompanied by the fee of twenty-five dollars for motor carriers who have not previously filed currently effective applications for such registration and the fee of ten dollars for motor carriers who have previously filed currently effective applications for such registration.

(3) All exhibits or papers submitted with an application must be legibly written or typed on one side only of 8 1/2 by 11 inch paper.

(4) Applications for permits and for registration shall require that the applicant certify the truth of all information submitted with the application, under penalties of perjury. False, misleading, or incomplete information may subject the applicant to prosecution, to civil penalties, or to revocation or suspension of authority.

(5) This amendatory section shall apply only with regard to interstate operations that are or are to be, conducted on or before December 31, 1993. The existing rule shall apply to intrastate operations and to interstate operations to be conducted on or after January 1, 1994.

Reviser's note: The bracketed material preceding the section above was supplied by the code reviser's office.

AMENDATORY SECTION (Amending Order R-50, filed 8/8/73)

WAC 480-12-126 ((Registration of interstate authority.)) Interstate operations; requirements; definitions. It shall be unlawful for any carrier to perform ~~((a))~~ any interstate transportation service for compensation upon the public ~~((highways))~~ roads of this state without first having secured appropriate authority from the Interstate Commerce Commission, if ~~((such))~~ that authority is required, and without ~~((first having registered such authority, if any, with the commission.~~

~~It shall also be unlawful for a carrier to perform a transportation service for compensation on the public highways of this state as an interstate carrier of commodities included in the exemptions provided in section 203(b) of the Interstate Commerce Act without having first registered as such a carrier with the commission.~~

~~Such registration shall be granted upon application, without hearing, upon payment of the appropriate filing fee, as set by WAC 480-12-030))~~ possessing valid insurance and valid evidence that it has registered as specified in these rules.

(1) Registered carriers. Carriers operating in interstate or foreign commerce under authority issued by the Interstate Commerce Commission are "registered carriers."

(2) Registered exempt carriers. Carriers operating in interstate or foreign commerce under the exemptions of the Federal Motor Carrier Act without interstate authority issued by the Interstate Commerce Commission are "registered exempt carriers."

(3) Compliance required. Registered and registered exempt carriers in the conduct of interstate operations must comply with the laws and rules that apply to that activity and to equipment in which it is conducted. Interstate carriers conducting Washington intrastate operations must, as to the intrastate activity, comply with the laws and rules applicable to the activity and to equipment in which it is conducted.

(4) Trip permits. A carrier operating in interstate commerce on the public roads of this state but who has not registered the vehicle's insurance with Washington through its base state, if required to do so, or with the commission, if operating under interstate exemption, must secure a trip permit for each interstate trip as provided in WAC 480-12-131.

(5) This amendatory section shall apply only with regard to interstate operations that are, or are to be, conducted on or after January 1, 1994. WAC 480-12-126 as in effect prior to this amendment shall apply to intrastate operations and to interstate operations to be conducted on or before December 31, 1993.

Reviser's note: RCW 34.05.395 requires the use of underlining and deletion marks to indicate amendments to existing rules. The rule published above varies from its predecessor in certain respects not indicated by the use of these markings.

AMENDATORY SECTION (Amending Order R-276, Cause No. TV-2092, filed 9/17/87)

WAC 480-12-127 Registered carriers. ((1)) ~~Carriers engaged exclusively in interstate or foreign commerce are declared to be registered carriers. Those operating under authority issued by the Interstate Commerce Commission shall have their registration number prefixed by "RC." Those operating under the exemptions of the Federal Motor Carrier Act shall be prefixed "RE." Those presently holding permits with the Washington utilities and transportation commission shall be automatically converted to registered carriers with the same registration number as under their present permit. Registered carriers need only comply with such rules and regulations as specifically refer to them or to equipment operated exclusively in interstate commerce across or between points in the state and points outside of the state.~~

~~(2) By reference, the Washington utilities and transportation commission hereby adopts the rules promulgated by the National Association of Regulatory Utility Commissioners and adopted by the Interstate Commerce Commission under PL 89-170 and codified as Part 1023 of Title 49 of the Code of Federal Regulations. Notwithstanding the provisions of any rule herein contained, carriers who qualify may elect to operate in strict accordance with such rules.~~

~~(3) "RC" carriers may meet insurance requirements by filing with the Washington utilities and transportation commission a copy of their insurance filing with the Interstate Commerce Commission. "RE" carriers must meet the same insurance requirements as for permit holders as~~

required by WAC 480-12-350, 480-12-355, 480-12-360 and 480-12-365-)) (1) It shall be unlawful for a carrier operating under authority issued by the Interstate Commerce Commission to operate a vehicle in interstate commerce on the public roads of this state without having first secured valid insurance as required by the Interstate Commerce Commission, registered with a base state as required in 49 CFR Part 1023, paid the required Washington state registration fee for that vehicle, and without having in the vehicle a legible receipt showing base state registration. The receipt shall be subject to inspection at all times by the law enforcement agents and the commission's representatives. In the alternative, the carrier shall first purchase a valid trip permit as provided in WAC 480-12-131.

(2) The registration fee for registered carriers in Washington state is ten dollars for each vehicle operated within the state.

(3) Washington-based carriers. Washington is a participant in the base state insurance registration program established in 49 USC § 11506 and 49 CFR Part 1023. Any carrier whose base state as defined in federal regulation is Washington state shall register for interstate operations as follows:

(a) Between August 1 and November 30 of each year, each such Washington-based interstate carrier shall apply to the commission to register for the following year.

(b) The registering carrier shall state the number of vehicles to be operated in each participating state, provide other required information, and submit the registration fee established by that state for each such vehicle.

(c) The commission within thirty days will provide to the carrier a receipt or receipts showing, at a minimum, the carrier's name and address, its ICC permit number, and the names of the states for which it has registered.

(d) The carrier shall place a receipt or an authorized copy in each vehicle for which it has paid the required fee.

(e) Any Washington-based carrier that begins interstate operations in a state for which it has not registered may register for that state at any time, stating the number of vehicles to be operated in each state and submitting the required information and registration fee for each vehicle. The commission will provide a new receipt, if the carrier has not previously registered, or supplemental receipt, if it has registered, showing the states for which the carrier has registered.

(4) No carrier may operate a vehicle in Washington state that is not registered as specified in this rule unless it is registered for interstate exempt traffic under WAC 480-12-130 or unless it is operated under a trip permit as provided in WAC 480-12-131.

(5) This amendatory section shall apply only with regard to interstate operations that are, or are to be, conducted on or after January 1, 1994. WAC 480-12-127 as in effect prior to this amendment shall apply to intrastate operations and to interstate operations to be conducted on or before December 31, 1993.

AMENDATORY SECTION (Amending Order R-348, Docket No. TV-910903, filed 9/17/91, effective 10/18/91)

~~WAC 480-12-130 ((Identification cards—Amendment—Substitution.)) Interstate exempt carriers. ((1) No vehicle or combination of vehicles operated by a common or contract carrier or registered carrier upon the highways of this state or the streets of regulated cities shall be so operated without having available within the cab of the motive power vehicle a valid identification cab card properly signed and with appropriate stamp affixed. Such identification card shall be subject to inspection by the commission's representatives at all times.~~

(2) An application for sufficient number of identification stamps shall be filed with the commission, accompanied by the necessary stamp and regulatory fee, during the month of October each year, or at any time thereafter that additional stamps are required. Such application shall be on forms furnished by the commission. Except as provided in subsection (3) of this section, the schedule of stamp and maximum regulatory fees is as follows:

| GROSS LICENSED WEIGHT | STAMP FEE | REGULATORY FEE |
|-----------------------|-----------|----------------|
| Less than 4,000 lbs. | \$10.00 | \$ 7.00 |
| 4,000 to 7,999 lbs. | 10.00 | 9.00 |
| 8,000 to 11,999 lbs. | 10.00 | 11.00 |
| 12,000 to 15,999 lbs. | 10.00 | 13.00 |
| 16,000 to 19,999 lbs. | 10.00 | 15.00 |
| 20,000 to 23,999 lbs. | 10.00 | 17.00 |
| 24,000 to 27,999 lbs. | 10.00 | 19.00 |
| 28,000 to 31,999 lbs. | 10.00 | 21.00 |
| 32,000 to 35,999 lbs. | 10.00 | 23.00 |
| 36,000 to 39,999 lbs. | 10.00 | 30.00 |
| 40,000 to 43,999 lbs. | 10.00 | 32.00 |
| 44,000 to 47,999 lbs. | 10.00 | 34.00 |
| 48,000 to 51,999 lbs. | 10.00 | 36.00 |
| 52,000 to 55,999 lbs. | 10.00 | 38.00 |
| 56,000 to 59,999 lbs. | 10.00 | 40.00 |
| 60,000 to 63,999 lbs. | 10.00 | 42.00 |
| 64,000 to 67,999 lbs. | 10.00 | 44.00 |
| 68,000 to 71,999 lbs. | 10.00 | 46.00 |
| 72,000 to 75,999 lbs. | 10.00 | 48.00 |

Note: The above regulatory fees are maximum only. Under RCW 81.80.320 the commission may, by general order entered before October 1 of any year, reduce the fees on a proportional basis.

(3) The stamp fee named in subsection (2) applies to each stamp applied for. The regulatory fee is also payable in connection with each stamp and is determined as follows:

(a) On any "solo" vehicle, or in combinations pulling any trailer operated either in intrastate or interstate commerce, the regulatory fee shall be as stated in subsection (2) and shall be based upon the maximum gross weight thereof as set by the carrier in his application for his regular license plates plus any additional tonnage or log tolerance permits. In the event that trailers or semitrailers are separately licensed for gross weight and not included within the licensed gross weight of the motive power unit, the fees provided herein shall be computed on the basis of the licensed gross weight of the trailers, plus additional weight fees if any, in which case a separate identification cab card

EMERGENCY

will be issued for such trailers in the same manner as for a motive power vehicle.

(b) In lieu of the payment of a full regulatory fee for each vehicle or combination of vehicles operated across or between points in the state and points outside the state exclusively in interstate or foreign commerce, and as to vehicles operated between points in this state and points outside the state in interstate commerce as well as points within this state in intrastate commerce, the regulatory fee may, at the request of the carrier, be paid on the basis of one of the following options:

Option 1. Floater regulatory fee cards.

Carriers who operate vehicles between points in this state and points outside this state exclusively in interstate commerce, and carriers who operate fleets in excess of 200 motive power units between points in this state and points outside this state in interstate commerce as well as points within this state in intrastate commerce may elect to purchase unassigned regulatory fee receipts at one hundred fifty percent of the applicable gross weight fee stated in subsection (2). One of these regulatory fee receipts must be carried within the cab of the motive power vehicle when such equipment is operated in this state and must be accompanied by a properly executed National Association of Regulatory Utility Commissioners uniform identification cab card and Washington utilities and transportation commission identification stamp. When applied for in this manner the fee must be that for the highest gross licensed weight of such solo or combination with which the receipt showing the payment of regulatory fees may be used.

The carrier must purchase for three dollars an identification stamp for each power unit.

In the case of unladen automobiles and trucks operated in interstate driveaway service across or between points in the state and points outside the state, the carrier may use unassigned National Association of Regulatory Utility Commissioners uniform identification cab cards and Washington utilities and transportation commission identification stamps upon payment of one hundred fifty percent of the applicable gross weight fee and the three dollar stamp fee for each unassigned cab card and stamp.

Option 2. Lump sum regulatory fee payment.

Carriers who operate fleets in excess of 200 motive power vehicles either exclusively in interstate or foreign commerce across or between points in this state and points outside this state or between points in this state and points outside this state in interstate commerce as well as points within this state in intrastate commerce, and who have so operated under Option 1, above, or this option for the immediately preceding calendar year, may elect to pay a lump sum regulatory fee based on the number of power units for which identification stamps have been purchased during the immediately preceding calendar year at the regulatory fee established by general order of the commission entered before October 1st of any year. These carriers must purchase a three dollar identification stamp for each power unit. With a properly executed National Association of Regulatory Utility Commissioners uniform identification cab card and Washington utilities and transportation commission identification stamp attached, no proof of regulatory fee payment need be carried.

Option 3. Single trip transit permit.

Carriers engaged exclusively in casual or occasional interstate or foreign commerce across or between points in the state and points outside the state may as in alternative to all other requirements of this chapter obtain a single trip transit permit, valid for ten days, authorizing a one way trip into, out of or across the state. This permit will be issued upon payment of a fee of ten dollars and must be carried in the cab of the power vehicle. The carrier must state the name and policy number or binder of the insurance company with whom the carrier has insurance which meets the provisions of WAC 480-12-350.

Option 4. Single trip regulatory fee card.

A carrier registered with the Washington utilities and transportation commission to engage in interstate or foreign commerce across or between points in this state and points outside of this state, may purchase single trip regulatory fee cards, valid for seventy two hours, authorizing a trip into, out of or across this state, for a fee of ten dollars each.

Prenumbered single trip regulatory fee cards must be purchased at any commission office or port of entry, or from an authorized commission field agent. The card must be carried in the power unit.

(e) In intrastate or interstate commerce between points within the state of Washington the identification cab card and stamp may, at the request of the carrier, not be assigned to any particular motive power vehicle under the following circumstances:

(i) In connection with trucks or tractors to be operated under master leasing agreements provided for in WAC 480-12-210 (1)(h), in which case the cab card may be used only with vehicles operated under such master leasing agreements; and

(ii) In connection with unladen automobiles or trucks in driveaway service, in which case the cab card may be used only with such vehicles in driveaway service. The fees shall be as stated in subsection (3)(a) for the highest gross licensed weight (highest actual weight in driveaway service) on any power vehicle with which the identification cab card and stamp may be used.

(d) In intrastate commerce between points within the state of Washington, a common or contract carrier acquiring the use of private carrier equipment under the provisions of WAC 480-12-210 (1)(e) may, in connection with short term leases, elect to purchase single trip regulatory fee cards, valid for seventy two hours, authorizing a one way trip between points within this state, for a fee of ten dollars each, in lieu of payment of the full regulatory fee.

Prenumbered single trip regulatory fee cards must be purchased in advance and no refunds will be allowed for unused cards. Cards must be filled out, in ink or by typewriter, by the carrier, showing the description of the vehicle, license number, state in which the vehicle is licensed, name of owner, the commodity to be transported, the origin and destination of the shipment and be signed by an officer, agent or employee of the carrier authorized to use the card. The card must be carried in the power unit. The vehicle operating under a single trip regulatory fee card shall be under the control and direction of the motor carrier issuing the card and shall be used only within the scope of the authority of that motor carrier.

At the end of each calendar month a report shall be sent to the commission, showing the card number, date used, origin of shipment, destination of shipment and vehicle number.

(4) On any truck or tractor for which the licensed capacity is increased during the year an IMMEDIATE APPLICATION accompanied by the amount of the increase in regulatory fee is necessary. The commission will provide for amendment of the cab card accordingly.

(5) No refund will be made on unused stamps.

(6) Any "lost" stamps will be replaced only at full stamp and regulatory fee. *Provided, however,* That in unusual circumstances the commission may, by order, waive all or a portion of the replacement cost.

(7) Each carrier shall obtain from the Washington utilities and transportation commission or from the National Association of Regulatory Utility Commissioners a sufficient number of blank identification cab cards to satisfy its requirements. Equipment which is used exclusively within the state, i.e., does not cross the state line, shall use the Washington utilities and transportation commission prescribed identification cab card. Equipment which is used exclusively in interstate or foreign commerce which crosses the state line shall use the National Association of Regulatory Utility Commissioners uniform identification cab card. Equipment used in both types of operation may use either cab card, however it is recommended that the National Association of Regulatory Utility Commissioners uniform identification cab card be used. Upon receipt of stamps from the commission, an identification cab card shall be duly completed by the carrier for each motive power unit and the appropriate stamp firmly affixed thereto. Such identification cab card shall be placed in the cab of each power unit in accordance with subsection (1).

(8) All identification cab cards and stamps issued for a particular calendar year expire January 31 of each succeeding year. However a stamp may be issued for the ensuing calendar year on or after the first day of October preceding, and may be used from the date of issue.

(9) When a permit is revised or extended, the commission will provide a new copy of the revised or extended authority to be retained on the carrier's vehicle(s), in addition to the cab card.

(10) All delinquent stamp fees, regulatory fees, tariff fees and tariff maintenance fees which are due and payable by the carrier to the commission must be paid at the time application is made. The commission may refuse to issue identification stamps until all such fees are paid.

(11) An identification cab card may be reassigned to a substituted vehicle (power unit) only when the original vehicle has been destroyed or is being permanently withdrawn from the ownership or possession of the permittee.)

(1) No carrier may operate any vehicle or combination of vehicles upon the public roads of this state in interstate commerce under the exemptions of the Federal Motor Carrier Act without first registering with the commission and having available within the cab of the motive power vehicle a valid receipt showing that the carrier has provided Washington state with proof of insurance and paid the per-vehicle fee established by order of the commission. The receipt shall be subject to inspection by law enforcement agents and the commission's representatives at all times. In the

alternative, the carrier shall first purchase a valid trip permit as provided in WAC 480-12-131.

(2) Each carrier conducting interstate exempt operations in interstate commerce within the state may apply to register its insurance between August 1 and November 30 of each year, or at any time thereafter when it begins interstate exempt operations within the state or when it identifies additional vehicles as operating in the state. Each application shall be on forms furnished by the commission and accompanied by the required fee.

(3) All receipts issued for a calendar year expire December 31 of that year. A receipt may be issued for the ensuing calendar year on or after the first day of the preceding August.

(4) All delinquent fees or penalties which are due and payable by the carrier to the commission must be paid at the time an application is made. The commission may refuse to issue a receipt until all such fees are paid.

(5) This amendatory section shall apply only with regard to interstate operations that are, or are to be, conducted on or after January 1, 1994. WAC 480-12-130 as in effect prior to this amendment shall apply to intrastate operations and to interstate operations to be conducted on or before December 31, 1993.

NEW SECTION

WAC 480-12-131 Interstate trip permits. Single trip transit permit. A carrier conducting casual or occasional interstate or foreign commerce on the public roads of Washington state may as an alternative to other interstate carrier registration requirements obtain a single trip transit permit, valid for ten days, authorizing a one-way trip into, within, out of or across the state.

(1) Application. The carrier must present evidence that the carrier has insurance that meets the requirements of WAC 480-12-350 and provide the name and policy number or binder of the insurance company. The carrier shall also provide a description of the vehicle, its license number, the state in which the vehicle is licensed, the name of its owner, the cargo, and the origin and destination of the shipment. The permit will be issued upon payment of a fee of twenty dollars.

(2) The permit must be carried in the cab of the power vehicle. The permit shall be subject to inspection at all times by the law enforcement agents and the commission's representatives. A vehicle operating under a trip permit shall be under the control and direction of the motor carrier purchasing the permit and shall be used only within the scope of the carrier's authority and within the terms of the trip permit.

(3) This emergency section shall apply only with regard to interstate operations that are, or are to be, conducted on or after January 1, 1994.

AMENDATORY SECTION (Amending Order R-276, Cause No. TV-2092, filed 9/17/87)

WAC 480-12-135 ((Cards)) Permits and receipts—Return required—Loss ((of—)) improper use of cards or stamps. (((1) Upon revocation of a permit or cessation or abandonment of service under a permit, or when equipment is repossessed, the holder thereof shall immediately return to

~~the commission the original permit, together with identification cab cards.~~

~~(2) The loss of identification cab cards and/or stamps shall be immediately reported to the commission.~~

~~(3) The use of an identification cab card by any person or firm other than the carrier to whom the stamp was issued is unlawful.~~

~~(4) The use of an identification cab card without the appropriate stamp firmly affixed is unlawful.~~

~~(5) Except as unassigned identification cab cards are properly used as provided for in WAC 480-12-130, each motive power vehicle must have its own assigned identification cab card, and the use of a card on a vehicle other than the one for which it has been prepared is unlawful.)~~

(1) When the commission revokes a permit or a receipt that it has issued, when a carrier stops or abandons service under a permit or receipt, or when a carrier's vehicle equipment is sold, abandoned, or repossessed, the holder of the permit or receipt shall immediately return to the commission each original permit or receipt.

(2) A carrier shall report to the commission immediately the physical loss or destruction of a permit or receipt that the commission issued. The commission will replace a physically lost or destroyed current permit or registration receipt that it has issued, upon receiving a written application for replacement stating the reason replacement is needed.

(3) The use of a permit or registration receipt by any person or firm other than the carrier to whom it was issued is unlawful.

(4) This amendatory section shall apply only with regard to interstate operations that are, or are to be, conducted on or after January 1, 1994. WAC 480-12-135 as in effect prior to this amendment shall apply to intrastate operations and to interstate operations to be conducted on or before December 31, 1993.

AMENDATORY SECTION (Amending Order R-268, Cause No. TV-2002, filed 12/5/86)

WAC 480-12-350 Insurance. Within ten days after the date an applicant is notified ~~((his))~~ that its application has been granted, ~~((and before permit shall be issued))~~ as a condition to issuing the permit, the applicant shall file with the commission evidence of currently effective liability and property damage insurance ~~((having been))~~ written by a company authorized to write such insurance in the state of Washington, covering each motor vehicle as defined in RCW 81.80.010 used or to be used under the permit granted, in the amount shown on the following table:

| Commodity Transported | ((July 1 January 1 1983 1985)) |
|---|---|
| (1) Property (nonhazardous) | ((\$ 500,000)) \$ 750,000 |
| (2) Hazardous substances, as defined in 49 CFR 171.8 transported in cargo tanks, portable tanks, or hopper-type vehicles with capacities in excess of 3,500 water gallons; or in bulk Class A or B explosives, poison gas (Poison A), liquified compressed gas or compressed gas; or highway route controlled | ((1,000,000)) 5,000,000 |

quantity radioactive materials as defined in 49 CFR 173.455.

(3) Oil listed in 49 CFR 172.101; hazardous waste, hazardous materials and hazardous substances defined in 49 CFR 171.8 and listed in 49 CFR 172.101, but not mentioned in (2) above or (4) below. ~~((500,000))~~ 1,000,000

(4) Any quantity of Class A or B explosives; any quantity of poison gas (Poison A); or highway route controlled quantity radioactive materials as defined in 49 CFR 173.455. ~~((1,000,000))~~ 5,000,000

~~((The above amounts do not apply to))~~ Taxicabs whose only operation subject to commission jurisdiction is the operation of ~~((express))~~ small parcel general freight service under a permit issued pursuant to chapter 81.80 RCW ~~((= Provided, That such carrier is in compliance))~~ shall comply with the provisions of RCW 46.72.040 and 46.72.050 in lieu of the above. Such carriers must ~~((also))~~ comply with the reporting requirements ~~((set forth in))~~ of this section.

Applications for permits to operate as temporary common carriers or temporary contract carriers shall be accompanied by evidence of the insurance coverage as required herein.

Carriers registering under WAC 480-12-127 as registered interstate carriers may provide evidence of insurance in the amount prescribed by the Interstate Commerce Commission written by a company authorized to write insurance in any state.

Failure to file and keep such insurance in full force and effect shall be cause for dismissal of an application or cancellation of a permit.

Evidence of insurance shall be submitted either on a ~~((=))~~ uniform motor carrier bodily injury and property damage liability certificate of insurance, ~~((= (Form E)))~~ filed in triplicate with the commission, or a written binder issued by an insurance agent or insurance company evidencing the ~~((same))~~ coverages as ~~((hereinabove))~~ required above. If a binder is submitted, ~~((the binder))~~ it shall be effective for not longer than sixty days, during which time the carrier must file the required ~~((Form E shall be filed. Insurance presently on file for existing permit holders shall be sufficient. Provided, The requirements set forth above are in effect))~~ evidence of insurance.

This amendatory section shall apply only with regard to interstate operations that are, or are to be, conducted on or after January 1, 1994. WAC 480-12-350 as in effect prior to this amendment shall apply to intrastate operations and to interstate operations conducted or to be conducted on or before December 31, 1993.

EMERGENCY

WSR 94-01-063
RESCISSION OF EMERGENCY RULES
DEPARTMENT OF
SOCIAL AND HEALTH SERVICES
(Institutions)

[Order 3681—Filed December 8, 1993, 3:23 p.m., effective December 9, 1993, 12:01 a.m.]

Date of Adoption: December 8, 1993.

Purpose: Rescind WSR 93-21-077 filed October 20, 1993, as the Division of Developmental Disabilities does not want language as written within WAC 275-27-220, 275-27-221, and 275-27-223. A supplemental notice to this effect is filed December 8, 1993, stating another hearing is scheduled for January 25, 1994.

Citation of Existing Rules Affected by this Order: Rescinding WAC 275-27-220 Family support services, 275-27-221 Family financial participation, and 275-27-223 Service need levels.

Effective Date of Rule: December 9, 1993, 12:01 a.m.

December 8, 1993
Dewey Brock, Chief
Office of Vendor Services

WSR 94-01-064
EMERGENCY RULES
DEPARTMENT OF
SOCIAL AND HEALTH SERVICES
(Institutions)

[Order 3682—Filed December 8, 1993, 3:24 p.m., effective December 9, 1993, 12:01 a.m.]

Date of Adoption: December 8, 1993.

Purpose: New WAC 275-27-221 Family financial participation, requires families receiving family support services to provide the department information regarding family income and family size. To include the incremental formula for determining the families' ability to participate in the purchase of needed services. Defines gross family income, dependents, family, and disability-related expenses.

Citation of Existing Rules Affected by this Order: Amending WAC 275-27-220 Family support services and 275-27-223 Service need levels.

Statutory Authority for Adoption: RCW 71A.12.040.

Other Authority: RCW 43.43.745.

Pursuant to RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: 1993 legislature reduced the division's family support budget with the expectation that the division would implement a family financial participation program.

Effective Date of Rule: December 9, 1993, 12:01 a.m.

December 8, 1993
Dewey Brock, Chief
Office of Vendor Services

AMENDATORY SECTION (Amending Order 3372, filed 4/21/92, effective 5/22/92)

WAC 275-27-220 Family support services. (1) The department's intent of family support services shall be to:

(a) Reduce or eliminate the need for out-of-home residential placement of a client (~~(wherein)~~) where the in-home placement is in the client's best interest;

(b) Allow a client to live in the most independent setting possible; and

(c) Have access to services best suited to a client's needs.

(2) The department's family support services shall include, but not be limited to, the following services:

(a) Emergency or planned respite care;

(b) Attendant care;

(c) Therapeutic services, including:

(i) Physical therapy;

(ii) Occupational therapy;

(iii) Behavior management therapy; and

(iv) Communication therapy.

(d) The purchase, rental, loan, or refurbishment of specialized equipment, environmental modifications, and other adaptations; and

(e) Other service (~~(pursuant to)~~) approved by the director or designee as described under subsection (1) of this section (~~(approved by the director or designee)~~).

(3) The department shall authorize services to the family for a specified time-limited period.

(a) A departmental service authorization shall state the type, amount, and period (duration) of service. Each department authorization shall constitute a new service for a new period.

(b) If requested family support services are not authorized, such actions shall be deemed a denial of services.

(c) Family support services may be authorized below the amount requested by the family for the period. When, during the authorized service period, family support services are reduced or terminated below the amount specified in service authorizations, the department shall deem such actions as a reduction or termination of services.

(4) The department shall authorize family support services in accordance with department-established policies (~~(established by the department)~~). The department shall base periodic service authorizations on:

(a) Requests for family support services described in subsection (2) of this section;

(b) Service need levels as described in section 223 of this chapter;

(c) Availability of family support funding; (~~(and)~~)

(d) The family's ability to purchase services required by a minor client as described under WAC 275-27-221 based on family-provided financial information; and

(e) Authorization by a review committee, in each regional office, which reviews each request for service; and

(5) The department shall authorize family support services contingent upon the applicant providing accurate and complete information concerning family income and disability-related expenses as requested by the department. An applicant's failure to provide accurate and complete information may result in reduction in the family's family support service authorization. The department shall ensure

such reduction does not result in family participation beyond that required by the actual level of family income and disability-related expenses for the period in question.

(6) The department shall ensure service authorizations do not exceed maximum amounts for each service need level based on the availability of funds.

(7) The department shall not authorize a birth parent, adoptive parent, or stepparent living in the same household as the client as the direct care provider for respite, attendant, nursing, therapy, or counseling services for a child seventeen years of age or younger.

NEW SECTION

WAC 275-27-221 Family financial participation. (1)

"Dependent" means a relative who depends on the family income for at least half of the relative's support.

(2) "Disability-related expenses" means the:

(a) Most recent annual expenses provided by the family to eligible clients including bills from physician, dentists, and other medical professionals;

(b) Clients' health insurance premiums and/or medical spenddown;

(c) Amounts paid to rent or purchase medical equipment;

(d) Amounts paid for modification of homes or vehicles to accommodate the eligible children;

(e) Specialized clothing;

(f) Exceptional child care and other disability-related expenses.

(3) "Family" means a person or a person and the person's spouse, if not legally separated, and the person's dependents.

(4) "Gross family income" means the total income of all members of a family. Income includes:

(a) Earned income, such as wages and tips;

(b) Unearned income, such as interest, dividends, and pensions;

(c) Family's share of income from S corporations (domestic corporation with one class of stock having thirty-five or less shareholders, who are U.S. citizens), partnerships, estates, and trusts;

(d) Gains from the sale or exchange (including barter) of real estate, securities, coins, gold, silver, gems, or other property;

(e) Gain from the sale or exchange of the family's main home;

(f) Accumulation distributions from trusts;

(g) Scholarships and fellowship grants;

(h) Original issue discount, distribution from simplified employee pensions (SEPs) and deductible employee contributions (DECs);

(i) Amounts received in place of wages from accident and health plans if employer paid for the policy;

(j) Bartering income, Tier 2 and supplemental annuities under the Railroad Retirement Act;

(k) Life insurance proceeds from a policy the family cashed in if the proceeds are more than the premiums paid;

(l) Endowments;

(m) Lump-sum distributions;

(n) Prizes and awards;

(o) Gambling winnings;

(p) Social Security;

(q) Capital gains; and

(r) Child support.

(s) Income does not include earned income by dependent family members, nor income of a family member who resides in another household when such income is not available to the family member seeking family support services.

(5) Based on the level of family support services authorized under WAC 275-27-220(4) for a client who is seventeen years of age or younger, in order to be authorized for family support services, each family shall provide the department with accurate and complete information sufficient to assess the family's ability to participate in the purchase of family support services. This information includes:

(a) Family's annual gross income;

(b) Family size; and

(c) Client's disability-related expenses.

(6) The department shall make an assessment of the family's ability to purchase services required by the client as follows:

(a) Determine the annual gross income of the eligible client's family;

(b) Not require families, whose annual gross income is less than three hundred percent of the statewide need standard, rounded up to the next even one thousand dollars, based on family size, to participate in the purchase of family support services;

(c) Require families, whose annual gross income is three hundred percent or more of the statewide need standard, rounded up to the next even one thousand dollars, based on family size, to participate in the purchase of the services according to the following incremental formula:

(i) For that portion of a family's income between three hundred percent and four hundred percent of the statewide need standard, rounded up to the next even one thousand dollars, based on family size, family financial participation shall be six percent times that portion of the family's reported income;

(ii) In addition, for that portion of a family's income between four hundred percent and five hundred percent of the statewide need standard, rounded up to the next even one thousand dollars, based on family size, family financial participation shall be six and one-half percent times that portion of the family's reported income;

(iii) In addition, for that portion of a family's income between five hundred percent and six hundred percent of the statewide need standard, rounded up to the next even one thousand dollars, based on family size, family financial participation shall be seven percent times that portion of the family's reported income;

(iv) In addition, for that portion of a family's income between six hundred percent and seven hundred percent of the statewide need standard, rounded up to the next even one thousand dollars, based on family size, family financial participation shall be seven and one-half percent times that portion of the family's reported income;

(v) In addition, for that portion of a family's income between seven hundred percent and eight hundred percent of the statewide need standard, rounded up to the next even one thousand dollars, based on family size, family financial

participation shall be eight percent times that portion of the family's reported income;

(vi) In addition, for that portion of a family's income between eight hundred percent and nine hundred percent of the statewide need standard, rounded up to the next even one thousand dollars, based on family size, family financial participation shall be eight and one-half percent times that portion of the family's reported income;

(vii) In addition, for that portion of a family's income between nine hundred percent and one thousand percent of the statewide need standard, rounded up to the next even one thousand dollars, based on family size, family financial participation shall be nine percent times that portion of the family's reported income;

(viii) In addition, for that portion of a family's income between one thousand percent and eleven hundred percent of the statewide need standard, rounded up to the next even one thousand dollars, based on family size, family financial participation shall be nine and one-half percent times that portion of the family's reported income;

(ix) In addition, for that portion of a family's income between eleven hundred percent and fourteen hundred percent of the statewide need standard, rounded up to the next even one thousand dollars, based on family size, family financial participation shall be ten percent times that portion of the family's reported income; and

(x) The department shall not authorize family support services for families whose annual gross income is over fourteen hundred percent of the statewide need standard, rounded up to the next even one thousand dollars, based on family size.

(d) The department shall adjust the annual gross income downward for annual disability-related expenses incurred by the family for eligible clients.

(7) The department may re-evaluate at any time the ability of a family to purchase required family support services under this subsection, but not less than once per year or when the department believes there is a change of factors that determine ability to purchase services including family income and family size.

(8) The department shall recompute the required level of participation as described under subsection (7) of this section if the department's re-evaluation reveals a difference of one hundred twenty dollars per year or more between the:

(a) Family's current ability to participate in the purchase of family support services; and

(b) Level of financial participation most recently determined by the department.

(9) The department may recompute the level of participation when the difference is less than one hundred twenty dollars per year.

AMENDATORY SECTION (Amending Order 3372, filed 4/21/92, effective 5/22/92)

WAC 275-27-223 Service need levels. (1) The department shall use service need levels to determine periodic family support service authorizations.

(2) The department shall determine service need levels in order of priority for funding as follows:

(a) Service need level 1: Client is at immediate risk of out-of-home placement without the provision of family

support services. The client needs intensive residential support to assist the client's family to care for the family's child or adult requiring nursing services, attendant care, or support due to difficult behaviors. ~~((The client must receive the majority of family support services in such client's home. An existing or new eligible client must have received, over the most recent three months, at least ten days or eighty hours per month of such service;))~~ A client shall:

(i) Have received, over the past three months, at least ten days or eighty hours of service; or

(ii) Requires at least ten days or eighty hours per month of service to prevent immediate out-of-home placement, based upon an assessment conducted by the department;

(b) Service need level 2: Client is at high risk of out-of-home placement without the provision of family support services and has one or more of the following documented in writing:

(i) The client:

(A) Currently receives adult protective services or division of children and family services as an active:

(I) Child protective service client;

(II) Child welfare service client; or

(III) Family reconciliation service client.

(B) Has returned home from foster care or group care placement within the last six months;

(C) Has a serious medical problem requiring close and ongoing monitoring and/or specialized treatment, such as:

(I) Apnea monitor;

(II) Tracheotomy;

(III) Heart monitor;

(IV) Ventilator;

(V) Constant monitoring due to continuous seizures;

(VI) Immediate life-saving intervention due to life threatening seizures;

(VII) Short bowel syndrome; or

(VIII) Brittle bone syndrome.

(D) Has a dual diagnosis based on current mental health DSM Axis I diagnosis;

(E) Has an extreme behavioral challenge resulting in health and safety issues for self and/or others which:

(I) Resulted in serious physical injury to self or others within the last year;

(II) For a client who is two years of age or older, requires constant monitoring when awake for personal safety reasons; or

(III) Is of imminent danger to self or others as determined by a psychiatrist, psychologist, or other qualified professional.

(F) Is ten years of age or older or weighs forty pounds or more, requires lifting, and needs direct physical assistance in three or more of the following areas:

(I) Bathing;

(II) Toileting;

(III) Feeding;

(IV) Mobility; or

(V) Dressing.

(ii) The caregiver:

(A) Is a division of developmental disabilities client;

(B) Has a physical or medical problem that interferes with providing care; or

(C) Has serious mental health or substance abuse problems and:

(I) Is receiving counseling for these problems; or
 (II) Has received or applied for counseling within the past six months.

(c) Service need level 3: The family is at risk of significant deterioration which could result in an out-of-home placement of the client without provision of family support services due to the following:

(i) The client requires direct physical assistance, above what is typical for such client's age, in three or more of the following areas:

- (A) Bathing;
- (B) Toileting;
- (C) Feeding;
- (D) Mobility; or
- (E) Dressing.

(ii) The client has current behavioral episodes resulting in:

- (A) Physical injury to the client or others;
- (B) Substantial damage to property; and/or
- (C) Chronic sleep pattern disturbances or chronic continuous screaming behavior.

(iii) The client has medical problems requiring substantial extra care; and/or

(iv) The family is:

- (A) Experiencing acute and/or chronic stress;
- (B) Has acute or chronic physical limitations; or
- (C) Has acute or chronic mental or emotional limitations.

(d) Service need level 4: Family needs temporary or ongoing services in order to:

(i) Receive support to relieve and/or prevent stress of caregiver/family; or

(ii) Enhance the current functioning of the family.

(3) The department shall determine service need level of the client's service request by reviewing information received from the client, family, and other sources about:

(a) Whether client is an active recipient of services from the division of children and family services or adult protective services;

(b) Whether indicators of risk of out-of-home placement exist, and the imminence of such an event. The department's assessment of such risk may include:

(i) Review of family's requests for placement;

(ii) History of family's involvement with children's protective services or adult protective services;

(iii) Client's current adjustment;

(iv) Parental history of psychiatric hospitalization;

(v) Clinical assessment of family's condition; and

(vi) Statements from other professionals.

(c) Caregiver conditions, such as acute and/or chronic:

(i) ~~((Acute and/or chronic))~~ Stress;

(ii) ~~((Acute and/or chronic))~~ Physical limitations; and

(iii) ~~((Acute and/or chronic))~~ Mental and/or emotional impairments.

(d) Client's need for intense medical, physical, or behavioral support;

(e) Family's ability to use typical community resources;

(f) Availability of private, local, state, or federal resources to help meet the need for family support;

(g) Severity and chronicity of family or client problems; and

(h) Degree to which family support services will:

(i) Ameliorate or alleviate such problems; and

(ii) Reduce the risk of out-of-home placement.

~~(((4) Beginning May 1, 1992, the department's revised service need level definitions shall be in effect. The department's service need levels currently defined under section 223 of this chapter shall remain in effect through April 1992.))~~

WSR 94-01-069
EMERGENCY RULES
MULTIMODAL TRANSPORTATION
PROGRAMS AND PROJECTS
SELECTION COMMITTEE

[Filed December 9, 1993, 9:53 a.m.]

Date of Adoption: December 9, 1993.

Purpose: In response to a request of the Joint Administrative Rules Review Committee of the Washington state legislature, these rules control the committee's initial selection of programs and projects from applications required by section 8, chapter 393, Laws of 1993, and chapter 81.104 RCW.

Citation of Existing Rules Affected by this Order: Amending chapter 240-20 WAC.

Statutory Authority for Adoption: Chapter 393, Laws of 1993.

Other Authority: Chapter 81.104 RCW.

Pursuant to RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: Chapter 393, Laws of 1993, require the committee to adopt procedures to be incorporated into the Washington Administrative Code and to review and select applications, and award funds from the high capacity transportation account. This amendment is needed to clarify the project and program selection process, and is recommended by the JARRC.

Effective Date of Rule: Immediately.

December 9, 1993

Martha Choe

Chair

Chapter 240-20 WAC
Multimodal Transportation Programs and Projects
Selection Committee

AMENDED SECTION [NEW SECTION]

WAC 240-20-120 Competitive process. The committee shall select programs and projects competitively based on the criteria for each category of programs and projects set forth in WAC 240-20-100 and WAC 240-20-165.

Reviser's note: The bracketed material preceding the section above was supplied by the code reviser's office.

NEW SECTION

WAC 240-20-160 High capacity transportation fund, application schedule. Applications for funding assistance from the high capacity transportation account shall be received by the committee by no later than 5:00 p.m. on March 4, 1994. The applications shall be mailed to the address identified in WAC 240-20-040, or delivered to the public transportation office of the department. The address of the public transportation office is 310 Maple Park, Room 1A18, Olympia, Washington.

NEW SECTION

WAC 240-20-165 High capacity transportation account, selection process. (1) Projects selected for funding from the high capacity transportation account shall be consistent with the following criteria:

- (a) Local, regional, and state transportation plans;
- (b) Local transit development plans; and
- (c) Local comprehensive land use plans.

(2) Applications for funding from the high capacity transportation fund shall be evaluated subject to the criteria found in RCW 81.104.090(1), RCW 81.104.090(2), and the following criteria shall be considered:

(a) Objectives of the growth management act, the high capacity transportation act, the commute trip reduction act, transportation demand management programs, federal and state air quality requirements, and federal Americans with Disabilities Act and related state accessibility requirements; and

(b) Energy efficiency issues, freight and goods movement as related to economic development, regional significance, rural isolation, the leveraging of other funds administered by this committee, and safety and security issues.

(3) The committee shall prepare application forms and guidelines to assist eligible applicants and ensure their distribution to all eligible applicants no later than thirty days prior to the date on which the applications must be submitted as noted in WAC 240-20-160.

NEW SECTION

WAC 240-20-170 Supplemental applications. (1) The committee shall accept applications for supplemental funds available within the central puget sound public transportation account. Applications for supplemental funding shall be evaluated based upon the criteria identified in WAC 240-20-100(1).

(2) The supplemental application process shall be subject to the conditions developed under WAC 240-20-090 and WAC 240-20-120.

(3) The application period for supplemental funding shall be from December 10, 1993 until 5:00 p.m., January 14, 1994. Applications may be mailed to the address identified in WAC 240-20-240, or delivered to the address identified in WAC 240-20-160 no later than the above identified deadline in order to receive consideration.

Reviser's note: The spelling error in the above section occurred in the copy filed by the agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

WSR 94-01-109
EMERGENCY RULES
DEPARTMENT OF FISHERIES

[Order 93-141—Filed December 16, 1993, 2:50 p.m.]

Date of Adoption: December 16, 1993.

Purpose: Commercial fishing regulations.

Citation of Existing Rules Affected by this Order:

Repealing WAC 220-52-07300P.

Statutory Authority for Adoption: RCW 75.08.080.

Pursuant to RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: The quota of red sea urchins has been reached in sea urchin district 2.

Effective Date of Rule: Immediately.

December 16, 1993

Judith Freeman

Deputy

for Robert Turner

Director

NEW SECTION

WAC 220-52-07300Q Sea urchins. Notwithstanding the provisions of WAC 220-52-073, effective immediately until further notice, it is unlawful to take or possess sea urchins taken for commercial purposes except as provided for in this section:

(1) Red sea urchins: Sea urchin district 5 is open Mondays and Tuesdays only and will close when the district quota is taken. It is unlawful to harvest red sea urchins greater or smaller in size than the following (size is diameter exclusive of the spines):

(a) 3.25 to 4.5 inches

(2) Green sea urchins: Sea urchin districts 1, 2, 5, and Marine Fish/Shellfish Management and Catch Reporting Areas 26B, 26D, and 28A are open Monday and Tuesday only and will close when a total of 600,000 pounds are taken. The minimum size for green sea urchins is 2.25 inches in diameter exclusive of the spines.

(3) In addition to the closed areas shown in WAC 220-52-073, the following areas are closed to the commercial harvest of sea urchins at all times.

(a) Waters of Neah Bay west and south of a line from Klachopis Point to the northern tip of Waadah Island thence westerly to landfall one-quarter mile due south of Koitlah Point.

(b) Waters of Makah Bay east of a line from Waatch Point to Portage Head.

(c) All provisions of WAC 220-52-073 not inconsistent with the provisions of this section remain in effect.

REPEALER

The following section of the Washington Administrative Code is repealed:

WAC 220-52—07300P Sea urchins. (93-135)

Reviser's note: The typographical error in the above repealer occurred in the copy filed by the agency and appears in the Register pursuant to the requirements of RCW 34.08.040.

WSR 94-01-124
EMERGENCY RULES
FOREST PRACTICES BOARD

[Filed December 17, 1993, 3:38 p.m.]

Date of Adoption: December 9, 1993.

Purpose: To modify forest practices rules, in order to protect public resources while maintaining a viable timber industry. This filing replaces WSR 93-24-024, filed with the code reviser on November 19, 1993.

Citation of Existing Rules Affected by this Order: Amending WAC 222-16-010, 222-16-035, and 222-30-020.

Statutory Authority for Adoption: RCW 76.09.040 and chapter 34.05 RCW.

Pursuant to RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: To protect forested bogs and fens as Type A wetlands which require a wetland management zone (WMZ).

Effective Date of Rule: Immediately.

December 10, 1993

Jennifer M. Belcher

Commissioner of Public Lands

AMENDATORY SECTION (Amending WSR 93-12-001, filed 5/19/93, effective 6/19/93)

WAC 222-16-010 General definitions.* Unless otherwise required by context, as used in these regulations:

"Act" means the Forest Practices Act, chapter 76.09 RCW.

"Affected Indian tribe" means any federally recognized Indian tribe that requests in writing from the department information on forest practices applications and notification filed on specified areas.

"Appeals board" means the forest practices appeals board established in the act.

"Area of resource sensitivity" means areas identified in accordance with WAC 222-22-050 (2)(d) or 222-22-060(2).

"Board" means the forest practices board established by the act.

"Bog" means wetlands which have the following characteristics: Peat soils 16 inches or more in depth (except over bedrock); and vegetation such as sphagnum moss, labrador tea, bog laurel, bog rosemary, sundews, and sedges;

bogs may have an overstory of spruce, western hemlock, lodgepole pine, cedar, crabapple, or aspen, and may be associated with open water.

"Borrow pit" shall mean an excavation site outside the limits of construction to provide material necessary to that construction, such as fill material for the embankments.

"Chemicals" means substances applied to forest lands or timber including pesticides, fertilizers, and other forest chemicals.

"Clearcut" means a harvest method in which the entire stand of trees is removed in one timber harvesting operation. Except as provided in WAC 222-30-110, an area remains clearcut until:

It meets the minimum stocking requirements under WAC 222-34-010(2) or 222-34-020(2); and

The largest trees qualifying for the minimum stocking levels have survived on the area for five growing seasons or, if not, they have reached an average height of four feet.

"Commercial tree species" means any species which is capable of producing a merchantable stand of timber on the particular site, or which is being grown as part of a Christmas tree or ornamental tree-growing operation.

"Completion of harvest" means the latest of:

Completion of removal of timber from the portions of forest lands harvested in the smallest logical unit that will not be disturbed by continued logging or an approved slash disposal plan for adjacent areas; or

Scheduled completion of any slash disposal operations where the department and the applicant agree within 6 months of completion of yarding that slash disposal is necessary or desirable to facilitate reforestation and agree to a time schedule for such slash disposal; or

Scheduled completion of any site preparation or rehabilitation of adjoining lands approved at the time of approval of the application or receipt of a notification: *Provided*, That delay of reforestation under this paragraph is permitted only to the extent reforestation would prevent or unreasonably hinder such site preparation or rehabilitation of adjoining lands.

"Constructed wetlands" means those wetlands voluntarily developed by the landowner. Constructed wetlands do not include wetlands created, restored, or enhanced as part of a mitigation procedure or wetlands inadvertently created as a result of current or past practices including, but not limited to: Road construction, landing construction, railroad construction, or surface mining.

"Contamination" means the introducing into the atmosphere, soil, or water, sufficient quantities of substances as may be injurious to public health, safety or welfare, or to domestic, commercial, industrial, agriculture or recreational uses, or to livestock, wildlife, fish or other aquatic life.

"Conversion option harvest plan" means a voluntary plan developed by the landowner and approved by the local government entity indicating the limits of harvest areas, road locations, and open space.

"Conversion to a use other than commercial timber operation" shall mean a bona fide conversion to an active use which is incompatible with timber growing.

"Critical habitat (federal)" means the habitat of any threatened or endangered species designated as critical habitat by the United States Secretary of the Interior under

Sections 3(5)(A) and 4(a)(3) of the Federal Endangered Species Act.

"**Critical wildlife habitat (state)**" means those habitats designated by the board in accordance with WAC 222-16-080.

"**Cultural resources**" means archaeological and historic sites and artifacts and traditional religious, ceremonial and social uses and activities of affected Indian tribes.

"**Cumulative effects**" means the changes to the environment caused by the interaction of natural ecosystem processes with the effects of two or more forest practices.

"**Debris**" means woody vegetative residue less than 3 cubic feet in size resulting from forest practice activities which would reasonably be expected to cause significant damage to a public resource.

"**Department**" means the department of natural resources.

"**Eastern Washington**" means the lands of the state lying east of an administrative line which approximates the change from the Western Washington timber types to the Eastern Washington timber types described as follows:

Beginning at the International Border and Okanogan National Forest boundary at the N1/4 corner Section 6, T. 40N, R. 24E., W.M., south and west along the Pasayten Wilderness boundary to the west line of Section 30, T. 37N, R. 19E.,

Thence south on range line between R. 18E. and R. 19E., to the Lake Chelan-Sawtooth Wilderness at Section 31, T. 35N, R. 19E.,

Thence south and east along the eastern wilderness boundary of Lake Chelan-Sawtooth Wilderness to the west line of Section 18, T. 31N, R. 19E. on the north shore of Lake Chelan,

Thence south on the range line between R. 18E. and R. 19E. to the SE corner of T. 28N, R. 18E.,

Thence west on the township line between T. 27N, and T. 28N to the NW corner of T. 27N, R. 17E.,

Thence south on range line between R. 16E. and R. 17E. to the Alpine Lakes Wilderness at Section 31, T. 26N, R. 17E.,

Thence south along the eastern wilderness boundary to the west line of Section 6, T. 22N, R. 17E.,

Thence south on range line between R. 16E. and R. 17E. to the SE corner of T. 22N, R. 16E.,

Thence west along township line between T. 21N, and T. 22N to the NW corner of T. 21N, R. 15E.,

Thence south along range line between R. 14E. and R. 15E. to SW corner of T. 20N, R. 15E.,

Thence east along township line between T. 19N, and T. 20N to the SW corner of T. 20N, R. 16E.,

Thence south along range line between R. 15E. and R. 16E. to the SW corner of T. 18N, R. 16E.,

Thence west along township line between T. 17N, and T. 18N to the SE corner of T. 18N, R. 14E.,

Thence south along range line between T. 14E. and R. 15E. to the SW corner of T. 14N, R. 15E.,

Thence south and west along Wenatchee National Forest Boundary to the NW corner of T. 12N, R. 14E.,

Thence south along range line between R. 13E. and R. 14E. to SE corner of T. 10N, R. 13E.,

Thence west along township line between T. 9N, and T. 10N to the NW corner of T. 9N, R. 12E.,

Thence south along range line between R. 11E. and R. 12E. to SE corner of T. 8N, R. 11E.,

Thence west along township line between T. 7N, and T. 8N to the Gifford Pinchot National Forest Boundary,

Thence south along Forest Boundary to SE corner of Section 33, T. 7N, R. 11E.,

Thence west along township line between T. 6N, and T. 7N to SE corner of T. 7N, R. 9E.,

Thence south along Skamania-Klickitat County line to Oregon-Washington state line.

"**End hauling**" means the removal and transportation of excavated material, pit or quarry overburden, or landing or road cut material from the excavation site to a deposit site not adjacent to the point of removal.

"**Erodible soils**" means those soils exposed or displaced by a forest practice operation, that would be readily moved by water.

"**Even-aged harvest methods**" means the following harvest methods:

Clearcuts;

Seed tree harvests in which twenty or fewer trees per acre remain after harvest;

Shelterwood regeneration harvests in which twenty or fewer trees per acre remain after harvest;

Group or strip shelterwood harvests creating openings wider than two tree heights, based on dominant trees;

Shelterwood removal harvests which leave fewer than one hundred fifty trees per acre which are at least five years old or four feet in average height;

Partial cutting in which fewer than fifty trees per acre remain after harvest;

Overstory removal when more than five thousand board feet per acre is removed and fewer than fifty trees per acre at least ten feet in height remain after harvest; and

Other harvesting methods designed to manage for multiple age classes in which six or fewer trees per acre remain after harvest.

Except as provided above for shelterwood removal harvests and overstory removal, trees counted as remaining after harvest shall be at least ten inches in diameter at breast height and have at least the top one-third of the stem supporting green, live crowns. Except as provided in WAC 222-30-110, an area remains harvested by even-aged methods until it meets the minimum stocking requirements under WAC 222-30-010(2) or 222-34-020(2) and the largest trees qualifying for the minimum stocking levels have survived on the area for five growing seasons or, if not, they have reached an average height of four feet.

"**Fen**" means wetlands which have the following characteristics: Peat soils 16 inches or more in depth (except over bedrock); and vegetation such as certain sedges, hardstem bulrush and cattails; fens may have an overstory of spruce, western hemlock, lodgepole pine, cedar, crabapple, or aspen, and may be associated with open water.

"**Fertilizers**" means any substance or any combination or mixture of substances used principally as a source of plant food or soil amendment.

"**Fill**" means the placement of earth material or aggregate for road or landing construction or other similar activities. Fill does not include the growing or harvesting of timber including, but not limited to, slash burning, site preparation, reforestation, precommercial thinning, intermedi-

ate or final harvesting, salvage of trees, brush control, or fertilization.

"Flood level - 50 year." For purposes of field interpretation of these regulations, the 50-year flood level shall be considered to refer to a vertical elevation measured from the ordinary high-water mark which is 1.25 times the vertical distance between the average stream bed and the ordinary high-water mark, and in horizontal extent shall not exceed 2 times the channel width measured on either side from the ordinary high-water mark, unless a different area is specified by the department based on identifiable topographic or vegetative features or based on an engineering computation of flood magnitude that has a 2 percent chance of occurring in any given year. The 50-year flood level shall not include those lands that can reasonably be expected to be protected from flood waters by flood control devices maintained by or under license from the federal government, the state, or a political subdivision of the state.

"Forest land" means all land which is capable of supporting a merchantable stand of timber and is not being actively used for a use which is incompatible with timber growing.

"Forest land owner" shall mean any person in actual control of forest land, whether such control is based either on legal or equitable title, or on any other interest entitling the holder to sell or otherwise dispose of any or all of the timber on such land in any manner: *Provided*, That any lessee or other person in possession of forest land without legal or equitable title to such land shall be excluded from the definition of "forest land owner" unless such lessee or other person has the right to sell or otherwise dispose of any or all of the timber located on such forest land.

"Forest practice" means any activity conducted on or directly pertaining to forest land and relating to growing, harvesting, or processing timber, including but not limited to:

- Road and trail construction;
- Harvesting, final and intermediate;
- Precommercial thinning;
- Reforestation;
- Fertilization;
- Prevention and suppression of diseases and insects;
- Salvage of trees; and
- Brush control.

"Forest practice" shall not include: Forest species seed orchard operations and intensive forest nursery operations; or preparatory work such as tree marking, surveying and road flagging; or removal or harvest of incidental vegetation from forest lands such as berries, ferns, greenery, mistletoe, herbs, mushrooms, and other products which cannot normally be expected to result in damage to forest soils, timber or public resources.

"Forest trees" excludes trees cultivated by agricultural methods in growing cycles shorter than ten years: *Provided*, That Christmas trees are forest trees and: *Provided further*, That this exclusion applies only to trees planted on land that was not in forest use immediately before the trees were planted and before the land was prepared for planting the trees.

"Green recruitment trees" means those trees left after harvest for the purpose of becoming future wildlife reserve trees under WAC 222-30-020(11).

"Herbicide" means any substance or mixture of substances intended to prevent, destroy, repel, or mitigate any tree, bush, weed or algae and other aquatic weeds.

"Historic site" includes:

Sites, areas and structures or other evidence of human activities illustrative of the origins, evolution and development of the nation, state or locality; or

Places associated with a personality important in history; or

Places where significant historical events are known to have occurred even though no physical evidence of the event remains.

"Identified watershed processes" means the following components of natural ecological processes that may in some instances be altered by forest practices in a watershed:

- Mass wasting;
- Surface and road erosion;
- Seasonal flows including hydrologic peak and low flows and annual yields (volume and timing);
- Large organic debris;
- Shading; and
- Stream bank and bed stability.

"Insecticide" means any substance or mixture of substances intended to prevent, destroy, repel, or mitigate any insect, other arthropods or mollusk pests.

"Interdisciplinary team" (ID Team) means a group of varying size comprised of individuals having specialized expertise, assembled by the department to respond to technical questions associated with a proposed forest practice activity.

"Islands" means any island surrounded by salt water in Kitsap, Mason, Jefferson, Pierce, King, Snohomish, Skagit, Whatcom, Island, or San Juan counties.

"Limits of construction" means the area occupied by the completed roadway or landing, including the cut bank, fill slope, and the area cleared for the purpose of constructing the roadway or landing.

"Load bearing portion" means that part of the road, landing, etc., which is supportive soil, earth, rock or other material directly below the working surface and only the associated earth structure necessary for support.

"Local government entity" means the governments of counties and the governments of cities and towns as defined in chapter 35.01 RCW.

"Low impact harvest" means use of any logging equipment, methods, or systems that minimize compaction or disturbance of soils and vegetation during the yarding process. The department shall determine such equipment, methods or systems in consultation with the department of ecology.

"Merchantable stand of timber" means a stand of trees that will yield logs and/or fiber:

Suitable in size and quality for the production of lumber, plywood, pulp or other forest products;

Of sufficient value at least to cover all the costs of harvest and transportation to available markets.

"Notice to comply" means a notice issued by the department pursuant to RCW 76.09.090 of the act and may require initiation and/or completion of action necessary to prevent, correct and/or compensate for material damage to public resources which resulted from forest practices.

"Operator" shall mean any person engaging in forest practices except an employee with wages as his/her sole compensation.

"Ordinary high-water mark" means the mark on the shores of all waters, which will be found by examining the beds and banks and ascertaining where the presence and action of waters are so common and usual, and so long continued in all ordinary years, as to mark upon the soil a character distinct from that of the abutting upland, in respect to vegetation: *Provided*, That in any area where the ordinary high-water mark cannot be found, the ordinary high-water mark adjoining saltwater shall be the line of mean high tide and the ordinary high-water mark adjoining freshwater shall be the line of mean high-water.

"Other forest chemicals" means fire retardants when used to control burning (other than water), nontoxic repellents, oil, dust-control agents (other than water), salt, and other chemicals used in forest management, except pesticides and fertilizers, that may present hazards to the environment.

"Park" means any park included on the parks register maintained by the department pursuant to WAC 222-20-100(2). Developed park recreation area means any park area developed for high density outdoor recreation use.

"Partial cutting" means the removal of a portion of the merchantable volume in a stand of timber so as to leave an uneven-aged stand of well-distributed residual, healthy trees that will reasonably utilize the productivity of the soil. Partial cutting does not include seedtree or shelterwood or other types of regeneration cutting.

"Pesticide" means any insecticide, herbicide, fungicide, or rodenticide but does not include nontoxic repellents or other forest chemicals.

"Plantable area" is an area capable of supporting a commercial stand of timber excluding lands devoted to permanent roads, utility rights-of-way, that portion of riparian management zones where scarification is not permitted, and any other area devoted to a use incompatible with commercial timber growing.

"Power equipment" means all machinery operated with fuel burning or electrical motors, including heavy machinery, chain saws, portable generators, pumps, and powered backpack devices.

"Public resources" means water, fish, and wildlife and in addition shall mean capital improvements of the state or its political subdivisions.

"Rehabilitation" means the act of renewing, or making usable and reforesting forest land which was poorly stocked or previously nonstocked with commercial species.

"Relief culvert" means a structure to relieve surface runoff from roadside ditches to prevent excessive buildup in water volume and velocity.

"Resource characteristics" means the following specific measurable characteristics of fish, water, and capital improvements of the state or its political subdivisions:

For fish and water:

Physical fish habitat, including temperature and turbidity;

Turbidity in hatchery water supplies; and

Turbidity and volume for areas of water supply.

For capital improvements of the state or its political subdivisions:

Physical or structural integrity.

If the methodology is developed and added to the manual to analyze the cumulative effects of forest practices on other characteristics of fish, water, and capital improvements of the state or its subdivisions, the board shall amend this list to include these characteristics.

"Riparian management zone" means a specified area alongside Type 1, 2 and 3 Waters where specific measures are taken to protect water quality and fish and wildlife habitat.

"Rodenticide" means any substance or mixture of substances intended to prevent, destroy, repel, or mitigate rodents or any other vertebrate animal which the director of the state department of agriculture may declare by regulation to be a pest.

"Salvage" means the removal of snags, down logs, windthrow, or dead and dying material.

"Scarification" means loosening the topsoil and/or disrupting the forest floor in preparation for regeneration.

"Shorelines of the state" shall have the same meaning as in RCW 90.58.030 (Shoreline Management Act).

"Side casting" means the act of moving excavated material to the side and depositing such material within the limits of construction or dumping over the side and outside the limits of construction.

"Site preparation" means those activities associated with the removal of slash in preparing a site for planting and shall include scarification and/or slash burning.

"Skid trail" means a route used by tracked or wheeled skidders to move logs to a landing or road.

"Slash" means pieces of woody material containing more than 3 cubic feet resulting from forest practice activities.

"Spoil" means excess material removed as overburden or generated during road or landing construction which is not used within limits of construction.

"Stop work order" means the "stop work order" defined in RCW 76.09.080 of the act and may be issued by the department to stop violations of the forest practices chapter or to prevent damage and/or to correct and/or compensate for damages to public resources resulting from forest practices.

"Threatened or endangered species" means all species of wildlife listed as "threatened" or "endangered" by the United States Secretary of the Interior, and all species of wildlife designated as "threatened" or "endangered" by the Washington wildlife commission.

"Timber" shall mean forest trees, standing or down, of a commercial species, including Christmas trees.

"Water bar" means a diversion ditch and/or hump in a trail or road for the purpose of carrying surface water runoff into the vegetation duff, ditch, or other dispersion area so that it does not gain the volume and velocity which causes soil movement and erosion.

"Watershed administrative unit (WAU)" means an area shown on the map specified in WAC 222-22-020(1).

"Watershed analysis" means, for a given WAU, the assessment completed under WAC 222-22-050 or 222-22-060 together with the prescriptions selected under WAC 222-22-070 and shall include assessments completed under WAC 222-22-050 where there are no areas of resource sensitivity.

"Weed" is any plant which tends to overgrow or choke out more desirable vegetation.

"Western Washington" means the lands of the state lying west of the administrative line described in the definition of Eastern Washington.

"Wetland" means those areas that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions, such as swamps, bogs, fens, and similar areas. This includes wetlands created, restored, or enhanced as part of a mitigation procedure. This does not include constructed wetlands or the following surface waters of the state intentionally constructed from wetland sites: Irrigation and drainage ditches, grass lined swales, canals, agricultural detention facilities, farm ponds, and landscape amenities.

"Wetland functions" include the protection of water quality and quantity, providing fish and wildlife habitat, and the production of timber.

"Wetland management zone" means a specified area adjacent to Type A and B Wetlands where specific measures are taken to protect the wetland functions.

"Wildlife" means all species of the animal kingdom whose members exist in Washington in a wild state. The term "wildlife" includes, but is not limited to, any mammal, bird, reptile, amphibian, fish, or invertebrate, at any stage of development. The term "wildlife" does not include feral domestic mammals or the family Muridae of the order Rodentia (old world rats and mice).

"Wildlife reserve trees" means those defective, dead, damaged, or dying trees which provide or have the potential to provide habitat for those wildlife species dependent on standing trees. Wildlife reserve trees are categorized as follows:

Type 1 wildlife reserve trees are defective or deformed live trees that have observably sound tops, limbs, trunks, and roots. They may have part of the top broken out or have evidence of other severe defects that include: "Cat face," animal chewing, old logging wounds, weather injury, insect attack, or lightning strike. Unless approved by the landowner, only green trees with visible cavities, nests, or obvious severe defects capable of supporting cavity dependent species shall be considered as Type 1 wildlife reserve trees. These trees must be stable and pose the least hazard for workers.

Type 2 wildlife reserve trees are dead Type 1 trees with sound tops, limbs, trunks, and roots.

Type 3 wildlife reserve trees are live or dead trees with unstable tops or upper portions. Unless approved by the landowner, only green trees with visible cavities, nests, or obvious severe defects capable of supporting cavity dependent species shall be considered as Type 3 wildlife reserve trees. Although the roots and main portion of the trunk are sound, these reserve trees pose high hazard because of the defect in live or dead wood higher up in the tree.

Type 4 wildlife reserve trees are live or dead trees with unstable trunks or roots, with or without bark. This includes "soft snags" as well as live trees with unstable roots caused by root rot or fire. These trees are unstable and pose a high hazard to workers.

"Windthrow" means a natural process by which trees are uprooted or sustain severe trunk damage by the wind.

AMENDATORY SECTION (Amending WSR 92-15-011, filed 7/2/92, effective 8/2/92)

WAC 222-16-035 Wetland typing system. *The department in cooperation with the departments of fisheries, wildlife, and ecology, and affected Indian tribes shall classify wetlands. The wetlands will be classified in order to distinguish those which require wetland management zones and those which do not. Wetlands which require wetland management zones shall be identified using the following criteria. Accurate delineation of wetlands in accordance with the manual shall be required only where necessary to determine whether replacement by substitution or enhancement is required pursuant to WAC 222-24-025(10) and shall be limited to the area of wetland proposed to be filled. For the purposes of determining acreage to classify or type wetlands under this section, approximate determination using aerial photographs and maps, including the national wetlands inventory, shall be sufficient. In addition, the innermost boundary of the wetland management zone on Type A or B wetlands may be determined by either of two methods: Delineation of the wetland edge, or identifying the point where the crown cover changes from less than 30% to 30% or more. Except where necessary to determine whether replacement by substitution or enhancement is required pursuant to WAC 222-24-025(10), accurate delineation shall not be required under this Title 222 WAC for activities regulated by these rules, including but not limited to the location of roads, landings, culverts, and cross drains. Landowners are encouraged to leave vegetation in these forested wetlands in undisturbed leave areas where possible. When so requested by any affected landowners, applicant or aggrieved person, the department shall make available informal conferences, which shall include the departments of fisheries, wildlife, and ecology, and affected Indian tribes and those contesting the adopted wetland types. These conferences shall be established under procedures established in WAC 222-46-020.

(1) **"Nonforested wetlands"** means any wetland or portion thereof that has, or if the trees were mature would have, a crown closure of less than 30 percent.

(a) **"Type A Wetland"** classification shall be applied to all nonforested wetlands which:

(i) Are greater than 0.5 acre in size, including any acreage of open water where the water is completely surrounded by the wetland; and

(ii) Are associated with at least 0.5 acre of ponded or standing open water. The open water must be present on the site for at least 7 consecutive days between April 1 and October 1 to be considered for the purposes of these rules(~~or~~

~~(iii) Are bogs and fens greater than 0.25 acre)).~~

(b) **"Type B Wetland"** classification shall be applied to all other nonforested wetlands greater than 0.25 acre.

(2) **"Forested wetland"** means any wetland or portion thereof that has, or if the trees were mature would have, a crown closure of 30 percent or more.

(3) "All forested and nonforested bogs and fens" greater than 0.25 acres shall be considered Type A Wetlands.

AMENDATORY SECTION (Amending WSR 93-12-001, filed 5/19/93, effective 6/19/93)

WAC 222-30-020 Harvest unit planning and design.

(1) **Logging system.** The logging system should be appropriate for the terrain, soils, and timber type so yarding or skidding can be economically accomplished in compliance with these regulations.

*(2) **Landing locations.** Locate landings to prevent damage to public resources. Avoid excessive excavation and filling.

*(3) **Western Washington riparian management zones.** These zones shall be measured horizontally from the ordinary high-water mark of Type 1, 2 or 3 Water and extend to the line where vegetation changes from wetland to upland plant community, or the line required to leave sufficient shade as required by WAC 222-30-040, whichever is greater, but shall not be less than 25 feet in width nor more than the maximum widths described in (c) of this subsection, provided that the riparian management zone width shall be expanded as necessary to include wetlands or ponds adjacent to the stream. When the riparian management zone overlaps a Type A or B Wetland or a wetland management zone, the requirement which best protects public resources shall apply.

(a) Harvest units shall be designed so that felling, bucking, yarding or skidding, and reforestation can be accomplished in accordance with these regulations, including those regulations relating to stream bank integrity and shade requirements to maintain stream temperature. Where the need for additional actions or restrictions adjacent to waters not covered by the following become evident, WAC 222-12-050 and 222-12-060 may apply.

(b) When requested in writing by the applicant, the department shall assist in preparation of an alternate plan for the riparian management zone.

(c) Within the riparian management zone, there shall be trees left for wildlife and fisheries habitat as provided for in the chart below. Fifty percent or more of the trees shall be live and undamaged on completion of the harvest. The leave trees shall be randomly distributed where feasible; some clumping is allowed to accommodate operational considerations. The number, size, species and ratio of leave trees, deciduous to conifer, is specified by the bed material and average width of the water type within the harvest unit. Trees left according to (d) of this subsection may be included in the number of required leave trees in this subsection.

| WATER TYPE / AVERAGE WIDTH | RMZ MAXIMUM WIDTH | RATIO OF CONIFER TO DECIDUOUS / MINIMUM SIZE LEAVE TREES | # TREES/1000 FT. EACH SIDE |
|----------------------------|-------------------|--|----------------------------|
| 1 & 2 Water 75' & over | 100' | representative of stand | 50 trees 25 trees |
| 1 & 2 Water under 75' | 75' | representative of stand | 100 trees 50 trees |
| 3 Water 5' & over | 50' | 2 to 1/ 12" or next largest available | 75 trees 25 trees |
| 3 Water less than 5' | 25' | 1 to 1/ 6" or next largest available | 25 trees 25 trees |

| WATER TYPE / AVERAGE WIDTH | RMZ MAXIMUM WIDTH | RATIO OF CONIFER TO DECIDUOUS / MINIMUM SIZE LEAVE TREES | # TREES/1000 FT. EACH SIDE |
|----------------------------|-------------------|--|----------------------------|
| 1 & 2 Water 75' & over | 100' | representative of stand | 50 trees 25 trees |
| 1 & 2 Water under 75' | 75' | representative of stand | 100 trees 50 trees |

| | | | | |
|----------------------|-----|---------------------------------------|----------|----------|
| 3 Water 5' & over | 50' | 2 to 1/ 12" or next largest available | 75 trees | 25 trees |
| 3 Water less than 5' | 25' | 1 to 1/ 6" or next largest available | 25 trees | 25 trees |

| Water Type / Average Width | RMZ Maximum Width | Ratio of Conifer to Deciduous/ Minimum Size Leave Trees | # Trees/1000 ft. each side | |
|----------------------------|-------------------|---|------------------------------|------------------|
| | | | Gravel/ Cobble <10" Diameter | Boulder/ Bedrock |
| 1 & 2 Water 75' & over | 100' | representative of stand | 50 trees | 25 trees |
| 1 & 2 Water under 75' | 75' | representative of stand | 100 trees | 50 trees |
| 3 Water 5' & over | 50' | 2 to 1/ 12" or next largest available | 75 trees | 25 trees |
| 3 Water less than 5' | 25' | 1 to 1/ 6" or next largest available | 25 trees | 25 trees |

"Or next largest available" requires that the next largest trees to those specified in the rule be left standing when those available are smaller than the sizes specified. Ponds or lakes which are Type 1, 2 or 3 Waters shall have the same leave tree requirements as boulder/bedrock streams.

(d) For wildlife habitat within the riparian management zone, leave an average of 5 undisturbed and uncut wildlife trees per acre at the ratio of 1 deciduous tree to 1 conifer tree equal in size to the largest existing trees of those species within the zone. Where the 1 to 1 ratio is not possible, then substitute either species present. Forty percent or more of the leave trees shall be live and undamaged on completion of harvest. Wildlife trees shall be left in clumps whenever possible.

(e) When 10 percent or more of the harvest unit lies within any combination of a riparian management zone of Type 1, 2 or 3 Waters or a wetland management zone and the harvest unit is a clearcutting of 30 acres or less, leave not less than 50 percent of the trees required in (c) of this subsection.

*(4) **Eastern Washington riparian management zones.** These zones shall be measured horizontally from the ordinary high-water mark of Type 1, 2 or 3 Waters and extend to the line where vegetation changes from wetland to upland plant community, or to the line required to leave sufficient shade as required by WAC 222-30-040, whichever is greater, but shall not be less than the minimum width nor more than the maximum widths described in (c) of this subsection, provided that the riparian management zone width shall be expanded as necessary to include wetlands or ponds adjacent to the stream. When the riparian management zone overlaps a Type A or B Wetland or a wetland management zone, the requirement which best protects public resources shall apply.

(a) Harvest units shall be designed so that felling, bucking, yarding or skidding, and reforestation can be accomplished in accordance with these regulations, including those regulations relating to stream bank integrity and shade requirements to maintain stream temperature. Where the need for additional actions or restrictions adjacent to waters

EMERGENCY

not covered by the following become evident, WAC 222-12-050 and 222-12-060 may apply.

(b) When requested in writing by the applicant, the department shall assist in preparation of an alternate plan for the riparian management zone.

(c) Within the riparian management zone, there shall be trees left for wildlife and fisheries habitat as provided for below. Fifty percent or more of the trees shall be live and undamaged on completion of the harvest. The leave trees shall be randomly distributed where feasible; some clumping is allowed to accommodate operational considerations.

(i) The width of the riparian management zone shall be based on the adjacent harvest type as defined in WAC 222-16-010 "Partial cutting." When the adjacent unit harvest type is:

Partial cutting - The riparian management zone width shall be a minimum of 30 feet to a maximum of 50 feet on each side of the stream.

Other harvest types - The riparian management zone shall average 50 feet in width on each side of the stream with a minimum width of 30 feet and a maximum of 300 feet on each side of the stream.

(ii) Leave tree requirements within the riparian management zones of Type 1, 2 or 3 Waters:

(A) Leave all trees 12 inches or less in diameter breast height (dbh); and

(B) Leave all wildlife reserve trees within the riparian management zone where operations in the vicinity do not violate the state safety regulations (chapter 296-54 WAC and chapter 49.17 RCW administered by department of labor and industries, safety division); and

(C) Leave 16 live conifer trees/acre between 12 inches dbh and 20 inches dbh distributed by size, as representative of the stand; and

(D) Leave 3 live conifer trees/acre 20 inches dbh or larger and the 2 largest live deciduous trees/acre 16 inches dbh or larger. Where these deciduous trees do not exist, and where 2 wildlife reserve trees/acre 20 inches or larger do not exist, substitute 2 live conifer trees/acre 20 inches dbh or larger. If live conifer trees of 20 inches dbh or larger do not exist within the riparian management zone, then substitute the 5 largest live conifer trees/acre; and

(E) Leave 3 live deciduous trees/acre between 12 inches and 16 inches dbh where they exist.

(iii) Minimum leave tree requirements per acre for Type 1, 2 and 3 Waters. Trees left for (c)(ii) of this subsection shall be included in the minimum counts.

(A) On streams with a boulder/bedrock bed, the minimum leave tree requirements shall be 75 trees/acre 4 inches dbh or larger.

(B) On streams with a gravel/cobble (less than 10 inches diameter) bed, the minimum leave tree requirement shall be 135 trees/acre 4 inches dbh or larger.

(C) On lakes or ponds the minimum leave tree requirement shall be 75 trees/acre 4 inches dbh or larger.

Note: (See the Forest Practices Board Manual for assistance in calculating trees/acre and average RMZ widths.)

(d) When 10 percent or more of the harvest unit lies within any combination of a riparian management zone of Type 1, 2 or 3 Waters or a wetland management zone and either the harvest unit is a clearcutting of 30 acres or less or

the harvest unit is a partial cutting of 80 acres or less, leave not less than 50 percent of the trees required in (c) of this subsection. (See WAC 222-16-010 "Partial cutting.")

* (5) Riparian leave tree areas. The department will require trees to be left along Type 4 Water where such practices are necessary to protect public resources. Where such practices are necessary leave at least 25 conifer or deciduous trees, 6 inches in diameter or larger, on each side of every 1000 feet of stream length within 25 feet of the stream. The leave trees may be arranged to accommodate the operation.

(6) **Forested wetlands.** Within the wetland, unless otherwise approved in writing by the department, harvest methods shall be limited to low impact harvest or cable systems. Where feasible, at least one end of the log shall be suspended during yarding.

(a) When forested wetlands are included within the harvest area, landowners are encouraged to leave a portion (30 to 70%) of the wildlife reserve tree requirement for the harvest area within a wetland. In order to retain undisturbed habitat within forested wetlands, these trees should be left in clumps. Leave tree areas should be clumped adjacent to streams, riparian management zones, or wetland management zones where possible and they exist within forested wetlands. Green recruitment trees should be representative of the size and species found within the wetland. Leave nonmerchantable trees standing where feasible.

(b) If a RMZ or WMZ lies within a forested wetland, the leave tree requirement associated with those areas may be counted toward the percentages in (a) of this subsection.

(c) If the conditions described in (a) and (b) of this subsection are met, the distribution requirements for wildlife reserve trees and green recruitment trees (subsection (11)(e) of this section) are modified as follows: For purposes of distribution, no point within the harvest unit shall be more than 1000 feet from a wildlife reserve tree and green recruitment tree retention area.

(d) Approximate determination of the boundaries of forested wetlands greater than 5 acres shall be required. Approximate boundaries and areas shall be deemed to be sufficient for harvest operations.

(e) The department shall consult with the department of wildlife, the department of fisheries, and affected Indian tribes about site specific impacts of forest practices on wetland-sensitive species in forested wetlands.

(7) **Wetland management zones (WMZ).** These zones shall apply to Type A and B Wetlands, as indicated in (a) of this subsection, and shall be measured horizontally from the wetland edge or the point where the nonforested wetland becomes a forested wetland, as determined by the method described in the board manual, and shall be of an average width as described in (a) of this subsection. These zones shall not be less than the minimum nor more than the maximum widths described in (a) of this subsection. When these zones overlap a riparian management zone the requirement which best protects public resources shall apply.

* (a) Wetland management zones (WMZ) shall have variable widths based on the size of the wetland and the wetland type, described as follows:

((WETLAND MANAGEMENT ZONE WIDTHS

| Wetland Type | Acres of Nonforested Wetland | Maximum WMZ Width | Average WMZ Width | Minimum WMZ Width |
|--------------|------------------------------|-------------------|-------------------|-------------------|
| A | Greater than 5 | 200 feet | 100 feet | 50 feet |
| A | 0.5 to 5 | 100 feet | 50 feet | 25 feet |
| A Bog/Fen | 0.25 to 0.5 | 100 feet | 50 feet | 25 feet |
| B | Greater than 5 | 100 feet | 50 feet | 25 feet |
| B | 0.5 to 5 | | | 25 feet |
| B | 0.25 to 0.5 | No WMZ Required | | |

WETLAND MANAGEMENT ZONES

| Wetland Type | Acres of Nonforested Wetland* | Maximum WMZ Width | Average WMZ Width | Minimum WMZ Width |
|-----------------------------|-------------------------------|-------------------|-------------------|-------------------|
| A (including bogs and fens) | Greater than 5 | 200 feet | 100 feet | 50 feet |
| A (including bogs and fens) | 0.5 to 5 | 100 feet | 50 feet | 25 feet |
| A (bogs and fens only) | 0.25 to 0.5 | 100 feet | 50 feet | 25 feet |
| B | Greater than 5 | 100 feet | 50 feet | 25 feet |
| B | 0.5 to 5 | | | 25 feet |
| B | 0.25 to 0.5 | No WMZ Required | No WMZ Required | |

(b) Within the WMZ, leave a total of 75 trees per acre of WMZ greater than 6 inches dbh in Western Washington and greater than 4 inches dbh in Eastern Washington, 25 of which shall be greater than 12 inches dbh including 5 trees greater than 20 inches dbh, where they exist. Leave trees shall be representative of the species found within the WMZ.

(c) Retain wildlife reserve trees where feasible. Type 1 and 3 wildlife reserve trees may be counted among, and need not exceed, the trees required in (b) of this subsection. Leave all cull logs on site.

(d) Partial-cutting or removal of groups of trees is acceptable within the WMZ. The maximum width of openings created by harvesting within the WMZ shall not exceed 100 feet as measured parallel to the wetland edge. Openings within WMZs shall be no closer than 200 feet. Landowners are encouraged to concentrate leave trees within the WMZ to the wetland edge.

*(e) Tractors, wheeled skidders, or other ground based harvesting systems shall not be used within the minimum WMZ width without written approval of the department.

*(f) When 10% or more of a harvest unit lies within any combination of a wetland management zone or a riparian management zone of Type 1, 2, or 3 Waters and either the harvest unit is a clearcut of 30 acres or less or the harvest unit is a partial cut of 80 acres or less, leave not less than 50% of the trees required in (b) of this subsection.

*(8) ((~~Nonforested wetlands~~)) Type A or B ((~~Wetlands~~)). Within the boundaries of Type A or B Wetlands the following shall apply:

(a) Individual trees or forested wetland areas less than 0.5 acre in size may occur. These trees have a high habitat

value to the nonforested wetland. Leave individual trees or forested wetlands less than 0.5 acre. These trees may be counted toward the WMZ requirements.

(b) Harvest of upland areas or forested wetlands which are surrounded by Type A or B Wetlands must be conducted in accordance with a plan, approved in writing by the department.

(c) No timber shall be felled into or cable yarded across Type A or B Wetlands without written approval of the department.

(d) Harvest shall not be allowed within a Type A bog or fen.

(9) Future productivity. Harvesting shall leave the land in a condition conducive to future timber production except:

(a) To the degree required for riparian management zones; or

(b) Where the lands are being converted to another use or classified urban lands as specified in WAC 222-34-050.

(10) Wildlife habitat. This subsection is designed to encourage timber harvest practices that would protect wildlife habitats, provided, that such action shall not unreasonably restrict landowners action without compensation.

(a) The applicant should make every reasonable effort to cooperate with the department of wildlife to identify critical wildlife habitats (state) as defined by the board. Where these habitats are known to the applicant, they shall be identified in the application or notification.

(b) Harvesting methods and patterns in established big game winter ranges should be designed to insure adequate access routes and escape cover where practical.

(i) Where practical, cutting units should be designed to conform with topographical features.

(ii) Where practical on established big game winter ranges, cutting units should be dispersed over the area to provide cover, access for wildlife, and to increase edge effect.

(11) Wildlife reserve tree management. In areas where leaving wildlife reserve trees under this section will not create a significant fire hazard, or significant hazard to overhead power lines and operations that are proposed in the vicinity of wildlife reserve trees will not create a significant safety or residential hazard nor conflict with achieving conformance with the limitation of or performance with the provisions of chapter 76.04 RCW (snag falling law) and chapter 49.17 RCW (safety), wildlife reserve trees will be left to protect habitat for cavity nesting wildlife in accordance with the following:

(a) In Western Washington, for each acre harvested 3 wildlife reserve trees, 2 green recruitment trees, and 2 down logs shall be left. In Eastern Washington for each acre harvested 2 wildlife reserve trees, 2 green recruitment trees, and 2 down logs shall be left. Type 1 wildlife reserve trees may be counted, at the landowner's option, either as a wildlife reserve tree or as a green recruitment tree. If adequate wildlife reserve trees are not available, no additional green recruitment trees will be required as substitutes. Landowners shall not under any circumstances be required to leave more than 2 green recruitment trees per acre for the purpose of wildlife reserve tree recruitment, or be required to leave Type 3 or 4 wildlife reserve trees.

(b) In Eastern Washington, for 5 years from the effective date of this subsection where over-story harvest of seed

EMERGENCY

trees left for purpose of reforestation are proposed and less than 10 trees per acre will be harvested within the 5-year period, 50% of the green recruitment trees otherwise required in this subsection may be left.

(c) In Western Washington, only those wildlife reserve trees 10 or more feet in height and 12 or more inches dbh shall be counted toward wildlife reserve tree retention requirements. In Eastern Washington, only those wildlife reserve trees 10 or more feet in height and 10 or more inches dbh shall be counted toward wildlife reserve tree retention requirements. Green recruitment trees, 10 or more inches dbh and 30 or more feet in height and with at least 1/3 of their height in live crown, left standing after harvest may be counted toward green recruitment tree requirements. Green recruitment trees and/or wildlife reserve trees left to meet other requirements of the rules or those left voluntarily by the landowner shall be counted toward satisfying the requirements of this section. Large, live defective trees with broken tops, cavities, and other severe defects are preferred as green recruitment trees. Only down logs with a small end diameter greater than or equal to 12 inches and a length greater than or equal to 20 feet or equivalent volume shall be counted under (a) of this subsection. Large cull logs are preferred as down logs.

(d) In the areas where wildlife reserve trees are left, the largest diameter wildlife reserve trees shall be retained to meet the specific needs of cavity nesters. Where the opportunity exists, larger trees with numerous cavities should be retained and count as recruitment trees.

(e) In order to facilitate safe and efficient harvesting operations, wildlife reserve trees and recruitment trees may be left in clumps. For purposes of distribution, no point within the harvest unit shall be more than 800 feet from a wildlife reserve tree or green recruitment tree retention area. Subject to this distribution requirement, the location of these retention areas and the selection of recruitment trees shall be at the landowner's discretion. Closer spacing of retention areas through voluntary action of the landowner is encouraged. Wildlife reserve tree and green recruitment tree retention areas may include, but are not limited to, riparian management zones, riparian leave tree areas, other regulatory leave areas, or voluntary leave areas that contain wildlife reserve trees and/or green recruitment trees.

(f) In order to provide for safety, landowners may remove any Type 3 or 4 wildlife reserve tree which poses a threat to humans working, recreating, or residing within the hazard area of that tree. In order to provide for fire safety, the distribution of wildlife reserve tree retention areas, described in (e) of this subsection, may be modified as necessary based on a wildlife reserve tree management plan proposed by the landowner and approved by the department.

WSR 94-01-152

EMERGENCY RULES

DEPARTMENT OF FISHERIES

[Order 93-143—Filed December 21, 1993, 1:50 p.m.]

Date of Adoption: December 21, 1993.

Purpose: Commercial fishing regulations.

Citation of Existing Rules Affected by this Order:

Repealing WAC 220-52-073.

Statutory Authority for Adoption: RCW 75.08.080.

Pursuant to RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: Harvestable numbers of red sea urchins are available for an extended fishery this week.

Effective Date of Rule: Immediately.

December 21, 1993

Gene DiDonato
for Robert Turner
Director

NEW SECTION

WAC 220-52-07300R Sea urchins. Notwithstanding the provisions of WAC 220-52-073, effective immediately until further notice, it is unlawful to take or possess sea urchins taken for commercial purposes except as provided for in this section:

(1) Red sea urchins: Sea urchin district 5 is open and will close when the district quota is taken. It is unlawful to harvest red sea urchins greater or smaller in size than the following (size is diameter exclusive of the spines):

(a) 3.25 to 4.5 inches

(b) FISHING PERIODS: Effective immediately through Thursday, December 23, 1993.

Effective December 27, 1993 until the district quota is taken, fishing is open on Monday and Tuesday of each week.

(2) Green sea urchins: Sea urchin districts 1, 2, 5, and Marine Fish/Shellfish Management and Catch Reporting Areas 26B, 26D, and 28A are open Monday and Tuesday only and will close when a total of 600,000 pounds are taken. The minimum size for green sea urchins is 2.25 inches in diameter exclusive of the spines.

(3) In addition to the closed areas shown in WAC 220-52-073, the following areas are closed to the commercial harvest of sea urchins at all times.

(a) Waters of Neah Bay west and south of a line from Klachopis Point to the northern tip of Waadah Island thence westerly to landfall one-quarter mile due south of Koitlah Point.

(b) Waters of Makah Bay east of a line from Waatch Point to Portage Head.

(c) All provisions of WAC 220-52-073 not inconsistent with the provisions of this section remain in effect.

REPEALER

The following section of the Washington Administrative Code is repealed:

WAC 220-52-07300Q Sea urchins. (93-141)

WSR 94-01-154
EMERGENCY RULES
BOARD OF

PILOTAGE COMMISSIONERS

[Filed December 21, 1993, 1:59 p.m., effective December 29, 1993]

Date of Adoption: December 9, 1993.

Purpose: To extend the effective period for an emergency rule amending the tariff for the Grays Harbor pilotage district.

Citation of Existing Rules Affected by this Order: Amending WAC 296-116-185.

Statutory Authority for Adoption: RCW 88.16.035.

Other Authority: RCW 34.05.350(2).

Pursuant to RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: The severe decline in vessel traffic in the Grays Harbor area necessitated an emergency increase in the pilotage tariff to provide revenue for pilotage services. The effective period for the emergency rule adopted September 1, 1993, is expiring and an extension is necessary. The board has been reviewing the facts giving rise to the emergency rule and has noted WAC 296-116-185 for hearing for permanent adoption on January 27, 1994.

Effective Date of Rule: December 29, 1993.

December 21, 1993

Susan P. Jensen

Assistant Attorney General

GRAYS HARBOR PILOTAGE DISTRICT TARIFF

[AMENDATORY SECTION (Amending WSR 93-13-055, filed 6/13/93)]

WAC 296-116-185 Tariffs and pilotage rates for the Grays Harbor pilotage district

CLASSIFICATION OF PILOTAGE SERVICE RATE

Piloting of vessels in the inland waters and tributaries of Grays Harbor:

Each vessel shall be charged according to its draft and tonnage. The draft charges shall be \$61.19 per meter (or \$18.62 per foot) and the tonnage charge shall be \$0.19513 per net registered ton. The minimum net registered tonnage charge is \$682.72. The charge for an extra vessel (in case of tow) is \$390.14.

Boarding fee:

Per each boarding/deboarding from a boat \$294.35

Harbor shifts:

For each shift from dock to dock, dock to anchorage, anchorage to dock, or anchorage to anchorage \$489.40
Delays per hour \$116.70
Cancellation charge (pilot only) \$195.07
Cancellation charge (pilot boat only) . . . \$585.20

Travel allowance:

Boarding or debarking a vessel off Grays Harbor entrance \$90.57

Pilot when traveling to an outlying port to join a vessel or returning through an outlying port from a vessel which has been piloted to sea shall be paid \$682.73 for each day or fraction thereof, and the travel expense incurred \$682.73

Bridge transit:

Charge for each bridge transited \$214.24

Miscellaneous:

The balance of amounts due for pilotage rates not paid within 30 days of invoice will be assessed at 1 1/2% per month late charge.

Reviser's note: The bracketed material preceding the section above was supplied by the code reviser's office.

Reviser's note: RCW 34.05.395 requires the use of underlining and deletion marks to indicate amendments to existing rules. The rule published above varies from its predecessor in certain respects not indicated by the use of these markings.

WSR 94-01-165
EMERGENCY RULES
DEPARTMENT OF AGRICULTURE

[Filed December 21, 1993, 4:04 p.m.]

Date of Adoption: December 21, 1993.

Purpose: To exempt watercore as a quality factor in the Fuji variety of apples. Current grading rules consider damage by invisible watercore as a defect of Washington extra fancy and fancy grades after January 31st of the year following the year of production.

Citation of Existing Rules Affected by this Order: Amending WAC 16-403-145, 16-403-150, and 16-403-290.

Statutory Authority for Adoption: Chapter 15.17 RCW.

Pursuant to RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: The Fuji variety is very new to Washington state with the 1993 crop being approximately the fourth year of commercial production.

EMERGENCY

The 1993 apple harvest was late in general, with Fuji variety being the last harvested variety due to its long growing season requirement. Conclusion of harvest on Fuji was about mid November.

By the time the growers and packers of Fuji apples had opportunity to assess the internal quality of the crop, there was insufficient time remaining to proceed with the normal rule-making process in order for the watercore exemption to become effective by February 1 deadline. (Under the current grade standards, damage by invisible watercore becomes a quality or grade defect following January 31.)

Watercore is not necessarily detrimental to quality unless the apple discolors internally or breaks down, usually following a long storage period of several months. With the relative inexperience in growing Fuji variety in the Pacific Northwest, and the sporadic occurrence of watercore from season to season, it is not yet known how watercore will behave following extended cold storage. This variety may react differently than other varieties, e.g., the Fuji apple may not discolor or breakdown as is sometimes the case with Red Delicious, etc. Given the typical late harvesting dates for Fuji, the storage period prior to February 1 is obviously must shorter for Fuji than for other red varieties of apples.

Under Washington extra fancy and fancy grades, damage by invisible watercore is considered a defect of grade and must be held to the combined tolerances with all other external grade factors, following January 31. The same is true for U.S. extra fancy and fancy. The only permissible grade available for watercore damaged fresh market apples is U.S. No. 1.

The Fuji variety is currently marketed heavily overseas and commands a premium price due to its limited production. The Washington Growers Clearing House Bulletin No. 12, November 16, 1993, reported Washington extra fancy grade Fuji for export ranged in price from \$40 to \$60 per carton, 72 size and larger. Size 100s were quoted at \$20 to \$24. In comparison, Red Delicious were at \$12 to \$22, and \$11 to \$18 respectively for the same grade and sizes.

By requiring this variety to be sold as U.S. No. 1 grade, a very substantial price discount will occur, in that the U.S. No. 1 grade is generally viewed as being a minimum level of commercial quality in apples.

As production increases and the industry gains added experience with storage and postharvest condition in the Fuji variety, the need may arise for reevaluation of this factor as a grade defect. In the interim, however, it does not seem appropriate to classify and treat watercore in Fuji in the same manner as other earlier season red varieties of apple. doing so artificially devalues a very high demand product and diminishes returns to producers.

Effective Date of Rule: Immediately.

December 20, 1993

James M. Jesernig

Director

AMENDATORY SECTION (Amending Order 1374, filed 7/26/74, effective 9/1/74)

WAC 16-403-145 Red, partial red or blushed varieties—Washington extra fancy. ((+)) Washington extra fancy consists of apples of one variety which are mature but not overripe, carefully hand picked, clean, fairly

well formed; free from decay, internal browning, internal breakdown, scald, scab, bitter pit, Jonathan spot, freezing injury, visible watercore, and broken skins and bruises except those which are slight and incident to proper handling and packing. The apples are also free from injury caused by smooth net-like russetting, sunburn or spray-burn, limb rubs, hail, drought spots, scars, disease, insects, or other means; and free from damage by smooth solid, slightly rough or rough russetting, or stem or calyx cracks, and free from damage by invisible watercore after January 31st of the year following the year of production: Provided, That invisible watercore shall not be a quality factor of Fuji variety at any time of the year. Each apple of this grade has the amount of color specified in WAC 16-403-155 for the variety.

AMENDATORY SECTION (Amending Order 1374, filed 7/26/74, effective 9/1/74)

WAC 16-403-150 Red, partial red or blushed varieties—Washington fancy. ((+)) Washington fancy consists of apples of one variety which are mature but not overripe, carefully hand picked, clean, fairly well formed; free from decay, internal browning, internal breakdown, bitter pit, Jonathan spot, scald, freezing injury, visible watercore, and broken skins and bruises, except those which are incident to proper handling and packing. The apples are also free from damage caused by russetting, sunburn or sprayburn, limb rubs, hail, drought spots, scars, stem or calyx cracks, disease, insects, invisible watercore after January 31st of the year following the year of production, or damage by other means: Provided, That invisible watercore shall not be a quality factor of Fuji variety at any time of the year. Each apple of this grade has the amount of color specified in WAC 16-403-155 for the variety.

AMENDATORY SECTION (Amending Order 1374, filed 7/26/74, effective 9/1/74)

WAC 16-403-290 Damage by invisible watercore. (See chart below.)

DAMAGE BY INVISIBLE WATERCORE

affects:

Wash. extra fancy and Wash. fancy grades, except Fuji variety, after *February 1 of year following production* and affecting U.S. condition standards for export *anytime*.

THIS

- 1. existing around core and extending to watercore in vascular bundles

OR THIS

- 2. surrounding vascular bundles when affected areas around three or more bundles meet or coalesce

OR THIS

- 3. more than slight degree outside circular area formed by vascular bundles

WSR 94-01-188
EMERGENCY RULES
OFFICE OF MINORITY AND
WOMEN'S BUSINESS ENTERPRISES
 [Filed December 22, 1993, 10:17 a.m.]

Purpose: To implement a system for charging political subdivisions in Washington state a portion of OMWBE's biennial budget pursuant to legislative mandate.

Statutory Authority for Adoption: RCW 39.19.220.

Pursuant to RCW 34.05.350 the agency for good cause finds that immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.

Reasons for this Finding: The effective date of the legislation was July 1, 1993. The office is dependent on these revenues since it is no longer supported by the state's general fund. Many political subdivisions are either unaware of the requirement of await instructions on how to comply with the law.

Effective Date of Rule: Immediately.

December 22, 1993
 James A. Medina
 Director

NEW SECTION

WAC 326-02-034 Political subdivision fees. It is the intent of the state legislature that political subdivisions within the state of Washington contribute to the costs of the state's certification program for minority and women's business enterprises. For the purpose of this section, political subdivisions means any city, town, county, special purpose district, public corporation created by the state, municipal corporation, or quasi-municipal corporation within the state of Washington.

EMERGENCY

(1) Effective July 1, 1993, the office shall charge a fee to political subdivisions for a portion of the office's biennial operational costs, to be prorated based on the relative expenditures for public works by each political subdivision.

(2) The office shall allocate a portion of its biennial cost of operations to the political subdivisions as a group. Each political subdivision shall pay the percentage of this allocation which is equal to its proportionate share as calculated in subparagraph three (b) of this section.

(3) The fee for the period, July 1, 1993 - June 30, 1995, will be determined as follows:

(a) Each political subdivision shall report to the office the total public works contract dollars committed (including direct awards, subcontracts, and suppliers) in calendar years 1991-1992 to businesses certified by the office.

(b) The sum of these commitments will be divided by the commitment of each political subdivision to calculate proportionate share. The proportionate share will be adjusted as additional political subdivisions participate in the program.

(4) For succeeding biennia, the political subdivisions shall report the total public works contract dollars committed (including direct awards, subcontracts, and suppliers) during the two preceding calendar years to businesses certified by the office. The proportionate share for each political subdivision will be determined as set forth in subparagraph three (b) of this section.

(5) The office will mail invoices on a quarterly basis. Payments shall be made within thirty calendar days after receipt of the invoice; Provided, that the first payment shall be made no later than January 30, 1994 and shall cover the period of July 1, 1993 through December 31, 1993.

RULES OF COURT
STATE SUPREME COURT
 [December 21, 1993]

IN THE MATTER OF THE ADOPTION
 OF THE AMENDMENTS
 TO RAP 9.2, RAP 9.3, RAP 9.4,
 RAP 9.5 AND CR 80

ORDER
 NO. 25700-A-537

The Video Evaluation Committee having recommended the adoption of the proposed amendments to RAP 9.2, RAP 9.3 RAP 9.4, RAP 9.5 and CR 80, and the Court having determined that the proposed amendments will aid in the prompt and orderly administration of justice and further determined that an emergency exists which necessitates an early adoption;

Now, therefore, it is hereby

ORDERED:

(a) That the amendments as attached hereto are adopted.

(b) That pursuant to the emergency provisions of GR 9(i), the amendments will be published expeditiously in the Washington Reports and will become effective upon publication.

DATED at Olympia, Washington this 2nd day of December, 1993.

RAP 9.2
Verbatim Report of Proceedings
Suggested Rule Change
GR 9(d) Cover Sheet

(1) **Background.** The amendment to RAP 9.2 was initiated by the Video Evaluation Committee. It is part of a series of rule changes proposed by the Committee to set forth appellate procedures to be used when the proceeding on appeal was recorded on videotape.

There are currently 17 superior courts in the state that use video to record trial proceedings. Preparing a transcript from videotapes raises issues not present when a court reporter is involved. If a court reporter records the proceedings, the party can order a transcript from the reporter. When the proceeding has been recorded on videotape, there are no procedures for how to order a transcript or on who should prepare the transcript. Through a series of rule changes, the Committee is recommending procedures that will ensure an accurate record is produced.

(2) **Purpose.** Rule 9.2 states the procedures for having a written transcript prepared, including the filing of the statement of arrangements, the content of the transcript, payment of expenses, table of contents, and the format of the transcript. The proposed change would incorporate proce-

dures when the proceeding on review was recorded on videotape.

The proposed change to section (a) would require would require transcripts from videotaped proceedings be prepared by a court-approved transcriber under procedures developed by the Office of the Administrator for the Courts (OAC). The intent of this provision is to delegate to OAC the responsibility for developing specific procedures for how a party can make arrangements to have a transcript prepared and to set standards for who can prepare the transcript.

(3) **Washington State Bar Association Action.** None.

(4) **Supporting Material.** The final report of the Video Evaluation Committee, August, 1992.

(5) **Spokesperson.** Judge Ray E. Munson, Chair, Video Evaluation Committee.

(6) **Hearing.** Not recommended.

RAP 9.2
VERBATIM REPORT OF PROCEEDINGS

(a) **Transcription and Statement of Arrangements.** If the party seeking review intends to provide a verbatim report of proceedings, the party should arrange for transcription of and payment for an original and one copy of the verbatim report of proceedings within 45 days after acceptance of review. If the proceeding being reviewed was recorded on videotape, transcription of the videotapes shall be completed by a court-approved transcriber in accordance with procedures developed by the Office of Administrator for the Courts. Copies of these procedures are available at the court administrator's office in each county where there is a courtroom that videotapes proceedings or through the Office of the Administrator for the Courts. The party seeking review must file with the appellate court a statement that arrangements have been made for the transcription of the report. The statement must be filed within 45 days after acceptance of review. The party must indicate the date that the statement was ordered and the financial arrangements which have been made for payment of transcription costs.

(b) **Content.** A party should arrange for the transcription of only those portions of the verbatim report of proceedings necessary to present the issues raised on review. If the party seeking review intends to urge that a verdict or finding of fact is not supported by the evidence, the party should include in the record all evidence relevant to the disputed verdict or finding. If the party seeking review intends to urge that the court erred in giving or failing to give an instruction, the party should include in the record all of the instructions given, the relevant instructions proposed, the party's objections to the instructions given, and the court's ruling on the objections.

(c) **Notice of Partial Report of Proceedings and Issues.** If a party seeking review arranges for less than all of the verbatim report of proceedings, the party should file and serve on all other parties within 45 days after review is accepted a description of the parts of the verbatim report of proceedings which the party intends to include in the record and a statement of the issues the party intends to present on review. Any other party who wishes to add to the verbatim report of proceedings should within 10 days after service of the description and notice file and serve on all other parties a designation of additional parts of the verbatim report of proceedings. If the party seeking review refuses to provide

MISCELLANEOUS

the additional parts of the verbatim report of proceedings, the party seeking the additional parts may provide them at the party's own expense or apply to the trial court for an order requiring the party seeking review to pay for the additional parts of the verbatim report of proceedings.

(d) **Payment of Expenses.** If a party fails to make arrangements for payment of the costs of the verbatim report of proceedings at the time the verbatim report of proceedings is ordered, the party may be subject to sanctions as provided in rule 18.9.

(e) **Table of Contents.** The verbatim report of proceedings should include a table of contents indicating, under the headings listed below, the pages where the following appear:

(1) *Proceedings.* The beginning of each proceeding and the nature

RAP 9.3
Narrative Report of Proceedings
Suggested Rule Change
GR 9(d) Cover Sheet

(1) Background. The amendment to RAP 9.3 was initiated by the Video Evaluation committee. It is part of a series of rule changes proposed by the Committee to set forth appellate procedures to be used when the proceeding on appeal was recorded on videotape.

There are currently 17 superior courts in the state that use video to record trial proceedings. Preparing a transcript from videotapes raises issues not present when a court reporter is involved. If a court reporter records the proceedings, the party can order a transcript from the reporter. When the proceeding has been recorded on videotape, there are no procedures for how to order a transcript or on who should prepare the transcript. Through a series of rule changes, the Committee is recommending procedures that will ensure an accurate record is produced.

(2) Purpose. Rule 9.3 provides that the party seeking review may prepare a narrative report of proceedings. The proposed change adds a new line providing that an agreed report of proceedings may be prepared if either the court reporter notes or the videotape of the proceeding being reviewed are lost or damaged.

The purpose of the proposed change is to address the issue of a lost or damaged record, whether the record is a videotape or reporter's notes. The proposed language to this rule would not require a narrative report of proceedings to be prepared if one of these situations occurred, but would permit one to be prepared. The same language is proposed for RAP 9.4, which covers an agreed report of proceedings. Adoption of both these amendments would provide the party seeking review to with two options for a substitute record if the original record is lost or destroyed.

(3) Washington State Bar Association Action. None.

(4) Supporting Material. The final report of the Video Evaluation Committee, August, 1992.

(5) Spokesperson. Judge Ray E. Munson, Chair, Video Evaluation Committee.

(6) Hearing. Not recommended.

RAP 9.3
NARRATIVE REPORT OF PROCEEDINGS

The party seeking review may prepare a narrative report of proceedings. A party preparing a narrative report must

exercise the party's best efforts to include a fair and accurate statement of the occurrences in and evidence introduced in the trial court material to the issues on review. A narrative report should be in the same form as a verbatim report, as provided in rule 9.2 (e) and (f). If any party prepares a verbatim report of proceedings, that report will be used as the report of proceedings for the review. An agreed report of proceedings may be prepared if either the court reporter's notes or the videotape of the proceeding being reviewed are lost or damaged.

RAP 9.4
Agreed Report of Proceedings
Suggested Rule Change
GR 9(d) Cover Sheet

(1) Background. The amendment to RAP 9.4 was initiated by the Video Evaluation Committee. It is part of a series of rule changes proposed by the Committee to set forth appellate procedures to be used when the proceeding on appeal was recorded on videotape.

There are currently 17 superior courts in the state that use video to record trial proceedings. Preparing a transcript from videotapes raises issues not present when a court reporter is involved. If a court reporter records the proceedings, the party can order a transcript from the reporter. When the proceeding has been recorded on videotape, there are no procedures for how to order a transcript or on who should prepare the transcript. Through a series of rule changes, the Committee is recommending procedures that will ensure an accurate record is produced.

(2) Purpose. Rule 9.4 provides that the parties may prepare and sign an agreed report of proceedings. The proposed change adds a new line providing that an agreed report of proceedings may be prepared if either the court reporter notes or the videotape of the proceeding being reviewed are lost or damaged.

The purpose of the proposed change is to address the issue of a lost or damaged record, whether the record is a videotape or reporter's notes. The proposed language to this rule would not require an agreed report of proceedings to be prepared if one of these situations occurred, but would permit one to be prepared. The same language is proposed for RAP 9.3, which covers a narrative report of proceedings. Adoption of both these amendments would provide the parties with two options for a substitute record if the original record is lost or destroyed.

(3) Washington State Bar Association Action. None.

(4) Supporting Material. The final report of the Video Evaluation Committee, August, 1992.

(5) Spokesperson. Judge Ray E. Munson, Chair, Video Evaluation Committee.

(6) Hearing. Not recommended.

RAP 9.4
AGREED REPORT OF PROCEEDINGS

The parties may prepare and sign an agreed report of proceedings setting forth only so many of the facts averred and proved or sought to be proved as are essential to the decision of the issues presented for review. The agreed report of proceedings must include only matters which were actually before the trial court. An agreed report of proceedings should be in the same form as a verbatim report, as

provided in rule 9.2 (e) and (f). An agreed report of proceedings may be prepared if either the court reporter's notes or the videotape of the proceeding being reviewed are lost or damaged.

RAP 9.5
Filing and Service of Report of
Proceedings - Objections
Suggested Rule Change
GR 9(d) Cover Sheet

(1) Background. The amendment to RAP 9.5 was initiated by the Video Evaluation Committee. It is part of a series of rule changes proposed by the Committee to set forth appellate procedures to be used when the proceeding on appeal was recorded on videotape.

There are currently 17 superior courts in the state that use video to record trial proceedings. Preparing a transcript from videotapes raises issues not present when a court reporter is involved. If a court reporter records the proceedings, the party can order a transcript from the reporter. When the proceeding has been recorded on videotape, there are no procedures for how to order a transcript or on who should prepare the transcript. Through a series of rule changes, the Committee is recommending procedures that will ensure an accurate record is produced.

(2) Purpose. The current rule in section (b) refers to a court reporter as the person who prepares and files the transcript. The proposed change would provide that a person transcribing video can also prepare and file the transcript. The purpose of this change is to make it clear that a videotape can be transcribed by someone who is not a court reporter.

Another change in section (b) would add that the sanctions for failure to timely file the verbatim report of proceedings are those provided in Rule 18.9. Rule 9.5 currently says only that the transcriber may be subject to sanctions. Rule 18.9 states that a person authorized to prepare a verbatim report of proceedings who uses the rules for the purpose of delay or who fails to comply with these rules may be ordered to pay terms or compensatory damages to any other party who has been harmed by the delay or the failure to comply. The purpose of this change is to notify the transcribers what sanctions may be applied.

(3) Washington State Bar Association Action. None.

(4) Supporting Material. The final report of the Video Evaluation committee, August, 1992.

(5) Spokesperson. Judge Ray E. Munson, Chair, Video Evaluation Committee.

(6) Hearing. Not recommended.

RAP 9.5
FILING AND SERVICE OF REPORT OF
PROCEEDINGS—OBJECTIONS

(a) Generally. The party seeking review must file the report of proceedings with the clerk of the trial court within 90 days after review is accepted by the appellate court, except that the court reporter must file a verbatim report of proceedings. If the proceeding being reviewed was recorded on videotape, the transcript must be filed by the transcriber with the clerk of the trial court within 90 days after review is accepted by the appellate court. The party who caused a report of proceedings to be filed should at the time of filing

the report of proceedings serve one copy on an adverse party and serve and file proof of the service on all other parties.

(b) Filing and Service of Verbatim Report of Proceedings. If a verbatim report of proceedings cannot be completed within 90 days after review is accepted by the appellate court, the court reporter or video transcriber shall, no later than 10 days before the report of proceedings is due to be filed, submit an affidavit stating the reasons for the delay to the party who filed the statement of arrangements; the party should move for an extension of time from the appellate court. The clerk will notify the parties of the action taken on the motion. When the court reporter or video transcriber files the verbatim report of proceedings, ~~the reporter shall provide~~ a copy shall be provided to the party who ~~has~~ arranged for transcription and either the reporter or video transcriber shall serve and file notice of the filing on all other parties. Failure to timely file the verbatim report of proceedings may subject the court reporter or video transcriber to sanctions as provided in rule 18.9.

(c) Objections to Report of Proceedings. A party may serve and file objections to, and propose amendments to, a narrative report of proceedings or a verbatim report of proceedings within 10 days after receipt of the report of proceedings or receipt of the notice of filing of the report of proceedings. If objections or amendments to the report of proceedings are served and filed, any objections or proposed amendments must be heard by the trial court judge before whom the proceedings were held for settlement and approval, except objections to the form of a report of proceedings, which shall be heard by motion in the appellate court. The court may direct a party or a reporter or typist transcribing videotape to pay for the expense of any modifications of the proposed report of proceedings. The motion procedure of the court deciding any objections shall be used in settling the report of proceedings.

(d) Substitute Judge May Settle Report of Proceedings. If the judge before whom the proceedings were held is for any reason unable to promptly settle questions as provided in section (a), another judge may act in the place of the judge before whom the proceedings were held.

(e) Use of Copy of Report of Proceedings. The party who has the right to file the next brief must be given the use of the copy of the report of proceedings. If more than one party has the right to file the next brief, the parties must cooperate in the use of the report of proceedings. When all briefs are filed, the copy of the report of proceedings should be returned to the party who paid for it.

CR 80
Court Reporters
Suggested Rule Change
GR9(d) Cover Sheet

(1) Background. The amendment to CR 80 was initiated by the Video Evaluation Committee. It is part of a series of rule changes proposed by the Committee to set forth appellate procedures to be used when the proceeding on appeal was recorded on videotape.

There are currently 17 superior courts in the state that use video to record trial proceedings. Preparing a transcript from videotapes raises issues not present when a court reporter is involved. If a court reporter records the proceedings, the party can order a transcript from the reporter.

When the proceeding has been recorded on videotape, there are no procedures for how to order a transcript or on who should prepare the transcript. Through a series of rule changes, the Committee is recommending procedures that will ensure an accurate record is produced.

(2) Purpose. This rule allows electronic recording devices to be used to record oral testimony in any civil or criminal proceeding. The proposed change would require all superior courts that elect to use video equipment to record proceedings to comply with courtroom procedures published by the Office of the Administrator for the courts.

The purpose of this change is to require all courts that elect to use video to conform to standards recommended by the Video Evaluation Committee. The standards are necessary to ensure an accurate record of the proceedings is made; the tapes are maintained and stored properly; the tapes are certified; the tapes are available for the attorneys, appellate court, or transcriptionist; reviewers have an accurate and complete log of the activity on each tape; and a simplified tape numbering and citing system is used.

The recommendations for superior and appellate court procedures are detailed in the Committee's report.

(3) Washington State Bar Association Action. None.

(4) Supporting Material. The final report of the Video Evaluation Committee, August, 1992.

(5) Spokesperson. Judge Ray E. Munson, Chair, Video Evaluation Committee.

(6) Hearing. Not recommended.

**Rule 80
COURT REPORTERS**

(a) [Reserved.]

(b) **Electronic Recording.** In any civil or criminal proceedings, electronic or mechanical recording devices approved by the Administrator for the Courts may be used to record oral testimony and other oral proceedings in lieu of or supplementary to causing shorthand notes thereof to be taken. In all matters the use of such devices shall rest within the sole discretion of the court.

(c) **Recording Proceedings in Superior Court by Means of Videotape.** All superior courts that elect to use video equipment to record proceedings shall comply with courtroom procedures published by the Office of the Administrator for the Courts.

Reviser's note: The typographical errors in the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

Reviser's note: The brackets and enclosed material in the text of the above section occurred in the copy filed by the agency and appear in the Register pursuant to the requirements of RCW 34.08.040.

RULES OF COURT
STATE SUPREME COURT
[December 21, 1993]**

IN THE MATTER OF THE ADOPTION OF AMENDMENT TO GR 12 ORDER NO. 25700-A-540

The Court having approved the adoption of the proposed amendment to GR 12, and having determined that the

proposed amendment will aid in the prompt and orderly administration of justice and further determined that an emergency exists which necessitates an early adoption;

Now, therefore, it is hereby

ORDERED:

(a) That the amendment as attached hereto is adopted.

(b) That pursuant to the emergency provisions of GR 9(i), the amendment will be published expeditiously in the Washington Reports and will become effective upon publication.

DATED at Olympia, Washington this 2nd day of December, 1993.

James A. Andersen

Utter, J.

Smith, J.

Durham, J.

Guy, J.

Brachtenbach, J.

Johnson, J.

Dolliver, J.

Madsen, J.

**GR 12
WASHINGTON STATE BAR ASSOCIATION: PURPOSES
INFORMATIONAL NOTE**

During the 1993 regular legislative session EHB 1152 was passed. That legislation amends RCW 41.56.020 by providing that while recognizing the separation of powers and responsibilities in government, "the legislature strongly encourages the state supreme court to adopt collective bargaining for the employees of the Washington state bar association".

The proposed amendment confers upon the Washington State Bar Association's Board of Governors the authority, in its discretion, to adopt collective bargaining for employees of that association.

**GENERAL RULE 12
WASHINGTON STATE BAR ASSOCIATION: PURPOSES**

(a) **Purposes; In General.** (Unchanged)

(b) **Specific Activities Authorized.** Among the specific Bar Association activities authorized by this rule and the stated purposes are:

(1)—(15) (Unchanged)

(16) Authorizing, in its discretion, collective bargaining for its employees.

(c) **Activities Not Authorized.** (Unchanged)

NOTICE OF PUBLIC MEETINGS
DEPARTMENT OF ECOLOGY
[Memorandum—December 3, 1993]**

The Washington State Department of Ecology will be conducting a public hearing on January 12, 1994, at the Yakima County Courthouse, 128 North 2nd, Room 420, Yakima, WA, at 7:00 p.m. The purpose of the hearing is to

MISCELLANEOUS

solicit comments on the addition of contingency measures to Yakima PM₁₀ (particulate matter) attainment plan to meet federal state implementation plan (SIP) requirements. The two proposed contingency measures are a woodstove buy back program and a ban on the sale of uncertified woodstoves after January 1, 1995.

Interested persons will be allowed to provide oral comments at the hearings. Written comments are encouraged and will be considered if postmarked no later than January 14, 1994. Comments should be addressed to Cathy Hubbard, Department of Ecology, P.O. Box 47600, Olympia, WA 98504-7600. For more information on the contents of this SIP submittal prior to the hearings, please contact Cathy Hubbard at (206) 407-6890.

Ecology is an equal opportunity and affirmative action employer. If you have special accommodation needs, please call Lydia Blalock, (206) 407-6860 (voice) or (206) 407-6206 (TDD).

NOTICE OF PUBLIC MEETINGS
MARITIME COMMISSION
 [Memorandum—December 3, 1993]

The monthly meetings of the Washington State Maritime Commission will, during 1994, continue to be held at 9:00 a.m. on the first Thursday of each month, commencing January 6, 1994. However, the place of the monthly meetings has been changed and will henceforth be held at the Marine Exchange Conference Center, First Floor, 2701 1st Avenue, Seattle, WA 98121.

In the event the scheduled meeting date may fall on a legal holiday, the meeting will be held on the next week day of that month which is not a holiday, or at such later date as shall have been prescribed by the commission at its previous regular monthly meeting. The commission's annual meeting, for the purpose of electing officers and transacting other business will continue to be on the first Thursday in October.

WSR 94-01-133
NOTICE OF PUBLIC MEETINGS
DEPARTMENT OF
NATURAL RESOURCES
 (Forest Practices Board)
 [Memorandum—December 20, 1993]

Per WAC 222-08-040, the Forest Practices Board will hold regular meetings on:

- February 9, 1994
- May 11, 1994
- August 10, 1994
- November 9, 1994

The board has also scheduled special meetings in 1994. this schedule is tentative and is subject to change. The dates being held are:

- January 18 and 19, 1994
- March 10, 1994
- April 14, 1994
- June 8, 1994
- July 13, 1994
- September 14, 1994
- October 12, 1994
- December 14, 1994

Most of these meetings will be held in Conference Room 172 of the Natural Resources Building in Olympia. Notice of other meeting locations will be published in the Register.

For more information on regular and/or special meetings, call the Forest Practices Board recording secretary at (206) 902-1413, or write:

ATTORNEY GENERAL OPINION
Cite as: AGO 1993 No. 18
 [December 9, 1993]

COLLEGES AND UNIVERSITIES—CONTRACTS—CORPORATIONS—EMPLOYERS AND EMPLOYEES—SALARIES AND WAGES—GIFTS—INVESTMENTS—Relationship between universities and nonprofit organizations that engage in fund-raising activities for them

1. Institutions of higher education have the authority to enter into contracts deemed essential to the institution and to accept and solicit gifts. If there is consideration flowing to the institution, it has the authority to provide goods and services to a private nonprofit organization, including the use of institution employees to solicit gifts, in exchange for fund-raising and other assistance from the organization.
2. The statute of frauds, RCW 19.36.010, provides that any agreement not to be performed in one year from the making thereof shall be void. Thus, any agreement between an institution of higher education and a nonprofit organization should be in writing if it is not to be performed in one year.

MISCELLANEOUS

3. If employees of an institution of higher education solicit gifts pursuant to an agreement between the institution and a nonprofit organization, the gifts become the property of the nonprofit organization if that is the intent of the donor.
4. An institution of higher education cannot provide state employee benefits to employees of a private nonprofit organization that is not an agency of the state. Employees of such institutions who perform services for a nonprofit organization, pursuant to an agreement between the institution and the organization, remain state employees entitled to state employee benefits.
5. A gift to an institution of higher education, that is not designated for a specific fund, need not be deposited in the state general fund. The Legislature has given these institutions authority to determine how private donations shall be used so long as that use is consistent with the intent of the donor.
6. Funds donated to an institution of higher education are subject to the Uniform Management of Institutional Funds Act, chapter 24.44 RCW. Unless prohibited by the intent of the donor, RCW 24.44.030(3) provides that funds donated to an institution may be pooled with the funds or other investors. This would include funds donated to a private nonprofit organization.
7. If a donor makes a gift to an institution of higher education, the ownership of the gift may not be subsequently transferred to a private nonprofit organization. Such a transfer would be contrary to the intent of the donor.

Requested by:

Honorable Brian Sonntag
 State Auditor
 Legislative Building, MS 40021
 Olympia, Washington 98504-0021

 [December 15, 1993]

COLLEGES AND UNIVERSITIES—PUBLIC WORKS AND IMPROVEMENTS—CONTRACTS—APPRENTICESHIPS—
 Authority of a university to impose a bidding prequalification requirement that contractors must have an apprenticeship program.

A prequalification requirement prohibits a contractor from bidding on a public works contract unless the requirement is satisfied. There is no statute that establishes a prequalification requirement that contractors must have an apprenticeship program. In absence of such a statute, a university does not have the authority to establish such a prequalification requirement.

NOTICE OF PUBLIC MEETINGS
PARKS AND RECREATION
COMMISSION
 [Memorandum—December 17, 1993]

The following is the schedule for the 1994 regular meetings of the Washington State Parks and Recreation Commission.

| DATE | LOCATION |
|-------------|------------|
| January 28 | Spokane |
| March 11 | Olympia |
| April 22 | Wenatchee |
| June 10 | Yakima |
| July 22 | Bellingham |
| September 9 | Olympia |
| October 21 | Olympia |
| December 2 | Seattle |

All commission meetings will begin at 9:00 a.m. on the day scheduled. The exact locations are yet to be determined, except for the January meeting, which will be held at Cavanaugh's Inn at the Park, West 303 North River Drive, Spokane.

Locations of the next regular meeting will be announced at the close of each regular meeting and may also be obtained thereafter by writing to the Director, Washington State Parks and Recreation Commission, P.O. Box 42650, Olympia, WA 98054-2650 or by calling (206) 753-5758.

In accordance with Executive Order 83-19, meeting sites will be selected which are barrier free to the greatest extent feasible. Braille or taped agenda items for the visually impaired and interpreters for those with hearing impairments will be provided if requested with adequate notice. Such requests should usually be made at least 10 working days in advance of the scheduled meeting date and should be sent to the state parks address in the above paragraph.

DEPARTMENT OF ECOLOGY**

[Filed December 21, 1993, 4:28 p.m.]

Shown below is ecology's annual rule plan for 1994. This plan includes rules that are being amended (improved by making changes to an existing rule), rules that are being adopted (new rules that do not yet exist), and rules that are being repealed (removed from the books).

This document is an estimation of rule activity in the Department of Ecology in 1994. Timelines are approximated. All rules listed in this plan should have some activity in 1994. However, rule development for some of the rules began in 1993 or before.

The following definitions will help you better understand the enclosed information:

Estimated Initiation Date - refers to the month or year the

rule development plan was begun or will begin

Estimated Proposal - refers to formal rule proposal filed with the Code Reviser

Estimated Adoption - refers to adoption of the rule by the agency director and filing of the rule with the Code Reviser

An annual rule plan will be available from the Department of Ecology in December of each year and will be updated quarterly. For up-to-date information regarding a particular rule, please contact the person listed. For general information regarding rule development in the Department of Ecology, please contact the rules coordinator at (206) 407-6161.

ATTORNEY GENERAL'S OPINION
 [Filed December 22, 1993, 10:21 a.m.]

NOTICE OF REQUEST FOR ATTORNEY GENERAL'S OPINION
 WASHINGTON ATTORNEY GENERAL

The Washington Attorney General issues formal published opinions in response to requests by the heads of state agencies, state legislators, and county prosecuting attorneys. When it appears that individuals outside the Attorney General's Office have information or expertise that will assist in the preparation of a particular opinion, a summary of that opinion request will be published in the state register. If you are interested in commenting on a request listed in this volume of the register, you should notify the Attorney General's Office of your interest by January 19, 1994. This is not the due date by which comments must be received. However, if you do not notify the Attorney General's Office of your interest in commenting on an opinion request by January 19, 1994, the opinion may be issued before your comments have been received. You may notify the Attorney General's Office of your intention to comment by calling (206) 753-4114, or by writing to the Solicitor General, Office of the Attorney General, 905 Plum Street, P.O. Box 40100, Olympia, WA 98504-0100. When you notify the office of your intention to comment, you will be provided

MISCELLANEOUS

with a copy of the opinion request in which you are interested; information about the Attorney General's Opinion process; information on how to submit your comments; and a due date by which your comments must be received to ensure that they are fully considered.

The Attorney General's Office seeks public input on the following opinion requests.

93-11-9 Request by Senator Betti Sheldon

Question regarding the definition of "insurance benefit allocation" in RCW 28A.400.200.

Table of WAC Sections Affected

KEY TO TABLE

This table covers the current calendar year through this issue of the Register and should be used to locate rules amended, adopted, or repealed subsequent to the publication date of the latest WAC or Supplement.

Symbols:

- AMD = Amendment of existing section
- A/R = Amending and recodifying a section
- DECOD = Decodification of an existing section
- NEW = New section not previously codified
- OBJEC = Notice of objection by Joint Administrative Rules Review Committee
- PREP = Preproposal comments
- RE-AD = Readoption of existing section
- RECOD = Recodification of previously codified section
- REP = Repeal of existing section
- RESCIND = Rescind previous emergency rule
- REVIEW = Review of previously adopted rule

Suffixes:

- P = Proposed action
- C = Continuance of previous proposal
- E = Emergency action
- S = Supplemental notice
- W = Withdrawal of proposed action
- No suffix means permanent action

WAC # shows the section number under which an agency rule is or will be codified in the Washington Administrative Code.

WSR # shows the issue of the Washington State Register where the document may be found; the last three digits identify the document within the issue.

WASHINGTON STATE REGISTER Subscriptions

To: Subscription Clerk
WASHINGTON STATE REGISTER
Code Reviser's Office
PO Box 40552
Olympia, WA 98504-0552

I would like to order _____ subscription(s) to the WASHINGTON STATE REGISTER, at an annual rate of \$188.83, sales tax included (\$175 for state agencies). Enclosed is my check or money order for \$_____. Please start my subscription with the January issue of 1994.

NAME _____

ADDRESS _____

THE WASHINGTON STATE REGISTER, published pursuant to RCW 34.08.020, is distributed on the first and third Wednesdays of each month. The Register contains the full text of proposed, emergency, and permanently adopted rules of state agencies, executive orders of the governor, notices of public meetings of state agencies, rules of the state supreme court, summaries of attorney general opinions, and juvenile disposition standards that have been filed in the code reviser's office before the pertinent closing date for that issue of the Register. A cumulative table of existing sections of the Washington Administrative Code (WAC) affected by a particular agency action guides the user to the proper volume of the Register.

The code reviser's office has established an annual subscription price of \$175 for a Register subscription, and single copies will cost \$7.50. Sales tax of 7.9% now applies to all sales other than to state agencies. State law requires payment in advance. To subscribe to the Register, please complete the order form above and forward it to the address indicated, accompanied by your check or money order in the amount of \$188.83 (\$175 for state agencies) payable to the code reviser's office.
