- WAC 314-55-430 Qualifying patient or designated provider extraction requirements. (1) Qualifying patients or designated providers, including those participating in a cooperative, may extract or separate the resin from cannabis using only the following noncombustible methods:
- (a) Heat, screens, presses, steam distillation, ice water, and other methods without employing combustible solvents or gases to create kief, hashish, or bubble hash;
- (b) Dairy butter, cooking oils or fats derived from natural sources, or other home cooking substances;
- (c) Food grade glycerin and propylene glycol solvent based extraction;
- (d)  $\rm CO_2$  may be used if used in a closed loop system as referenced in WAC 314-55-104.
- (2) Only food grade substances may be used in any stage of processing.
- $(\bar{3})$  Use of combustible materials including, but not limited to, butane, isobutane, propane, heptane, and ethanol is expressly forbidden.
- (4) Resins extracted or separated from cannabis are for the personal use of the qualifying patient or cooperative members only.
