

WAC 504-49-515 Are the renewable energy system's environmental attributes transferred when ownership of the renewable energy system changes? The nonpower attributes of the renewable energy system belong to the utility customer who owns or hosts the system or, in the case of a community solar project or a shared commercial solar project, the participant. The attributes may be kept, sold, or transferred at the utility customer's discretion unless, in the case of a utility-owned community solar or shared commercial solar project, a contract between the customer and the utility clearly specifies that the utility retains the attributes.

[Statutory Authority: RCW 28B.30.150. WSR 18-20-025, § 504-49-515, filed 9/24/18, effective 10/25/18.]
