

WAC 296-806-48072 Provide kickback protection on planers running stock of varied thicknesses. You must provide kickback protection on planers running stock of varied thicknesses at the same time by providing either:

- (1) Sectional feed rolls that provide feeding contact pressure on the stock; or
- (2) Suitable nonkickback fingers at the infeed end of each section.

Note: The sectional feed rolls need to have sufficient yield in their construction to provide contact pressure on any thickness of stock the machine is capable of processing.
