

WAC 296-870-70060 Two- and four-point suspended working platforms.

Important:

In addition to these requirements, you also need to meet the requirements of both of the following sections in this chapter:

1. Suspended working platforms and manned platforms used on supported equipment, WAC 296-870-70050;

2. Working platform fall protection, WAC 296-870-70055.

(1) You must make sure an emergency electric operating device is provided on roof powered platforms that:

(a) Can be used if either the normal operating device located on the platform or the cable connected to the platform fails; and

(b) Is mounted in a secured compartment near the hoisting machine.

(2) You must make sure the secured compartment containing the emergency electric operating device:

(a) Is labeled with instructions for using the emergency electric operating device; and

(b) Has means for opening the compartment mounted in:

(i) A break-glass receptacle near the emergency electric operating device; or

(ii) An equivalent secure and accessible location.
