**RCW 28B.30.515 Findings—University Center of North Puget Sound—  
Management and leadership.**

(1) The legislature finds that access to baccalaureate and graduate degree programs continues to be limited for residents of north Snohomish, Island, and Skagit counties. Studies conducted by the state board for community and technical colleges, the \*higher education coordinating board, and the council of presidents confirm that enrollment in higher education compared to demand in this geographic region lags behind enrollment in other parts of the state, particularly for upper-division courses leading to advanced degrees.

(2) The legislature also finds that access to high employer demand programs of study is imperative for the state's global competitiveness and economic prosperity, particularly those degrees in the science, technology, engineering, and mathematics (STEM) fields that align with the workforce skill demands of the regional economy, that support the aerospace industry, and provide skilled undergraduate and graduate-degree engineers required by the largest employers in the aerospace industry cluster.

(3) The legislature finds that meeting the long-range goal of greatly expanded access for the population of the region to the widest array of baccalaureate and graduate programs can best be accomplished by assigning responsibility to a research university with multiple experiences in similar settings.

(4) Management and leadership of the University Center of North Puget Sound is assigned to Washington State University to meet the needs of the Everett metropolitan area and the north Snohomish, Island, and Skagit county region and the state of Washington for baccalaureate and graduate degrees offered by a state university. The chief executive officer of the University Center of North Puget Sound is the director who reports to the president of Washington State University. The director shall manage the activities and logistics of operating the center, make policy and planning recommendations to the council in subsection (5) of this section, and implement decisions of the council.

(5) (a) Washington State University and Everett Community College must collaborate with community leaders, and other four-year institutions of higher education that offer programs at the University Center of North Puget Sound to serve the varied interests of students in the region. To this end, a coordinating and planning council must be established to be responsible for long-range and strategic planning, interinstitutional collaboration, collaboration with the community served, and dispute resolution for the center. The following individuals shall comprise the coordinating and planning council:

**RCW 28B.30.902 Lind dryland research unit—Income from leased property.** (1) The Washington state treasury has been named a devisee of certain property pursuant to a will executed by Cleora Neare on July 14, 1982. Under \*RCW 79.01.612, property that has been devised to the state is to be managed and controlled by the department of natural resources. The legislature hereby finds that it is in the best interest of the state to transfer part of the real property devised to the state under the will to Washington State University for use in conjunction with the Washington State University Lind dryland research unit located in Adams county and sell the remaining property for the benefit of the common schools.

(2) Washington State University is hereby granted ownership, management, and control of the real property legally described as all of Section 6, and the west half of Section 5, Township 17, Range 34 East E.W.M., Adams county, Washington, upon close of probate, or sooner if the property can be transferred without cost, other than costs properly allocated to the state as devisee under probate, to Washington State University.

Upon transfer of this property, the parcel shall become part of the Washington State University Lind dryland research unit. Any and all lease income derived from current leases on the property shall be deposited in a dedicated Washington State University local account for the benefit of the Lind dryland research unit.

**RCW 28B.30.903 Washington State University extension energy program—Plant operations support program.** (1) The Washington State University extension energy program shall provide information, technical assistance, and consultation on physical plant operation, maintenance, and construction issues to state and local governments, tribal governments, and nonprofit organizations through its plant operations support program. The Washington State University extension energy program may not enter into facilities design or construction contracts on behalf of state or local government agencies, tribal governments, or nonprofit organizations. The plant operations support program created in this section must be funded by voluntary subscription charges, service fees, and other funding acquired by or provided to Washington State University for such purposes.

(2) Subject to the availability of amounts appropriated for this specific purpose through the 2023-2025 biennium, the Washington State University extension energy program must establish and administer a technical assistance and education program focused on the use of alternative fuel vehicles. Education and assistance may be provided to public agencies, including local governments and other state political subdivisions. [2019 c 287 § 2; 2010 c 37 § 1.]

**Findings—Intent—2019 c 287:** "The legislature finds that increasing the rate of adoption of electric vehicles and vessels and other clean alternative fuel vehicles will help to reduce harmful air pollution from exhaust emissions, including greenhouse gas emissions, in the state. The legislature also finds that an increased reliance on greener transit options will help to further reduce harmful air pollution from exhaust emissions. The legislature further finds that support for clean alternative fuel infrastructure can help to increase adoption of green transportation in the state, as noted in a 2015 joint transportation committee report. It is therefore the legislature's intent to drive green vehicle and vessel adoption and increased green transit use by: (1) Establishing and extending tax incentive programs for alternative fuel vehicles and related infrastructure, including for commercial vehicles; (2) providing funding for a capital grant program to assist transit authorities in reducing the carbon output of their fleets; (3) increasing public and private electric utilities' ability to invest in electric vehicle charging infrastructure; (4) establishing a technical assistance program for public agencies within the Washington State University's energy program; (5) funding a pilot program to test methods for facilitating access to alternative fuel vehicles and alternative fuel vehicle infrastructure by low-income residents of the state; (6) funding a study to examine opportunities to provide financing assistance to lower-income residents of the state who would like to purchase an electric vehicle; and (7) establishing a tax incentive program for certain electric vessels." [2019 c 287 § 1.]
